31. Validity of decisions of Council, Senate, Convocation and boards and committees.

SCHEDULE: Statutes of the University.

ACT

To establish the Midlands State University and to provide for matters connected therewith or incidental thereto.

[amended by General Laws Amendment (No.2) Act 2002]

[Date of Commencement: 28 May, 1999.]

ENACTED by the President and the Parliament of Zimbabwe.

1 Short title

This Act may be cited as the Midlands State University Act [*Chapter 25:21*].

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

2 Interpretation

In this Act—

"academic staff" means all persons employed, whether full-time or part-time, by the University as;

(*a*) professors, lecturers of any class or persons engaged in research; or

(*b*) holders of posts declared by the Senate to be academic posts;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

"Academic Appointments Board" means the Board established in terms of subsection (1) of section *twenty four*;

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

"administrative staff" means all persons employed by the University who are categorised in terms of the Statutes as members of the administrative staff;

"Bursar", means the person holding office as Bursar of the University in terms of section *twenty*;

"chairman of department" means a person appointed in terms of the Statutes to be chairman of a teaching department or head of an institute or centre controlled by the University;

"Chairman of the Council" means the person elected to be chairman of the Council in terms of section *fourteen;*

"Chancellor" means the President in his capacity as chancellor of the University in terms of section *seven*;

"Council" means the University Council established in terms of section *ten*;

"employees" means all persons employed by the University who are categorised in terms of the Statutes as employees;

"faculty" means a faculty of the University established in terms of the Statutes;

"Faculty Board" means a faculty board established in terms of the Statutes;

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

"institute" means an institute established in terms of the Statutes;

"Librarian" means the person holding office as Librarian of the University in terms of section *twenty-one*;

"Minister" means the Minister of Higher Education or any other Minister to whom the President may, from time to time, assign the administration of this Act;

[The Minister of Higher Education, Science and Technology Development was assigned by SI 221/2018 w.e.f.19th October,2018.]

"non-academic staff" means all persons employed by the University who are not members of the academic staff;

"Pro-Vice-Chancellor" means a person holding office as Pro-Vice-Chancellor in terms of section *nine*;

"professor" means a professor of the University;

"Registrar" means the person holding office as Registrar of the University in terms of section *nineteen*;

"regulations" means regulations made by the Senate under section *thirty*;

"Senate" means the Senate established in terms of section *sixteen*;

"senior", in relation to the staff of the University, means the Registrar, the Bursar and such other members of staff as the Council may determine from time to time;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

"Statutes" means the Statutes of the University set out in the Schedule as amended from time to time or replaced in terms of section *twenty-nine*;

"Students' Union" means any association of students recognized by the Council as the Students' Union;

"technical staff" means all persons employed by the University who are categorised in terms of the Statutes as members of the technical staff;

"University" means the Midlands State University constituted in terms of this Act;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

"Vice-Chancellor" means the person holding the office of Vice-Chancellor in terms of section *eight*.

"workers" means all persons employed by the University who are categorised in terms of the Statutes as workers.

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

3 Establishment of University

(1) There is hereby constituted a university to be known as the Midlands State University.

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(2) The University shall be a body corporate with perpetual succession and shall be capable of suing and being sued in its corporate name and, subject to this Act, of performing all acts that bodies corporate may by law perform

4 Objects and powers of the University

(1) The objects of the University are the advancement of knowledge, the diffusion and extension of arts, science and learning, the preservation, dissemination and enhancement of knowledge that is relevant for the development of the people of Zimbabwe through teaching and learning, research, community service, innovation and industrialisation and, so far as is consistent with those objects, the nurturing of the intellectual, aesthetic, social and moral growth of the students at the University.

[Subsection (1) substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(2) For the achievement of its objects, the University shall, subject to this Act, have the following powers—

(*a*) to provide for research and courses of instruction, whether on a full-time or part-time basis by correspondence or extra-murally, and to take such other steps as may appear necessary and desirable for the advancement and dissemination of knowledge;

(*b*) to hold examinations and to confer degrees, including honorary degrees, diplomas, certificates and other awards, upon persons who have followed a course or courses of study approved by the Senate and additionally, or alternatively, have satisfied such other requirements as may be determined by the Senate;

(*c*) to provide courses not leading to degrees, diplomas or certificates, including training for persons wishing to enter the University;

(*d*) to provide opportunities for staff and students and such other persons as the University may approve to engage in productive activity in any field in which the University may from time to time be engaged;

(*e*) to promote research into economic, political, social, cultural, scientific and other matters generally and with particular reference to the interests of Zimbabwe;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*f*) to institute professorships, lectureships, research fellowships, staff development fellowships and other posts and offices and to make appointments thereto;

(*g*) to institute and award fellowships, scholarships, bursaries, prize medals, exhibitions, and other distinctions, awards and forms of assistance consistent with its objects;

(*h*) to erect, equip and maintain laboratories, offices, halls of residence, lecture halls, libraries, museums and other buildings and structures required for the promotion of its objects;

(*i*) to enter into such contracts and to establish such trusts and to appoint such staff as the University may require;

(*j*) to regulate and provide for the residence of officers, staff, students and employees;

(*k*) to provide and maintain recreational facilities for officers, staff, students and employees;

(*l*) to demand and receive such fees as may from time to time be prescribed by or in terms of the Statutes;

(*m*) to establish pension, superannuation or provident or other credit fund schemes for the benefit of its staff or any section thereof and to enter into arrangements with the Government or any organization or person for the operation of such schemes;

(*n*) to acquire any property, movable or immovable, and to take, accept and hold any property which may become vested in it by way of purchase, exchange, grant, donation, lease, testamentary disposition or otherwise;

(*o*) to sell, mortgage, let on hire, exchange, donate or otherwise dispose of any property held by it;

(*p*) to invest in land or securities such funds as may be vested in it for the purpose of endowment, whether for general or specific purposes, or such other funds as may not be immediately required for current expenditure;

(*q*) to borrow money for any purpose which the Council thinks fit;

(*r*) to lend money in the form of short-term loans to its staff on terms and conditions approved by the Council;

(*s*) to do all such acts and things, whether or not incidental to the powers specified in this subsection and whether inside or outside Zimbabwe, as may be requisite in order to further its objects or any of them.

5 Membership of the University

The University shall consist of—

(*a*) a Chancellor; and

(*b*) a Vice-Chancellor; and

(*c*) 1 or more Pro-Vice-Chancellors; and

(*d*) members of the Council; and

(*e*) members of the Senate; and

(*f*) members of staff; and

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*g*) registered students; and

(*h*) the Convocation.

6 Prohibition against discrimination in membership of University

(1) No test of religious or political belief, race, ethnic origin, nationality or gender shall be imposed upon or required of any person in order to entitle him to be admitted as a member of staff or student of the University or to hold any office therein or privilege thereof.

(2) Nothing in subsection (1) shall be construed as preventing the University from giving preference to citizens or residents of Zimbabwe when making appointments or promotions or when admitting students.

7 Chancellor

(1) The President of Zimbabwe shall be Chancellor of the University.

(2) The Chancellor shall be the head of the University.

(3) The Chancellor shall have the right—

(*a*) to preside over any assembly or meeting held by or under the authority of the University; and

(*b*) upon the recommendation of the Council and the Senate, to confer degrees, diplomas, certificates and other awards and distinctions of the University and to withdraw or restore such awards.

8 Vice-Chancellor

(1) The Vice-Chancellor shall be appointed by the Chancellor after consultation with the Minister and the Council and shall hold office for such period as is provided in his contract of employment.

(2) Subject to the general control of the Council, the Vice-Chancellor shall be the chief academic, administrative and disciplinary officer of the University, with general responsibility for maintaining and promoting the efficiency, effectiveness and good order of the University.

(3) Subject to subsections (4) and (5), the Vice-Chancellor may—

(*a*) suspend from duty any member of staff of the University;

(*b*) subject to section *six*, prohibit the admission of a student or any person to the University;

(*c*) prohibit any student or group of students or person or group of persons from entering or remaining on such part or parts of the University campus as he may specify;

(*d*) expel or suspend, indefinitely or for such period as he may specify, any student or group of students;

(*e*) dissolve or suspend, indefinitely or for such period as he may specify, the Students' Union or any of its committees or organs, or prohibit or suspend, indefinitely or for such period as he may specify, any activity or function of the Students' Union or any of its committees or organs;

(*f*) impose any other penalty or give any other order in respect of—

(i) a member of staff, which is recommended by the Staff Disciplinary Committee in terms of subsection (6) of section *twenty-six*;

(ii) a student, which is recommended by the Student Disciplinary Committee in terms of subsection (6) of section *twenty-seven*.

(4) The Vice-Chancellor shall not expel a student for misconduct unless the student has been found guilty of misconduct by the Student Disciplinary Committee in terms of section *twenty-seven*.

(5) Any action taken by the Vice-Chancellor in terms of subsection (3) shall be subject to ratification by the Council.

9 Pro-Vice-Chancellors

(1) 1 or more Pro-Vice-Chancellors may be appointed by the Council with the approval of the Minister and in accordance with the Statutes.

(2) A Pro-Vice-Chancellor shall assist the Vice-Chancellor in the performance of his functions and, in addition, shall have such functions as may be specified in the Statutes.

(3) The Vice-Chancellor may delegate to a Pro-Vice-Chancellor, either absolutely or subject to conditions, any of his functions in terms of this Act and may at any time amend or withdraw any such delegation:

Provided that the delegation of a function in terms of this subsection shall not prevent the Vice-Chancellor from himself exercising that function.

10 Council

[Substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(1) Subject to this Act and any general directions as to policy given by the Minister, the government and executive authority of the University shall be vested in the Council which shall consist of not less than ten (10) and not more than twenty (20) members including—

(a) the Chancellor and the Vice-Chancellor (and the Pro-Vice Chancellors who may attend the Council meeting at the invitation of the Vice Chancellor but shall not have voting privileges), who shall be *ex-officio* members; and

(b) 10 persons appointed by the Minister including a Ministry representative; and

(c) 2 persons who are members of the academic staff appointed by the Senate, other than the Vice-Chancellor and any Pro-Vice-Chancellor; and

(d) the President of the Students' Representative Council, who shall be an *ex-officio* member; and

(e) 2 persons elected by the workers' committee of the University.

(2) In appointing members to the Council, the Minister or any appointing authority under this section shall—

(a) ensure that both genders are equally represented and for the avoidance of doubt that women constitute half the membership of the Council; and

(b) ensure that there is fair regional representation;

(c) appoint members of relevant and appropriate professions.

11 Functions of Council

(1) Subject to this Act and the Statutes, the Council shall—

(*a*) appoint, with the approval of the Minister, the Pro-Vice Chancellors and the Registrar; and

(*b*) appoint the Bursar, the Librarian, the academic staff, the administrative staff and other employees of the University:

Provided that the Council may delegate its duties under this paragraph to such committee as may be prescribed in the Statutes;

(*c*) on the recommendation of the Senate, institute professorships, associate professorships and other academic offices, and abolish or hold in abeyance any such offices;

(*d*) receive and, if the Council considers it proper to do so, give effect to reports and recommendations from the Senate on those matters upon which the Senate is authorized or required by this Act or the Statutes to make reports and recommendations;

(*e*) cause to be prepared annually a statement of the income and expenditure of the University during the previous financial year, and of the assets and liabilities of the University on the last day of that previous financial year;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*f*) submit statements of income and expenditure referred to in paragraph (*e*) to audit by an auditor appointed by the Council, and shall publish such statements and the auditor's report thereon;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*g*) cause to be prepared annually estimates of income and expenditure for the following financial year;

(*h*) cause to be prepared and made available to the public a report on the activities of the University during each year;

(*i*) to prepare and refer to the Senate any proposed amendment, repeal or replacement of the Statutes.

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(2) Without limitation on any other powers conferred on the Council by this Act, the Council shall have the following powers—

(*a*) to receive recommendations from the Senate for the conferment, withdrawal or restoration of degrees, including honorary degrees, and diplomas, certificates and other awards and distinctions of the University and, if approved, to submit them to the Chancellor;

(*a*1) to amend, repeal or replace the Statutes in terms of subsection (2) of section *twenty-nine*;

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*b*) to administer the property of the University and to control its affairs and functions;

(*c*) to exercise on behalf of the University such of the powers set out in subsection (2) of section *four* as are not exercisable in terms of this Act by any other authority;

(*c*1) to delegate its functions to the Executive Committee or to any other committee or officer of the University:

Provided that the delegation or any such function shall not prevent the Council from exercising that function;

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*d*) to do such other acts as it considers to be necessary for the proper administration of the University and the achievement of its objects.

12 Disqualifications for appointment as a Council member

The Minister shall not appoint a person as a member of Council and no person shall be qualified to hold office as a member of Council who—

(*a*) is not a citizen of Zimbabwe or permanently resident in Zimbabwe; or

(*b*) has in terms of any law in force in any country—

(i) been adjudged or otherwise declared insolvent or bankrupt and has not been rehabilitated or discharged; or

(ii) made an assignment to, or arrangement or composition with, his creditors which has not been rescinded or set aside; or

(*c*) has, within the period of 5 years immediately preceding the date of his proposed appointment, been sentenced in any country to a term of imprisonment of or exceeding 6 months, whether or not any portion has been suspended, imposed without the option of a fine and has not received a free pardon.

13 Vacation of office by Council member

A member shall vacate office and his office shall become vacant—

(*a*) after giving the Minister such period of notice of his intention to resign as may be fixed in his conditions of appointment or, if no such period has been fixed, after the expiry of 1 month or of such other period of notice as he and the Minister may agree; or

(*b*) on the date he begins to serve a sentence of imprisonment, the term which is not less than 6 months, whether or not any portion has been suspended, imposed without the option of a fine in any country; or

(*c*) if he becomes disqualified in terms of paragraph (*a*) or (*b*) of section *twelve* to hold office as member; or

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*d*) if he is absent without the permission of the Council from three consecutive meetings of the Council.

14 Chairman and vice-chairman of Council

(1) The Council shall elect a chairman and a vice-chairman from amongst its members to hold office for such period and subject to such terms and conditions as are prescribed in the Statutes.

(2) At all meetings of the Council at which the Chancellor is not present the chairman of the Council or, in his absence, the vice-chairman shall preside.

(3) If at any meeting of the Council the Chancellor and the chairman and vice-chairman of the Council are all absent, the members of the Council who are present shall elect a person from amongst their number to preside at the meeting.

15 Executive Committee of Council

(1) There shall be a principal committee of the Council to be known as the Executive Committee.

(2) The Executive Committee shall consist of—

(*a*) the chairman and vice-chairman of the Council; and

(*b*) the Vice-Chancellor and every Pro-Vice-Chancellor; and

(*c*) 10 members of the Council, of whom—

(i) 4 shall be appointed by the Minister; and

(ii) 3 shall be appointed by the Senate; and

(iii) 3 shall be appointed by the Council.

(3) The chairman and vice-chairman of the Council shall be the chairman and vice-chairman, respectively, of the Executive Committee.

(4) The Executive Committee shall exercise such of the functions of the Council as the Council may delegate to it.

(5) Any delegation of functions by the Council in terms of subsection (4) may be made absolutely or subject to conditions and may be amended or withdrawn at any time.

(6) A delegation of any function by the Council in terms of subsection (4) shall not prevent the Council from itself exercising that function.

16 Senate

(1) Subject to this Act, the academic authority of the University shall be vested in the Senate, which shall consist of—

(*a*) the Vice-Chancellor, the Pro-Vice-Chancellors, deans, professors, deans, the chairmen of departments and the Librarian, who shall be *ex officio* members; and

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*b*) 1 member of the permanent academic staff from each faculty, who shall be elected annually by such staff; and

(*c*) 6 students elected annually by the Students' Union:

Provided that such students shall not be entitled to attend deliberations of the Senate on matters which are considered by the chairman of the Senate to be confidential.

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(2) If the permanent academic staff or the Students' Union fails or declines to elect a person in terms of paragraph (*b*) or (*c*) of subsection (1), the Council may appoint a suitably qualified person to fill the vacancy.

17 Functions of Senate

The Senate shall have the following functions—

(*a*) to promote the advancement of knowledge through research;

(*b*) to formulate and carry out the academic policy of the University;

(*c*) to regulate the programmes, subjects and courses of study and the examinations held by the University;

(*d*) to regulate the admission of students to the University and to the courses of instruction held by the University;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*e*) to recommend to the Chancellor, through the Council, the conferment of degrees, including honorary degrees, diplomas, certificates and other awards and distinctions of the University and the withdrawal and restoration of such awards;

(*f*) to fix, subject to consultation with any sponsors and subject to the approval of the Council, the times, modes and conditions of competitions for fellowships, scholarships and prizes;

(*g*) to appoint examiners for examinations conducted by the University;

(*h*) to cause to be prepared estimates of expenditure required to carry out the academic work of the University and to submit them to the Council;

(*i*) subject to the approval and direction of the Council, to formulate, modify and revise the organization of faculties, departments, institutions, centres and units;

(*j*) to recommend to the Council the institution, abolition or holding in abeyance of professorial chairs and other academic offices;

(*k*) without derogation from the powers of the Council, to propose changes to the Statutes;

(*l*) to make any regulations it is authorized to make by or in terms of this Act;

(*m*) to appoint committees, which may include persons who are not members of the Senate, to exercise any of the functions of the Senate, other than the power to make regulations;

(*n*) to make periodic reports on its activities to the Council and to report on any matter referred to it by the Council;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*o*) to do such other acts as the Council may authorize or direct it to do.

18 Academic Board

(1) There shall be a principal committee of the Senate to be known as the Academic Board.

(2) The Academic Board shall consist of—

(*a*) the Vice-Chancellor, who shall be chairman; and

(*b*) every Pro-Vice-Chancellor; and

(*c*) 4 full professors of the University, elected annually by the Senate; and

(*d*) all the deans of faculties; and

(*e*) the Librarian; and

(*f*) 2 members of the Senate, elected annually by the persons referred to in paragraph (*a*) and (*b*) of subsection (1) of section *sixteen*.

(3) The Academic Board shall exercise such of the functions of the Senate as the Senate, with the approval of the Council, may delegate to it.

(4) Any delegation of functions by the Senate in terms of subsection (3) may be made absolutely or subject to conditions and may be amended or withdrawn at any time.

(5) A delegation of any function by the Senate in terms of subsection (3) shall not prevent the Senate from itself exercising that function.

19 Registrar

(1) There shall be a Registrar of the University who shall be appointed by the Council with the approval of the Minister in the manner provided in the Statutes.

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(2) Subject to the directions of the Council, the Registrar shall be responsible for the general administration of the University, and shall perform such other functions as may be specified in the Statutes.

(3) The Registrar, or a member of his staff whom he may authorize to act for him, shall be secretary of the Council and the Senate and their principal committees.

20 Bursar

(1) The Bursar shall be appointed by the Council with the approval of the Minister.

[Subsection (1) substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(2) Subject to the directions of the Council, the Bursar shall act as the accountant of the University and shall be responsible for the safeguarding of its funds and, in accordance with the general directions of the Vice-Chancellor, for authorizing its investments and expenditure.

(3) The Bursar shall perform such additional functions as may be specified in the Statutes.

21 Librarian

(1) The Librarian shall be appointed by the Council with the approval of the Minister.

[Subsection (1) substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(2) Subject to the directions of the Senate and the Vice-Chancellor, the Librarian shall be responsible for the administration and safeguarding of the libraries of the University.

22 Convocation

(1) The Convocation of the University shall consist of all persons whose names appear on the Convocation Roll maintained by the Registrar.

(2) The Vice-Chancellor and all Pro-Vice-Chancellors, deans, professors, lecturers, chairmen of departments, the Registrar, the Librarian and the Bursar shall be *ex officio* members of the Convocation.

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(3) All graduates of the University who signify in writing addressed to the Registrar that they desire to be members of the Convocation and who inform the Registrar of their address shall be entitled to have their names entered on the Convocation Roll.

(4) Subject to section *seven*, the Vice-Chancellor or such other person as he may appoint shall be chairman of meetings of the Convocation.

(5) Meetings of the Convocation shall be held at such times and places as the Council may direct.

(6) The Convocation may deal with any matter relating to the University which the Council, in accordance with the Statutes, may refer to the Convocation.

23 Terms and conditions of service of staff

The terms and conditions of service for each category of staff employed by the University, including the Vice-Chancellor and the Pro-Vice-Chancellors, shall be determined by the Council in terms of this Act and, subject to the Labour Act [*Chapter 28:01*], such terms and conditions shall provide that—

(*a*) any person so employed shall be entitled to resign from his employment on giving such notice in writing to the Registrar as may be fixed in such terms and conditions;

(*b*) any person so employed shall, subject to any exception that may be provided for in special cases, retire from his office at such time or in such circumstances as may be fixed in such terms and conditions;

(*c*) no summary termination of the employment of any person so employed shall take place except for good cause and, in the event of any such termination, the person concerned shall have a right of appeal to the Council, whose decision shall be final.

24 Appointment and grading of staff

(1) Every appointment to the academic staff shall be made by an Academic Appointments Board consisting of—

(*a*) the Vice-Chancellor or his nominee, who shall be chairman; and

(*b*) 2 members of the Council who are not members of staff of the University; and

(*c*) the chairman of the department to which the appointment is made; and

(*d*) 1 other member, approved by the Vice-Chancellor, of the department to which the appointment is made; and

(*e*) the dean of the faculty to which the appointment is made; and

(*f*) the chairman of a department approved by the Council as being related to the department to which the appointment is made.

(2) Subject to this Act and the Statutes, the Council shall appoint boards of selection for the purpose of appointing members of staff other than the Vice-Chancellor, Pro-Vice-Chancellors, the Registrar, the Bursar, the Librarian and academic staff.

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(3) The Council shall appoint a Grading Committee for the purpose of determining all matters relating to the grades and points of entry upon salary scales by members of staff of the University.

25 Promotion of staff

(1) Every promotion of a person to a post or grade within the academic staff shall be effected by an Academic Staff Promotions Committee consisting of—

(*a*) the Vice-Chancellor or his nominee, who shall be chairman; and

(*b*) every Pro-Vice-Chancellor; and

(*c*) 4 members of the Council who are not members of staff of the University, appointed by the Council; and

(*d*) all deans of faculties; and

(*e*) at least 3 full professors of the University appointed by the Senate once every 3 years.

(2) Every promotion of a person to a post or grade within the non-academic staff shall be effected by a Non-Academic Staff Promotions Committee appointed by the Council and consisting of—

(*a*) a Pro-Vice-Chancellor, who shall be chairman; and

(*b*) the Registrar; and

(*c*) the Bursar; and

(*d*) the Librarian; and

(*e*) 2 members of the Council who are not members of staff of the University; and

(*f*) 1 representative of each category of non-academic staff prescribed in the Statutes; and

(*g*) 1 representative of the faculty where the person to be promoted works.

26 Staff Disciplinary Committee

[Substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(1) There shall be a staff disciplinary committee which shall consist of the following members appointed by the Vice-Chancellor—

(a) a Pro-Vice-Chancellor, who shall be the chairperson; and

(b) a senior member of the academic or administrative staff; and

(c) a member of the Council; and

(d) a member of the academic or administrative staff of similar status to the person charged;

(2) 2 members of the staff disciplinary committee shall form a quorum.

(3) All matters to be decided at any meeting of the staff disciplinary committee shall be decided by a simple majority and, in the event of an equality of votes, the chairman or person presiding shall have a casting vote in addition to his or her deliberative vote.

(4) The functions of the staff disciplinary committee shall be to investigate any breach of a statute, regulation or ordinance or other misconduct on the part of any member of the academic or administrative and general staff and, subject to subsection (6), to recommend to the Vice-Chancellor the punishment to be imposed on or order to be made in respect of the member if it finds him or her guilty of such misconduct.

(5) A person charged with misconduct referred to in subsection (4) shall have a right of audience before the staff disciplinary committee.

(6) Where the staff disciplinary committee has found a person guilty of misconduct referred to in subsection (4), the Committee shall recommend to the Vice-Chancellor any one or more of the following—

(a) that the person's employment be terminated;

(b) that the person shall pay to the University a fine not exceeding level 5;

(c) that the person be demoted;

(d) that the person be censured or reprimanded;

(e) such other penalty or order as may be provided for by or in terms of the Statutes.

27 Student Disciplinary Committee

(1) There shall be a Student Disciplinary Committee which shall consist of the following members appointed by the Vice-Chancellor¾

(*a*) a Senior Proctor, who shall be chairman; and

(*b*) 4 members of the academic staff one of whom shall belong to the same department or faculty to which the student charged belongs; and

(*c*) 2 students nominated by the Students' Union, one of whom shall belong to the same department or faculty to which the student charged belongs; and

(d) a person registered in terms of the Legal Practitioners Act [*Chapter 27:07*].

[Para (d) substituted by section 7 of Act 4/2022 w.e.f. 2nd September, 2022.]

(2) 5 members of the Student Disciplinary Committee shall form a quorum.

(3) All matters to be decided at any meeting of the Student Disciplinary Committee shall be decided by a simple majority and, in the event of an equality of votes, the chairman or person presiding shall have a casting vote in addition to his deliberative vote.

(4) The functions of the Student Disciplinary Committee shall be to investigate any breach of a Statute, regulation or ordinance or other misconduct on the part of any student and, subject to subsection (6), to recommend to the Vice-Chancellor the punishment to be imposed on the student if it finds him guilty of such misconduct.

(5) A student charged with misconduct referred to in subsection (4) shall have a right of audience and to be legally represented before the Student Disciplinary Committee.

(6) Where the Student Disciplinary Committee has found a student guilty of misconduct referred to in subsection (4), the Committee shall recommend to the Vice-Chancellor the imposition upon the student of any one or more of the following punishments.

(*a*) expulsion or suspension from the University;

(*b*) the withdrawal of any academic or University privilege, benefit, right or facility other than to follow courses of instruction and present himself for examination;

(*c*) the imposition of a fine not exceeding level 3, which fine may be deducted from any allowances payable to the student and shall be paid to the University;

[Amended by Act 22 of 2001;
substituted by Part VI, section 7 of Act 4/2022 w.e.f. 2nd September, 2022.]

(d) a censure or reprimand;

(*e*) such other penalty as may be provided for by or in terms of the Statutes.

28 Finance Committee

(1) Subject to this Act, there shall be a Finance Committee of the Council consisting of—

(*a*) …

(*b*) …

[Paras (a) and (b) repealed by Act 4/2022 w.e.f. 2nd September, 2022.]

(*c*) every Pro-Vice-Chancellor; and

(*d*) 3 members of the Council who are not members of the University staff and one of them shall be the Chairperson of the Finance Committee;

[Para (d) amended by Act 4/2022 w.e.f. 2nd September, 2022.]

and

(*e*) 2 persons appointed by the Senate from among its members; and

(*f*) the Bursar, who shall be the secretary of the Finance Committee; and

(*g*) the Registrar; and

(*h*) a representative of the deans of faculties appointed by the Council.

(2) The functions of the Finance Committee shall be as provided in the Statutes.

28A Service of process

Any writ or other process, notice or document may be served on the University, Council or Senate by serving the same on the Registrar.

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

29 Statutes

(1) Subject to this Act, the University shall be administered in accordance with the Statutes.

(2) With the approval of the Minister the Council may, by statutory instrument, amend, repeal or replace the Statutes set out in the Schedule in order to prescribe all matters which, in terms of this Act, are required or permitted to be prescribed in Statutes or which, in the opinion of the Council, are necessary or convenient to be so prescribed for carrying out or giving effect to this Act or for the proper administration of the University.

(3) Subject to the Act, Statutes made in terms of subsection (2) may provide for—

(*a*) the appointment, conditions of service and functions of the Vice-Chancellor, the Pro-Vice-Chancellors, the Registrar, the Bursar, the Librarian and all members of staff and the categorisation of such members of staff;

(b) ….

[repealed by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*c*) the election or appointment of persons to the Council and the Senate and to committees of the Council and the Senate;

(*d*) the terms of office of members of the Council and its committees, other than *ex officio* members thereof;

(*e*) the terms of office and conditions of service of the chairman and vice-chairman of the Council;

(*f*) the convening of meetings of the Council, the Senate and the Convocation and of committees of the Council and the Senate, the quorum at such meetings and the procedure to be adopted thereat;

(*g*) the terms of office of members of the Academic Appointments Board and the Academic Staff Promotions Committee, boards of selection, the Grading Committee, the Non-Academic Staff Promotions Committee and the Finance Committee, the quorum at such meetings and procedure to be adopted thereat;

(*h*) the functions of the Academic Appointments Board, boards of selection, the Grading Committee, the Academic Staff Promotions Committee, the Non-Academic Staff Promotions Committee, the Finance Committee and the Convocation;

[amended by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

(*i*) the persons who may enter into contracts and sign documents on behalf of the University, and the procedure to be followed in relation to transactions entered into by or on behalf of the University;

(*j*) the establishment and organization of faculties, departments, centres and institutes;

(*k*) the functions of deans of faculties, chairmen of departments and heads of centres and institutes;

(*l*) the holding of congregations of the University for the purpose of conferring degrees, diplomas, certificates and other honours and awards;

(*m*) the seal of the University and its use and custody;

(*n*) the academic year of the University;

(*o*) the discipline of members of staff and students and the procedures to be adopted in respect thereof;

(*p*) fees and charges to be paid for anything done by any person in terms of this Act;

(*q*) empowering any person specified in the Statutes to make ordinances or rules in respect of any matter referred to in paragraphs (*a*) to (*p*).

30 Regulations

(1) Subject to this Act and the Statutes and with the approval of the Council, the Senate may make regulations prescribing any matter which, in the opinion of the Senate, is appropriate to be prescribed for the better carrying out of the Senate's functions.

(2) Regulations may provide for—

(*a*) teaching within the University, whether generally or in relation to specific subjects;

(*b*) progress reports to be submitted by members of the academic staff;

(*c*) schemes of study and research and the conditions subject to which such schemes may be embarked upon or continued;

(*d*) the use of libraries of the University;

(*e*) the conduct and supervision of examinations;

(*f*) the award of degrees, diplomas, certificates and other academic honours and awards, other than honorary degrees, honours or awards.

(3) The Senate may at any time amend or repeal any regulations.

(4) Regulations need not be published in the *Gazette*, but the Senate shall publish them in such manner as the Senate considers will best make them known to the persons to whom they apply.

31 Validity of decisions of Council, Senate, Convocation and boards and committees

No decision or act of the Council, the Senate, the Convocation or any board or committee established by or in terms of this Act shall be invalid solely on the ground that—

(*a*) the Council, Senate, Convocation, board or committee, as the case may be, consisted of fewer than the number of members for which provision is made by or in terms of this Act; or

(*b*) a disqualified person acted as a member of the Council, Senate, Convocation, board or committee, as the case may be;

if the duly qualified members who took the decision or did or authorized the act constituted a quorum of the membership of the Council, Senate, Convocation, board or committee, as the case may be.

15. Meetings of faculty boards.

16. Teaching departments.

17. Institutes and centres.

18. Appointment of Registrar, Bursar and Librarian.

19. Procedure generally.

20. Financial procedures.

21. Auditors.

22. University seal.

23. Ordinances.

24. Arrangements with other universities, affiliated bodies, etc.

Appointment of Pro-Vice-Chancellors

1.

(1) For the purpose of considering appointments to the office of Pro-Vice-Chancellor, there shall be a joint committee of the Council and the Senate consisting of—

(*a*) the chairman of the Council, who shall be the chairman of the joint committee; and

(*b*) the vice-chairman of the Council; and

(*c*) the Vice-Chancellor; and

(*d*) 2 persons appointed by the Council from among its members who are not members of the Senate; and

(*e*) 3 persons appointed by the Senate from among its members.

(2) The joint committee constituted by this Statute shall consider each applicant for appointment to a vacancy in the office of Pro-Vice-Chancellor and shall make recommendations thereon to the Council, and the Council, after considering the joint committee's recommendations, shall make the appointment concerned with the approval of the Minister.

(3) A Pro-Vice-Chancellor shall hold office for 3 years from the date of his appointment and, subject to subsection (2) and the approval of the Minister, shall be eligible for re-appointment.

Length of appointment of members of Council

2.

(1) Members of the Council, other than *ex-officio* members, shall hold office for 4years, and shall be eligible for re-appointment or re-election for one further term, as the case may be.

[Substituted by Act 4/2022 w.e.f. 2nd September, 2022.]

(2) Any member of the Council, other than an *ex officio* member, may resign his membership at any time by notice in writing addressed to the Minister.

[Amended by Act 4/2022 w.e.f. 2nd September, 2022.]

Casual vacancies in Council

3.

Any casual vacancy occurring among the appointed or elected members of the Council shall be filled as soon as possible by the person, persons or body which appointed or elected the member whose place has become vacant, and the person so appointed or elected shall hold office for the remainder of the period for which the person whose place he fills was appointed or elected.

Meetings and quorum of Council

4.

(1) The Council shall meet at least 3 times a year.

(2) The quorum of the Council shall be one-half of the members holding office at the time of the meeting.

Resolutions by circulation among members of Council

5.

A resolution proposed by the Executive Committee of the Council, other than for the purpose of making a Statute, which is on its authority circulated by the Registrar to all members of the Council and which receives the written agreement of not less than two-thirds of such members shall, upon receipt of such agreement by the Registrar, have the same force and effect as a resolution passed at a meeting of the Council.

Chairman and Vice-Chairman of Council

5A.

(1) The Council shall elect from among its members a Chairman and a Vice-Chairman, each to hold office for a period not exceeding three years, and each of whom shall be eligible for re-election.

(2) If both the Chairman and the Vice-Chairman are absent from a meeting of the Council the members present shall appoint from among themselves a chairman for the purpose of that meeting.

(3) If both the Chairman and the Vice-Chairman are at the same time unable to carry out their duties the Council may elect one of its members to perform such duties during such time.

[inserted by the General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

Meetings and quorum of Senate

6.

(1) The Senate shall meet at least three times a year.

(2) The quorum of the Senate shall be one-half of the members holding office at the time of the meeting.

(3) The Vice-Chancellor or, in his absence, a Pro-Vice-Chancellor, shall be chairman of the Senate.

Convocation

7.

There shall be no quorum for meetings of the Convocation, the proceedings of which shall be regulated by the chairman subject to any general or special direction of the Council.

Faculties

8.

The University shall include such faculties as may from time to time be established by the Council.

Deans

9.

(1) There shall be a dean of each faculty, who shall be appointed by a selection board appointed by the Council and chaired by the Vice-Chancellor or a Pro-Vice-Chancellor.

(2) A dean shall hold office for 3 years and, on the expiry of his term of office, shall be eligible for re-appointment, subject to statute 12.

Functions of deans

10.

(1) A dean shall be responsible to the Vice-Chancellor for—

(*a*) the character and quality of his faculty's academic programmes and teaching; and

(*b*) the proper direction, control and management of the staff, property, equipment and finances of his faculty; and

(*c*) contributing to the evolution and maintenance of an environment conducive to learning at the University.

(2) Without limiting subsection (1), a dean's functions include—

(*a*) the planning and control of his faculty's budget; and

(*b*) implementing the policies and objectives of the University and his faculty; and

(*c*) developing and maintaining relations with alumni of his faculty and with other organizations and persons, with a view to enriching the academic programmes offered by his faculty; and

(*d*) soliciting funds and other assistance to support programmes and projects of his faculty; and

(*e*) co-operating with other faculties, agencies and entities to further the programmes and projects of his faculty; and

(*f*) performing such other functions as may be prescribed by Ordinance.

Evaluation of performance of dean

11.

The performance of every dean shall be evaluated annually by a committee appointed by the Vice-Chancellor and consisting of senior academic staff and administrative staff.

Termination of appointment of dean

12.

(1) A dean may resign his office as such by giving the Vice-Chancellor one month's written notice or such longer or shorter notice as he and the Vice-Chancellor may agree.

(2) Subject to the approval of the Council, the Vice-Chancellor may suspend or terminate the appointment of a person as dean—

(*a*) on the recommendation of a committee referred to in section 11; or

(*b*) for other good cause.

(3) A Dean whose appointment has been suspended or terminated in terms of subsection (2) may appeal to the Council within fourteen days of being notified of the suspension or termination, and on any such appeal the Council may confirm, vary or rescind the suspension or termination, as the case may be, or give such other direction in the matter as it thinks appropriate.

Composition of faculty boards

13.

For each faculty there shall be a faculty board which shall consist of—

(*a*) all the full-time academic staff of the faculty; and

(*b*) such persons as may be assigned to the faculty board by the Senate; and

(*c*) two students elected annually by the students in the faculty.

Functions of faculty boards

14.

A faculty board shall have the following functions—

(*a*) to regulate, subject to the approval of the Senate, the teaching and study of the subjects assigned to the faculty;

(*b*) to report to the Senate on any matter specifically relating to the work of the faculty;

(*c*) to deal with any matter referred or delegated to it by the Senate;

(*d*) to appoint committees, which may include a minority of persons who are not members of the faculty board, to carry out any of the duties or exercise any of the powers of the board.

Meetings of faculty boards

15.

(1) The dean of each faculty shall call regular meetings of the faculty board at which matters relating to the policy of the faculty and appointments shall be discussed and recommendations adopted for submission to the appropriate authorities on appointments.

(2) The Vice-Chancellor and every Pro-Vice-Chancellor shall be entitled to attend any meeting of a faculty board or any committee thereof.

Teaching Departments

16.

(1) The teaching departments and their allocation to faculties shall be prescribed by ordinance.

(2) A chairman of department shall be appointed by the Vice-Chancellor, on behalf of the Council, from among, the full-time members of the academic staff of the department, after consultation with each member of the academic staff in the department and the dean of the faculty to which the department is allocated.

(3) A chairman of department shall hold office for a period of 3 years, or such other period as may be determined by ordinance, and shall be eligible for re-appointment.

(4) A department may be allocated to two or more faculties.

Institutes and centres

17.

The Council, after consultation with the Senate, may establish institutes or centres of learning within or outside the University and shall appoint the head of any such institute or centre and give directions as to its studies and research and administration.

Appointment of Registrar, Bursar and Librarian

18.

(1) For the purpose of considering appointments to the offices of Registrar, Bursar and Librarian, there shall be a joint committee of the Council and the Senate consisting of—

(*a*) the chairman of the Council, who shall be the chairman of the joint committee; and

(*b*) the vice-chairman of the Council; and

(*c*) the Vice-Chancellor; and

(*d*) every Pro-Vice-Chancellor; and

(*e*) two persons appointed by the Council from among its members who are not members of the Senate; and

(*f*) three persons appointed by the Senate from among its members.

(2) The joint committee constituted by this Statute shall consider each applicant to a vacancy in the office of Registrar, Bursar or Librarian and shall make recommendations thereon to the Council.

Procedure generally

19.

(1) Except as otherwise specifically provided by the Act or, these Statutes, in the absence of the chairman or vice-chairman at a meeting of a board or committee the members present shall elect from those present a chairman to preside over that meeting.

(2) Except as otherwise specifically provided by the Act or these Statutes, the quorum at any meeting of a board or committee shall be as fixed by the person or authority that appointed the board or committee.

(3) Except as otherwise specifically provided by the Act or these Statutes, each board or committee shall determine and may make rules for the time, place and procedure of its meetings.

(4) The minutes of a meeting of a board or committee shall be laid on the table at the next following meeting of the body that appointed it.

(5) At a meeting of board or committee, in the event of an equality of votes on any matter, the person presiding shall have a casting vote in addition to his deliberative vote.

(6) Subsections (3), (4) and (5) shall apply, *mutatis mutandis*, to the Council and the Senate, save that minutes of the Council shall be sent to the Chancellor and the Minister and a report of each meeting of the Council shall be laid on the table at a meeting of the Council.

Financial procedures

20.

(1) The Council shall fix the financial year of the University.

(2) The Finance Committee shall submit to the Council, before the beginning of the financial year, draft estimates of income and expenditure, and such estimates, amended as the Council thinks fit, shall be approved by the Council before the beginning of the financial year.

(3) The Council may revise the estimates during the course of the financial year and give directions for the manner in which amendments of expenditure estimates may be made, which directions may make provision for delegating the powers of revision so long as such delegation does not extend to altering the total estimated expenditure.

(4) As soon as practicable after the end of the financial year, a balance sheet and income and expenditure account with supporting schedules shall be submitted to the auditors.

(5) The audited accounts, with any comments thereon made by the auditors, shall be submitted to the Council.

Auditors

21.

(1) Subject to subsections (2) and (3), the Council shall, before the beginning of each financial year, appoint as auditors persons who are registered as public auditors in terms of the Public Accountants and Auditors Act [*Chapter 27:12*].

(2) No person shall be appointed as an auditor in terms of subsection (1) if he, or any of his partners or employees, holds any other office in the University.

(3) If no appointment of new auditors is made before the beginning of any financial year, the auditors in office shall continue in office.

(4) An auditor appointed in terms of subsection (1) shall be entitled at all reasonable times to require any officer, employee or agent of the University—

(*a*) to produce all accounts and other records relating to the financial affairs of the University as may be in the custody of such officer, employee or agent; and

(*b*) to provide such information or explanation as, in the opinion of the auditor, is necessary for the purposes of the audit.

University seal

22.

(1) There shall be a seal of the University, of such design as may be approved by the Council.

(2) The seal of the University shall be kept in the custody of the Registrar and, subject to the directions of the Council, shall be affixed to—

(*a*) certificates, degrees and diplomas conferred by the University; and

(*b*) any document attested by the signature of the Vice-Chancellor and the Registrar.

Ordinances

23.

(1) The Council may, with the approval of the Minister, make ordinances providing for any matter referred to in paragraphs (*a*) to (*p*) of subsection (3) of section 29 of the Act.

(2) The Registrar shall publish any ordinance made in terms of subsection (1) in such manner as the Council may direct, being a manner which the Council considers will best make the ordinance known to the persons to whom it applies.

Arrangements with other universities affiliated bodies, etc

24.

(1) The Council may make arrangements with any other university whereby students of the University may be registered as students of such other university and so enabled to study for, enter the examinations of and be afforded the degrees of such other university.

(2) The Council may affiliate to the University any other institution or any branch or department of any other institution, and may¾

(*a*) recognise selected members of the staff of any affiliated institution, branch or department as teachers of the University; and

(*b*) admit the members of any affiliated institution, branch or department to any of the privileges of the University; and

(*c*) accept attendance at courses of study in any affiliated institution, branch or department in place of attendance at courses of study at the University;

on such terms and conditions and subject to such rules as the Council may determine from time to time.

[amended by General Laws Amendment (No.2) Act 2002 promulgated on the 24th January, 2003 - with retrospective effect, in terms of clause 47 - from the 4th February, 2002

STAFF QUALIFICATIONS

FACULTY OF AGRICULTURE, ENVIRONMENT AND NATURAL RESOURCES MANAGEMENT AND AGRICULTURE

Executive Dean
C. Parwada, BSc (MSU), MSc (BUSE), MBA (ZOU), PGDE (ZOU), DPhil (University of Fort Hare SA)

Deputy Dean
T. Muziri, BSc Hons (UZ), MSc (AU), PhD (Stellenbosch, SA)

Assistan Registrar
L Mawuru, BA Hons (GZU), MA (GZU)

Administrative Assistant

HISTORICAL NOTE

Devolution

The idea of a University in the Midlands dates back to the foundation of the National University of Science and Technology when Gweru, which was identified as a possible site for a second university campus, lost its bid to Bulawayo and the Province of Matabeleland. Two other opportunities to host institutions of higher learning (the Open University and the Catholic University) were also missed by the Midlands Province when the two universities went to Harare instead. It was in the midst of such disappointments that two initiatives gradually converged to give birth to what has since become the Midlands State University. The then President of the Republic of Zimbabwe, His Excellency, Cde. Robert Gabriel Mugabe, on the nudging of the provincial political leadership of the Midlands, acceded to the idea of a national university being built in the Midlands and announced that at two provincial rallies held at Gokwe and Mataga growth points. The President's declarations coincided with the Ministry of Higher Education and Technology's policy of devolution, which was aimed at expanding access to higher education by converting teachers' and technical colleges into degree-granting institutions. These colleges would offer Bachelor of Education and Bachelor of Technology degree programmes.

In line with the devolution policy, the then Minister of Higher Education and Technology, the Hon, Dr S.I Mudenge appointed in October 1995 the Committee on the Devolution of Bachelor of Education and Bachelor of Technology Degree Programmes, which was chaired by Professor C.J Chetsanga to investigate the feasibility of upgrading teachers' and technical colleges into degree granting places. The Committee recommended that Gweru Teachers College spearhead the process, followed by Masvingo and Chinhoyi Teachers' Colleges and that Gweru starts by offering Bachelor of Education degrees. The next Minister of Higher Education, Hon. Dr I.M.C Chombo set up in June 1996 another committee chaired by Prof. H.A.M Dzinotyiwei to advise on the details of getting degree programmes going at Gweru Teachers

College. The Dzinotyiwei Committee recommended that the college should offer BA-Education, BSc – Education and B. Com- Education degree programmes under some special relationship with the University of Zimbabwe for four years before becoming an independent and fully-fledged university. A third committee of professionals chaired by Dr R.J Zvobgo, the Principal of Gweru Teachers College made the final recommendations on the initial staffing needs and degree programmes. These recommendations laid the basis on which the first-degree students were enrolled for Bachelor of Commerce with Education and Bachelor of Science with Education degrees offered by the University of Zimbabwe through the Faculty of Education's Department of Teacher Education.

Establishment of the University

In the meantime, although the devolution policy inaugurated an irrevocable process of bringing university education to the Midlands, there was a strong feeling, especially in the Province, that what was being done did not quite amount to the President's promise of a fully-fledged state university in the province. Responding to these feelings, but without losing sight of constraints imposed on the Government by declining national funds, the Minister of Higher Education and Technology transformed the devolution project at Gweru into Zimbabwe's third state university by means of the State University in the Midlands Act of April 1999.

The new University, whose name was later changed to the Midlands State University, was to be initially housed at the Gweru Teachers College premises. The mandate of the institution was contained in its broad objectives which are the advancement of knowledge, the diffusion and extension of arts, science and learning, preservation, dissemination and enhancement of knowledge that is relevant for the development of the people of Zimbabwe through teaching and research and, so far, as is consistent with the objectives, the nurturing of the intellectual, aesthetic, social and moral growth of the students at the University.

Inaugural Council

The University Act provided for governance made up of the Chancellor, who is the President of the Republic of Zimbabwe, a Council, Vice Chancellor, Pro Vice Chancellors and Senate.

To immediately manage the implementation of the Act, the Government, through the Ministry of Higher Education and Technology, appointed an inaugural Council with the following 21 members drawn from all walks of life and professions:

Mr C F Dube	Dube Manikai and Hwacha Legal Practitioners, as Chairperson
Mr W S Muringani	Zimbabwe National Water Authority
Mr R A Mabhena	Ministry of Primary and Secondary Education
Mr W Chidhakwa	Managing Director of the Export Processing Zone
Mr G G Nhemachena	Town Clerk of the City of Gweru
Mr W P Channon	Makwiro Platinum
Dr R F Wutaunashe	Harare Medical Practitioner
Mrs A S Kamba	Former Director of the National Archives of Zimbabwe and member of the Public Service Commission
Mr C Shumba	District Administrator, Chinhoyi
Dr M S D Mutopo	Production Director of the National Breweries and Chairperson of the Liquor Undertaking Board
Dr V Hungwe	Director of Lands
Prof N M Bhebe	MSU Vice-Chancellor
Prof R J Zvobgo	MSU Pro-Vice-Chancellor
Mr C S Nziramasanga	National Railways of Zimbabwe

Founding Vice-Chancellor and Pro-Vice-Chancellor

In consultation with the then Minister of Higher Education and Technology, Dr I. Chombo, and with the approval of the then President and Chancellor of the University, His Excellency, Cde R.G Mugabe, the inaugural Council appointed a distinguished academic and historian, Professor Ngwabi Bhebe, as the first Vice-Chancellor with effect from December 1999 and a renowned educationist, Professor Rungano Zvobgo, as Pro-Vice- Chancellor in January 2000.

Campus Sites

The University was initially granted use of facilities of the former Gweru Teachers College, Batanai Complex in Senga and the Senga Institute of Manpower Planning and Development. The site originally offered by the City of Gweru had to be abandoned in deference to the Zimbabwe National Army, who are using it as a training ground. The University was later granted 164 hectares of State land by the Vungu Rural District Council. This land stretches westwards from the

former Gweru Teachers College. In addition, the University later acquired 188.6ha of land from TelOne, where more facilities were put up to aid in teaching and learning. As of the year 2024, this campus is home to the Graduate School of Business Leadership, Faculty of Law, Faculty of Education, Faculty of Business Sciences, Midlands State University National Pathology Research and Diagnostic Centre, Midlands State University National Language Institute and Innovation Hub under the Research and Innovation Directorate.

As part of its growth strategy, the University adopted a multicampus approach. To date, the University has a presence in Gweru, Zvishavane, Harare, Kwekwe and Bulawayo.

In fulfilment of the ten-faculty vision, the University, further, established the following faculties:

1. Faculty of Medicine and Health Sciences
2. Faculty of Engineering and Geosciences
3. Faculty of Built Environment, Art and Design

The University also embarked on a rebranding exercise for all its academic programmes to align them to the provisions of the heritage-based Education 5.0 philosophy. The rebranding exercise has resulted in changes to some faculty names as well as the introduction of new academic programmes.

The University's ten faculties and three research institutes are distributed as follows:

- The Gweru Main Campus hosts five faculties, namely; Social Sciences, Science and Technology, Medicine and Health Sciences, and Agriculture, Environment and Natural Resources Management. In addition, the Gweru campus also accommodates the following units:
  - MSU National Language Institute
  - MSU National Pathology Research and Diagnostic Centre
  - Gender Institute
  - Centre for Public Policy and Devolution
- The Graduate School of Business Leadership Learning Centre currently houses the faculties of Business Sciences, Education and Law,
- Zvishavane Campus situated at the old Shabanie Mine Office Complex accommodates the faculties of Engineering and Geosciences, & Arts and Humanities. The Campus also hosts a research institute namely, the Tugwi-Mukosi Multi-Disciplinary Research Institute which was established in 2018 and whose objective is to generate and disseminate continuous valid information on the social, economic, political, industrial and environmental impact of the dam on society.
- Harare Campus situated at number 1, Kwame Nkrumah Avenue is home to the Harare Weekend School that offers degree programmes in the Faculty of Business Sciences and postgraduate programmes in the faculties of Arts and Humanities as well as Social Sciences.
- Kwekwe Campus, which is scheduled to host the Faculty of Law, the Faculty of Built Environment, Art and Design as well as some projects under the Faculty of Agriculture, Environment and Natural Resources Management.
- Batanai Learning Centre in the Senga suburb hosts the departments of Food Science and Nutrition, Banking and Finance and Tourism and Hospitality Management,
- Bulawayo Learning Centre, which offers programmes in the Faculty of Education.
- The School of Social Work located at the corner of Chinhoyi and Grant Street offers both undergraduate and postgraduate programmes in Social Work.

Academic Programmes and Vision of the University

The first task for the Council and its Vice-Chancellor designates was to come up with proposals for academic programmes, which in turn would provide a basis for drawing up a university budget, staff recruitment and student admissions. It was also necessary to have a provisional working vision and mission statement for the new institution, which would be refined and concretized in due course in consultation with all the institutional and national stakeholders.

Such a vision envisaged a ten-faculty university whose principal mission was to train human resources innovatively and to generate, through original and applied research, scientific knowledge, which would substantially contribute to the social and economic development of Zimbabwe. The vision also has in sight a modern university whose delivery methods aim at breaking down traditional boundaries between vocational training and academic teaching using semesterised modular systems to allow the student as the major client to participate in the formulation and management of his/ her own programme; and above all at exposing the student to work-related learning to apply theoretical principles and knowledge to real work situations.

Against this background, Council adopted on the 25th of November 1999, 'proposed Academic Programmes' of eight faculties with the proviso that the Vice-Chancellor investigates the feasibility of adding the Faculty of Law. The faculties which were provisionally approved with their cognate departments were:

Faculty of Architecture, Art and Design
Department of Architecture
Department of Design and Technology
Department of Fashion and Textiles
Department of Visual and Performing Arts

Faculty of Commerce and Information Systems
Department of Accounting
Department of Business Studies
Department of Insurance
Department of Tourism Studies
Department of Economics

Faculty of Education
Department of Adult Education
Department of Curriculum and Arts Education
Department of Educational Administration Department of Educational Foundations

Faculty of Engineering
Department of Chemical and Production Engineering
Department of Environmental Engineering
Department of Industrial/Management Engineering
Department of Solar and Renewable Energy Engineering
Department of Structural Engineering
Department of Surveying

Faculty of Social Sciences
Department of Human Resource Management
Department of Social Counselling and Social Work
Department of Media and Society
Department of Nursing and Health Care
Department of Sport, Culture and Leisure

Faculty of Natural Resources Management
Department of Agro-Business Department of Agro-Meteorology
Department of Horticulture Department of Forestry
Department of Game and Wildlife Management
Department of Water Resources, Arid and Semi-Arid Agriculture

Faculty of Sciences
Department of Biology
Department of Chemistry

Department of Mathematics
Department of Physics
Department of Computer Science and Information Systems

Faculty of Arts
Department of African Language Studies
Department of Economic and Social History
Department of English
Department of Geography

The same Council meeting deliberated on what programmes were feasible to start within the year 2000 taking into account the following factors:

- the short time available for planning and recruitment of staff before the opening of the University;
- the shortage of funds and the facilities available at the Gweru Teachers College

The Council finally settled for those programmes that would require the least investment in teaching equipment and specialized buildings; that could be easily taught at Batanai and Gweru Teachers College and which would complement and strengthen the teaching of the programmes initiated by the Government at Gweru Teachers College in association with the University of Zimbabwe. Basically, the decision meant that the majority of the programmes would be the Gweru Teachers College-UZ ongoing ones with a few new ones added to give a start to the University. The decision too involved some minimal reorganisation of existing academic structures primarily in order to separate pedagogical professional training from content disciplines. This helped to clear the way for proper semester/modular planning and teaching and ensured that both the teachers' training and the content disciplines would get equal exposure to practical/attachment teaching.

The upshot of the decision were the following Faculties and their Departments which constituted the initial offering of the new University:

Faculty of Arts and Social Sciences
Department of African Languages Department of English
Department of Economic and Social History
Department of Geography and Environmental Studies
Department of Human Resource Management
Department of Media and Society Studies

Faculty of Commerce
Department of Accounting
Department of Business Studies
Department of Economics
Department of Tourism and Hospitality Management

Faculty of Education
Department of Applied Education
Department of Educational Foundations and Administration

Faculty of Science
Department of Biology
Department of Chemistry
Department of Computer Science and Information Systems
Department of Home Economics
Department of Mathematics Department of Physics
Department of Surveying and Geomatics

To obviate wastage of expensive infrastructure, valuable equipment and teaching consumables through disuse and neglect, following the phasing out of diploma programmes at Gweru Teachers College, the University had to bring forward the introduction of the **Faculty of Natural Resources Management and Agriculture** with the following departments:

1. Department of Wildlife and Livestock Management
2. Department of Land and Water Resources Management
3. Department of Crop Production and Horticulture

Opening of the University
The University started its first semester on 27 March 2000 with the following enrolment of students and teaching staff:

Under the University of Zimbabwe intake	**198**
Under Midlands State University	**400**
Teaching Staff	**70**

As of February 2024, the student enrolment stands at 27 000 which is underpinned by a staff complement of 890 academic staff. Since its inception, the University has produced over 80 000 graduates.

Strategic Plan
The University drew up its foundational long-term strategic plan. The exercise provided an opportunity to bring together the University community and all the national stakeholders. The Strategic Plan provides a guide and a basis for the development of the institution in terms of the programmes that must be taught; the physical plant, infrastructure and equipment that must be provided; projections of staff and student numbers by programmes; and work out a long-term business plan for the University.

Building on the foundational long-term strategic plan, the University introduced and implemented several other strategic initiatives to further its goals.

Midlands State University Enterprises
In keeping with the Education 5.0 philosophy, the University has made significant efforts to generate third-stream income through industrialisation which has resulted in the establishment of the **MSU Enterprises Division**, with interests in agriculture, chemical manufacturing, clothing and textile, and press and publications.

Furthermore, the University established a vibrant **Midlands State University National Pathology Research and Diagnostic Centre** which was fully funded by the Government of Zimbabwe through the Ministry of Higher and Tertiary Education, Innovation, Science and Technology Development. The Centre offers pathology consultancy and high technology-driven clinical services and diagnostic imaging services through innovation, biomedical research and development.

The University also established a **National Language Institute**. The Centre offers language services that include editing and translation of documents, and the provision of Sign Language and Braille facilities. The Centre was fully funded by the Government of Zimbabwe through the Ministry of Higher and Tertiary Education, Innovation, Science and Technology Development.

In 2021, the University was licenced for **MSU Radio** and the station was allocated two frequencies, one in Zvishavane at 90.3 FM and another in Gweru at 101.7 FM. MSU Radio manned shifts started on February 18, 2023. At the moment the station is on air every day of the week from 0600hrs to 2100hrs broadcasting programmes such as; Breakfast Show, Mid-Morning Show, Lunchtime Listening, Drive Time Show and The After Drive. The year 2024 saw the launch of the **Our Destiny (OD) Stores**. Established as a retail shop, OD Stores pursue the Education 5.0 blueprint's agenda to locally produce and distribute goods & services for the nation.

True to our motto, "Our Hands, Our Minds, Our Destiny", we rely on ourselves to build a university which is truly instrumental to the development of Zimbabwe and beyond.

FACULTY GOVERNANCE ORDINANCE NO. 4

1. ***Executive Deans***

i. There shall be an Executive Dean of each Faculty, who shall be appointed by a selection board appointed by the Council and chaired by the Vice-Chancellor or a Pro-Vice-Chancellor.

ii. An Executive Dean shall hold office for three years and, on the expiry of his term of office, shall be eligible for re-appointment.

2. ***Functions of Executive Deans***

i. An Executive Dean shall be responsible to the Vice-Chancellor for:
   a. the character and quality of his faculty's academic programmes and teaching;
   b. the proper direction, control and management of the staff, property, equipment and finances of his faculty; and
   c. contributing to the evolution and maintenance of an environment conducive to learning at the University.

ii. Without limiting subsection (i), an Executive Dean's functions include:
   a. implementing the policies and objectives of the University and his faculty;
   b. ensuring regular meetings of the Faculty Planning Committee to oversee, plan and direct the academic and human resource development of the whole Faculty;
   c. planning and control of the faculty budget;
   d. developing and maintaining relations with alumni of his faculty and with other organizations and persons, with a view to enriching the academic programmes offered by his faculty;
   e. establishing links and partnerships with industry, commerce, professional establishment and informal sectors in order to support student internships, sandwich modules and work-related learning
   f. undertaking fundraising to support teaching and research in the faculty;
   g. co-operating with other faculties, agencies and entities to further the programmes and projects of his faculty;
   h. maintaining an overview of the faculty's quality assurance;
   i. ensuring that the faculty office provides accurate registered students statistics to departments and lecturers, so as to ensure that only registered students attend lectures;
   j. ensuring that student registers are constantly updated and well maintained so that the faculty only provides service to registered students;
   k. ensuring that departments are adequately provided for in the University teaching timetable;
   l. ensuring that the faculty has adequate teaching space to accommodate all its classes;
   m. ensuring that all registered students in the faculty have properly kept and updated records of all their academic profiles;

n. in liaison with Chairpersons ensure that teaching and other duties are adequately catered for before academic personnel proceed on leave, whether ordinary, contact or sabbatical leave and;
o. performing such other functions as may be prescribed by the Ordinance
p. establishing links and partnerships with industry,
commerce, professional establishment and informal sectors in order to support student internships, sandwich modules and work-related learning
q. undertaking fundraising to support teaching and research in the Faculty;

3. ***Evaluation of Performance of Executive Deans***

The performance of every Executive Dean shall be evaluated by a committee appointed by the Vice-Chancellor and consisting of senior academic staff and administrators.

4. Termination of Appointment of Executive Deans

i. An Executive Dean may resign his office as such by giving the Vice-Chancellor one month's notice or such longer or shorter notice as he and the Vice-Chancellor may agree.
ii. Subject to the approval of the Council, the Vice-Chancellor may suspend or terminate the appointment of a person as an Executive Dean: -
    a. on the recommendation of the committee referred to in section11; or;
    b. for other good cause.
    c. an Executive Dean whose appointment as such has been suspended or terminated in terms of subsection (2) may appeal to the council within fourteen days of being notified of the suspension or termination and on any such appeal the Council may confirm, vary or rescind the suspension or termination, as the case may be, or give such other direction in the matter as it thinks appropriate.

5. ***Composition of Faculty Boards***

For each Faculty there shall be a Faculty Board which shall consist of:
a. the Executive Dean;
b. all the full-time academic staff of the Faculty; such persons as may be assigned to the Faculty Board by the Senate; and
c. two students elected annually by the students in the Faculty.

6. ***Functions of Faculty Boards***

A Faculty Board shall have the following functions:
a. to regulate, subject to the approval of the Senate, the teaching and study of the subjects assigned to the faculty;
b. to report to the Senate on any matter specifically relating to the work of the faculty;

c. to deal with any matter referred or delegated to it by the Senate; and
d. to appoint committees, which may include a minority of persons who are not members of the Faculty Board, to carry out any of the duties or exercise any of the powers of the Board.

7. ***Meetings of Faculty Boards***

i. The Executive Dean of each faculty shall call for at least three (3) meetings of the Faculty Board at which matters relating to the policy of the faculty and appointments shall be discussed and recommendations adopted for submission to the appropriate authorities on appointments.
ii. The Vice-Chancellor and every Pro-Vice-Chancellor shall be entitled to attend any meeting of a Faculty Board or committee thereof.

THE DEPARTMENTAL GOVERNANCE ORDINANCE NO. 5

1. The Departmental Board

1.1 There shall be a Departmental Board for each Department which shall consist of:

1.1.1 the Chairperson of the Department;

1.1.2 all full-time members of the academic staff of the Department;

1.1.3 honorary and part-time lecturers in the Department or their representatives, as determined by the Departmental Board;

1.1.4 where relevant, at least one representative of the technical staff in the Department or, where technical staff are assigned to the Faculty and not to Departments and the Board considers it helpful to have representatives of such staff, at least one representative of the technical staff in the Faculty, elected annually by such staff, provided that the representative(s) so elected shall not be entitled to attend for deliberations on matters considered by the Chairperson to be confidential;

1.1.5 two students in the Department elected annually by the students from amongst themselves, provided that the students so elected shall not be entitled to attend for deliberations on matters considered by the Chairperson to be confidential;

1.2 The Vice-Chancellor, the Pro-Vice-Chancellor(s) and the appropriate Executive Dean and Deputy Dean shall be entitled to attend Departmental Board meetings in an ex-officio capacity.

1.3 From time to time, the Chairperson of the Department, after consultation with members of the Departmental Board, may invite other persons to attend Departmental Board meetings.

1.4 Each Departmental Board shall meet at least twice every semester and shall maintain a proper system of agendas and minutes for such meetings.

1.5 Subject to Section 3 of this Ordinance, each Departmental Board shall regulate its own procedures, including the establishment of a quorum.

2. Duties and Powers of the Departmental Board

Subject to the provisions of the University Statutes, the authority of the Senate, provisions of this Ordinance and such limitations as the Faculty of which the Department forms a part may impose, the Departmental Board;

2.1 shall arrange for, conduct and control the teaching and instruction of students within the Department and the setting and marking of examination papers in accordance with regulations approved by Senate, the general academic policy agreed by the Faculty Board and the approved administrative procedures of the University.

2.2 shall make recommendations to the Faculty Board for the establishment of new courses and the amendment of existing regulations and syllabi relating to studies within the Department.

2.3 may delegate functions and responsibilities to individuals or groups of individuals within the Department;

2.4 shall exercise such powers as may be conferred upon it by the Faculty Board, the Senate or the Vice-Chancellor;

2.5 may provide consultancy services on matters concerning the subject assigned to the Department within the limitations of its capabilities and subject to the general University policy on consultancy services;

2.6 shall monitor the implementation of the University's conditions relating to the undertaking of private remunerative work in respect of the members of the Department;

2.7 may make recommendations in respect of estimates of expenditure in the Departmental Budget Committee;

2.8 shall suggest a preliminary short-list of candidates for appointment to academic and technical posts within the Department, taking into account the need to maintain strict confidentiality in handling applications, and shall forward such short-lists to the relevant Board of Selection for consideration;

2.9 shall formulate general guidelines on pure and applied research and suggest means of funding research programmes in the Department.

2.10 shall submit recommendations to the Senate in respect of the appointment of External Examiners and any other consultants in the Department.

3. Chairpersons of Departments

3.1 There shall be a chairperson of each department appointed by the Vice-Chancellor, on behalf of the University Council, from among the full-time members of the Academic staff of the Department.

3.1.1 The Chairperson of the Department shall, as part of management participate in the formulation, implementation and evaluation of the academic policies of the University and shall promote academic excellence in teaching, research and University service.

3.1.2 The Departmental Chairperson shall also provide academic leadership to the Department by planning, directing and coordinating the formulation and implementation of the academic plans and programme of the Department.

3.1.3 The Departmental Chairperson shall have held the rank of Senior Lecturer or above in a reputable University. In the absence of such an individual, the Chairperson shall be at least tenured and should have amassed substantial experience in teaching, active research, University service and should reveal a strong commitment to the development and attainment of the Departmental goals.

3.2 ***Before appointing a Departmental Chairperson***

3.2.1 the Executive Dean of the Faculty shall identify suitable candidates guided by the stated criterion.

3.2.2 the Executive Dean of the Faculty together with the Pro-Vice-Chancellor (Academic) shall consult all full-time members of the academic staff in the Department on the nominations made by the Dean.

3.2.3 the Pro-Vice-Chancellor (Research and Academic Affairs) together with the Executive Dean of the Faculty shall make a recommendation, in concurrence with all the full-time members of the Academic staff in the Department to the Vice Chancellor.

3.2.4 The Vice-Chancellor shall appoint the Departmental Chairperson.

3.3 The Chairperson of a Department shall hold office as such for a period of up to three years and shall be eligible for re-appointment for a further term of three years provided that he shall not hold office for a continuous period exceeding six years.
On completion of the second term of office, a Chairperson of the Department shall not be eligible for further appointment to the position of Chairperson of Department until a three-year period has elapsed.

3.4 After consultation with the Pro-Vice-Chancellor, the Dean of the Faculty and the Chairperson concerned, the Vice-Chancellor may terminate the appointment of a Chairperson of the Department as such by giving him/her two months' notice in writing.

3.5 The Chairperson of a Department may resign his appointment as such by giving the Vice-Chancellor two months' notice in writing.

3.6 Where the Chairperson of a Department is unable, either because of his absence from the University or for any other reason, to carry out his functions as Chairperson, the Vice-Chancellor may, subject to the provisions of section
3.2 of this Ordinance appoint an Acting Chairperson of the Department for such period and under such conditions as he may determine, provided that the period of appointment does not exceed the balance of the period of office of the substantive Chairperson.

3.7 A Chairperson of a Department shall be paid a responsibility allowance at a rate of the difference between the lecturer's top notch and the top-notch of the Associate Professor grade, provided that no allowance shall be payable where the Chairperson is absent or unable to perform his functions for a period of 30 days or more.

3.8 An Acting Chairperson of the Department who is appointed Acting Chairperson for a period in excess of 30 days shall be paid a responsibility allowance at a rate of the difference between the Lecturer's top notch and the top-notch of the Associate Professor grade.

4. Duties and Powers of the Chairperson of Department

In addition to his teaching, research and other duties and responsibilities, the Chairperson of Department shall: -

4.1 serve as executive officer of the Department in the implementation of Departmental policy, as determined by the Departmental Board and other University authorities, and be responsible for the day- to-day administration of the Department;

4.2 serve as Chairperson of Departmental Board meetings.

4.3 ensure that constant departmental meetings are held to guide lecturers on the academic and Human Resource affairs in the department;

4.4 represent the Department on the appropriate University Committees and other bodies as required;

4.5 make recommendations in respect of estimates of expenditure in the Department Budget Committee;

4.6 make recommendations to the Faculty Board for the introduction of new modules as well as amendment of all modules, existing regulations and syllabi relating to studies within the Department;

4.7 ensure that the Department provides accurate statistics of registered students to lecturers so as to ensure that only registered students attend lectures;

4.8 ensure that lecturers are adequately provided for in the University teaching timetable;

4.9 ensure that lecturers are utilizing the venues allocated to them on the time table;

4.10 setting and marking of examination papers in accordance with regulations approved by Senate, the general academic policy agreed by the Faculty Board and the approved administrative procedures of the University;

4.11 ensure that lecturers turn up for lectures and tutorials on time, give a fair number of assignments per semester assess fairly and comment meaningfully on student assignments and maintain clear and accurate records of student assignment assessments;

4.12 make recommendations with respect to probation, advancement and promotion of academic staff within the Department, provided that :-

4.12.1 in so doing, the Chairperson shall consult all full-time academic members of the Department;

4.12.2 if the Chairperson is himself/herself a candidate for promotion, the appropriate recommendations shall be made by the Executive Dean of the relevant Faculty after consultation with all full-time academic members of the Department;

4.13 ensure that teaching and other duties are adequately catered for before academic personnel proceed on leave whether ordinary, contact or sabbatical leave;

4.14 shall monitor the implementation of the University conditions relating to the undertaking of private remunerative work in respect of the members of the department and;

delegate functions and responsibilities to individuals or groups of individuals within a department.

ACADEMIC STAFF APPOINTMENTS, GRADING, TENURE AND PROMOTIONS ORDINANCE 3 OF 2000 AS AMENDED

ARRANGEMENT OF SECTIONS

Preamble

1. Interpretation
2. Title and Date of Commencement
3. Objectives
4. Structure of Academic Staff Grades
5. Grading and Initial Appointment
6. Grading and Salary Structure
7. Promotion

8. Tenure

PREAMBLE

In terms of section 29 (3) (h) of the Midlands State University Act [Chapter 25:21] as amended, the Council of Midlands State University, with the approval of the Minister of Higher and Tertiary Education, Innovation, Science and Technology Development, or such other Minister to whom the President may from time to time assign the administration of the Midlands State University Act on the recommendation of the University Senate, makes the following Ordinance:

1. INTERPRETATION

In this Ordinance, **'academic staff''** means all persons employed by the University as Professors/Research Professors, Associate Professors/Associate Research Professors, Senior Lecturers/Senior Research Fellows, Lecturers/Research Fellows, Chief Technicians, Senior Technicians, Researchers, Research Assistants, Technicians and Technical Assistants in teaching and/or research departments and institutes, who are contractually required to carry out teaching, examination and administrative duties and to conduct research and innovation.

2. TITLE AND DATE OF COMMENCEMENT8

This Ordinance is cited as the Academic Staff Appointments, Grading, Tenure and Promotions Ordinance Number 3 of 2000 as amended and shall take effect from 1 February 2024.

3. **OBJECTIVES**

In making this Ordinance, Council seeks to:

3.1 Promote Academic Staff whose performance demonstrates particular merit in teaching, consultancy, student supervision, research, innovation, enterprise development,

scholarship and creative activity, administration, service and leadership in the University and professional practice including service to the community.

3.1.1 Research and Scholarship imply basic, and applied multi-disciplinary research.
3.1.2 Innovation implies the invention, creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in outcomes, efficiency, effectiveness or quality.
3.1.3 Enterprise development implies an act of investing time and capital to establish, expand or improve business.
3.1.4 Creative work entails generation of content attuned to innovation and industrialisation.
3.1.5 Leadership entails more than administrative work; it can entail getting people to understand and believe in the vision and work to achieve set goals.
3.1.6 Service to the Community entails staff voluntary involvement in activities of different dimensions that assist the community

3.2 Provide an objective, fair and systematic method of assessment in order to ensure a consistent application of standards for the appointments and promotions of staff.

4. STRUCTURE OF ACADEMIC STAFF GRADES

a. The following structure of grades for Academic Staff shall apply within the University:

Title	Grade
Professor/Research Professor	3a2
Associate Professor/Associate Research Professor	4a
Senior Lecturer/Senior Research Fellow	5a
Lecturer/Research Fellow/ Chief Technician	6a
Researcher/ Teaching Assistant /Senior Technician	7a
Staff Development Fellow/ Research Assistant/Technician	8a
Technical Assistant/ Language Assistant	9a

b. The salary scale applicable to each grade is subject to approval by the University Council.

c. The University Council or its authorised committees shall have sole discretion and in so doing, may designate that posts be established at any of the grades listed in section 4.1 above, but normally each of the other academic posts on Department or Faculty establishment may be filled up to professorial level.

5. GRADING AND INITIAL APPOINTMENT OF ACADEMIC STAFF

a. On initial appointment to the University's Academic Staff, a successful candidate shall be graded according to his or her qualifications, experience, published research, proven innovations and industrialisation.

b. **Qualifications**

i. The basic qualification for appointment to the University's academic staff at lecturer/research fellow grade is normally a PhD degree but at least a credit in a Master's degree may be considered in the critical shortage areas as approved by Senate. This is subject to review from time to time.
ii. The basic qualification for appointment at Teaching Assistants/Research Assistants/Staff Development Fellow grade is a good Honours Degree in the relevant field. Senate may review this from time to time.
iii. The basic qualification for appointment at Technician grade is a professional diploma and a degree in the relevant field.
iv. The basic qualification for an appointment at Technical Assistant grade is a professional diploma.

c. Experience

i. In granting recognition to relevant postgraduate experience, the University shall:
5.3.3.1 Make no distinction between professional and non-professional experience.
5.3.3.2 Recognise in full, the time spent as a full-time member of the academic (teaching and /or research) staff of a reputable university/institute.
5.3.3.3 In all disciplines, any postgraduate experience in the appropriate discipline shall be recognized as relevant.

5.4 Research, Innovation and Industrialization Output

5.4.1 The University recognises published research in journals, including books and book chapters, filed/registered Intellectual Property Rights (IPR), innovation, creative work and enterprise development for the purposes of determining the grade on initial appointment.
5.4.2 The Appointment Board shall take cognisance of the quality of the Research, Innovation, and Industrialization and decide whether it meets the conditions set by ZIMCHE.
5.4.3 The Appointment Board shall ensure that the assessment and weighting of published research and filed/registered IPR, creative work, innovation and enterprise development are consistent with standards implemented by the Promotions Committee (Refer to Annexure 1).

6. GRADING AND SALARY STRUCTURE

a. There shall be only one Academic (Teaching and Research) Grading and Salary Structure, and the same salary scale shall apply to all posts in all Faculties and Institutes within the University.

7. PROMOTION

a. For one to be promoted, he/she has to be a permanent/full-time member of staff or have a long-term contract of two or more years that has been renewed more than once.

b. Normally, the basic qualification for promotion is a PhD degree from Lecturer/Research Fellow grades up to Professor/Research Professor grades; BSc/BA and professional diploma for Technical Assistant, and Master's degree or a professional diploma from Researcher Technicians upwards.

c. **Conditions for promotion**

i. Annual performance reviews shall be considered as part of the promotion requirements.
ii. No member of staff at the level of lecturer /Research Fellow/ Researcher / Chief Technician /Senior Technician/Technician shall be promoted while on probation.
iii. No member of staff shall be promoted while on full-time study leave.

iv. **Criteria for Promotion**

In assessing the suitability of members of the academic staff for promotion to a higher grade, the University shall take into account the following broad criteria.

1. **Professor/Research Professor/ Associate Professor/Associate Research Professor/Senior Lecturer/Senior Research Fellow**
   a. Teaching or, for research staff, contribution to knowledge through research, consultancy, advisory work, part-time teaching, etc.
   b. Research;
   c. Innovation and;
   d. Industrialization
   e. Service to the University and Community ;

7.3.4.2 Chief Technician/ Senior Technician

7.3.4.2.1 Continuous assessment work on practicals.
7.3.4.2.2 Technical support for research, laboratory projects and field work
7.3.4.2.3 Research and mobilization of funds;
7.3.4.2.4 Innovations and
7.3.4.2.5 industrialization
7.3.4.2.6 Service to the University and Community.

7.4 Assessment of Teaching

In making an assessment of a candidate's teaching, the University regards the following general areas as being of central importance:

7.4.1 For lecturer grades - teaching methods which incorporate innovation and enterprise development/industrialization;

7.4.1.1 Module content which incorporates innovation, and industrialization;
7.4.1.2 The general performance of students in the module taught by the candidate for promotion;

7.4.1.3 The quality of the candidate's supervision of undergraduate and postgraduate students; the orientation of students' projects towards innovation and enterprise development/industrialisation; and
7.4.2.4 The development of new and effective techniques of instruction, including the production of teaching materials.

7.4.2 For Technician grades

7.4.2.1 Work related to facilitation of continuous assessment components in learning and teaching;
7.4.2.2 Continuous assessment work on practicals;
7.4.2.3 Laboratory work such as maintenance of laboratory equipment;
7.4.2.4 Field work, such as the planning and carrying out of field experiments

7.4.3 Researcher

7.4.3.1 Work related to consultancy and research output.
7.4.3.2 Laboratory work, such as maintenance of laboratory equipment; and
7.4.3.3 Field work such as the planning and carrying out of field work.

7.5 Assessment of Research, Innovation, Industrialization and Community Service

7.5.1 Assessment of Research

Research is a necessary component in academic life. Those who successfully conduct research geared at solving the problems of the world deserve credit. No one can be accepted as an academic without involvement in research.

In assessing a candidate's research, scholarship and creative work (hereinafter referred to as "research"), the University recognizes that research relates to origination of new knowledge that advances and/or promotes a discipline and/or its relevance to scholarship and society. It has several dimensions, and therefore assessment of the candidate's research shall include any of the following dimensions:

8

7.5.1.1 The accumulation of data that confirms an existing theory;

7.5.1.2 The application of existing theory to facts specific to given contexts;

7.5.1.3The generation of new theory and its empirical testing;

7.5.1.4 The generation of new methodologies for dealing with problems in the discipline or in practice;

7.5.1.5 Demonstrable mentorship of students and other Faculty in research as evidenced by authorship patterns in multi-authored scholarly publications;

7.5.1.6 Normally, the University would take into account for promotion purposes only research which has been published, been accepted for publication or is in a written-up form in which it can be assessed;

7.5.1.7 In addition to assessing a candidate's research from the point of view of its quality, the University would also make an assessment in terms of the quantity of research output attributable to the candidate, sustained rate of productivity, the individual member's contribution to the research, relevance and impact;

7.5.1.8 Evidence of students supported by one's research funds;

7.5.1.9 Evidence of resource mobilisation for improving University asset base.

7.5.2 Assessment of Innovation

In assessing a candidate's innovation, the University recognise the intricate relationship between research and innovation. It has several dimensions, and therefore, assessment of the candidate's innovation accompanied by evidence, shall include any of the following dimensions:

7.5.2.1 Coming up with new discoveries, inventions or artworks;

7.5.2.2 Coming up with new methods, new approaches, new techniques, and new products and/or services;

7.5.2.3 Creating an original design or invention that qualifies for intellectual property protection (prototypes, designs, practical solutions, etc);

7.5.2.4 Translation of research ideas or products and intellectual property into commercial value (goods and services);

7.5.2.5 Number of Intellectual Property generated and registered (rate of productivity);

7.5.2.6 Range of traceable products, technologies and services in Industry, Commerce and Social Services;

7.5.2.7 Improve the efficiency of existing processes and/or resource use.

7.5.3 Assessment of Industrialisation

In assessing Industrialisation, the University recognises the candidate's contribution to university-linked industrialisation processes taking cognisance of the linkages among research, innovation and industrialisation. It has several dimensions, and therefore, assessment of

the candidate's industrialisation, accompanied by evidence, shall include any of the following dimensions:

7.5.3.1 Distinct role in IP commercialisation processes;

7.5.3.2 Functional systems or models developed that have been adopted by Industry and Commerce;

7.5.3.3 Adopted procedures and processes for industrialisation;

7.5.3.4 Technology transfer for the delivery of goods and services;

7.5.3.5 Income realised by the University from the utilisation of Intellectual

Capital

7.5.3.5.1 Number of joint research contracts with innovative companies

7.5.3.5.2 Number of innovation-driven companies created by the University

7.5.3.5.3 Number of licence agreements

7.5.3.5.4 Number of patents in use by industry

7.5.3.6 Evidence of new service industry, software, new artifacts and artistic creative products that have been developed and deployed.

7.5.4 Assessment of Community Service

7.5.4.1 In assessing a candidate's community service, the University is conscious of the fact that every member of the academic staff should be a good University citizen, performing his/her duties conscientiously and well, attending meetings and participating in committees to which he/she is assigned. The University regards such activities as adequate University service.

7.5.4.2 If a candidate has taken a leadership role in University service, such as serving as Dean, Chairperson of a Department, Chairperson of a Committee or in organizing a Faculty or Department's contribution to such activities as Vacation School or Open Day, or organizing vacation research for students, or is involved in students counselling and does these activities outstandingly well, the University would regard such services as better than adequate.

7.5.4.3 If a candidate has taken a leadership role, such as undertaking research to solve a national problem or is Chairperson of a Parastatal Board, the University shall regard that as adequate

7.5.4.4 If a candidate has been involved in community services, projects and programmes with accolades attributable to the University, it shall be regarded as adequate community service with appropriate scoring.

7.6 Criteria for Promotion to Specific Grades (Refer to Annexure 1 and 2)

7.6.4 Criteria for Promotion to Technician

The criteria for promotion to Technician are as follows:

7.7.1.1 Acquisition of a relevant first degree would normally qualify for promotion to the Technician grade.

7.6.5 Criteria for Promotion to Senior Technician

The criteria for promotion to Senior Technician are as follows:

7.7.2.1 For Senior Technician- An assessment at the level of **satisfactory** in work related to facilitation of continuous assessment work in teaching, laboratory and field research work, innovation leading to industrialization and Service to the University and Community;

7.7.2.3 For Senior Technician - An assessment at the level of **outstanding** in at least one of the following: work related to facilitation of continuous assessment work in learning and teaching, research, innovation, creative work, enterprise development and service to the University and Community;

7.6.6 Criteria for Promotion to Chief Technician

The criteria for promotion to Chief Technician are as follows:

7.7.3.1 An assessment at the level of **satisfactory** in work related to facilitation of continuous assessment in teaching, laboratory and field research work, innovation, creative work leading to industrialization and Service to the University and Community;

7.7.3.2 An assessment at the level of **satisfactory** research shall normally mean at least three (3) refereed research publications.

7.7.3.3 An assessment at the level of **outstanding** in at least one of the following: work related to facilitation of continuous assessment in teaching, research, innovation for industrialization and service to the University and Community;

7.7.3.4 Outstanding research shall normally mean at least five (5) refereed research publications and at least one filed IPR or one (1) enterprise development or assessed equivalents.

7.6.7 Criteria for promotion to the Senior Lecturer/Senior Research Fellow Grade

The criteria for promotion to the Senior Lecturer/Senior Research Fellow Grade are as follows:

7.7.4.1 An assessment at the level of **satisfactory** in teaching and/or research, consultancy, innovation, creative work, enterprise development and Service to the University and Community;

7.7.4.2 Satisfactory teaching shall normally mean performing well in at least half of the areas listed in section 7.4.1;

7.7.4.3 An assessment at the level of **outstanding** in at least one of the following: teaching, research, consultancy, innovation**,** creative work, enterprise development and service to the University and Community;

7.7.4.4 For Senior Lecturer, outstanding research, **innovation, creative work and enterprise development** shall normally mean at least twelve (12) refereed research publications and at least one filed IPR or one (1) enterprise development or assessed equivalents and satisfactory research shall normally mean at least twelve (12) refereed research publications.

7.7.4.5 Outstanding teaching shall normally mean performing well in all the areas listed in section 7.4;

7.7.4.6 For Senior Research Fellow, satisfactory research shall normally mean twenty two (22) refereed publications and at least one (1) filed IPR or one enterprise development or assessed equivalents;

7.7.4.7 The criteria for promotion to the Senior Research Fellow Grade shall be as for promotion to the Senior Lecturer grade except that in place of teaching, contributing to knowledge in the candidate's discipline through research and consultancy, innovation, creative work, enterprise development, and advisory work, shall be considered where such contributions are verifiable through documentary evidence.

7.7.5 Criteria for promotion to the Associate Professor/Associate Research Professor Grade

7.7.5.1 The criteria for promotion to the Associate Professor/Associate Research Professor grade are as follows:

7.7.5.1.1 For Associate Professor, at least twenty five (25) refereed research publications and at least one filed IPR or one (1) enterprise development or assessed equivalents which merit international recognition in the candidate's own field as testified by external assessors, examiners or reviewers of the candidate's work;

7.7.5.1.2 Satisfactory teaching;

7.7.5.1.3 For Associate Research Professor, at least thirty-five (35) refereed research publications and at least one filed IPR or one (1) enterprise development or assessed equivalents which merit international recognition in the candidate's own field as testified by external assessors, examiners or reviewers of the candidate's work; and

7.7.5.1.4 For both Associate Professor and Associate Research Professor Satisfactory Service to the University and Community.

7.7.6 Criteria for promotion to the Professorial/Research Professorial Grade

7.7.6.1 The criteria for promotion to the Professorial/Research Professorial Grade are as follows:

7.7.6.1.1 For Professorial Grade at least forty (40) refereed research publications and at least one filed IPR or one (1) enterprise development or assessed equivalents which merits international recognition in the candidate's own field as testified by external assessors, examiners or reviewers of the candidate's work, together with general quality of research which is of a level higher than that expected for promotion to the Associate Professor/Associate Research Professor Grade (Refer to Annexure 1).

7.7.6.1.2 For Research Professorial Grade, at least fifty (50) refereed research publications and at least two filed IPR or two (2) enterprise development or assessed equivalents which merit international recognition in the candidate's own field as testified by external assessors, examiners or reviewers of the candidate's work, together with general quality of research which is of a level higher than that expected for promotion to the Associate Professor/Associate Research Professor Grade (Refer to Annexure 1).

7.7.6.1.3 An international reputation for scholarship in the candidate's work; in some fields, academic books and substantial publications in scholarly journals;
7.7.6.1.4 Generally, cumulative and recognized international excellence;
7.7.6.1.5 Satisfactory teaching; and
7.7.6.1.6 Satisfactory service to the University and Community.

7.8 For the sake of clarity, and to emphasize the difference expected in the research record of candidates for promotion to Senior Lecturer/Senior Research Fellow; Associate Professor/Associate Research Professor and Professor/Research Professor, the following shall apply:

7.8.1 For promotion to Senior Lecturer/Senior Research Fellow, the quality of the research needs not be a level meriting the candidate's international recognition;

7.8.2 Whereas, for promotion to Associate Professor/Associate Research Professor the candidate's research must be adjudged to be a quality meriting international recognition but needs not have the element of sustained intellectual excellence expected of the research of a candidate for the professorship grade;

7.8.3 An Associate Professor/Associate Research Professor shall be required to demonstrate the sustained record required for promotion to a Professor/Research Professor in the period after his/her promotion or appointment as Associate Professor/Associate Research Professor.

7.9 Promotion Procedures for Academic Staff

7.9.1 Annually, in the early part of each calendar year, the Chairperson/Head of a Department shall place in the file of each academic member of that Department a report concerning the member's teaching, research, innovation, creative work, enterprise development and service to the University and Community; in the previous year. This report shall be available to the member of staff concerned, the Faculty/Institute and the appropriate members of the University administration.

7.9.2 The annual report filed in terms of section 7.10 shall form the basis of a Chairperson/Head of Department's report to the promotions or appropriate Academic Appointment Board for the purposes of applications for promotion and consideration of the granting of tenure (see section 8 of the Ordinance). The annual report shall have an additional section for innovation, consultancy, creative work and enterprise development.

7.9.3 A member of staff, with a PhD for Lecturer/Research Fellow and MSc/MA/MED for Technician/Researcher; BSc/BA/BED for Technical Assistant grades, wishing to apply for promotion should do so in respect to the annual invitation to apply for promotion issued by the University Administration. In the first instance, such applications shall be submitted to the Chairperson/Head of the member's Department who will submit them to the Promotion Committee through the Executive Dean of the Faculty/Executive Director of an Institute, a dossier containing the following documents:

7.9.3.1 The candidate's complete, up-to-date curriculum vitae;
7.9.3.2 The candidate's application for promotion;
7.9.3.3 The candidate's Research, Innovations and Industrialisation ;
7.9.3.4 Copies of each of the annual reports on the member since initial appointment or since the date of last promotion whichever is the most recent;
7.9.3.5 A summary of the Departmental Board's view on the candidate's application;
7.9.3.6 A report containing the Head of Department/Chairperson's recommendation on the candidate's application, which shall first have been made available to the candidate for comment, but in all other respects should be regarded as confidential to the Promotions Committee; and
7.9.3.7 Any comments on the Head of Department/Chairperson's reports which the candidate may wish to submit to the Promotions Committee.

7.9.4 In circumstances where the candidate expressly wishes the Departmental Board to consider any difference of opinion between him/herself and the Departmental Chairperson/Head of Department, he/she may request the Departmental Board to do so in which event the outcome of the Departmental Board's deliberations would be included in the dossier submitted through the Executive Director/Dean to the Promotions Committee.

7.9.5 The dossier for promotions in Associate Professor/Associate Research Professor/Professor/Research Professor grades shall also include a list, in order of preference, of assessors to whom the Promotions Committee may refer. This list shall be prepared by the Departmental Board and shall be as follows:

7.9.5.1 Associate Professor/Associate Research Professor or Professor/Research Professor: Six (6) assessors, at least four of whom shall be external assessors.

7.9.5.2 In the case where a candidate relies on Teaching or Service to the University and Community in claiming an assessment at the level of outstanding: three (3) assessors internal to the University but external to the Department shall be appointed to consider the candidate's credentials.

7.9.6 The Executive Dean of each Faculty/Executive Director of each Institute shall forward to the Promotions Committee the dossier received from the Head/Chairperson of Department on each candidate, together with a report and recommendation by him/herself as Executive Dean/Director. The Executive Dean/Director's report shall be confidential, except if he/she disagrees with the Head of Department/Chairperson's report, the Executive Dean/Director is required to make his report available to the Head of Department/Chairperson and the candidate, in which event the candidate's comments on the Executive Dean/Director report be included in the final dossier submitted to the Promotions Committee.

7.9.7 The Promotions Committee shall have final authority in all promotion matters. If a "prima facie" case for promotion is judged to exist then the Committee shall seek the opinion of external assessors, in which event the assessors' reports shall be confidential to the Promotions Committee.

7.9.8 In all instances where:

7.9.8.1 The Head/Chairperson of Department is a candidate for promotion, the Executive Director/Dean of the Faculty/Institute shall undertake the responsibilities of the Head/Chairperson of Department as laid down in this Ordinance;

7.9.8.2 The Executive Dean/Director of a Faculty/Institute is a candidate for promotion, the dossier shall be submitted by the Departmental Head/Chairperson direct to the Promotions Committee;

7.9.8.3 After one has been promoted, they have to wait for at least three years before they can be promoted to the next grade;

7.9.8.4 Normally members of staff with PhDs are eligible to apply for promotion;

7.9.8.5 A full Professor should have evidence of having supervised to completion at least five (5) students whilst it should be at least two (2) PhD students to completion for Associate Professorship.

7.9.8.6 No member of staff at the level of lecturer /Research Fellow/ Researcher / Chief Technician /Senior Technician/Technician shall be promoted while on probation.

7.9.8.7 A Lecturer/Research Fellow shall not be eligible for promotion to the level of Professor/Research Professor; however, he/she can be promoted to be Associate Professor/Associate Research Professor if all other conditions are satisfied. Consequently, a Senior Lecturer/Senior Research Fellow is eligible for promotion to Professor/Research Professor if all other conditions are satisfied.

7.10 Composition of the Annual Performance Report

7.10.1 The Annual Performance Report placed in each academic member of staff's personal file each year by the Head/Chairperson of the Department shall include an assessment of the member's teaching, research, innovations and industrialization as stipulated in items 7.4 and 7.5. The annual report shall have an additional section for innovation, consultancy, creative work and enterprise development.

7.10.2 **Report on Teaching/Consultancy**
In compiling the Section of the Annual Performance Report on a member's teaching the Head/Chairperson of the Department shall include an evaluation arrived at after implementing at least the following means of assessment:

7.10.2.1 **Peer Evaluation of Teaching/Consultancy**

The Departmental Board shall establish a panel of at least two academic members of the Department, with the responsibility of attending lectures/observing consultancy work of their colleagues on different occasions

and without prior notice to the person giving the lecture/doing consultancy work. The panel's report shall be considered by the Departmental Board and, after constructive, open discussion with the member of staff concerned, shall become a component in the assessment of each member of staff's teaching/consultancy. The evaluation of teaching/consultancy shall also focus on innovation, creative work and enterprise development.

7.10.2.2 **Evaluation by Students**

Students will be provided with an opportunity to complete an evaluation form in respect of each course. In the first instance, evaluation forms completed by students shall be submitted to the Chairperson of Department who shall discuss the views expressed with the member of staff concerned and the Departmental Board before including any formal comment in the Annual Performance Report.

7.10.2.3 **Assessment by External Examiners**

Any comments by External Examiners on a member's teaching shall be included in the Annual Performance Report.

7.10.2.4 **Seminars**

All Departments are required to encourage members of staff to hold seminars on relevant subjects of their choice to which staff and students should be invited to attend. Assessment of presentations in seminars and public lectures may become part of the evaluation of the members of staff's application for promotion.

7.10.2.5 **Report on Research, Innovation, Creative Work and Enterprise Development**

The section of the Annual Performance Report on a member's research shall comprise:
A report prepared by the member of staff, on his/her peer reviewed publications, innovation, creative work, filing or registration of IPR; enterprise development; conference papers, conference talks and the status of his/her work in progress during that year.

7.10.2.6 **Report on Service to the University and Community**

The section of the Annual Performance Report on a member's University service shall comprise:

7.10.2.6.1 A report by the Chairperson/ Head of Department/Unit on the member's University service during the year in question;
7.10.2.6.2 Any written comments by the member's Chairperson/Head of Department/Unit report made in terms of Section 7.10.1 above.

7.11 Criteria for granting promotions

7.11.1 For Senior Lecturer/Senior Research Fellow grade, four (4) hard copies and electronic version of files shall be submitted to the Promotions Committee. If the Department, represented by the Executive Director/Faculty Executive Dean, has a *prima facie* case supporting the promotion, the Promotions Committee shall either grant or decline the promotion based on content of the application and whether standard procedure was followed in submitting the application.

7.11.2 The dossier for promotions in Lecturer/Research Fellow grades shall also include a list, in order of preference, of assessors to whom the Promotions Committee may refer. This list shall be prepared by the Departmental Board and shall be as follows:

7.11.2.1. Associate Professor/Associate Research Professor or Professor/Research Professor: Six (6) assessors, at least four of whom shall be external assessors.
7.11.2.2. The criteria for granting promotions to Associate Professor/Associate Research Professor and Professor/Research Professor grades shall be based on recommendations from the six (6) assessors.
7.11.2.3. Six (6) files in hard and a soft copy format/electronic version, with an orderly arrangement of documents stated in section 7.9.3, shall be submitted to the Promotions Committee.

7.11.3 The Promotions Committee, which has sole discretion on the outcome of the application at this stage, shall make a decision to:

7.11.3.1 decline the application if (i) it does not meet the requirements stipulated for the grade or (ii) the file is in an unacceptable arrangement of documents referred to in section 7.9.3 or (iii) some vital documents are missing from the file or (iv) procedures stated in section 7.9 were not followed;

7.11.3.2 send the six (files) to assessors if the application meets the standards for the grade;

7.11.4 If a decision to send the applicant's six (6) hard or soft copy files to assessors is arrived at by the Promotions Committee, at least four (4) out of the six (6) hard or soft copy files shall be submitted to external assessors who should be at least Associate Professors for the Associate Professorship/Associate Research Professorship grade applications and Full Professors for Professorship/Research professorship grade applications.

7.11.5 The remainder after sending at least four (4) of the six (6) submitted hard or soft copy files shall be sent to internal assessors who should be at least Associate Professors for the Associate Professorship/Associate Research Professorship grade applications and Full Professors for Professorship/Research Professorship grade applications.

7.11.6 The Promotions Committee may grant promotion to Associate Professorship/Associate Research Professorship and Professorship/Research Professorship grades if at least four (4) of the six (6) assessors return a positive recommendation.

7.11.7 The Promotions Committee shall not grant promotion to Associate Professorship/Associate Research Professorship and Professorship/Research

Professorship grades if less than four (4) of the six (6) assessors return a positive recommendation.

7.11.8 A decision on the application shall remain pending for not more than three (3) years after the first sitting of the Promotions Committee.

8. TENURE

8.1 Only citizens and permanent residents of Zimbabwe, in accordance with Section 6 (2) of the University Act shall be appointed on permanent/full-time terms of service, which permit the granting of tenure in terms of this Ordinance, should the University so determine.

8.2 Persons who are not citizens or residents of Zimbabwe shall be appointed only on fixed-term contracts. In the event that they have completed one contract term successfully, such members shall be entitled to being considered for tenure, and therefore, further provisions of this section of the Ordinance do apply to such staff.

8.3 All academic staff appointed by the University shall be required to serve a probationary period before being considered for tenure provided that Appointment Boards, may, where it appears that the candidate so merits it, decide that a candidate be appointed at the level of Associate Professor/Associate Research Professor or Professor/Research Professor with immediate tenure.

8.4 The duration of the probationary period shall be:-

8.4.1 In the case of staff who, before the appointment, had tenure at another reputable University or institution of higher education, tenure maybe transferrable for those academic staff appointed from similar or recognizable institutions.

8.4.2 In the case of staff who had not previously had tenure: three (3) years.

8.4.3 Technicians: one (1) year

8.5 The criteria for the granting of tenure on completion of the requisite probationary period shall be: -

8.5.1 Satisfactory Teaching, Community Engagement, Research, Innovation and Industrialisation or for Research staff, contributing to knowledge as stipulated in item 7.4;

8.5.2 Satisfactory Research, that is, five (5) publications in refereed journals for Lecturer/Research fellow grade;

8.5.3 For Researchers and Technicians, satisfactory research has five (5) publications;

8.5.4 Satisfactory University Service.

8.6 The procedures for determining whether or not to grant tenure shall be as stipulated above for the consideration of applications for promotion and, therefore, the provisions of sections 7.4; 7.5; 7.6; 7.7; and 7.8 shall apply except that:

8.6.1 the initiation of the process shall be made by the University Administration at a time suitable in advance of the scheduled date of a member's probationary period of service.

8.7 If a member of staff is not granted tenure after the completion of his/her probationary period, the University may either:

8.7.1 Extend the probationary period by up to two further years with permission for the member of staff to apply for tenure before the expiry of that time; or terminate the member of staff's employment with the University.

8.7.2 For Researchers, extend the probationary period by up to two (2) further years with permission for the member of staff to apply for tenure before the expiry of that time; or terminate the member of staff's employment with the University.

8.7.3 For Technicians, extend the probationary period by one (1) year; or terminate the member of staff's employment with the University.

8.8 If at the end of the probationary period a member of staff is granted tenure, then the appointment shall be without time limit up to the age fixed by the University for retirement except that:

8.8.1 A member may resign his/her appointment by giving not less than six months' notice in writing.

8.8.2 For Technicians/Researchers a member may resign his/her appointment by giving not less than three months' notice in writing.

8.8.3 If a member fails to serve the required notice period, he/she shall be liable to pay the University an amount equivalent to his/her gross salary for the period not served.

8.8.4 A member may not resign while he/she is on Sabbatical Leave or on Contact Visit.

8.8.5 A member who resigns while he/she is on Sabbatical Leave or on Contact Visit shall be required to repay the University Sabbatical airfares received, salary received whilst on Sabbatical or Contact Visit, University contributions to member's pension scheme and six months' salary in lieu of notice.

8.8.6 Any period preceding or spent on such leave or visit shall not be counted as a period or portion of a period of notice.

8.8.7 The University Council may terminate the appointment for "good cause" by giving the member of staff not less than six months' notice or paying the member's salary in lieu thereof. This should be done in accordance with the University Code of Conduct.

8.9 Before terminating an appointment in terms of section 8.8.7 above, the Council: -

8.9.1. Shall inform the member in writing of the matters alleged against him/her and give the member the opportunity of replying in writing to those charges;

8.9.2 May, and if so requested by the member of staff, before considering such dismissal, refer the case to the Staff Disciplinary Committee established in terms of section 26 of the University Act.

8.10 Good Cause for the termination of an appointment in terms of section 8.8.7 means:

8.10.1 Conviction for any offence which the Council considers to be such as to render the person concerned unfit for the execution of the duties of his/her office,

8.10.2 Any physical or mental incapacity which the Council considers to be such as to render the person concerned unfit to hold his/her office,

8.10.3 Conduct of an immoral, scandalous or disgraceful nature which the Council considers to be such as to render the person concerned unfit to continue to hold his/her office,

8.10.4 Conduct which the Council considers to be such as to constitute failure or inability of the person concerned to perform the duties of his/her office or to comply with the conditions of tenure of his/her office.

ADMINISTRATIVE STAFF: APPOINTMENTS, GRADES, PROMOTION, GRADING AND TENURE ORDINANCE (GRADES 4 – 8), ORDINANCE 6

ARRANGEMENT OF SECTIONS

1. Interpretation
2. Title and date of commencement
3. Objectives
4. Structure of Administrative Staff (Grades 4 – 8)
5. Grading and Initial Appointment
6. Promotion
7. Tenure

PREAMBLE

In terms of section 29 (3) (h) of the University Act No.4 of 1999, the Council of the Midlands State University, with the approval of the Minister of Higher and Tertiary Education, Innovation, Science and Technology Development or such other Minister to whom the President may from time to time assign the administration of the Midlands State University Act, on the recommendation of the University Senate, makes the following Ordinance, which shall be administered in conjunction with other labour legislations and in-house policies and procedures.

1. **INTERPRETATION**

(i) In this Ordinance – **"administrative staff"** refers to all persons employed by the University in the grades 4 to 8 ranges and are not members of the teaching staff.

(ii) **'Promotion'** refers to upward movement of an employee from one job to another higher one or job category, with increase in salary, status and responsibilities.

(iii) **'Internal Applicant'** refers to a person who at the time of recruitment for the vacancy is employed by the University on permanent conditions with tenure having being duly granted by the responsible committee.

(iv) **"Substantive appointment"** means an appointment made under the provisions of these rules after due selection by prescribed methods of recruitment and includes an appointment made on probation followed by confirmation on completion of the period of probation.

(v) **University Service** refers to the period served in full time employment of the University

2. This Ordinance is cited as the Administrative Staff Ordinance (Grades 4-8) Number 6 of 2024 and shall take effect from 1 February 2024

3. OBJECTIVES

In making this ordinance, Council seeks to: -

3.1 Attract and retain administrative staff whose performance demonstrates particular merit in administrative duties (and related duties), service and leadership in the University and professional practice including service to the community;

3.2 provide an objective, fair systematic method of assessment in order to ensure a consistent application of standards for the appointment and promotion of staff.

4. STRUCTURE OF ADMINISTRATIVE STAFF GRADES (4 – 8)

4.1 The following minimum entry qualifications shall apply for this category of staff within the University:

Grade	Minimum Entry Qualifications

4	Masters
5	Masters - Administrative Bachelors-Technical
6	Masters
7	Bachelor's degree
8	Bachelor's degree-Administrative HND-Technical

4.2 The salary scale applicable to each grade is subject to approval by the University Council.
4.3 Minimum entry experience shall be determined by job specific requirements.
4.4 The University Council, or its authorized Committees shall have sole discretion in the University, and in so doing, may designate that posts be established at any of the grades listed in section 4.1.

4.5 **Categories of Grades**

Grade	Designations
4	Deputy Registrar; Deputy Bursar; Deputy Librarian; Chief Internal Auditor; Director-Marketing and Communications; ITS Director; Director of Projects, Procurement Director, University Engineer, Director-Health Services, Director-Performance Contracting, Director-University Secretariat; Legal Officer; Director-Central Services, Amenities and Maintenance
5	Deputy Director; Central Records and Archives Manager; Examinations Manager; Risk Officer; Quantity Surveyor; Systems Manager; Network Manager; User Support Manager; Business Solutions Manager; e-Learning Manager; Projects Manager; Architect; Production Manager; Food and Beverages Manager; Pharmaceuticals Manager; Enterprise Sales and Marketing Manager
6	Examination Officer; Principal Assistant Registrar; WRL Coordinator; Sub Librarian; Catering Services Manager; Procurement Manager; Senior Ecumenical Chaplain; Sports & Recreation Coordinator; Farms Coordinator; Senior Internal Auditor; Chief Business Analyst; ICT Projects Officer; Chief Software Developer; Chief ICT Security Officer, Webmaster; Marketing/Communications Manager; Sports Coordinator; Campus Coordinator; Counselling Coordinator; International Students and Alumni Officer; Residences Coordinator; Administrative Matron; Principal Assistant Bursar; Senior Internal Auditor; Assistant Legal Officer;

7	Assistant/Senior Assistant Registrar; Assistant/Senior Assistant Bursar; Internal Auditor; Industrial Liaison Officer; Computer Liaison Officer; Network/Systems/Software/Hardware Engineer; Systems Analyst; Server Administrator; Helpdesk Supervisor; Business Analyst; Ethical Hacker; Software Quality Assurance Officer; Senior Assistant Librarian; Assistant Catering Services Manager; Property Management Officer, University Counselor; Nurse- in- Charge; Production Supervisor; Sales and Marketing Officer; Senior HR Officer;
8	Administrative Assistant/Senior Administrative Assistant; Communications Officer; Head Chef; Personal Assistant; Graphic Designer; Media Officer; Communications Officer; Events Coordinator; Transport & Logistics Officer; Clothing Supervisor; Artisan Supervisor; Printer; Central Services Campus Supervisor; Deputy Chaplain; Deputy Sports Coordinator; Full-Time Warden; Head Chefs; Environmental Health Technician; Internal Audit Assistant; Procurement Specialist; HR Officer; Industrial Relations Officer; Welfare Officer; HR Systems Coordinator

5. GRADING AND APPOINTMENT

5.1 On initial appointment to the University Administrative staff category, a successful candidate shall be graded according to his or her qualifications and experience.

5.2 There shall be only one Administrative Staff Grading and Salary Structure, and the same salary scale shall apply to all posts in all relevant sections within the University.

5.3 **Qualifications**

5.3.1 The basic qualification for appointment to the University's Administrative staff is normally a first degree but a Master's degree and/or Professional Practicing Certificates may be required in areas as approved by the University. This is subject to review from time to time.

5.4 **Experience**

5.4.1 In granting recognition to relevant postgraduate experience, the University shall:

5.4.1.1 Make no distinction to relevance between professional and non-professional experience.

5.4.1.2 Recognise in full, the time spent as a full-time member of staff of a reputable university or tertiary organisation.

6 PROMOTION

6.1 Promotion is not an entitlement but shall depend on the availability of a vacancy.

6.2 The normal recruitment and selection procedure would apply when filling a higher-level vacant position. In this instance, the normal Staff Appointment Board would be convened to interview candidates for any vacant position.

6.3 The qualifying candidate shall be appointed accordingly.

7.TENURE

7.1 On joining the University, each employee shall enter into a three (3) month probationary period. During this period, either party may terminate the contract by providing a two (2) week notice period.

7.2 The criteria for the granting of tenure on completion of the requisite probationary period shall be: -

7.2.1 Satisfactory performance of duties as assigned by the respective head of department;

7.2.2 Satisfactory University Service;

7.2.3 Outstanding performance in the areas of innovation, creative work and enterprise development.

7.3 The appropriate final authority shall be the Non-Teaching Staff Promotions and Tenure Board.

JUNIOR NON-TEACHING STAFF ORDINANCE (GRADES 9 – 14)

ARRANGEMENT OF SECTIONS

1. Interpretation
2. Title and date of commencement
3. Objectives
4. Structure of junior non-teaching staff grades
5. Appointment Procedures
6. Tenure

PREAMBLE

In terms of section 29 (3) (h) of the University Act No.4 of 1999, the Council of the Midlands State University, with the approval of the Minister of Higher and Tertiary Education, Innovation, Science and Technology Development or such other Minister to whom the President may from time to time assign the administration of the Midlands State University Act on the recommendation of the University Senate, makes the following Ordinance. This Ordinance shall be read in conjunction with other labour legislations and in-house policies and procedures:

1. INTERPRETATION

(i) In this Ordinance – **'junior non-teaching staff'** refers to all persons employed by the University in the grade 9 to 14 ranges and are not members of the teaching staff excluding those on a probation period.

(ii) **'Promotion'** refers to upward movement of an employee from one job to another higher one or job category, with increase in salary, status and responsibilities.

(iii) **'Internal Applicant'** refers to a person who at the time of recruitment for the vacancy is employed by the University on permanent conditions with tenure having being duly granted by the responsible committee.

(iv) '**External Applicant'** refers to a person whom at the time of recruitment for a vacancy is not employed by the University or otherwise employed by the University on fixed-term conditions of service.

(v) **"Substantive appointment"** means an appointment made under the provisions of these rules after due selection by prescribed methods of recruitment and includes an appointment made on probation followed by confirmation on completion of the period of probation.

2. This Ordinance is cited as the Junior Non-Teaching Staff Ordinance Number 7 of 2024 and shall take effect from 1 February 2024

3. OBJECTIVES

In making this ordinance, Council seeks to:-

a. Hire the most-qualified candidate to fill an available position in a cost effective and timely manner.
b. Provide an objective, fair systematic method of assessment in order to ensure a consistent application of standards for the appointment and promotion of staff.

4. STRUCTURE OF JUNIOR NON-TEACHING STAFF GRADES (9 – 14)

a. The following structure of grades shall apply for junior non-teaching staff within the University:

LISTING OF NON TECHNICAL POSTS

13	Reprographic Technician, Disability Technician Assistant, Lab Assistant

5. GRADING AND APPOINTMENT

a. On initial appointment to the University's Junior Non-Teaching Staff compliment, a successful candidate shall be graded according to their qualifications and experience.
b. There shall be only one Junior Non-Teaching Staff Grading and Salary Structure, and the same salary scale shall apply to all posts in all relevant sections within the University.

7 PROMOTION

7.1 Promotion is not an entitlement but shall depend on the availability of a vacancy.
7.2 The normal recruitment and selection procedure shall apply when filling a vacant position. In this instance, the normal Appointments Board would be convened to interview candidates for any vacant position.
7.3 The qualifying candidate shall be appointed accordingly.

8 TENURE

8.1 On joining the University, each employee shall enter into a three (3) month probationary period. During this period, either party may terminate the contract by providing a two (2) week notice period.
8.2 The criteria for the granting of tenure on completion of the requisite probationary period shall be:-
8.2.1 Satisfactory performance of duties as assigned by the respective head of department.
8.2.2 Satisfactory University Service.
8.3 The appropriate final authority shall be the Non-Teaching Staff Promotions and Tenure Board, Junior Non - Teaching Staff.

THE RULES OF STUDENT CONDUCT AND DISCIPLINE ORDINANCE NO. 2, 2000

ORDINANCE NO. 2

In terms of Section 29 (iii) (a) of the Midlands State University Act (Chapter 25:21 of 1999), the Council of the State University in the Midlands with the approval of the Minister of Higher Education, makes the following Ordinance:-

1. The Ordinance may be cited as "The Rules of Student Conduct and Discipline Ordinance, 2000, Ordinance No. 2".
2. It constitutes the first set of Rules of Student Conduct and Discipline for the Midlands State University.
3. The Rules of Student Conduct and Discipline set out in the Schedule to this Ordinance shall come into effect from the 27th of March 2000.
4. In terms of Section 27 (4) of the University Act, the Student Disciplinary Committee hereby delegates to the Officials referred to in the Rules of Student Conduct and Discipline the power of investigating and exercising disciplinary authority in respect of misconduct by any student to the extent and in the manner set out in the Rules of Student Conduct and Discipline.
5. In terms of Section 27 (6) of the University Act, the Student Disciplinary Committee may recommend to the Vice-Chancellor the imposition of one or more of the following punishments:-
   - 5.1 expulsion or suspension from the University.
   - 5.2 the withdrawal of any academic or University privilege, benefit, right of facility other than to follow courses of instruction and present himself for examination.
   - 5.3 the imposition of a fine which shall be determined by the University from time to time, which fine may be deducted from any allowance payable to the student and shall be paid to the University
   - 5.4 a censure or rimand.
   - 5.5 such other penalty as may be provided for by or in terms of the statutes

- **SCHEDULES**

1. INTERPRETATION

The University Officers charged with the administration of these rules will at all times seek to implement the letter and spirit of the University Act and will in particular have regard to the following principles:-

- 1.1 the University is a society in which high standards of communal life must be established and maintained for the benefit of both present and future members of the University.
- 1.2 a high level of personal integrity and a development sense of responsibility towards others are as important to the University as outstanding scholastic achievement.
- 1.3 a proper concern for the reputation of the University and what it ought to stand for makes it incumbent upon its members to live decent and ordered lives.
- 1.4 individual or collective action by members of the University which constitutes a breach of these rules may require to be punished notwithstanding that the motive or goal of such action was commendable in the belief of such members.

2. UNDERTAKING AT REGISTRATION

When registering as a member of the University a student shall be given a copy of these rules and shall sign a statement in which he/she acknowledges that he/she has been furnished with the rules, and he/she undertakes to conduct himself/herself while a student of the University in accordance therewith and with any amendments duly made thereto.

3. STUDENT CONDUCT

3.1 No student of the University shall:

3.1.1 use the University premises contrary to University Regulations, Residence, Faculty or Departmental rules or do any act reasonably likely to cause such misuse.

3.1.2 damage or deface any property of the University or do any act reasonably likely to cause damage or defacement thereto.

3.1.3 disrupt teaching, study, research or administrative work, or prevent any member of the University or its staff from carrying on his/her study or work, or do any act reasonably likely to cause disruption or prevention and

3.1.4 engage in any conduct whether on or off the campus which is or is reasonably likely to be harmful to the interests of the University, members of the University staff or students.

3.2 The following would be regarded by the University as stances of breaches of the rule contained in 3.1 above:

3.2.1 displaying violence by word or act towards any member of the University, whether academic or administrative staff or student, or a guest of the University, or any visitor to the University or in any way intimidating or obstructing the free movement of such a member, guest or visitor.

3.2.2 disrupting or seeking to disrupt any proper function of the University whether it be an official function, Council meeting, Senate meeting, Faculty or Committee meeting, lecture, teaching session, the function of any University Society or day-today administrative activity.

3.2.3 Seeking to prevent a speaker invited by any section of this University Community from lawfully expressing his/her views.

3.3 Students are informed that:-

3.3.1 if a group of students form a common intention to commit certain acts and to assist each other in their commission, and in due course a breach of these rules is committed by one or some of the group, then each member of the group may be held to have committed that breach of the rules, who foresaw that the breach would occur, or who must, in the view of the Student Disciplinary Committee, have foreseen that it would occur. A member of such a group can avoid this happening to him/her by taking clear and unequivocal steps, before such a breach is committed, to show that he/she dissociates himself from the acts of the group with whom he/she has so far been associating.

3.3.2 Where a number of students have committed a breach of these rules and only one or more of these students can be identified, the University will not hesitate to take disciplinary action against those students who can be identified and against whom there is sufficient evidence to warrant investigation.

3.3.3 Where a student commits an act which is both an offence according to the laws of the country and one which after investigation appears to be a breach of the disciplinary rules of the University, the University may punish such a student notwithstanding that he/she is prosecuted and/or punished by the courts of the country.

3.4 A student shall obey any rules made from time to time by the Vice-Chancellor and shall further obey all instructions given by the Vice-Chancellor, the Proctors, and all those persons whom the Vice-Chancellor has charged to assist him in the maintenance of discipline, and in this regard:-

3.4.1 any Executive Dean, Deputy Dean, Chairperson of Department, Librarian, Deputy Librarian or member of the senior administrative staff may order any member of a gathering of students which is committing, or whose activities are likely to lead to a breach of Rule 3 above, to disperse, and may further order any such member to furnish his/her full name or accompany the member of staff for an interview with the Vice-Chancellor or a Proctor, or give both such orders. For the purpose of this section, Senior Administrative Staff shall include the Registrar, the Deputy Registrar (Academic), the Bursar, the Senior Assistant Registrar, Director of Works and Estates, Executive Dean of Students, Deputy Dean of Students, Assistant to the Vice-Chancellor, and Wardens of Halls of Residence.

3.4.2 if a student misbehaves in a lecture or teaching session or interferes with the conduct of a lecture or teaching session, the member of staff conducting such lecture or teaching or teaching session may order the student to leave or to cease interference.

3.4.3 Failing to comply with any order as above constitutes a serious offence.

4. THE POWERS OF UNIVERSITY PROCTORS

4.1 The Vice-Chancellor shall from time to time appoint as many Proctors as he deems necessary from among the academic staff who are not members of the Student Disciplinary Panel or Wardens. One Proctor shall be known as the Senior Proctor with responsibility for organizing and supervising the work of the proctors and shall be a member of the presentation of cases before the Student Disciplinary Committee.

4.2 A Proctor shall be charged with ensuring the proper observance of these rules by students on or off the University site and to this end shall, in addition to his power under Rule 3.4 have the following powers:-

4.2.1 to receive and investigate reports of students misconduct.

4.2.2 to summon any student to appear before him/her either to answer a charge or complaint against him/her or to answer questions with regard to any matter under investigation by him/her.

4.2.3 to proceed in the absence of a student who in the opinion of the Proctor has been duly summoned but has failed to appear;

4.2.4 to recommend to the Registrar that a student be summoned to appear before the Student Disciplinary Committee to answer a charge or complaint against him/her or to answer questions with regard to any matter under investigation by the Student Disciplinary Committee or Proctors.

4.2.5 to reprimand a student.

4.2.6 to impose a fine on a student which shall be determined by the University from time to time.

4.2.7 to order a student to pay to the University the amount of any financial loss caused to the University by such student.

4.2.8 to withdraw an existing student privilege, other than residence, for a period not exceeding one (1) academic term.

4.3 when a resident of a Hall of Residence makes a report to a Proctor of alleged misconduct, the Proctor shall communicate such a report to the Warden of the Hall of Residence concerned before taking action against the resident.

5. POWERS OF WARDENS

5.1 A Warden of a hall of Residence shall have the power to investigate any breach of these rules by a student of his/her Hall of Residence committed within any Hall of Residence and to make any of the following orders in respect of such student adjusted by him to have committed a breach of these rules:-

5.1.1 to reprimand a student.

5.1.2 to withdraw an existing resident student privilege, eg exeat.

5.1.3 to impose a fine which shall be determined by the University from time to time.

5.1.4 to order a student to pay the University the amount of any financial loss caused to the University. Such an order may be made on the person or persons who caused the loss or where identity cannot be established, on members of the residence in which the loss was sustained.

5.2 Where a Warden wishes to impose penalties 5.1.3 or 5.1.4 above, he/ she shall first furnish the Senior Proctor with a full report concerning the alleged offence and the proposed penalty. On receipt of this report the Senior Proctor may, either:-

5.2.1 confirm the proposed penalty and order of the Warden and in the event of variation, order the warden to execute such varied order or

5.2.2 institute a further investigation of the matter before making such order at the conclusion as he/she deems fit or

5.2.3 recommend to the Registrar that a Student Disciplinary Committee be convened to examine the case.

5.3 A Warden of a Hall of Residence and the Warden of Non –Resident students shall have the power to report any matter of student conduct to the Proctor or through the Registrar to the Student Disciplinary Committee.

5.4 Where a warden has imposed any of the penalties set out in Section 5.1.1 to 5.1.4 above on a student, he/she shall submit a report to the Senior Proctor, Registrar and Executive Dean of Students.

6. RULES FOR HALLS OF RESIDENCE

6.1 ***General***

A resident shall obey all rules made and instructions given by the Warden, Deputy and Sub Warden of the residence and shall refrain from conduct which:

6.1.1 may bring discredit upon his/her hall of residence or

6.1.2 is prejudicial to the welfare of other residents of the hall.

6.2 ***Powers of Hall Committee Members***

Members of a Hall Committee shall have the power, to investigate, and if necessary reprimand residents for any infringements of the rules contained in this section, and report such investigation or reprimand to the Warden.

6.3 ***Damage to Hall Property***

A resident shall be liable to compensate the University in full for any damage caused by him/her to University property. Damage caused to a study – bedroom shall be presumed to have been caused by the resident to whom such a room has been allocated unless the contrary is proved.

6.4 ***Fire***

A resident having knowledge of the outbreak of fire in, or adjacent to Hall premises shall as soon as possible:

6.4.1 inform the Warden, Deputy or Sub-Warden

6.4.2 summon the Municipal Fire-Brigade

6.4.3 inform the Director of Works and Estates.

6.5 ***Vacation Residence***

6.5.1 a resident occupy a study-bedroom during University vacation with the prior written authority of the Executive Dean of Students on the recommendation of the Executive Dean of the appropriate Faculty and the Warden.

6.5.2 applications for vacation residence must be submitted through the prescribed channels and on the prescribed form.

6.5.3 a resident granted leave to reside in a Hall of residence during vacation who no longer wishes to avail himself/herself of this privilege shall furnish the Executive Dean of Students with at least 3 days' written notice of such a fact. Omission to do so will render a resident liable to monetary penalty.

6.6 ***Exeats***

A resident may not absent himself/herself from a hall overnight, say on Saturday nights without previously informing and obtaining the permission of the Warden. To be absent from a Hall for two or more consecutive nights, he/she requires the leave of the Executive Dean of his/her Faculty in addition to that of the Warden. A resident of a Hall may be required to be in the Hall every night by such time as may be laid down in Regulations unless prior permission has been granted by the Warden or Sub-Warden to return to the hall at a late hour.

6.7 ***Visitors***

6.7.1 Resident students' parent may visit them in their rooms from 1000 to 2230 hours.

6.7.2 Male students may be entertained in female halls and female students may be entertained in male halls between the following hours:

Monday to Friday	1200 to 2230 hours
Saturday	1200 to 0000 hours
Sunday	1030 to 2230 hours

6.7.3 Outside the prescribed visiting hours, all parts to the halls except the Common Rooms and entrance foyers are out of bounds to members of the opposite sex.

6.7.4 Special arrangements may be made by application to the Warden of the Hall concerned.

6.7.5 These provisions apply to all students – undergraduate and Post-Graduate.

6.7.6 No visitor or non-resident student may make unauthorized use of accommodation in hall of residence. Students introducing visitors or non- resident students to the Hall may be held responsible by the Warden for the conduct of such visitors, and non-resident students making unauthorized use of the Hall facilities shall be guilty of misconduct.

6.8 ***Withdrawal from Residence***

If a student should leave the University or withdraw from residence before the end of the session for which he/she has been admitted, fees already paid by him/her are not returnable and the balance or all fees for that session not yet paid become immediately payable, except that a student who gives proper notice before the end of a semester that he/she wishes to vacate residence for the remainder of the session may be refunded the balance of residence fees in respect of the remaining whole terms of the session.

6.9 ***Loss of Valuables***

A resident shall report as soon as possible to the Warden the loss of any article from hall premises in circumstances raising any suspicion of theft.

6.10 ***Relationship of Residents and Staff***

A resident shall not require a member of the organization providing cleaning services to perform a service outside the scope of his/her normal employment duties.

6.11 ***Illness***

A resident who is confined to bed shall, so far as he/she is able, ensure that his/her illness is reported to the University Student Health Services.

7. RULES FOR THE USE OF VEHICLES

7.1 A student wishing to keep or use a motor vehicle including a motorcycle, motor scooter or motorized bicycle within the boundaries of the University site shall notify the Registrar in writing on the form prescribed.

7.2 Save for the prior written permission of the Registrar, a student shall not, within university grounds:

7.2.1 Park a vehicle in a parking place marked "for staff and visitors."
7.2.2 park a vehicle in any place at which parking by any person has been prohibited.
7.2.3 bring a vehicle within any university building.
7.2.4 ride or drive a vehicle on any part other than roads, tracks or parking places.
7.2.5 leave a vehicle in an unusable condition for a period longer than is reasonably required to effect necessary repairs.

7.3 Whenever a vehicle registered with the university is driven, ridden or parked in contravention of the rules set out in section 7.2 it shall be presumed that it was so driven, ridden or parked by the person in whose name the vehicle has been registered with the University unless the contrary is proved.

7.4 ***Penalties***

7.4.1 The wardens, proctors and such other persons so authorized by the Vice Chancellor shall have power to investigate breaches of the Rules contained in this section and to impose a fine which shall be determined by the University from time to time.
7.4.2 In the case of a third or subsequent offence, the name of the offender, with particulars of his/her previous offences under this section, shall be reported to the proctors who shall exercise appropriate authority in terms of rule 4

8. RULES OF PROCEDURE IN DISCIPLINARY PROCEEDINGS BEFORE THE STUDENT DISCIPLINARY COMMITTEE.

8.1 The Chairperson of the Committee shall regulate proceedings notwithstanding, best fitted to do substantial justice and at all times in accordance with the principles of natural justice. More particularly a student charged with the breach of the Rules of Student Conduct and Discipline shall at any investigation thereof before the Committee and with no derogation of his/her rights in terms of section 27(v) of the University Act:-

8.1.1 be furnished with a full and fair opportunity to meet such allegations if he/she so desires;
8.1.2 be permitted to present any relevant facts or call any witness capable of giving testimony relevant to the investigation;
8.1.3 be permitted to put questions to witnesses save those which are irrelevant, frivolous or vexatious;
8.1.4 be permitted to be present at times save when the committee is deliberating upon its decisions of the matter;
8.1.5 be advised as fully and clearly as possible of the Committee's decisions or recommendations.

8.2 The Proctors and Wardens shall conduct any proceedings before the Student Disciplinary Committee in accordance with Rule 8.1 save the provisions of section 27(vii) of the University Act will not be applicable.

8.3 In the event of the Legal Proctor conducting an investigation before the Student Disciplinary Committee it shall further be his/her duty;

8.3.1 to elicit all evidence brought to his/her attention which is relevant to the investigation and admissible, whether favourable to or prejudicial to the student whose conduct is the subject thereof;

8.3.2 to ensure the conduct of the investigation is consistent with the principles of natural justice;

8.3.3 if so required by the Committee, to advise the Committee as to the issues which they have to decide and as to any point of law or procedure so as to ensure the conduct of the investigation is consistent with the principles of natural justice.

8.3.4 to be absent at all times from the deliberations of the Committee upon its final judgment.

8.4 A notice to a student summoning him/her to appear before the Committee for investigation of an alleged breach of the University Rules of Student Conduct and Discipline shall be contained in a letter addressed to him/her and advising him/her of:

8.4.1 the place at which he/she is to attend;

8.4.2 the date and time at which he/she is to attend, provided that such date shall be not less than five (5) days after the date which such notice is received;

8.4.3 the rule which he/she is alleged to have contravened and full particulars of his/her alleged contravention.

8.4.4 his/her right to be accompanied and represented before the committee by a legal practitioner.

8.4.5 his/her right to call witnesses to attend and give any relevant testimony on his/her behalf before the Committee.

8.4.6 the right to furnish to the Proctors in advance of the investigation any information which he/she deems relevant to the investigation and which he/she wishes to have given due consideration.

8.5 A member of the Committee, who has acquired, other than in the course of his/her University life, knowledge of evidence in an investigation of misconduct to be held before the Committee, shall not participate in such investigation.

8.6 The Committee shall only find a student to have committed a breach of the Rules of Student Conduct and Discipline when it is satisfied beyond reasonable doubt that the student has committed such breach.

8.7 In the event of the Committee finding a student to have committed a breach of the Rules, either on the student's own admission or at the conclusion of an investigation, it shall, before determining the punishment it should impose or the terms of its recommendation to the Vice-Chancellor, permit such a student a full opportunity to make a statement or produce evidence which he/she wishes to be taken into consideration in mitigation of his/her punishment.

8.8 The Chairperson of the Committee shall keep full note of any proceedings before it, but this should not be a verbatim record.

8.9 As soon as possible, after the conclusion of a Student Disciplinary Committee hearing, the Chairperson shall convey a full report to the Registrar who shall inform the student concerned of the Committee's judgment.

8.10 The Chairperson of the Committee shall keep full note of any proceedings before it, but this should not be a verbatim record.

8.11 As soon as possible, after the conclusion of a Student Disciplinary Committee hearing, the Chairperson shall convey a full report to the Registrar who shall inform the student concerned of the Committee's judgment.

INNOVATION AND INDUSTRIALISATION ORDINANCE NUMBER 8 OF 2023

ARRANGEMENT OF SECTIONS

1. Preamble
2. Title
3. Interpretation
4. Application
5. Objectives
6. Structure of the Staff
7. Promotion
8. Probation/Tenure
9. Administration of Innovations
10. Transfer of Technology
11. Students in the Innovation Hub

1. PREAMBLE

In terms of section 29 (3) (h) of the University Act No.4 of 1999, the Council of the Midlands State University, with the approval of the Minister of Higher and Tertiary Education, Innovation, Science and Technology Development, or such other Minister to whom the President may from time to time assign the administration of the Midlands State University Act on the recommendation of the University Senate, makes the following Ordinance:

2. TITLE

This ordinance may be cited as the Innovation and Industrialisation Ordinance Number 8 of 2023.

3. INTERPRETATION

In this Ordinance:

3.1. **Commercialisation** shall refer to the transfer of intellectual property to bring or to create new products or services to the market; create awareness, establish distribution channels, and promote the trial and purchase of the goods and services.

3.2. **Community innovators** shall refer to innovators who are outside the university and are from the community.

3.3. **Contracted research** shall refer to legally bound research between the University and external partners. This research is conducted under agreed terms and conditions such as *inter alia* funding and ownership of research outputs.

3.4. **Enterprise shall refer to any profitable commercial venture.**

3.5. **Heritage-Based Education 5.0** shall refer to an education system that includes teaching, research, community service, innovation, and industrialisation with a heritage-based philosophy that emphasises industrialisation through innovation and knowledge of Zimbabwe's natural resources.

3.6. **Industrialisation** shall refer to the setting up of industries and processes that shall translate innovations and research outputs into goods and services.

3.7. **Innovation** shall refer to using relevant knowledge and resources to convert ideas into new products, processes, or practices or improve the existing product(s), process, or practice.

3.8. **Innovator** shall refer to an individual, company, or group of individuals who create new methods, ideas, or products.

3.9. **Intellectual Property (IP)** shall refer to mental creations such as inventions, literary and artistic works, designs and commercial symbols, names, and images. Patents, trademarks, trade secrets, utility models, industrial designs, and copyright laws can all protect intellectual property in various forms.

3.10. **Invention** means the act of putting ideas or objects together in a unique and novel way to create something that did not exist before.

3.11. **Spin-out** refers to any venture that springs out of knowledge capital created by any of the University's internal stakeholders. It can be a start-up, spin-off, or joint venture.

3.11.1. **Joint Venture** shall mean a commercial arrangement between two or more participants who agree to do business together wherein the parties create an entity by contributing equity and share the revenues, expenses, and control of the enterprise in proportion to their capital contribution, e.g., Special Purpose Vehicle (SPV)

3.11.2. Special Purpose Vehicle shall refer to a company, which comprises the university and other shareholders, registered with a specific mandate to undertake a specific project of commercial interest.

3.11.3. **Spin-off** company shall mean a business created by the University whose technology is owned by the University, financed by the University, and managed by the University.

3.11.4. **Start-up** company shall mean a business in the first stages of operations.

3.12. **Technology** shall refer to the application of scientific knowledge for practical purposes.

3.13. **Technology transfer (TT)** shall be defined as the transfer of new technologies, inventions/creations, and discoveries from university/research institutions to parties capable of commercialization for the framework.

3.14. **University** shall mean Midlands State University.

3.15. **University Company** shall mean a company wholly owned by the University.

4. APPLICATION

This ordinance applies to all innovators including University students and staff members, Faculties, Institutes, Centres as well as the community.

5. OBJECTIVES

In making this Ordinance, Council seeks to:

5.1 Promote a culture of research, innovation, and industrialisation within the University and beyond by supporting innovative initiatives by University staff members, students, and the community.

5.2 Provide for the commercialisation of university intellectual property into commercial industrial ventures or enterprises.

5.3 Enable the conversion of innovations and inventions from university and community research and development outputs into goods and services.

5.4 Foster collaboration with the community, industry, and commerce thus enabling technology development and transfer.

5.5 Promote the creation and sustainable growth of Start-ups, Spin-offs, Spin-off companies, and Special Purpose Vehicles.

5.6 Protect intellectual property by providing adequate legal protection against unauthorized use.

5.7 Create a framework for promoting and protecting innovators.

6. STRUCTURE OF RESEARCH AND INNOVATION AND ENTERPRISE DIVISIONS

6.1. The University shall establish a Research and Innovation Division and an Enterprise Division to serve as integrating factors and conduits for releasing University innovation outputs that lead to commercialisation and industrialisation through the following:

a) recruit and assist innovators in their innovation process and in starting new businesses;
b) engage in the development of products, processes, and services; c) facilitate technology transfer and promote enterprises;
c) create a conducive environment for inventions and innovations;
d) ensure innovators are promoted and facilitated;
e) stimulate and manage the flow of knowledge and technology across innovators and markets; and
f) facilitate application for intellectual property rights
g) facilitate the acquisition of relevant technology

6.2. The Research and Innovation Division shall have a structure approved by the University Council and shall be headed by an Executive Director.

6.3. The Enterprise Division shall have a structure approved by the University Council and shall be headed by an Executive Director.

6.4. The salary scale applies to each grade and is subject to approval by the University Council.

6.5. The University Council or its authorised committees shall have sole discretion and in so doing, may designate those posts to be established.

7. GRADING AND INITIAL APPOINTMENT OF INNOVATION AND ENTERPRISE STAFF

On initial appointment, a successful candidate shall be graded according to his or her qualifications and experience.

8. PROMOTION OF INNOVATION STAFF

8.1. Promotion will be guided by existing relevant ordinances.

8.2. The normal recruitment and selection procedure would apply when filling a higher-level vacant position. In this instance, the normal Staff Appointment Board would be convened to interview candidates for any vacant position.

8.3. The qualifying candidate shall be appointed accordingly.

8.4. The staff appointed to Innovation posts shall be promoted following the relevant Ordinance.

9. TENURE/PROBATION

9.1. On joining the University, each employee shall enter into a three (3) months probationary period. During this period, either party may terminate the contract by providing a two (2) week notice period.

9.2. The criteria for the granting of tenure on completion of the required probationary period shall be: -

9.2.1. Satisfactory performance of duties as assigned by the respective head of the department.

9.2.2. Satisfactory University Service.

10. UNIVERSITY INNOVATION HUB AND INDUSTRIAL AND SCIENCE PARKS

10.1. The university shall establish Industrial and Science Parks for nurturing innovative initiatives from the University Innovation Hub. The Innovation Hub shall:

a) assist Start-up companies to develop and launch new business models including developing business and marketing plans;
b) provide business and technical services, laboratory facilities, advisory, network, and linkages;
c) encourage entrepreneurship, innovation, and incubation of ideas;
d) assist the innovators in creating a sustainable, scalable, and profitable business model;
e) offer seminars or workshops that are relevant to business development; and
f) assist in commercialising new technologies.

10.2. The University Industrial and Science Parks: The University shall establish one or more Industrial and Science Parks for purposes of commercialisation and production of goods and services coming from innovators using the following criteria:

a) production of prioritised goods and services arising from prototypes, industrial designs, or other IP rights generated from the University Innovation Hub or related University research and innovation processes;
b) Start-up;
c) Spin-off; and
d) Special Purpose Vehicle.
e)

11. INNOVATION STREAMS INTO THE INNOVATION HUB

11.1. *Faculty Staff/Student/Graduate Innovators from the University's Faculties, Institutes, and Centres*: This stream shall focus on innovations generated by university staff and students.

11.2. *Industry-based Innovators*: Through the University Innovation Hub, industrialists, professionals, business practitioners, or entrepreneurs can turn their intellectual or artistic creations, designs, inventions, discoveries, or other forms of IP into monetised innovations for commercialisation and industrial growth.

11.3. *Community-based Innovators*: This stream draws on innovations generated by individuals engaged in diverse economic activities but not affiliated with the University.

11.4. *University Commissioned Innovations*: This stream is derived from research commissioned by the University to provide solutions and generate innovations to address priority national development issues.

12. ADMINISTRATION OF INNOVATIONS, INVENTIONS, AND CREATIONS

12.1. The Research and Innovation Division and its staff shall be responsible for recruiting, selecting, adopting, and managing Innovations in the Innovation hub.

12.2. The Technical Committee shall evaluate MSU's research products/services/technologies/IP/IPR before commercialisation. They shall preside over disputed areas in the selection, protection, and commercialization of innovations and recommend the course of action to the Executive Director, Research and Innovation.

13. THE INCUBATION PROCESS

13.1. The Incubation process shall be as follows:

13.1.1. Predisclosure of innovation/invention/creation

13.1.2. Full disclosure of innovation/invention/creation

13.1.3. Assessment of innovation/invention/creation

13.1.4. Signing of Incubation agreement and non-disclosure agreements.

13.1.5. IP protection, filing, and enforcement.

13.1.6. Product or technology development to prototyping demonstrable in a real environment.

13.1.7. The signing of Business partnership agreement(s) and registration of the company(ies). The agreement shall specify the revenue-sharing model.

13.1.8. Business and commercialization strategy development and funding to Market

14. OBLIGATIONS OF THE UNIVERSITY

The University shall:

14.1. Form an Innovation Committee with representatives from all faculties, institutes, and centres.

14.2. Encourage the creation, registration, and management of intellectual property rights.

14.3. Encourage the creation and/or upkeep of functional research and innovation infrastructure and equipment, such as laboratories, workshops, field sites, and industrial facilities.

14.4. Create and promote research, innovation, and industrialisation platforms to advance new knowledge, intellectual creations, innovations, scientific discoveries, technological inventions, arts, and scholarship. The platforms must

include, among other things:

14.4.1. Conducting a "Research and Innovation Expose" as the institution's prime annual showcase;

14.4.2. Promoting the conduct of research, innovation, and industrialisation seminars, dialogues, workshops, exhibitions, and conferences organised at the local, national, and international levels by Departments, Faculties, Institutes, and Centres following the University vision and dictates;

14.4.3. Recognizing achievements and excellence in research and innovation among innovators; and

14.4.4. Promoting skills and professional development training in relevant areas of research, innovation, and IP commercialisation among innovators;

14.4.5. Promoting a conducive environment for promoting productivity and sustainability of the University's research-innovation-industrialization ecosystem.

14.5. The University shall primarily support the development and productivity of the University Research-Innovation-Industrialisation Ecosystem;

14.6. Resident innovators shall be incentivised according to their agreement and University policies.

15. OBLIGATIONS OF THE INNOVATOR

The Innovator shall:

15.1. be guided by the Research and Innovation Division in establishing clear periodic performance targets for outputs and outcomes in the execution of innovation projects;

15.2. develop innovations to produce IP, products, goods, and services over a reasonably defined period;

15.3. individually or jointly work with others and University partners in industry, commerce, and with international research and innovation partners to cause the development, registration, and commercialisation of IPs;

15.4. use funds for the intended purpose;

15.5. provide the necessary acquittal for the funds received;

15.6. ensure confidentiality;

15.7. conform to ethics and regulatory requirements governing the project;

15.8. avail their prototypes or any such outputs of innovation to any dissemination platforms as may be requested by the University and

15.9. report progress according to the terms and conditions of the contract.

15.10. report to the Innovation Hub as per the contract agreement of resident innovators.

15.11. governed by the provisions of the Midlands State University Act (No. 4 of 1999 (Chapter 25:21) and any statutes, ordinances, regulations, or rules made under the authority of the Act, thus for resident innovators

15.12. sign non-disclosure and contract agreements when they join the Innovation Hub.

16. MANAGEMENT OF INNOVATION OUTPUTS AND IPRs

16.1. The University innovation outputs and IPRs shall be governed following the University IP Policy, Spin-out Policy, and Commercialisation Policy.

16.2. The Principal Investigator (PI) or lead innovator shall be regarded as the originator of the original idea and strategic leader of the innovation process. There shall be only one PI to an Innovation Project or Programme

16.3. The Co-Principal Investigator (Co-PI) shall be regarded as the co-originator and next-biggest contributor to the original idea, providing strategic leadership support to the research/innovation process. There may be more than one Co-PI to a project or programme.

16.4. The PI, Co-PI, and any other persons who have contributed significantly to the innovation shall be regarded collectively as innovators.

16.5. A Start-up company, where the Innovator(s) shall get at least 70% of the net income and the University gets up to 30% of the net income in the first 5 (five) years, and then innovators shall get 90% and the University 10% in the subsequent years.

16.6. A Spin-off company, where the University shall be entitled to 70% and Innovators, not more than 30%.

16.7. A Joint-venture with external parties or collaborative research, where the shareholding shall be stipulated according to the equity brought in by the university and other parties; and specified in a joint-venture agreement (thus sharing agreement shall be case specific).

16.8. In all cases, the University share shall be allocated to the relevant stakeholders.

16.9. The following guidelines shall apply to the transfer of IP

16.9.1. Creators may not assign, or license rights in, applicable intellectual property to third parties without the written consent of the University

16.9.2. All assignments must be in writing and must conform to the requirements of the Ordinance

17. GOVERNANCE AND SHARE OWNERSHIP STRUCTURE OF COMPANIES

17.1. The Governance and share ownership structure of companies shall be as follows:

17.1.1. Category A: Start-up Companies

a) Directorship: The Principal Innovator and Co-Innovators shall be among the principal directors or appoint their representatives on the Start-up Company Board, while the University shall appoint a Director(s) to the Board to represent its interests.

b) Shareholding: The Principal Innovator and Co-Innovators shall have a majority shareholding in any Start-up, with the University holding no more than 30% equity in each Start-up regardless of the investment including technical and expert support.

c) The Start-up company shares shall not be sold without the written consent of the University.

17.1.2. Category B: Spin-off Companies

a) Directorship: Directors shall be appointed by the University Council on the recommendation of the Vice Chancellor for all Spin-off companies.

17.1.3. Category C: Special Purpose Vehicle Companies

(a) The University may use Special Purpose Vehicle(s) (SPV) primarily for purposes of undertaking joint ventures and/or managing specific strategic projects.

(b) Directorship: Directors that represent University interests in the SPV shall be appointed by the University Council upon the recommendation from the Vice Chancellor and the shareholders of the Special Purpose Vehicle.

(c) Shareholding: The level of shareholding by the University in an SPV shall be proportional to the level of involvement and/or investment by the institution in the joint venture or project in question.

GENERAL ACADEMIC REGULATIONS FOR UNDERGRADUATE CERTIFICATES AND DIPLOMAS OF THE MIDLANDS STATE UNIVERSITY

1. PREAMBLE

1.1 Senate shall be the final authority for the interpretation of these Regulations.

1.2 Senate has the power to exempt any student from any of the regulations.

1.3 A student who has started a programme following one set of regulations will not be affected by regulations subsequently adopted unless agreed to in writing by the student.

1.4 Every student, by the act of registering with a Faculty, agrees to abide by all the rules, regulations and policies of the University, the Faculty, and the relevant Department.

1.5 In these Regulations the following terms shall be used as described:-

Programme: a plan of study lasting a period of time, which leads to the award of a diploma or degree of the University.

Level: a defined portion of a programme.

Subject: a field of study offered by a Department.

Module: a separately examinable component within a subject.

Project: a defined practical assignment, which is separately examinable.

Work Related Learning Experience: a prescribed period of hands-on experience in a relevant work setting.

Continuous Assessment: prescribed assignments to be completed within a given period and forming a part module.

2. GENERAL PROVISIONS

2.1 The Diplomas offered by the University are carried out primarily through taught modules with continuous assessment and examinations offered at the end of a semester.

2.2 Studies may be pursued on a full-time or part-time basis as prescribed by Faculties in their Regulations.

3. FACULTY REGULATIONS

3.1 There shall be Faculty Regulations for Diploma studies, which shall be read in conjunction with the General Academic Regulations. Specific restrictions on the choice of subjects, modules and additional requirements may be specified in the Departmental Regulations.

FACULTY OF EDUCATION

Diploma in Adult Education (UDAE)

4. FACULTY OF SOCIAL SCIENCES

- Certificate in Social Work
- Diploma in Social Work

5. ENTRY REQUIREMENTS

5.1 ***Normal Entry***
Holders of at least a certificate or at least five 'O' Level Passes including English.

5.2 ***Mature Entry***
The Faculty or Department may use their discretion on maturity entry.

6. WORK RELATED LEARNING

A prescribed period of hands-on practical experience in a relevant industrial, commercial / professional or community setting as prescribed by the Faculty.

7. DURATION OF CERTIFICATES AND DIPLOMAS

The minimum duration of the diploma shall be as prescribed in Faculty regulations.

8. INTERRUPTION OF STUDY

8.1 A student who breaks his or her studies for more than two consecutive semesters without the approval of the Senate shall normally be deemed to have lost any accumulated credits. Such a student may be allowed to re-apply for admission to the University

8.2 A student who wishes to interrupt his or her study programme shall apply in advance to the Faculty through the Head of Department and Deans of the appropriate Faculty, stating reasons why he/she wants to interrupt his/her study programme. Permission must duly be granted before he/she leaves the University. The decision of the Senate shall be communicated to the applicant by the Deputy Registrar Academic.

9. ELIGIBILITY FOR EXAMINATIONS

9.1 A student shall attend all such lectures, tutorials, seminars and practical work and undertake all other activities and assignments as approved by the University.

9.2 Each department shall, with the approval of Senate, determine the requirements for the modules they offer. A student who does not fulfil the requirements for any module shall not be allowed to take the examination for that module.

10. MARKING SCHEME AND CLASSIFICATION

Diplomas shall be awarded the following categories; distinction, merit and pass
The following marking scheme shall be used for the modules and programmes:

80% and above	Distinction
60%-79%	Merit
50%-59%	Pass
Below 50%	Fail

11. FAILURE TO SATISFY EXAMINERS

11.1 A candidate who fails to satisfy the examiners may be required by senate to write 'supplementary examinations' or to 'repeat' or to 'withdraw.'

11.2 If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the 'repeat' examination.

11.3 "Withdraw" means that the student shall withdraw from the university.

11.4 For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

11.5 "Carry over" means carryover modules from previous level to the Subsequent level.

11.6 “Retake” means redo module(s) failed in previous semester within the same level.

12. PLAGIARISM

12.1 Students must be guided by the University’s Anti-plagiarism and Responsible use of Artificial Intelligence (AI) Policy

12.2 Plagiarism is an academic offence and the University does not tolerate it whatsoever.

12.3 Plagiarism is the unacknowledged use of another person’s material or ideas. As such, plagiarism is an academic offence in the sense that theft is in ordinary daily life.

12.4 Recommendations on the severity of the penalty shall be determined by theappropriate Departmental Board or Panel of Examiners. Cases of plagiarism shallbe handled in the following manner: -

12.5 ***Minor Cases of Plagiarism***

- **First Offence:** in the case of plagiarism being discovered in a piece ofwork such as an essay or laboratory report or dissertation the student shall get a Chairperson’s warning but shall be given an opportunity tore-do and re-submit an acceptable piece of work after one week and shall be awarded a maximum mark of 50%.
- **Second Offence:** The student shall get a Dean’s warning and shall beawarded a mark of zero.
- **Third Offence:** Senate shall take disciplinary measures such as suspension or expulsion of the student who will have been awarded amark of zero.

12.6 ***Major Cases of Plagiarism***

- In the case of plagiarism being discovered in a project at end of the semester, that candidate shall be denied the opportunity to resubmit the project.

  15.5.1.1 The new project shall be submitted in the second semester after the discovery of the offence.

  15.5.1.2 The new project shall be awarded a maximum mark of50%.

- In the case of plagiarism being discovered in a project for the second time and after re-submission, a mark of zero shall be awarded and recorded, and Senate shall take disciplinary action either to suspend orexpel the student.

GENERAL ACADEMIC REGULATIONS FOR UNDERGRADUATE DEGREES

1. PREAMBLE

1.1 Senate shall be the final authority for the interpretation of these regulations.

1.2 The Senate reserves the right to alter, amend, replace or cancel any of the academic regulations.

1.3 No student who has started a programme following one set of regulations shall be set at a disadvantage by a regulation or regulations subsequently adopted.

1.4 There shall be Special Regulations for each Faculty which shall be subject to approval by the Senate and which shall include provision for admission to Programmes, Subjects and Modules within the Faculty and schemes of examinations for these Programmes.

1.5 No student may register for modules/programmes with another University without the approval of the Senate.

1.6 The General Academic Regulations shall take precedence over the Special Faculty Regulations.

1.7 Detailed syllabuses for modules in the subject will not form part of the General Academic Regulations or Special Faculty Regulations but will be submittedto the appropriate Faculty Boards for approval.

In these regulations the following shall be used as defined: - **"Programme"** a plan of study, lasting over a specific period, which leads to a degree, diploma or certificate; **"Level"** a prescribed period of study normally made up of two semesters at the end ofwhich decisions determining issues of progression are made. **"Semester"** a prescribedperiod of study normally made up of 15 weeks made up of, but not limited to, 13 weeks of teaching and two weeks of examinations.

"Module" for purposes of teaching and examinations a subject may be divided into one or more components called modules.

"Project" a defined practical/ research assignment, which is separately examinable. **"Work Related Learning"** a prescribed period of practical experience in a relevant industrial/commercial/professional or community setting. **"Continuous Assessment"** prescribed assignments to be completed within a specific period and forming part ofa module.

"Carry Over" means carryover modules from previous semester level to the subsequent level.

"Retake" means redo module(s) failed in a previous semester within the same level.

"Pending and Review" applies specifically to Level 3 students who are carrying modules

"Discontinue" means that the candidate must discontinue from the programme in which he/she has failed. Such students will be free to apply for admission/transfer into a different programme and his/her application will be considered through the normal admission procedures.

"Withdraw" means the student must withdraw from the University. Once withdrawn the student may not apply for admission until a period of four successivesemesters has elapsed.

"Aegrotat" a degree offered on concessionary terms after one has failed to sit for examinations due to illness or other unavoidable intervention of a 'force majeure' nature.

"Supplement" means rewrite module(s) failed with marks in the range of 40-49% **"Deferments"** means suspension of studies for a period of at least one semester. **"Presumed withdrawn"** a student is presumed to have withdrawn from his/her studieswhen after completing all registration formalities, the student without explanationfails to submit or partially submits continuous assessment or work-related learningreports and does not write scheduled end of semester examinations.

"Credit" An educational award which in accumulation with other educational awardsleads to the award of a degree/diploma certificate. One credit shall consist of 10 notional hours.

1.8 The Registrar shall maintain a schedule of programmes and modules and their codesfor use in computerized student records.

2. PROGRAMMES

2.1 The University may offer programmes for undergraduate Bachelor's Degrees at General and Honours levels.

2.2 GENERAL DEGREES

A 'General' degree requires the study of a degree of modules over four to six semesters.The programme shall include work related learning, which shall normally be done during the third level or as prescribed by the Special Faculty Regulations.

Students may select modules from a number of options in accordance with provisions in the Special Faculty Regulations. Normally one or two modules will be identified as 'major modules' to be studied throughout the programme, with up to five modules being studied as 'minors', each for two, three, or four semesters.

2.3 HONOURS DEGREES

2.3.1 The structure of the Honours Degree Programmes shall be prescribed in the Special Faculty Regulations. These structures may vary with the particular requirements of different faculties and departments, but all Honours Programmesshall normally contain the following elements:

2.3.1.1 one or more 'major modules' shall be studied over at least six orten semesters. Honours degrees shall normally include a period of work-related learning during the third level. Modules in the Honours degrees shall be studied intensively and progressively (i.e. studies inthe fifth to eighth semester assume prior knowledge of the modules studied from the first to the fourth semester). They shall be taught and examined at the level requiring a greater depth and breath of knowledge and understanding than expected of modules in 'general' degrees programmes.

2.3.1.2 a candidate for the Honours degree shall normally be required to complete a project or dissertation within his/ her programme of studyand this work may be based on the tasks and research performed during work Related learning.

2.3.1.3 the combination of modules within the Honours Programme shall be prescribed so as to focus on specific topics and to disallow a wide choice of disparate options.

2.3.1.4 one or more subsidiary modules may be studied at the 'General' levelwithin the Honours Programme but assessment in these modules willnot contribute to the final classification of the degree awarded or willbe assigned a light weighting in the overall calculations of the final marks. Normally 60% of the modules taken in the Honours degree will be in the major subject(s).

2.3.1.5 the following are in the General and Honours Degree Programmes offered by the University

2.4 SPECIAL HONOURS DEGREES

A 'Special Honours' degree requires the study of a degree over two semesters.The programme shall normally be done by candidates who are holders of a recognized undergraduate general/honours degree or as prescribed by the Special Faculty Regulations.

3. ENTRY REQUIREMENTS

3.1 Normal Entry

For normal entry candidates should:

3.1.1 have satisfied the general requirements as prescribed below; and

3.1.2 have satisfied the special requirements for entry into the particular programme chosen; and

3.1.3 have passed English Language at 'O' level with a C or better for all programmes

3.1.4 have passed Mathematics at 'O' level with a C or better in those programmes in which Mathematics is a prerequisite as prescribed by Faculty regulations.

3.1.5 Candidates from academic jurisdictions whose qualifications are deemed to be not equivalent to entry requirements set in the General Regulations will be required to take a foundation course.

GENERAL REQUIREMENTS

Passes in at least 5 subjects at Ordinary Level and at least two subjects atAdvanced Level or their equivalents.

The following are acceptable to the University:

Ordinary Level Passes or Equivalent

Ordinary Level of the Zimbabwe School Examinations Council

Ordinary Level of the Associated Examinations Board's General Certificate of Education Ordinary Level of the Cambridge School Certificate

Ordinary Level of the University of London's General Certificate of Education

Advanced Level Pass or Equivalent

Advanced Level of the Zimbabwe School Examinations Council.

Advanced Level of the Associated Examinations Board's General Certificate of Education;Advanced Level of the Cambridge Higher School Certificate;

Advanced Level of the University of London's General Certificate of Education;

3.1.6 General Subject Provisions

Subjects must have been chosen from the approved list below and restrictions against combinations overlapping must have been observed.

3.1.7 Approved Subjects for Admission Purposes

Subjects approved by the Zimbabwe School Examinations Council and/or theAssociated Examinations Board; and/or the Cambridge Local Examinations Syndicate and/or the London Certificate of Education: -

3.1.9 Faculty Requirements

For admission to a particular programme of study and/or for subject/modules within theprogramme there may be specific restrictions on the choice of subjects in the generalrequirements and/or additional requirements concerning entry. Such additional requirements shall be prescribed in the Faculty Regulations.

3.2 *Special Entry*

The following persons may apply for Special Entry and for permission to proceed to a firstdegree with exemption from the whole or part of the normal entry requirements: -

3.2.1 a person who has obtained a degree of this or another university or degree awarding institution.

3.2.2 a person who has obtained from a University or an Institution of similar status, academic qualifications (other than degrees) acceptable to Senate. A person who has obtained an appropriate number of subjects at an approved examination and has subsequently passed an intermediate or equivalent examination at a University acceptable to Senate;

3.2.3 students who qualify under this regulation for Special Entry may apply to the Senate and shall be granted exemptions as prescribed in Faculty regulations. Permission may be given by the Senate in accordance with Zimbabwe National Qualifications Framework for candidates to complete the programme for a Bachelor's degree in less than the normal required period provided that no student shall be allowed direct entry to the final level of any programme.

3.2.4 students who apply for admission under this regulation may be required to attendinterviews and/or special tests at the University to determine their suitability for admission to Bachelor's degree studies.

3.3 *Mature Entry*

Persons who are at least 25 years of age for males and 23 years for females on the first dayof the academic year in which admission is sought and who are not eligible for entry underthe Normal or Special Entry Regulations may apply for Mature Entry provided that:

3.3.1 applicants must have passed at least five approved 'O' Level subjects including English Language and Mathematics (where required) or equivalents, and must have demonstratedpotential suitability for University studies by virtue of their attainments and/or relevant work experience.

3.3.2 normally, applicants should have completed their full-time school or college education at least five years before the start of the academic year in which admission is sought.

3.3.3 applicants who wish to be considered under the Mature Entry provisions may berequired to attend interviews and/or special tests at the University designed to assess their command of the English Language, numeracy and reasoning ability and general suitability for admission to the Bachelor's degree studies.

3.3.4 applicants who have previously attended Mature Entry tests and/or interviews without success will not be considered for admissions under this form of entry unless in the intervening period they have acquired additional qualifications and/or experience.

3.4 Submission of Applications

3.4.1 Applications must be submitted either in hard copy or soft copy to Admissions, Registration and Student Statistics Office or online through the university online admissions platform.

3.4.2 The closing dates for receipt of application forms for Normal Entry shallbe advertised by the Registrar's Office each year. Late applicants may be considered upon payment of the prescribed late application fee.

3.4.3 The closing date for Special Entry and Mature Entry applications shall also be advertised by the Registrar's Office.

3.5 General Provisions

3.5.1 Every student must satisfy the University that he/she has adequate command of the English Language.

New students are required to register and pass a Communication Skills module, upon registration for a Bachelor's degree studies.

3.5.2 Students admitted under the Special Entry provision may be exempted from this requirement.

3.5.3 A student shall not register simultaneously for more than one programme at this University or any other institution without the permission of the Senate.

3.5.4 Registration will take place in accordance with the arrangements prescribed eachyear through the Registrar's Office.

3.5.5 A student's registration shall not be confirmed until he/she has fulfilled the requirements for payment of fees.

3.5.6 Normally, no student shall be admitted to any programme or any module more than two weeks after its commencement. Any exception to this regulation must have the written endorsement of the Chairperson of the Department and the Dean of the Faculty concerned and will be subject to approval through the Registrar's Office.

3.5.7 Students who enter or return to the University late shall not be entitled to extra tuition.

3.5.8 Such students shall be liable to pay late registration fees, unless the Registrar has given permission for such waiver of late registration.

3.5.9 A student registered for a module is expected to attend all classes prescribed for suchmodule. Where tutorials, seminars, fieldwork, vacation work and practical sessions areprescribed a student is required to attend and complete any assignment set.

3.5.10 If a student is unable to attend classes for health reasons for longer than 72 hours, he/she must notify the appropriate Faculty Officer as soon as possibleand submit certification in support thereof by a medical practitioner registeredin accordance with the Medical, Dental and Allied Health Professions Act. For absence on grounds other than health reasons, prior permission from the Dean on the recommendation of the Chairperson of the Department concerned shall benecessary.

3.5.11 After taking due consideration of the academic progress of the student, the Senatemay require or allow a student originally registered for one programme or subjectto register for another programme or subject on the completion of either the FirstSemester or Second Semester of the programme for which he/ she is registered.

3.5.12 Normally, no programme shall commence with fewer than ten students.

3.6 Refund of tuition fees

3.6.1 A student who leaves the University before the end of the session for which he/she has been admitted shall need to give a proper notice in writing to the Registrar and may upon written application to the Bursar, obtain a refund on tuition fees.

3.6.2 Application fees are non-refundable.

3.7 Deferment of Studies

3.7.1 A student who wishes to defer his/her studies for whatever reason should:

3.7.1.1 complete deferment of studies forms in triplicate.

3.7.1.2 submit completed forms to the Chairperson of Department and Dean of Faculty for approval.

3.7.1.3 submit deferment forms to the Bursar's Department (StudentAccounts Section) for noting.

3.7.1.4 submit signed deferment forms in triplicate to the Admissions,Registration and Statistics office.

3.8 The student should make sure that the deferment process is completed before leaving the University. Upon return to the University, resumption of studies forms shouldbe completed and submitted to the Chairperson,

Dean, and Bursar's Department for approval.

3.9 Students who fail to complete this process shall be deemed to have attended lectures and their student accounts will be debited with fees for the respective semester.

3.10 No retrospective authorization will be allowed.

3.11 Fees will be charged pro rata for the taught period on deferment.

3.12 Results for all students who deferred during their semester should indicate that the student deferred.

4. STRUCTURE OF PROGRAMMES

The duration of Bachelor's Degree Programmes shall be prescribed by Faculty Regulations. Each programme shall be divided into levels as follows:

4.1 a level shall include two teaching semesters, each broken down into two periods of study consisting of not less than 15 weeks. At the end of the second semester of a level, decisions determining issues of progression shall be made.

4.2 the possible combination of modules on offer within a specific semester shall be in accordance with the Faculty Regulations and shall be subject to approval by the Chairperson(s) of the Department(s) and the Deans(s) concerned.

5. GRADING AND DEGREE CLASSIFICATION

5.1 All Bachelor's degrees shall be classified in the following classes: First Class,Upper Second Class, Lower Second Class and Pass.

5.2 The following Grading and Degree Classification System shall be adopted for all modules and programmes:

75% and above	1	(First Class)
65%- 74%	2.1	(Upper Second Class)
60%-64%	2.2	(Lower Second Class)
50%-59%	3	(Pass)
49% and below	Fail	(Fail)

6. ASSESSMENT OF CANDIDATES FOR BACHELOR'S DEGREE

6.1 Normally, evaluation shall be based on continuous assessment as well as Universityexaminations. Unless otherwise approved by the Senate, continuous assessment will contribute between 25%and 50% of the overall assessment.

6.2 Each department shall determine which items of continuous assessment andpractical work shall be included in the continuous assessment and shall define the relevant weighting to each item of continuous assessment or practical work. Eachdepartment shall maintain written records of each student's performance in these elements of continuous assessment. Items incorporated in continuous assessment may include assignments, tests, essays, fieldwork, laboratory work and projects orany other as shall be determined by the department concerned.

6.3 Students shall normally take University examinations at the end of each period of study as prescribed in the Faculty and/or Departmental Regulations.

6.4 External Examiners shall be appointed to moderate all University examinations (except supplementary/special examinations).

6.5 All matters relating to the conduct of University examinations shall be the responsibility of the Registrar.

6.6 To be admitted to any University examinations, a candidate must: -

6.6.1 be registered as a student of the University in accordance with the GeneralAcademic Regulations;

6.6.2 have satisfactorily completed approved modules of study at the University.'Satisfactory Completion' of modules shall require submission of written work, attendance of all lectures, seminars, tutorials, work related learning placement, and research and innovation activities as stated in the Faculty and Departmental Regulations.

6.7 Exclusion from a University Examination shall require the authority of the Senate.

6.8 The Examiners may require any candidate to attend an oral examination and/or write a special examination.

6.9 Candidates studying Midlands State University degree programmes shall be required to have attained a minimum of 120 number of credits for undergraduates and 90 credits for Masters acquired during their period of study in order to graduate subject to faculty specifications. These are subject to Faculty and Departmental specification.

6.10 Candidates who would have attained credits from other reputable institutions shall be allowed to transfer their credits to Midlands State University. It is the prerogative of Senate to determine if such credits would be added to students' academic record.

7. INTERRUPTION OF STUDY

7.1 A student who discontinues studies for more than two consecutive semesters without the approval of the Senate shall normally be deemed to have lost any accumulated credits. Such a student may be allowed to re-apply for admission to the University.

7.2 A student who wishes to interrupt his or her study programme shall apply in advance to the Faculty through the Head of Department and Dean of the appropriate Faculty, stating reasons why he/she wants to interrupt his/her study programme. Permission must duly be granted before he/she leaves the University. The decision of the Senate shall be communicated to the applicant by the Deputy Registrar Academic Affairs.

8. ELIGIBILITY OF EXAMINATIONS

8.1 A student shall attend all such lectures, tutorials, seminars and practical work and undertake all other activities and assignments as approved by the University.

8.2 Each department shall, with the approval of Senate, determine the requirements for the modules they offer.

8.3 A student who does not fulfil the requirements for any module shall not be allowed to take the examination for that module.

9. DETERMINATION OF CANDIDATES' RESULTS

12.7 The Senate, on the recommendation of the Faculty Boards of Examiners, shall determine results.

12.8 Departmental Panels of Examiners shall comprise all full-time lecturing staff in that Department, the External Examiner(s) and, where appropriate, as determined by the Departmental Panel, part-time and/ or teaching assistants for the module/ subject concerned.

12.9 Faculty Boards of Examiners shall comprise the Dean and Deputy Dean of the Faculty, the Chairperson of each Department and the External Examiner(s) for the Department plus one other member of the Department nominated by the Departmental Panel from each Department.

12.10 The Departmental Panel of Examiners shall:

- agree, for each candidate on marks in terms of percentages, for continuous assessment, for the University examinations and overall marks (combining the continuous assessment and University examinations marks) in modules and, where required, in terms of the Faculty Regulations, in subjects.
- recommend to the Faculty Board of Examiners whether a candidate should pass or fail the relevant module(s) taken.

- Departmental Panel of examiners will meet at the end of the examination session to ratify the marks obtained by candidates.
- Departmental Panel of Examiners will meet at the end of the secondsemester of a level to ratify the marks obtained by candidates and to makerecommendations to Faculty Boards on issues of progression by students to the next level. In the case of repeat students, the panel of examiners mayhowever make a recommendation to withdraw a student at this stage;
- Where module prizes are available for award, make recommendations to the Faculty Board at the end of the second semester of a level for the awardof these prizes.

12.11 The Faculty Board of Examiners shall: -

- consider the recommendations of the Panels of Examiners and recommendto Senate an overall result for each candidate and any other conditions it may deem appropriate,
- meet at the end of end of a defined examination period each study period/ semester of a level to ratify the marks obtained by candidates.
- meet at the end of the second semester of a level to ratify the marks obtained by candidates and to make recommendations to Senate on issues of progression by students to the next level. In the case of repeat level students, the Faculty Board may have however, make a recommendation towithdraw or discontinue a student at this stage;
- make recommendations to the Senate at the end of the second semesterof a final level with regard to the award of prizes, which may be available for candidates within the programme.

12.12 In determining results, all Departmental Panels of Examiners and Faculty Boards of Examiners shall have regard to all special requirements as prescribed in the Faculty Regulations. Such regulations may require candidates to satisfy the examiners in thecontinuous assessment and University examinations separately or in aggregate.

13. PROVISIONS FOR PASSING AND PROCEEDING IN A PROGRAMME

13.1 Students' progress automatically from semester one to semester two at each level with the exception of special cases which would have been approved by Senate e.g.,cases of students applying for deferment of studies and cases of students failing four modules in the first semester of the year.

13.2 Each Scheme of Examinations shall indicate which modules must be passed before acandidate may be allowed to proceed to a subsequent level of the programme (or portion thereof).

13.3 Normally a student shall not be allowed to proceed in a subject without having passed the previous formal examination(s) in that subject and having satisfied the entire prerequisites for proceeding in that subject as may be specified in the FacultyRegulations.

13.4 A student who passes sufficiently well in one level in aggregate may be permitted to proceed to a subsequent level carrying a module or modules subject to the provisionsof the Faculty Regulations.

14. FAILURE TO SATISFY THE EXAMINERS

14.1 A candidate who fails to satisfy the Examiners in terms of these General AcademicRegulations and Faculty Regulations may be required by Senate to: -

a. retake if Faculty regulations prescribe such examinations.

b. proceed to the next level of the programme carrying one or more modules from a preceding level.

c. repeat

d. discontinue

e. pending and review

f. withdraw and reapply after two years

14.2 ***Special Examinations***

- Senate may allow a candidate to write a special examination whereextenuating circumstances exist.
- Students affected by extenuating circumstances may apply to their Faculties within one week from the missed examination for their claims tobe considered.
- Faculties would consider students claims and make recommendations to the Academic Board.
- A student may claim that extenuating circumstances have contributed materially or significantly to:

  a. poor performance in any formally assessed work.

  b. absence from examinations or other assessment event.

  c. failure in examinations or other assessed work.

- Valid extenuating circumstances shall normally be:

  - circumstances which are unexpected, significantly disruptive andbeyond a student's control and which may have affected his/her academic performance.
  - an illness or serious accident at the time of an assessment or in theperiod leading up to a formal assessment.
  - severe emotional or mental stress at the time of an assessment orimmediately before an assessment or e.g. through bereavement, social, matrimonial family problems, experience of assault, robbery or other traumatic event, eviction/homeless in unavoidable circumstances, unavoidable involvement in legal proceedings.
  - other factors totally outside the student's control, e.g. for part timestudents, unforeseen and essential work commitment, unforeseendecisions taken by the company or practice which prevent them from completing their assignment (in both these circumstances, a letter from the employer must be supplied)

- Evidence in support of claims must be in the form of an originaldocument (not a photocopy) written and supplied by an appropriate third party giving details of the circumstances with dates and if possiblestating how students' assessment has been affected. Third party should be a person who knows the student in a professional capacity and can give a first-hand account of the circumstances.
- Acceptable evidence of extenuating circumstances shall include:

  - a medical certificate issued at the time of the illness, specifying the nature of the illness and the dates affected and confirming thatthis is the doctor's own diagnosis. It is not sufficient for the doctorto write a letter stating that the student saw him/her and claimed to be suffering from stress etc.
  - a letter from the University Student Counselling Services
  - a letter from solicitor; summons to attend court; an eviction notice; a report from a police officer;
  - death certificate (that is, of a close relative)
  - a letter from a transport official confirming serious unforeseen disruption to transport or a letter from a member of the University staff confirming absence of other group members due to the samedisruption;
  - a report from the invigilator (if the student falls ill during an examination) outlining the

extenuating circumstances together with medical evidence if appropriate.

- Students affected by extenuating circumstances shall be allowed to sit for aspecial examination during the period as scheduled by the Examinations Department/ when supplementary examinationsare being written.
- Special examinations shall be assessed in the same way as regular/ sessional examinations.

14.3 ***Supplementary Examinations***

- Senate may allow a candidate (second level second semester or final level second semester students only) to write a supplementary examination to enable him/her to pass a module of a programme in terms of the Faculty Regulations.
- Normally supplementary examinations shall be written at the end of the programme by a student who fails with a supplementable mark during the last semester of the programme in line with the Faculty Regulations.
- To be eligible for supplementary examination in a module a student must obtain a supplementable mark of at least 40% in the overall assessment.
- Where supplementary examinations have been allowed the examiners willnot incorporate continuous assessment in the determination of the result forthe supplementary examination.
- Supplementary examinations shall be marked as "Pass" or "Fail" and the overall maximum mark awarded in a supplementary examination shall be 50%.
- If a student is required to write a supplementary examination this fact and the results obtained in the supplementary examination in terms of "Pass" or "Fail" should be recorded on the official transcript of his/her academic results.
- Where a dissertation or project is prescribed in any programme, candidatesshall be informed in advance of the deadline of submission of such dissertation or project. Unless the Academic Board has granted prior permission for an extension of this deadline any candidate who fails to meet this submission deadline shall normally fail the dissertation or project. In such cases, on the recommendation of the Examiners, candidates may be permitted to resubmit the dissertation or project at a later date, normallywithin three months of the original submission deadline. Unless otherwisedetermined by Senate, the maximum mark allowed for such work should be50%.

14.4 ***Retake***

See definition of terms (Subsection 1.7)

14.5 ***Carry Over***

- The number of modules carried from the previous level to the subsequent

  level may be limited by the Faculty Regulations.
- For all levels other than the Work-Related Learning Level, the maximum number permissible under this provision shall not exceed 25% of the numberof modules normally scheduled in a particular level of a programme.
- For the Work-Related Learning level, students may only carry modules

  from the previous level of the programme.
- Normally where a prerequisite is involved a candidate will be required to

  pass it before taking higher modules.
- Students carrying over modules will be re-examined at the next regularly scheduled examinations, normally taken at the next semester examinations.
- Students may be required by the Senate to undertake continuous assessmentwith the carry over modules. This assessment will then be taken into account in the usual way in determining the overall assessment.

14.6 ***Repeat***

- A candidate, who is not proceeding to the subsequent level of the programme but has passed at least 50% of the modules in that level of theprogramme, may be allowed to repeat failed modules.
- 'Repeat' failed modules will be allowed in cases where a candidate has passed 50% of the modules in that level of the programme but cannot proceed to the next level. In such cases the student will be allowed to retain credits for the passed modules.
- Repeat a level means repeat all modules of the level. This will apply to candidates who will have failed more than 50% of the modules taken in that level. In this case candidates will be required to repeat all modules both passed and failed modules in that level.

14.7 ***Discontinue***

- A candidate who passes less than 25% of the modules in the level of a

  programme will be required to discontinue.

14.8 ***Withdraw***

A candidate who:

a. has failed the same level of the programme twice, or

b. has failed two different programmes will be required to withdraw.

15. WORK-RELATED LEARNING

15.1 Programmes at the University shall normally include at least ten months of supervised Work-Related Learning during the third level. In exceptional cases, periods of Work-Related Learning maybe prescribed by the Faculty Regulations.

15.2 Assessment of the Work-Related Learning will be carried out in accordance with the following regulations: -

- To obtain overall pass, a student must pass the Academic Supervisors Assessment Report the Employer's Assessment Report and the Work-Related Learning Report (where Applicable).
  - A student who fails Academic Supervisors Assessment Report and the

    Employers Assessment Report will be required to repeat the level.
  - A student who fails the Work-Related Learning Report (where applicable)but has passed the Academic Supervisors Assessment Report may be allowed to re-submit the Work-Related Learning Report within two (2) months from the date of publication of results, unless otherwise determined by Senate. The maximum mark allowable for such referred work is 50%.
  - The Academic Supervisors Assessment Report mark and the EmployersAssessment Report shall be determined by the Departmental Panel of Examiners from the marks awarded by the Work-Related Learning Supervisors and the Academic Supervisors.
  - Two copies of the Work-Related Learning Report (where applicable) ina format approved by the faculty must be submitted to the Departmentwithin three weeks before the end of the level.
  - A student who fails to meet the date for submission of the Work-RelatedLearning Report (where applicable) will normally be considered to have failed the report.
  - The General Regulations on repeat, discontinue and withdraw shall apply to Work-Related Learning.

15.3 A student who fails the Work-Related Learning level shall not proceed to the next level of the programme.

16. APPEALS

16.1 Any candidate who, having failed to satisfy the Examiners, is required to withdrawfrom the University or to discontinue from a programme, has a right to appeal against the decision.

16.2 A committee shall be set up by Senate to consider such an appeal.

16.3 Any candidate who wishes to lodge an appeal against withdrawal or discontinue must do so in writing to the Registrar within twenty-one (21) days after the publication of the Examination results.

16.4 On appeal, the candidate must state clearly the grounds of the appeal.

Where a candidate is appealing on medical grounds, a medical practitionerregistered in terms of the Health and Allied Professions Act must substantiate themedical grounds in writing. Any other evidence, which the candidate wishes to submit in support of his/her case, must be lodged with the written appeal.

16.5 The Registrar will refer all punctually submitted appeals submitted in time to theTermination of Studies Appeals Committee.

16.6 The Appeals Committee will consider as legitimate grounds for appeal new evidence of mitigating circumstances (except mere lack of diligence or other fault on the part of the student), which was not previously available to the Examiners. Extenuating circumstances of a 'force majeure' nature which explainand are directly relevant to the student's academic performance and which he/ she could not reasonably have been expected to have foreseen or avoided will beconsidered.

16.7 The Committee will be empowered to hear an appellant orally and seek such

information and evidence, as it may consider pertinent.

16.8 No right to oral hearing is conferred upon appellants and the University will not reimburse any expenses incurred by an appellant in making a personal appearancebefore the Committee.

16.9 The Committee shall make recommendations on each case, as it deems appropriate.

Its recommendations shall be submitted to Senate for approval, or to the Academic Board or the Vice Chancellor on behalf of Senate for consideration.

16.10 All re-mark requests will not be entertained unless directed by Senate. However,a student who has been given a **withdraw** or a **discontinue** decision may appealin writing to the Registrar within twenty-one days after the publication of the examination results.

17. AEGROTAT PROVISIONS

17.1 If a candidate, having completed a substantial component of his/her programme,is prevented by serious illness or other sufficiently substantiated cause, from completing the prescribed requirements for that level of the programme, he/she may be deemed by Senate to have satisfied the Examiners for that level upon the recommendation of the Board of Examiners concerned and upon such other conditions as Senate may decide, provided that: -

- the candidate will not normally be exempted from presenting a thesisor a dissertation where such is prescribed; and
- the award of the Aegrotat Degree shall be without classification.

17.2 Where a student qualifies for an Aegrotat Degree, he/she may opt instead to writespecial examination in order that an overall grade may be determined and formallycredited to the student. Application for such an option must be submitted to the Registrar in writing not later than four weeks before the scheduled examinations.

17.3 Senate may require any candidate, irrespective of his/her programme or Faculty whose examination performance has been adversely affected by sufficiently substantiated circumstances of 'force majeure' nature to write a special examinationat a future date, normally not later than three (3) months after the date of the last examinations missed. In such circumstances, unless otherwise stipulated by the Senate, the mark

obtained in the special examination will be counted in the overallassessment for the purpose of degree classification.

17.4 Exceptionally, Senate on the recommendations of the Academic Board of Examiners may permit such special examinations for candidates in respect of the performance in a supplementary examination. In such circumstances, the mark obtained in the specialsupplementary examination must be treated in accordance with Regulation 11.3.5.

17.5 A candidate who wishes to be considered for an aegrotat degree must apply in writing together with written substantiation for his/her case, to the Registrar within ten days of the end of the University examinations for the programme concerned. Acertificate from a medical practitioner registered in terms of the Health and Allied Professions Act must support appeals that are submitted on medical grounds.

17.6 A candidate who is awarded an aegrotat degree may not re-enter the examination for the same degree, but shall be eligible to apply to proceed to an appropriate higher degree

18. PLAGIARISM

18.1 Students must be guided by the University's Anti-plagiarism and Responsible use of Artificial Intelligence (AI) Policy

18.2 Plagiarism is an academic offence and the University does not tolerate it whatsoever.

18.3 Plagiarism is the unacknowledged use of another person's material or ideas. As such, plagiarism is an academic offence in the sense that theft is in ordinary daily life.

18.4 Recommendations on the severity of the penalty shall be determined by theappropriate Departmental Board or Panel of Examiners. Cases of plagiarism shallbe handled in the following manner: -

18.5 ***Minor Cases of Plagiarism***

- **First Offence:** in the case of plagiarism being discovered in a piece ofwork such as an essay or laboratory report or dissertation the student shall get a Chairperson's warning but shall be given an opportunity tore-do and re-submit an acceptable piece of work after one week and shall be awarded a maximum mark of 50%.
- **Second Offence:** The student shall get a Dean's warning and shall beawarded a mark of zero.
- **Third Offence:** Senate shall take disciplinary measures such as suspension or expulsion of the student who will have been awarded amark of zero.

18.6 ***Major Cases of Plagiarism***

- In the case of plagiarism being discovered in a project at end of the semester, that candidate shall be denied the opportunity to resubmit the project.

  15.5.1.3 The new project shall be submitted in the second semester after the discovery of the offence.

  15.5.1.4 The new project shall be awarded a maximum mark of50%.

- In the case of plagiarism being discovered in a project for the second time and after re-submission, a mark of zero shall be awarded and recorded, and Senate shall take disciplinary action either to suspend orexpel the student.

19. MISCONDUCT AT EXAMINATIONS

Subject to Ordinance 2, (the Rules of Student Discipline Ordinance) any candidate found using unauthorized materials, including electronic gadgets or attempting to obtain information from other candidates or their papers, or otherwise guilty of misconduct during the examination may be disqualified not only in the examination, but in the whole examination, and further disciplinary action may be taken by the University.

20. PUBLICATION OF RESULTS

20.1 The Registrar shall be responsible for the publication of the results of the University examinations as approved by Senate.

20.2 Queries on examination results shall be entertained within fourteen days from the date of publication of results.

21. ACADEMIC TRANSCRIPT

On leaving the University each student may obtain, on application to the Registrar, onecopy of formal transcript of his/her complete academic record at the University.

‘

22. AWARD OF DEGREE

The award of degree and diplomas shall be subject to the approval by University Council.Candidate completing the requirements for such awards will be entitled to receive formal certificates of the University, bearing the University seal and signed by the Vice- Chancellor and the Registrar confirming the award.

23. DURATION OF STUDY PROGRAMMES

The following shall be the duration for the completion of the undergraduate diplomasand degrees:

PROGRAMME PERMITTED	NORMAL PERIOD	MAXIMUM PERIOD (INCLUDING REGISTRATION)
Full time - 2 Years Diploma	2 Years	4 Years
Block Release/ Visiting Diploma	3 Years	6 Years
Full time - 2 Years Degree	2 Years	4 Years
Full time - 4 Years Degree	4 Years	8 Years
Full time - 5 Years Degree	5 Years	10 Years
Block Release/ Visiting Degree	3 Years	6 Years

GENERAL ACADEMIC REGULATIONS FOR POSTGRADUATE DIPLOMAS AND TAUGHT MASTER'S DEGREES

1. PREAMBLE

1.1 Senate shall be the final authority for the interpretation of these Regulations.

1.2 Senate reserves the right to alter, amend, repeal, suspend or replace any of these Regulations.

1.3 Senate has the power to exempt any student from any of the Regulations.

1.4 A student who has started a programme of study following one set of regulations shall not be affected by regulations subsequently adopted unless agreed to in writing by the student.

1.5 There shall be Academic Regulations for each Faculty which shall be subject to approval by the Senate and which shall include provision for admission to programmes.

1.6 The General Academic Regulations shall take precedence over the Faculty Regulations.

1.7 Every student, by the act of registering, agrees to abide by all the rules, regulations and policies of the University and of the relevant Faculty and Department.

1.8 Students shall be held liable for contravening any of these Regulations.

1.9 In these Regulations the following terms shall be used as described: -

"Programme"

A plan of study lasting over a period of time, which leads to the award of a diploma or degree of the University.

"Level"

A prescribed period of study.

"Semester"

A prescribed period of study normally made up of 15 weeks including 15 weeks of teaching including two weeks of examinations.

"Subject"

A field of study offered by the Department

"Module"

A separately examinable component within a subject.

"Project/ Research"

A defined practical assignment, which is separately examinable.

"Work-Related Learning"

A prescribed period of hands-on practical experience in a relevant industrial, commercial/professional or community setting.

"Continuous Assessment"

Prescribed assignment to be completed within a given period and forming a part of a module.

"Carry Over"

Means carry over modules from previous level to the subsequent level.

"Retake"

Means redo module(s) failed in a previous semester within the same level.

"Aegrotat"

A degree offered on concessionary terms after one has failed to sit for examinations due to illness or other unavoidable interventions of a 'force majeure' nature.

"Deferment"

Means suspension of studies for a period of at least one semester.

"Presumed withdrawn"

A student is presumed to have withdrawn from his/her studies when after completing all registration formalities, the student without explanation fails to submit or partially submits continuous assessment or work-related learning reports and does not write scheduled end of semester examinations.

"Credit"

An educational award which in accumulation with other educational awards leads to the award of a degree and diploma. One credit shall consist of 10 notional hours.

2. GENERAL PROVISIONS

2.1 Studies are pursued on a full-time basis.

2.2 The degrees may be offered in all Faculties and Departments. Fields of study or research are determined by Senate on the recommendation of the Department and Faculty concerned.

2.3 A students shall not register simultaneously for more than one programme at this University or any other institution without the permission of the Senate.

3. FACULTY REGULATIONS

There shall be Faculty and Departmental Regulations, which shall be read in conjunction with the General Postgraduate Diplomas and Taught Masters Regulations. Specific restrictions on the choice of modules and additional requirements may be prescribed in the Faculty Regulations.

4. APPLICATION

4.1 Application forms for the various programmes shall be obtainable from:

Admissions, Registration and Student Statistics Office

Midlands State University

P Bag 9055

Gweru

Zimbabwe

Harare Campus

Number 1 Kwame Nkrumah Avenue

Harare Zimbabwe

Zvishavane Campus

C/O Main Campus

Alternatively, forms can be downloaded from the University Website: www. msu.ac.zw

4.2 The completed application forms should be returned to the Admissions, Registration and Student Statistics Office.

4.3 Applications shall be considered in the first instance by the Chairperson of Department in consultation with the teaching staff of the Department in which the candidate wishes to study. The considerations shall be sent to the Faculty Dean for approval.

5. GENERAL REQUIREMENTS FOR ADMISSION

5.1 *Post-Graduate Diplomas*

To be admitted to a programme leading to the award of a Postgraduate Diploma, a candidate must normally have obtained a pass in the first degree in an appropriate field of study at Midlands State University or any other approved University.

5.2 *Taught Masters*

5.2.1 To be admitted to a programme leading to the award of a taught Master's degree, a candidate must normally have obtained a good pass in the first degree or experience in an appropriate field of study at Midlands State University or any other approved University.

5.3 The Chairperson of a department shall submit in writing to the Faculty Higher Degrees Committee a statement on the suitability or otherwise of each applicant.

6. STRUCTURE OF SEMESTER

Shall be as prescribed in the Faculty Regulations

7. DURATION OF STUDY PROGRAMMES

7.1 The following shall normally be the duration for the completion of the post-graduate diploma and taught Masters degrees:

PROGRAMME	**MINIMUM PERIOD**	**MAXIMUM PERMITTED DURATION (Including Registration)**
POSTGRADUATE DIPLOMA		
Full-Time	4 Semesters	8 Semesters
MASTERS PROGRAMMES		
Full-Time	5 Semesters	9 Semesters

8. PROGRAMME OF STUDY

8.1 Each student is required to pursue a prescribed programme of study under the direction of a supervisor, who shall be a member of the academic staff of the University in the appropriate discipline. Normally, one or more

supervisors, either from within or from outside the University, will also be appointed. If the major part of the student's research programme is being conducted at an institution outside the University, a co- supervisor at the institution shall, where possible, be appointed.

8.2 The supervisors shall report on each student's progress to the appropriate Departmental Board and/or to the Faculty Higher Degrees Committee.

8.3 Students must maintain regular contact with the supervisor and may be required to attend scheduled continuous assessment sessions for certain periods at the University as directed by their approved supervisor(s).

8.4 No break in the normal continuity of study shall be permitted, except by permission of the Senate on the recommendation of the Faculty Higher Degrees Committee. If a student who is doing continuous assessment as component of the degree is unable to attend scheduled sessions for health reasons or other reasons for longer than 72hours, he/she must notify the appropriate Department through his/her supervisor as soon as possible and where the absence is due to health reasons, submit documentary evidence in support thereof by medical practitioner registered in accordance with the Health and Allied Professions Act.

9. INTERRUPTION OF STUDY PROGRAMME

A student registered for a post-graduate programme may not break his/her programme of study for more than two consecutive semesters without the approval of Senate on the recommendations of the Faculty Higher Degrees Committee.

10. PROGRAMME STRUCTURE FOR POSTGRADUATE DIPLOMAS AND TAUGHT MASTERS DEGREES

The programme structure for the Post-Graduate Diplomas and taught Master's Degrees shall comprise:

10.1 Core Modules

10.2 Prescribed Electives (to be defined by Department)

10.3 Project/Dissertation and supervision

11. PROJECT/DISSERTATION TOPIC AND SUPERVISION

11.1 The Chairperson of Department and members of his/her Graduate Studies Committee shall, in respect of each student, approve a dissertation or project area and propose a Supervisory Committee and /or Supervisor for the candidate.

12. GRADING SYSTEM

12.1 Student performance in a module shall be graded as follows:

12.1.1 DIPLOMA/DEGREE CLASSIFICATION

Range of Marks %	**Interpretation**
80-100	Distinction
70-79	Merit
60-69	Credit

50-59	Pass
Below 50	Fail

13. ELIGIBILITY FOR EXAMINATIONS

13.1 A student shall attend all such lectures, tutorials, seminars and practical work and undertake all other activities and assignments as approved by the University.

13.2 Each department shall, with the approval of Senate, determine the requirements for the modules they offer. A student who does not fulfil the requirements for any module shall not be allowed to take the examination for that module.

14. MODULE CREDIT REQUIREMENTS FOR POSTGRADUATE STUDIES

The minimum credits that the registered student is required to earn to graduate shall vary and are prescribed according to the programme regulations.

15. PROGRESSION

15.1 If a candidate fails all modules at the end of the first semester, he or she shall repeat failed modules.

15.2 If a candidate obtains the minimum number of credits required but fails in not more than two core modules, he or she can proceed to the second level, but must pass all such core modules before obtaining the degree. To proceed from one level to another, a student should at least pass 75% of the modules.

16. DEFERMENT OF EXAMINATION

16.1 *On grounds of ill-heath:*

a student, who has satisfied all the requirements but is unable to take the main (end of semester) examinations on grounds of ill health shall, on application to the Registrar, and on provision of a Medical Certificate issued or endorsed by the University Medical Officer, be allowed to defer the semester examinations, and shall be allowed to take them at the next offering. Subsequent application for deferment, on grounds of ill health, shall be subject to a Medical Certificate issued by a properly constituted Medical Board.

16.2 *On grounds other than ill-health*:

in cases of deferment on grounds of other than ill-health, the appropriate Dean shall invite the applicant for an interview and advise the University as appropriate. It shall be the student's responsibility to satisfy the University beyond reasonable doubt why he/she wishes to defer the examinations.

16.3 In all cases of deferment of examinations, the applicant(s) shall obtain written responses from the Registrar before leaving the University.

17. SCHEME OF EXAMINATION

17.1 The examination shall consist of written papers and such practical work/project/ dissertation as may be prescribed by departmental regulations.

71.1.1 A candidate may also be examined orally on the substance of his/her dissertation.

18. SUBMISSION OF DISSERTATION

18.1 A candidate shall submit a proposal or project of his/her dissertation for approval to the appropriate department not less than six months before the completion of the dissertation. After the proposal of the dissertation has been approved, it may not be changed except with the permission of the Senate on the recommendation of the

Department and the Faculty Higher Degrees Committee.

18.2 After completing his/her programme of study, the candidate shall submit to the Faculty Board through the Chairperson of Department a dissertation which shall comply with the following:

18.2.1 Each copy of dissertation shall be signed by the candidate and the Supervisors/Supervisory Committee.

18.2.2 The dissertation or thesis shall normally be written in English and the presentation must be satisfactory.

18.2.3 A dissertation submitted for a Degree shall consist of the candidate's own account of his/her research. There shall be a declaration to the effect that the dissertation is the candidate's own work produced from research undertaken under supervision. It may describe work done in conjunction with the candidate's Supervisor provided that the candidate states clearly his/her share in the investigation and that his/her statement is certified by the Supervisor

18.2.4 A dissertation / project submitted for Taught Master's Degree and Postgraduate Diploma must normally range between the following:

Taught Master's Degree	15 000 - 20 000 words
Post-Graduate Diploma	10 000 - 15 000 words

19. PLAGIARISM

19.1 Students must be guided by the University's Anti-plagiarism and Responsible use of Artificial Intelligence (AI) Policy

19.2 Plagiarism is an academic offence and the University does not tolerate it whatsoever.

19.3 Plagiarism is the unacknowledged use of another person's material or ideas. As such, plagiarism is an academic offence in the sense that theft is in ordinary daily life.

19.4 Recommendations on the severity of the penalty shall be determined by theappropriate Departmental Board or Panel of Examiners. Cases of plagiarism shallbe handled in the following manner: -

19.5 ***Minor Cases of Plagiarism***

19.5.1 **First Offence:** in the case of plagiarism being discovered in a piece ofwork such as an essay or laboratory report or dissertation the student shall get a Chairperson's warning but shall be given an opportunity tore-do and re-submit an acceptable piece of work after one week and shall be awarded a maximum mark of 50%.

19.5.2 **Second Offence:** The student shall get a Dean's warning and shall beawarded a mark of zero.

19.5.3 **Third Offence:** Senate shall take disciplinary measures such as suspension or expulsion of the student who will have been awarded amark of zero.

19.6 ***Major Cases of Plagiarism***

19.6.1 In the case of plagiarism being discovered in a project at end of the semester, that candidate shall be denied the opportunity to resubmit the project.

19.6.1.1 The new project shall be submitted in the second semester after the discovery of the offence.

19.6.1.2 The new project shall be awarded a maximum mark of50%.

19.6.2 In the case of plagiarism being discovered in a project for the second time and after re-submission, a mark of zero shall be awarded and recorded, and Senate shall take disciplinary action either to suspend orexpel the student.

20. MISCONDUCT AT EXAMINATIONS

20.1 Subject to Ordinance 2, (the Rules of Student Discipline Ordinance) any candidate found using unauthorized materials, including electronic gadgets or attempting to obtain information from other candidates or their papers, or otherwise guilty of misconduct during the examination may be disqualified not only in the examination, but in the whole examination, and further disciplinary action may be taken by the University.

NB: Items 19 and 20 are additions which originally were not there.

21. EXAMINERS AND DETERMINATION OF RESULTS

21.1 ***WRITTEN MODULES***

Two Examiners of whom one shall be a moderator shall be appointed by Senate on the recommendation of the Faculty Higher Degrees Committee to examine written modules in respect of the taught Master's Degree programmes and Post Graduate Diploma programmes.

1.2 APPEALS

1.2.1 All re-mark requests will not be entertained unless directed by Senate. However, a student who has been given a withdraw or a discontinue decision may appeal in writing to the Registrar within twenty-one days after the publication of the examination results.

1.2.2 An application entered on a candidate's behalf by a person other than the aggrieved candidate himself/herself shall not be entertained.

1.2.3 No action shall be taken on an application which is submitted outside the time stipulated in 21.2.1. Review shall not proceed unless the review fee is fully paid.

1.2.4 If it emerges a complaint for review is frivolous or ill motivated, the Faculty Board may prescribe further sanctions, which may include barring the complainant from the University examination for a stated period or an indefinite period.

22. PUBLICATION OF RESULTS

22.1 Results of examinations taken at the end of each semester shall normally be published by the Registrar before the commencement of the following semester.

22.2 A result statement indicating a student's performance in the examination shall be made available to the student via his/her e-learning account.

23. AWARD OF DEGREE

23.1 A Post-Graduate Diploma or Taught Master's degree shall be awarded to a candidate who has been properly admitted to the University, has followed the approved programme of study over the period, and has fulfilled both the University and Faculty/Departmental requirements.

24. TRANSCRIPT OF ACADEMIC RECORD

At the end of a student's programme, the University shall issue to the particular student a complete transcript of his/ her academic record.

25. CANCELLATION OF AWARD

Notwithstanding previous confirmation of an award of a taught Master's Degree and Post Graduate Diploma, Senate may at any time cancel an award, even with retrospective effect, if it becomes known that:

25.1 a candidate had entered the University with false qualifications, or

25.2 a candidate had impersonated someone else, or

25.3 a candidate had been guilty of an examination malpractice.

25.4 that there are other reasons that would have led to the withholding of confirmation of the award in the first place.

In any such event, the decision of Senate shall be published and the candidate notified. Such cancellation and the reasons for it shall be entered on the candidate's transcript.

GENERAL ACADEMIC REGULATIONS FOR MASTER OF PHILOSOPHY AND DOCTOR OF PHILOSOPHY DEGREES

1. PREAMBLE

1.1 The Senate shall be the final authority for the interpretation of these Regulations.
1.2 The Senate reserves the right to alter, amend, repeal, suspend or replace any of these Regulations.
1.3 A candidate who has begun a programme of study following one set of Regulations shall not be affected by a new set of Regulations.
1.4 The General Academic Regulations shall take precedence over Faculty Regulations.
1.5 Every candidate, by the act of registering, agrees to abide by all the rules, regulations and policies of the University and of the relevant Faculty and Department.
1.6 Candidates shall be held liable for contravening any of these regulations.
1.7 In these Regulations the following terms shall be used as described:

"Concept Note"
A one (1) to five (5) paged document that outlines an area and nature of study.

"Deferment"
Suspension of studies for a period of at least one semester, that is, taking time off a study period of up to two consecutive semesters.

"Forced Termination of Studies"
A candidate's studies may be terminated on academic or non-academic grounds such as when they fail to meet the requirements set out in the General Academic Regulations for Master of Philosophy and Doctor of Philosophy Degrees.

"Level"
A prescribed phase of study.

"Presumed Withdrawn"
A candidate is presumed to have withdrawn from their studies, when after the candidate has completed all registration formalities and without explanation, fails to submit progress report.

"Programme"
A plan of study lasting over a period of time, which leads to the awarding of a degree of the University.

"Progress Report"
A document that outlines work done in a particular semester.

"Registration"
Registration shall mean providing respective documents as may be required, and paying semester fees as set out in the fees structure on or before the beginning of every new semester, and obtaining confirmation of registration.

"Semester"
A prescribed period of study shall normally made up of six (6) months.

"Subject"
A field of study offered by a department.

"**Supervision**"
Supervision shall mean mentoring of the supervisee who shall be expected to work independently but under expert guidance and oversight.

"Thesis"

A defined practical assignment, which is separately examinable.

"Voluntary Termination of Studies"

This is a voluntary decision by the student to terminate their studies at the University.

2. GENERAL PROVISIONS

2.1 Departments, Faculties, Schools and Institutes are responsible for ensuring that all students admitted into an MPhil/PhD/DPhil programme have met the admissions requirements; that the research is reasonable, and capable of yielding significant results; and that candidates have fulfilled all requirements for the MPhil/PhD/DPhil degree prior to being recommended to the Senate for the aforesaid award.

2.2 The objective of the Masters degree by research (MPhil) and doctoral study (PhD/DPhil) is to guide students to do original research. Thesis produced should be original and suitable for at least two publications in an accredited peer-reviewed indexed journal as a contribution towards knowledge and insight of the discipline.

2.3 The degrees shall be offered in all Departments within all Faculties; Schools, and Institutes. Fields of study or research shall be determined by Senate.

2.4 The maximum timeframe expected for a decision on provisional and full registration from the date of receipt of the application shall normally be 21 working days respectively.

3. REGULATIONS

3.1 There shall be Departmental, Faculty, School or Institute Regulations, to be read in conjunction with the General Academic Regulations for Master of Philosophy and PhD/Doctor of Philosophy Degrees.

3.2 Area of study/specialisation and any other additional requirements may be prescribed and/or suggested the by Department, Faculty, School or Institute Regulations.

4. POSTGRADUATE DEGREES

The University shall offer Master of Philosophy (MPhil) and PhD/Doctor of Philosophy (PhD/DPhil) either be by Traditional/Research thesis, or Thesis by publication.

5. GENERAL REQUIREMENTS FOR ADMISSION

Application for Master of Philosophy and PhD/Doctor of Philosophy shall be open throughout the University's calendar year.

5.1 Master of Philosophy Degree

5.1.1 Applicants must have obtained an appropriate honours degree (ZNQF Level 8), or equivalent.

5.2 PhD/Doctor of Philosophy

5.2.1 A candidate must be in possession of a pass in a relevant Master's or MPhil degree (ZNQF Level 9) or its equivalence, in a field offered by the University.

5.3 Application Requirements and Procedure

5.3.1 Application for MPhil or PhD/DPhil shall be made online on https://ww5.msu.ac.zw on the MSU-Postgraduate Studies Portal.

5.3.2 A one-to-four paged concept note, certified copies of academic, and professional qualifications shall be required.

5.3.3 A motivational statement, or curriculum vitae or resume, and or any such additional documents, and or artefacts, recordings or publications **may be** requested.

5.3.4 Proficiency in English language, or any such, as may be deemed relevant to be used for training shall be verified.

6. REGISTRATION

6.1 Provisional Registration

Students shall register online at the beginning of each semester on the MSU-Postgraduate Studies Portal.

6.1.1 The candidate shall be advised of the need to register, and will only be regarded as a student after successfully completing registration procedures. The purpose of provisional registration shall be to:

i. allow the candidate time to develop an acceptable supervised proposal for the thesis; and
ii. allow the candidate to demonstrate suitability for the degree by meeting the requirements established by the University.

6.1.2 The candidate shall be given one semester (six months) to complete and defend (at a faculty organised seminar series) the full proposal. The semester will not be counted as part of the training period. Extension of period rests with Senate.

6.2 Full Registration

At the end of the provisional registration period, a candidate shall be required to apply for full registration provided they have successfully presented their final supervised proposal at a scheduled Faculty, School or Institute Seminar Series. If the candidate fails to meet the requirements for full registration within the stipulated time, the Faculty Higher Degrees Committees, the School, Institute or Departmental Board may recommend period of extension for approval by Senate, or termination of studies.

6.2.1 MPhil students must complete their studies within 24 months (2 years), and PhD/DPhil four years (48 months) after registering for full registration, continuation, thereafter is subject to approval by Senate.

6.3 Progress Reporting

There shall be Candidate and Supervisor(s) Progress Reporting submitted to the university online vial the MSU-Postgraduate Studies Portal.

7 ROLES OF THE RESEARCH AND INNOVATION DIVISION, DEPARTMENTAL BOARDS, FACULTY/SCHOOL/INSTITUTE HIGHER DEGREES COMMITTEES AND DEANS COMMITTEE ON ACADEMIC AFFAIRS

7.1 Research and Innovation Division

7.1.1 The Research and Innovation Division shall render administrative and operational support to Departments, Faculties, Schools and Institutes with respect to MPhil and PhD/DPhil studies in the University.

7.2 Boards and Higher Degrees Committees

7.2.1 In the case of a Provisional Registration, the Departmental Board, School, or Institute shall reflect on the **concept note**, guided by, *inter alia*, whether it is:

a. valuable and has an impact to humanity, the discipline, innovation, industry and commerce, and academia in general;
b. researchable, and or may lead to the development, promotion or creation of new knowledge, goods and or services, and or
c. whether the department and, or the university has the capacity in terms of the required infrastructure, supervision (even as externally hired), funding or whether there is potential for self and or external funding, and;

7.2.1.1 Suggest and recommend supervisor(s).
7.2.1.2 Recommend to the Faculty Higher Degrees Committee granting of a provisional or Full Registration.

7.2.2 Faculty, School or Institute, shall grant or reject provisional registration thereafter recommend to DCAA to approach Senate for ratification.

7.2.3 In the case of a Full Registration:

7.2.3.1 the Departmental Board, School, or Institute shall reflect on **the supervised proposal**, guided by whether the proposed study is:

a. valuable and has an impact to humanity, the discipline, innovation, industry and commerce, and academia in general;
b. researchable, and or may lead to the development, promotion or creation of new knowledge, goods and or services, and or
c. Whether the department and, or the university has the capacity in terms of the required infrastructure, supervision (even as externally hired), funding or whether there is potential for self and or external funding.
d. Recommend to the Faculty Higher Degrees Committee for the granting of Full Registration.

7.2.3.2 Satisfy itself that the Departmental Board fulfilled Section 7.2.1 and grant, or reject provisional registration as recommended by the Departmental Board; report the decision to the Deans Committee on Academic Affairs (DCAA) for Senate decision.

7.2.4 In the case of a full registration, the Faculty Higher Degrees Committee shall satisfy itself that **the supervised proposal**:

a. Addresses the research, innovation and industrialisation needs of the university and country, humanity and or,
b. Potentially leads to the development, promotion or creation of new knowledge, goods and or services, and or
c. Whether the department and, or the university has the capacity in terms of the required infrastructure, supervision (even as externally hired), funding or whether there is potential for self and or external funding.

7.2.5 Recommend to DCAA for the granting of a full registration or termination of studies.

7.3 The Deans Committee on Academic Affairs (DCAA)

7.3.1 Recommend to Senate for Provisional, Full Registration, Termination or Extension of Studies decisions.

8. UPGRADE FROM MPHIL TO PhD/DPHIL

A candidate registered for the MPhil degree may apply for upgrading to PhD/DPhil, after completion of not less than twelve (12) months' studies if their supervisor(s) so recommend(s), upgrade registration to PhD/DPhil. The application shall be accompanied by a written recommendation from the Faculty Higher Degrees Committee, School or Institute, submitted to the Research and Innovation Division. DCAA shall make a determination and recommend to Senate for approval. The duration of further study, if any, which shall be required to pursue for the PhD/DPhil shall be prescribed by Senate.

9. DOWNGRADE FROM PhD/DPHIL TO MPHIL

A candidate registered for the PhD/DPhil, who wishes to downgrade to MPhil may apply for permission to downgrade to MPhil. The following shall be required by DCAA for recommendation to Senate:

i. Supervisor(s), Faculty Higher Degrees Committee, School or Institute written recommendation.

10. SUPERVISION OF MPHIL OR PhD/DPHIL

10.1 Supervision Requirements

An MPhil or PhD/DPhil candidate shall conduct research under the guidance of a supervisor(s) as approved by Senate. All members of the supervisory team shall be suitably qualified scholars or may be experts/practitioners who shall report on each candidate's progress at the end of each semester. Normally, a supervisor shall be permitted to supervise a maximum of five (5) MPhil candidates and four (4) PhD/DPhil.

10.2 Supervisor qualities and qualifications

10.2.1 The MPhil or PhD/DPhil supervisor must be a doctoral graduate with proven academic accomplishments, and or industrial experience in research; and must have a solid or respectful publication record in peer reviewed journals or assessed equivalents.

10.2.2 Preferably, be in the professorial grade or have credentials that qualify them to be in that grade.

10.2.3 The MPhil or PhD/DPhil supervisor must be knowledgeable and possess deep, current content knowledge, and stays ahead of the supervisee for effective mentoring; demonstrates awareness of research, innovation and industrialisation needs and preferably, have experience in building collaborative relationships with a range of colleagues (internal or external) within own and adjacent disciplines and or research areas, research groups, and with stakeholders and other users of research.

10.2.4 Normally, two supervisors shall be assigned to each project, a main supervisor plus a co-supervisor. At least one of them must be an academic at the Midlands State University. In cases where the University has no capacity to supervise, all supervisors may be drawn from any national, regional, international university or research institute or institution.

10.2.5 Senate reserves the right to add or remove supervisor(s) from the recommended supervisory team.

10.3 Duties, Expectations of Supervisor and Supervisee

10.3.1 The collective duties of the Supervisor shall be to:

10.3.1.1 Initiate the supervisee into sound research culture and practices acceptable in the field chosen for study; assist the supervisee progress semesterly and complete of set targets.

10.3.1.2 Guide supervisee on topic selection and refinement; proposal and thesis development; mentor candidate in paper presentations and article publications; lead on experiments, and compilation of the final thesis report in readiness for examination.

10.3.1.3 Assist in the search and application of research grants, and where applicable, facilitate filing for the protection of intellectual property (IP), through patents, copyrights, or industrial designs.

10.3.1.4 The supervisor and supervisee shall thrive to identify or develop innovations, or create new products, or knowledge for dissemination to the society.

10.3.1.5 The medium language shall normally be English (UK). Where other languages, other than English, shall be used, translations into English (UK) shall be required at the expense of the candidate.

10.4 **Supervision Allowances**

10.4.1 Supervisors shall normally be paid an allowance at the end of every semester as shall be determined by the University, provided the candidate being supervised is registered and has been supervised for the semester upon submission of progress reports.

10.4.2 The supervisor(s) shall be paid the allowance for the semester in which the final thesis is submitted for examination.

10.5 **Supervisee.**

10.5.1 A supervisee or candidate shall maintain regular contact with the university and their supervisor(s).

10.5.2 No break in the normal continuity of study shall be permitted, except by permission of the Senate.

10.5.3 An MPhil or PhD/DPhil candidate **may** be engaged in teaching at the University, provided that the total demand made by teaching duties does not exceed eight hours of work per week.

11. Deferment of Studies

11.1 Deferment of studies shall be permitted. Normally, the deferment shall not be more than two consecutive semesters. The candidate must have the deferment process finalised before leaving the University as deferment shall not normally be done in retrospect.

12.1 Any extensions to the deferment period shall be approved by Senate.

12.2 At the expiry of the deferment, the candidate shall be required to regularise resumption of their studies.

12. Termination of Studies and Supervision

12.1 Termination of studies and or supervision shall be permissible.

12.1.1 Termination shall be 'Voluntary' wherein a candidate or appointed supervisor shall intentionally express desire to terminate their studies or supervisor contract any time of the year by notifying, in writing or otherwise, the university through the Research and Innovation Division.

12.1.2 A candidate who wishes to voluntarily terminate their studies shall complete a 'Termination of Studies Form,' and submit a completed and signed form to the Research and Innovation Division together with a supporting letter detailing the reasons for intending to terminate their studies.

12.1.3 The Research and Innovation Division, together with Department and Faculty, School, or Institute may interview, even separately, the applicant after which studies shall be terminated. DCAA shall approach Senate for ratification.

12.1.4 Termination shall be 'Forced Termination' wherein the candidate shall be obliged to cease undertaking studies due to:

12.1.4.1 Lapse in the maximum permissible period required to have completed the programme, or;
12.1.4.2 Failure to fulfil full registration requirements within the stipulated time, or due to;
12.1.4.3 Poor academic performance or gross failure to progress.
12.1.4.4 Failure to re-register after deferment of studies period has lapsed and no communication granted by the University.
12.1.4.5 Gross violation or failure to abide by binding and other University regulations, policy or procedure or;
12.1.4.6 Where the candidate has provided false information at the time of application or at any point thereafter.

12.2 A recommendation to terminate studies shall be made by the Faculty Higher Degrees Committee, School or Institute to the DCAA.

12.3 Termination of supervision

12.3.1 Supervisor(s) may voluntarily terminate or have their supervision contract terminated. A Supervisor may voluntarily express desire to terminate supervision contract with the University in writing.

12.3.2 The Supervisor's contract may be terminated should there be gross evidence of lack of supervision or violations of any standing University rules and regulations or as a result of failure to undertake the expected responsibilities of a supervisor.

13. Thesis Submission for Examination

13.1 Only a supervised thesis shall be eligible for examination. Candidates shall be examined by a board of examiners appointed by Senate.

13.2 MPhil candidates must have published at least one and PhD/DPhil at least two publications in reputable refereed journals emanating from their masters or doctoral research.

13.3 The candidate shall present their work during a scheduled seminar series, have the thesis language-edited (proof of which must be an authentic editorial certificate or letter); thesis be subjected to an anti-plagiarism check with similarity index (SI) of less than 15% before the thesis is submitted for examination.

14. Examinations

14.1 There shall be examinations of the thesis produced at the end of the candidate's period of study.

14.2 The Faculty Higher Degrees Committee, on recommendation of the departmental board; School or Institute shall recommend names of at least six (6) distinguished scholars, two of whom must be from Midlands State University, two from outside Midlands State University but in Zimbabwe, and two from an international institution.

14.3 Three examiners from the recommended six (6) as in **Section 15.2**, one from Midlands State University, and two from outside the University shall be appointed to examine the submitted final thesis, and produce examiners' reports within 30-days from the date of appointment.

14.4 Upon receipt of the three examiners' reports, an Internal Examination Committee chaired by the Executive Director (or designate) Research and Innovation Division shall make a determination on whether or not the candidate proceeds for an oral examination/*viva voce*.

14.5 If the thesis submitted for a degree is judged to be inadequate, the Internal Examination Committee may recommend to the Academic Board that the candidate be permitted to re-submit for examination in a revised form within a stipulated period.

14.5.1 If granted by the Academic Board, the candidate shall register for the stipulated period.

14.5.2 The candidate shall be deemed to have failed the degree if they do not re-submit the revised thesis within the stipulated period, and **NO** candidate shall re-submit thesis for examination more than once. A candidate shall proceed to appear for oral examination or *viva voce* if at least two of the examiners passes the thesis in accordance to the set guidelines:

14.5.2.1 The candidate shall be given one (1) month notice in writing of the pending examination.

14.5.2.2 The oral examination committee shall comprise of the Executive Director Research and Innovation Division (Chairing) or designate, Postgraduate Studies Manager, at least two (2) examiners; at least one (1) supervisor; the Executive Dean of the Faculty or Executive Director of the Institute; the

Chairperson of the Department or Coordinator; one (1) Senior Academic member from the Department; one (1) Senior Academic member nominated by the Executive Dean of the Faculty or Executive Director of the School or Institute, the Deputy Registrar (Academic Affairs) and Research and Innovation Division technical and support staff nominated by the Executive Director.

14.6 Examination Verdict

14.7 The final decision shall be endorsed by the Academic Board on the recommendation of the Examination Committee based on the thesis and oral examination (*viva voce*).

14.8 Four categories shall be used as follows;

14.8.1 The final examination decision to be recommended to the Academic Board for MPhil and PhD/DPhil candidates shall fall within one of the following categories:

14.8.1.1 Pass.

14.8.1.2 Pass subject to minor corrections to the satisfaction of the candidates' supervisor(s) and the department.

14.8.1.3 Pass subject to major corrections to the satisfaction of the candidates' supervisor(s), department, faculty, school or institute.

14.8.1.4 Fail.

14.9 In the event of a candidate failing, the candidate may submit a duly motivated appeal in writing to the Executive Director Research and Innovation Division within fourteen working days from the date of notification.

14.9.1 If the appeal is granted, an independent examiner shall be appointed who shall act as an arbiter. The verdict of the arbiter shall be final and binding.

15. Deferment of Oral Examination

15.1.1 The oral examination may be deferred and candidate shall be allowed to take them at the next offering on the grounds of ill-health subject to a Medical Certificate issued by a properly constituted Medical Board. If on the grounds other than ill-health, the Executive Director Research and Innovation Division shall invite the applicant for an interview, thereafter and the University appropriately.

15.1.2 It shall be the candidate's responsibility to satisfy the University beyond reasonable doubt on why they wish to defer the oral examination (*viva voce*).

16. Publication of results and thesis archiving

16.1.1 Thesis Examination Results shall be published by the Registrar upon satisfactory fulfilment of all the stipulated requirements for the degree.

16.1.2 A result pass list indicating the candidate's performance in the examination shall be made available to the candidate.

16.1.3 After the final thesis has been approved, print copies shall be bound in standard form Art Vellum or cloth; overcast; edges uncut; lettered boldly up back in gold (0.5-1.25 cm) degree; date and name; before the award of the degree is published by the Registrar.

16.1.4 Two bound copies plus a soft copy in PDF must be presented to the University with the approval of the Departmental Chairperson.

16.1.5 Print and soft copies of the thesis that have been accepted for the award of the degree shall be distributed for archiving by the University.

17. Award of Degree

17.1 An MPhil or PhD/DPhil degree appropriately designated shall be awarded to a candidate who was properly admitted to the University, has followed the approved programme of study over the stipulated period, and has fulfilled both the University, Faculty and Department, School or Institute requirements.

17.2 The result of an examination held for the award of an MPhil or PhD/DPhil degree shall be presented to Senate for confirmation. Thereafter, the degree shall be conferred under the seal of the University upon each successful candidate.

18. Cancellation of Award

18.1.1 Notwithstanding confirmation of an award of a degree, Senate may at any time cancel an award, even with retrospective effect, if it becomes known that:

18.1.1.1 a candidate had entered the University with false qualifications, or

18.1.1.2 a candidate had impersonated someone else, or

18.1.1.3 a candidate had been guilty of an examination malpractice, or

18.1.1.4 that there are other reasons that would have led to the withholding of confirmation of the award in the first place.

18.1.1.5 In any such event, the decision of Senate shall be published on the University Notice Board and the candidate notified.

18.2 At the end of a candidate's programme, the University shall issue to the particular candidate a complete transcript of their academic record.

19. DOCTOR OF PHILOSOPHY DEGREE (*HONORIS CAUSA*)

19.1 Honorary degrees may be conferred upon those who have achieved distinction through outstanding intellectual or creative achievements, or through outstanding leadership in education, business, public service, or any other discipline.

19.2 Recommendations for such awards shall be initiated by a faculty, through the Departmental and Faculty Boards

19.3 The Honorary Degrees and Distinctions Committee shall meet to consider the submission from the Faculty and make recommendations to Senate and Council.

FACULTY OF ARTS AND HUMANITIES

FACULTY REGULATIONS OF UNDERGRADUATE PROGRAMMES IN THE FACULTY OF ARTS AND HUMANITIES

1. INTRODUCTION

1.1. These regulations shall be read in conjunction with the University's General Academic Regulations for Undergraduate and Postgraduate degree programmes, hereinafter referred to as the General Academic Regulations.

1.2. These regulations are in respect of programmes for the following Bachelor of Arts Honours degrees offered by the Faculty of Arts and Humanities:

Bachelor of Arts Honours Degree in Applied Linguistics (BAAHL)
Bachelor of Arts Honours Degree in Archaeology, Cultural Heritage and Museum Studies (AH14)
Bachelor of Arts Honours Degree in Archival and Historical Information Management (AH03)
Bachelor of Arts Honours Degree in Development Planning and Management (AH01)
Bachelor of Arts Honours Degree in Development Practice (AH02)
Bachelor of Arts Honours Degree in English and Communication (AH04)
Bachelor of Arts Honours Degree in Film and Theatre Arts Studies (AH33)
Bachelor of Arts Honours Degree in History and Heritage Studies (AH05)
Bachelor of Arts Honours Degree in History and International Studies (AH06)
Bachelor of Arts Honours Degree in Language and Cultural Studies (AH07)
Bachelor of Arts Honours Degree in Media, Animation and Artificial Intelligence (MAAI)
Bachelor of Arts Honours Degree in Multi-Media, Graphic Designing and Editing (AH28)
Bachelor of Arts Honours Degree in Radio, Television and Multimedia Production (AH09)
Bachelor of Arts Honours Degree in Religious and Family Studies (AH10)
Bachelor of Arts Honours Degree in Religious Studies (HRS)
Bachelor of Arts Honours Degree in Religious Studies and Human Development (AH11)
Bachelor of Arts Honours Degree in Translation and Intercultural Communication (AH13)
Bachelor of Arts Special Honours Degree in Monitoring and Evaluation (AH32)

The appropriate degree will be awarded to a student who has completed an approved programme of study.

1.3. The Centre for Communication Skills offers the Basic Communication Skills (CS131) module which is compulsory at all level 1 students across all faculties. To this end, the twelve (12) credit module CS131 is listed along with all level 1 semester 1 programme structures in all departments.

1.4. The Centre for Communication Skills also offers the Extended Communication Skills (CS 132) module which is compulsory for all Level 1 students in the Faculty of Arts and Humanities as such the twelve (12) credit module is listed along with all level 1 semester 2 programme structures in all departments in the Faculty of Arts and Humanities.

2 DEFINITION OF TERMS

Refer to section 1.8 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3 ENTRY REQUIREMENT

3.1 Normal Entry

3.1.1 To qualify for admission to an undergraduate degree programme in the Faculty of Arts and Humanities a student must satisfy the general entry requirements as specified in the General Academic Regulations and the specific Department Regulations.

3.1.2 Eligibility for admission will be established by satisfying the said regulations and the requirements of respective departments, but eligibility will not guarantee admission.

3.1.3 A high-level pass in the specified subjects is necessary, and students with prior experience plus **relevant passes normally have an advantage in admission.**

3.2 Special Entry

3.2.2 Special Entry will normally be considered for a student with strict adherence to the requirements of the General Regulations. The respective Faculty Departments will normally have the prerogative to consider and examine the academic capabilities of the students who apply for admission under special entry provisions.

3.3 Mature Entry

Refer to section 3.3 of the General Academic Regulations for Undergraduate Degrees.

3.4 Visiting School Undergraduate Degree Programmes

In order to qualify for entry to the visiting school programmes offered by the Faculty of Arts and Humanities, a candidate must in addition to satisfying the minimum entry requirements described under the General Regulations and Faculty Regulations have completed 'A' Levels, relevant diploma(s) or their equivalent(s) as may be prescribed by the Departmental Regulations for such Visiting School Degree Programmes.

4 GENERAL PROVISIONS

4.1 A student may include in his/her programme, modules offered by the Faculties up to a total of ten (10) modules.

4.2 A student's selection of modules of a degree programme is subject to the approval of the Executive Dean and the Chairperson of all the relevant departments and to the following conditions:

- 4.2.1 The student shall register for at least ten (10) per level at any time during the academic year,
- 4.2.2 The module combination is feasible in terms of the timetable,
- 4.2.3 A student may change his/her registration for modules to be taken in the first two weeks of the semester, and
- 4.2.4 A student may apply for exemptions during the first four (4) weeks of the semester.

4.3 The Departmental Board responsible for a programme may designate, in the special Departmental Regulations for the programme certain modules as core modules for that programme. Core modules are the modules which are considered to be essential for qualification in a particular programme. A Department shall not designate more than six (6) modules as core modules per level.

4.4 The dissertation shall constitute twenty-four (24) credits. Each candidate is required to submit a dissertation of at least forty-five (45) pages. Font 12 with double spacing on a topic related to his/her area of study and approved by the dissertation supervisor.

4.4.1. Candidates shall be required to submit three (3) typed and bound copies of the dissertation, one for assessment purposes, the other shall be deposited in the Department Library and the last copy for the University Library. The copies of the dissertation should be submitted at a due date to be determined by the Departmental Board of which students shall be notified.

4.4.2. After a dissertation has been submitted and marked a student may be required to defend it before the departmental Board of Examiners.

4.4.3. The highest mark that may be awarded to a dissertation submitted after the due date shall be fifty per cent (50%)

4.5 A dissertation that attains a failure mark within the supplemental range may be resubmitted within three (3) months after the publication of results.

5 ASSESSMENT

5.1 The overall assessment shall normally be based on continuous assessment and final examination. Continuous assessment requirements may vary from programme to programme.

5.2 Continuous assessment accounts for twenty-five per cent (25%) and not more than fifty per cent (50%) of the overall assessment.

5.3 Departments shall determine which items shall be included in the continuous assessment and shall define the relevant weight of each item.

5.4 To be admitted for an examination a candidate must:

5.4.1 Be a registered student of the University in accordance with the General Regulations,

5.4.2 Have satisfactorily attended and completed the approved modules of study,

5.4.3 Have written assignments and tests that constitute continuous assessment,

5.4.4 Have attended and participated in seminars, tutorials practical classes, work placements and other activities as stated in the Departmental Regulations, and

5.4.5 Have satisfactorily covered modules of which at least sixty per cent (60%) of them must be offered in the respective honours degree programmes they are registered.

6 PROVISIONS FOR PROGRESSION

6.1 Students shall progress automatically from semester 1 to semester 2 at each level with the exception of special cases that would have been approved by the senate that is cases of students applying for deferment of studies.

6.2 The Faculty Board of Examiners shall meet at the end of the first semester of the level to ratify the marks obtained by candidates and considered by the Departmental Boards. In the case of repeat-level students, the faculty may, however, make recommendations to withdraw or discontinue the student at this stage.

6.3 The faculty Board shall meet at the end of the second semester of a level to ratify the marks obtained by the candidates and make recommendations to the Senate on issues of progression by students to the next level.

6.4 For a student to proceed from one level to the other he/she must have passed at least eight (8) modules.

7 FAILURE TO SATISFY THE EXAMINERS

Refer to section 11 of the General Academic Regulations for Undergraduate Degrees.

8 WORK-RELATED LEARNING GENERAL GUIDELINES

Refer to section 12 of the General Academic Regulations for Undergraduate Degrees.

9 GRADING AND DEGREE CLASSIFICATION

9.1 To be awarded an Honours Degree, a student must pass all core modules at all levels and must have accrued four hundred and eighty (480) credits.

9.2 The classification of all modules and degree programmes shall be as stated in Section 5 of the General Academic Regulations.

10 REMARKING OF EXAMINATIONS

Refer to section 13 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11 DEGREE WEIGHTING

For the purpose of Degree classification, the weighting of the results for the different levels shall be:

11.1 For the Undergraduate Conventional Programme:

Level 1 (10%)

Level 2 (20%)

Level 3 (30%)

Level 4 (40%)

11.2 For the Undergraduate Visiting School Programme, Weekend School Programme and Block- Release programme:

Level 1 (10%)

Level 2 (50%)

Level 3 (40%)

FACULTY REGULATIONS FOR POSTGRADUATE DIPLOMAS AND TAUGHT MASTERS DEGREE PROGRAMMES IN THE FACULTY OF ARTS AND HUMANITIES

1. INTRODUCTION

1.1. These regulations shall be read in conjunction with the University's General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees programmes, hereinafter referred to as the General Academic Regulations.

1.2. Postgraduate Diploma in Strategic Communication Studies (PGDSC)

1.3. The Faculty of Arts and Humanities also offers the following Masters programmes:
Master of Arts Degree in African and Diasporan Literature (AH21)
Master of Arts Degree in African History (MAAH)
Master of Arts Degree in African Languages and Culture (MAAFL)
Master of Arts Degree in Applied Linguistics Degree (MAAL)
Master of Arts Degree in Archaeology (MARC)
Master of Arts Degree in Church Leadership, Ethics, and Practical Ethics (AH27)
Master of Arts Degree in Cultural Heritage Studies (MCHS)
Master of Arts Degree in Development Practice (AH17)
Master of Arts Degree in Ethics and Human Development (AH26)
Master of Arts Degree in Film, TV and Digital Technologies (AH24)
Master of Arts Degree in Forensic Archaeology (MAFA)
Master of Arts Degree in Global History (AH19)
Master of Arts Degree in Monitoring and Evaluation (AH18)
Master of Arts Degree in Museum Studies (MMUS)
Master of Arts Degree in Religious Studies (MARS)
Master of Arts Degree in Strategic Communication Studies (AH35)

2. DEFINITION OF TERMS

Refer to Section 1.9 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

3. ENTRY REQUIREMENT

Refer to Section 5 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

4. GENERAL PROVISIONS

4.1. A student may include in his/her programme, modules offered by the faculties up to a total of ten (10) modules.

4.2. A student's selection of modules of a degree programme is subject to the approval of the Executive Dean and the Chairperson of all the relevant departments and to the following conditions:

4.2.1. The module combination is feasible in terms of the timetable,

4.2.2. A student may change his/her registration for modules to be taken in the first two weeks of the semester, and

4.2.3. The Departmental Board responsible for a programme may designate, in the special Departmental Regulations for the programme certain modules as core modules for that programme. Core modules are the modules which are considered to be essential for qualification in a particular programme. A Department shall not designate more than six (6) modules as core modules per level.

4.4. The dissertation shall constitute Ninety (90) credits for taught masters. Each candidate is required to submit a dissertation of at least forty five (45) pages. Font 12 with double spacing on a topic related to his/her area of study and approved by the dissertation supervisor.

4.4.1. Candidates shall be required to submit three (3) typed and bound copies of the dissertation, one for assessment purposes, the other shall be deposited in the Department Library and the last copy for the University Library. The copies of the dissertation should be submitted at a due date to be determined by the Departmental Board of which students shall be notified.

4.4.2. After a dissertation has been submitted and marked a student may be required to defend it before the departmental Board of Examiners.

4.4.3. The highest mark that may be awarded to a dissertation submitted after the due date shall be fifty per t (50%)

4.5. A dissertation that attains a failure mark within the supplemental range may be resubmitted within three (3) months after the publication of results.

5. ASSESSMENT

5.1. Overall assessment shall normally be based on continuous assessment and final examination. Continuous assessment requirements may vary from programme to programme.
5.2. Continuous assessment accounts for twenty five percent (25%) and not more than fifty percent (50%) of the overall assessment.
5.3. Departments shall determine which items shall be included in the continuous assessment and shall define the relevant weight of each item.
5.4. To be admitted for an examination a candidate must:
5.4.1. Be a registered student of the University in accordance with the **General Academic Regulations,**
5.4.2. Have satisfactorily attended and completed the approved modules of study,
5.4.3. Have written assignments and tests that constitute continuous assessment,
5.4.4. Have attended and participated in seminars, tutorials practical classes, work placements and other activities as stated in the Departmental Regulations, and
5.4.5. Have satisfactorily covered modules of which at least sixty per cent (60%) of them must be offered in the respective Postgraduate Diplomas and Taught Masters Degrees they are registered.

6. PROVISIONS FOR PROGRESSION

6.1. Refer to Section 15 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters degrees.

7. FAILURE TO SATISFY THE EXAMINERS

Refer to the General Academic Regulations.

8. GRADING AND DEGREE CLASSIFICATION

8.1. The classification of all modules and degree programmes shall be as stated in Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters degrees.

9. REMARKING OF EXAMINATIONS

Refer to Section 21 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters degrees.

10. DEGREE WEIGHTING

For the purposes of degree classification, the parts of the degree programme will be classified as follows:
10.1 For the Postgraduate Diploma programmes:
Level 1 (100%)
10.2 For the taught masters degree programmes:
Level 1 (50%)
Level 2 (50%)

DEPARTMENT OF ARCHAEOLOGY, CULTURAL HERITAGE AND MUSEUM STUDIES

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN ARCHAEOLOGY, CULTURAL HERITAGE AND MUSEUM STUDIES (AH14)

DURATION:	4 years
MAXIMUM CREDIT LOAD:	540
MINIMUM CREDIT LOAD:	480
MAXIMUM MBKS LOAD:	384
ZNQF LEVEL:	8

1.0 ENTRY REQUIREMENTS

1.1 NORMAL ENTRY

A Candidate must have obtained at least 5 'O' levels including English Language and Two 'A' level passes especially in History/Heritage Studies and any subjects in the Humanities.

1.2 SPECIAL ENTRY

Refer to Section 3.2 of the General Academic Regulations for the Undergraduate Degrees of the Midlands State University

1.3 MATURE ENTRY

Refer to Section 3.3 of the General Academic Regulations for the Undergraduate Degrees of the Midlands State University

1.4 VISITING SCHOOL

This is a 3-year degree programme aimed at individuals already employed. In addition to satisfying the general entry requirements, they should atleast have a Diploma in the relevant field.

2.0 LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Ability to demonstrate knowledge and understanding of Heritage and Archaeology Issues,
- Ability to apply practices and technologies in heritage management

3.0 ASSESSMENT

3.1 Continuous assessment shall normally constitute 25% of the final examination mark while examinations constitute 75%.

3.2 Dissertations shall consist of between 9000 - 10000 words.

14.0 MODULE SYNOPSES

CHS 131 Introduction to Cultural Heritage Management
This module introduces students to the concept of culture and cultural heritage management in Zimbabwe, Southern Africa and selected parts of the globe. It examines the trend of development of the idea of heritage management and the discipline in Southern Africa. Forms, values, stakeholders and their subsequent relations are examined. The module also examines systems of heritage management used in Zimbabwe and selected examples outside the country, as well as legal issues of heritage management.

ARC 136 Introduction to Archaeology
This module presents an introduction to the history, methods, goals, and theoretical concepts of archaeology. The module explores how archaeologists employ these material remains to construct interpretations about past societies. Discussions focus on the formation of the archaeological record; the history of archaeology; developing a research design; field methods for recovering archaeological data; chronology; and generating interpretations about the past.

MUS 136 Introduction to Museology and Museography
The module examines how museums and museum theories have evolved, their role in contemporary societies and how they operate within the context of heritage management. It also explores the philosophy of museums in the service of the general public. This module also introduces you to the theoretical, contextual, ethical and practical issues involved in curating, engaging, interpreting, developing and managing museum resources.

MUS 137 Introduction to Information Management
The module provides students with a solid foundation in information management studies. The module provides an understanding of the importance of information to society. It focuses on the theory, methodology and practice of managing information as a strategic resource for organisations or individuals. It introduces the principles that govern the management of information. It presents cornerstone terminology, concepts and practices used in information management.

ARC 107 World Prehistory

The module focuses on the development of humanity from the earliest evidence of human evolution through to the development of human culture. It also examines the development of human societies, from the Stone Age up to the Late Iron Age. It will focus on human technological achievements from the last 3 million years into the historical period. World Prehistory offers the platform for a scholarly deconstruction of the notion which has presented pre-modern humans as undeveloped societies.

ARC 143 Prehistory of Southern Africa
This module compares and contrasts the archaeological traditions in Southern Africa, with a particular focus on Zimbabwe. The course traces the development of human societies, from foragers of the Early to Middle Pleistocene, through gatherers and hunters of the Middle, Late and Terminal Pleistocene, and the Holocene within Southern Africa. A review is made of the evidence from Southern Africa that suggests that Southern Africa is the Cradle of Humankind responsible for the development and/or advent of modern human beings and modern human behaviour. The module also assesses the level of archaeological development in each of these countries in terms of research done, the archaeological infrastructure, public education with regard to the past, and the use of the past in shaping the present and future.

MUS 143 Museum Communication and Visitor Studies
Museum communication explores the relationship between museums and their audiences. It examines the general principles of effective communication with museum visitors from culturally, socially and linguistically diverse communities. The module introduces students to various media and interpretive techniques and recognises their usefulness in effective communication with museum visitors. The module recognises the importance of visitor studies and evaluation in the development of exhibitions and other museum communication services.

CHS 144 Documentation of Cultural Property
The students are equipped with the knowledge of the role played by documentation in the management and conservation of the cultural property. Students are introduced to the theoretical concepts of documentation and practical techniques of assessing the condition of a heritage place. This module provides the students to understand the basic principles of documenting rock art sites, dry stone walled structures, dagga structures, historic buildings and archaeological collections.

MUS 145 Museum Collections Management
The module focuses on aspects that promote the upkeep of collections for posterity. These include collections management policies, storage facilities, packaging, climate control, handling and documentation of collections. This module provides knowledge and skills in the preservation, conservation and treatment of artefacts held by heritage institutions. Students are given an understanding of the agents of deterioration and how micro-environments can be managed.

ARC 231 Archaeological Theory
Archaeology is a diverse discipline that embraces a wide variety of theoretical and methodological perspectives. This module focuses on the major theoretical positions and debates that have influenced the growth of archaeology as a discipline. This module examines theoretical approaches to understanding the human past. This module explores the major trends in archaeological theory and considers how each of these assists in the interpretation of the past.

ARC 232 Surveying in Archaeology
This module examines current approaches adopted by field archaeologists carrying out detailed site and landscape surveys in Archaeology. Traditional survey methods are considered alongside emerging digital technologies. The module focuses on traditional and electronic survey methods, archaeological drafting, geophysical prospection, digital cartography, aerial and terrestrial photography, satellite remote sensing, and relevant software systems including GIS (Geographical Information Systems) and CAD (Computer-Aided Drafting/Drawing).

CHS 231 Conservation of Cultural Property
This module introduces students to the concepts of conservation of cultural property. It also provides an introduction to the principles, theory and ethics of archaeological conservation. Students are to have a good understanding of conservation issues before going on to research in archaeology and cultural heritage. The module is set within the broad heritage context and it seeks to explore issues and practicalities relating to the care and conservation of a wide variety of cultural heritage.

MUS 231 Curatorship
The module empowers students with skills to design acquisition /collections policy, conduct curatorial research, documentation of collections, conservation of museum collections, exhibition design, tour guiding, use of new technologies, exhibition marketing, museum outreach programmes and project management. It also presents the aspect of museum publication as a follow-up to curatorial or laboratory research.

MUS 232 Gender Studies
This module provides students with an understanding of gender identity and gender representation. The module provides gender studies as an interdisciplinary field that focuses on the complex interaction of gender with other identity markers such as race, ethnicity, sexuality, nation, and religion. Gender-femininity and masculinity is are such a basic form of social organisation that their operation often passes unnoticed.

ARC 241 Archaeological Field and Laboratory Methods
The module focuses on how archaeologists find sites, gather data and proceed to make sense of archaeological traces. It also provides a detailed introduction to fieldwork methods and laboratory analysis, covering site prospection techniques (e.g. aerial photography and geophysical survey), the basics of environmental and bio-archaeology, scientific dating techniques and excavation.

CHS 241 Research Methods and Project Formulation
The module aims to provide an introduction to social research methodology, including qualitative and quantitative research methods, historical studies, and cultural studies, looking at their application in a variety of contexts related to archaeology, museums, and cultural heritage studies. It also introduces students to problem formulation and proposal writing in preparation for Honours dissertations.

CHS 242 Heritage Legislation and Protection
The module provides students with an in -depth understanding of the value of heritage legislation and policies in the protection of both the tangible and intangible cultural and natural heritage. It also evaluates the applicability of these models in the context of heritage management. The module also introduces students to the different international and regional bodies that facilitate the protection of heritage. The module also provides knowledge about the politics of heritage management.

CHS 245 Marketing Heritage Resources

The module deals with the marketing of cultural and natural heritage which among other things includes museums, galleries and heritage landscapes. It focuses on aspects like market analysis, market research, market planning, marketing mix and marketing communications. The main aim of the module is to place cultural and natural heritage institutions at a competitive advantage against competing players in the leisure and tourism industry.

MUS 241 Preservation and Conservation of Archives
The module enlightens students on the constraints faced in the conservation and preservation of archives which among other things include environmental, handling and storage issues. It also focuses on measures taken to safeguard the archives. These include disaster planning, conservation planning and the provision of security to archival collections.

MUS 242 Fine Arts
This module exposes students to the visual arts heritage in Zimbabwe and from other contexts. Students are imparted with skills in art production processes, aesthetics and an understanding of the complex Art World/Republic responsible for defining taste. The module also introduces students to African and European/Occidental art traditions and the interrelationship between art and society.

ARC 431 Information Technology in Archaeology
This module pays attention to information technology within the discipline of archaeology. As archaeological theory evolves to embrace technology and strategies of interpreting material culture, there is an urgent need to also impart students with an appreciation of information technology as it applies and can be applied to archaeology. The appreciation of information technology is not confined to data analysis, but will also consider, all phases of archaeological research to include desktop research, data collection, data storage, and dissemination of information. This module thereby equips students with an appreciation of the potentials and challenges of the application of information technology within the archaeology of Africa and Southern Africa in particular.

ARC 432 Public Archaeology
This module's focus is on communicating archaeology to the public through multimedia, the press, as well as other vehicles of communication, to bridge the gap between professional knowledge, researchers, and public perception of the discipline. It is also designed to demystify the traditional perceptions of the discipline long regarded as the 'digging of ancient burials'.

CHS 432 Illicit Trafficking and Repatriation of Cultural Heritage
The module focuses on issues of collections security, illicit trafficking, repatriation and restitution. It highlights the theft of cultural heritage as a serious global problem with deep historical roots involving developed countries. It addresses aspects of networks and routes for stolen cultural material. The module also addresses solutions for countering illicit trafficking which include legal instruments, practical tools and collaborative efforts involving countries, international bodies and institutions involved in the protection and upkeep of collections.

CHS 433 Heritage Management and Sustainable Development
This module examines the origins, issues, policies, and processes of sustainable development in heritage management. It will examine development models and how these affect the management of heritage. The module will also examine the role of contract archaeology in heritage management. The module covers the theoretical aspects of cultural heritage, its management and protection, including international policy and law.

MUS 431 Electronic Data Records Management Systems

The module is aimed at equipping learners with the skills for developing an Information Governance Model that supports the management of electronic records. Focal areas include conducting electronic records surveys, managing electronic records, developing classification schemes, developing access policies in an electronic environment and disposing of electronic records, appraising and disposing of electronic records.

CHS 441 Heritage Presentation and Interpretation
This module examines regional and global trends in the area of heritage presentation and interpretation ranging from the re-organisation of museum exhibitions and displays to the use of heritage in matters relating to the reinterpretation of the past, often misrepresented during colonial times or domination by one group over the other.

ARC 441 Rock Art Studies
Rock Art remains an actively debated context of archaeological material. Not only does it bridge the gap between human evolution and the Iron Age, but this form of material culture has remained highly debated mostly with respect to its execution, dating and interpretation. Rock Art Studies is therefore a module that explores the breadth, depth and future of rock art research within the African context. Relevant examples and case studies will be used to debate the rock art of Southern Africa and to position this discourse within a global perspective.

MUS 441 Museums and Global Issues
The aim of the module focuses on some issues in which a new museological practice is emerging: new museology, contemporary collecting, politics of participation and access, learning, performance measurement and integration. The module also aims to empower students with an understanding of the climate under which museums are operating, sustainability issues, the politics of dealing with special collections and de-accessioning, the use of new technologies in communicating, and the virtual museum.

ARC 450 Dissertation
The module equips learners with the skills of carrying out the actual research and writing a research project. The students are given an opportunity to research a topic of their choice. With the guidance from a member of the academic staff as supervisor, the learners plan and design an independent research project which relates to their overall programme of study. Candidates are expected to write a dissertation of between 9 000-10 000 words (excluding references) in Times New Roman font size 12 in double spacing.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN ARCHAEOLOGY (MARC)

Duration:	2 years
Minimum Credits:	360
Maximum Credits:	420
MBKS credit load:	288
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

This programme seeks to promote high conceptual and inquisitive skills in archaeological issues as well as develop student's competence within specialist archaeological areas. The degree also seeks to generate interest in research in archaeology, widening the students' knowledge base, competencies, skills and capabilities in the field of Archaeology. To prepare students to adapt to any environment by promoting high conceptual and inquisitive, entrepreneurial skills in the field of archaeology.

2. ENTRY REQUIREMENTS

To be eligible for the programme, an applicant must have a good first degree in any of the following:

a) Archaeology, Cultural Heritage and Museum Studies.
b) History and Culture.
c) Anthropology, Ethnography, African Languages and Culture.
d) Visual or Fine Arts, Art History, Art Curatorship, Art History or an approved equivalent from any recognised university.

3. PROGRAMME CHARACTERISTICS

Areas of Study: African Archaeology, Interpreting Ceramics, Research Methods and Publications, Rock Art of Africa, Bioarchaeology, Geographical Information Systems in Archaeology, Spatial and Temporal Analysis in Archaeology, Archaeometallurgy: Mining and Extractive processing. Managing Archaeological Sites and Landscapes, Conservation and Sustainable Development

Specialist Focus: Research in archaeology, contract archaeology, spatial analysis in archaeology, conservation of archaeological material, management of archaeological sites

Orientation: Research and innovation oriented. Teaching and learning are practically oriented

Distinctive Features: The programme employs a student-centred approach and offers them an opportunity to participate in national development archaeology programmes, and also imparts knowledge on sustainable development issues.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Master of Arts in Archaeology degree programme is designed to enhance the competencies of graduates in the fields of human culture research, museum curation, cultural organisation management, environmental management, heritage consultancy, parks and wildlife management and university lectureship.

Further Studies: Doctoral studies in Archaeology or in inter/multidisciplinary programmes related to the discipline of archaeology

5. PROGRAMME DELIVERY

TEACHING AND LEARNING METHODS: Lectures, tutorials, laboratory classes, seminars, group work, site visits, field school, excavations, research projects, individual independent study

ASSESSMENT METHODS: Written and oral examinations, tests, field school reports, seminar presentations, and final year research project reports.

6. PROGRAMME COMPETENCES

Generic:

- Multidisciplinarity: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena

- Qualitative and innovative reasoning: Capability to do action research, assess and analyse qualitative data and employ innovative solutions in the interpretation of archaeological material
- Communication skills: Ability to communicate effectively and to present archaeological information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using logical arguments and proven facts.
- Ethical commitment: Professional integrity and awareness of the role of archaeology in humanity's development
- Entrepreneurial skills: Capability to identify and create new business ventures in the archaeology and heritage sector based on knowledge and new thinking paradigms

Discipline specific:

- Deep knowledge: Ability to recover, conserve, manage and interpret archaeological material allowing for the establishment of diverse archaeological interpretations
- Production skills: Ability to come up with archaeological theories as well as ensure their implementation in the diverse forms of archaeological material
- Technology development skills: Ability to adapt and use GIS systems and information technology in archaeological research.
- Problem-solving skills: Ability to solve a wide range of archaeological issues relating to the recovery, analysis, management and interpretation of archaeological material.

INTENDED LEARNING OUTCOMES

- Ability to demonstrate knowledge and understanding of archaeological theories and their application in archaeological research.
- Ability to research, assess and analyse qualitative data and employ innovative solutions in the interpretation of archaeological material
- Ability to Ability to solve a wide range of archaeological issues relating to the recovery, analysis, management and interpretation of archaeological material.
- Ability to adapt and use GIS systems and information technology in archaeological research.
- Ability to recover, conserve, manage and interpret archaeological material allowing for the establishment of diverse archaeological interpretations
- Ability to communicate effectively and to present archaeological information orally and in writing and using ICTs to both expert and non-expert audiences

7. PROGRAMME STRUCTURE

Code	Module Description	Credits
Level 1 Semester 1		
MARC 701	African Archaeology	18
MARC 702	Interpreting Ceramics	18
MARC 713	Theoretical Approaches in World Archaeology	18
Electives		
MARC704	Human Origins	18
MCHS 702	Approaches to the Conservation of Cultural Property	18
MMUS 701	Museums History, Purpose and Function	18
Level 1 Semester 2		
Electives		

MARC 719	Applied Archaeology	18
MARC 717	Bioarchaeology	18
MARC 709	Geographical Information Systems in Archaeology I	18
MCHS 701	Managing Archaeological Sites and Landscapes	18

Level 2 Semester 1

MARC 706	Spatial and Temporal Analysis in Archaeology	18
MARC 715	Field Archaeology-Field School	18
MARC 716	The Archaeology of Farming Communities	18

Electives

MARC 718	Contract Archaeology	18
MARC 712	Archaeology and Ethnicity Geographical Information Systems in Archaeology II	18
MARC 714	Archaeometallurgy: Mining and Extractive Technology	18
MARC 710	Geographical Information Systems in Archaeology	18

Other electives may be selected from the module offerings of the Master of Arts in Cultural Heritage Studies or Master of Arts in Museum Studies.

Level 2 Semester 2

MARC820	Dissertation	90

8. MODULE SYNOPSES

MARC 701 Issues in African Archaeology
This module seeks to promote a theoretical understanding amongst students which will facilitate new and more appropriate approaches to the archaeology of the African continent. This will ensure that students are equipped with a broad-based theoretical outlook, enabling them to re-evaluate past approaches in African Archaeology, and improving their awareness of the related major themes. Aspects to be analysed include; the archaeology of hominid evolution in Africa; societies and urbanism; the timing and growth of agriculture and socio-economic interaction during the Holocene.

MARC 702 Interpreting Ceramics
This module will examine the development of pottery studies in archaeology, emphasising the various aspects involved in pottery studies, that is, pottery production, trade and consumption, and group identities. Students will analyse the technology of pottery making, from clay selection up to firing. The module will also examine the practice and purpose of diverse approaches involved in the processing, classification and interpretation of pottery.

MARC 703 Research Methods and Publications
The main aim of the module is to help students acquire technical and practical skills for research purposes. Students would examine how research methodology is applied to address issues that flow from theory and appreciate that there are common themes among the various methodological approaches that are utilised in Archaeology. Among the issues that will be addressed are the nature and scope of archaeological research, the nature of research questions and the design of research programmes to address those questions.

MARC 704 Human Origins
The module seeks to examine the origins of modern humans in Africa as well as the cognitive implications of the new genus of Homo on cultural characteristics. The first dispersal of Homo outside of Eastern Africa will be modelled, that is, the colonisation of the rest of the continent and the so-called out of Africa hypothesis. The module also seeks to establish the behavioural characteristics of humans in Africa giving a full description of the sedimentary and litho-stratigraphic record of the Rift Valley and Southern Africa where evidence of modernity has been documented.

MARC 706 Spatial and Temporal Analysis in Archaeology
This module provides a working knowledge of the theory and methods used to comprehend spatial and temporal patterns in archaeology. The module provides a forum where students explore what 'space' and time mean in Archaeology and how it is perceived and interpreted by archaeologists. It focuses on techniques and research agendas such as the psychology of spatial representation, space syntax, landscape phenomenology, catchment analysis, and the multiple scales of time.

MARC 707 Archaeology of Late Pleistocene and Holocene Hunter-Gatherers
This module examines key issues in human origins and development from the emergence of Upper Pleistocene until the beginnings of food production in the Terminal Pleistocene and early Holocene. The module reviews contemporary debates on issues such as the emergence of biological and behavioural modernity in Africa, the adaptations of hunter-gatherers of the last glacial in Europe, the analysis and interpretation of Upper Palaeolithic cave-art, the emergence of food-storing, semi-sedentary hunter-gatherer communities in Africa and the Near East.

MARC 709 Geographical Information Systems in Archaeology I
This module introduces the principles of archaeological GIS, the techniques used to acquire, manage and visualise spatial data, as well as the most frequently used analytical tools. Students should acquire the necessary skills required for a complete GIS work flow from data acquisition up to data analysis thus ensuring cartographic output (map production).

MARC 710 Geographical Information Systems in Archaeology II
This module builds on the module Geographical Information Systems in Archaeology I to provide students with a theoretical grounding and practical experience for GIS in archaeology. There is a strong emphasis on the manipulation of raster data and consideration of interpolation techniques, landscape geomorphometry, view-shed analysis, hydrology as well as 2.5 D, 3D and temporal modelling.

MARC 711 Rock Art of Africa
It provides an overview of the principal rock art traditions of the continent examining the San art of southern Africa, the 'schematic rock art zone' of central Africa, the eastern African art in Tanzania, the celebrated art of Tassili and the surrounding area of the Sahara Desert. The module uses the rock art of Africa to raise issues of debate that revolve around the recognition of style, sequence, composition, symbols and symbolism, the application and relevance of ethnography, the role of gender, the rock surface as a context, shamanism, neuropsychology, multivocality and agency.

MARC 712 Archaeology and Ethnicity
The module seeks to create awareness of the aspect of ethnic identities of the makers of the archaeological records from the past such as stone tools, crude earthenware vessels and stone-walled structures. Students should also be familiar with the major social theories relating to ethnicity and group identity using a range of archaeological and anthropological case-studies which explore the expression of ethnic identities in Zimbabwe and other African Countries.

MARC 713 Theoretical Approaches in World Archaeology
The module aims to review the recent history of archaeological ideas and to examine key general themes in current archaeology from a theoretical and comparative perspective. This module will provide a firm methodological foundation for archaeological interpretation, as well as a global perspective on the discipline. Set readings and case-studies will be used to evaluate the analytical processes developed by different schools of archaeological thought, and the range of approaches currently available in studying material culture, social complexity and differentiation, concepts of agency, and long-term cultural change.

MARC 714 Archaeometallurgy: Mining and Extractive Technology
The module gives students a fundamental understanding of the basic chemical and metallurgical processes relevant to the primary production of metal, including ore reduction, slag formation, alloying and refining. Students will acquire understanding of the fundamental physical principles of metallurgy. While copper/bronze and iron/steel take centre stage as the most important metals, less common metals and alloys such as gold and zinc will also be addressed with examples drawn from Zimbabwe and other African countries.

MARC 715 Field Archaeology (Field School)
Field archaeology is an integral part of an archaeologists' training and practice. The course is designed to equip students with basic fieldwork knowledge and skills in archaeological research. These include research design, planning, archaeological survey, excavation, sorting of finds and documentation of archaeological sites. Students will be taken through the rigorous processes and approaches that constitute archaeological fieldwork. Students will spend 2 weeks in supervised fieldwork at a chosen place.

MARC 716 The Archaeology of Farming Communities
The course focuses on the development of complex societies in Southern Africa. This entails a detailed examination of the models that explain the appearance of early farming communities in southern Africa and the changes that took place among them leading to the growth of socio-political complexity. Students will gain an appreciation of the factors behind the growth and decline of the major systems in southern Africa's past which have a direct bearing on modern historical developments in the region and beyond. Studies will be based on various case studies in Southern Africa such as Mapungubwe, Toutswe, Great Zimbabwe, Khami and Rozvi.

MARC 717 Bioarchaeology

The module provides students with a theoretical and practical grounding in the analysis of faunal, human and floral remains from archaeological sites. This is a hands-on module that equips students with the requisite skills in the identification and analysis of faunal, human and floral remains. The controversial and emotive issue that relates to the research on human remains will be explored with the use of specific case studies.

MARC 718 Contract Archaeology
The world over, archaeology has become an important component in development facilitation through archaeological impact assessments. This course offers students the requisite skills, principles and problems of Contract Archaeology within the context of Cultural Resource Management (CRM). A basic knowledge of CRM is assumed, especially the legal protection of the heritage.

MARC 719 Applied Archaeology
This module seeks to apply archaeological knowledge and skills to address modern- day issues like crime (forensic archaeology), climate change and reconstruction (environmental archaeology), identity and ethnicity, and heritage and sustainable development. The focus of the module will vary from year to year depending on topical issues and expertise available. The module advances the relevance of archaeology in today's society.

MARC 820 Dissertations
All students are expected to write a dissertation of about 120 pages which is the result of an individual research project undertaken during the course. This can be on any approved topic relevant to the degree and the taught components selected. Students are assigned a supervisor to guide the main stages of the work.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN FORENSIC ARCHAEOLOGY (MAFA)

Duration:	1 ½ years
Actual Credit Load	290
Minimum Credit Load	270
Maximum Credit Load	330
Total MBKs Credit Load	210
ZNQF	Level 9

1.0 PURPOSE OF PROGRAMME
This masters programme is designed with the goal of developing practical and adaptable graduates, skilled in the areas of location, recovery, recording and interpretation of human remains encountered in both archaeological and forensic (recent) contexts. Despite the focus being more on the satisfaction of investigations of archaeological cases, the programme develops highly skilled graduates with satisfactory theoretical, practical and vocational skills grounded to meet both archaeological and criminal investigations of human remains and contexts. Forensic Archaeology is the application of archaeological skills to the location and recovery of human remains and forensic evidence. The programme, therefore, goes beyond the basic transference of standard biological anthropology knowledge or conventional archaeological methods to the forensic arena. Rather, it seeks to deliver on a forensic archaeologist's obligation to master a sound understanding of the scientific, technical, ethical, legal and regulatory dimensions of archaeological and forensic investigations of human remains and contexts of recovery. Also critical are skills in effective communication with other professionals be it in the fields of forensic archaeology, police services, justice and criminal court systems and processes and with the general public at large. Overall, the programme will furnish graduates with a wide range of highly specialised skills designed to equip them for entry to professional practice and doctoral studies.

2.0 ENTRY REQUIREMENTS
2.1 Normal Entry
A good Honours Degree in Archaeology or Archaeological Sciences, Medicine, Physical Science, Forensic Science, Criminology, Biological Sciences and Biological Anthropology.

3.0 PROGRAMME CHARACTERISTICS
3.1 Areas of Study: Human and Animal Anatomy, Fundamentals of Criminology and Archaeological Forensics Analytical Chemistry for Archaeology, Forensic Law, Public and Contract Archaeology.

3.2 Specialist Focus: Research in Archaeological Forensics, contract archaeology, human and animal anatomy, criminology and pathology

3.3 Orientation: Research and innovation -oriented. Teaching and learning are practically oriented.

3.4 Distinctive Features: The programme employs a student-centred approach and it imparts knowledge of forensic issues

4. **CAREER OPPORTUNITIES AND FURTHER EDUCATION**

4.1 Employability:

Forensic Archaeologist, Forensic Anthropologist, Forensic Pathologist, Forensic Ballistician, Forensic Microscopist, Systems Security Analyser, Justice and Criminal Investigators, Crime Scene Technician, Military Engineering Services, Intelligence Operative among other things university lectureship.

4.2 FURTHER STUDIES:

Doctoral studies in Archaeology or inter/multidisciplinary programmes related to the discipline of archaeology and Forensics.

5.0 PROGRAMME DELIVERY

Lectures, tutorials, laboratory classes, seminars, group work, site visits, excavations, research project and individual independent study.

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

6.1 Acquire useful skills and experience in forensic investigations to work in consultancy or with existing government departments requiring expertise in human remains and mass burials from the liberation wars and pandemics.

6.2 Ability to distinguish human remains from those of other species and be able to document, interpret and present evidence of human remains.

6.3 Ability to carry out exhumations and conduct grave relocations associated with development projects.

6.4 Acquire skills in reconstructing accurately the contextual information surrounding human remains.

6.5 Acquire knowledge on the different methods of analysing archaeological material including isotopic approaches, microscopy, DNA analysis, phylogenetic studies and use of diagnostic imaging technology, among others, as well as know how these influence sampling and collection of human remains.

6.6 Ability to use advanced ICT skills for use in analysis and product development as part of innovation.

7.0 GENERAL PROVISIONS

7.1 The degree programme shall consist of 11 modules.

7.2 Each module is worth 20 credits except the dissertation worth 90 credits.

7.3 A student should register for all modules offered in each semester.

7.4 To be awarded this degree, a student must have passed all modules including the dissertation and must have attained at least 290 credits.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous assessment which includes field school reports, seminar presentations and written assignments shall normally constitute 30%. Continuous assessment shall comprise at least two assignments.

8.2 End of semester examinations shall constitute 70%. Candidates shall be required to sit for a three -hour examination for each module.

8.3 The dissertation shall constitute 100%.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts Regulations for Postgraduate Diplomas and Taught Masters Degrees.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty of Arts Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty of Arts Regulations for Postgraduate Diplomas and Taught Masters Degrees.

12.0 DEGREE WEIGHTING

Refer to Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

13. PROGRAMME STRUCTURE

14.0 MODULE SYNOPSES

MAFA 701 Archaeological Theory
This module provides a detailed understanding of developments in archaeological theory over the last four decades, and illustrates the impact of different theoretical approaches on our understanding of the past and present social, cultural and political contexts. It also aims to develop the students' ability to recognise and critically evaluate differing theoretical perspectives and communicate these to others

MAFA 702 Fundamentals of Archaeological Forensics
The module makes an introduction to Forensic Archaeology. It gives students an insight into the application of archaeological principles in contexts and circumstances where human remains and related materials are under investigation. Of importance is for students to master not just the steps but also the phases of Forensic Archaeological Field investigations. The phases are Systematic and comprehensive Search/Investigation, Determination of Forensic Significance, and lastly Recovery/Excavation. The techniques and processes of documentation are also emphasised and where possible, students are exposed to multiple technologies of documentation and how multiple sources of data enhance the interpretation of contexts under investigation.

MAFA 703 Human and Animal Anatomy
This module introduces students to the biological profile and biomechanics of both the human and animal skeletal systems. As an analysis-based module, emphasis is placed on students' development of knowledge to confidently recognise, name, describe and differentiate between human and non-human bones. Students are exposed to analytical skills that include how to determine sex from bones, the techniques of approximating age at death and stature all from human and non-human skeletal system assemblages. For human remains, this knowledge also extends to the determination of ancestry.

MAFA 704 Fundamentals of Criminology
This module introduces students to crime scene investigation. Students are taught skills that enable them to locate crime scenes, determine crime causation and crime reconstruction. The aim of the module is to equip students with knowledge of processing crime scenes and principles of investigative skills. Students shall be introduced to the main social theories that seek to understand crime. By the end of the course, students should have acquired competency in integrating forensic techniques, mapping, crime scene location, retrieve and process evidence, crime scene documentation and photography, reporting and recovery of skeletal remains.

MAFA 705 Genocide and Mass Violence Studies
The module introduces students to the history and evolution of genocide, the legal aspects of mass violence and atrocity. Students shall also study acts of genocide from across the globe to develop an understanding of the events and the legacies that such acts left behind.

MAFA 706 Forensic Taphonomy
The module imparts students with knowledge on the various stages of body decomposition or postmortem decay of human or animal remains, focusing largely on environmental effects such as decomposition in soil and interaction with plants,

insects and other animals. Other aspects which students study includes time elapsed since death, biotaphonomy and geotaphonomy.

MAFA 710 Archaeological Field School
The module aims at equipping students with theoretical and practical issues in field archaeology. Field approaches and data collection techniques shall be discussed and put into practice during site/field visits. Key skills and knowledge to be delivered in this module include: understanding context: documentation of context; analysis of evidence (archaeological and recent); c rime Scene/ archaeological site investigation, crime scene analysis using modern techniques; site surveys, geophysical surveying, remote sensing, site planning, excavation techniques, data collection, sampling techniques, ethnographic knowledge; preservation and conservation; understanding site formation, understanding context: stratigraphy, originality, associations, provenance, matrix; detecting taphonomic processes; documentation and presentation of contextual information: drawings, 3D productions, mapping, surveying techniques; excavating human remains; sampling/collecting human remains as well as ethical considerations.

MAFA 711 Public and Contract Archaeology
The module addresses issues on commercial archaeological surveys and excavations carried out in advance of construction or other land development. It highlights procedures, techniques, ethics and legislation on conducting contract archaeology. It also highlights issues on public awareness and involvement of the public in the management of archaeological resources and in preserving the fragile and irreplaceable remains of the past. It addresses approaches to educating and informing the public about archaeological resources and the means to incorporate the public in the management of the resources.

MAFA 712 Forensic Law
The module uses a multi-pronged approach to introduce students to international and Zimbabwean law and legal systems as well as procedures at law as they pertain to the pursuit of Criminal, Civil and Family Justice relating to human remains. The module also exposes the students to complexities of ethical perspectives relating to death and the dead within an African traditional culture and religious contexts as they influence the processes and procedures of Forensic Archaeology. For an in-depth understanding of law and ethics, students shall be exposed to the key stages of Forensic Archaeology, Surveying, Recovery, Analysis, Curation and possible display of human remains. It is critical that students understand these complexities as they guide the conduct of Forensic Archaeology and also be in a position to situate the discourse within the scope of Zimbabwe's present and future.

MAFA 713 Analytical Chemistry for Archaeology
Analytical chemistry is the science that addresses methods to determine the quantity or quality composition of unknown samples. Although frequently neglected, the nature of the sample and the use of analytical chemical information play important roles in selecting and executing the appropriate chemical analysis technique. Consequently, Analytical Chemistry has a major impact, not only in chemistry but also in fields such as biochemistry, forensic food, environmental and pharmaceutical traces, such as body fluids, bones, fibres and drugs. Success in analytical chemistry requires the ability to make rigorous measurements, an appreciation of the principles and practice of modern instrumentation and a problem-solving approach. This module aims to develop these skills with an emphasis on the use of coupled chromatography-mass spectrometry techniques, a powerful combination with applications in the analysis of complex mixtures relevant to forensic, environmental and biological systems.

MAFA 714 Principles of Computer Forensics
The module covers the basic elements students need to be familiar with during a digital forensic investigation. Students shall be introduced to the use of sophisticated equipment to access data through the use of computers, smartphones, cameras, servers or other smart gadgets, accessories and terminology used in digital forensics. Students also acquire fundamental skills for gathering and reviewing evidence and the essentials of reporting and producing exhibits. Students shall acquire knowledge of how computer forensics has evolved to become a critical component of many fraud examinations. The module also imparts knowledge of how students may identify the type of critical documents that can be searched for forensic examination and image or video file analysis.

MAFA 715 Virtual Reality and Forensic Crime Scene Reconstruction
This module imparts in students' scientific knowledge and skills of producing three -dimensional simulations of crime scenes. Computer-based scene reconstruction is an important method of responding to forensic questions in the context of accidents or crime scenes. Three- dimensional reconstructions and the use of virtual reality technology is a novel presentation of data that can be used in court. Therefore, in this module students are taught how to reconstruct crime scenes through virtual reality using different computer software.

MAFA 720 Dissertation
The project shall be on an approved topic and should be submitted at the end of Part 2 of the programme. The topic should satisfy the expectations of Education 5.0 by focusing on Archaeological Forensics, being able to solve community

challenges or being innovative to cause communities to behave in certain beneficial ways. It may be on digital creations with educational, economic and social value or that enhance service delivery in relevant stakeholder institutions.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN CULTURAL HERITAGE STUDIES (MCHS)

Duration:	2 years
Minimum Credit Load:	360
Maximum Credit Load:	420
MBKS:	288
ZNQF level:	9

1. Entry Requirements

An Honours Degree in: Cultural Heritage, Archaeology, Museum Studies, Fine Arts, Records and Archives Management, Culture and Languages.

2. LEARNING OUTCOMES

2.1 Ability to demonstrate knowledge and understanding of cultural heritage management principles and practices

2.2 Ability to identify, create and implement diverse heritage management frameworks for different forms of cultural heritage.

2.3 Ability to conserve different heritage typologies with a critical understanding of their sensitivities and relations with communities.

2.4 Understanding of cultural heritage management planning processes.

2.5 Understanding local, national and international laws that govern the management of cultural heritage.

2.6 Use appropriate research methods to better manage cultural heritage resources and enable the beneficiation of local communities

3. Programme Assessment

a) Continuous assessment shall comprise at-least two assignments and will constitute 30% of the final mark.

b) Candidates shall be required to sit for a three- hour examination on each module. The examination mark shall constitute 70% of the final mark.

c) To pass a candidate should obtain at least 50% of the continuous assessment and examination combined.

4. PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
MCHS 702	Approaches to Conservation of Cultural Heritage	18
MCHS 706	Legal and Administrative Frameworks in Cultural Heritage Management	18
MCHS 714	Heritage Management: Concepts, Principles and Practice	18

Level 1 Semester 2

MCHS 701	Managing Archaeological Sites	18
MCHS 703	Research Methods and Publications	18

MMUS 711	History of Art and Cultures of Zimbabwe	18

Level 2 Semester 2

MCHS 820	Dissertation	90

N.B Electives can be taken from the MA in Archaeology (MARC) or MA in Museum Studies (MMUS) programmes respectively.

5. MODULE SYNOPSIS

MCHS 701 Managing Archaeological Sites and Landscapes
Heritage is a finite resource that must be managed appropriately to ensure its long- term survival. Concepts such as stewardship and sustainability are considered in this module. Core training is provided in documenting and assessing heritage, conservation, heritage- specific interventions which are consistent with international charters, visitor management, integrated management of historical properties and landscapes and collections management. A running theme in the module is that conservation of heritage can best be achieved through accountability, social and economic viability.

MCHS 702 Approaches to Conservation of Cultural Heritage
The module seeks to give students the theoretical context in which modern- day conservation and management of immovable cultural heritage in Sub-Saharan Africa is situated. This would ensure that students develop a better understanding of the major principles and concepts of conservation and their evolution. Students will also understand the relevancy of utilising these principles and concepts in the decision-making process for the management and conservation of immovable cultural heritage.

MCHS 703 Research Methods and Publications
This module provides the core research skills to consider different aspects of heritage by understanding and applying a range of techniques of data collection in practical settings, including investigating the environment (using archaeological sources and paper and digital cartographic resources, observing the landscape and the built environment); investigating archives (researching paper and digital manuscript and printed and visual sources); exploring objects and artefacts (using materials in museums and museum websites and private and public cultural settings); and researching intangible materials (exploring oral history and traditions and public and private memories).

MCHS 706 Legal and Administrative Frameworks in Cultural Heritage Management
The main objective of this module is to introduce participants to the legal and administrative aspects of the conservation and management of cultural heritage. The module will also contextualise the administration of cultural heritage within the legislative systems. Students should be able to understand the basic components of heritage legislation and the relationship between heritage legislation and other types of legal and administrative frameworks. This module also involves the evaluation of contemporary legal and administrative frameworks in use in Africa.

MCHS 709 Rock Art of Africa
It provides students with an overview of the principal rock art traditions of the continent, examining the San art of Southern Africa, the 'Schematic rock art zone' of central Africa, the East African art from Tanzania, the celebrated art of Tassili and the surrounding area of the Sahara desert. This module will also use the rock art of Africa to raise issues of debate that revolve around the recognition of style, sequence, composition, symbols and symbolism, the judging of relationships between figures, the application and relevancy of ethnography, the gender, the rock surface as a context, shamanism, vision experience, neuropsychology, polysemy, multivocality, art and agency.

MCHS 712 Cultural Heritage Planning Process
The module seeks to develop among students, the necessary skills for the development of simple, appropriate and realistic management plans for tangible and/ intangible cultural heritage. Students should be able to work on the development of management plans for selected sites. This module will also involve hands-on site management planning exercises involving the local communities.

MCHS 713 Heritage Field School
This is mandatory for 2 weeks of field school at selected heritage places. The Field School will provide hands training and learning to students. This field school will give students an opportunity to research, visit a number of heritage sites and institutions, interact with heritage professionals, collect and curate materials, engage with stakeholders, conduct documentation and condition assessments, design and review management plans. Assessment of this module will be based on field evaluations, a field journal and a technical field report.

MCHS 714 Heritage Management: Concepts, Principles and Practice
This module covers the principles, concepts and philosophy of cultural heritage management and conservation. It discusses the core values of heritage, identifies cultural heritage management processes and practices, the multiplicity of meanings and values attached to heritage and how these influence management decisions. It looks at heritage in all its forms: tangible and intangible, official and unofficial and critically examines how heritage works and happens.

MCHS 715 Heritage Entrepreneurship, Marketing and Funding Strategies
This module indulges in the business of heritage. Heritage business development strategies are discussed and so are the range of activities that individuals and heritage institutions to address a wide public. The module examines finance in heritage situations (eg. Fundraising and budgeting) and the basics of marketing theory, mechanisms of marketing, the media, market research and marketing strategies as they apply to heritage businesses and institutions.

MCHS 716 Managing World Heritage
The module examines the fundamental issues of preservation and management of World Heritage sites, implementation of UNESCO's Conventions, Recommendations and Charters; selection, evaluation, and nomination of cultural properties for inscription as World Heritage sites and their protection from human and natural causes.

MCHS 717 Heritage, Conservation and Sustainable Development
The module discusses the various avenues through which heritage can be a driver for development in tourism development, income generation and heritage listing and its effects on urban and rural development and renewal. The module thus seeks to critically evaluate the role of heritage in the development agenda. Students will have the opportunity to discuss concrete actions that need to be taken to integrate cultural heritage conservation and promotion into the sustainable development debate. Heritage conservation strategies in infrastructural development will also be looked at especially the structure and practice of heritage Impact Studies.

MCHS 820 Dissertation
All students are expected to write a dissertation of about 120 pages which is the result of an individual research project undertaken during the course. This can be on any approved topic relevant to the degree and the taught components selected. Students are assigned a Supervisor to guide the main stages of the work.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN MUSEUM STUDIES (MMUS)

Duration:	Block Release 2 years
Minimum Credit Load:	360
Maximum Credit Load:	420
MBKS:	288
ZNQF level:	9

1. ENTRY REQUIREMENTS

1.1 An Honours Degree in Museum Studies, Cultural Heritage, Archaeology, Fine Arts, Records and Archives Management, Culture and Languages.

2 LEARNING OUTCOMES

2.1 Ability to demonstrate knowledge and understanding of the management of museums
2.2 Ability to conceptualise and mount exhibitions in museums and galleries
2.3 Ability to manage collections through creating policies and the environment that prevents deterioration of collections
2.4 Understanding of planning and implementation of museums' educational programmes
2.5 Understand national and international laws and conventions that regulate the operations of museums and galleries.
2.6 Communicate effectively and present information using multi-media to both experts and non-experts in the field of museums and galleries.

3 PROGRAMME ASSESSMENT

3.1 Continuous assessment shall comprise at-least two assignments and shall constitute 30% of the final mark.
3.2 Candidates shall be required to sit for a three -hour examination on each module. The examination mark shall constitute 70% of the final mark.
3.3 To pass a candidate should obtain at-least 50% of the continuous assessment and examination combined.

2. MODULE SYNOPSIS

MMUS 701 Museum History, Purpose and Function

The module examines how museums and museum theories have evolved, their role in contemporary societies and how they operate within the context of heritage management. It explores the philosophy of museums in the service of the general public. The module will also help students evaluate how such development trends have shaped the appreciation of material culture as presented through museum exhibitions.

MMUS 702 Museum Management

The module examines the basic and contemporary principles of museum management in general through the evaluation of the management theory and practice of museums/galleries in particular. The module presents the museum as a business venture that is governed by contemporary business ethics and not only a traditionally docile organisation Students would be encouraged to make assessments of practical case studies to promote awareness of contemporary administrative challenges and inspire a sense of innovation in solving these problems. Topics to be covered include strategic planning, ethics and governance, membership and marketing.

MMUS 703 Museum Communication and Education

The course examines museum practice as vehicles of effective and efficient dissemination of information between the museum and the audience through the artefact or art collection about matters that relate to past and contemporary societal concepts. It also evaluates the effectiveness of such educative roles of both the museum and exhibitions in relation to both traditional and contemporary cultures

MMUS 704 Museum Project Management

The module heightens students' awareness towards the formulation and management of projects relevant to Museums/Galleries. Participants will learn about what changes when one goes from "doing" the work to "managing" the project. This would be achieved through group discussion on project management tools, planning, negotiating on behalf of the project, project monitoring and evaluation for effectiveness and efficiency. Project management styles are also explored giving insights on how to build on strengths for effective project teams.

MMUS 705 Museum Legislation and Law

This module presents a thorough examination of the legal frameworks which guide the operations of museums with special emphasis on regional and international laws governing museums and museum operations. Highlight on the reality versus practicality of these legislations and laws will also be made through practical analysis of contemporary museums/galleries paying special attention to developing countries. Topics to be covered would include debates on legislation and law, issues of illicit trafficking of cultural objects and how they vary in public and private museums.

MMUS 706 Museum Collection Management

The module acquaints students with the theory of museum collection development, ethics in collecting, collections care, accountability and access. The module addresses the issue of designing and implementing collections policies, establishing and managing collections; collection management procedures and systems, documentation of collections, records preservation, collections access and storage and responsibilities of a museum registrar.

MMUS 707 Research Methods and Publications

The main aim of the module is to help students acquire technical and practical skills for research purposes. Students would examine how research methodology is applied to address issues that flow from theory and appreciate that there are common themes among the various methodological approaches that are utilised in archaeology, cultural heritage and Museum Studies. Among issues that will be addressed through readings, presentations and discussions are: the nature and scope of archaeological, Cultural Heritage and Museum Studies research, the nature of research questions and the design of research programmes to address those questions.

MMUS 708 Museums and Multimedia

The module seeks to provide students with the knowledge and the skills needed to imaginatively use, work with and manage new media and digitisation in museums and to exploit its potential. It also seeks to provide an understanding of the changes that information and communication technologies is bringing about in the museum; the opportunities they presents; and how museums can take advantage of them . The module explains why digitisation is important to museums and deals with the practicalities of multimedia, information and technology as a tool that can enhance access to information about collections to the general public.

MMUS 709 Museum Exhibitions and Interpretation

The module empowers students with skills in curatorial research, presentation, documentation and laboratory research methods for the benefit of the public. It also presents the aspect of museum publication as a follow- up to curatorial or laboratory research. This course will also focus on the development of interpretive museum exhibitions including theory, planning, research, methodologies, design, construction, installation; and the application of new technologies.

MMUS710 Museums and Global Issues

The module discusses transformation and the consequent redefinition of the "Museological object", the new Museology movement and contemporary museum activities in light of the politics of globalisation. It also analyses how structures on which a change in mentality and

new relationships of discipline specialists and other professionals within the museum/gallery institutions affect Museology as both an academic discipline and as a profession.

MMUS 711 History of Art and Cultures of Zimbabwe

The module explores current theories relevant to Zimbabwean ethnology. This would entail an analysis of trends in Visual culture, art history and philosophy. It also explores the production processes and aesthetic issues in Zimbabwean art (sculpture, painting, crafts, photography, performance arts and mixed media).

MMUS 712 Museum Marketing and Quality Control

This module introduces students to the relationship between the museum and stakeholders through an analysis of the way museums present themselves. The module considers the 5 'P's of production; PEOPLE, PRICING, PRODUCT, PLACEMENT and PROMOTION within the socio-economic scope of contemporary societal needs as museums attempt to create and maintain a position in these contemporary societies and consider the intricacy of this community. Students are equipped with the theoretical and practical skills of how museums can re-brand themselves to cater for the diversity of needs whilst the same time, promoting a good corporate image.

MMUS 713 Museum Field School

This is mandatory for 2 weeks of field school at selected heritage places. The Feld School will provide hands training and learning to students. This field school will give students an opportunity to research, visit a number of heritage sites and institutions, interact with heritage professionals, collect and curate materials, engage with stakeholders, conduct documentation and condition assessments, design and review management plans. Assessment of this module will be based on field evaluations, a field journal and a technical field report.

MMUS 820 Dissertation

All students are expected to write a dissertation of about 120 pages which is the result of an individual research project undertaken during the course. This can be on any approved topic relevant to the degree and the taught components selected. Students are assigned a supervisor to guide the main stages of the work.

DEPARTMENT OF DEVELOPMENT STUDIES

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN DEVELOPMENT PLANNING AND MANAGEMENT (AH01)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	540
Actual Credit Load	528
ZNQF Level	8

1. PURPOSE OF PROGRAMME

The purpose of the programme is to expose students to the theories and practices of development planning and management. The programme also aims to produce middle to upper -level development managers that have the knowledge and skills to formulate, develop and sustain viable development programmes in both governmental and non-governmental spheres. By the end of the programme, students should therefore have the knowledge and skills in development planning and management as well as possession of skills in development programming.

2. ENTRY REQUIREMENTS

2.1 Normal Entry:

Candidates must Have obtained 5 'O' Level passes including Geography, English Language and Mathematics passed with at least a grade C and two passes in 'A' Level subjects or their recognised equivalents;

2.2 Special Entry:

A candidate must have obtained a diploma in a development related discipline or a recognisable relevant qualification from an acceptable institution in which development and/or geosciences issues were involved;

2.3 Mature Entry:

A candidate must be 25years of age with relevant working experience and have passed 5 'O' level subjects including Geography, English Language and Mathematics passed with at least a grade C. The candidate must also have relevant experience for at least two years. The candidate may be required to pass a written/ oral entrance examination set by the University. University General Regulations apply to other issues.

3. PROGRAMME CHARACTERISTICS

The programme is offered on a module basis, with a dissertation being part of the fulfilment requirements for the programme.

4. CAREER OPPORTUNITIES

Graduates have career opportunities in a wide array of institutions and organisations which include the following: middle to upper-level management social research organisations, Non-Governmental Organisations, International Governmental Organisations, Donor Agencies and Government Ministries and Departments; and self-employment initiatives.

5. PROGRAMME DELIVERY

Teaching is mainly offered on a face-to-face basis. However, online lectures will be adopted in line with the new international drive for cyber –based learning. A significant part of the content will be practical with students being given ample practical exercises in line with the content of various modules.

6. LEARNING OUTCOMES:

Upon completion of the degree, students should be able to:

6.1 Demonstrate an understanding of the major concepts, questions and theoretical approaches in Development Planning and Management.
6.2 Critical analysis development policies and apply good policy advocacy skills
6.3 Apply knowledge gained and skills acquired to formulate, implement, monitor and evaluate development

policies, programmes and projects

6.4 Document and review development content

6.5 Understand how to work with regional and international humanitarian and development-based organisations.

6.6 Carry out applied research using appropriate theories and methods in Development Planning and Management.

6.7 Communicate developmental findings and arguments using appropriate concepts and idioms of the discipline.

7. GENERAL PROVISIONS

7.1 The number of modules taken by any student from outside the Department may be restricted.

7.2 The offering of optional modules depends on the availability of staff and/or teaching loads of available staff.

8. CONTINUOUS ASSESSMENT

8.1 **Coursework:** At least two (2) assignments per module constituting 40% of the examination total mark

8.2 **Written Examinations**: Three (3) hour examinations per module constitute 60% of the examination total mark

9. PROVISION OF PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

11. DEGREE GRADING AND CLASSIFICATION

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

13. MODULE SYNOPSES

DPMH 111: Introduction to Development Studies

This module introduces students to Development studies as an interdisciplinary field of study. The definition of the concept of development and the relevant ideological disagreements about the definition of development and the people who define it will be foregrounded. The module also explores the various development theories that have arisen in an attempt to create solutions for third- world development problems. It further provides an overview of the common methods of measuring development including the Human Development Index, the Gross Domestic Product and the Index for Sustainable Economic Welfare. Other themes introduced to students are institutions, gender, environment and globalisation.

DPMH 112: **Introduction to Gender Studies**

In this module, major concepts, arguments and issues in the gender debate are discussed. A distinction between sex and gender in addition to key concepts of WID, GAD, gender empowerment and gender mainstreaming are discussed. The mode covers gender and development challenges. Various issues are discussed and these include various gender theories, models, frameworks and blueprints. Gender is discussed in the context of culture and religion and its application to development. It undertakes a robust comparative analysis of women's and men's participation in various sectors of the economy i.e. smallholder and commercial agriculture, manufacturing and processing, vending and informal activities including cross - border trading and the service industry presented as well as challenges they face. The course also looks at the Millennium Development Goals (MDGs), the Sustainable Development Goals (SDGs) and International conventions respectively in the context of gender and development.

DPMH 113: Introduction to Development Planning

The module introduces students to the basic concepts and issues in the field of development planning. It helps students to understand what planning is, its general scope and the different dimensions of planning. In terms of scope, the module looks closely at the procedural and substantive nature of planning and how both procedure and substance define the vocation of planning. In this module, students are also expected to have a fair appreciation of the different dimensions of planning such as time horizons, spatial levels and operational or substantive fields of planning.

DPMH 114: Introduction to Development Management

The module is designed to assist students to have a general appreciation of the basic concepts and principles of management and how these principles can be applied in the management of development interventions. In this module, the different key functions of management are also explored and the relevance of these functions to development is explained.

HCS 115 Introduction to Information Technology

Refer to the Regulations of the Department of Information Systems

CS 131: Basic Communications Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

DPMH 121: **Histories and Theories of Planning**
The module traces the origin of planning and the paradigms informing the vocation of planning. Some of the paradigms examined in this module include rational-comprehensive planning theory, incremental planning theory, advocacy planning theory and mixed-scanning planning theory. Planning approaches informed by these paradigms such as blueprint, process and strategic planning approaches will also be examined in this module.

DPMH 122: Histories and Theories of Management
The module traces the evolution of management theories focusing specifically on the various shifts in management thought from scientific management theories to the contemporary new public management theories. The module also examines the appropriateness and applicability of these classical and contemporary management theories in the practice of development management.

DPMH 123: Managing Development Finance
The module assists students to understand strategies and systems that should be put in place to effectively manage and properly account for development finances. To that end, students are expected to have a general appreciation of budgeting, auditing and how to prepare income statements, balance sheets and financial expenditure tracking systems. An understanding of the operations of credit and general capital markets is also important in helping students understand how to source funds for development from the open market and aid agencies.

DPMH 124: Governance and Development
The module explores different governance frameworks within which development interventions are planned and managed and the implications of these frameworks for developmental planning and management. Topics covered in this module include definition of governance and the different state ideologies undergirding governance such as autocracy, pluralism and corporatism. Key principles of good corporate governance such as accountability, transparency, freedom of association, freedom of speech, freedom of the media, rule of law, constitutionalism, decentralisation and public participation, among many others, are also examined in this module.

CS132: Extended Communication Skills

Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

DPMH 125: ICT for Development Planning and Management
The use of information and communication technology (ICTs) fosters efficiency in development planning and management. The module equips students with knowledge about the different information and communication technologies and how these technologies are applied in development planning and management. Focus in this module is particularly on those ICTs that are relevant to Development planning and management

DPMH 211: Disaster Management
This module discusses major sources and the nature of disasters and their impact on both rural and urban lives and livelihoods. Students are also exposed to key strategies for mitigating the impact of disasters on lives and livelihoods. Strategies for preventing or coping with disaster situations are also closely examined in this module.

DPMH 212: Rural Development Planning and Management
The module examines both traditional and contemporary views on rural change. The module also exposes students to key rural development approaches like the improvement approach, transformation approach, neo-liberal approach and pragmatic or post-modernist approach and how these approaches could be used to harness rural human and material resources for the long-term productivity and development of rural regions.

DPMH 213: Human Rights in Development Planning and Management
The module introduces the main concepts for the analysis of human rights such as downward accountability, consensus, legitimacy, social justice, human dignity, diversity, tolerance, pluralism, civil society, sovereignty, gender etc. Students are exposed to the dominant paradigms on human rights in Africa, viz, the Athens-to Washington Narrative of Human Rights/Western Liberal Universalist Discourse, the African Cultural Relativist Paradigm/ Communitarian School of Thought as well as the African Radical Materialist Conception of Human Rights in Africa.

DPMH 214: Introduction to Research Methods
This module introduces students to different research epistemologies, designs and methods for data collection and analysis. The module also enables students to learn how to identify problems to research, develop research objectives, problem statements, research questions, and hypothesis, and onduct a review of related literature.

DPMH 215: Water and Sustainable Development
Water is at the core of sustainable development and is critical for socio-economic development, healthy ecosystems and human survival itself. It is vital for reducing the global burden of disease and improving the health, welfare and productivity of populations. Inadequate access to drinking water and sanitation is a significant threat to public health, making it a major obstacle to sustainable social and economic development. Sound governance of water resources is vital for the attainment of the Sustainable Development Goals. Therefore this module, offers problem-orientated curricula based on actual water-related challenges that engage students in critical and innovative thinking, to be able to handle future challenges. Learning activities within this module encourage multidisciplinary collaborations and engage students with interdisciplinary approaches.

DPMH 216: Migration and Development
Since the last few decades, the number of people living outside their countries of their birth has risen significantly. This module therefore introduces students to the various concepts and dimensions of migration, both internal and international and how they affect and are also affected by development and economic development. It also engages dominant theories of migration. This will enable students to comprehend Africa's position in the global world and how the continent is connected with, as well as included in main discourses, plans and global concerns with human population movements and economic growth.

ENT 131: Entrepreneurship
Refer to Faculty of Business Sciences regulations

DPMH 221: Project Planning, Monitoring, Evaluation and Report Writing
The module provides a foundation in the concepts, tools and techniques of project planning and management. The module looks at the whole project life cycle. In this life cycle, major stages to be examined include identification, appraisal, activation and monitoring and evaluation. Other critical issues to be explored in the module include project leadership, project governance project risk management, report writing skills and project resourcing. Project resourcing, in particular looks at resource mobilisation/project proposal development

DPMH 222: Urban Development Planning and Management
This module seeks to equip students with knowledge of the processes of planning and managing urban regions. In this module, students will be exposed to the major theories informing urban land use planning and management, urban development and the built environment and how these theories can be applied to further stimulate urban development and the built environment. The module also focuses specifically on urban settlements, efficient urban transportation, urban health and the general urban social environment.

DPMH 223: Civil Society and Non-Governmental Organisations
Civil Society and Non-Governmental Organisations play a vital role in development. The way these organisations are managed is key to the delivery of desired development outcomes. In this module, students will also be exposed to the management systems used in these organisations and how best these management systems could be improved.

DPMH 224: Integrated Development Planning and Management
An integrated approach to development planning and management is based on the assumption that development problems are an organic whole. The holistic nature of development problems requires that the development efforts of a myriad of key governmental and non-governmental agencies involved in the planning and management of development be combined or integrated. The module therefore seeks to help students appreciate the specific benefits and challenges associated with an integrated approach to development planning and management and how these combined efforts could be enhanced to ensure effective planning and management of development.

DPMH 225: Local Government Management
The local sphere has increasingly become an important locus of development work. This brings to the fore the equally increasing role of local governments in development planning and management. The module, therefore, equips students with basic knowledge of the management of local governments and strategies to improve the management of local governments for effective development planning

Work -related learning
This is a one -year structured, credit-bearing work experience in a professional work setting during which the student applies academic knowledge and acquires practical or field-based skills and knowledge. From the industrial attachment, students are expected to: 1) explore career interests, 2) learn new skills, 3) gain work experience, 4) develop a professional network, and 5) understand and appreciate workplace expectations.

DPMH 300 Work -Related Placement Report
This is a preliminary report that a student compiles demonstrating his or her knowledge and understanding of the organisation to which he or she is attached. The student should be able to identify and describe the organisation where they have been placed for their work- related learning. The student should also be able to justify the relevance of the placement or organisation in relation to his or her programme of study. The student must understand and outline the organisation's history, organogram, mandate, mission, vision and objectives. Students are also assessed for their understanding of work challenges and the sustainability of solutions they suggest.

DPMH 301: Student's Work-Related Learning Report
DPMH 302: Academic Supervisor's Assessment Report
DPMH 303: Employer's Assessment Report

DPMH 411: Gender in Development Planning and Management
The module discusses gender mainstreaming as a strategy to achieve gender equality. Gender mainstreaming implies considering the needs of both women and men at every stage of the policy or programme/project planning and management cycle. The module aims to provide students with comprehensive knowledge about gender mainstreaming and gender analysis. The module also draws on best practices and case studies on gender mainstreaming from across the world.

DPMH 412: Extended Research Methods for Development
The module exposes students to research epistemologies appropriate for development. In this module, students are therefore exposed to the mixed methods research (MMR). In qualitative research, paradigms like ethnography, phenomenology and grounded theory, all of which are used for understanding multiple or social realities, are explored in this module. In the quantitative epistemology, survey and other appropriate designs are explored. The module also exposes students to quantitative data analysis using modern statistical software packages such as SPSS, EPI, INFO, ENVIVO, EXCEL etc

DPMH 413: Agricultural Development Planning and Management
The module locates the centrality of agriculture in promoting development. It focuses on issues relating to the effective planning and efficient management of and distribution and agrarian change policies, programmes and projects.

DPMH 414: Development Policy Analysis and Planning
The module introduces the concept of development policy analysis and planning in development planning and management. The module looks at the public/development policy cycle and it prepares students to contribute effectively to development policy debates, policy preparation, policy implementation and evaluation processes in Africa and other developing countries.

DPMH 421: Public Health Planning and Management
This module equips students with expertise in the planning, implementation and evaluation of communicable and non-communicable diseases. Substantive knowledge areas in this module include the definition of public health, the nexus between public health and development, health promotion, primary health care, socio-economic determinants of public health, health and culture, HIV/AIDS and public health, climate change and health, child and maternal health, adolescent health, principles of epidemiology, communicable and non-communicable diseases.

DPMH 422: Environmental Planning and Management

There is growing recognition that global environmental changes are socially driven and are also closely related to issues of equity, justice, power, politics and pursuits for livelihoods. The module therefore examines social, economic and political factors contributing to the negative environmental changes occurring in most less developed countries to identify and implement strategies aimed at alleviating the negative impact of human activities on the environment. The module also examines the efficacy of environmental laws and plans as potential solutions to key environmental challenges.

DPMH 423: Conflict Management and Transformation

The module aims at making students get acquainted with conflict management and transformation programme plans that have been implemented in different countries around the globe and how they have assisted in resolving conflict. The major thrust of conflict transformation is to enable relationships of respect, cooperation and consent, and constructive means and norms for dealing with conflict. Students will be exposed to people -centered approaches to conflict management and transformation. Key driving factors of conflict are going to be studied alongside actions meant to transform institutions that justify and reproduce direct, cultural and structural violence at the global, national and local levels. The module will aim to show how conflict management takes a pragmatic approach to conflict by constructing agreements and practices that allow people to effectively cooperate despite their differences. Instead of focusing on how a specific conflict can be resolved or transformed the module will aim at teaching students to rather offer strategies to mitigate a conflict's negative effects. Students will be expected to stay abreast of conflict management programmes that have been implemented in different countries as a way of resolving conflicts. At the end of the module, students will have learnt the importance of transforming cultures of violence into cultures of peace.

DPMH 424: Dissertation

In this module, students are required to engage in a research topic approved by the Department under the supervision of a designated academic staff member or members. The module requires the student to exhibit the knowledge and ability to define a research topic, select a methodology, referencing and other related research skills. The student must complete a written piece of research work of approximately 5 000 to 10000 words. This is a double module and students are expected to practice methodological issues learnt in various research modules. Apart from equipping students with practical research skills, one of the ideas behind this module is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN DEVELOPMENT PRACTICE (AH02)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	520
Maximum MBK/S Credit Load	408
ZNQF Level	8

1. PURPOSE OF PROGRAMME

The purpose of the programme is to expose candidates to the technical side of development work. Whilst the parent programme, Development Studies is geared towards exposing candidates to the theoretical and philosophical realms of development discourse; this programme is centred on equipping students with the tangible technical skills to undertake projects and programmes that lead to the realisation of development of the ground. Essentially this programme aims to sharpen and polish the skills needed to drive development initiatives practically in the field. It is therefore a practice -centred programme which is more premised on putting into action the theoretical elements and aspects of development.

2. ENTRY REQUIREMENTS

2.1. ***Normal Entry***

Candidates must have obtained 5 'O' Level passes including Geography, English Language and Mathematics passed with at least a grade C and two passes in 'A' Level subjects or their recognised equivalents;

2.2. ***Special Entry***

A candidate must have obtained a Diploma in Development related discipline or a recognisable relevant qualification from an acceptable institution in which development and/or geosciences issues were involved.

2.3. ***Mature Entry***

A candidate must have 25 years of age with relevant working experience and have passed 5 'O' level subjects including Geography, English Language and Mathematics passed with at least a grade C. Must also have relevant experience for at least two years. May be required to pass a written/ oral entrance examination set by the University. University General Regulations apply to other issues.

3. CAREER OPPORTUNITIES AND FURTHER EDUCATION

3.1 The degree programme prepares students for technical programming positions *(project and programme design, formulation, implementation, monitoring and evaluation)* within the arena of development practice namely;

3.2 International and regional organisations such as the United Nations, the World Bank, the International Labour Organisation (ILO), the African Union (AU), or Southern African Development Community (SADC).

3.3 Government ministries, particularly those in charge of issues relating to labour, rural development, gender, children and the youth, agriculture, development finance, development planning and other economic and social services.

3.4 Non-Governmental Organisations that focus on the political, social, economic and environmental realms of development.

3.5 It is the major desire of the programme to equip candidates with the skills to start their own NGOs and development practice entities like consultancies and social entrepreneurship entities.

4. PROGRAMME DELIVERY

4.1 The programme will be delivered on the basis of a blended learning system (face-to-face lectures and online lectures).

4.2 The bulk of the programme will consist of field-based learning which will comprise practical programming field-based assignments for all topics taught in various modules.

4.3 The programme thrives on partnerships with existing development programming entities like Non – Governmental Organisations in particular.

5. LEARNING OUTCOMES

Upon completion of the degree, students should be able to:

5.1 Demonstrate an understanding of the major concepts, questions and approaches in Development Studies.

5.2 Apply knowledge gained and skills acquired to formulate, implement, and monitor and evaluate community development projects, programmes and policies.

5.3 Exude extra ordinary technical programming skills throughout the project cycle

5.4 Produce quality technical programming documents like project proposals, reports and research documents.

6. GENERAL PROVISIONS

6.1 Bachelor of Arts Development Practice Honours is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of first registration.

6.2 At the third level of the degree programme, Honours students go on Work-Related Learning for at least 10 months and at most 12 months. Students are strongly encouraged to venture into self-help businesses (entrepreneurship).

6.3 The degree programme offers **core/compulsory** modules as well as **optiona**l modules.

6.4 At least four modules registered per semester should be from within the programme.

6.5 Where a prerequisite module is involved, a candidate will be required to pass it before taking higher modules.

6.6 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".

7. PROGRAMME ASSESSMENT

Coursework

At least 10 assignments per course constituting 60% of the total examination final mark. Of these 10 assignments, 2 might be strictly written assignments whilst the remainder are field-based assignments with mini reports being produced for the assignments.

Practicum Examinations
Some modules might be examined through three (3) hour practicum assessments where students will be required to undertake a practical examination.

Written Examinations
Three (3) hour examinations per course constitute 40% of the examination total mark

8. PROVISION FOR PROGRESSION

8.1 Successful candidates will be able to proceed for a Masters in Development Practice or a Masters in Development Studies.

9. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees of the Midlands State University.

10. GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the General Regulations for Undergraduate Degrees of the Midlands State University.

11. DEGREE WEIGHTING

11.1 Refer to Section 11 of the Faculty of Arts Regulations for Undergraduate Degrees of the Midlands State University.

12. PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module	Credits
DPH 111	Introduction to the Concept of Development	12
DPH 123	Gender Isues in Development Practice	12
DPH 113	Fundamentals of Project Management	12
DPH 114	Research Methods for Development Practice	12
HCS 135	Introduction to IT	12
CS 131	Basic Communication Skills	12
Level 1 Semester 2		
DPH 121	NGO and Civil Society	12
DPH 122	Development Communication	12
DPH 124	Agricultural Practice and Development	12

DPH 413	Research methods	12
DPH 414	Resource Mobilisation for Development Processes	12

Level 4 Semester 2

DPH 421	NGO Management	12
DPH 422	Strategic Management	12
DPH 423	Development Policy Analysis, Design and Formulation	12
DPH 511	Project Report Paper	24

13. MODULE SYNOPSES

DPH 11 Introduction to the Concept of Development

This module aims to come up with a technical definition of development. It exposes students to the theoretical inferences of development with the hope of then ending with the production Topics to be covered include the mercantilist doctrine, the "invisible hand" of Adam Smith, the inexorable world of Karl Marx, the Malthusian demography theory, and Keynesian economics. It also covers neo-classical theories by Modernisation/Diffusionist theory of Western scholars led by Alexander Gorchenkron and Walt Rostow; the Underdevelopment Theory by 'dependentistas' led by Gunder Frank, Fernando Cardosso, Wallerstein, Walter Rodney and Kwame Nkrumah; and the de-linking thesis of Samir Amin. Coloniality and decoloniality will also be discussed with the aim of producing an organic African definition of development. International frameworks for defining development like the Sustainable Development Goals will also be looked at. International indicators of measuring development like the human development index and the aspect of Gross National Happiness will be touched on. By the end of the module, students should be able to come up with a workable and relevant definition of development with a particular focus being on the construction of indicators of development.

DPH 123 Gender Issues in Development Practice

The focus of the module is to teach candidates how to mainstream gender in development programming as well as to deal with critical stand-alone gender issues in Africa. The module will teach students how to use the various gender analytical frameworks as a basis for development programming. The thinking is that gender must be mainstreamed from the institutional level being the development entity itself to the community level. Hence students will be exposed to various gender analytical frameworks like the Harvard, Sarah Longwe, Mosser Gender Planning Framework and others. Critical gender issues in Africa like gender- based violence, gender economics, gender and politics and LGBTI rights will be touched on in depth. By the end of the module, candidates must be able to come up with gender mainstreaming strategies for various development projects as well as come up with context -based solutions to gender problems being experienced in Africa.

DPH 113 Fundamentals of Project Management

The module introduces students to the project cycle. The module takes students through the project cycle from problem identification to project evaluation and learning. Every stage of the cycle will be conversed with practical examples being proffered. The focus will be to equip students with the critical skills required to manage projects and produce imperative project documents required at various stages of the project cycle. By the end of the module, students must be able to design, implement, monitor and evaluate a tangible development project.

DPH 114 Research Methods for Development Practice

The module introduces students to the practical skills required for research for development practice. The module deviates from being an aptly academic research methods rendition to being a practical research methods module. The idea is to expose students to research techniques they would need to undertake astute development project management. Critical

areas like how to undertake baseline surveys, participatory research approaches, setting up of community focus group discussions, most significant change approaches to research and other important aspects will be touched on. The aim of the module is to help the candidates attain research skills that will aid their practical development project management.

DPH 121 Non - Governmental Organisations and Civil Society
This module is based on the acknowledgement that NGOs are considered the cutting-edge vehicle for development programming in Africa. Hence, students will be introduced to the fundamentals of NGO management. The module will take students from the processes involved in starting an NGO down to the processes of developing various operational policies for NGOs. By the end of the module, students must be able to formulate an NGO and design management strategies required for the sustainability of such NGOs.

DPH 122 Development Communication
This module is based on the understanding that critical development processes are ignited through communication. Communication is the basis for development. Hence this module will introduce students to Development Communication Theories like Modernisation, diffusion and participatory models of development communication. The aim is to ensure that students will be able to design effective development communication strategies by following the process of needs assessment, strategy development, implementation, monitoring and evaluation. By the end of the module, students must be able to design, formulate and implement development communication strategies for various development aims and sectors.

DPH 124 Agricultural Practice and Development
The module exposes candidates to the basic skills of agricultural practice. The module will focus on imparting basic technical agricultural skills on crop cultivation and livestock production to candidates. The desire is to ensure that candidates have basic knowledge of agricultural practices which they will then combine with a development lens to ensure the construction of sustainable livelihoods. This module is premised on the realisation that African livelihoods are largely agricultural. Hence, development practitioners must have a fair understanding of agriculture to be able to support and elevate agricultural practice for the attainment of development. By the end of the module, candidates must have basic practical knowledge of crop and livestock husbandry.

DPH 125 Information Communication Technology for Development Practice

The module aims to introduce candidates to mainstream information communication technology (ICT) packages that have become imperative in development programming. Such packages help development practitioners to undertake their work to levels par excellence. Examples of such ICT packages include; Microsoft Office, Statistical Package for Social Sciences (SPSS), Kobo Tool Box, Nvivo, Scope and film and editing software packages. Students will also be taught camera skills. By the end of the module, students must have basic to intermediate proficiency of the packages mentioned above.

DPH 126 Economic for Development
The module examines dominant classical and neo-classical economic theories and models and the extent to which these theories and models influence economic growth and development. Particular focus in this module is on the less developed economies of Africa, Latin America and Asia.

DPH 211 Famines and Food Security
This module seeks to assist students to come up with practical ways of solving and mitigating hunger and food insecurity challenges faced by communities at household, national, regional and international levels. The module discusses early food insecurity warning systems based on forecasting using both scientific and indigenous knowledge-based methods. After acquiring knowledge of early warning systems, students will be encouraged to come up with early hunger mitigation response systems. The hunger and food insecurity mitigation planning should be deeply embedded in the knowledge of the causative agents of famine, hunger and food insecurity, theories of famine, global warming and climatic variations, poverty, trade liberalisation, historical legacies, population growth, health factors, democracy, conflicts etc. Gender issues and disability among other demographic variables with regards to food security are discussed as major issues considered in food insecurity and hunger mitigation planning.

DPH 212 Disaster Management Practice
This module maps the trajectory of humanitarian response to disasters within the framework of an understanding of development, with vulnerability and disaster risk reduction as an integral part of development. The module recognises the vulnerabilities faced by the poor and marginalized and the disproportionate impact of disasters endured by them in the developing world. In this module, the study of disaster risk reduction, disaster response and post-disaster recovery is grounded in the values of justice, equity and social inclusion. The module addresses all stages of disaster management in a comprehensive and holistic mannerincludingpre- disaster preparedness and mitigation, rescue and relief in the context of disaster and post -disaster rehabilitation, reconstruction and recovery. Students will be equipped with hands- on disaster management experiences based on local predicaments. By the end of the module, students should have acquired the critical

programming skills needed to foster and implement disaster management interventions at all stages of the disaster management cycle.

DPH 213 Urban Development
Worldwide, more people live today in cities than in rural settings. This trend is catching up in Africa where more people are becoming urban dwellers through the process of urbanisation and urban growth. The challenges such as earning money, getting transport, dealing with waste and sanitation, water, finding housing, access to public amenities, and offsite infrastructure development which the urban environment confronts its residents, and by extension planners, development practitioners, public decision-makers and academics, are often different in nature and scale from those encountered in the rural milieu. Urban decay has become rampant in the 21st century and urban renewal is crucial for the survival of the ever -increasing population of residents in urban centers. This module prepares students to be able to test and come up with urban development and management approaches for the betterment of the local urban communities.

DPH 214 Managing Displacement and Migration for Development
Millions of people around the world have been forced from their homes by interlinked factors including persecution, armed conflict, natural disasters, development projects and socio-economic deprivation. These displacements and migrations have resulted in challenges that include human rights abuses and xenophobia. Managing large-scale displacement represents a critical challenge for contemporary development processes. This module will examine international, regional, national and local responses to the problem of forced migration; investigate the obstacles to effective protection and assistance for refugees and displaced persons; explore the challenge of resolving displacement crises, and discuss some of the moral dilemmas raised by forced migration. In an endeavour to comprehend displacement and migration, students will examine various historical and contemporary cases of forced displacement, integrating diverse disciplinary approaches, including legal, political and moral analysis. In the end, students will be encouraged to come up with practical displacement and migration management techniques that will benefit communities.

DPH 214 Community Health Practice
This module aims at producing development practitioners who are capable of addressing community health and developmental issues using a bottom- top approach from the community level. The students are encouraged to critically analyse community health problems with a view to suggesting and helping to implement solutions. The module prepares students to effectively plan, develop, implement and evaluate community health programmes. Community health development practitioners work to improve the health and well-being of entire communities. Students will be exposed to the material in health behaviour, community health research, biostatistics, epidemiology and health communication.

DPH 215 Children and Development
Across the world, children are at risk of violence, abuse, exploitation, and neglect. Conflict and natural disasters have forced millions to flee their homes and confront the dangers of migration and displacement. Commercial sexual exploitation and trafficking, child labour, and child marriage are problems in many countries. At-risk children and adolescents need their rights enforced to protect them from harm and to ensure they develop to their full potential. In this course, students will learn about the causes and consequences of child protection failures. Students will consider the strategies, international laws, standards, and resources required to protect all children. Learners will be able to link legal frameworks and child rights approaches to the work of policymakers, lawyers, health workers, educators, law enforcement, and social workers. Learners will understand how they can ensure the protection of children and apply child protection strategies to their work. The module will prepare students to use the principles of children's rights to plan, implement and monitor programmes with the overall goal of improving the position of children so that all children – no matter who they are - can fully enjoy their rights and live in societies that acknowledge and respect children's rights.

DPH 216 Governance and Development
The module explores different governance systems and their impact on developmental outcomes, with a special focus on Africa. Topics covered include definition of governance, the relationship between governance and development, the definition of democracy and the controversies surrounding the definition, 'universal' characteristics or features of democracy (separation and balance of power, accountability and transparency, freedom of association, freedom of speech and freedom of the media, rule of law, pluralist party system, respect for minority groups, public participation, free and credible elections); different democracies/political systems/regimes or governments and how they impact on development. The module also covers issues of corruption and anti-corruption strategies, transparency, accountability, participation, and decentralisation, among many other issues.

DPH 221 Human Rights and Development Practice
This module provides students with contemporary understanding and a strong grounding on the linkage between human rights, social, economic issues and (human) development. In this module, students will learn the meaning of development based on human rights and social justice perspectives. Learners will understand how development is practice based on the needs, rights and capabilities of individuals; and critically explore the strengths and shortcomings of these approaches. Students will uncover human rights abuses, economic issues and challenges to colonialist unjust development, all of which still have an effect to this day. At the end of the module, students must be able to hypothesise human right based development frameworks and concepts that can be adopted for the betterment of communities.

DPH 222 Community Health
This module offers students a broad exposure to the historical and developmental milestones of the Public Health discipline. Students gain expertise in the development, implementation and evaluation of communicable and non-communicable diseases. Students are also given an insight into factors related to gender and health, community participation in health programmes, and cultural and environmental factors that affect global health. Specific topics covered include definition of public health, public health and development, health promotion, primary health care, socio-economic determinants of public health, health and culture, HIV/AIDS and public health, climate change and health, child and maternal health, adolescent health, principles of epidemiology, communicable and non-communicable diseases in Sub-Saharan Africa.

DPH 223 Rural Development
Rural development has been a topical subject in Africa since the attainment of independence of these nations. Colonial policies created a dual economy in African countries wherein a well-developed capitalist urban space economy existed side by side with an underdeveloped, pre-capitalist and largely peasantry rural space economy. This scenario of striking inequality is the major reason for focusing on rural development. To this end, the module attempts to give students a holistic perspective and an in-depth analysis of the problems and processes of sustainable rural development. With the ever- rising population in Africa, sustainability becomes crucial in the rural development processes. Major issues to be explored include approaches to rural development, poverty trends in the rural regions of Africa and land reform as well as agrarian change. Other pertinent issues also include the role of rural off- farm activities, issues of natural resources and the environment, women and gender, traditional leadership, integrated rural development management, decentralisation and devolution of power. Students won't be armchair analysists of the rural development processes but will get to have practical experiences in tackling the rural development challenge in Zimbabwe through engagement with rural communities.

DPH 224 Water and Energy Security
Water and energy are basic components of life, economic growth and human progress. For the poor securing access to both water and energy is still the cornerstone of alleviation of poverty. For those states already on the road towards development, water and energy are needed to spur economic growth. Energy and water are intricately connected. All sources of energy including electricity require water in the production processes, the extraction of raw materials, cooling thermal process, cultivation of crops for biofuels and powering turbines. Energy itself is required to make water resources available for human use and consumption including irrigation, through pumping, transportation, treatment and desalination. Responses to both water and energy challenges need to be coordinated into an integral response.

DPH 225 Report Writing, Monitoring and Evaluation of Development Projects
This module covers the basic concepts, principles and major issues that arise in the monitoring and evaluation of development projects. It covers the rational, stakeholders in M&E, application, tools in M&E, Methodology, M&E designs, and E processes, RBM, Evaluation procedure and global best standards in evaluation

DPH 226 Basic Financial Management for Development Practitioners
The module introduces candidates to key accounting and financial concepts required to facilitate the process of practical development programming. The focus will be placed on dissecting accounting and financial issues that are enshrined in the financial policies of development entities like NGOs. The focus will be on budget formulation, budget tracking, procurement processes, accountability procedures and financial and accounting report writing.

DPH 300 Work- Related Placement Report
This is a preliminary report that a student compiles demonstrating his or her knowledge and understanding of the organisation to which he or she is attached. The student should be able to identify and describe the organisation where they have been placed for their work-related learning. The student should also be able to justify the relevance of the placement or organisation in relation to his or her programme of study. The student must understand and outline the organisation's history, organogram, mandate, mission, vision and objectives.
Students are also assessed for their understanding of work challenges and the sustainability of solutions they suggest.

DPH 301: Student's Work-Related Learning Report
DPH 302: Academic Supervisor's Assessment Report
DPH 303: Employer's Assessment Report

DPH 411 Conflict Management and Transformation
The module aims at making students get acquainted with conflict management and transformation programme plans that have been implemented in different countries around the globe and how they have assisted in resolving conflict. The major thrust of conflict transformation is to enable relationships of respect, cooperation and consent, and constructive means and norms for dealing with conflict. Students will be exposed to people- centred approaches to conflict management and

transformation. Key driving factors of conflict are going to be studied alongside actions meant to transform institutions that justify and reproduce direct, cultural and structural violence at the global, national and local levels. The module will aim to show how conflict management takes a pragmatic approach to conflict by constructing agreements and practices that allow people to effectively cooperate despite their differences. Instead of focusing on how a specific conflict can be resolved or transformed the module will aim at teaching students to rather offer strategies to mitigate a conflict's negative effects. Students will be expected to stay abreast of conflict management programmes that have been implemented in different countries as a way of resolving conflicts. At the end of the module, students will have learnt the importance of transforming cultures of violence into cultures of peace.

DPH 412 Environmental Management and Development
Environmental management is a requirement for development to take place without destruction or overuse of natural resources and to reduce pollution and degradation of nature. The module will enable students to understand the importance of the environment and how it requires proper management. The module aims to address the growing sustainability pressure and create innovative solutions towards a resilient environment and society. The earth's natural resources, the way in which human societies interact with them and ways in which they can be sustainably managed will be studied. Relevant policy frameworks will be used to address global environmental challenges and how to address them. Students will look into complex relationships between economic, social and environmental systems and learn how local actions can have global effects. Students will also become familiar with environmental and natural resource management objectives at different scales in different sectors and the management practices relevant to achieving them. Students will recognise the importance of preserving biodiversity and that healthy ecosystems are the foundation of economic and societal well-being. The course is centrally concerned with understanding deliberate efforts to translate environmental knowledge into action to achieve particular outcomes in the way landscapes and natural ecosystems are used and managed. Contemporary approaches to environmental policy- making, planning and management will be used. By the end of the module, the students will have a great understanding of environmental systems and processes and the policies and practices involved in their management.

DPH 413 Research Methods 2
The module seeks to equip students with research skills. The course deals with the formulation of research-based topics, how to gather data and how to present the data. The module also guides students on dissertation writing skills that refer to the formats used by the department.

DPH 414 Resource Mobilisation for Development Processes
Resource mobilisation refers to all activities undertaken by an organisation to secure new and additional financial, human and material resources to advance its mission. Students will learn how efforts to mobilise resources is the drive for organisational sustainability and how this positively impacts development initiatives. Students will learn the importance of identifying people who share values as the organisation or institution they are involved in and taking steps to manage that relationship. Resource mobilisation is a team effort, and involves the institution's commitment to resource mobilisation; acceptance of the need to raise resources; and institutionalising resource mobilisation priorities, policies and budget allocation. By the end of the module, students should be able to understand different ways of resource mobilisation and strategies that can be used.

DPH 421 NGO Management
Managing a non-governmental organisation requires several skills. It is important to understand the key factors in establishing an NGO and how to keep the NGO in operation. The NGO management course will equip students with skills on how to mobilise resources, innovation in programme or project design and how to design a strategic plan for an NGO. The course will also deal with how NGOs and states can better improve relations.

DPH 422 Strategic Management
Strategic management is the ongoing planning, monitoring, analysis and assessment of all necessities an organisation or institution needs to meet its goals and objectives. The module will prepare students for careers in managing organisational resources in government, profit and non-profit organisations. The Strategic Management course is designed to explore an organisation's vision, mission, examine principles, techniques and models of organisational and environmental analysis, and discuss the theory and practice of strategy formulation and implementation such as corporate governance and business ethics for the development of effective strategic leadership.

DPH 423 Development Policy Analysis, Design and Formulation
Students will be expected to understand policy development and policy analysis which will include problem identification, policy response and policy implementation. Government policies such as those that deal with poverty will be looked into. Students will be expected to highlight problems in communities and then identify potential policy options that could address the problem and then compare their options to choose the most effective, efficient and feasible one. Tools for policy analysis such as qualitative and quantitative research methodologies will be studied. Policy formulation and policy

design will also be studied. Factors that also affect the positive outcome of policies will be discussed. Comparisons of development policy analysis, design and formulation from different countries will be done.

DPH 511 Project Green Paper

This document involves the production of a project profile of at least 3 projects started by a candidate during their studies in selected communities. Using the project cycle as a framework *(from problem identification, appraisal, implementation, monitoring and evaluation)* the project green paper is a thorough description and assessment of the projects with a particular focus on the impact achieved by such projects. The desire is to deepen and sharpen the project management and practice prowess of students beyond reasonable doubt. Quality project green papers are premised on the ability to produce lamp lighting project ideas that aim to tackle critical development problems in communities; quality implementation methodologies and project sustainability strategies. Students will work with a supervisor who will be helping them formulate and implement cutting -edge development projects in given communities.

REGULATIONS FOR THE BACHELOR OF ARTS SPECIAL HONOURS DEGREE IN MONITORING AND EVALUATION (AH32)

Duration	1 year
Actual Credit Load	144
Minimum Credit Load	120
Maximum Credit Load	144
Total MBKS Credit Load	108
ZNQF Level	8

1.0. PURPOSE OF PROGRAMME

The purpose of this programme is to equip students with a sound and in-depth understanding of the theoretical and practical aspects of monitoring and evaluation. The programme provides valuable experience in the careful planning, preparation, research, analysis and writing required for high-level evaluation.

2.0. ENTRY REQUIREMENTS

Normal Entry: Candidates must Have obtained 5 'O' Level passes including English Language and Mathematics passed with at least a grade C and be in possession of a recognised Degree from a reputable university;
A candidate must have obtained a Diploma in Development related discipline or a recognisable relevant qualification from an acceptable institution in which development and/or monitoring and evaluation issues were involved.

3.0. PROGRAMME CHARACTERISTICS

The programme is offered on a module basis, and a dissertation is part of the fulfilment requirements for the programme. The programme is undertaken over a 1-year period under Block Release and Weekend School Programmes.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Since M&E is a cross -sectoral career, A Special Honors in Monitoring and Evaluation graduates stand to find employment in health, education, law and governance, human rights, youth -focused programming, and agriculture, amongst other focus areas. With a qualification in monitoring and evaluation, one can work in international organisations, government agencies, consultancies and also be a resource person in social science research. **One can also start their consultancy firm and in turn, employ others in the M&E field.** The course will help managers across various sectors with skills and knowledge in assessing, collecting and analysing data that is used in designing development programmes/projects.

5.0 PROGRAMME DELIVERY

Teaching is largely offered on a contract basis. However, online lectures will be adopted in line with the new international drive for cyber –based learning. Students are given ample practical exercises in line with the content of various modules.

6.0 LEARNING OUTCOMES

Upon completion of the degree, students should be able to:

1.1. Demonstrate an understanding of the major principles of monitoring and evaluation
1.2. Apply knowledge gained and skills acquired to formulate a monitoring and evaluation plan.
1.3. Carry out applied research using appropriate theories and methods in monitoring and evaluation.
1.4. Evaluate impact using qualitative and quantitative approaches.
1.5. Demonstrate knowledge and an understanding of the use of data analysis packages like SPSS and NVIVO.

7.0 GENERAL PROVISIONS

7.1 The degree programme offers pre-requisite, core/compulsory and optional modules.
7.2 At least four of the modules registered per semester should be from within the programme.
7.3 Normally, where a prerequisite module is involved, a candidate will be required to pass it before taking higher modules.
7.4 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".
7.5 Each module is worth 12 credits except the Project which is worth eight (24) credits and to graduate one has to attain a minimum of 120 credits.

8.0. PROGRAMME ASSESSMENT

8.1. Continuous Assessment: At least two (2) assignments per course constituting 30% of the total assessment mark

8.2. Written Examinations: A three (3) hours examination paper per module constitutes 70% of the examination total mark

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10.0. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0. DEGREE WEIGHTING

Refer to Section 11 of the Faculty Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University

13.0. PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Title	Credits
*HME 101	General Principles in Monitoring and Evaluation	12
*HME 102	Monitoring and Evaluation Planning	12
*HME 103	Data Collection Methods for Monitoring and Evaluation	12
*HME 104	Thematic Issues in Monitoring and Evaluation	12

Level 1 Semester 2

Code	Module Title	Credits
*HME 106	Computer Packages for Data Analysis in M&E	12
*HME 107	Impact Assessment Designs	12
*HME 108	Qualitative and Quantitative Methods in Evaluation	12
*HME 109	Monitoring and Evaluation in Emergency Situations	12
*HME 110	Report writing in Monitoring and Evaluation	12
*HME 111	Evaluation Report	24

14.0. MODULE SYNOPSES

HME 101 General Principles in Monitoring and Evaluation

This module will introduce students to the general principles of Monitoring and Evaluation, which will include defining monitoring and evaluation research. It will also discuss the main purposes of monitoring and evaluation. It will also examine the various types of evaluation including but not limited to formative and summative evaluations. Key monitoring and evaluation issues such as coherence, effectiveness, relevance, efficiency, impact and sustainability will be fore-grounded. Types of evaluation studies: experimental, quasi-experimental, qualitative, empowerment constructivist and realist approaches to evaluation will also be dealt with.

HME 102 Monitoring and Evaluation Planning

The module examines the planning requirements for an effective monitoring and evaluation system. Particular attention is given to the logical framework approach and how it is used in project planning and the setting of projects and monitoring and evaluation plans. The module also introduces students to logic models and logic modelling, including the development of programme theories. Students learn how to develop a project proposal with the correct monitoring and evaluation components including project goals, outcomes, outputs, activities and the relevant indicators of progress and means of verification. In the second part of the module, students learn about various steps in planning for an evaluation including the preparation of terms of reference, budgets, data collection and report writing.

HME 103 Data Collection Methods for Monitoring and Evaluation
This module examines the various types of data that a monitoring and evaluation practitioner may need to collect including the quantitative and qualitative data dichotomy. The module explores various data collection methods used in programme evaluation including but not limited to literature searches, programme document reviews, various types of observation, surveys, expert opinion, interviews, interactive beneficiary monitoring and focus group discussions. The module will also look at the remote data collection methods that enable the continuity of business despite of the context such as SMS surveys, interactive voice response surveys, and computer- assisted telephone interviews. Further, the determining factors in the selection of various data collection tools will be examined.

HME 104 Thematic Issues in Monitoring and Evaluation
Students will study pertinent issues in key development themes such as the definitions of development, gender issues, disability, HIV and AIDS, child rights, food security, climate change, poverty alleviation and governance, among many other developmental themes. Common indicators for progress in these thematic areas will be examined. The objective of the module is to familiarise students with key concerns in development interventions so that they are positioned to conduct effective evaluations in these various sectors. Best practices in these thematic areas will be discussed and debated.

HME 105 Introduction to Gender- Sensitive Monitoring and Evaluation
In this module, inter-linkages between monitoring and evaluation planning and the main elements of programme preparation and management within the context of gender will be examined. The course will also review key gender analysis frameworks in development processes in the programme life cycle focusing on needs assessments, programme design, programme theory and logic models and eventually ending with monitoring and evaluation plans. The module also introduces key concepts in the analysis of social relations between women and men in different cultural, economic and political contexts. The focus is on the implications of theory for policy and practice, and the need to theorise gender and development to create a more egalitarian society

HME 106 Computer Packages for Data Analysis in M&E
The module grounds students in key data analysis programmes used by computers including the Social Sciences Statistical Package, Microsoft Excel, Geographic Information Systems (GIS) and other programmes that may come into the market from time to time. A practical application is emphasised. Candidates in this module will learn how to apply computer packages in Monitoring and Evaluation data analysis. Basic statistical analysis (basic descriptive statistics/ statistical graphics/analysis of variance) will be made. Candidates will apply these methods to practical M&E requirements. Further to this, a qualitative analysis (content analysis/ thematic analysis and narrative analysis) for evaluation studies will be conducted using a qualitative data computer package.

HME 107 Impact Assessment Designs
This module focuses on impact Assessment designs as a key element of Monitoring and Evaluation. Key components of the module will include: the logic of making causal claims, the notion of causality in social interventions, quasi-experimental designs, comparison group designs and repeated measures designs and designing an impact assessment study. Various designs will be studied with particular reference to case studies.

HME 108 Qualitative and Quantitative Methods in Evaluations
This module covers basic qualitative and quantitative analytical methods required by Monitoring and Evaluation practitioners. Students will understand how to conduct qualitative data coding, thematic analysis, discourse analysis and other qualitative analysis methods in practice. Students will also be introduced to basic quantitative techniques used in evaluations particularly focusing on basic descriptive and inferential statistics.

HME 109 Monitoring and Evaluation in Emergency
This module covers the essential concepts which enable students to provide reliable information to timely AID decision-making and meet accountability decisions. The module looks at the monitoring and evaluation role in the humanitarian programme cycle and looks at the 7 steps to rolling out Monitoring and evaluation systems in Emergencies. The module will also equip students with skills on how to set up and implement simple (good enough) monitoring systems that generate an appropriate amount of qualitative and quantitative data on the quality, effectiveness, relevance and appropriateness of the emergency response that is timely, reliable and useful. They will also be equipped with knowledge on the use of monitoring system information for tracking progress against targets; assessing outcomes of interventions, including those that are unanticipated; making decisions; and producing evidence-based reports. Students are also equipped with skills on how to assess existing monitoring frameworks and systems to identify gaps, bottlenecks and opportunities.

HME 110 Report Writing in Monitoring and Evaluation

This module follows a systematic process of introduction to monitoring and evaluation ("M&E") reports writing and the importance of writing reports. Ideally, this module provides detailed information regarding M&E reporting. The M&E reports carry huge attention from the project stakeholders. The module will equip students with skills on how to structure their M&E reports appropriately, apply reporting principles while writing their M&E reports and Draw proper conclusions and recommendations. It is important for one to be able to present project achievements, results, facts and findings in a systematic way in the report.

HME111 Evaluation Report

This module requires candidates to undertake an empirical study linked to the monitoring and evaluation of a genuine development project. Students will undertake any type of evaluation of a project or programme i.e. formative, process, midterm, outcome or end-of-term evaluations. The report should include the programme theory, and the Logic model with the following components: goal, outcomes, outputs, activities, resources, immediate, intermediate and long-term outcome indicators. The length of the written project shall be approximately 15000 words. The dissertation will be done under the stewardship of an academic staff member in the department. The study will be presented using Times New Roman, Font size 12 and double- spaced

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN DEVELOPMENT PRACTICE (AH17)

Duration:	18 months
Actual Credit Load:	330
Minimum Credit Load:	270
Maximum Credit Load:	330
MBK Credit Load:	250
ZNQF Level:	9

1. PURPOSE OF PROGRAMME

The Master of Development Practice (MDP) programme prepares professionals for careers in sustainable development. It seeks to establish, sharpen and polish among MDP graduates, the technical knowledge and skills required to drive development locally, nationally and globally. It offers a strategic blend of theory and practice, with a strong emphasis on practice. This is in a bid to equip MDP graduates with knowledge, skills, and competencies essential for appropriate and effective engagement with stakeholders to address society's complex sustainable development challenges. MDP centres on engagement whereby students are taught to undertake inquiry and take action based on real development challenges faced in local and global settings. The programme is equally designed to produce practitioners and particularly, managers who have the technical skills and drive to formulate, grow and sustain thriving development entities and processes in the corporate, non-governmental and state spheres. It seeks to ensure that graduates will have the skills required to design and manage viable development programmes. Broadly, MDP thus fosters the integration of knowledge and practice that is necessary to address the grand and systemic development challenges confronting society and development practitioners today.

2. ENTRY REQUIREMENTS

- To qualify for enrolment into this programme, prospective students should have attained an Honours Degree in Development Studies, Development Practice or a related Social Science and Humanities discipline.
- Exceptions may be made for potential candidates who do not have the requisite programmes for entry but have traceable and ample experience at the management level in the world of development practice.

3. PROGRAMME CHARACTERISTICS

The programme is offered on a module basis, with a project paper submitted in partial fulfilment of the requirements of the programme.

4. CAREER OPPORTUNITIES

Masters in Development Practice graduates have career opportunities in a wide array of institutions and organisations which include the following: management in mainstream development organisations and agencies, Social research organisations, local and International Non-Governmental Organisations, donor agencies, local government, central government ministries and departments; private corporate entities and development consultancies and other self-employment ventures.

5. PROGRAMME DELIVERY

Teaching is offered on a face-to-face basis. However, online lectures will also be adopted in line with the new international drive for cyber –based learning. The bulk of the content will be practical and technical with students being given ample out-of-class practicums in line with the content of various modules.

6. LEARNING OUTCOMES

Candidates who go through this programme should be able to do the following:

6.1. Have an in-depth understanding of development theories and practical frameworks for development work.
6.2. Apply development principles and knowledge to practice at the middle to upper management level.
6.3. Design technical development interventions to respond to challenges facing the communities.
6.4. Produce high -level development programming documents at middle to upper management level.
6.5. Critically evaluate existing research in development issues and be able to carry out research independently.

7. GENERAL PROVISIONS

7.1. The number of modules taken by any student from outside the department may be restricted.
7.2. The offering of optional modules depends on the availability of staff and/or teaching loads of available staff.

8. PROGRAMME ASSESSMENT

8.1. Continuous Assessment: At least two (2) written assignments and three (3) practical exercises per course constituting 60% of the total examination mark.

8.2. Written Examinations: A three (3) hour -long examination paper per module constitutes 40% of the total assessment mark

9. PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

12. DEGREE WEIGHTING

Refer to Section 10 of the Faculty Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

13. PROGRAMME STRUCTURE

Level 2 Semester 1

Module Codes	Module	Credits
*MADP 825	Development Practice Paper	90

14. MODULE SYNOPSES

MADP 711 Conceptual Issues in Development Practice.

The module introduces students to the pertinent theories of contemporary development discourses. The focus of the module is to come up with a decisive definition of development that focuses on unveiling the indicators of development. The aim of the module is to use a constructivism centered approach to paint a vision and picture of what development should look like on the African continent. The module also gives an overview of the aspects involved in development practice as a basis for what is to come in the other modules.

MADP 712 Formulation and Administration of Development Entities.
This module is designed to impart among students the skills needed to form and administer development entities, which speak to the problems faced by developing countries. Such development entities include but are not limited to Non - Governmental Organisations and social entrepreneurship ventures. Students must acquire the capacity to start, grow and sustain development organisations that are relevant to the quest for sustainable development. The module aims to produce graduates who can identify areas in need of intervention, register development entities informed by such need, form effective boards of trustees, set up human resource policies, financial policies, standard operating procedures and sustainable strategies for the visibility and sustainability of such organisations. While learning from existing case studies, students will be taken through processes of actual formulation and administration of selected upcoming and established development institutions, respectively. By the end of the module, students must have engaged with selected development entities and produced an informed strategy document on how to form, grow and sustain a development entity of their proposition.

MADP 713 Resource Mobilisation Techniques for Development Practice.
This module focuses on training candidates to produce cutting-edge resource mobilisation strategies for development entities. The module explores and defines the concepts of resources and resource mobilisation before delving into the praxis itself. The module introduces students to the production of resource mobilisation documents like concept notes and project proposals using guidelines proffered by international donor agencies like USAID, DFID and the United Nations. The module goes beyond the conventional international donor- focused approach for mobilising resources to include the creation of strategies that focus on domestic resource mobilisation. Students will also learn how to produce effective reports and evidence records that tally with resource usage to satisfy donors' accountability and transparency needs and ensure sustained resource reception. Students will undertake practical learning in resource mobilisation through systematic exposure to selected NGOs, state and local government institutions, corporate entities and entrepreneurial establishments, among others. By the end of the module, students should be able to apply what they would have learnt during practicums to formulate informed resource mobilisation strategies.

MADP 714 Advanced Research Methodology for Development Practice
The module introduces students to the practical skills required in research for development practice. The module focuses on practical research approaches which necessitates field- work. The module thus includes practicums to expose students to research techniques they would need to undertake in development practice. Students will work with development organisations with which the Department of Development Studies has MOUs and other synergies to hone their research skills. In sync with these organisations, students will undertake baseline surveys, participatory research approaches, and set up community focus group discussions while utilising all the various research approaches. Students will also submit a research report outlining all the research processes they engaged with during their practicums with selected organisations.

MADP 715 Advanced Project Management Skills.
The module introduces students to the project cycle. The module takes students through the project cycle from problem identification to project evaluation and learning. Every stage of the cycle will be conversed with practical examples being proffered. The focus will be to equip students with the critical skills required to manage projects and produce imperative project documents required at various stages of the project cycle. The module will be based on project management standards proffered by international donor agencies like USAID, DFID, AU, EU and the United Nations. Students will deal with tangible practical case studies that will require them to solve intrinsic project management problems. By the end of the module, students must have contributed to designing, implementing, monitoring and evaluating a development project under assigned establishments.

MADP 716 Managing Climate and Environmental Changes
This course will examine the related issues of climate change and variability on one hand and environmental changes on the other. It focuses on the risks and socio-economic and environmental consequences of climate change. Students will explore key concepts, strategies and technologies for the prevention, mitigation and adaptation to the negative impacts of climate and environmental changes. While global case studies will be used, practicums will emphasise climate and environmental change policy designs and implementation approaches in Zimbabwe. Students will engage with mining, manufacturing, farming establishments among others to examine their specific environmental impacts, their policies and systems of controlling such impacts. They will work with relevant local and central government authorities as well as NGOs such as ZELA whose mandate is environmental and climate change management. Informed by a combination of in -class learning and practicums undertaken in collaboration with stakeholders, students must be able to design comprehensive environmental management plans which speak to the prevention and mitigation of well adaptation to climate change; critically assess management plans and suggest improvements; manage uncertainties that arise during the (technology, expenses, stakeholder expectations) development of management plans and their implementation.

MADP 721 Disaster and Crisis Management
Globally, there is an increased demand for communities and nations to sharpen their resilience to potential crises and disasters, particularly through using the principles of crisis and disaster management, disaster preparedness, response and recovery planning. This module engages students with the impact of crisis and disaster on community and national

development. It addresses the issues of interruption of socio-economic development, the need for preparedness; response and recovery strategies to minimise both economic and human losses arising from both natural and human- made disasters and crises. It also focuses on disaster and crisis data reviewing and communication. This includes current approaches to crisis and disaster communication which include ICT (especially social media). Students will acquire such skills through interaction with Zimbabwe's emergency planning and disaster management sector. They will undertake practicums under relevant entities to grasp the procedures, techniques, equipment and forms of organisation used in managing disasters and crisis- situations.

MADP 722 Advanced Financial Management for Development
The module focuses on key accounting and financial concepts required to facilitate the process of practical development. It dissects accounting and financial issues that are enshrined in the financial policies of development entities. Students will learn from government institutions, the farming sector and other enterprises as well as NGOs how to formulate and track multi-tier budgets; undertake procurement processes, transparency and accountability procedures as well and financial report writing. The module thus ensures that accounting and financial management standards from existing development institutions will be used as a basis of learning.

MADP 723 Applied Gender Mainstreaming in Development Practice.
The focus of the module is to teach students how to mainstream gender in development practice. The module exposes students to local and central government as well as donors and NGOs' systems of gender inclusion. Students will work with the various gender analytical frameworks and implementation tools utilised by these development institutions. They will be exposed to the Sarah Longwe, Social Relations, Moser and Harvard Analytical Frameworks among others. This emanates from the understanding that gender mainstreaming, from the institutional level to the community level, is a prerequisite for holistic development. By the end of the module, students must be able to draw from existing development projects and gender mainstreaming standards proffered by national and international institutions as a basis for learning. They must produce astute reports on gender mainstreaming as observed in the field.

MADP 724 Advanced Strategic Management for Development Entities
This module is based on the notion that sustainability is the ultimate indicator of good management and administration of development entities. For this to happen, good leaders of development entities must have good strategic planning and management skills. The module will introduce students to the fundamentals of strategic planning and plan implementation. Students must work with relevant organisations to construct cutting- edge strategic plans for such development entities and must demonstrate the ability to foretell operational environments for development endeavours.

MADP 725 - Human Rights, Socio-Economic Justice and Development (Optional Module)
The module helps to frame relevant problems that arise in particular economic, social, cultural or religious contexts and leads to a deeper analysis of such problems. Technical aspects such as social accountability, social protection, and economic justice programming will be explored. The module will be hinged upon the rights- based approach to development programming which upholds the notion that the process of achieving development is tantamount to the process of availing rights to people. The theory of change approach will also guide the module. The thinking is that social and economic justice should be life- changing ideals. Hence, the process of seeing social justice should be executed through the altering of social and economic systems towards the attainment of positive change. The expected outcome of the module should be students with highly critical analysis skills in the arena of human rights, social and economic justice as well as the practical skills to guide advocacy and actions towards the attainment of such.

MADP 726 -Food Systems Food Security (optional)
The module explores theories of food security as well as systems of food production, storage and for ensuring equitable access to food globally. The course covers the core bio-physical elements of food production which include land, soil, water and biodiversity. It then surveys a selection of different farming and other systems that provide food and livelihoods in different parts of the world. Students will particularly make participatory observations from commercial and smallholder farms of different types, including fisheries, in Zimbabwe. They should be able to identify the various hindrances to adequate food production in the Zimbabwean farming sector. They will also be exposed to food processing industries to physically assess their contributions to food security and the challenges faced in ensuring the same. Each student must submit a report comprehensively explaining the food systems, their contribution to food security and hindrances examined in the field and possible solutions.

MADP 825 – Development Practice Project/Dissertation
This document involves the production of a tangible report on a development practice initiative(s) that the student-initiated or introduced to address a telling development practice problem. The initiative can be a new approach to solving a critical development practice problem. Using the project cycle as a framework (from problem identification, appraisal, implementation, monitoring and evaluation) the development practice paper is a thorough description and assessment of the innovations introduced by the student to solve a critical development practice issue. The desire is to assess the extent

to which the student's development practice skills have been deepened and sharpened. Students will work with a supervisor who will help them to produce the paper.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN MONITORING AND EVALUATION (AH18)

Duration:	18 months
Actual Credit Load:	290
Minimum Credit Load:	270
Maximum Credit Load:	330
Maximum MBK/S Credit Load:	210
ZNQF Level:	9

1.0. PURPOSE OF PROGRAMME

The purpose of the programme is to churn out development planners, strategists and managers with advanced knowledge and skills in monitoring and evaluation. The programme seeks to produce highly skilled personnel in monitoring and evaluation, capable of designing, implementing and evaluating development programmes.

2.0. ENTRY REQUIREMENTS

To qualify for enrolment into this programme prospective candidate should have attained an Honours degree in Monitoring and Evaluation or Honours Degree in Development Studies or any first degree plus a Postgraduate Diploma in Monitoring and Evaluation or a related Social Science and Humanities discipline. Work experience in the field of Monitoring and Evaluation is an added advantage.

3.0. PROGRAMME CHARACTERISTICS

The programme is offered on a module basis, with a dissertation being part of the fulfiment requirements for the programme. The programme is undertaken over an 18-month period on a Block Release and Weekend School Programme basis.

4.0. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Masters in Monitoring and Evaluation graduates have career opportunities in a wide array of institutions and organisations which include the following: Mainstream development organisations and agencies, Social Science research organisations, Non-Governmental Organsations, Policy Analysts, Evaluation Consultants, Public Sector Management positions, Government Ministries and Departments.

5.0. PROGRAMME DELIVERY

Teaching is largely offered on a contract basis. However, online lectures will be adopted in line with the new international drive for cyber–based learning. Students are given ample practical exercises in line with the content of various modules.

6.0. LEARNING OUTCOMES

Candidates who go through this programme should be able to do the following:

6.1. Have an in-depth understanding of monitoring and evaluation theories and practical frameworks for development work

6.2. Apply monitoring and evaluation principles and knowledge to practice.

6.3. Design development interventions to respond to challenges facing the communities.

6.4. Critically evaluate existing research in development issues and be able to carry out research independently.

7.0. GENERAL PROVISIONS

7.1. The number of modules taken by any student from outside the Department may be restricted.

7.2. The offering of optional modules depends on the availability of staff and/or teaching loads of available staff.

8.0. PROGRAMME ASSESSMENT

8.1. Continuous Assessment: At least two (2) assignments per course constituting 30% of the total assessment mark

8.2. Written Examinations: A three (3) hours examination paper per module constitutes 70% of the examination total mark

9.0. PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

10.0. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

12.0. DEGREE WEIGHTING

Refer to Section 10 of the Faculty of Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees.

13.0. PROGRAMME STRUCTURE

14.0 MODULE SYNOPSES

MAME 701 Indicators and Measurement of Evaluation

The module seeks to take students through the vital functions of indicators that assist programme or project planners and implementers carry out assessment plans to determine the achievement of objectives. The module takes students through the processes of effectively and efficiently reviewing progress in development work, identifying problems and making appropriate adjustments for the achievement of intended outcomes. Tools and techniques used in measuring project or programme performance will also be dealt with in this module.

MAME 702 Public Policy and Policy Evaluation

This course is designed to introduce students to concepts surrounding public policy and policy evaluation analysis. Public Policy and policy evaluation attempt to assess the outcomes of policies, and their effects on society, to compare them with the policies' intended goals. It asks whether the goals have or have not been met, with what costs, and with what unintended consequences. It considers whether the policy is equitable and efficient and whether it has satisfied the interests demanding action. It will examine the various tools and stages of policy analysis and development that may be conducted in different governance contexts. The course will also review critical thinking skills associated with policy analysis work. This course also explores the tools and techniques of policy evaluation that is monitoring and evaluation tools within the public policy cycle.

MAME 703 Advanced-Data collection methods for monitoring and valuation

The module takes students through the philosophies of knowledge. This course introduces and discusses approaches, designs, statistical techniques and methods of evaluating development projects, programmes and policies. The focus is on developing analytical thinking skills, constructing appropriate evaluation questions, setting indicators and collecting

evaluation data for these indicators. The course will also equip students with an appreciation of the actual evaluation designs. Students who undertake this module will be equipped with practical skills in evaluation designs for projects, programmes and policy evaluation. Issues relating to validity, reliability and ethical considerations will be dealt with. To culminate in this final stage, students will be asked to carry out an evaluability assessment that will form the basis of future evaluation projects.

MAME 704 Advanced Statistics and Essential Packages for Evaluators
The module assists students to understand how they can make use of statistics to support evaluation endeavours. The module deals with measures of central tendency and variability, tests of statistical significance, relationships and correlations and how these could be used by evaluators for development programmes. The module also offers the opportunity to explore the preparation of data for computer analysis, using packages such as Excel and Statistical Package for the Social Sciences (SPSS).

MAME 705 Planning and Management for Monitoring and Evaluation
This module focuses on equipping students with knowledge and skills relating to project and programme management and evaluation. It intends to empower students with management techniques that enable monitoring of the achievement of a project or programme goals, dealing with stakeholders, managing work plans and timings, dealing with issues of risk, building effective teams and working with global and virtual teams. Making critical decisions is crucial in management and students need exposure to this. Good communication skills and the ability to manage resources and budgets are essential tools in managing a project or programme. Students will also be exposed to management processes and approaches such as Result-Based Management or Life Cycle approach to provide an edge towards success in project or programme outcomes.

MAME 706 Risk Management in Monitoring and Evaluation
The module examines the risk management designs in monitoring and evaluation, and the key steps and approaches to monitor and evaluate the adopted risk management options. It is designed to equip students with tools for Risk Analysis and Management as a key practice to ensure that the least number of surprises occur in the project life cycle.

MAME 707 Monitoring and Evaluation in Public Sector
The module equips students with knowledge and skills for effective monitoring and evaluation processes and tools in the public sector. Students will be brought to an understanding of the purpose or uses of monitoring and evaluation in the public sector. In this module, students will critically examine government officials' roles and responsibilities in public sector monitoring and evaluation of projects/programmes. The module will also deal with a Government-wide framework for monitoring and evaluation. Other areas to be covered by this module include project cycle and management, the role of indicators in project plans, data collection, analysis and statistical techniques for monitoring and evaluation, and performance management systems for the public sector.

M**AME 708 Environmental and Social Impact Assessments**
This is a development module that focuses on people and the environment in which they live. It aims to expose students to the various aspects of development intending to offer an in-depth understanding of sustainable development and livelihoods. Through this, module students develop an appreciation of the need to monitor and evaluate the resources available through a variety of strategies. Students are expected to use theoretical frameworks to come up with informed arguments on the dialectal relationship between people and the environment.

MAME 709 Monitoring and Evaluation Data Management
The module offers students with basic concepts in data management for monitoring and evaluation teams. Students will be exposed to an understanding of data management policies and procedures. Data capturing tools such as appropriate software will be dealt with. The module will give students some understanding of data management systems that are used in measurement and evaluation. Key concepts in data management such as data quality, data cleaning, data security and data sharing will be dealt with. Statistical measures used in data analysis and interpretation that assist students as researchers to process data into useful information will be exposed to students. These would include a measure of central tendency, a measure of variances and ratios. Students will further be exposed to varied data capturing and analysis packages such as GPRS, ODK, GIS remote sensing and Kobo toolbox among others. These packages will promote remote monitoring and evaluations to cater for third- party monitoring and evaluation.

MAME 710 Report Writing in Monitoring and Evaluation Practice
This course focuses on the key product of an evaluation: the evaluation report. In this course, students will learn best practices for effective and creative report writing specifically evaluation reports. Learning points and practical exercises are combined to develop skills in putting together an effective and engaging evaluation report. This course aims to provide students with writing skills specific to evaluation reports, key preparatory elements for an effective evaluation report as well as best evaluation principle structure, content and design.

MAME 801 Evaluation Report/ Dissertation

This module requires candidates to undertake an empirical study linked to the monitoring and evaluation of a genuine development project. Students will undertake a process or outcome evaluation of an ongoing or completed programme. The primary focus of outcome evaluations will be to assess whether the programme was able to deliver the intended benefits to the target population. The evaluation questions must relate to outcome evaluations. Process evaluations on the other hand should largely assess how the programme was implemented. The process evaluations will show whether a programme was implemented as planned. A process evaluation will further assess the different components of a programme individually based on the foregoing and other criteria. Likewise, the process evaluation questions must relate to process issues. Based on the evaluation type, project/ programme description and the logical framework, the student must produce a program theory (also known as the theory of change). The programme theory should be presented in its graphical form as opposed to a narrative form. The length of the written project shall be approximately 20 000 words (100 pages). However, the project must not exceed 120 pages including appendices. The evaluation dissertation will be done under the stewardship of an academic staff member in the Department. The study will be presented using Times New Roman, Font size 12 and double-spaced.

DEPARTMENT OF HISTORY, HERITAGE AND INTERNATIONAL STUDIES

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN HISTORY AND INTERNATIONAL STUDIES HONOURS (AH06)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	540
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

This programme seeks among other things to:

- To stimulate interest in and promote the study of history and International Studies through an acquaintance with the variety of theoretical and applied approaches to aspects and periods of history and a familiarity with differing interpretations of particular historical problems.
- Provide a supportive environment towards promoting the acquisition of knowledge and understanding of cause and consequence, continuity and change in human activity in Zimbabwe and beyond.
- develop essential study skills as a sound base for further study and the pursuit of personal interest in selected themes in international affairs.
- build on the strengths of a range of disciplines and programmes available to students through the University's concept of "Flexible Packaging".
- engage students intellectually and professionally in the critical analysis of international issues pertinent to the needs of the 21st Century.

2. ENTRY REQUIREMENTS

Normal Entry

For entry into the Honours in History and International Studies, candidates must satisfy the normal entry requirements specified in the Faculty Regulations and the General Regulations. In so doing, they must satisfy the following requirements: Must have obtained at least five 'O' Level passes or the equivalent, including English Language and History. Must have obtained a pass in History at 'A' Level and at least ONE of the following subjects or their equivalent:
Economics, Geography, Heritage Studies, Political Economy, Law, Divinity, Sociology, Literature in English, Shona, Ndebele or any other African Language

Special Entry

Refer to Section 3.2 of the General Academic Regulations for Undergraduate Degree Programmes.

Mature Entry

Refer to Section 3.3 of the General Academic Regulations for Undergraduate degree Programmes.

3. PROGRAMME CHARACTERISTICS

Areas of study

Modules discuss the history of Zimbabwe, Africa and the world from antiquity to the present. Students also choose electives, organised around different themes such as International Law, Peacekeeping and Peacebuilding in Africa, international relations and global history.

Specialist Focus Themes in African History, Research Methods, Demography, Land and Agrarian Studies, Nationalism, Africa in the 21st century Religion, international law, international relations and peace.

Orientation

The programme takes a multi-dimensional approach where field work, critical thinking and innovative research is emphasised.

Distinctive Features - Interaction with seasoned scholars (Sabbatical Fellows) and community experts.

- Grooming of versatile academics who can be problem solvers to contemporary challenges.
- A strong and active tradition of historical expertise
- Regular research seminars with visiting speakers

4. GENERAL PROVISIONS

- The Bachelor of Arts in History and International Studies Honours is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of first registration.
- At the Third Level of the degree programme, Honours students go on Work- Related Learning for 10-12 months.
- The degree programme offers core/compulsory and elective/optional modules.
- At least five of the modules registered per semester should be from within the programme.
- Normally, where a prerequisite module is involved, a candidate will be required to pass it before taking higher modules.
- Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".

- Each module is worth 12 credits except the dissertation which is worth 24 credits. To pass, a student is required to accumulate a minimum of 540 credits.
- 304 and 305 are worth 45 credits each while 306 is worth 30 credits

4 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates of History and International Studies will be able to pursue a variety of career options in administration, public leadership, research and consultancy, post-secondary teaching and the international civil service with regional and international organisations such as Southern African Development Community (SADC), the African Union (AU) and varied United Nations Organisation (UNO) agencies. They can be Archivists, Curators, Museum Workers Reporters, Correspondents, and Broadcast News Analysts

Further Studies

Master's and Doctoral Studies

6 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, field research, group work, work- related learning, research project.

7. ASSESSMENT METHODS

- To be admitted for formal examinations, a student must have satisfied continuous assessment in the form of In-class tests, group work presentations and individual written assignments, field and laboratory work.
- In the case of a dissertation, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of such dissertation, submitted at a date determined by the Departmental Board.
- Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.
- The final mark will be weighted as 25% for continuous assessment and 75% for examination.

8. PROGRAMME COMPETENCIES

Generic: • Multidisciplinary: Ability to draw appropriately from history and international studies to solve problems in Zimbabwe and the world at large.

•Qualitative and innovative approaches: To be analytic and descriptive in identifying new ways of solving historical and contemporary problems.

•Communication Skills: Ability to communicate effectively at all levels using ICT and other tools and appropriate communication tools and instruments.

•Ethical Commitment: Professional integrity ensuring involvement of stakeholders, transparency and accountability.

•Entrepreneurial Competencies: Ability to identify and create new business and employment opportunities which hinge on the subjects studied.

•Analysis and Synthesis: Ability to analyse historical and archaeological- related information based on empirical evidence.

9. LEARNING OUTCOMES

1. To provide a supportive environment towards promoting the acquisition of knowledge and understanding of cause and consequence
2. Ability to analyse and review historical texts
3. Ability to identify the link between history and what is happening internationally
4. Ability to provide a well-guided leadership for community-based research organisations
5. Ability to demonstrate knowledge and understanding of historical issues.
6. Ability to provide consultancy and support services to research institutions
7. Ability to facilitate research and publication in history and other academic journals
8. Ability to stimulate collaboration among existing academic institutions.

10.0. PROGRAMME ASSESSMENT (Describe and indicate percentage [%])

Coursework 25% is Coursework. A minimum of 2 assignments is expected from each student.
By thesis, Dissertation will carry 24 Credits
Written Examinations 75%
Other Dissertation/Research Project (100%). This is final research which is marked out of 100.

Basis of Allocating Credits

Activity	Time in Hours	Credits
Contact Time/Time on task per module		
Lectures	40	4
Tutorials	12	1
Field Visits	10	1
Laboratory Work	None	
Workshops	None	
Work Integrated Learning (WIL)/Industrial Attachment/Clinical Practice/Teaching Practice etc.	1200	120

HISH 304	Student's Work-Related Learning Report	45
HISH 305	Academic Supervisor's Assessment Report	45
HISH 306	Employer's Assessment Report	30

Level 4

Students in the fourth level are expected to do at least five modules in the first semester and three modules plus a dissertation in the second semester.

Level 4 Semester 1

HISH 431	Race, Class and Ethnicity in Africa	12
HISH 432	History of African Liberation Movements	12
HISH 433	African International Relations	12
HISH 434	Peacekeeping and Peace-building in Independent Africa	12
HISH 435	Indigenous Knowledge Systems in Africa	12

Level 4 Semester 2

HISH 441	Religion and Society in Africa	12
HISH 442	Zimbabwean History since Independence	12
HISH 443	African Diaspora and International Migrations	12
HISH 445	Research Project	12

Electives

HISH 444 Democracy and Human Rights in Africa 12

All electives will be on offer in any given semester. The Departmental Board decides on the modules to be taught in each semester.

MODULE SYNOPSIS

HISH 130 Research Methods

The module focuses on addressing the development of core research skills for advanced historical study. Through case studies analyses, the evaluation of different types of historical evidence, and the consideration of how valid research questions are formulated and applied, it is designed to refine the critical thinking, research, and writing skills that are fundamental to valid historical scholarship. This module is an introduction to research methods for students studying History and International Studies. It is aimed at acquainting the student with some major aspects of the discipline and its practice.

HISH 134 Economy and Society in Zimbabwe to 1890

The module is a survey of Zimbabwe's social and economic developments since the Early Iron Age, and then examines the origins and socio-economic structure of the early and later Shona states. Some of the states covered include Great Zimbabwe, Mutapa State, Torwa, Rozvi and Ndebele states. It ends with a discussion of the Nguni conquests of the 19th Century and the period of Treaties and Concessions with different white settlers which culminated in the colonisation of Zimbabwe.

HISH 133 Themes in African History

The module provides students with a general survey of social and economic aspects of African society from the origins of agriculture to the present. The aim of the module is to expose students to various interpretations of the past. Themes covered include state formation; long- distance trade; mercantile capital; slave trade; European imperialism, colonial administrative systems, colonial development policies and African reactions; the impact of Christianity and Western education; the growth of African nationalism and the struggles for independence.

HISH 137 Introduction to International Studies

The module provides a basis for students to deepen their understanding of an increasingly interdependent world and broaden their perspective on a variety of international topics. It introduces key concepts and approaches in international studies, examining important problems in the contemporary world from the historical perspective and related social science disciplines. The module enables students to understand why international events occur the way they do, why certain wars break out, why certain agreements benefit one nation more than the other or others and why certain countries are more prosperous than others. It analyses concepts of power, sovereignty, diplomacy and global governance in the international system.

CS 131 Basic Communication Skills

This module introduces the learner to the fundamentals of communication skills in an academic setting – speaking, listening, reading and writing. These include style and appropriateness, formal and informal styles of writing, organisation of writing, paragraphing, developing an argument, referencing and editing.

HCS 135 Introduction to Information Technology

The module is a course designed to familiarise students with the operation of computers and various application programmes and equip them to use computers in different areas of study as used in today's global environment. It presents the following concepts: Basic computer concepts, data processing cycle, number system, computer Arithmetic, types of

computers and computer applications. It also introduces topics such as computer hardware and software, file management, the internet, the social web, green computing, security and computer ethics.

HISH 139 Women in African History
The module explores the social, economic and political experiences of African women from pre-colonial times to the present. It examines African women's overlooked pre-colonial, colonial and post-colonial experiences, introducing students to theories of feminism and concepts such as gender and sex, gender sensitivity, gender equity and equality, affirmative action and gender mainstreaming. The module will consider women's political and military involvement in early pacification wars of colonial encroachment. It also interrogates measures that have been put in place by various domestic and international institutions to promote gender equity and equality. It will also focus on the measures that women have taken to assert themselves in society and African Historiography.

HISH 141 Introduction to International Relations and Diplomacy
The module introduces students to the concepts, theory and practice of international relations and diplomacy. The motive is to capture relations and networking of nations in the form of the inception of the idea of diplomacy to the contemporary world. It also equips students with the skills necessary to understand the subject matter. The main focus will be Africa and particularly Zimbabwe, though outside nations are also discussed.

HISH 142 History of International Law
The module exposes students to the dynamics of international law. The importance of international law lies in that it seeks to regulate relations between and among states. Issues of state sovereignty, diplomatic law and immunity will be examined since the task of international tribunals is to interpret wording used in international agreements. The module examines the place of the developing world particularly Africa in relation to international law.

HISH 143 Regional Co-operation in Africa
The module examines the growth and development of African efforts at regional co-operation in the form of groupings such as the AU, COMESA, SADC, ECOWAS, EAC and AMU. It discusses the socio-economic and political impact of such integration on member countries and third parties in general. It explores the role of these organisations in promoting peace and stability, social integration and assesses challenges that the organisations have encountered in relation to seeking economic sovereignty.

HISH 144 Pre-colonial Southern Africa
The module focuses on the development of pre-colonial societies in the Southern African sub-region as well as the complex socio-economic relations between such groups as the San, the Khoi Khoi, the Bantu, and the European intruders. The module examines specific themes such as long- distance trade in Southern Africa, the European occupation of the Cape, the Great Trek, The Portuguese interaction with African communities in Southern Africa, Mfecane and its effects, mineral discoveries and the beginnings of the industrialisation of South Africa and its impact on the region, the Scramble for, and colonial conquest of the region and African responses as well.

HISH 230 History of Zimbabwe 1890-1980
The module covers the period from the establishment of colonial rule to the present. It discusses, among other issues, the colonisation of Zimbabwe and early African resistance including the Anglo-Ndebele war of 1893-94 and the Chimurenga/Umvukela I, the establishment of the colonial economy under the B.S.A Company, the transition to settler rule, capitalist development, land apportionment and African dispossession, urbanisation and the growth of the manufacturing sector, the rise of trade unions and the beginnings of nationalism; the Federation of Rhodesia and Nyasaland, the ZAPU split and rise of ZANU, UDI and sanctions as well as the War of Liberation. It also looks at false starts to independence – the Internal Settlement and the creation of the Zimbabwe-Rhodesia Government, and lastly the Lancaster House Agreement and the coming of *Uhuru*-independence

HISH 232 Historiography and Historical Methods
The module introduces students to philosophical ideas and theories which found expression in history. This is a survey of the critical method of studying and understanding history from Renaissance and Enlightenment historiography to the specific interpretative strategies for the study of historical texts. The precursors of modern critical methods/theories such as Kant, Hegel, St Augustine and Descartes will form the background material. The module also covers the features of hagiographical writings, colonialist, Africanist and patriotic historiography. Students will also be exposed to historical data collection methods and various approaches to data presentation and analysis. The overall aim of the module is to develop the techniques of historical data collection, writing, formal appreciation and criticism of historical works.

HISH 233 Europe between 1789 and 1918
This module surveys the history of Europe from the French Revolution of 1789 to the end of World War 1. 1789 is critical in understanding issues of liberty, fraternity and human rights. These were subsequently improved and also challenged by the Napoleonic Wars, Concert of Europe, Congress system, revolutions and the Crimean War. Further, the unification of

Italy and Germany occupies a special position. The module also looks at how European diplomacy played out resulting in the formation of two hostile camps, the Triple Entente and the Triple Alliance. The module ends with an examination of the causes, course and results of the so-called World War I of 1914-1918.

HISH 234 History of East Africa

The module offers a broad exploration of major socio-political and economic developments in Eastern Africa from the time of the Khoi-San, Cushitic, Semitic and Bantu populations to the struggles for independence in the 20th century. The module unpacks and critiques the rise of agriculture and pastoralism in Eastern Africa. It further examines the development of trade in Eastern Africa and the interactions of East African communities with the Swahili-Arab traders during the trans–Saharan trade and their encounters with the maritime culture of the Indian Ocean and later European traders during the slave trade. The module further discusses the establishment of colonial rule and subsequent colonial socio-economic structures. It brings to the fore the fact that although colonialism was about the exploitation and control of the Africans and their natural resources by countries such as Britain, the Germans and the Portuguese, the Africans did not passively endure colonial restrictions and exactions. Africans devised several strategies ranging from resistance to subversion and negotiation to shape their lives. The module also reveals that although the colonial system sought to subject, control and transform Africans in many aspects, socially and economically, the process was not entirely transformative in that whilst East Africans appropriated and utilised Western technologies, adopted Christianity and Western education, in many respects, they maintained and retained some aspects of their pre-colonial traditions and cultures. The module ends with a discussion of the struggle for independence in Eastern Africa.

HISH 235 Developments in Southern Africa since 1870

The module is a survey of the history of Southern Africa starting from the early 1870s. It covers all countries in the Southern African region which include Angola, Botswana, Democratic Republic of the Congo (DRC), Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia and Zimbabwe. The module examines the experiences of African and white societies in the region since the discovery and exploitation of minerals in South Africa towards the end of the 1860s. It grapples with issues of the subjugation and exploitation of African communities by whites, race relations and in general how the colonial policies led to the loss of African sovereignty. It goes further to explore the indigenous people's resistance to colonial rule from the primary resistance movements to nationalist politics and liberation wars in the region. The post-colonial issues of governance, African politics, civil wars, human rights and democracy, economic instability, de-industrialisation, growing poverty, migration and xenophobia will also be covered. The emphasis of this course will be on understanding the roots of Southern African problems and encouraging students to find possible solutions to the challenges.

HISH 236 International Organisations since 1919

This module introduces students to a study of the role and significance of major international organisations in global politics. A number of major organisations, existing and defunct will be studied. For the defunct, the idea is to find out why they failed and learn from their mistakes s to strengthen the existing ones with noble objectives. For the existing ones, the idea is to learn their objectives, strengths and weaknesses and see how best they can be made to serve the interests of all. The International Organisations to be studied include (but are not limited to) the League of Nations, the United Nations Organisation; the European Economic Community/ European Union; the Organisation of African Unity/ the African Union, the Organisation of American States; the Arab League; the North Atlantic Treaty Organisation; the Warsaw Pact; the Organisation of Petroleum Exporting Countries, the Non-Aligned Movement.

HISH 237 USA since 1860

The module is a survey of socio-economic developments in the USA since the end of Civil War (1861-65). Special attention will be on the impact of the Civil War; the ordeal of Reconstruction America's role in World War 1; the Inter-War years and Franklin D. Roosevelt's New Deal recovery programme; foreign affairs; World War II and its aftermath; and the Cold War era. Furthermore, it discusses how the USA became a superpower and how she has used her position of influence in the 21st century.

HISH 238 Growth and Development of East Asian Economies

East Asia refers to countries including mainland China, Japan, South Korea, Singapore, Hong Kong, Taiwan and Macau. These are countries which as late as the mid-twentieth century remained non-industrial and poverty-stricken, but starting from the 1960s most of them defied an array of socio-political challenges and achieved a modern economic take-off which made East Asia one of the most important economic success stories now referred to as the "East Asian Economic miracle." There is no doubt that East Asia is now one of the most economically prosperous and technologically advanced regions in the world. This module therefore grapples with conflicting perspectives and insights behind the East Asian economic miracle. It analyses the set of factors and strategies which made this rate of economic growth possible. This is therefore a study of how each of these nations including the Four Tigers, achieved this feat over such a short space of time. Over and

above all, students will be expected to see what lessons African nations can draw from the experiences of the East Asian countries.

HISH 239 West Africa to Independence
The period covered by this module stretches from the origins of agriculture in West Africa to the attainment of independence in the 20th century. Topics include state formation, the Islamisation of West Africa and Islamic Revolutions, the Trans-Saharan trade, slavery, the Trans-Atlantic slave trade and Abolition, colonial administrative practices and economies, the growth of African Nationalism, and the struggle for national self-determination.

HISH 240 North Africa and the Middle East
The module surveys historical developments in the area stretching from Morocco in the West to Iran in the East and from Turkey in the North to Yemen in the South. It follows a broadly chronological and thematic approach to the period from the advent of Islam to independence. Emphasis will be placed on the social and economic impact of the relations between Israel and her Arab neighbours.

HISH 241 China since the Communist Revolution
The module grapples with the political, economic and social developments that obtained in China in the aftermath of the Communist Revolution. It examines Mao's attempts to fight capitalism and create a Communist state in China through revolutions such as the Agrarian Reform, Hundred Flowers Campaign, Great Leap Forward and the Great Proletarian Cultural Revolution among many other campaigns. It also examines the dangers of being a pariah state like what China was in the early years of the Republic. The module also explores the policies and economic strategies used by the new dispensation of Deng Xiaoping to transform an underdeveloped and poverty-stricken China into one of the most economically prosperous and technologically advanced countries. To this end, China's change of foreign policy from 'isolationism' towards 're-engagement' with other great economies and Deng Xiaoping's 'Four Modernisations' will be examined in greater detail. Issues relating to China's relations with the Soviet Bloc and the Western World and the One China Policy will also be explored. The module also focuses on the Belt and Road Initiative *aka* One Belt One Road Initiative (OBOR) and the growing 'all-weather' friendship between China and Africa since the days of the liberation struggle.

HISH 242 Labour and Capital in Africa
Labour is the key to production and without it no production is possible. The module focuses on the interaction between labour and capital from the establishment of colonial rule to post- independence era in Africa. It explores the processes of proletarianisation of the African labour force and how Africans either resisted or adapted to the new arrangements set by the colonial systems. Case studies will be drawn from countries across the continent to expose students to an in-depth appreciation of how labour and capital have interacted over the years. The module also interrogates the role of labour in the rise of African nationalism and how this shaped relations with Capital *(foreign investment)* and the post-colonial State. The relationship between labour and capital is also going to be understood in conjunction with their conflicting interests which have in many ways contributed to shaping the socio-economic and political trajectories of the continent. Thus, the role of the State as both a regulatory body and employer cannot be left out on issues of labour and capital. The module further provides broader discussion of the politicisation and militancy of labour and how this has (re)defined the role of State, labour and capital in Africa's social, economic and political developments. The module will conclude by interrogating the plight of workers during the COVID-19 pandemic.

HISH 243 Demography, Land and Agrarian Studies in Africa
The module begins by examining pre-colonial and colonial agricultural systems in Africa, as well as colonial land policies and their impact. It outlines the agricultural techniques that pre-colonial societies in Africa employed to prevent crop failures and to minimise the risk of famine. It also examines the role of the colonial state in promoting settler agriculture through the promulgation of segregatory land and labour policies, and the resultant fate of peasant agriculture. To enhance the student's understanding of Africa's agrarian issues, Africa's demographic history is also reviewed, with particular consideration being given to ecological factors affecting demographic trends in the past, and the economic and epidemiological impact of colonisation. Also Land conflicts between White settlers and African populations are analysed in East, Central and Southern Africa. A comparative assessment of the agricultural performance of the post-colonial state in Africa is provided. The module ends by looking at the question of drought and famine in Africa, with particular focus on the role of the state and International Aid, and a case study of the Sahel region is provided.

HISH 244 Western Europe since 1919
The module discusses the Western European events starting from the end of the First World War. It focuses on the Versailles Peace Settlement, failed attempts to prevent future world wars (League of Nations), the socio-economic upheavals of the inter-war period, the great depression, the rise of Fascist and Nazist dictatorships and how they reshaped European international relations up to the time of World War II. Special attention will also be paid to debates about the actual causes of WWII and its general conflagration. The module also looks at the political and economic re-organisation of European

powers after World War 2, with a focus on the impact of war, economic recovery strategies, and Western Europe's new alliances in response to the new Cold War politics.

HISH 245 African Heritage and Culture
This module explores African cultures and heritage with particular reference to Zimbabwe. It defines and contextualises the African people of Zimbabwe, their cultures, heritage and philosophies of life. The module also aims to sensitise Africans and Zimbabweans in particular to appreciate their cultures as resources for development. The rich and sacred heritage of Africa is of particular interest to cultivate critical consciousness for the nation. The module emphasises understanding and appreciating different African cultures and heritage. It carries an agenda that is in sync with decolonisation and an African renaissance.

HISH 246 The Military and Governance in Africa
The module attempts to analyse the role of the military in governance in Africa. The military has been a significant player in post-colonial African politics and governance and its role deserves thorough analysis. The module seeks to acquaint students with reasons why military rule and authoritarianism arecontagious in Africa.

HISH 247 Latin America and the Caribbean
This module offers a broad exploration of major political, economic and social developments in Latin America and the Caribbean. The module uncovers the agency of pre-conquest Latin American societies, the Inca Empire of Peru and the Aztecs of Mexico. The political, economic and social organisations of these pre-conquest Latin American societies will be analysed. In addition, the module will interrogate the agonising processes of the Spanish conquest of Latin America and the looting of natural resources. The module will develop and equip students with knowledge about under development of Latin America whilst foreign powers such as Europe and the United States of America benefitted. This has also created an endless chain of dependency. In Latin America colonial rule meant the oppression of small countries by the larger neighbors. Thus Latin America`s backwardness, dependency and poverty are an integral part of the history of world capitalism`s development.

HISH 305 Academic Supervisor's Assessment Report
HISH 306 Employer's Assessment Report

LEVEL 4

HISH 431 Race, Class and Ethnicity in Africa
The module examines the complexities of classical and modern debates on race, class and ethnicity, and their critique. It starts with definitions of these concepts and their contribution to social, economic and even political "crises" in Africa. It then looks at the intersection of race, class, and ethnicity with human social, political and economic interactions. It looks at various case studies of how these social relations influenced government or state policies at different historical phases in pre-colonial, colonial and post-colonial Africa. Clear cases to be studied include the Apartheid Policy in South Africa and the rest of colonial Africa, Rwandan Massacres, general political instability, civil wars and cases of genocide associated with these forces.

HISH 432 History of African Liberation Movements
The module focuses on African struggles against colonialism. It explores the strategies employed by Africans in the decolonisation process such as constitutional settlements and liberation wars paying particular attention to their strengths and weaknesses. The module covers topics on decolonisation movements in different African countries, armed struggles for independence in various countries on the continent, ideological inclinations of the liberation movements, their transnational links and legacies of African liberation movements.

HISH 433 African International Relations

The module focuses on Africa's relations with the international community since the colonial period. It traces how Africa's integration into the world capitalist system in an unevenly balanced core-periphery relationship (where Europe was the core and Africa the periphery) continues to shape relations between Africa and the international community. As one of its key goals, the module emphasises the interrogation of factors sustaining Africa's weaker status in global politics despite being globally the largest regional bloc. It further looks at the aspect of growing foreign intervention in African affairs from the time of independence. The module also explores Africa's interaction with various international organisations and the efforts Africa is making to create a world order beneficial to its leaders and citizens.

HISH 434 Peacekeeping and Peace-building in Independent Africa

The module dwells on and analyses the two broad concepts of peacekeeping and peacebuilding in Africa with much of the focus being on the post-independence period. It looks in general at the causes and recurrent nature of conflict situations in Africa. With the use of detailed case studies of countries/communities from across the sub-regions of the continent, the module then tackles the roles, operations, mechanisms and the effectiveness and limitations of local, sub-regional, continental and international organisations/actors in executing peacekeeping and peacebuilding initiatives. While 'modern' approaches and strategies in promoting and building peace constitute a crucial component of this study, students are equally expected to critique the utilisation of indigenous/ traditional approaches, institutions and mechanisms for peacebuilding in Africa and how these can be blended in some scenarios with the 'modern-day, Eurocentric' ones.

HISH 435 Indigenous Knowledge Systems in Africa

The module considers Indigenous Knowledge Systems (IKS) in African Development. It examines the interaction of African IKS with the European systems and the effect on both cultures. The module also examines the re-emergence of IKS in independent Africa and the different theories of development. The module aims to examine the knowledge systems, ways of knowing and worldviews indigenous people in Africa have constructed and drawn upon in relation to the context in which they are situated, explore ways in which IKSs have been adopted to meet the contemporary imperatives of African people, review epistemological structures that distinguish IKSs from other knowledge systems, examine characteristics associated with IKSs of African people and analyse some of the cultural considerations that come into play as indigenous people become Westernised.

HISH 441 Religion and Society in Africa

Africa has seen major political and societal transformations from the age of colonial imperialism to the present diversity of post-colonial governance, economic development, and societal cohesion. Religions have been a vital and often under-studied factor in these transformations and are equally interwoven with present-day African politics and societies, perhaps more than anywhere else in the world. The module examines the relationship between religious and political/social developments in Africa by way of concrete regional examples from the pre-colonial era to present issues, thereby carving out historical continuities and contingencies as well as regional commonalities and differences. Special attention is given to African traditional religion, Christianity and Islam. With regard to Christianity students learn about the role of missions in colonialism, the appropriation of Christianity by Africans in independent movements, and the surge of Pentecostalism in recent post-colonial Africa. With regard to Islam, the module will demonstrate in particular the divergent colonial strategies in governing Muslim societies, the rise of Islamic reform movements, and the contested role of Islam in the political configuration of post-colonial African states. The module also takes a close look at the variability of interreligious relations in post-colonial African nation- states, and the interrelation of religious conflict with historical, ethnic, economic, and political factors. Following mainly a historical outline, the module introduces different disciplinary approaches in the study of religions by drawing from anthropological, sociological, political, historical, and theological sources. Students learn to critically discuss each approach and how they are connected to the formation of colonial and post-colonial knowledge about religion, power, and society in Africa.

HISH 442 Zimbabwean History since Independence

The module's main focus is to assess the efforts of the black majority government to address the nation's socio-economic and political challenges some of which are a legacy of colonialism. It also looks at how Zimbabwe has interacted with the international community. The module therefore covers areas that include: the fruits of independence in the political and socio-economic spheres, economic challenges and adoption of the Economic Structural Adjustment Programme (ESAP) and political developments resulting from the economic meltdown. It also focuses on Zimbabwe's revolutions for total emancipation in the 21st century, where the focus will be on its indigenisation programmes with a greater focus on the land reform programme. Lastly, it focuses on the rise of the Second Republic (New Dispensation) and assesses its economic, social and political reforms.

HISH 443 African Diaspora and International Migrations

The module aims to help students explore, examine, and critically analyse the African presence in a global context, and to investigate the historical and cultural linkages between African and African Diaspora people. This presence stretches back to antiquity in Europe and Asia, and for centuries in the Americas, and seeks to make students understand the profoundly rich, dynamic, and complex contributions to the world's civilisations that have been made by Africans. It therefore examines the different contextual frameworks within which people from different parts of the African continent have voluntarily

and/or involuntarily migrated out of Africa at different periods throughout modern history, from ancient times, through the era of the international slave trade, to contemporary extra-continental migrations. The module further addresses the black experience in Asia, Europe, the Caribbean, Latin America, and the United States and explores the historical experiences and contributions of the African Diaspora in the modern world. The second part of the module examines the primary reasons for intra-continental **historic dispersals:** the trading diasporas, the slave diasporas; the conquest diasporas; the refugee diasporas and the pastoral diasporas; and the **new** or **contemporary** 'voluntary' and involuntary African dispersals across national borders within the African continent. The module introduces students to a broad range of related scholarship.

HISH 444 Democracy and Human Rights in Africa
The module seeks to capture the study and developments associated with democracy and the rights of the African people. It traces the way democracy and human rights were conceptualised, promoted, protected and even violated during precolonial, colonial and post-colonial Africa. Narratives by cultural relativists, western scholars and those who regard human rights as by-products of people's struggles will be analysed. The module will also focus on the successes and challenges of open the post-colonial pandora box in terms of promotion and protection of the rights of the African people.

HISH 445 Research Project
This is a paper of between 10 000-15 000 words, based on wide research with the assistance of a supervisor. Its weight is equivalent to that of two core modules. The dissertation should be presented to a panel of the Departmental Board which determines its core.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN HISTORY AND HERITAGE STUDIES (AH05)

Duration:	4 years
Minimum Credit Load:	480
Maximum Credit Load:	540
Total MBKS Credit Load:	384
Actual Credit Load	494

1.0 PURPOSE OF THE PROGRAMME

The degree programme is designed to achieve the following objectives:

1.1 To develop clearer images of our past, our heritage and appreciate the change the world is going through.
1.2 To help us sharpen our critical acumen, think, reflect, make decisions as well as appreciate the great things that have been done in the past (as well as the mistakes) within the framework of our heritage.
1.3 To shape a Zimbabwean student who engages in scholarship, starting from a Zimbabwean and African heritage perspective.
1.4 To engage students intellectually and professionally in the critical analysis of cultural and heritage issues pertinent to the needs of the 21st Century.
1.5 To develop students who can turn history and heritage knowledge into goods and services.

2.0 ENTRY REQUIREMENTS

2.1 Normal Entry

For entry into the Honours in History and Heritage Studies, candidates must satisfy the normal entry requirements specified in the Faculty Regulations and the General Regulations. In so doing, they must satisfy the following requirements: Must have obtained at least five 'O' Level passes or their equivalent, including English Language, History and Heritage Studies. Must have obtained a pass in History or Heritage Studies at 'A' Level and at least ONE of the following subjects or their equivalent:

Economics, Geography, Political Economy, Law, Divinity, Sociology, Literature in English, Shona, Ndebele or any other African Language

2.2 Special Entry

Refer to Section 3.2 of the General Academic Regulations for Undergraduate degree Programmes.

2.3 Mature Entry

Refer to Section 3.3 of the General Academic Regulations for Undergraduate degree

Programmes.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREA OF STUDY

Modules discuss the history, culture and heritage of Zimbabwe and Africa from antiquity to the present. Students also choose electives, organised around different themes such as History and International Studies, History and Archaeology and Digital Archiving and Historical Information Management

3.2 SPECIALIST FOCUS

Pre-colonial African history and heritage, African philosophy and thought, colonial heritage, liberation heritage, indigenous knowledge systems, African environmental heritage, democracy and human rights, and conflict and crisis management in Africa.

3.3 ORIENTATION

The programme takes a multi-dimensional approach where field work, critical thinking and innovative research are emphasised.

3.4 DISTINCTIVE FEATURES

3.4.1 Interaction with seasoned scholars (Sabbatical Fellows) and community experts.
3.4.2 Grooming of versatile academics who can be problem solvers to contemporary challenges.
3.4.3 A strong and active tradition of historical expertise
3.4.4 Regular research seminars with visiting speakers

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of History and Heritage Studies will be able to pursue a variety of career options in administration, public leadership, research and consultancy and post- secondary teaching. They can be Archivists, Curators, Museum Workers, Reporters, Correspondents, and Broadcast News Analysts, MA and PhD studies in History and Heritage Studies

5.0 PROGRAMME DELIVERY

Online lectures, face-to-face lectures, tutorials, seminars, field research, group work, work- related learning, research projects, and individual independent study

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate shall be able to:

6.1 Analyse and review historical texts
6.2 Make decisions as well as appreciate the great things that have been done in the past within the framework of heritage
6.3 Turn history and heritage knowledge into goods and services
6.4 Demonstrate knowledge and understanding of historical and heritage issues.
6.5 Provide consultancy and support services to research institutions
6.6 Facilitate research and publication in history, cultural, heritage and other academic journals
6.7 Stimulate collaboration among existing academic institutions.
6.8 Make initiatives that address the many challenges of the world such as wars, diseases, environmental challenges and other conflict situations.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Arts in History and Heritage Studies Honours is a full-time Degree Programme. Normally, a student will be required to complete the programme In not less than four years from the date of first registration.
7.2 At the Third Level of the degree programme, Honours students go on Work- Related Learning for 10-12 months.
7.3 The degree programme offers core/compulsory and elective/optional modules.
7.4 At least five of the modules registered per semester should be from within the programme.
7.5 Normally, where a prerequisite module is involved, a candidate will be required to pass it before taking higher

modules.

7.6 Students can include in their programme of study, modules offered by other departments, in line with the University's concept of "Flexible Packaging".

7.7 Each module is worth 12 credits except the research project which is worth 24 credits. To pass, a student is required to accumulate a minimum of 540 credits.

7.8 301 and 302 are worth 45 credits each while 303 is worth 30 credits

8.0 PROGRAMME ASSESSMENT

The overall assessment shall be based on continuous assessment and formal examinations.

8.1 **Continuous Assessment**.

A student must have satisfied continuous assessment in the form of In-class Tests, Tutorial Presentations and individual written assignments, field and laboratory work

8.2 Examinations

Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.

8.2.1 Each module will be examined by a paper which is at most three hours long.

8.2.2 The final mark will be weighted as 25% for continuous assessment and 75% for examination.

8.3 In the case of research projects, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of such research projects, submitted at a date determined by the Departmental Board.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate degree programmes.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes

13.0 PROGRAMME STRUCTURE

Code	Module Description	Credits
Level 1 Semester 1		
*HHSH 130	Research Methods in History and Heritage Studies	12
*HHSH 131	Pre-colonial History of Southern Africa	12
*HHSH 132	Introduction to History and Heritage Studies	12
HHSH 133	Introduction to African Indigenous Knowledge Systems	12
CS 131	Basic Communication Skills	12
HCS 135	Introduction to Information Technology	12
Level 1 Semester 2		
*HHSH 140	History of Zimbabwe to 1890	12
HHSH 141	African Philosophy and Thought	12
*HHSH 142	The Rock Art of Africa	12
*HHSH 143	African Cultures and Heritage	12
*HHSH 144	The Colonial Heritage	12
*CS 132	Extended Communication Skills	12
Electives		
*HHSH 145	China since the Communist Revolution	12

Level 2

At Level 2, students are expected to study at least five modules per semester

Level 2 Semester 1

*HHSH 231	Women and African Heritage	12
*HHSH 232	African Liberation Heritage	12
*HHSH 233	Zimbabwean History Independence	12
*HHSH 234	History and Theories of Heritage Management	12
*HHSH 235	Historiography and Historical Methods	12
*ENT 131	Entrepreneurship	12

Electives

*HHSH 236	Growth and Development of East Asian Economies	12
*HHSH 237	Southern Africa since the Minerals Revolution	12

Level 2 Semester 2

*HHSH 241	Cultural Heritage, Tourism and Development	12
*HHSH 242	Heritage Inventorying and Archiving	12
*HHSH 243	African Environmental Heritage	12
*HHSH 244	African Dance and Music	12
*HHSH 245	Medical History in Africa	12

Electives

*HHSH 246	The Military and Governance in Africa	12
*HHSH 247	Demography, Land and Agrarian Studies in Africa	12

***Level 3 Semester 1 Work -Related Learning**

HHSH 300	Student's Work- Related Placement Report	15

Level 3 Semester 2: Work- Related Learning

HHSH 301	Student's Work-Related Learning Report	45
HHSH 302	Academic Supervisor's Assessment Report	45
HHSH 303	Employer's Assessment Report	30

*Students in the fourth level are expected to do at least five modules in the first semester and three modules **plus a dissertation** in the second semester.*

Level 4 Semester 1

*HHSH 431	Heritage Based Philosophy	12
*HHSH 432	Culture, Heritage and Intellectual Property Rights	12
*HHSH 433	Indigenous Knowledge Systems in Africa	12
*HHSH 434	Heritage Management and Sustainable Development	12
*HHSH 435	African Spirituality and Heritage	12

Elective

HHSH 436	Africa in the 21st Century	12

Level 4 Semester 2

*HHSH 441	Conflict and Crisis Management in Africa	12
*HHSH 442	Constitutionalism, Democracy and Human Rights in Africa	12
*HHSH 443	Marketing Cultural Heritage	12
*HHSH 445	Research Project	24
Elective		
HHSH 444	Zimbabwean History since Independence	12

MODULE SYNOPSES

HHSH 130 Research Methods in History and Heritage Studies
The module focuses on addressing the development of core research skills for history and heritage studies. This module forms the basis for research skills and takes students through the sources of history, applying source criticism and delineating the strengths and weaknesses of each source of history. Writing skills fundamental to valid historical scholarship are taught. By the end of the course, students will be acquainted with major aspects of the discipline and its practice.

HHSH131 Pre-colonial History of Southern Africa
This module compares and contrasts the archaeological traditions in Southern Africa, with a particular focus on Zimbabwe. The course traces the development of human societies, from foragers of the Early to Middle Pleistocene, through gatherers and hunters of the Middle, Late and Terminal Pleistocene, and the Holocene within Southern Africa. A review is made of the evidence from Southern Africa that suggests that Southern Africa is the Cradle of Humankind responsible for the development and/or advent of modern human beings and modern human behaviour. The module also assesses the level of archaeological development in each of these countries in terms of research done, the archaeological infrastructure, public education with regard to the past, and the use of the past in shaping the present and future.

HHSH 132 Introduction to History and Heritage Studies
This module is an introduction to the themes and methods of history and critical heritage studies as an interdisciplinary field of study. It introduces what cultural heritage is and exposes students to the country's cultural property, thus the tangible and intangible attributes of society, inherited from the past, maintained in the present and bestowed for social, economic and political advancement. Students are introduced to the identity, preservation and safeguarding of African and Zimbabwean values (ubuntu/hunhu) and heritage in its diverse forms. It enables students to be able to demonstrate the relationship between heritage, contemporary and global challenges. It also fosters the ability to reflect on the role of historical and social context in contemporary problems related to cultural heritage and describe how they are approached and managed.

HHSH 133 Introduction to African Indigenous Knowledge Systems
This module serves as an introduction to IKS in general. It discusses the various definitions of IKS and makes a survey of a variety of knowledge forms of the indigenous people that range from the social to the scientific as well as from the religious to the political. In this module, indigenous education practices and the means through which education is imparted to the younger generations are explored, together with how oral art as a formof education media can be tapped into for the financial benefit of the indigenous communities from which they come out. The module also examines the interface between IKS and Indigenous religion as well as the contribution of IKS in defining the African being. It also discusses how IKS can be managed and integrated into the school system.

CS131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

HCS135 Introduction to Information Technology

.**HHSH 140 History of Zimbabwe 1890- 1980**
The module is a survey of Zimbabwe's social and economic developments since the Early Iron Age, and then examines the origins and socio-economic structure of the early and later Shona states. Some of the states covered include Great Zimbabwe, Mutapa State, Torwa, Rozvi and Ndebele states. It ends with a discussion of the Nguni conquests of the 19th Century and the period of Treaties and Concessions with different white settlers, culminating in the colonisation. The module also covers the period from the establishment of colonial rule to the present. It discusses, among other issues, the establishment of the colonial settler economy, capitalist development; land apportionment and African dispossession; urbanisation and the growth of the manufacturing sector, trade unions and the beginnings of nationalism; the Federation of Rhodesia and Nyasaland; UDI and sanctions as well as the War of Liberation. For the postcolonial period, the focus is on reconstruction and the socialist experiment, the land question and rural development, the role of transnational corporations and NGOs, as well as the genesis and impact of ESAP on the social and economic fabric of Zimbabwean society.

HHSH 141 African Philosophy and Thought
The module empowers students with arguments on debates on African philosophy that have been dominated by Eurocentric minds whose arguments were riddled with prejudices and chauvinism. This module also aims to record, deconstruct and reconstruct the principles of the philosophy of the Africans in a genuine and objective way. The module also focuses on reclaiming African dignity and its lost glory. It underscores critical thinking by Africans on their experiences in the world in which they live. It is a response to debates that questioned the existence of African philosophy. In these debates, Eurocentric scholars openly made pronouncements and claims against Africans' ability to reason and philosophise. Areas of emphasis are the concept of African cosmology, Unhu/ Ubuntu, values, and the African philosophy debate. A critical interpretation, analysis and evaluation of these issues cultivates critical thinking in students making them understand who they are, why they are, where they are and their African human dignity in the contemporary world.

HHSH 142 The Rock Art of Africa
This module explores the earliest rock art found in the southern region of Africa which was done by the hunter-gatherer San/Bushmen communities, precisely in countries like Zimbabwe, South Africa, Lesotho, Swaziland, Mozambique, Zambia, Malawi and Namibia). It explores the strategies which rock art specialists in Southern Africa have used in the conservation, treatment and interpretation of this special kind of heritage. It helps the learners appreciate that through the study of rock art, scholars can deduce the social life, political organisations and economic activities of the groups that made the art. This module also highlights the authors of the art, rock art traditions, the nature of rock art (engravings and paintings), painting styles (polychrome, bi-chrome, shaded polychrome and monochrome), dating methods and the meanings that have so far been proffered for rock art.

HHSH 143 African Cultures and Heritage
This module explores African cultures and heritage with particular reference to Zimbabwe. It defines and contextualises the African people of Zimbabwe, their cultures, heritage and philosophies of life. The module also aims to sensitise Africans and Zimbabweans in particular to appreciate their cultures as resources for development. The rich and sacred heritage of Africa is of particular interest with a view to cultivate critical consciousness for the nation. The module emphasises understanding and appreciating different African cultures and heritage. It carries an agenda that is in sync with decolonisation and an African renaissance

HHSH 144 The Colonial Heritage
This course aims to unravel the colonial experiences and all the injustices that came packaged withthem . It highlights the institutions and organisational structures that accompanied the settler rule, bringing out the various ways by which they all worked towards achieving the imperialists' dream in Africa. The settler aspiration was to maximise exploitation of resources and accumulation of wealth. The courses highlight the brainwashing, marginalisation, dehumanisation and displacement of the indigenous people from their habitable and productive land or areas of settlement. This module also walks students through the colonial experiences of the Zimbabwean communities. It will trace colonialism from the Berlin conference right up to the attainment of Independence in 1980. Development that occurred in the post -independent nation will be highlighted. Major historical events such as the establishment of ESAP, the land revolution, and reforms in other key areas such as mining will be placed under the spotlight.

HHSH 145 China since the Communist Revolution
The module grapples with the political, economic and social developments that were obtained in China in the aftermath of the Communist Revolution. Issues relating to China's relations with the Soviet Bloc, the Western World and Africa will also be analysed. The values and norms established since the Chinese revolution are considered a heritage that has seen the country's stability socially, economically and politically.

CS132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

HHSH 231 Women and African Heritage
The module explores the experience of African women in relation to heritage since the pre-colonial period. It introduces students to basic concepts and approaches to gender relations and how this has affected women in their spheres of life. This module examines how some religious and cultural practices enhance human life and how some are misused to deny rights. It demonstrates that culture and tradition are not static but open to re-interpretation, reinvention or re-imagining.

HHSH 232 African Liberation Heritage
This module is a study of the history and legacy of the liberation of Africa from the period of the independence movements through to the 21st century. It underscores the contribution of the African people and their institutions to the liberation of the continent and the heritage born out of the struggle. It takes the students from the period of the early signs of resistance

against colonial rule up to the full-fledged wars of liberation. The great thinkers who championed the emancipation process and their ideas are to be interrogated. The legacy created out of the emancipation process shall be studied i.e. the land, detention camps, heroes, monuments as well as the independence itself. The heritage shall also be studied in relation to the global and changing world to keep heritage institutions technologically current and relevant in these changing times. The module is designed to impart to students the African ethos and values that shape and mould the African world view. It also equips students with the requisite skills and expertise to protect their hard-won independence and legacy.

HISH 233 Zimbabwean History to Independence

The module focuses on the social, economic and political developments since independence. The achievements and failures of the post-colonial government are discussed with the view of building upon these issues for the achievement of a prosperous Zimbabwe. Historical and heritage approaches will be emphasised to examine the trajectories of the country with regard to its history, culture and heritage. Heroes and heroines and their contributions to the country will be discussed. By the end of the course, students are expected to be able to appreciate the successes and challenges the country has been facing since independence and be able to suggest possible solutions to the country's predicaments.

HHSH 234 History and Theories of Heritage Management

The module covers the development of African heritage institutions and future perspectives. Areas to be covered include how museums are established, institutional frameworks in which African museums are operating, museum structure and the legal context. Emphasis will be on the African museum practice. African Cultures and Heritage This module explores African cultures and heritage with particular reference to Zimbabwe. It defines and contextualises the African people of Zimbabwe, their cultures, heritage and philosophies of life. The module also aims to sensitise Africans and Zimbabweans in particular to appreciate their cultures as resources for development. The rich and sacred heritage of Africa is of particular interest to cultivate critical consciousness for the nation. The module emphasises understanding and appreciating different African cultures and heritage. It carries an agenda that is in sync with decolonisation and an African renaissance.

HHSH 235 Historiography and Historical Methods

The module introduces students to philosophical ideas and theories which found expression in history. This is a survey of the critical method of studying and understanding history from Renaissance and Enlightenment historiography to the specific interpretative strategies for the study of historical texts. The precursors of modern critical methods/theories such as Kant, Hegel, St Augustine and Descartes will form the background material. Overall, the module aims to develop the techniques of formal appreciation and criticism of historical works.

ENT 131 Entrepreneurship 1

HHSH 236 Growth and Development of East Asian Economies

East Asia refers to countries including mainland China, Japan, South Korea, Singapore, Hong Kong, Taiwan and Macau. These are countries which as late as the mid-twentieth century remained non-industrial and poverty-stricken, but starting from the 1960s most of them defied an array of socio-political challenges and achieved a modern economic take-off which made East Asia one of the most important economic success stories now referred to as the "East Asian Economic miracle." There is no doubt that East Asia is now one of the most economically prosperous and technologically advanced regions in the world. This module therefore grapples with conflicting perspectives and insights behind the East Asian economic miracle. It analyses the set of factors and strategies which made this rate of economic growth possible. This is therefore a study of how each of these nations including the Four Tigers, achieved this feat over such a short space of time. Over and above all, students will be expected to see what lessons African nations can draw from the experiences of the East Asian countries.

HHSH 237 Southern Africa since the Minerals Revolution

The module covers the history of Southern Africa starting from the Minerals Revolution. It covers all countries in the Southern African region which include Angola, Botswana, Democratic Republic of the Congo (DRC), Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia and Zimbabwe. The module examines the experiences of African and white societies in the region since the discovery and exploitation of minerals in South Africa in the 1860s. Emphasis will be placed on the transformations of African societies following the discovery of minerals and the establishment of colonial rule in the region. The contribution of the colonial policies to the loss of political and economic sovereignty of these people will be examined in detail. The module also traces the evolution of the indigenous groups' response to colonial rule from the violent primary resistance movements to moderate early protest movements, and nationalist politics right up to the radical and more violent liberation wars in the closing phases of colonial rule. The module further analyses the political and socio-economic developments in Southern Africa in the independence or post-colonial era focusing on issues of governance, African politics, civil wars, issues of human rights and democracy, economic instability, de-Industrialisation, corruption, growing poverty, migration and xenophobia. The emphasis of this course will be on understanding the roots of Southern African problems and encouraging students to find possible solutions

to the challenges. There will be a shift from the approach of simply amassing knowledge to diagnosis of challenges, prescribing solutions and application of ideas to solving current problems

HHSH 241 Cultural Heritage Tourism and Development
This module examines the conceptual relationships that exist between culture and tourism. It analyses the demands of the cultural heritage tourism market looking at visitors' wants and needs. It assesses the competitiveness of African countries in the sector. It analyses the diverse forms of cultural heritage attractions found in the context of Africa and whether these bode well with heritage visitorswants and needs. It assesses how we can balance heritage conservation use and tourism use to ensure a sustainable relationship is maintained in regard to heritage tourism development and management. The module also shows how communities living around the heritage sites can harness the proceeds that accrue from the sites near them for tourism development and general development in their areas.

HHSH 242 Heritage Inventorying and Archiving
The purpose of this module is to enable students to demonstrate the relationship between documentation, monitoring and information management. The module aims to explore the difference between heritage inventory practices and data collection activities inventories. It will establish heritage record-keeping as an integral component of collections management and examines the various types of museum records and how they should be managed. It will also explore the role of heritage inventories in disaster preparedness and recovery. The module will also demonstrate how archive creation is a fundamental element at every stage of the archaeological and heritage management processes and discusses the socio-technical interactions that take place between people, information, and technology in heritage institutions.

HHSH 243 African Environmental Heritage
The module explores how the environment impacted human culture and how the environment was also shaped by human cultures. The module looks at the various methods and techniques that can be used to sustainably utilise heritage resources while at the same time benefiting concerned local communities. The module analyses and critiques the theoretical context of modern- day conservation which is framed within a western derived construct. The major aim is to enable students to develop cultural heritage conservation approaches which are African-informed. The module further exposes the challenges and dilemmas involved in attempting to develop heritage sites with and without the participation of communities. Case studies from selected countries in Africa will be used to demonstrate the complexity surrounding environmental management and sustainable development. The major principles and concepts of conservation as well as their evolution will be expounded.

HHSH 244 African Dance and Music
This module explores the early historical accounts of music and dance among Africans that can be found in oral literature that take different forms such as folk tales, myths, epics, praise poems and historical accounts of rituals. Music and dance in Africa have served both utilitarian and aesthetic functions. The utilitarian function involves the use of music in everyday activities, including music at the child's naming ceremonies, child- rearing practices, initiation rites, agricultural activities, national ceremonies, war times, religious ceremonies and those meant for the dead. In most ceremonies, even death ceremonies, music and dance go together. The module lays the foundation for the students' academic study of Zimbabwe's indigenous music and dance genres that exist in oral tradition. The thrust of this module is to stimulate interests and develop students who appreciate the role of music in social, economic and political activities of society.

HHSH 246 The Military and Governance in Africa
The module attempts to analyze the role of the military in governance in Africa. The military has been a significant player in post-colonial African politics and governance and its role deserves thorough analysis. The module seeks to acquaint students with reasons why military rule and authoritarianism are contagious in Africa.

HHSH 247 Demography, Land and Agrarian Studies in Africa
The module examines pre-colonial and colonial agricultural systems as well as colonial land policies. It compares white settler agriculture with peasant demographic and land policies and famine in Africa. It ends with a comparative assessment of the agricultural performance of the postcolonial state in Africa.

HHSH 300 Student's Work-Related Learning Placement Report

HHSH 301 Student's Work-Related Learning Report

HHSH 302 Academic Supervisor's Assessment Report

HHSH 303 Employer's Assessment Report

HHSH 431 Heritage Based Philosophy

The module focuses on entrepreneurial skills needed for the heritage industry in Zimbabwe. The main aim of the module is to debunk the western approaches to development and produce innovative students who can apply their sophisticated knowledge to their local environment. Africa and Zimbabwe in particular need local innovations which can compete in the world markets. Students are provided with business and management skills that are peculiar to the Heritage industry so that the industry through its generation of tourism and leisure contributes to the growth of the economy. The module considers culture more broadly like a human agency to produce meanings to everyday life. The module equips students with invention skills for new business models developed from the natural endowments of the country.

HHSH 432 Culture, Heritage and Intellectual Property Rights

The module acquaints learners with knowledge of the laws governing the handling of both cultural and heritage products in Zimbabwe and Africa. It deals with indigenous and contemporary intellectual property rights accorded to cultural and natural heritage. Learners explore ways of indigenous and contemporary patenting that were and are meant to address intellectual rights to t cultural and natural goods. It exposes students to home grown and foreign-grown intellectual property rights. It deals with creations of the mind, inventions, literary artistic works, symbols, names and images used in commerce. They are exposed to cultural and heritage patents such as inventions, trademarks, industrial designs and geographical indications.

HHSH433 Indigenous Knowledge Systems

The module considers Indigenous Knowledge Systems (IKS) in African Development. It examines the interaction of African IKS with the European system and the effect on both cultures. The module also examines the re-emergence of IKS in independent Africa and different theories of development. The module aims to examine the knowledge systems, ways of knowing and worldviews indigenous people in Africa have constructed and drawn upon in relation to the context in which they are situated. It also explores ways in which IKSs have been adopted to meet the contemporary imperatives of African people. The module more importantly reviews epistemological structures that distinguish IKSs from other knowledge systems, examines characteristics associated with IKSs of African people and analyses some of the cultural considerations that come into play as indigenous people become Westernised. The module also considers IKS in the contemporary world with advanced technological systems. With the onset of the changing world with pandemics and disasters, the place of IKS shall be considered, especially in line with HIV/AIDS and the Covid-19 pandemic. The module makes the students appreciate the value of IKS in the contemporary world.

HHSH 434 Heritage Management and Sustainable Development

The module exposes students to how culture should be perceived not only as the development of arts-related activities or as protection and socialisation of the cultural heritage but also as everything associated with humanity and human development. This becomes an essential resource capable of improving the quality of life, ensuring sustainable development and democratic thinking based on the respect for human rights and democratic principles, solidarity, dignity, sharing and equity. Students are taught how to promote cultural approaches to sustainable development, the development of capacity-building programmes and the promotion of programmes with respect to bio-diversity conversation, geo –sciences and geo –ecology, land resources management, etc. The cultural approach, as a new shift in the development paradigm, recognises culture as a platform or as the foundation into which progress in the development of society is built.

HHSH 441 Conflict And Crisis Management in Africa

This module explores the various conflicts and crises that gripped Africa from the pre-colonial to the post-colonial period. It examines multi-faceted approaches to the management of conflicts and crises, and the level of success in these efforts. The module kick starts by looking at pre-colonial African societies in light of conflict and crises management. The interaction of the same African societies with Europeans shall be explored to establish the nature of relations, conflicts and crises during the period and how they were managed. The module also discusses conflicts and crises that culminated in the attainment of independence by African states. Post-colonial Africa and its conflicts and crises is also central to this module with issues of governance, democracy and human rights being on the fore. Mediation efforts by various players, including regional bodies and international organisations shall be considered. With the fast-changing global community, efforts shall be made to consider the crises of pandemics such as HIV/AIDS, Ebola, cholera and the more recent COVID-19 pandemic and the efforts made to combat the epidemics. Studies shall also include crises such as droughts, cyclones and earth tremors. This module makes the student appreciate the need for a peaceful and habitable continent amidst the various challenges faced in the contemporary world.

HHSH 442 Constitutionalism, Democracy and Human Rights in Africa

The module explores the evolution of constitutionalism, democracy and human rights issues in Africa from the pre-colonial to the post-independence period in Africa. It assesses the impact of constitutions on the democratic process and how African states have fostered adherence to constitutionalism, democracy and human rights. The relationship between constitutionalism, democracy and human rights is of fundamental importance in this module. Special attention shall be paid to the types of constitutions, constitution-making process and the challenges associated with the constitution-making process. This shall be linked to the notions of democracy and human rights as well as democratic dispensation in Africa.

The module further explores issues of governance and the various benchmarks in African democracy such as rule of law, transparency, multi-partyism, as well as free and fair elections. Constitutionalism, democracy and human rights shall also be discussed in the face of the contemporary world where these are topical issues. The module also seeks to enlighten the students on a universal culture of good governance, democratic values, gender equality and respect for human rights and the rule of law. This helps the students to understand how constitutionalism, democracy and human rights can be used in the promotion of sustainable growth and socio-economic and political cohesion in Africa.

HHSH 443 Marketing Cultural Heritage
The module deals with the marketing of cultural heritage which among other things include museums, galleries and cultural heritage landscapes. It focuses on aspects like market analysis, market research, market planning, marketing mix and marketing communications. The main aim of the module is to place cultural heritage institutions at a competitive advantage against competing players in the leisure and tourism industry.

HHSH 444 Zimbabwean History since Independence
The module focuses on the social, economic and political developments in Zimbabwe since independence. The achievements and failures of the post-colonial government are discussed with the view of building upon these issues for the achievement of a prosperous Zimbabwe. Historical and Heritage approach will be emphasised to examine the trajectories of the country with regard to its history, culture and heritage. Heroes and heroines and their contributions to the country will be discussed. By the end of the course, students are expected to be able to appreciate the successes and challenges that the country has been facing since independence and be able to suggest possible solutions to the country's predicaments.

HHSH 445 Research Project
This is a paper of between 15 000-20 000 words, based on wide research with the assistance of a supervisor. Its weight is equivalent to that of two core modules. The research project should be presented to a panel of the Departmental Board which determines its mark.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN ARCHIVAL AND HISTORICAL INFORMATION MANAGEMENT (AH03)

Duration	4 years
Actual Credit Load	540
Minimum Credit Load	480
Maximum Credit Load	540
Total MBKS Credit Load	384
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAM

1.1 Develop capabilities and competencies in the collection and preservation of historical information in the new digital era and global village
1.2 Assist students in appreciate the application of Information Communication Technology to disciplines in the broad field of Arts and Humanities in general and History in particular.
1.3 Shape and train a new generation of historians, archiving practitioners and curators with the capacity and attendant critical skills to transcend from the old approaches of data and information management and claim a niche in the digitalised world.
1.4 Engage students intellectually and professionally in the critical analysis of historical information, knowledge systems and heritage to be able to provide sustainable solutions to challenges of society and contribute to national development
1.5 Critique, complement and reinforce traditional approaches by the historian and students

2. ENTRY REQUIREMENTS

2.1 Normal Entry

For admission into the Honours Degree in Archival and Historical Information Management, candidates must satisfy the normal entry requirements as specified in the Faculty Regulations and the General Regulations. In so doing, they must satisfy the following requirements: Must have obtained at **least five** 'O' Level passes or the equivalent, including English Language, History and Heritage Studies. Must have obtained a pass in History or Heritage Studies at 'A' Level and at **least ONE** of the following subjects or their equivalent:
Economics, Geography, Political Economy, Law, Divinity, Sociology, Literature in English, Shona, Ndebele, or any other African Language

2.2 Special Entry
Refer to Section 3.2 of the General Academic Regulations for Undergraduate degree programmes.

2.3 Mature Entry
Refer to Section 3.3 of the General Academic Regulations for Undergraduate degree programmes.

3.0 PROGRAMME CHARACTERISTICS

3.1 Areas of study
Modules revolve around the introductory phase followed by the core issues in Archival and Historical Information Management tackling the theoretical framework, aspects related to records, information generation and preservation in history such as archaeology, museums and oral sources. Students also register for electives, extracted from different themes such as History and International Studies, History and Heritage, Archaeology and Digital Archiving.

3.2 Specialist Focus
Selected critical and relevant aspects of Zimbabwean and African History, heritage and indigenous African knowledge systems, historiography and how these relate and interface with digital methods of preservation of historical information in the era of information communication. Standards, Policy and Legal framework for archives and recordkeeping are distinct features of the programme.

3.3 Orientation
The programme employs a variety of approaches inter-alia; individual research, investigative team tasks, training in information communication and useful applications to develop critical analytical skills

3.4 Distinctive Features
- Collaborative research and seminars with fellow tertiary institutions, renowned academics and archivists.
- A year-long Industrial attachment by participating students with relevant institutions for hands-on grooming.
- Online and face-to-face public lectures with experts in the discipline and related fields.
- Research project undertaken by each student to the satisfaction of the department and faculty standards

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability:
Graduates of Honours Degree in Archival and Historical Information Management will be able to pursue an array of opportunities and options in public administration and organisational leadership, research institutions and strategic business units and lecturing/teaching in educational institutions. Digital archivists, museum curators & administrators, reporters, news correspondents, documentary analysts & academic research assistants, librarians, and information officers are other opportunities available

4.2 FURTHER STUDIES
Master's and Doctoral Studies

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods

6.0INTENDED LEARNING OUTCOMES

6.1 Ability to analyse and review historical texts, information and digital archives
6.2 Ability to make decisions as well as to take into account useful things that have been done in the past within the framework of records, collections, archives and heritage
6.3 Competency to transform historical knowledge, historical information and heritage knowledge into goods and services
6.4 Ability to demonstrate knowledge and understanding of the preservation of historical information/records and heritage issues.
6.5 Ability to provide consultancy and support or advisory services to research/academic/educational institutions and heritage-oriented organisations
6.6. Ability to undertake relevant scholarly research and publication in recognised history, cultural, heritage, and other academic journals
6.7 Ability to nurture collaboration among existing academic institutions and archiving practitioners and curators.
6.8 Ability to spearhead initiatives that address the many challenges of the world such as war, diseases, environmental challenges and other conflict situations.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Arts Honours in Archival and Historical Information Management is a full-time degree programme. A student shall be required to complete the programme in not less than four years from the date of initial admission and official registration

7.2 At the Third Level of study of the Honours degree programme, the enrolled student undertakes Work -Related Learning/Industrial Attachment for a prescribed period of **10** to **12** months.
7.3 The degree programme is structured into both Core/Compulsory and Elective/Optional modules/courses.
7.4 At least **five** of the modules registered per semester by the enrolled student should be from within the Honours Degree in Archival and Historical Information Management programme.
7.5 Normally, where a pre-requisite module is involved, a candidate shall be required to pass it before taking higher modules.
7.6 Students can include in their programme of study, modules offered by other departments, in line with the University's concept of "Flexible Packaging".
7.7 Each module is worth **12** credits except the research project which is worth **24** credits. To pass, a student is required to accumulate a minimum of 540 credits.
7.8 Work- Related Report and Academic Supervisor's Assessment are worth **45** credits each while Employer's Assessment Report is carries **30** credits

8.0 PROGRAMME ASSESSMENT

8.1 To be admitted for formal examinations, a student must have satisfied requirements for Continuous Assessment in the form of In-class Tests, Tutorial Presentations and Individual Written Assignments, Field and Laboratory Work
8.2 In the case of a research project, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of such research project submitted at a date determined by the Departmental Board.
8.3 Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.
8.4 The final mark will be weighted as 25% for Continuous Assessment and 75% for Examinations.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate degree programmes.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate degree programmes.

PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
AHIM 131	Introduction to Archiving & Historical Information Management	12
AHIM 132	Information Preservation, Cassification Systems and Archiving in Zimbabwe	12
AHIM 133	Introduction to the Study of History	12
HISH 133	Themes in African History	12
AHIM 135	Introduction to African Indigenous Knowledge Systems	12
CS 131	Basic Communication Skills	12
HCS 135	Introduction to Information Communication Technology	12
Level 1 Semester 2		
AHIM 141	Aspects of Digital Archiving and Historical Information Management	12
AHIM 142	Theory and Practice of Records Management	12
HISH 134	Economy and Society in Zimbabwe to 1890	12
AHIM 143	Zimbabwe Cultures and Heritage	12
CS 132	Extended Communication Skills	12
Electives		
HISH 144	Pre-colonial History of Southern Africa	12

***Note:** At Level 2, students are expected to study at **least five** modules per semester*

Level 2 Semester 1

HISH 232	Historiography and Historical Methods	12
H1SH 230	History of Zimbabwe 1890-1980	12
AHIM 231	Missionary Collections and Colonial Archives in Africa	12
AHIM 232	Heritage Inventorying and Archiving	12
AHIM 233	Historical Information, Cultural Heritage and Intellectual Property Rights	12
ENT 131	Entrepreneurship	12

Level 2 Semester 2

AHIM 241	Digitalisation and African Indigenous Knowledge Systems	12
AHIM 242	Historical Monuments and Sites	12
AHIM 243	Archaeology and Historical Information Management	12
AHIM 244	Oral Tradition, History and Memory	12
AHIM 245	Audio-Visual Archiving	12

Level 3 Semester 2: Work- Related Learning

AHIM 301	Student's Work-Related Learning Report	45
AHIM 302	Academic Supervisor's Assessment Report	45
AHIM 303	Employer's Assessment Report	30

***Note: Students in the fourth level are expected to do at **least five modules** in the first semester and **three modules plus a dissertation** in the second semester.*

Level 4 Semester 1

AHIM 431	Digital Media Content Production and Management	12
AHIM 432	Digital Methods in Archaeology	12
AHIM 433	Preservation, Conservation and Management of Museum Collections	12
AHIM 434	Appraisal and Disposal of Records	12
AHIM 435	Standards, Policy and Legal Frameworks of Archiving	12

Level 4 Semester 2

AHIM 441	Management of Digital Libraries and Archives	12
AHIM 442	Trends in Digital Archives Management	12
AHIM 443	Digital Archives, Historical Information and Development	12
AHIM 445	Research Project	24

Electives:

HISH 444	Democracy and Human Rights in Africa	12

MODULE SYNOPSES

AHIM 131 Introduction to Archiving and Historical Information Management

The module serves as an introductory base for participating students to have initial foundational appreciation of archives, their primary purpose and the generation as well as preservation of historical information. Key concepts, terms and applicable frameworks are defined. It surveys how archives have developed over the years throughout the world, in the African continent and, briefly, in the Zimbabwean context. The module highlights the contribution of experts/scholars/researchers or notable personalities in the field of archiving and historical information. It captures different types or forms of archives as well as how historical information is managed. This introduction further dwells on the comparative advantages and limitations of archiving. It is meant to offer an understanding of how the discipline of archiving and records management has developed and its place/relevance in the very diverse field of information management. The module therefore aims to give participants a clear understanding of different concepts and or principles of archives and records management and for those students to be able to apply them.

AHIM 132 Information Preservation, Classification Systems and Archiving in Zimbabwe

The module focuses more on a variety of methods of preserving information and explains the equally varied classification systems employed. It further deals with the processes and systems of archiving with particular reference to Zimbabwe. Archiving and information preservation in Zimbabwe is centred on the National Archives of Zimbabwe and thus the module reviews its history and operations from 1934 as the nation's central repository of official records. Apart from central

government records, the National Archives has expanded its scope and now houses a rich collection. The purpose of the module extends further to analyse the organising of records, and identify the different types of records and record classification systems. As an outcome, students should be able to develop and apply some classifications for a variety of situational contexts and, for particular interest, be able to demonstrate compliance with Zimbabwean trends in managing and classifying records.

AHIM 133 Introduction to the Study of History
The main thrust is to examine the introductory facets of the study of History as a specific discipline with a view to enable participating students to grasp those major elements. Thus, main sources, their advantages and limitations, themes and concepts are defined and explored in detail. Special attention is accorded to introducing the study of African history as a distinct feature of the module.

HISH 133 Themes in African History
This module is focused on providing a survey of historical developments in African societies beginning with organised political formations and economies premised on agriculture and iron production. It further deals with the early contacts with external 'forces' in the form of traders and missionaries, navigating the process up to the onset and consolidation of colonial rule. It winds up with the variety of responses of Africans to European colonisation, culminating in nationalism and struggles for independence and an overview of the economic and political developments in the post-independence dispensation.

AHIM 135 Introduction to African Indigenous Knowledge Systems
This module serves as an introduction to IKS in general. It discusses the various definitions of IKS and makes a survey of a variety of knowledge forms of the indigenous people that range from the social to the scientific as well as from the religious to the political. In this module, indigenous education practices and the means through which education is imparted to the younger generations are explored, together with how oral art forms as education media can be tapped into for the financial benefit of the indigenous communities from which they come out. The module also examines the interface between IKS and Indigenous religion as well as the contribution of IKS in defining the African being. It also discusses how IKS can be managed and integrated into the education system. It briefly refers to the interface of IKS with Western systems of knowledge.

HCS 135 Information to Information Technology
Refer to Faculty of Science and Technology Regulations.

CS 131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

AHIM 141 Aspects of Digital Archiving and Historical Information Management
The various major aspects of Digital Archiving and Historical Information are identified and examined in detail. It explains the processes and contribution of digital platforms and attendant applications as far as this relates to historical information generation, preservation and access. The module is, in part, dedicated to the analysis of written records, their acquisition, strengths and weaknesses.

AHIM 142 Theory and Practice of Records Management
This aims to explain the concept of Recordkeeping across the continuum from the theoretical framework to the actual practice stages. Various forms of record keeping are identified and explored. It further explores the fundamental importance of records and archives and their contribution to our communities and nations, the place of record-keeping in the broader field of information management; defining concepts of records & archives as well as issues to do with regulatory framework, set standards, professional context and ethical considerations. It also focuses on the development of recordkeeping functions, associated theories and practices. Why do records matter in our lives as local societies, as individual organisations and as nations? What are the practical application aspects in these different scenarios? As part of the varied learning outcomes, students are expected to demonstrate an appreciation of the value of records, their management, the role of technology and the nexus between theory and practice.

AHIM 143 Zimbabwe Cultures and Heritage
This module is premised on introducing Zimbabwean culture and heritage and its various dimensions. It also locates Zimbabwe's culture and heritage in the broader context of African cultures and heritage. It defines and explores the fundamental importance of culture, its diversity and heritage to national development goals and strategy as well as nation-building national pride and consciousness.

HISH 134 Economy and Society in Zimbabwe to 1890
The module is a survey of Zimbabwe's social and economic developments since the emergence of complex societies to the eve of colonial rule. It interrogates the social, political and economic organisation of small acephalous communities and

successive great states such as Mapungubwe, Great Zimbabwe, Mutapa, Torwa, and Rozvi. It ends with an examination of the implications of successive Nguni and European excursions and conquests of communities on the Zimbabwean plateau.

HISH 144 Pre-colonial Southern Africa
The module addresses pre-colonial societies, as well as the various socio-economic relations between such groups as the Khoi Khoi, the Bantu, white settlers and the slaves at the Cape. The discussion also includes long- distance trade in Southern Africa, occupation of the Cape, Great Trek, Mfecane and its effects, mineral discoveries, colonial conquests and African responses as well as the beginnings of the industrialisation of South Africa.

HISH 232 Historiography and Historical Methods
The module introduces students to philosophical ideas and theories which found expression in history. This is a survey of the critical method of studying and understanding history from Renaissance and Enlightenment historiography to the specific interpretative strategies for the study of historical texts. The precursors of modern critical methods/theories such as Kant, Hegel, St Augustine and Descartes will form the background material. Overall, the module aims to develop the techniques of formal appreciation and criticism of historical works. A slant of this towards African history is highlighted. The student will be equipped with the basics of the discipline through this module.

HISH 230 History of Zimbabwe 1890-1980
The module starts with the period from the nascent years of colonial domination to the attainment of independence. It discusses, among other issues, the long-drawn processes of consolidating settler political domination and economic exploitation. It traces aspects such as African responses through trade unionism, and expressions of nationalism culminating in the liberation war, UDI and independence. Major focus in the post-independence era includes civil disturbances of the early 1980s, the Unity Accord, economic policy thrust, land reform, political contestations and governance and government of National Unity.

AHIM 231 Missionary Collections and Colonial Archives in Africa
The students are exposed to the integral role that missionary and colonial officials' reports, accounts, memoirs, biographies, autobiographies, photographs, paintings, and other official records played in the history and development of archives in Africa as they formed part of the core of material. A critique of these collections as well as the policy framework constitute a significant feature of this study.

AHIM 232 Heritage Inventorying and Archiving
The purpose of this module is to enable students to demonstrate the relationship between documentation, monitoring and information management. The module aims to explore the difference between heritage inventory practices and data collection activities inventories. It will establish heritage record-keeping as an integral component of collections management and examine the various types of museum records and how they should be managed. It will also explore the role of heritage inventories in disaster preparedness and recovery. The module will also demonstrate how archive creation is a fundamental element at every stage of the archaeological and heritage management processes and discuss the socio-technical interactions that take place between people, information, and technology in heritage institutions

AHIM 233 Historical Information, Cultural Heritage and Intellectual Property Rights
The module primarily captures intellectual property rights pertaining to historical information and cultural heritage. This therefore looks partly at the applicable legislation and how these have developed across the world, within the African continent and Zimbabwe.

HISH 243 Demography, Land and Agrarian Studies in Africa
The module examines pre-colonial and colonial agricultural systems as well as colonial land policies. It compares white settler agriculture with peasant demographic and land policies and famine in Africa. It ends with a comparative assessment of the agricultural performance of the postcolonial state in Africa.

HISH 246 The Military and Governance in Africa
The module attempts to analyse the role of the military in governance in Africa. The military has been a significant player in post-colonial African politics and governance and its role deserves thorough analysis. The module seeks to acquaint students with reasons why military rule and authoritarianism are contagious in Africa.

AHIM 241 Digitilisation and African Indigenous Knowledge Systems
This module endeavours to assess how the process of digitalisation has interfaced with IKS and with what implications for those systems and historical information. It is anchored on how digitalisation has accorded the historian and the researcher with additional/complimentary tools for information preservation and management

AHIM 242 Historical Monuments and Sites
This examines the different types of Historical Monuments and Sites and how these serve as fountains of historical information and heritage. Examples of prominent sites worth mentioning include the Great Zimbabwe, Khami Ruins, Matopos shrine, and Egyptian tombs. The role and contribution of monuments and sites in a country will be tabled in this study. It further looks at how monuments are now packaged and marketed digitally.

AHIM 243 Archaeology and Historical Information Management
The module defines and explores archaeology as a concept, its role as a source of historical data and information as well as the challenges associated with those processes. It further deals with examples of archaeological sites, and how archaeology has developed in Zimbabwe and as a discipline in tertiary institutions of education. It illustrates the use of archaeology in complementarity with other sources of historical information.

AHIM 244 Oral Tradition, History and Memory
This focuses on the definition of what oral tradition, oral history and memory entail and their place as sources of information for the student, curator/archivist and researcher of history. It deals in great detail with the intricacies of oral tradition and how these can be navigated particularly in the digital era, including their usefulness. It argues for the justification of using oral histories in a multi-disciplinary approach with other disciplines for a clearer interpretation and understanding of historical information.

AHIM 245 Audio-Visual Archiving
Through this module, students are equipped with skills and appropriate knowledge crucial for the management of audio-visual materials in terms of creation, collection, development, access, and preservation. They are also exposed to the methodological and theoretical elements which are critical cornerstones of audio-visual archives: visual and sound recordings, cartographic, architectural and photographic archives. The history and development of audio-visual archives as well as practical skills relevant thereto are explored.

AHIM 431 Digital Media Content Production and Management
This module is premised on detailing how content for the digital is generated, packaged and managed for the 'consumers' of that information. It highlights the challenges associated with the use of that content and shares Africa's experiences in that regard. The module on digital knowledge production covers the fundamentals of making data accessible and usable online, and introduces a wide range of issues related to the use of the internet for the dissemination of heritage information.

AHIM 432 Digital Methods in Archaeology
This revisits the discipline of archaeology as a source of historical information with particular emphasis on digital methods. Digital technology has been employed in the initial study and the subsequent dissemination of archaeological data and thus the module will examine selected methodologies, their applications and basic practical skills in techniques in the probing of archaeological materials. Students will be equipped with an appreciation of the role of digital methods in the analysis of archaeological data and critical reflection skills

AHIM 433 Preservation, Conservation and Management of Museum Collections
Students are exposed to appreciate the art of conserving collections and the institutional/administrative arrangements of museums with the aid of particular case studies. It also emphasises the management of museums as institutions in the information communication technology era. They will be able to appreciate museums' purpose as institutions through which society acquires, collects, conserves, investigates, interprets, communicates and exhibits information and artefacts collections for us to comprehend natural and human evolution. The different focus areas of museums such as natural history, human sciences, site museums, minerals, military museums etc will be highlighted.

AHIM 434 Appraisal and Disposal of Records
The major objective is to analyse the different techniques or methods of appraisal and disposal of records. It explains the benefits of appraisal and the justification of disposal processes. The students will be equipped with relevant basic knowledge base, skills and competencies to critically analyse the processes in appraisal, retention and disposal of records. They must learn the procedural and professional considerations of what is to be disposed of and what is to be permanently preserved and why for both scenarios.

AHIM 435 Standards, Policy and Legal Framework of Archiving and Historical Information Management
The module addresses general standards, policies and the laws guiding the operations of archives/digital archives and the handling of historical information. With respect to Africa, it traces the legal regime's development from the colonial to the post-independence scenario. Probing questions are to be asked relating to how political leadership in independent Africa has handled historical information. The purpose of this module is also to identify, analyse and interpret the applicable legislation, policies and standards which govern archives, records management, preservation and public access to records.

AHIM 441 Management of Digital Libraries and Archives
This defines digital libraries as critical resource centres for preserving information and reviews the main processes of managing Digital Libraries and Archives. Electronic management applications as aids that facilitate access to records are a critical part of this module. The module encompasses different definitions of what Digital Libraries are, and identify prominent examples of such libraries such as World Digital Library, Europeana Library, and California Digital Library. It explores digital libraries and archives collection development policy focusing on goals/purpose, scope, selection, responsibilities, unique content and the emergence of such libraries in the 1990s. The adoption of technologies such as CD-Roms, Digital Video Disk Read Only Memory (DVD-Roms), networking of computers, image/text compression, multimedia technology are examined.

AHIM 442 Trends in Digital Archives Management
This presents an overview of the trends that have been shaping the development and utilisation of digital archives. It highlights different country experiences and the reasons thereof and then explores identified international best practices. Students should be able to demonstrate appreciation of the ever-changing standards, legal and operating environment of archival and information management regimes. The module looks at digital archiving in the 21st century and strategies and opportunities for the future.

AHIM 443 Digital Archives, Historical Information and Development
The module is centred on the contribution of archiving and historical information plays in the national development matrix of a given society/country. Questions have to be interrogated as to what role archiving in general and digital archiving and historical information in particular play in the socio-economic and political well-being of the country. It also concentrates on the creation of digital collections.

HISH 444 Democracy and Human Rights in Africa
The module explores the evolution of constitutionalism, democracy and human rights issues in Africa from the pre-colonial to the post-independence period in Africa. It assesses the impact of constitutions on the democratic process and how African states have fostered adherence to constitutionalism, democracy and human rights. The relationship between constitutionalism, democracy and human rights is of fundamental importance in this module. Special attention shall be paid to the types of constitutions, the constitution making process and challenges associated with the constitution making process. This shall be linked to the notions of democracy and human rights as well as democratic dispensation in Africa. The module further explores issues of governance and the various benchmarks in African democracy such as rule of law, transparency, multi-partyism, as well as free and fair elections. Constitutionalism, democracy and human rights shall also be discussed in the face of the contemporary world where these are topical issues. The module also seeks to enlighten the students on a universal culture of good governance, democratic values, gender equality and respect for human rights and the rule of law. This helps the students to understand how constitutionalism, democracy and human rights can be used in the promotion of sustainable growth and socio-economic and political cohesion in Africa.

AHIM 445 Research Project
This is a research paper of between 9 000-10 000 words, based on wide research with the assistance of a supervisor. Its weight is equivalent to that of two core modules. The project should be presented to a panel of the Departmental Board which determines its score.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN AFRICAN HISTORY (MAAH)

Duration 18 Months

Credit Load: 360 credits

Level: ZNQF-Level 9

2. PURPOSE OF THE PROGRAMME

The programme aims to train students who will be able to develop and apply sound conceptual, analytical and critical skills that are required for an in-depth study of varied issues and themes in African History. The major objective of this programme is to produce students who will produce new forms of knowledge and competencies relating to African history in a global intercultural environment.

3. ENTRY REQUIREMENTS

Applicants to this programme should normally hold a good Honours Degree in a relevant field such as History, International Studies/Affairs and Economic History. The Department may, at the discretion of the Departmental Board, require an applicant to attend a pre-admission interview or examination to satisfy itself of the candidate's ability to complete the programme applied for. Eligibility will not guarantee admission.

4. AREAS OF STUDY

Historiography and Research Methods in African History, Environmental History of Africa, Issues in African History before 1900, Political Economy of Africa from Colonialism, Historical Dimensions of Human Rights and Governance in Africa, Africa in the Contemporary World, Peace and Strategic Studies in Africa, and History of Medicine and Indigenous Knowledge Systems in Africa.

SPECIALIST FOCUS

Historiography and research methods, the historical developments in pre-colonial, colonial and independent Africa and human rights and democracy in Africa.

ORIENTATION

The programme takes a multi-dimensional approach. Tolerance of different historical backgrounds will be taken into account.

DISTINCTIVE FEATURES

Presentations may be expected from non- academics such as veterans of wars, politicians, herbalists and those from NGO sectors.

Grooming potential academics and researchers

Independent research

Book reviews

5. GENERAL PROVISIONS

. Each module offered at M.A carries 30 credits and the dissertation, 90 credits. (Refer to Section 26 of the General Academic Regulations for Postgraduate Degrees).
. The total number of credits required for the Master of Arts shall be at least 360.
. Examinations for each module will normally be sat at the end of each semester for each module on the dates to be advised by the University Examinations Office.
. To be admitted to any of the examinations of the degree, the student must:
. Be registered for the degree with the Midlands State University in accordance with the General Regulations for students,
. Have attained continuous assessment marks, and
. Have attended at least 80% of the lectures offered in the module for which the examination is to be sat.

6. EMPLOYABILITY

Graduates with an MA in African History will have career opportunities in the academic sector as lecturers and researchers. They are also employable as archivists, in the public sector, the NGO sector, heritage management and politics.

FURTHER STUDIES

Doctoral studies in History, African studies, International Affairs and related fields

7. PROGRAMME DELIVERY

Teaching and Learning Methods

Lectures, presentations by students, book reviews, article writing and dissertations.

Assessment Methods

. The overall assessment shall be based on continuous assessment and formal examinations
. Assignments related to the objectives of the programme will be set. These may include, but are not limited to essays, group presentations, tests and projects.
. A candidate who fails to fulfil continuous assessment requirements may be barred from sitting for examinations.

Examinations

. Examinations shall normally be written at the end of the semester
. Each module shall include in its mode of assessment a written examination which is, at most, three (3) hours long.

. In determining marks for modules, weighting shall be as follows:

Continuous assessment	30%
Examinations	70%

PROGRAMME COMPETENCIES

Multidisciplinary: Ability to information from a multiplicity of academic and non-academic sources based on critical analysis.

Qualitative and innovative approaches

.To be analytical and critical in identifying and finding ways of resolving historical problems.

Ethical Commitment

.Ability to communicate at all levels using both ICT and systems that have already been there. Students are expected to be highly ethical in their researches.

Entrepreneurial Commitment

.Professional integrity ensuring involvement of stakeholders, transparency and accountability.

Analysis and Synthesis

.Ability to analyse historical information based on empirical evidence.

INTENDED LEARNING OUTCOMES.

The programme aims to produce graduates who will be able to develop and apply sound conceptual, analytical and critical skills that are required for an in-depth study of varied issues and themes in African History. Graduates of this programme should be able to new forms of knowledge and competencies relating to African history in a global intercultural environment.

Level 2 Semester 1

MAAH 730	Dissertation	90

MODULE SYNOPSES

MAAH 712 Historiography and Research Methods in African History

The module examines the study of the writing of African history. The module addresses imperial or colonial historiography and African Historiography which was popularised during the decolonisation period. Students will also be exposed to critical criticism of hagiographical writings. The economic, political and gender influences the writing of history will be covered in detail. The module also pays special attention to the evolution of Zimbabwean historiography from the colonial to the post-colonial period and the rise of the neo-nationalist influenced patriotic historiography. The module also examines the diverse sources of history, techniques and methodologies of acquisition of historical knowledge before delving into the approaches to analysis and presentation of historical data. The issue of the growth and significance of ethical considerations in research is also covered in detail. Lastly, students are exposed to approaches to thesis writing.

MAAH 713 Issues in African History before 1900

The module seeks to expose the student to a broad array of debates, sources and methodology around critical issues defining African identity and experience in the period before European colonialism became confirmed in earnest on the African continent. Human settlement and spread on the continent will be appreciated from pre-historic period, continuous interaction among Africans themselves and between them and other people from other continents and civilisations will be accounted for. This is done in a wider context of existing source material and the historiography behind the production of this knowledge.

MAAH 714 Political Economy of Africa since Colonialism

The module addresses the development and transformations in the political economy of Africa from the colonial to the post-colonial period. It examines how colonisation destroyed and integrated African economies into the world capitalist system. It looks at the nature of the colonial economy and modes of exploitation of Africa by different colonial powers, and how the core-periphery relationship was maintained. Students will also be introduced to debates about the three types of colonialism in Africa which determined the impact of colonialism in the different colonial states. Also significant in this module will be the analysis of African agencies in political and economic developments in colonial Africa. The module also pays attention to the contradictions of the colonial state which led to its demise. The module goes further to explore political and economic issues surrounding Africa after attaining independence from former colonial powers. It focuses on Africa's attempts to transform itself from a colonial entity to economic and political sovereignty. It explores issues of neo-colonialism, dependency (Africa as autonomous colonies), sanctions and underdevelopment or reverse development. Internal economic and political challenges retarding development such as corruption, bad governance, violence, ethnicity, coups, civil wars, genocide, politics of personal rule or dictatorship and political instability, in general, will be examined.

MAAH 715 Historiography of African Diaspora

The module examines wider social, economic and political issues of the African diaspora, the Atlantic slave trade, the history of African-American-Caribbean societies, modern trends in international migration and the history of diasporic minorities.

MAAH 716 Africa in the Contemporary World

The module examines development strategies in Africa, key elements of socio-economic and political processes, African countries' foreign policies, regionalism and globalisation. The module will offer a broad interdisciplinary introduction to the study of contemporary Africa. Students will gain knowledge of key concepts and themes as well as the theoretical and methodological debates that are critical for understanding the changing continent. Key themes include democracy and the state, citizenship and identity, poverty and economic change, cities, popular culture, aid and debt, migration, civil war and conflict.

MAAH 720 History of Medicine and IKS in Africa

The module explores major themes in the medical history of Africa, such as the evolution of ideas about wellness and healing in the pre-colonial period, the dynamics of colonial and missionary medicine and Africa's medical history in the post-colonial period and its interface with indigenous knowledge systems. Issues and realities surrounding Indigenous Knowledge Systems, and indigenous technology as a basis for modern science will be examined in detail. The module deals with the practice of traditional medicine in Africa since the pre-colonial period. It also explores the historical and philosophical background of the practice of African traditional medicine, its demonisation during the colonial period and its revival after independence. The module concludes by examining Africa's dependency on Western medicine at its peril.

MAAH 721 Environmental History of Africa

Human population dynamics, Land use, aspects of urbanisation, water resources, pollution, economics and environment, politics and environment, environmental ethics and hope, species introduction and endangered species and environmental organisations.

MAAH 722 Peace and Strategic Studies in Africa
The module considers peace theories and practice and the broad subjects of violence and conflict. The module introduces students to the interdisciplinary field of peace and strategic studies. It takes them through the evolution of peace and strategic studies as an academic endeavour, its history, its philosophical background and scientific nature, its orientation and definitive issues, and professional networks. Core concepts of peace, conflict and conflict analysis, and violence are treated. Subfields and domains to be covered include development, humanitarian action, peace education, strategic studies, gender studies/advocacy, nonviolent resistance, security, and conflict or dispute resolution. The module is a detailed and systematic examination of the key military strategic issues affecting Africa in a historical and cultural context. A heavy focus will be placed on the role of security policy and military strategy, especially with the aspect of securing access to strategic resources. The module will also consider the causes and implications of weak and failing states in sub-Saharan Africa and the measures that are taken to prevent or reverse state failure.

MAAH 723 History of Human Rights and Governance in Africa
The module takes a historical approach to the concepts of human rights and democracy in Africa. As a fairly new field of study from a historical perspective, the module starts by examining the historiography of human rights and democracy. The main agenda will mainly be to demythologise and decolonise the way issues of human rights and good governance are studied. It will demonstrate that human rights and good governance (or democratic systems) co-existed with rampant human rights violations and authoritarianism in precolonial, colonial and post-colonial times. It will expose students to the double standards and hypocrisy of the African elite in the promotion of good governance and human rights. By the end of the semester, the students should have mastered the debates, controversies and counter-debates on the two major historical themes.

MAAH 870 Dissertation
The Dissertation is 20000- 25000 words based on a wide research in the area of study.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN GLOBAL HISTORY (AH19)

Duration	18 months
Actual Credit Load	290
Minimum Credit Load	270
Maximum Credit Load	330
Total MBKs Credit Load	210

1. PURPOSE OF THE PROGRAMME

The programme seeks to:
1.1 include more regions and peoples in the human story
1.2 identify and answer new questions about the world we study—whether as local communities or planet-spanning systems.
1.3 examine migration and exchange, global empires, cultural transfers, and more.
1.4 explore the various trajectories of cross-border entanglements across the globe. -emphasise the entanglements between specific regions and global structures.
1.5 understand the forces that have continuously shaped and restructured the world.

2.0 ENTRY REQUIREMENTS

Applicants to this programme should normally hold a good Honours Degree in a relevant field such as History, International Studies/Affairs, Development Studies and Economic History. The Department may, at the discretion of the Departmental Board, require an applicant to attend a pre-admission interview or examination to satisfy itself of the candidate's ability to complete the programme applied for. Eligibility will not guarantee admission.

3.0 AREAS OF STUDY

Historical Methods and Research Skills, the Global System since 1945, globalization, Environment and Strategies for Human Development, Decolonisation, New States and the Global System, Gender, Labour and Migration, National Identities and Global Citizenship.

3.1 SPECIALIST FOCUS

Environment and strategies for human development, international terrorism, gender and labour migration

3.2 ORIENTATION

The programme takes a multi-dimensional approach. Tolerance of different historical backgrounds will be taken into account.

3.3 DISTINCTIVE FEATURES

Presentations by specialists such as international civil servants, guest speakers, war veterans, NGOs and so on. Grooming potential academics and researchers. Independent research.
Book reviews

4.0 EMPLOYABILITY

Successful completion of your Master's degree opens up a wide range of occupational fields. You will be able to pursue a career in academia, to support international NGOs, or to join research institutions and associations. Graduates work in related areas such as museums, policy think-tanks, national and international civil services, non-governmental organisations, galleries, libraries and historic trusts. Others enter business, media, public administration or marketing. In addition, your knowledge and skills will be in demand in policy consulting and internationally operating companies. Global historical questions are also becoming increasingly important in museum and exhibition work, as well as in journalism. The Master in Global History at Midlands State University will also enable you to do a doctorate as it is above all committed to the education of qualified future historians.

5.0 PROGRAMME DELIVERY

A specialised methodological and historiographical course will help the student appreciate the distinctiveness of contemporary history; its use of radio, television, film, and internet-based sources such as Wikileaks; and its methodology. This rigorous skills training will be supplemented by a variety of topical, specialised options, covering virtually every distinctive approach to history (e.g. political, social and economic) and every region on the globe, underlining the increasing globalisation of our recent past.

6.0 INTENDED LEARNING OUTCOMES.

The programme aims to produce graduates who will be able to develop and apply sound conceptual, analytical and critical skills that are required for an in-depth study of varied issues and themes in Global History. Graduates of this programme should be able to new forms of knowledge and competencies relating to Global history in a culturally diverse environment.

7.0 GENERAL PROVISIONS

7.1 Each module offered at M. A. carries 30 credits and the dissertation, 90 credits. (Refer to Section 26 of the General Academic Regulations for Postgraduate Degrees).
7.2 The total number of credits required for the Master of Arts shall be at least 360.
7.3 Examinations for each module will normally be sat at the end of each semester for each module on the dates to be advised by the University Examinations Office.
7.4 To be admitted to any of the examinations of the degree, the student must:
7.5 Be registered for the degree with the Midlands State University in accordance with the General Regulations for students,
7.6 Have attained continuous assessment marks, and
7.7 Have attended at least 80% of the lectures offered in the module for which the examination is to be sat.

8.0 PROGRAMME ASSESSMENT

8.1 Overall assessment shall be based on continuous assessment and formal examinations
8.2 Assignments related to the objectives of the programme will be set. These may include, but are not limited to essays, group presentations, tests and projects.
8.3 A candidate who fails to fulfil continuous assessment requirements may be barred from sitting for examinations.
8.4 Examinations.
8.4.1 Examinations shall normally be written at the end of the semester.
8.4.2 Each module shall include in its mode of assessment a written examination which is, at most, three (3) hours long.
8.4.3 In determining marks for modules, weighting shall be as follows:

Continuous assessment	30%
Examinations	70%

9.0 PROVISION FOR PROGRESSION

9.1 Doctoral studies in History, African studies, International Affairs and related fields.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees programmes

12. DEGREE WEIGHTING

Refer to Section 10 of the Faculty of Arts and Humanities Regulations for Postgraduate Diplomas and Taught Masters Degrees programmes

13. MODULE SYNOPSES

MAGH 701 Historical Methods and Research Skills

The module is concerned with the handling of primary and secondary sources in history, aspects of objectivity, subjectivity and professionalism in history. The module provides a more intensive focus on the qualitative and quantitative research methods in research. The inter-disciplinary research skills are also emphasised.

MAGH 702 The Global System since 1945.

This module brings to light the roles played by different countries in global politics and economics as the wealthy and powerful Western nations and the Communist bloc competed for influence in the rest of the world. The new global political configuration which covers the roles played by the Cold War and superpower rivalry in global politics is given emphasis.

MAGH 703 Globalisation, Environment and Strategies for Human Development

The module covers issues relating to population and management of resources. Attention is given to pollution and resources management, energy and the environment, politics and environment, environmental ethics and hope in changing economies, societies and cultures.

MAGH 704 Decolonisation, New States and the Global System

The module covers the struggles of Asian, African and Latin American societies to end domination by Western nations and the proliferation of nationalist movements. In some cases, these nationalist and revolutionary struggles led to interventions by Western powers or the USSR anxious to preserve their political and economic influence. The module addresses political change and conflict, hopes and frustrations for the New States born of globalisation.

MAGH 705 Gender, Labour and Migration

The module provides a general overview of the geography of gender in developing market economies. Gender, sexuality and male dominance in relation to industrial change and divisions of labour are discussed. The causes, nature and impacts of labour-related migrations are discussed. Insights are also provided for research directions in gender.

MAGH 706 Africa and the New World Order
The module considers the legacy of colonialism for Africans, the resurgence of a new imperialism, Africa in world politics and economy and African adaptiveness and resistance to global pressures.

MAGH 707 Europe and Russia since 1945
The module covers the remaking of European Nations and the European Community, Europe and NATO in the Cold War, Soviet Union in the Cold War, Soviet Decline and Reform. The module also embraces the New Russia and New Nations then Europe and Russia in the global system.

MAGH 708 The Middle East and New Conflicts in the Contemporary World
The module explores the reshaping of the Middle East, Arab Nationalism and Israel in Middle Eastern politics. Regional conflicts - Iran and Iraq war and the importance of the Oil resource in world politics.

MAGH 709 International Terrorism
The module examines the historical and ideological roots of terrorism. Terrorist movements' strategies/methods and their connection to extreme religious and political movements. Movements' attempts at ethical and political legitimation are considered.

MAGH 710 The Americas and the Pacific Basin since 1945
The module deals with the United States as a superpower in the global system, relations with revolutionary Cuba, and the development of despotism and democracies in Latin American and Caribbean Societies.

MAGH 711 Asia and Global Connections since 1945
The module examines the resurgence of Southeast Asia, focusing on politics and society in Indonesia, Philippines, Burma and Thailand; economic changes and political challenges in the global system in relation to diversity and prosperity in Malaysia and Singapore then the remaking of China and Japan in the global system.

MAGH 712 National Identities and Global Citizenship
The module focuses on the historical development of the notions of the individual and the self, ethnic, and national identity, the idea of nation-state and national sovereignty in various parts of the world, global citizenship in the political, social and religious discourse from the mid- twentieth century.

MAGH 713 Dissertation
The Dissertation is a 15000 to 20000 paged document based on wide research in the area of study.

DEPARTMENT OF LANGUAGES, LITERATURE AND CULTURAL STUDIES

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN ENGLISH AND COMMUNICATION (AH04)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	540
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

The degree programme is designed to achieve the following objectives:

1.1 To teach literature in English, Linguistics and Communication, emphasising their interdependence, theoretical and practical aspects,

1.2 To arm students with analytical tools to enable them to study any literary text or poem,

1.3 To enable students to see the link between literature and society,

1.4 To make students better communicators both orally and in writing, and

1.5 To prepare students for the real world of work by exposing them to different modules,

2.0 ENTRY REQUIREMENTS

2.1 Normal Entry

To qualify for normal entry into the Bachelor of Arts English and Communication, a candidate, in addition to satisfying the minimum conditions as prescribed under the General Regulations for English and Mathematics must have passed Literature in English at `A' level with at least grade 'C'.

2.2 SPECIAL ENTRY

Refer to Section 3.2 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

2.3 MATURE ENTRY

Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREA OF STUDY: Literature, Linguistics and Communication

3.2 SPECIALIST FOCUS: Zimbabwean Literature, African Literature, Diasporan Literature, Theories of Linguistics, Second Language Acquisition, Globalisation and International Communication, Gender, Film

3.3 ORIENTATION: Research and innovation- oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 DISTINCTIVE FEATURES: The programme builds on cultural and heritage needs in Zimbabwe and abroad and focuses on knowledge development and application using a student-centred approach

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of the programme are qualified to seek employment in areas including but not limited to publishing, public services, non-governmental organisations and communication-oriented fields, such as public relations and teaching.

MA and PhD studies in Literature, Linguistics/Communication or related field

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, research project individual independent study

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

- ✓ Utilise their knowledge and understanding of literature to critique various literary works
- ✓ Demonstrate the ability to use principles of language and communication to understand personal and interpersonal communication in various spheres of life
- ✓ Identify and define different languages, literary and communication systems and practices
- ✓ Communicate effectively and present information using multi-media to both expert and non-experts in the communication, linguistics and literary environments

- ✓ Develop new communication practices and technologies that enhance efficiencies and outputs of the communication industry.

7.0 GENERAL PROVISIONS

7.1 Bachelor of Arts English and Communication Honours Degree is a full-time degree programme. Normally, the programme is completed over 8 semesters (4 years) comprising three (3) levels of formal classroom work at Levels 1, 2 and 4, and a Work-Related Learning period of not less than ten (10) months during Level 3.

7.2 Each student is required to earn at least 32 credits at each of Levels 1, 2 and 4, and 40 credits at Level 3. At least 60% of the modules studied must be from the specific Honours programme pursued by the student. The awarding of degrees shall be in accordance with the provisions of the General Academic Regulations.

7.3 In each semester of Levels 1, 2 and 4, a student normally takes three core modules and two elective modules from any other department (s).

7.4 Not all modules listed in these Regulations are on offer every semester.

7.5 Modules studied at other universities are credited at the discretion of the Department and Academic Board.

7.6 Students are required for BAEH 470 to submit the Honours Dissertation by the date determined by the Department. The Dissertation is worth 8 credits.

7.7 Conditions governing carryover and repeating of modules are stipulated in the General Regulations.

7.8 Supplementary examinations may be allowed in accordance with the provisions of the General Regulations.

8.0 PROGRAMME ASSESSMENT

Overall assessment shall be based on continuous assessment and formal examinations.

8.1 Continuous Assessment

Assignments related to the objectives of the programme shall be set. These may include essays, problem sets, tests and reports. Candidates who fail to fulfil continuous assessment requirements may be barred from sitting for the examination.

8.2 Examinations.

8.2.1 Examinations shall normally be written at the end of each semester.

8.2.2 Each module will be examined by a paper which is, at most 3 hours long.

8.2.3 In determining marks for modules, weighting is normally as follows:

Continuous Assessment 25%

Examinations 75%

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities y Regulations for Undergraduate Degrees of the Midlands State University.

MODULE SYNOPSES

BAEH 132 Theories of Literature
The module traces developments in literary theory from the Age of Enlightenment to the most recent theoretical discourses in literary studies. The module will also examine how different theories interact as they inform and explain our understanding of the world of literature today. Theories will be subjected to testing by reading them in relation to texts, with specific attention being paid to their strengths and limitations in addressing the historical, social, political and ideological nature of literary works and the contexts in which theory and text emerge.

BAEH 139 Introduction to Linguistics
The module serves as an introduction to the principal areas of modern linguistic enquiry. As such, focus will be laid on areas such as, but not exclusively, phonology, morphology, syntax, semantics and sociolinguistics. The module also acts as grounding for further specialised research and studies in such areas of linguistics as historical and comparative investigations, sociolinguistics, psycholinguistics and applied linguistics. It also attempts to make the student a good communicator through the learning of basic rules of grammar.

BAEH 141 Literary Criticism
The course enables the learner to engage any literary texts to tease out meaning from them while appreciating the artist's workmanship even for texts encountered for the first time. It exposes the learner to different literary periods, genres of literature key literary terms, the different literary techniques and how these convey meaning even beyond the simple text.

BAEH 142 Theories of Communication, New Media and Communication Technology
This is a 3-part module that examines the nexus between communication theory, new media development and communication technologies. As can be imagined, the three areas are intrinsically linked and, therefore, inform and feed into each other. The module is thereby divided into three parts which focus on each respective area of the module. After introducing the salient concepts and issues of the module, the focus is put on communication, the evolution of communication technologies and new media, in that order. Dwelling on real-life examples, the module will pose questions to do with the nature and use of communication. A number of activities will be carried out to complement and apply the ideas raised during discussions.

BAEH 143 Basic French 1
This module is meant for total beginners in French who wish to develop basic communicative competence in French. It will develop basic linguistic and communicative skills as well as concomitant intercultural awareness to enable the learner to interact with speakers of French at a basic level. The module therefore introduces students to the French language as well as aspects of French and Francophone cultures related to the communicative settings and situations within which linguistic structures are introduced. It focuses on an integrated development of the four language skills (listening, speaking, reading, and writing) in French.

HCS 135 Introduction to Information Technology
Refer to the Department of Information Systems.

CS 131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

BAEH 130 Zimbabwean Literature
The module is an introduction to leading works of Zimbabwean literature using relevant literary theories. It begins by giving the historical context of the development of literary creativity by black Zimbabweans and further traces ideological and generic shifts in Zimbabwean literary creativity up to 2000.

BAEH 133 Organisational Communication
The module introduces students to the concepts and the essential elements of communication since effective communication skills are integral to all successful human relationships. As the world becomes more 'global', the need and desire to know how to communicate effectively in a variety of contexts becomes paramount. Hence the module focuses on the development and improvement of students' competence as communicators in various professions.

BAEH 134 Linguistics and Literature
The module explores how the ideas of linguistics may be applied to literary criticism. It explores the nature of the relationship that exists between linguistic form and literary function. It is an introduction to the study of stylistics and

literary styles. The marriage that exists between language and literature if studied will nurture students who are better analysts, writers and teachers/ educators.

BAEH 136 English for Specific Purposes
The module introduces students to the specialised ways of using English in specific contexts. It emphasises the factors that relate to the origins and development of English for Specific Purposes as well as the role of the ESP practitioner. It aims at developing students' skills in interpreting and analysing language used in specific contexts. The other aim is to develop student skills in linguistics and applied linguistic analysis.

BAEH 144 Basic French 11
Building on Basic French I, this module builds up the learner's communicative competence in terms of conversation and writing up to reporting past events, stating wishes and expressing conditions.

CS1 32 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

BAEH 232 Introduction to African Literature
This module introduces students to aspects of African Literature. In particular, it identifies and discusses the oral/indigenous and modern/written forms constituting African Literature. The module seeks to expose students to the major writers, their styles and thematic concerns and explore the pattern of development of African literature. The key thematic concerns to be explored largely centre on the impact of the colonial encounter, the conflict between tradition and modernity, the disillusionment of independence and the numerous challenges facing most postcolonial African societies that signal the discontinuities and continuities of colonialism on the African geopolitical and imaginative landscape.

BAEH 233 Language Policy and Planning
The module examines issues in the study of language policy and planning, including language choice and multilingualism. It explores how decisions concerning language policy and planning arise in response to socio-political needs. Thus, the module focuses on the ways and methods that are followed in coming up with a language policy for a particular society and the planning that is undertaken before coming up with a decision concerning a particular language situation.

BAEH 234 Discourse Analysis
The module examines the analysis of linguistic units larger than the sentence, including conversational structure, speech acts and the ethnography of speaking. It explores basic concepts in the study of discourse and the role of context in its study and introduces students to theories in the study of discourse. The module intends to nurture students who are better communicators and analysts. Taking context into cognisance, the module intends to cover varied areas of discourse analysis and train students to read texts by deconstruction.

BAEH 235 Research Methods
The module seeks to expose students to methods of gathering data, data handling, presentation, analysis and data correlation in the fields of literature, language and communication. It gives guidelines on how to design a proposal and how to write the report. Thus, the module introduces the student to major theoretical issues in research and also equips him/her with the basic tools of how to conduct a research project at undergraduate level. It also gives suggestions on how to incorporate research components into their other areas of investigation, for example, assignments. Students will also be exposed to standard referencing systems such as the American Psychological Association (APA) documentation style, and the Harvard and Oxford systems to prepare them for Report/Project writing during Work-Related Learning and Dissertation in the Fourth level.

BAEH 241 Introduction to Gender Studies
This module introduces students to the concept/study of gender and stresses the social constructedness of gender and gender roles. With a conceptualisation of gender and related concepts as its point of departure, the module traces the historical development of the discipline and addresses theoretical perspectives related to gender. Thereafter, the module looks at the concept of gender analysis and discusses strategies to redress gender imbalances. The module then explores gender issues in Southern Africa and concludes with a discussion on how both males and females can be empowered within the context of gender -responsive environments.

ENT 131 Entrepreneurship 1
Refer to the Department of Entrepreneurship.

BAEH 231 Trends in Literature
The module introduces students to literature by drawing attention to some of the milestone developments that have taken place in the field of literature. The emphasis is on familiarising the student with traditions, forms and approaches to

literature. Because the field of literature is broad, the module will combine cursory and in-depth approaches r to provide a broad perspective of the field while zooming in on selected literary components.

BAEH 236 Caribbean Literature
The module examines a range of literary texts from the Caribbean Islands from the slave era to the present. The module aims to delineate the close links between the literary concerns highlighted in this literature with those of African and other Diasporan literatures. Knowledge of West Indian history is imperative to enable students to place the literature within its proper historical context and in relation to each other.

BAEH 237 Public Relations Communication
This module introduces students to Public Relations communication. The module proceeds to define the communicative aspects of Public Relations and map out their contribution to an organisation's success or failure. Furthermore, the module seeks to establish a distinction between Public Relations communication and other communication disciplines to appreciate the part it plays in the overall communication programme of organisations.

BAEH 238 English as a Foreign Language
This module seeks to build the oral and written English skills of non-first language speakers of English. It equips students with skills in designing an English as a Foreign Language course, taking cognizance of the learner's broad environment and their needs, the expertise of the teacher as well as the methodology. The module develops a solid background in critical aspects such as language and culture, language structure, and first and second language influence.

BAEH 239 African Cultures and Heritage
This module introduces students to the diversity of African cultures and heritage paying special attention to Zimbabwe. The aim is to provide critical consciousness to the learner on the centrality of culture and heritage in building just and good societies. Furthermore, the module provides a footstool for acquiring self-knowledge that is crucial for self-definition and unlocking the agency of the diverse cultural groups in Zimbabwe and even beyond. The module projects culture and heritage as resources that are integral to development, nation-building, gender relations, identity etc. Against the long-standing peripheralisation of African cultures and heritage, the module sensitises students to the decolonisation and African renaissance agenda.

BAEH 242 Linguistic Theories
The module is an exploration of linguistic theories. It intends to give students an appreciation of theories in phonetics and phonology, morphology, syntax and semantics to lay a strong foundation in the study of pure linguistics. Students are expected to be informed of the proper linguistic ways of analysing language. Students will be introduced to key concepts found within phonological structures such as distinctive features within syntactic structures, concepts like constituent structures, grammatical functions and grammatical function, changing operations and semantic structures, argument and predicate.

BAEH 300 Work Placement Report
This is a report written by the student providing information on his/her placement. The Department provides the report format.

BAEH 301 Work-Related Learning Report
This is a report written by the student based on their activities and experiences during Work -Related Learning. The Department provides the report format.

BAEH 302 Academic Supervisor's Assessment
The Academic Supervisor's assessment looks at the student's conduct at the workplace. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and communicating with colleagues.

BAEH 303 Employer's Assessment
The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities.

BAEH 440 African American Literature
The module will study works of literature that reflect the experiences, history and culture of people of African origin in America. Focus will be on themes of resistance and complicity, the race question, belonging and identity, double consciousness, gender struggle, the American dream and other related issues. The literary works will be examined in the context of the ideas of thinkers at each historical phase in the evolution of this literature. The students will be required to assess the success with which both writers and thinkers interpret the experiences and aspirations of these people.

BAEH 441 Creative Writing
This module is a practicum in skills required in creative writing. The module equips students with skills in writing, critiquing and evaluation of creative texts. It exposes students to literary trends and movements, and literary genres, their properties and construction for the purposes of enhancing writing style and creativity. The module positions creative writing as an academic discipline to nurture creative talent, creating a pool of skilled people for work in the area of creative writing.

BAEH 443 Advanced English Literature
The aim of the module is to expose students to a range of major texts from the literature of the United Kingdom. Texts will be categorised to reflect Medieval, Renaissance, Elizabethan, Romantic, Victorian and modern English novelists, poets and dramatists. The literature will be read as literary responses to changes in the socio-historical history of the United Kingdom. Emphasis will be on the historical background and literary features of each age.

BAEH 444 Globalisation and International Communication
The module places communication in the realm of globalisation and its impact and implications for Zimbabwe and Africa. The emphasis is on empowering the student with a full awareness of Zimbabwe's and Africa's positions in relation to the flow of information in the world. This allows the student to have a holistic picture of international communication and its impact on Zimbabwe and Africa.

BAEH 445 Theoretical Approaches to Multi-modal Texts
This module aims to theorise the notion of intertextuality to reveal how an interpretation of the multiple and multi-modal forms can expand the meaning potential of creative texts. Students should be able to identifyand explain the existence of literary forms within a single format like a play, novel, advert, poetry and song. The students should also examine the different levels at which the mixture of several genres in the plot and meanings of the text. The argument that the module highlights is that style, technique and form have autonomous existence and meaning outside the context of a work of art. This module further sensitises students to the fact that the meaning of form is embodied in the nature of the genre that it expresses and is expressed through.

BAEH 446 Occupational Discourses
The course surveys and differentiates a wide range of texts in English from professional and occupational genres. Based on the fact that discourse and/or genre analysis can be broken up into four basic categories: (i) rhetorical purpose and audience/speech community (ii) content (iii) structure and (iv) linguistic features, the module draws largely from stylistic studies paying particular attention to the relationship between linguistic form and textual function. The focus will largely be placed on the functional defining features of the various discourses and how their distinct linguistic forms are used to encode linguistic function within the occupational and professional settings of their use. The course moves through a theoretical review of the previous genre theoretic propositions, studies and discourse studies.

BAEH 442 Bilingualism
The module is an exploration of the notion of bilingualism. As such, effort is put into understanding the nature of bilingualism, and the causes and effects of bilingualism. Focus is also on the different forms of bilingualism and debates on the impact and/ or implication of bilingualism in societies, individuals, education, children and so on. An analysis and exploration of the relationship between bilingualism and other notions related to it such as diglossia, multilingualism, second language acquisition and plurilingualism should be done. As an applied linguistic module, it makes use of real-life socio-linguistic contexts.

BAEH 447 Children's Literature
The module seeks to critically study the concept of children's literature using relevant theories. Its major thrust is the recognition that children's literature is a broad, generalised and contested category. The current debates on the category will be considered in relation to various literary works spanning different cultures and historical periods. The module will investigate some of the ways in which children's literature has been defined and conceived throughout history.

BAEH 448 Gender and Literature
The module examines the portrayal of gender relations in selected works of literature using relevant theories. It links the literary texts to the dominant ideology and genre of the time. The texts represent various traditions such as the African tradition, the English tradition, the Marxist tradition, and the Womanist/Feminist tradition, among others.

BAEH 449 Communication in Negotiation
This module equips the learner with the requisite skills to meaningfully participate in negotiations and diffuse potentially explosive conflicts both at home, at work and abroad. This module assists the learner in negotiating through conflicts that are common in the economic and political spheres in Zimbabwe and elsewhere. For conflicts to be resolved, negotiators should be ethical, principled and competent and this module turns the learner into an effective negotiator.

BAEH 480 Dissertation
The dissertation will be expected to be between 9 000 and 10 000 words, or 45 to 50 pages of font 12 with double line spacing and it should be in the area of English and Communication.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN TRANSLATION AND INTERCULTURAL COMMUNICATION (AH13)

Duration:	4 years
Minimum Credit Load:	480
Maximum Credit Load	540
MBKS Credit Load:	384
ZNQF Level:	8

1.0 PURPOSE OF PROGRAMME

The degree programme is designed to achieve the following objectives:

1.1 Introduce students to the theoretical, practical and professional issues in the areas of translation, interpreting and intercultural communication;

1.2 Provide a platform for students interested in intercultural matters to study communication between and among cultures; and

1.3 To produce candidates with requisite skills and knowledge in the field of translation and intercultural studies that can provide professional service in the areas.

2.0 ENTRY REQUIREMENTS

2.1 NORMAL ENTRY

To qualify for normal entry into the Bachelor of Arts in Translation and Intercultural Communication, a candidate, in addition to satisfying the minimum conditions as prescribed under the General Academic Regulations for English and Mathematics, must have passed any Language subject at 'A' level with at least grade 'C'.

2.2 SPECIAL ENTRY

The following persons may apply for Special Entry and for permission to proceed to a first degree with exemption from the whole or part of the normal entry requirements:

2.2.1 A person who has obtained a degree from this or another university or degree-awarding institution.

2.2.2 A person who has obtained from a University or an Institution of similar academic qualifications (other than degrees) acceptable to the Senate. A person has obtained an appropriate number of subjects at an approved examination and has subsequently passed an intermediate or equivalent examination at a University acceptable to the Senate;

2.2.3 Students who qualify under this regulation for Special Entry may apply to the Senate to be exempted from certain modules and examinations. Permission may be given to complete the programme for a Bachelor's degree in less than the normal required period provided that no student shall be allowed direct entry to the final level of any programme.

2.2.4 Students who apply for admission under this regulation may be required to attend interviews and/or special tests at the University to determine their suitability for admission to Bachelor's degree studies

2.3 MATURE ENTRY

Persons who are at least 25 years of age for males and 23 years for females on the first day of the academic year in which admission is sought and who are not eligible for entry under the Normal or Special Entry Regulations may apply for Mature Entry provided that:

2.3.1 Applicants must have passed at least five approved 'O' Level subjects including English language and Mathematics (or equivalents) and must have demonstrated potential suitability for University studies by virtue of their attainments and/or relevant work experience.
2.3.2 Normally, applicants should have completed their full-time school or college education at least five years before the start of the academic year in which admission is sought.
2.3.3 Applicants who wish to be considered under the Mature Entry provisions may be required to attend interviews and/or special tests at the University designed to assess their command of the English Language, numeracy and reasoning ability and general suitability for admission to the Bachelor's degree studies.
2.3.4 Applicants who have previously attended Mature Entry tests and/or interviews without success will not be considered for admission under this form of entry unless in the intervening period, they have acquired additional qualifications and/or experience.

3.0 PROGRAMME CHARACTERISTICS

3.1 Area of Study: Translation, Interpreting and Intercultural Communication
3.2 Specialist Focus: Theory and practice of Translation and Interpreting, Intercultural Theory, Multiculturalism

3.3 Orientation: Research, enterprise and professionally oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 Distinctive Features: The programme adopts an Afrocentric approach with a bias towards African languages and dialogue between and among African cultures as well as between these languages and cultures and non-African languages and cultures.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Graduates of the BA Honours in Translation and Intercultural Communication degree will have career opportunities in public service, NGOs, academia, international organisations, diplomatic service, media, business and commerce, and communication-oriented fields such as public relations, among others. They will also have the requisite skills to create employment, such as innovative enterprises and consultancies, in such areas as translation, interpreting, and organisational communication. Graduates will be able to pursue MA and PhD studies in Translation, Cultural Studies and Communication.

5.0 PROGRAMME DELIVERY

5.1 The method of delivery will be the blended approach where the conventional lecture approach will be mixed with the ICT-based delivery methodology. This eclectic approach will involve lectures, tutorials, seminars, group work, research projects, individual independent study and online teaching and learning.

6.0 LEARNING OUTCOMES

The programme will produce a graduate who can:

6.1 Professionally execute translation and interpreting tasks;
6.2 Exhibit profound knowledge of current trends in translation and interpreting;
6.3 Effectively and efficiently communicate across cultures; and
6.4 Demonstrate interpretive and analytical thinking in the study of translation, interpretation, and intercultural communication

7.0 GENERAL PROVISIONS

7.1 Bachelor of Arts Honours in Translation and Intercultural Communication Degree is a full-time degree programme. Normally, the programme is completed over 8 semesters (4 years) comprising three (3) levels of formal classroom work at Levels 1, 2 and 4, and a Work-Related Learning period of not less than ten (10) months during Level 3.

7.2 Each student is required to earn at least 90 credits at each of Levels 1, 2 and 4, and 120 credits at Level 3. At least 60% of the modules studied must be from the specific Honours programme pursued by the student. The awarding of degrees shall be in accordance with the provisions of the General Regulations.

7.3 In each semester of Levels 1, 2 and 4, a student normally takes four core modules and two elective modules from any other department (s).

7.4 Not all modules listed in these Regulations are on offer every semester.

7.5 Modules studied at other universities are credited at the discretion of the Department and Academic Board.

7.6 For the research project, students are required to submit the Honours Research Project by the date determined by the Department. The research project is worth 24 credits.

7.7 Conditions governing carryover and repeating of modules are stipulated in the General Regulations

7.8 Supplementary examinations may be allowed in accordance with the provisions of the General Regulations.

8.0 PROGRAMME ASSESSMENT

The overall assessment shall be based on continuous assessment and formal examinations.

8.1 Continuous Assessment

Assignments related to the objectives of the programme shall be set. These may include essays, problem sets, tests and reports. Candidates who fail to fulfil continuous assessment requirements shall be barred from sitting for the examination.

8.2 Examinations

8.2.1 Examinations shall normally be written at the end of each semester.

8.2.2 Each module shall be examined by a paper which shall normally be three hours long

8.2.3 In determining marks for modules, weighting is normally as follows:

Continuous Assessment	25%
Examinations	75%

9.0 PROVISION FOR PROGRESSION

9.1 Students shall progress automatically from semester 1 to semester 2 at each level with the exception of special cases that would have been approved by the senate that is cases of students applying for deferment of studies

9.2 The Faculty Board of Examiners shall meet at the end of the first semester of the level to ratify the marks obtained by candidates and considered by the Departmental Boards. In the case of repeat-level students, the Faculty may, however, make recommendations to withdraw or discontinue the student at this stage.

9.3 The Faculty Board shall meet at the end of the second semester of a level to ratify marks obtained by the candidates and make recommendations to the Senate on issues of progression by students to the next level.

9.4 For a student to proceed from one level to the other he/she must have passed at least eight (8) modules.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

14.0 MODULE SYNOPSES

HTIC101 Introduction to Translation and Interpretation Studies
This is an introductory module which gives a general overview of the disciplines of translation and interpretation. This is done through familiarising students with interpreting and translation terminology; identifying and discussing significant historical developments in interpreting and translation studies; recognising interpreting and translation studies as an 'inter-discipline'; understanding the various linguistic, cultural, social and other contextual factors involved in interpreting and translation work; and developing the basic skills required of interpreters and translators.

HTIC102 Phonetics and Phonology
This module exposes students to the sound system of a language and their patterning (phonetics and phonology). It is an introduction to the study of speech sounds and their patterning in the world's languages. The module teaches how to produce, transcribe and describe, in articulatory terms, sounds of human languages.

HTIC103 Morphology and Syntax
This module provides students with the knowledge and skills of how words are formed and how sentences are constructed from words. It studies the patterns and relationships of words, phrases and clauses to form sentences and the rules by which the sentences are constructed.

HTIC104 Basic French I

This module is for total beginners in French who wish to develop basic communicative competence in French. It will develop basic linguistic and communicative skills as well as concomitant intercultural awareness to enable the learner to interact with speakers of French at a basic level.

HTIC105 Introduction to Intercultural Communication
This module introduces students to the discipline of intercultural communication. It emphasises the fact that in a global world, communication is a vital process among people of different cultural backgrounds. Elements of intercultural communication and the benefits of studying it are explored. By and large, students should have an appreciation of various communication models used by different ethnic groups.

HTIC106 Translation and Language Documentation
This module offers students an opportunity to link translation and language documentation. It is in line with the need to develop learning material for the previously marginalised languages in Zimbabwe. The module allows the students to document learning material based on the journeys and projects of seasoned translators of different languages in Zimbabwe. The module also prepares students to work on documentation projects, with regard to practical issues such as project planning.

HTIC107 Basic French II

Building on Basic French I, this module builds up the learner's communicative competence in terms of conversation and writing up to reporting past events, stating wishes and expressing conditions.

HTIC108 Health, Communication and Multicultural Communities
This module is concerned with communication in the health sector. Cognisant of the multiplicity of cultures in the sector the module appreciates communication in the sector. Examples include patient-doctor, migrant populations healthcare staff, etc.

HCS135 Introduction to Information Technology
Refer to the Department of Information Systems.

CS131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

CS132 Extended Communication Skills
Refer to Faculty of Arts and Humanities for Regulations Undergraduate Degrees of the Midlands State University.

HTIC201 Concepts and Approaches in Intercultural Communication
This module introduces students to concepts and approaches in Intercultural communication. The approaches to be studied include Afrocentricity, Constructivist Theory of Communication and Culture, Intercultural Conflict Styles, Network Theory, Theory of Adaptation, and The Convergence Theory. These theories help students to appreciate the diversity of cultures across communities**.**

HTIC202 Theories of Translation and Interpreting
This module introduces students to the basics of translation theory. The module provides an overview of the main contemporary theories concerning translation including linguistic, philosophical, hermeneutic, literary and cultural approaches. Students shall also be exposed to various theories that guide and inform interpretation studies.

HTIC203 Translation and Interpreting Technologies
This module focuses on machine-aided translation and interpretation. The module exposes students to new information technologies in translation and interpretation and how they can be used in translating and interpreting both written and spoken material.

HTIC204 Corpora in Translation Studies
This module provides an overview of the theory and methodology of corpus linguistics and its relevance for translators. Students are introduced to publicly available corpora and various methods for data searching, pattern elicitation and text interpretation. Basic terms are introduced, such as word lists, concordance lines, collocation and colligation, etc. Electronic tools are introduced for exploring corpora and compiling own resources through sampling, pre-processing and annotation.

HTIC205 Practical Translation
The module provides intensive practice in translation in a variety of situations and modes. The focus is on practical tasks in simulated real-life conditions. This involves practical translation, critique and analysis of translations of various texts. The module aims to develop proficiency in translations.

HTIC206 Practical Interpreting

The module provides intensive practice in interpreting in a variety of situations and modes. The focus is on practical tasks in simulated real-life conditions. This involves the practical execution of the modes of interpreting in varied situations. The module aims to develop proficiency in consecutive and simultaneous interpreting.

HTIC207 Translation Project Management and Professional Ethics
The module introduces students to translation project management and professional ethics in the translation industry. It seeks to provide students with the crucial ethical considerations in executing translation projects.

HTIC208 Introduction to Gender Studies
This module introduces students to the concept/study of gender and stresses the social constructedness of gender and gender roles. With a conceptualisation of gender and related concepts as its point of departure, the module traces the historical development of the discipline and addresses theoretical perspectives related to gender. Thereafter, the module looks at the concept of gender analysis and discusses strategies to redress gender imbalances. The module then explores gender issues in Southern Africa and concludes with a discussion on how both males and females can be empowered within the context of gender-responsive environments.

ENT131 Entrepreneurship 1
Refer to the Department of Entrepreneurship.

HTIC300 Work Placement Report

This is a report written by the student providing information on his/her placement details. The report format is provided by the Department.

HTIC301 Work-Related Learning Report

This is a report written by the student based on their activities and experiences during Work- Related Learning. The report format is provided by the Department.

HTIC302 Academic Supervisor's Assessment
The Academic Supervisor's assessment looks at the student's conduct at the workplace. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and communicating with colleagues.

HTIC303 Employer's Assessment
The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities.

HTIC401 Specialised Translation
This is a practical module that aims to develop and build on the interpretive and applied skills and techniques in the translation of specialised discourse such as science, technology, business, media, tourism, medicine, literature, international organisations etc. The focus is on the specific features of different specialised scientific and technical genres, the approaches to translation, suitable specialised terminology, and the critical approach to assessing translation options.

HTIC402 Translating Cultures
This module focuses on understanding and applying the concepts of culture, otherness and cultural translation. These will be approached from the perspectives of anthropology and translation studies. Translation activities require not only language ability but translators are also mediators between cultures. The wider concept of translation requires understanding culture and otherness; and that almost any intercultural communication involves translation.

HTIC403 Intercultural Communication, Technology and the Media
This module explores the interface of intercultural communication, the media and new technologies in the contemporary world. The nature and impact of technology-enhanced communication across different cultures will be a major concern. Also, the position of African cultures in media and communication technology in the global space will be explored.

HTIC404 Commercial Translation
This module revolves around commercial translation in which students are trained in translating letters, company accounts, tender documents, annual reports, etc. The module is dedicated to developing specialist translators with knowledge of terminology used in the business world.

HTIC405 Race, Sex, Gender and Intercultural Communication
This module explores the intersections of race, sex, gender and intercultural communication in Africa. Race, sex and gender have a bearing on intercultural dialogue to the extent that the module grapples with the relationships.

HTIC470 Research Project

The module provides students with the opportunity to apply research methods skills through conducting actual research and writing a research project/dissertation on a selected topic in the areas of language, literature, or culture. With guidance from a member of the academic staff as supervisor, students plan and design an independent research project which relates to their overall programme of study. The size of the dissertation should range between 9000 and 10000 words.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN LANGUAGE AND CULTURAL STUDIES (AH07)

Duration	4 years
Actual Credit Load	480
Minimum Credit Load	480
Maximum Credit Load	540
Total MBKS Credit Load	384
ZNQF Level	8

1. PURPOSE OF PROGRAMME

The programme's purpose is to:

b. Provide a platform for rigorous Afrocentric study of African languages' literature and cultures
c. Provide students with a firm grounding in the study of African languages
d. Contribute to building a genuinely multicultural world through the curriculum that recognises that multiculturalism is a resource
e. Generate research skills for uncovering the much-needed solutions to national problems
f. Impart the entrepreneurial skills which are very critical in achieving national goals

2. ENTRY REQUIREMENTS

2.1 Normal Entry

2.1.1. For normal entry into the Honours degree in African Languages and Cultural Studies, candidates must satisfy the normal entry requirements specified in the Faculty Regulations and the General Regulations and should normally satisfy the following requirements:

2.1.2. Must have obtained at least five 'O' Level passes or the equivalent, including the English language, and an African language.

2.1.3. Applicants should have at least two 'A' Level passes preferably in Arts and Humanities for example any African language, Literature in English, History, Divinity, Geography, Sociology among others

2.2 **SPECIAL ENTRY**

Refer to Section 3.2 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

2.3 **MATURE ENTRY**

Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

2.4 **VISITING AND BLOCK**

To qualify for entry to the visiting school programme, a candidate must, in addition to satisfying the minimum entry requirements described under the General Regulations and Faculty Regulations, have completed either 'A' Levels, relevant diploma(s) or their equivalent(s) as may be prescribed by the Departmental Regulations for such Visiting School Degree Programme.

3. PROGRAMME CHARACTERISTICS

3.1 Area of Study: African languages, African languages literature, Cultures

3.2 Specialist Focus: Bantu linguistics, linguistic theories African languages literature and African-centred study of cultures of African people.

3.3 Orientation: Research and innovation-oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 Distinctive Features: The programme adopts a pan-Africanist ideological stance.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of the BA Honours Degree in African Languages and Cultural Studies will have career opportunities in cultural institutions, NGOs, the public sector, welfare institutions, universities, the private sector, publishing and other language and culture-related workplaces. They will also get access to MA and PhD studies in African Languages and Cultural Studies.

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, research projects, individual independent study

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

6.1 Exhibit profound knowledge of contemporary cultural trends
6.2 Think critically and creatively and question existing ideas
6.3 Study and apply knowledge of linguistics to practical contexts in both the world of work and academia
6.4 Execute Afrocentric analysis of cultures and literature

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Arts in Language and Cultural Studies is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of registration.
7.2 At the Third Level of the degree programme, students go on Work -Related Learning for 10-12 months.
7.3 The degree programme offers pre-requisite, core and elective modules.
7.4 At least four of the modules registered per semester should be from within the programme.
7.5 Modules studied at other universities are accredited at the discretion of the Department and Academic Board.
7.6 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".
7.7 Conditions governing carry-over and repeating of modules are stipulated in the General Regulations.
7.8 For HLCS 450, students are required to submit the research project by the date determined by the Department. The research project is worth 24 credits.
7.9 Supplementary examinations may be allowed in accordance with the provisions of the General Regulations.

7.0 **PROGRAMME ASSESSMENT**

The overall assessment shall consist of continuous assessment and formal examinations

7.1 **Continuous Assessment**

To be admitted to examinations, a student must have satisfied continuous assessment requirements for all approved modules of study.

8.2 Examinations

8.2.1 Examinations shall normally be written at the end of each semester.
8.2.2 Each module will be examined by a paper which is, at most 3 hours long.
8.2.3 In the case of a research project, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of such Project, submitted at a date determined by the Departmental Board.
8.2.4 In determining marks for modules, weighting is normally as follows:

Continuous Assessment	25%
Examination	75%

8.0 **PROVISION FOR PROGRESSION**

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

9.0 **FAILURE TO SATISFY EXAMINERS**

Refer to Section 11 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

10.0 **GRADING AND DEGREE CLASSIFICATION**

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

11.0 **DEGREE WEIGHTING**

Refer to Section 11 Of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0 **PROGRAMME STRUCTURE**

14.0 Module Synopses

HALCS 101 Introduction to African Languages Literature
This module introduces students to literature written in African languages. The module revolves around the definition of African Literature, key thinkers and their work as well as the growth of literature (novelistic discourses, poetry, drama, short stories) in African languages. The module provides a platform for debating key national issues such as liberation war heritage, the land issue and gender among many others.

HALCS 102 Phonetics and Phonology
This module exposes students to the sound system of a language and their patterning (phonetics and phonology). It is an introduction to the study of speech sounds and their patterning in the world's languages. The module teaches how to produce, transcribe and describe, in articulatory terms, sounds of human languages.

HALCS 103 Introduction to African Cultures

The module introduces students to what cultural anthropology is and how diverse cultures of the world came into existence. The evolution of human cultures and in particular African cultures is analysed based on an Afrocentric point of view. The conceptual schemes, theories and methods of interpreting human cultures are studied with the view of understanding the structure and functions of culture in past and present African communities.

HALCS 107 Theories of Literature and Criticism
This module is preoccupied with critical approaches used to direct and inform literary criticism from the early 20th century to date. The relevance of each critical canon (or lack thereof) is appreciated. It is biased towards African-centred approaches to African literature. Simultaneously, the applicability of selected theories to African literary and cultural studies is of interest.

HALCS 108 Linguistic Theories
The module focuses on the trends in the developments of linguistic theory. It exposes students to various theories of linguistics. It is historically oriented, that is, it deals with early theories through to current theories. Theories of phonology, morphology and semantics are explicated with particular emphasis on African languages.

HALCS 109 Theoretical Foundations of African Cultural Studies
The module is preoccupied with Africa's contribution to world heritage against colonialist criticism that has denied African culture and even history. The module provides a platform where students appreciate Africa's contribution to world heritage and develop critical consciousness that allows them to challenge colonialist criticism and what it stands for.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

HALCS 113 Basic French I
This module is meant for total beginners in French who wish to develop basic communicative competence in French. It will develop basic linguistic and communicative skills as well as concomitant intercultural awareness to enable the learner to interact with speakers of French at a basic level.

HCS 135 Introduction to Information Technology
Refer to the Department of Information Systems.

CS 131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

HALCS 114 Basic French II
Building on Basic French I, this module builds up the learner's communicative competence in terms of conversation and writing up to reporting past events, stating wishes and expressing conditions.

HALCS 201 African Indigenous Knowledge Systems
This module deals with African Indigenous Knowledge Systems (AIKS), and their relevance to the development of African societies. It introduces students to the theoretical underpinnings of African Indigenous Knowledge Systems. The module focuses on intangible cultural heritage as a site and medium through which AIKS can be appreciated and transmitted transgenerationally. The module relates AIKS to colonialist criticism and its denial and destruction of AIKS. Institutions promoting African Indigenous Knowledge Systems such as those embedded in song, myths, proverbs, dress, and ancestor veneration among others are emphasised. The module also debates new forms of archiving AIKS such as digital platforms.

HALCS 202 Language, Culture and Identity
The module critically analyses the symbiotic relationship between language, culture and identity. It examines how various African societies employ languages for collective and individual identification. The module also scrutinises the formation of identities in African cultures.

HALCS 203 Intercultural Communication
The module delves into the study of communication in multilingual and multicultural settings in Africa. The module revolves around communication between people of diverse linguistic and cultural backgrounds in education, business, the judiciary, general social settings and so on. Barriers to communication will also form part of the module.

HALCS 204 Children's Literature and Children's Development
This module is preoccupied with a critical appreciation of children's literature in Africa with a view to understanding the different ways in which literature is deployed to the business of empowering the young in society. Theories are deployed to the analysis of such literature in African languages.

HALCS 211 Introduction to Gender Studies
This module introduces students to the concept/study of gender and stresses the social constructedness of gender and gender roles. With a conceptualisation of gender and related concepts as its point of departure, the module traces the historical development of the discipline and addresses theoretical perspectives related to gender. Thereafter, the module looks at the concept of gender analysis and discusses strategies to redress gender imbalances. The module then explores gender issues in Southern Africa and concludes with a discussion on how both males and females can be empowered within the context of gender-responsive environments.

ENT 131 Entrepreneurship 1
Refer to the Department of Entrepreneurship.

HALCS 205 Translation and Interpreting Studies
This module is designed to teach and develop students' translation and interpreting skills in the English and African languages. It is an introductory module, which gives a general overview of the theory and practice of translation and interpretation.

HALCS 206 Language Policy and Planning
This module introduces students to the conceptual and practical issues involved in the design and implementation of language policies in Africa. It also defines the scope of language planning and models and language planning with particular reference to Africa. Learners are furnished with the core analytical skills necessary to engage in research related to language policy and planning.

HALCS 207 Language Change and Development
The module deals with African languages' phonological, semantic, syntactic, and morphological changes. The governing interest in the module is on the factors that motivate language change and its impact on development. Theories of linguistics are applied in the appreciation of linguistic changes and development.

HALCS 300 Work Placement Report
This is a report written by the student providing information on his/her placement details. The report format is provided by the Department.

HALCS 301 Work-Related Learning Report
This is a report written by the student based on their activities and experiences during Work- Related Learning. The report format is provided by the Department.

HALCS 302 Academic Supervisor's Assessment
The Academic Supervisor's assessment looks at the student's conduct at the workplace. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and communicating with colleagues.

HALCS 303 Employer's Assessment
The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities.

HALCS 401 Discourse, Society and Culture
The module introduces students to language as a social practice. It is concerned with the main theories, ideas, practices and approaches in Discourse Analysis. The module provides a systematic linguistic way for analysing discourse. It enables students to interpret and critically analyse different types of discourse in different cultures.

HALCS 402 Dialectology and Linguistic Geography
This module explores theoretical issues and practical applications in the study of dialectology. In the process, the module interrogates the delicate distinction between language and dialect. It also traces the evolution of dialectological theory and methodology from the 19th century to the present. Using both synchronic and diachronic approaches, the module examines the geographical and social language variations. The module explores the lexical, phonological, and grammatical features of specific African languages' dialects. Students are also introduced to issues on linguistic geography.

HALCS 403 Multiculturalism, Diversity and the Nation
This module deals with the concept and practice of multiculturalism. The student is exposed to the definition, benefits as well as problematics of multiculturalism. Particular interest is in the acceptance of all cultures as well as treating such cultures as equal and deserving of mutual recognition and respect within the broader context of social cohesion and nation-building.

HALCS 407 Language, Culture and Media in Africa

This module interrogates the interface of language, culture and media in post-independent African societies. In the process, the module discusses the representation of African culture in the media, how it is interpreted, (re)produced, preserved and destroyed in the context of new media technologies. The module further analyses the impact of social media and new media technologies on African culture.

HALCS 408 Race, Sex and Gender
The module focuses on the intersections of race, sex and gender in Africa. It discusses the politics of sex and gender in African cultures and how this has been impacted by other races.

HALCS 450 Research Project
The module provides students with the opportunity to apply research methods skills through conducting actual research and writing a research project/dissertation on a selected topic in the areas of language, literature or culture. With guidance from a member of the academic staff as supervisor, students plan and design an independent research project which relates to their overall programme of study. The size of the dissertation should range between 9000- 10000 words.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN APPLIED LINGUISTICS (BAAHL)

Duration	4 years
Actual Credit Load	480
Minimum Credit Load	480
Maximum Credit Load	540
Total MBKs Credit Load	384
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

The degree programme is designed to achieve the following objectives:

1.1 To understand how to employ a range of research approaches to language, from discourse analysis to corpus linguistics,

1.2 To develop a thorough grounding in language research and its practical applications,

1.3 To use knowledge of how languages are formed to solve real-life problems,

1.4 To make students better communicators both orally and in writing, and

1.5 To prepare students for the real world of work by exposing them to different modules

2.0 ENTRY REQUIREMENTS

2.1 NORMAL ENTRY

To qualify for normal entry into the Bachelor of Arts Applied Linguistics, a candidate, in addition to satisfying the minimum conditions as prescribed under the General Regulations for English and Mathematics must have passed any Language subject at 'A' level with at least grade 'C'.

2.2 SPECIAL ENTRY

Refer to Section 3.2 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

2.3 MATURE ENTRY

Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREA OF STUDY: Linguistics and Communication

3.2 SPECIALIST FOCUS: Phonetics and Phonology, Morphology and Syntax, Semantics, Sociolinguistics, Psycholinguistics, Second Language Acquisition, Corpus Linguistics, Occupational Discourses, Bilingualism

3.3 ORIENTATION: Research and innovation-oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 DISTINCTIVE FEATURES: The programme builds on cultural and heritage needs in Zimbabwe and abroad and focuses on knowledge development and application using a student-centred approach

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of the programme are qualified to seek employment in areas including but not limited to publishing, public services, non-governmental organisations and communication-oriented fields, such as public relations and teaching.

MA and PhD studies in Linguistics/Communication or related field

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, research projects, individual independent study

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate shall be able to:

6.1 Utilise their knowledge and understanding of linguistics and communication to critique society
6.2 Demonstrate the ability to use principles of language and communication to understand personal and interpersonal communication in various spheres of life
6.3 Identify and define different languages communication systems and practices
6.4 Communicate effectively and present information using multi-media to both expert and non-experts in the communication and linguistics environments
6.5 Develop new linguistics and communication practices and technologies that enhance efficiencies and outputs of the linguistics and communication industry.

7.0 GENERAL PROVISIONS

7.1 Bachelor of Arts Applied Linguistics Honours Degree is a full-time degree programme. Normally, the programme is completed over 8 semesters (4 years) comprising three (3) levels of formal classroom work at Levels 1, 2 and 4, and a Work- Related Learning period of not less than ten (10) months during Level 3.

7.2 Each student is required to earn at least 90 credits at each of Levels 1, 2 and 4, and 120 credits at Level 3. At least 60% of the modules studied must be from the specific Honours programme pursued by the student. The awarding of degrees shall be in accordance with the provisions of the General Regulations.

7.3 In each semester of Levels 1, 2 and 4, a student normally takes three core modules and two elective modules from any other department (s).

7.4 Not all modules listed in these Regulations are on offer every semester.

7.5 Modules studied at other universities are credited at the discretion of the Department and Academic Board.

7.6 Students are required for **BAALH 470** to submit the Honours Research Project by the date determined by the Department. The Dissertation is worth 24 credits.

7.7 Conditions governing carryover and repeating of modules are stipulated in the General Regulations

7.8 Supplementary examinations may be allowed in accordance with the provisions of the General Regulations.

8.0 PROGRAMME ASSESSMENT

The overall assessment shall be based on continuous assessment and formal examinations.

8.1 Continuous Assessment

Assignments related to the objectives of the programme shall be set. These may include essays, problem sets, tests and reports. Candidates who fail to fulfil continuous assessment requirements may be barred from sitting for the examination.

8.2 Examinations

8.2.1 Examinations shall normally be written at the end of each semester.

8.2.2 Each module will be examined by a paper which is, at most 3 hours long.

8.2.3 In determining marks for modules, weighting is normally as follows:

Continuous Assessment 25%

Examinations 75%

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

13.0 PROGRAMME STRUCTURE

Code	Module Title	Credits
Level 1 Semester 1		
BAALH101	Introduction to Phonetics and Phonology	12

14.0 MODULE SYNOPSES

BAALH 101 Introduction to Phonetics and Phonology
This module exposes students to the sound system of language and their patterning (phonetics and phonology). It is an introduction to the study of speech sounds and their patterning in the world's languages. The goal of the module is to learn to produce, transcribe and describe in articulatory terms, sounds of human languages.

BAALH 102 Introduction to Morphology and Syntax
This module provides students with the knowledge and skills of how words are formed and how sentences are constructed from words. It studies the patterns and relationship of words, phrases and clauses to form sentences and the rules by which well-formed linguistic structures are constructed.

BAALH 103 Introduction to Semantics
This module introduces students to semantics. It defines semantics and explores the semantic structure of lexemes and the relationships amongst them. The module provides students with a deep understanding of key concepts in semantics and semantic analysis.

BAALH 105 Psycholinguistics
Psycholinguistics lies at the interface of linguistics and psychology. Using relevant theories, the module takes students through issues such as innateness of language, children's language acquisition, biological basis of language and language disorders. The empirical evidence to be outlined in these areas shall make students understand the modularity of the brain and the organisation of language in the human mind.

BAALH 106 English for Specific Purposes
This module introduces students to the specialised ways of using English in specific contexts. It emphasises the factors that relate to the origins and development of English for specific Purposes as well as the role of the ESP practitioner. It aims at developing students' skills in interpreting and analysing language used in specific contexts. The other aim is to develop student skills in linguistics and applied linguistic analysis.

BAALH 107 Second Language Acquisition
This module introduces the leading ideas in the study of how second languages are acquired. It introduces students to theories and approaches in second language acquisition. The module deals with learner-internal and learner-external factors that shape the route of second language development. Cognitive-interactionist and frequency-based perspectives of second language acquisition are dealt with as well as roles of learner factors such as age, first language and individual difference variables. The module further deals with the application of second language acquisition theory and research to facilitate second language learning.

BAALH 112 Basic French I

This module is meant for total beginners in French who wish to develop basic communicative competence in French. It will develop basic linguistic and communicative skills as well as concomitant intercultural awareness to enable the learner to interact with speakers of French at a basic level.

BAALH 113 Basic French II
Building on Basic French I, this module builds up the learner's communicative competence in terms of conversation and writing up to reporting past events, stating wishes and expressing conditions.

BAALH 201 Discourse Analysis
This module examines the analysis of linguistic units larger than the sentence, including conversational structure, speech acts and the ethnography of speaking. It explores basic concepts in the study of discourse and the role of context in its study and introduces students to theories in the study of discourse.

BAALH 202 Language Policy and Planning
This module examines issues in the study of language policy and planning, including language choice and multilingualism. It explores how decisions concerning language policy and planning arise in response to socio-political needs. Thus, the module focuses on the ways and methods that are followed in formulating a language policy for a particular society and the planning that is undertaken before coming up with a decision on a particular language situation.

BAALH 203 Language and Media
This module discusses key concepts in the fields of, language and media. It introduces students to the notions of representation, and signs, which is central to what literary and media texts do. Dwelling on real-life examples the module shall pose questions to do with the nature and use of signs, texts, discourses and meanings in social contexts.

BAALH 204 Research Methods
This module introduces students to the basic tenets and practices of conducting research in Linguistics. The focus will be on both library and field research. By the end of the course, it is expected that students will be equipped with the necessary skills to formulate a topic from learnt aspects of Linguistics, design a proposal and collect data for analysis.

BAALH 205 Writing, Editing and Publishing.
This module allows the learners to explore their creative prowess through writing, editing and publishing skills. The module helps the learners place their practice within a contextual and critical framework through support, critique and feedback from both tutors and peers. The learners shall, therefore, be trained in the art of crafting a piece of writing, sharpening their editorial eyes as well as critical steps towards publishing.

BAALH 206 Public Relations Communication
This module provides an introduction to Public Relations Communication. The focus is on the communicative aspects of public relations and how they contribute to an organisation's success or failure. Public relations communication is distinguished from other communication disciplines to appreciate the part it plays in the overall communication programmes of organisations.

BAALH 207 Introduction to Translation and Interpretation
This module introduces students to various approaches and techniques involved in translation and interpretation. Students shall be introduced to the various roles, modes and kinds of translation and interpretation. A comparative analysis of translation and interpretation shall also be done.

BAALH 208 Theoretical Approaches to Multimodal Texts
This module theorises the notion of intertextuality and underscores how an interpretation of the multiple and multi-modal forms expands the meaning potential of creative texts. The students identify and explain the existence of literary forms within a single format like a play, novel, advert, poetry and song.

BAALH 300 Work Placement Report
This is a report written by the student providing information on his/her placement details. The report format is provided by the Department.

BAALH 301 Work-Related Learning Report
This is a report written by the student based on their activities and experiences during Work- Related Learning. The report format is provided by the Department.

BAALH 302 Academic Supervisor's Assessment
The Academic Supervisor's assessment looks at the student's conduct at the workplace. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and communicating with colleagues.

BAALH 303 Employer's Assessment

The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities.

BAALH 401 English as a Second Language.
This module builds on the module Second Language Acquisition. It critically examines a variety of approaches, methods, and techniques for teaching English to second language learners, beginning with the oldest ones to the most recent. It grounds these in second language acquisition theories and other areas of applied linguistics as well as in insights from general linguistics. English as a Second Language is examined in the Zimbabwean as well as the global context.

BAALH 402 Language Culture and Development.
This module deals with culture and how it affects and is affected by language as well as how this relates to development. It focuses on the relationship, in theory and practice, between language, culture and development. It makes a survey of the major ideas in the field of linguistics on what culture and development are and how they are interconnected with language. The module explores language and development as a socio-cultural activity. Students are expected to develop critical skills to analyse language in context and how cross-cultural differences might impact development. Students are also expected to explore and engage in current debates on language, culture and development.

BAALH 403 Occupational Discourses
This module surveys and differentiates a wide range of texts in English from professional and occupational genres. The module draws largely from stylistic studies paying particular attention to the relationship between linguistic form and textual function. The focus shall largely be placed on the functional defining features of the various discourses and how their distinct linguistic forms are used to encode linguistic function within the occupational and professional settings of their use.

BAALH 407 Alternative Mediation.
This module focuses on taking students through the study of alternative expressive/communication spaces. These spaces are used by people to escape various kinds of censorship in society.

BAALH 408 Bilingualism
This module provides a broad introduction to the concept of bilingualism and surveys leading ideas in the study of bilingualism using relevant theories. The focus shall be on multidisciplinary topics associated with the study of bilingualism, including issues relating to language, education, brain imaging and cognition. The module equips students with foundational skills to undertake research in the area of bilingualism.

BAALH 470 Research Project
This module focuses on the application of learnt concepts from other modules in the programme. It avails an opportunity for students to practice the skills from Field Methods in Linguistics as well as Research Methods in Linguistics. The research project is expected to be between 9 000 and 10 000 words or 45 to 50 pages of font 12 with double line spacing and it should focus strictly on Applied Linguistic aspects.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN APPLIED LINGUISTICS DEGREE (MAAL)

Duration	18 months
Minimum Credit Load	240
Maximum Credit Load	300
ZNQF Level	9

1. PURPOSE OF THE PROGRAMME
This programme seeks to promote high conceptual and inquisitive skills in literary and cultural studies as well as developing student's competence within specialist literary studies areas. The degree also seeks to generate interest in research in literature and linguistics, widening the students' knowledge base, competencies, skills and capabilities in the fields of literature and linguistics. To prepare students to adapt to any environment by promoting high conceptual and inquisitive, entrepreneurial skills in the fields of literature and linguistics.

2. ENTRY REQUIREMENTS
To be eligible for the programme, an applicant must have a good first degree in any of the following:

(1) Linguistics

(2) English and Communication

(2) African Languages and Culture or an approved equivalent from any recognised university.

3. PROGRAMME CHARACTERISTICS

Areas of Study: Linguistics and Communication

Specialist Focus: Linguistics and Communication

Orientation: Research and innovation oriented. Teaching and learning are practically oriented

Distinctive Features: The programme employs a student-centred approach and offers them an opportunity to participate in national development literature and linguistics programmes.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Master of Arts in Applied Linguistics degree programme is designed to enhance the competencies of graduates in the fields of (Applied) Linguistics, Communication Industry, Public Relations and University Lectureship.

Further Studies: Doctoral studies in Linguistics or in inter/multidisciplinary programmes related to the disciplines of Linguistics and Communication.

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, research project, individual independent study

Assessment Methods: Written and oral examinations, tests, seminar presentations, and final year research project report.

6. PROGRAMME COMPETENCES

Generic:

- Multidisciplinarity: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Qualitative and innovative reasoning: Capability to do research, assess and analyse qualitative data and employ innovative solutions in the interpretation of linguistic and communication material.
- Communication skills: Ability to communicate effectively and to present linguistic and communication information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using theoretical and logical arguments.
- Ethical commitment: Professional integrity and awareness of the role of linguistics and communication in humanity's development
- Entrepreneurial skills: Capability to identify and create new business ventures in the linguistic and communication sector based on knowledge and new thinking paradigms

Discipline Specific:

- Deep knowledge: Ability to employ linguistic theories and interpret linguistic material allowing for the establishment of diverse linguistic interpretations
- Production skills: Ability to come up with linguistic theories as well as ensuretheir implementation in the diverse forms of linguistic material
- Problem-solving skills: Ability to solve a wide range of linguistic issues and inform informing policy.

7. INTENDED LEARNING OUTCOMES

- Ability to demonstrate knowledge, understanding and mastery of applied English linguistics
- Ability to use principles of linguistics to understand personal and interpersonal communication
- Ability to analyse linguistics texts of various genres
- Ability to identify and solve communication-related organisational problems
- Use appropriate research methods to create new insights into linguistic theories and practices
- Develop new communication practices and technologies that enhance efficiencies and outputs of the communication industry
- Create new business ventures in the linguistics and communication industries
- Communicate effectively and present information using multi-media to both experts and non-experts in the linguistics and communication industry

MODULE SYNOPSES

MAAL 701 Phonetics and Phonology of English
The module introduces students to the approaches to studying phonetics and phonology with special reference to and emphasis on the phonetics and phonology of the English language. Students are taught to apply various ideas views and theories) to establish fields of speech phenomena to arrive at, or rather establish the phonemes of the fields under analysis. The module explores the development of the English language both from diachronic and synchronic perspectives with a specific focus on the developments in its sound patterns and structure.

MAAL 702 Syntax and Semantics of English
The module is an exploration of the two levels of linguistics: syntax and semantics of the English language. The focus is on understanding and making a critical appreciation of syntactic and semantic concepts and theories. Students will be expected to make an appreciation of the different paradigms in the study of syntax and semantics. The module is also an exploration of the syntax-semantics interface.

MAAL 703 Theories of Second Language Acquisition
This module is an introduction to current theories of how second languages are acquired and learned and methods in second language acquisition research.

MAAL 704 Genre in English
The module moves through a theoretical review of the previous genre theoretic propositions, studies and discourse studies. The course thus reviews different traditions of genre theories with the aim of problematising the genre theory theoretical framework debate. These theoretical traditions mainly cover New Rhetoric (NR), Systemic Functional Linguistics (SFL), Genre Analysis (GA) and English for Specific Purposes (ESP) perspectives on the genre. These perspectives, in this module, are considered complementary rather than contradictory in terms of the analytical applications of texts.

MAAL 705 Discourse Analysis of English
The module examines larger linguistic units than the sentence, including conversational structure, speech acts and the ethnography of speaking. It explores concepts in the study of discourse and the role of context in its study. It is a critical appreciation of discourse- linguistic theories and approaches in the study of discourse. The module intends to nurture students who are better communicators and analysts. Taking context into cognisance, the module intends to cover varied areas of discourse analysis and train students to read texts by deconstruction. However, the major focus of this module is on the critical evaluation of discourse theories and their applicability.

MAAL 706 Teaching English as a Second Language
This module surveys current theories and methodologies in the area of teaching English as a second language.

MAAL 707 Variation and Standardisation in English
The module examines variation in a selection of the varieties of English used worldwide in areas including, but not confined to, phonetics, phonology, morphology, syntax and semantics. Also considered is the relation of variation to standardisation.

MAAL708 Sociolinguistics of English
The module analyses current theories and research methodologies within the area of sociolinguistics. Topics include, but are not confined to, phonetics, phonology, morphology, syntax and semantics. Also considered is the relation of variation to standardisation.

MAAL709 Psycholinguistics of English
The module explores current theories and research methodologies within the area of psycholinguistics. Topics include but are not restricted to first language acquisition, language impairment, and aspects of neurolinguistics.

MAAL710 Theories of Bilingualism
The module surveys aspects of bilingualism, including, but not restricted to, bilingual speech communities, code-switching, code-mixing, language maintenance and bilingual education.

MAAL 870 Dissertation
The dissertation is expected to be between 15 000 to 20 000 words or 100 pages of font 12 with double line spacing and it should be in the area of Applied English Linguistics.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN AFRICAN LANGUAGES AND CULTURE (MAAFL)

Duration	1.5 years
Minimum Credit Load	300 Credits
Maximum Credit Load	360 credits
ZNQF Level ZNQF-Level	9

1. PURPOSE OF THE PROGRAMME

This programme seeks to promote high conceptual and inquisitive skills in literary and cultural studies as well as develop student's competence within specialist literary studies areas. The degree also seeks to generate interest in research in literature and linguistics, widening the students' knowledge base, competencies, skills and capabilities in the fields of literature and linguistics. To prepare students to adapt to any environment by promoting high conceptual and inquisitive, entrepreneurial skills in the fields of literature and linguistics.

2. ENTRY REQUIREMENTS

To be eligible for the programme, an applicant must have a good first degree in any of the following:

(1) African Languages and Culture

(2) English and Communication

(2) Linguistics or an approved equivalent from any recognised university.

3. PROGRAMME CHARACTERISTICS

Areas of study: African languages, African literature, Bantu linguistics and culture

Specialist focus: research in Bantu linguistics, literature and culture

Orientation: research and innovation-oriented. teaching and learning are practically oriented

Distinctive features: The programme employs a student-centred approach and offers them an opportunity to participate in national development literature and linguistics programmes.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Master of Arts in African Languages and Culture degree programme is designed to enhance the competencies of graduates in the fields of African Languages, African Literature, Bantu Linguistics, Culture and University Lectureship.

Further studies: Doctoral studies in Literature, Linguistics or in inter/multidisciplinary programmes related to the disciplines of Literature and Linguistics.

5. PROGRAMME DELIVERY

Teaching and learning methods: lectures, tutorials, seminars, group work, research projects, individual independent study

Assessment methods: Written and oral examinations, tests, seminar presentations, and final year research project report.

6. PROGRAMME COMPETENCES

Generic:

- Multidisciplinarity: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Qualitative and innovative reasoning: Capability to do action research, assess and analyse qualitative data and employ innovative solutions in the interpretation of literary and cultural studies
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using theoretical and logical arguments.
- Ethical commitment: Professional integrity and awareness of the role of literary and cultural studies in humanity's development
- Entrepreneurial skills: Capability to identify and create new business ventures in the literary and cultural studies sector based on knowledge and new thinking paradigms

Discipline specific:

- Deep knowledge: Ability to read, analyse and interpret texts allowing for the establishment of diverse and complex literary and theoretical interpretations and interventions.
- Production skills: Ability to come up with literary theories that inform the complex interpretation of texts
- Problem-solving skills: Ability to read, analyse and solve a wide range of literary and cultural studies issues with the intention of informing policy on a wide range of issues affecting society.

INTENDED LEARNING OUTCOMES

- Ability to demonstrate knowledge and understanding of Bantu linguistics, literature and culture at post-graduate level.
- Ability to use principles of African languages to understand personal and interpersonal communication.
- Ability to identify and define different language, literary and communication systems and practices.
- Ability to comparatively analyse texts in African languages and Diasporan literature.
- Ability to identify and solve problems which preoccupy authors and African literary critics
- Use appropriate research methods to create new insights into African literary and language studies
- Create new avenues for repositioning African languages

PROGRAMME STRUCTURE

LEVEL 1 SEMESTER 1		
MAAFL 701	Comparative Bantu Linguistics	20
MAAFL 702	Zimbabwean Literature in Relation to African and Diasporan Literatures	20
MAAFL 703	Culture and Sustainable Development	20
LEVEL 1 SEMESTER 2		
MAAFL 708	Language Change	20
MAAFL 709	Multiculturalism, Intercultural Communication	20
MAAFL 710	Trends in Contemporary African and Diasporan Oral Literature African Language Studies	20
LEVEL 2 SEMESTER 1		

MAAFL750 Dissertation 90

MODULE SYNOPSES

MAAFL 701 Comparative Bantu Linguistics
The module shall expose students to the phonology, morphology and syntax of African languages. Utilising linguistic theories the module shall be preoccupied with comparatively appreciating the phonology, and morphology of African languages. The module shall comparatively engage morphological and syntactic theories of linguistics which are applied to the study of a cohort of African languages to establish the phonological, morphological and syntactic differences and similarities among the languages.

MAAFL 702 Zimbabwean Literature in Relation to African and Diasporan Literatures
The module shall provide students with an opportunity to apply their knowledge of literary theory and criticism to appreciate African languages, literature and Diasporan literature to establish the contemporary trends in literature. The links that bind Africa and its diaspora are also appreciated within the context of literary studies.

MAAFL 703 Culture and Sustainable Development
The module shall be dedicated to making a critical appraisal of the relationship between a people's philosophy and social transformation. Furthermore, elements of culture are appreciated within the context of their role in driving development.

MAAFL 708 Language Change
The module shall dwell upon phonological, morphological and syntactic (among other) changes. The module shall explore factors that motivate language change as well as the different types of change that terms or concepts undergo over time.

MAAFL 709 Multiculturalism and Intercultural Communication
The module shall be dedicated to multiculturalism as well as theories and practices of communication across cultures. Intercultural communication has a long history in the world. For centuries, people, goods and ideas have crossed regions, nations and even continents as a result of the development of communication technologies. Interest revolves around institutions of the contemporary world as composed of varied sets of participants whose communication participation reflects cultural background, tradition, and philosophy of life.

MAAFL 710 Trends in Contemporary African and Diasporan Oral Literature
The module shall examine the trends in African and Diasporan oral literature. It offers the opportunity to study the relationship between orality and religion, orality and gender, orality and music and even orality, history and politics. In the process, students shall interrogate how oral literature, through its idiosyncratic formal features, both endorses and reflects the efforts of African people (wherever they may be) to negotiate the political, social, and cultural contexts in which they live.

MAAFL 800 Dissertation
The dissertation module is a substantial piece of postgraduate work (between 15000 and 20 000 words) that engages the student in independent and original work in the field of African cultural studies. The project shall be based on a topic agreed between the student and the department. It will draw on the research interests of the student in African Languages, literature and culture.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN AFRICAN AND DIASPORAN LITERATURE (AH21)

Duration	18 months
Minimum Credit Load	240
Maximum Credit Load	300
ZNQF Level	9

1. PURPOSE OF THE PROGRAMME

This programme seeks to promote high conceptual and inquisitive skills in literary studies as well as develop student's competence within specialist literary studies areas. The degree also seeks to generate interest in research in literature, widening the students' knowledge base,

competencies, skills and capabilities in the field of literature. To prepare students to adapt to any environment by promoting high conceptual and inquisitive, entrepreneurial skills in the field of literature.

2. ENTRY REQUIREMENTS

To be eligible for the programme, an applicant must have a good first degree in any of the following:

(1) English and Communication

(2) African Languages and Culture or an approved equivalent from any recognised university.

3. PROGRAMME CHARACTERISTICS

Areas of Study: African Literature, Diasporan Literature, Identity Politics, Gender Politics, Postcoloniality.

Specialist Focus: Research in African Literature, Diasporan Literature and Cultural Studies

Orientation: Research and innovation oriented. Teaching and learning are practically oriented

Distinctive Features: The programme employs a student-centred approach and offers them an opportunity to participate in national development archaeology programmes, and also imparts knowledge on sustainable development issues

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Master of Arts in African and Diasporan Literature degree programme is designed to enhance the competencies of graduates in the fields of African Literature, Diasporan Literature, Cultural Studies and University Lectureship.

Further Studies: Doctoral studies in Literature or in inter/multidisciplinary programmes related to the discipline of Literature

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, research project, individual independent study

Assessment Methods: Written and oral examinations, tests, seminar presentations, final year research project report.

6. PROGRAMME COMPETENCES

Generic:

- Multidisciplinarity: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Qualitative and innovative reasoning: Capability to do action research, assess and analyse qualitative data and employ innovative solutions in the interpretation of literary studies
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using theoretical and logical arguments.
- Ethical commitment: Professional integrity and awareness of the role of cultural and literary studies in humanity's development
- Entrepreneurial skills: Capability to identify and create new business ventures in cultural and literary studies based on knowledge and new thinking paradigms

Discipline specific:

- Deep knowledge: Ability to read, analyse and interpret texts
- Production skills: Ability to theorise and conceptualise literary issues
- Problem-solving skills: Ability to read, interpret and solve a wide range of literary issues

7. INTENDED LEARNING OUTCOMES

- Ability to demonstrate knowledge, understanding and mastery of literature.
- Ability to use principles of literature to understand societal issues
- Ability to identify and define different literary systems and practices.
- Ability to analyse literary texts of various genres.
- Ability to identify and solve problems which preoccupy writers.
- Use appropriate research methods to create new insights into literary theories and practices.
- Develop new literary practices and technologies that enhance efficiencies and outputs of the publishing industry.
- Communicate effectively and present information using multi-media to both experts and non-experts in the communication industry.

DEGREE STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
MAADL701	Postcolonial Cultures of Encounter and Settlement in Africa	20
MAADL702	Themes and Perspectives in American Literature	20
MAADL704	Critical Theory from Enlightenment to Modernity	20
Level 1 Semester 2		
MAADL703	Language, Ideology and Gender in Literature	20
MAADL709	Autobiography and Identity	20
MAADL708	Mediating Southern African Identities	20
Level 2 Semester 1		
MAADL870	Dissertation	90

MODULE SYNOPSES

MAADL701 Postcolonial Cultures of Encounter and Settlement in Africa
This module examines a range of literary texts from Africa and its thrust will be to interrogate the often traumatic processes of postcolonial encounter and settlement. Theories such as Postcoloniality, Pan Africanism and Negritudism inform the module. Encounter represents those moments of engagement between Africa and the West, both in the physical and cultural or discursive senses.

MAADL702 Themes and Perspectives in American Literature
The module examines African-American literary texts and focuses on the history and culture of the African-American people. Critical attention will be given to specific themes such as the history of slavery and the slave trade, race relations, questions of identity and belonging, alienation and participation. Themes and perspectives will be examined in the context of ideas and critics at different historical phases in the history of African-American literature.

MAADL703 Language, Ideology and Gender in Literature
The module focuses on the interface between language, ideology and gender in literature. It looks at how language and ideology are critical areas of contestation in gender discourses. Perspectives on issues of gender are examined using texts that present different cultural, historical and ideological issues on gender.

MAADL704 Critical Theory from Enlightenment to Modernity
The module aims to study and critically interrogate critical theory and modes of perception that constructed Africa as the "other" in relation to the West.

MAADL708 Mediating Southern African Identities

The module investigates how southern African identities have been shaped historically and in the present by claims of location, tradition, nationhood, literary imagination and culture. While identity issues have been theorised, the question of how identities are mediated remains implicit.

MAADL709 Autobiography and Identity

The module traces shifts in self-conception and self-representation. It looks at a diverse range of texts from around the world and will consider key questions raised in the theories of autobiography and literary theories in general. The module also considers the historical and cultural capital that has been invested in the creation of self and others by auto biographers.

MAADL870 Dissertation

The dissertation is expected to be between 15 000 to 20 000 words or 100 pages of font 12 with double line spacing and it should be in the area of African and Diasporan Literature.

DEPARTMENT OF MEDIA, COMMUNICATION, FILM AND THEATRE ARTS STUDIES

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN FILM AND THEATRE ARTS STUDIES (AH33)

Duration	4 years
Actual Credit Load	540
Minimum Credit Load	480
Maximum Credit Load	540
Maximum MBKs Credit Load	408
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

1.1 To provide a supportive environment for both theoretical and applied approaches and open, critical debate on the role of film and performing arts worldwide. (i.e. To provide a teaching, rehearsal and performance space for realising the union of theory and practice)

1.2. To engage students in the creative and critical practices of performance and screen studies in 1.3 comprehensive and broadly-based manner within the collaborative and rigorous learning environment.

1.4. To equip graduates personally and educationally for a variety of careers and their further development by realising their creative potential and developing their critical faculties and transferable skills.

1.5. To foster creativity and research skills that shall deepen and extend knowledge of performance and screen cultures in theory and practice within and beyond the curriculum.

1.6. To develop and advance theoretical, critical and creative aspects of performance and screen studies.

2.0 ENTRY REQUIREMENTS

NORMAL ENTRY

For normal entry into the Department of Film and Theatre Arts Studies (HFTA), candidates must satisfy the normal entry requirements specified in the Faculty Regulations and General Regulations. In so doing must satisfy the following:

Must have obtained at least five “O” Level passes or equivalent, including English Language. Must have obtained a pass in any two “A” Level subjects. In addition, the Department have auditions to test a student’s engagement with film and/or theatre. Evidence of a real commitment to film and/or acting a long-standing interest in theatre and knowledge of a range of theatrical forms and genres shall be an added advantage.

SPECIAL ENTRY

Refer to Section 3.2 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

MATURE ENTRY

Refer to section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

Bachelor of Arts in Film and Theatre Arts Studies is a 4 Year full-time degree programme. Normally, a student shall be required to complete the programme in not less than four years from the date of first registration. Among some modules the student shall do the following: Genres of Film, Film Development in Zimbabwe and Africa, Theories of Film, Global Film Marketing and Distribution, Make-up and Costume Design, Arts Management, Events and Tour Management.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates from the Department of Film and Theatre Arts Studies have career opportunities in the following areas: Acting, directing, photography, lighting and sound engineering, scenic and costume designing, events and institutional management, theatre managers, editing, advertising, graphic designing, consultancy, media industry, education, stage performing industry, public relations, etc. In addition, a graduate from the Department can pursue MA and PhD studies in Film, Theatre, Arts Management, Television and Media Studies.

5.0 PROGRAMME DELIVERY

Normally, the mode of delivery is through lectures, assignments, in-class tests and class presentations, practical demonstrations and on-set productions.

6.0 LEARNING OUTCOMES

6.1. Engage heritage-based indigenous knowledge systems and skills in tackling issues to advance commercialisation and national development through film and theatre.

6.2. Capacity to network effectively with stakeholders in film and theatre as well as corporates.

6.3. To appropriate research methodologies in practical audience-based research that informs the evaluation of film and theatre productions.

6.4. Identify and solve problems and challenges faced by the film and theatre industries in Zimbabwe with a view of causing a paradigm shift from the normalised ways of doing things.

6.5. Initiate and maintain communication processes which lead to community engagement.

6.7. Demonstrate competence in directing, script writing, acting, editing, events management, video production, dance and choreography, arts administration and film/ theatre design.

6.8. To apply theoretical and practical skills required in film and theatre production.

7.0 GENERAL PROVISIONS

7.1. Bachelor of Arts Honours in Film and Theatre Arts Studies is a full-time degree programme. Normally, a student shall be required to complete the programme in not less than four years from the date of first registration.

7.2. At the Third Level of the Degree programme, Honours students go on Work- Related Learning for 10-12 months.

7.3. The degree programme offers pre-requisite, core/compulsory and elective/optional modules.

At least four of the modules registered for the semester should be from within the department.

7.4. Normally, where a prerequisite module is involved, a candidate will be required to pass it before taking higher modules.

7.5. Each module is worth twelve (12) credits except for Work-Related Learning which is worth hundred and twenty credits (120) and dissertation which is worth twenty-four (24) credits to graduate one needs to attain a minimum of 480 but would not exceed a maximum of 540 credits.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment: Written assignments, in-class tests, presentations—15%

Practical Assessment: Portfolio of live performances, recorded practical work and editing—10 %

Written Examinations: End of semester written examinations—75%

9.0 PROVISION FOR PROGRESSION

Refer to Section6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty of Arts of Arts and Humanities Regulations and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

*HFTA 430 Research Project 24

Level 4 Elective Modules (A student should do one elective in this level)

HFTA 413 Children's Theatre and Animation (practical) 12
HFTA 406 Film and Theatre Reviews 12

MODULE SYNOPSES

HFTA104 Genres of Film and Theatre

The module gives an overview of the forms and evolution of film. These include black film aesthetics, feature films, documentaries, comedy and action films among others. An appreciation of the roles or functions of these genres, as well as an understanding of the techniques employed, provides the student with a wide variety of options for film production. Genres of theatre such as Theatre for Development, Children's Theatre and Theatre of the Oppressed are examined.

HFTA 112 History and Trends in African Theatre

This module deals with the history, nature, origins and functions of theatre in African society. It also looks at trends and patterns in African theatre, focusing on African childhood play, music, dance, ritual and African comedies of the colonial and post-colonial eras.

HFTA 114 Film Development in Zimbabwe and Africa

The module provides an overview of the history of film in Zimbabwe and Africa from the early twentieth century to the present day. This overview emphasises on the socio-economic and political contexts, which influenced the evolution of each stage of Zimbabwean and African film in selected countries and/ or regions. The relationship between film production and context is examined.

HFTA119 Theories of Film

The module introduces various theories that inform the growth and interpretation of film. Students should be able to grasp, critique and apply the theories learnt to the various modules taught across the curriculum. Such theories include but are not limited to the following: expressionism, realism, Marxism, semiotics, audience reception theories and black film aesthetics.

CS 131 Basic Communication Skills

Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University

HCS 135 Introduction to Information Technology

Refer to Faculty of Science and Technology Regulations

HFTA 121 Cinematography (practical)

This module involves the development of skills such as theme or concept selection and analysis, titling, characterising, identity construction, mood and tone creation or identification, analysis and interpretation of the images created. It is both a theoretical and practical module.

HFTA 107 Production Practicum (Play Making)

This is a practical module which offers practical skills and experience to actor training emphasises the creation and production of new theatre and embraces a multicultural and multi-disciplined methodology. This module focuses on-stage performances and students take classes and workshops in voice, movement, dance, acting (including script-based work, storytelling and devised work), improvisation and devising skills. The students explore the expressive potential of the voice and body through observation of the natural world, space, poetry, paintings and people. The semester culminates in a major performance project.

HFTA 116 Theatre in Zimbabwe

This module acquaints students with the emergence of theatre activities; groups and institutions in Zimbabwe from colonial times to date. The module discusses theatre historiography and focuses on the trends and patterns of theatre activities in Zimbabwe. Students will be expected to familiarise themselves with colonial cultural institutions like ZACT, NTO, Reps Theatre etc and the role they played in the life of the nation. A comparative analysis of the colonial cultural institutions and the community theatre, semi-professional and professional groups such as Savannah Trust, Amakhosi Theatre and Film Productions and Rooftop Promotions etc emerging in the post-colonial era is done.

HFTA122 Global Film Marketing and Distribution

The aim of this module is to broaden students' understanding of the global trends in terms of film financing, production, distribution, marketing and exhibition. Special emphasis is placed on how Hollywood, Bollywood and Hollywood have influenced and continue to influence the global flow of information. The students study the role of multinational Studios such as Universal Pictures, Warner Brothers, Disney Pictures, etc in influencing the politics, ideology and economics of marketing and distribution of film images. Students analyse the factors that hinder effective marketing and distribution in Third World nations paying particular attention to Africa, Latin America and Asia. In this endeavour, students identify and make a critical analysis of the factors that make Hollywood the centre of global marketing and distribution of film images.

CS 132 Extended Communication Skills

Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

HFTA 118 Radio Performance (practical)

The module introduces students to the principles of radio performance. It establishes and reinforces the similarities and differences between radio, stage and television performances. Students are expected to make a critical evaluation of radio performance and also present a practical radio performance piece at the end of the semester.

HFTA 108 Film, Theatre and Graphic Designing (practical)

This module introduces how elements of graphic designing such as audio, video, colour, lighting, sound, and written texts as forms of multimedia are combined with acting in film and theatrical productions.

HFTA 120 Make-up and Costume Design

This is a theoretical and practical module that enables students to be able to apply make-up and design costumes for different actors and situations determined by particular moods, characterisation, settings and genres.

HFTA 201 Script Writing

The module teaches students script writing of dramatic texts and/ or ideas of performance for the stage, small screen and big screen. Focus may be placed on the conventions required for the theatrical performance of dramatic texts and/or the explorations of putting performance theory into practice and historical contexts. In consultation with the instructor, the student develops a study and work plan appropriate to his/her interests.

HFTA 202 Principles of Film/Theatre Directing

The module introduces students to the principles of film directing. It outlines and discusses the responsibilities of a director during the preparation and shooting stages. Students familiarise themselves with principles such as directing, budgeting, managing cast and channels of communication between director and producer. It prepares students for onset film/theatre directing.

HFTA 205 Theatre and Performance Theories

This module introduces students to theories that inform the growth and interpretation of theatre studies. Students should grasp, critique and practically apply the various theories as espoused by various theatre scholars such as Stanislavsky's realist acting, Grotowski's *poor theatre*, Brecht's *epic theatre*, Augusto Boal's *theatre of the oppressed* and invisible theatre, Scott's, *the hidden transcript,* Taylor's theory of scenarios, Sandi- Diaz's theory of anti- scenarios, Zenenga's Hit- and- run among others.

HFTA 221 Film Editing (practical)

The aim of this module is to prepare students to use visual still and moving imagery to communicate filmic messages. Upon completion of this course, students define a story, provide reasons why and how stories are constructed, integrate storytelling concepts into photography and moving image mediums. The students are expected to apply the visual concepts of photography and moving image communication. Students are expected to become proficient with capturing and manipulating digital image, sound, and video. Integrate different media (text, images, sound, and video) into a coherent narrative. Students formulate an effective storytelling strategy to articulate one's design; from conceptualisation, planning and visualisation to development and execution. By the end of the module, students are expected to self-reflexively offer a critique of their work and use different perspectives in analysing different film narratives

GS 201 Introduction to Gender Studies

Refer to the Department of Gender Studies.

ENT 131 Entrepreneurship 1

Refer to the Faculty of Commerce Regulations

HFTA 206 Research Methods in Film and Theatre

This module introduces students to research methods useful in the study of film and theatre Arts. It is aimed at acquainting students with some major research methodological aspects of the discipline and its practice. These research skills assist students' preparation for their dissertations and life after college as researchers.

HFTA 220 Documentary

The module focuses on appropriating indigenous stories/physical environments, myths, legends and autobiographies in developing and appreciating the documentary genre. It also seeks to turn students into documentary practitioners in the various genres of research, scripting, interviewing, analysis, recording and editing among others.

HFTA 217 Drama in Zimbabwe

This module introduces students to the study of written and published drama, also known as plays written in English by Zimbabwean dramatists. An attempt is made to cover both female and male dramatists from different epochs in the history of Zimbabwe. Factors shaping the content and form of the drama are analysed and grasped by the students at each period in their learning.

HFTA 207 Comparative Theatre Studies in Africa

The module traces the history and development of theatre activities in different regions of Africa and the world. It focuses on pre-colonial theatre to contemporary theatre assessing the similarities, differences and influences that different regions have to the present day. Students are expected to analyse the different levels of development and the possible causes of the disparities.

Work-Related Learning

HFTA 301: Work-Related Learning Report

HFTA 302: Academic Supervisor's Report

HFTA 303: Employer's Assessment Report

HFTA 205 Film, Theatre and Advertising

The module interrogates the role of film and theatre in advertising. The focus is on film and theatre in relation to the history of advertising as an ideology, advertising as a cultural industry and marketing function. Forms of advertising in cultural and critical theory as well as ethical concerns in advertising are examined. Students are expected to come up with an advertisement of their own.

HFTA 209 Film and Stage Lighting (practical)

Students are expected to know and experiment with different types of lighting systems in film and on stage. The lighting is designed to draw different moods, feelings, and emotions as well as define characterisation.

HFTA 218 Film Sound Effects (practical)

This is a practical module that introduces to students different ways of creating sound effects, unloading and synthesising it with visuals. Students experiment with different sounds to evoke different moods, feelings and emotions in film.

HFTA 219 Arts Reporting

This module focuses on developing skills in identifying and writing or articulating stories and events in arts, culture and entertainment for both the print and electronic media. It also involves reviewing performances such as dance productions, musicals art exhibitions etc.

HFTA 405 Film and Video Production (practical)

This is a practical module that helps students with hands-on approach to film and video production. Students are expected to come up with their low-budget production(s) by the end of the semester.

HFTA 401 Advanced Acting

In this module acting theory is put into practice as students implement theories and techniques of acting. This is achieved through fully-fledged production, in-class workshops and acting pieces. Candidates are expected to produce at least one practical project by the end of the semester.

HFTA 402 Choreography and Dance Production (Practical)
This is a practical module that explores dance aesthetics from different historical periods to contemporary times. It explores the fundamental concerns of the performer's art: relaxation, concentration, movement, voice production, space and expression. It is designed to provide a detailed overview of all aspects of dance movements, encompassing lighting, sound, set, props, and costume procedures. The semester culminates in at least one polished dance production from the class.

HFTA 413: Theatre and Film Design
The module explores fundamentals and techniques used in theatre and film design. Students are introduced to basic design aspects of lighting, costume, scenic lighting and sound design.

HFTA 404 Arts Management

The thrust of this module is to prepare students to be entrepreneurs in the film and theatre industry. They are equipped with skills on how to develop and run theatre and/ or film production companies. Aspects such as concept design, constitution formulation, management theories, recruitment and selection, motivation theories, advertising and marketing are examined.

HFTA 415 Events and Tour Management

This module seeks to develop in students the skills of conceptualising and managing arts events that include the arts and other non-artistic events. The module provides an overview of the event and tour management industries focusing on the techniques and procedures for producing successful and sustainable events and tours.

HFTA 403 Stage Craft

The module explores fundamentals and techniques used in theatre/performance and performance spaces. Students are introduced to basic stagecraft i.e. lighting, models of performance spaces and stage anatomy. Material may focus on classic or contemporary drama or original creations. The module is both theoretical and practical**.**

HFTA 430 Research Project

This is a project of between 15 000 -20 000 words, based on wide research with the assistance of a supervisor. The research should give evidence of independent enquiry and familiarity with the literature of film and/ or theatre arts. Its weight is equivalent to that of two core modules. The dissertation is presented to a panel of the Departmental Board, which determines part of its score.

HFTA 413 Children's Theatre and Animation

This module introduces students to the characteristics of children's drama. Students are introduced to theories of animation and are expected to analyse the ideological underpinnings of selected animated products and suggest factors that encourage and/ or inhibit the growth of the animation film industry in Zimbabwe.

HFTA 406 Film and Theatre Reviews

Students are expected to use the correct language/diction to make a critical appreciation of film and theatrical works of art and suggest ways the works can be improved.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN MEDIA, ANIMATION AND ARTIFICIAL INTELLIGENCE (MAAI)

Duration	4 years
Credit load	490
Minimum Credit load	480
Maximum Credit load	540
Maximum MBKs Credit load	406
ZNQF Level	SADC-QF-Level 8

1.0 PURPOSE OF PROGRAMME

This is a four-year programme designed to produce highly qualified and dynamic personnel that will meet the increasing demand for Animators in the Creative and Multimedia industries. Students going through the programme learn essential knowledge and skills that enable them to produce client-ready animation production products and technical skills, insight and platforms to apply their creative talent to a successful career in 2D or 3D animation in film, computer games, visualisation, motion capture and advertising industries.

2.0 ENTRY REQUIREMENTS

2.1 NORMAL ENTRY

For normal entry, a candidate should: -

- have satisfied the General Regulations,
- have a pass in English Language and a pass in Mathematics at "O" Level, and

Advanced Level pass in Art and Design, Design and Technology, Fashion Design, Fine Arts, History, Geometry and Mechanical/Building Drawing, Computer Science or any other relevant subject will be an added advantage.

2.2 Special Entry

Holders of a Diploma in Fine Art, Art and design, Computer or any other Creative Media

discipline and have at least five years of hands-on experience may apply for admission.

A minimum of a National Diploma in Computer Science, Art and Design or equivalent from a

recognised institution, or

A recognised teaching qualification with a specialisation in Computer Science or Art and

Design.

2.3 Mature Entry

Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of study:** Animation, Game Design, Artificial Intelligence

3.2 **Specialist focus:** In a world where visual communication is the norm, animators are in high demand in TV, movies, gaming, corporate films, education and mainstream news media.

3.3 **Orientation:** Develop creative and technical abilities in character animation, visual storytelling, compositing and editing.

3.4 **Distinctive features**: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability: Graduates have an opportunity to get employed in among the following:
Animator, 3d designer, 2d designer,3D Modelling, Virtual Designer, Creative Director, Applications designer, Filmmaker, Game Designer, Artificial Intelligence Designer

4.2 FURTHER STUDIES

Masters studies in Fine Art, Graphic Design, Visual Communication Studies, Film.

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertation, lecture notes, assisted private studies and field trips.

5.2 Assessment methods: Written and oral examinations, tests, work-related learning, seminar presentations, Art Exhibitions, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment

6.0 PROGRAMME COMPETENCIES

6.1 Generic:

- Multidisciplinary: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Quantitative and innovative reasoning: Capability to draw on big data and use analytics for informed decision-making and strive to seek new ways of doing things
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using logical arguments and proven facts
- Ethical commitment: Professional integrity and awareness of the impact of media (both conventional and new digital media) on civil and political society, nation-states, and business
- Entrepreneurial skills: Capability to identify and create new business ventures based on knowledge, new thinking paradigms and new information and communication technologies.

6.2 Discipline specific:

- Deep knowledge: Ability to analyse communication and media phenomena, and conduct media and communication businesses that are ethically bound.
- Production skills: Use the latest software (Maya, 3D Studio Max, Cinema 4D Photoshop, Toon boom, Flash, TV paint), production methods and CG (computer graphic) equipment

- Technology development skills: Ability to harness new information and communication technologies for purposes of content production for both legacy and digital media. Practice techniques such as the performance capture process that animators use in the best films.
- Problem-solving skills: Ability to solve a wide range of problems in the animation and creative industries by identifying their fundamental aspects and using both theoretical and empirical methods.
- Analytical and computational skills: Ability to originate and produce media texts on computers and smartphones, as well as use data to analyse communication, media and cultural phenomena using appropriate ICT packages.

7.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

Engage heritage-based indigenous knowledge systems and skills in tackling issues to advance commercialisation and national development.

Develop practical skills in animation, game design, and creative design

Use multimedia tools and technology in the creation, reproduction and distribution of visual messages.

Apply research skills in exploring animation practices for the purposes of generating alternative and futuristic solutions.

Demonstrate abilities that draw on thoughts and ideas in relation to an art historical timeline.

Articulate and discuss art within our own culture and the art of other cultures.

Exhibit an understanding of principles of management and entrepreneurship in creating viable visual communication and animation business enterprises.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment	**30%**
Written Examinations	**70%**

8.1 GENERAL PROVISIONS

- The Bachelor of Arts Honours Media, Animation and Artificial Intelligence Degree is a four-year programme.
- Students go for work-related learning during the third level of study.

8.2 PROGRAMME ASSESSMENT

Continuous Assessment: 30%: Test (20%), Practicals (5%), Assignments (5%)
Written Examinations: 70%
Practical modules do not have written exams thus continuous assessment will constitute 100%
Other: a) Research Project is assessed on the basis of a research project (75%) Oral presentation (25%).
b) Industrial Attachment/Work- Related Learning is assessed based on the Industrial Attachment/Work- Related Learning report (30%), assessment by Work Supervisor (50%), and assessment by Academic Supervisor (20%).

8.3 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

8.4 FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the Academic Regulations for Undergraduate Degrees of the Midlands State University.

9.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

9.1 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

10.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
MAAI 131	Art History	10

MODULE SYNOPSES

MAAI 131 Art History

The module introduces a range of skills required to study the History of Art, including the first-hand study of works of art. It is designed to familiarise students with some current debates on the subject and introduce them to a variety of theoretical positions.

MAAI 132 Life Drawing
This module trains students to develop the skills needed to visualise and create ideas for digital and interactive projects. Students will be exposed to various training and basic drawing techniques that will hone their ability to visualise ideas. Rudimentary exposure to digital tools will occur in the later part of this module to solidify the relevance of traditional skills in digital tools.

MAAI 133 History and Theory of Animation
This module surveys the development of animation over the past century. Students explore the evolution of the medium and how technology, economics, artistic trends, individual artists and national cultures have affected its development.

HCS 135 Introduction to Information Systems
Refer to the Department of Information Systems

CS 131 Basic Communication Skills
Refer to the Faculty of Arts and Humanities Regulations for Undergraduate Degrees

MAAI 134 Introduction to 2-Dimension Animation
This module introduces the language and principles of classical animation through analysis and decomposition of movement frame-by-frame. Students will explore the importance of effective timing and spacing, and how their manipulation can affect the feel of an action.

MAAI 135 Applied Colour Theory
The module helps students to create a logical structure for colour. While arranging color objects they will be able to create a mental mapping to develop a logical structure. The students will gain an extensive level of knowledge and skills when applying colour.

MAAI 136 Visual narrative and cinematography
This module examines the digital pre-visualisation processes of modern filmmaking which supplement traditional storyboarding techniques. Through demos and exercises, students learn how to utilise animation and modelling to stage and art-direct complex sequences before they proceed to actual production. Lighting, camera placement, movement, editing, and storytelling are also covered in class lectures. In this module, students will develop an understanding of film language, camera angles, composition, lighting, mise-en-scène, editing and sound design.

MAAI 137 Aesthetics
This module focuses on definitions and questions around aesthetics. It introduces the basic terminology of aesthetics as a philosophical subject. Through engagement with both ancient and modern conceptions of the relationship between art and philosophy, the module identifies and critiques key stages in the development of aesthetics from Plato and Aristotle's contrasting views on mimesis, the philosophical debates developed in the Enlightenment, Hume's views on 'taste', Kant's work on the 'beautiful' and the 'sublime', and the contrasting views of Schopenhauer and Nietzsche.

MAAI 138 Introduction to Artificial Intelligence and Media Practice
This module introduces the principles of Computational Intelligence and the main techniques applicable to control, as well as a variety of real-world problems. Students will gain an understanding of the principles and applicability of the most widely used AI tools appropriate for control, e.g. autonomous mobile robots.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees

MAAI 231 Introduction to C++ Programming
This module provides an introduction to the basic aspects of writing computer programmes in the C++ language. The module covers three areas: input/output through console and files, storage of data in computer memory through primitive variables, arrays, pointers and vectors and algorithm design strategies and implementation of algorithms

MAAI 232 3 Dimension Animation
This module introduces 3D animation production within the context of a small production pipeline. This module emphasises how character animation influences character personality and how performance and dialogue propel a story and create the mood. Students explore the choreography of a scene through action and composition. They learn the multifaceted issues of animated performances and the expression of emotion, timing, and the subtlety of character. Lip-synching and dialogue animation are presented. Students appreciate character rigging for animation.

MAAI 233 Principles of Audio-visual Effects
This module introduces students to special effects which will enhance their skills in creating animation. This module aims to equip students with the capability to create a range of effects for a variety of needs in animation production. Students study simulation through particle-based effects and an overview of soft body dynamics in the form of cloth, hair and fluid

simulation. Students learn to optimise their workflow to produce rendered effects that display natural behaviour and appearance.

MAAI 138 Animation Production Process
This module introduces traditional animation production within the context of a small production pipeline. Students work in teams with the goal of delivering a short animated project and creating an animated film. Students translate storyboard to layout and the choreography of camera and action to communicate the story effectively. Students deal with new dynamics within the team and general scene management.

MAAI 234 Stop Motion
The module helps the students to attest to the truth that stop-motion deals with reality. They must play a careful balance between gravity, actual materials and real light to bring your creations to life.

ENT 131 Entrepreneurship

MAAI234 Visual Effects and Environments
This module provides the opportunity for students to create architectural interiors and natural environments representing houses, buildings, and virtual worlds contained under one roof, in which to place the game characters. It explores and integrates design and technology to develop matte paintings, virtual sets and digital backgrounds. Students acquire the knowledge and practical skill sets for digital matte painting production.

MAAI 235 Motion Graphics
The module provides students with intermediate practical skills in motion graphics for film and television including animation and visual effects.

RTMP 238 Media and Communication Research Methods
This module introduces students to both qualitative and quantitative research in media. It distinguishes the main research approaches, that is, positivist/ scientific research the critical or social science research. The module focuses on research paradigms, research instruments, data collection as well as data analysis procedures and research ethics.

MAAI 237 Unmanned Production Systems
This is a practical module that equips students with skills and knowledge to effectively use Small Unmanned Aerial Systems (SUAS) or drones. It introduces them to aerial photography and drone camera systems, inspection, surveying and mapping, as well as SUAS operation best practices.

RTMP 241 Text, Audiences and Reception
The module traces the theoretical foundations of audience studies. Key issues include the perception of the text in different traditions, the role of new information technologies on audience studies and research in the field.

GS 231 Gender Studies
Refer to academic regulations for GC degrees.

MAAI 431 Digital Painting
This module covers digital painting techniques essential to producing artwork and background for concept art, animation and games. It covers speed drawing and painting and further enhances students' understanding of light and shade, colour, composition, atmospheric and linear perspectives, form and space to create an appropriate mood and emotion for the situation as required in the script and the illusion of volume and space.

MAAI 432 Sculpting and Rigging for Film
This module deals with issues relating to character modelling, rigging and setup based on production requirements. Students learn various character setups and explore appropriate modelling and rigging solutions for their characters. Topics include skeletons, forward/inverse kinematics and custom control panels. Students learn to set up a character for a wide range of complex body movements, with an emphasis on techniques for creating controls, which are realistic, flexible and can be intuitively animated.

MAAI 433 Capstone project
A capstone project is a culminating assignment, on which students usually work during their final year in school or at the end of the academic programmes. It requires different intellectual activities. This project helps young people learn how to find and analyse information and how to work with it efficiently.

MAAI 434 Curatorship

The module focuses on the historical evolution of "curatorship" and exhibition making. It is devoted to the purpose of the exhibition, examining ideas related to the nature of the object, the narrative of the subject, and the experimental potentiality of the format. Key areas discussed include representation and presentation in animation and design and the strategies and languages for display and communication within a wide variety of media.

MAAI 435 Research Project
Students write a research project of not more than 9 000 words in a Media, Animation and AI-related area.

MAAI 436 Data Analytics
This module is designed to provide students with an introduction to the statistical principles used in data analytics and their application using a suitable statistical package. The module begins by considering how graphical summaries and numerical summaries, such as mean, median, standard deviation and correlation, can be used to describe and understand data. The issue of data handling is then considered. The basic concepts of inferential statistics are discussed and the use of methods for understanding the statistical importance of differences in means and proportions are described.

MAAI 437 Fundamentals of Game Design
This module studies the game mechanics – the rules intended to produce an enjoyable gameplay, and introduces the principles and methodologies behind the rules and play of games. It first studies the simplest types of games, board games and card games, and examines basic math and rules that make these simple games enjoyable. Students use this theoretical knowledge to create simple practical games that show their comprehension of what is enjoyable in games. Students learn the basics of physical game mechanics and expand their expertise by looking at various arcade-action games and other simple action games. They create prototypes of games and hold focus groups to get feedback on their designs.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN MULTI-MEDIA, GRAPHIC DESIGNING AND EDITING (AH28)

Duration	4 years
Credit load	508
Minimum Credit load	480
Maximum Credit load	540
Maximum MBKs Credit load	406
ZNQF Level	SADC-QF-Level 8

1.0 PURPOSE OF PROGRAMME
The Bachelor of Arts Honours Degree in Multi-Media, Graphic Design and Editing is a four-year programme designed to produce highly qualified and dynamic personnel that will meet the increasing demand for graphics and multimedia designers in the visual communication, design and multimedia industries. Students going through the programme will be provided with essential knowledge and skills that enable them to produce client-ready graphics and multimedia products that can be utilised both in the manual and digital environments. These include, among others, advertising, printing, motion graphics, web and interactive media. It intends to equip students with both academic and practical skills that enable them to enter the media industry as well as carry out research.

2.0 ENTRY REQUIREMENTS
2.1 NORMAL ENTRY
For normal entry, a candidate should: -

- have satisfied the General Regulations,
- have a pass in English Language and a pass in Mathematics at "O" Level, and
- Advanced Level pass in Computer Science, Art and Design, Design and Technology, Geometry and Mechanical/Building Drawing or any other relevant subject will be an added advantage

2.2 SPECIAL ENTRY
- Holders of a Diploma in Mass Communication, Art and Design, Public Relations or any other media discipline and have at least five years of hands-on experience may apply for admission.
- A minimum of a National Diploma in Computer Science, Art and Design or equivalent from a recognised institution, or
- A recognised teaching qualification with a specialisation in Computer Science or Art and Design.

2.3 MATURE ENTRY
Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of study:** Media studies, Graphic designing and Editing

3.2 **Specialist focus:** Multi-Media production with emphasis on theory and practical production in the digital age. The application of multimedia in many fields such as advertising, packaging, broadcasting, entertainment, printing, web and other fields which utilise the applied arts is characteristic of the twenty-first century.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on theory and practice in multi-media and graphic design.

3.4 **Distinctive features**: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centered approach.

4.1 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** HMGDE graduates have career opportunities in a wide range of industries which include the following: Animation, Applications designing, creative designing, brand development, graphic arts designing and management, Illustration, interface designing, web and video designing, copy editing, visual journalism, etc.

4.2 FURTHER STUDIES

Masters degree in Multi-Media, Graphic Design, Visual Communication Studies, Public Relations and Advertising, Marketing and International Relations.

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods; Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertations, lecture notes, assisted private studies and field trips.

5.2 Assessment methods Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment

6.0 PROGRAMME COMPETENCIES

6.1 GENERIC:

- Multidisciplinary: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Quantitative and innovative reasoning: Capability to draw on big data and use analytics for informed decision-making and strive to seek new ways of doing things
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using logical arguments and proven facts
- Ethical commitment: Professional integrity and awareness of the impact of media (both conventional and new digital media) on civil and political society, nation-states, and business
- Entrepreneurial skills: Capability to identify and create new business ventures based on knowledge, new thinking paradigms and new information and communication technologies.

6.2 DISCIPLINE SPECIFIC:

- Deep knowledge: Ability to analyse communication and media phenomena, and conduct media and communication businesses that are ethically bound.
- Production skills: Ability to expertly produce media content and texts such as newspaper (conventional and online), films and video, and for television and radio
- Technology development skills: Ability to harness new information and communication technologies for purposes of content production for both legacy and digital media.
- Problem-solving skills: Ability to solve a wide range of problems in Media, Culture and Society Studies by identifying their fundamental aspects and using both theoretical and empirical methods
- Analytical and computational skills: Ability to originate and produce media texts on computers and smartphones, as well as use data to analyse communication, media and cultural phenomena using appropriate ICT packages.

7.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

- Engage heritage-based indigenous knowledge systems and skills in tackling issues to advance commercialisation and national development.
- Demonstrate an understanding of Graphic Design and multimedia use in problem-solving.
- Use multimedia tools and technology in the creation, reproduction and distribution of visual messages.
- Apply research skills in exploring Graphic design and multimedia design practices for purposes of generating alternative and futuristic solutions.

- Demonstrate abilities that draw on thoughts and ideas in relation to an art historical timeline.
- Articulate and discuss art within our own culture and the art of other cultures.
- Exhibit an understanding of principles of management and entrepreneurship in creating viable visual communication and multimedia design business enterprises.
- Demonstrate ability to discuss and critique visual and multi-media design-related issues drawing from history and aesthetics principles.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment	**30%**
Written Examinations	**70%**

8.1 GENERAL PROVISIONS

- The Bachelor of Arts Multimedia, Graphic Design and Editing is a four-year programme.
- Students go for work-related learning during the third level of study.

8.2 PROGRAMME ASSESSMENT

Continuous Assessment: 30%: Test (20%), Practicals (5%), Assignments (5%)
Written Examinations: 70%
Practical modules do not have written exams thus continuous assessment will constitute 100%
Other: a) Research Project is assessed on the basis of a research project (75%) Oral presentation (25%).
b) Industrial Attachment/Work- Related Learning is assessed based on the Industrial Attachment/Work- Related Learning report (30%), assessment by Work Supervisor (50%), and assessment by Academic Supervisor (20%).

8.3 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

8.4 FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

9.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

9.1 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees of the Midlands State University.

MODULE SYNOPSES

MGDE 131 Theories of Communication and the Media
The module focuses on the theoretical foundations of communication and the media, the various theories that try to explain the communication process and mass media. The module will also look into the functions of the mass media, as well as questioning the critical roles that the media play in our society.

MAAI 131 Art History
This is an obligatory introductory module for all Creative students. The module is an introduction to a range of skills required to study the History of Art, including the first-hand study of works of art. It is designed to familiarise students with some current debates in the subject and introduce them to a variety of theoretical positions of which they need to be aware in the course of their degree.

MGDE 133 Drawing
As a skill that is fundamental to all art, drawing introduces students to the basic knowledge and proficiency in visual representation as well as elements and principles of design necessary for their development as artists. Focus is on the development of individual drawing styles, techniques and experimentation with different media and surfaces. Topics to be covered are peculiarities of anthropomorphic subjects, geomorphic and zoomorphic subjects, the anatomy and physiology of the human figure, still life drawing, rendering outdoor landscapes and townscapes, abstraction, perspective, foreshortening, and representing different views and elevations. The module gives a background to principles of design such as shape, colour, balance etc.

MAAI 137 Aesthetics
This module provides an introduction to the basic terminology of aesthetics as a philosophical subject. Through engagement with both ancient and modern conceptions of the relationship between art and philosophy, we will seek to identify and critique key stages in the development of this relation. Students study Plato and Aristotle's contrasting views on mimesis. Contemporary notions of 'aesthetics' are explored by the Enlightenment, Hume, Kant Schopenhauer and Nietzsche.

MAAI 135 Applied Colour Theory
This design foundations module introduces students to colour theory and its application in two and three-dimensional designs through lectures, demonstrations, extensive studio work and critiques. Emphasis is on developing students' ability to use colour effectively in two and three-dimensional design applications by studying traditional design elements, gestalt grouping principles, theories of colour organisation, colour and spatial perception, and colour interaction."

MGDE 135 Introduction to Typography
Typography is a critical skill for the graphic designer. In Module 3, students will get an overview of what typography is and the integral role it plays in graphic design. They will learn the history and evolution of the alphabet and typographic design and will advance into basic theory and practice. Students will learn typographic tools available in Adobe Illustrator software.

MGDE 236 Concept Development in Multimedia Design
This module will equip students with skills to solve specific design problems. Students will develop] concepts that are interdisciplinary, covering design, communication, e-commerce and marketing. In the process, the students will acquire wide knowledge in digital communication and social media marketing.

MGDE 137 Image Creation and Cinematography
Students will be expected to grasp the art of photography and visual storytelling. Students will be taught basics such as lighting, framing, camera motion and angles, filtration and depth of field among other things.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees

MGDE 232 Packaging and Display Design
Students will learn the essential elements of composition and layout design. Students will create dynamic typographic compositions in multi-page layout programme, Adobe InDesign. Students will reinforce vocabulary from earlier modules that apply to the typographic layout. Students will learn how to manipulate typographic principles to create dynamic layout designs.

RTMP 238 Research Methods for communication and media
This module introduces students to both qualitative and quantitative research in media. It distinguishes the main research approaches, that is, positivist/ scientific research the critical or social science research. The module explores the research design, research instruments, data collection as well as data analysis procedures. In particular, it covers issues relating to the universe/population, physical setting or geographical location for study, sampling techniques, that is, probability and non-probability sampling.

MGDE 235 Advanced Typography
Students advance their knowledge of typography by learning how to apply graphic design elements and principles to typographic design. The module is computer-based and expands knowledge of type anatomy, tools and vocabulary. It introduces the elements, principles and theories of design as they apply to typography. Students learn to create letterforms, lines of type and body copy, using Adobe Illustrator.

RTMP 241 Text, Audiences and Reception
The module traces the theoretical foundations of audience studies. Key issues include the perception of the text in different traditions, the role of new information technologies on audience studies and research in the field.

ENT 131 Entrepreneurship

MGDE 236 Advertising Design and Copywriting
The module introduces students to communicative practices in designing and copywriting in the industrial environment. It imparts knowledge and skills in visual communications and design processes in advertisements.

MGDE 238 Fundamentals of Game Design
This module focuses on understanding games in all kinds of formats: paper-based strategy games, electronic games, classic board games, etc. It examines the theoretical and practical aspects of making games. Focuses will be placed on its designing rules, strategies, methodologies, and organisational structures, and the design process from the ground up. Further analysis and evaluate the elements that make a game successful and how they function will be included. In addition, investigation on understanding design, interactivity, player’s choice, action, and outcome, rule-making and rule-breaking, the social interaction, the storytelling, and the emotion that games invoke.

MAAI 235 Motion Graphics
The module provides students with intermediate practical skills in motion graphics for film and television including animation and visual effects.

MGDE 240 Web Design and Development
This module introduces the fundamentals of web design and prototyping for websites. Students gain experience using software and writing HTML5 and CSS3 to design web pages. Additionally, students learn prototyping basics using Adobe XD, a sophisticated application built specifically to quickly produce clickable, HTML5/CSS3-compliant prototypes. This module addresses the opportunities and complexities in graphic design applied to the development of websites.

GS 231 Gender studies

RTMP 242 Critical Media Theory
This module distinguishes between Administrative research and Critical research. The module looks at the culture industry and focuses mainly on how cultural products are commodified, standardised, and modified to maximise profit. It also studies the works of critical thinkers in different epochs like the British Cultural Studies, African scholars and others.

MAAI 433 Capstone project
A capstone project is a culminating assignment, on which students usually work during their final year in school or at the end of the academic programme. It requires different intellectual activities. This project helps young people learn how to find and analyse information and how to work with it efficiently.

MGDE 434 Dissertation
Students will work on a topic related to media and cultural studies and compile a research report of about 9 000 words, under a supervisor.

CS 131 Basic Communication Skills
Refer to the Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

HCS 135 Introduction to Information Systems
Refer to the Department of Information Systems
.

MAAI 431 Digital Painting
This module covers digital painting techniques essential to produce artwork and background for concept art, animation and games. It covers speed drawing and painting and further enhances students' understanding of light and shade, colour, composition, atmospheric and linear perspectives, form and space to create an appropriate mood and emotion for the situation as required in the script and the illusion of volume and space.

MGDE 435 Advanced Print Design
Advanced Print Design offers an opportunity for students to propose, design, and produce printed graphic design products while expanding upon their experience in surface design and printing. Students will explore graphic design communication through group and individualised projects in a cohort, and under the supervision of Graphic Design Faculty.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN RADIO, TELEVISION AND MULTIMEDIA PRODUCTION (AH09)

Duration	4 years
Actual Credit load	514
Minimum Credit load	480
Maximum Credit load	540
Maximum MBKs Credit load	406
ZNQF Level	Level 8

1.0 PURPOSE OF PROGRAMME

The BA Honours in Radio, Television and Multimedia Production (RTMP) is structured to meet media and communication needs of Zimbabwe, the SADC region and beyond. It intends to equip students with both academic and practical skills that enable them to enter the broadcasting and multimedia industries as well as carry out research.

2.0 ENTRY REQUIREMENTS

2.1 Normal Entry

For normal entry, a candidate should: -

- have satisfied the General Academic Regulations,
- have a pass in English Language and a pass in Mathematics at "O" Level, and
- have a good pass in Literature in English at "A" level and another "A" level subject. A pass in History at A" Level is an added advantage.

2.2 SPECIAL ENTRY

- Holders of a Diploma in Mass Communication, Film Studies, or any other media discipline and have at least five years of hands-on experience may apply for admission.
- A person who has successfully done part of communication, Media Studies, Film Studies, or any other appropriate degree programme and subsequently passed some modules acceptable to the department and Senate, may also apply for special entry.

2.3 MATURE ENTRY

Refer to Section 3.3 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of study:** Broadcast Media and Multimedia Production (radio, film and video, photography and advertisements, digital media), Communication and the Media; Cultural Studies; and Communication.

3.2 **Specialist focus:** Broadcast Media Production, Digital Media Production, Broadcast Journalism, and Cultural Studies with emphasis on theory and practical production in the digital age

Research and innovation-oriented. Teaching and learning are professionally oriented and focused on theory and practice in broadcast and digital media, social identities and societal relations (cultural studies) and communication.

3.3 Distinctive features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability: HRTMP graduates have career opportunities in a wide range of industries which include the following:

Mainstream and alternative (communication) television, radio broadcasting media organisations, film and video production organisations, social research organisations, advertising agencies, information and publicity departments in different private and public sector organisations, non-governmental organisations, small screen digital enterprises, teaching and lecturing, media consultancy and entrepreneurship.

4.2 Further studies: Masters and Doctoral studies in Film and Television Studies, Broadcast Journalism, Media, Communication, Multimedia Studies and Advertising.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods**: Lectures, tutorials, seminars, group work, presentations, public lectures, practical demonstrations, screenings, guest lectures, dissertations, lecture notes, assisted private studies and field trips.

5.2 Assessment methods: Written and oral examinations, practical examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment.

6.0 PROGRAMME COMPETENCIES

6.1 Generic:

- Multidisciplinary: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Mixed methods and innovative reasoning: Capability to draw on big data and use analytics and interpretive world views for informed decision-making and continuously seeking new ways of doing things
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using logical arguments and proven facts

- Ethical commitment: Professional integrity and awareness of the impact of media (both conventional and new digital media) on civil and political society, nation-states, and business
- Entrepreneurial skills: Capability to identify and create new business ventures based on knowledge, new thinking paradigms and new information and communication technologies.

6.2 Discipline specific:

- Deep knowledge: Ability to analyse communication and media phenomena, and conduct media and communication businesses that are ethically bound.
- Production skills: Ability to expertly produce media content and texts such as broadcast progammes (conventional and online), films and video, for television, radio and digital platforms
- Technology development skills: Ability to harness new information and communication technologies for purposes of content production for both legacy and digital media.
- Problem-solving skills: Ability to solve a wide range of problems in Broadcast Media and Communication by identifying their fundamental aspects and using both theoretical and empirical methods
- Analytical and computational skills: Ability to originate and produce media texts on computers and smartphones, as well as use data to analyse communication, media and cultural phenomena using appropriate ICT packages.

7.0 LEARNING OUTCOMES

- Ability to demonstrate knowledge and understanding of Broadcast Media, Multimedia studies and production.
- Ability to use principles of Media Studies.
- Ability to identify and define different policies, systems and practices for Broadcast Media and Multimedia.
- Understanding of the Broadcast Media and Multimedia production practices, technology applications and associated products.
- Ability to analyse Broadcast Media and Multimedia systems and technological applications in business and industry.
- Ability to identify problems in Broadcast Media and Multimedia production and develop appropriate solutions.
- Ability to use appropriate research methods to create new insights into Radio, Television and Multi-media studies and production.
- Ability to develop new Broadcast Media and Multimedia production models, policies and practices that enhance efficiencies and output of the broadcast media and multimedia production function, business and industry.
- Ability to create new business ventures in the Media industry.
- Ability to communicate effectively and present information using multi-media to both experts and non-experts.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment **30%**
Written Examinations **70%**

8.1 GENERAL PROVISIONS

- The Bachelor of Arts Honours Radio, Television and Multimedia Honours Degree is a four-year programme.
- Students go for work-related learning during the third level of study.

8.2 PROGRAMME ASSESSMENT

Continuous Assessment: 30%: Test (20%), Practicals (5%), Assignments (5%)
Written Examinations: 70%
Practical modules do not have written exams thus continuous assessment will constitute 100%
Other: a) Research Project is assessed on the basis of a research project (75%) Oral presentation (25%).
b) Industrial Attachment/Work- Related Learning is assessed based on the Industrial Attachment/Work- Related Learning report (30%), assessment by Work Supervisor (50%), and assessment by Academic Supervisor (20%).

8.3 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

8.4 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for Undergraduate Degrees.

9.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

9.1 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

10.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
RTMP 131	Theories of Communication and the Media	10
RTMP 132	Socio-economic History of Zimbabwe since 1890	10
JDMS 137	News Gathering and Reporting	12
RTMP 134	Understanding Broadcast Media and Multi-Media	10

JDMS 438 Data Journalism	12
RTMP 442 Principles and Practice of Social Marketing	10
RTMP 443 Dissertation	24

MODULE SYNOPSES

RTMP 131 Theories of Communication and the Media
The module equips students with an in-depth appreciation of communication models and theories, communication categories, signs and codes in mass communication. Media and mediation and concepts of the "mass" and "community", "mass communication", society, power, integration and change are studied.

RTMP 132 Socio-Economic History of Zimbabwe Since 1890
The module introduces students to the history of Zimbabwe from the advent of colonial settler rule and the subsequent process of dispossession of the black population through the liberation struggle to the contemporary historical developments in the country. Students are introduced to debates about the historical and economic origins of current socio-political struggles in Zimbabwe and the place of the media in this history.

JDMS 137 News Gathering and Reporting
This is a practical module aimed at equipping students with the basic skills required in the production of news for print media, radio and television. Emphasis will be on practical skills including Basic news reporting, basic editing, news gathering and processing, managing sources and creating source bank, newsroom politics, freelancing, commissioned work and personal interest products.

RTMP 134 Understanding Broadcast and Multi-Media
The module introduces students to the history of broadcasting, the origins and development of radio and television broadcasting, as well as multimedia use. Learners are also introduced to the value chains of the respective media platforms, including technology, personnel and their roles, production genres, distribution and consumption with particular emphasis on Africa. Theories of multimedia and broadcast media analysis shall also be studied.

HCS 135
Refer to Academic Regulations for HCS degrees.

CS 131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

RTMP 135 Media in Zimbabwe and Africa
This module makes a historical analysis of the development of the media in Zimbabwe and Africa and the role that the media play in relation to the concepts of development, nation building and democracy. The study comprises the history, patterns of development and levels of performance of the media in different African countries. Key areas of focus include newspapers, broadcasting, film, music, advertising, new media and social media.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for Undergraduate Degrees.

RTMP 136 Media Law and Ethics
This module focuses on how social, historical and political forces influence the media law formulation process. The function of the media in a democracy and the debates that surround issues of censorship and self-regulation will also be examined. The module also seeks to critique ethical issues in media.

RTMP 137 Broadcasting Processes and Procedures
The module introduces students to stages in broadcasting production, i.e. pre-production, production and post-production. Focus is placed on broadcast media programming issues such as programme life cycle, as well as Script writing for different genres. Students are also introduced to types of broadcasting productions such as live studio productions, pre-recorded productions, electronic newsgathering/field productions and outside broadcasting productions.

RTMP 138 Principles of Marketing and the Media
The module focuses on the principles and practices of marketing, focusing on the role of the media in marketing. The module guides students in examining the scope and characteristics of marketing practice. It equips students with the basic principles of marketing, marketing functions, the marketing environment, marketing information systems and marketing research, the marketing mix, consumer behaviour and social responsibility in marketing.

RTMP 139 Fundamentals of Weblogging and Narrowcasting
The module introduces students to self-publishing online using weblogs (blogs) as well as disseminating information to targeted markets. Students learn how to create content for blogs and hyperlink it with other information sources. In addition, students learn how to identify market preferences, values, demographic attributes and subscription patterns to disseminate information that is relevant to particular niche markets.

RTMP 140 Cinematography
This is a theoretical/practical module in which students learn critical aspects of screen media production such as lighting, sound design, colour, camera movement, camera angles and shot sizes. Students are introduced to basic film and television language. The module's practical aspects develop the artistic and creative aspects of screen media production while introducing students to foundational technologies of film and TV.

RTMP 231 Radio Journalism and Studio Production
This is a practical module focused on writing, reporting and presenting broadcast news for a functioning newsroom. Students will learn to record and edit stories, and produce radio programmes or current affairs programmes. This module introduces the student to the craft of contemporary radio production. It focuses on the medium's aural aesthetic, technical language as well as concepts of radio journalism and production, marketing and audience needs.

RTMP 232 Television Journalism and Studio Production
This practical module equips students with skills and knowledge to craft news and other productions for television. It involves script writing, current affairs production and presenting of different television genres. Students are taught journalism as well as production competency for the television medium. It focuses on the medium's visual aesthetic, and technical language as well as concepts of television journalism and production, marketing and audience needs.

RTMP 233 Visual Effects and Motion Graphics
This is a practical module that combines digital technology and creative design. It equips students with the knowledge and skills required to produce high-quality visual graphics for film, advertising, TV, the Web, gaming and other creative outlets. Aspects include the creation of logos, motion graphics, colour correction, computer-generated effects, photo retouching, digital graphic design and aesthetics.

GS 231 Gender Studies

Refer to Academic Regulations for Gender Studies

ENT 235 Entrepreneurship
Refer to Academic Regulations for Entrepreneurship

JDMS 433 Business and Financial Reporting
This practical module will allow students to explore in-depth and actively engage with the world of business journalism. It helps students to develop their research, writing and reporting skills to allow them to write professional news, interviews, and features for the specialist and national press. Students will learn how to; read balance sheets; use databases and statistics to find stories about the health of companies and the economy and; assess the role of big business in the economic and political spheres.

JDMS 434 Science, Health and Environmental Reporting
This practical module seeks to equip students with specialised knowledge and reporting skills in the area of science, health and the environment. Sub-Saharan Africa and the world is afflicted by desertification, Global warming, water scarcity, air pollution and their related health impacts, and controversy over land use. The way media report on these issues influences both short-term and long-term decisions made by individuals, corporations and governments.

JDMS 439 Sports and Entertainment Reporting
This practical module introduces learners to sports and entertainment reporting as a field of specialised journalism. Instruction and practice will focus on reporting and writing stories on a variety of sports, arts, culture and entertainment topics. The module seeks to help students understand the contexts and pressures under which sports and entertainment journalism is produced in the modern media.

RTMP 237 Outside Broadcasting and Livestreaming
This is a practical module in which students will go into the field to record programmes like sports, rallies/meetings and produce magazines, mini-documentaries and profiles and transmit them live using relevant technologies.

RTMP 238 Media and Communication Research Methods

This module introduces students to both qualitative and quantitative research in media. It distinguishes the main research approaches, that is, positivist/ scientific research and the critical or social science research. The module focuses on research paradigms, research instruments, data collection as well as data analysis procedures and research ethics.

RTMP 239 Principles of Advertising
The module introduces students to communicative practices in the corporate environment. It imparts knowledge in advertising. The module also defines terms and analyses different types of advertising, advertising and the mass media, origins of consumer culture, advertising and the development of agencies, goods as satisfiers and goods as communicators and criticism of advertising.

RTMP 240 Multimedia and Cyber Publishing
This is a practical module that seeks to help students understand the meaning of multimedia and cyberspace publishing in journalism – its challenges, where it came from, how it is affecting or complimenting the traditional media operations and models of regulation. The module focuses on journalism writing for new media platforms including weblogs, podcasts and other multimedia.

RTMP 241 Texts, Audiences and Reception
The module traces the theoretical foundations of audience studies. Key issues include the perception of the text in different traditions, the role of new information technologies on audience studies and research in the field. The module studies the ritual of encoding and decoding texts, the history of reception and audience studies. Theories of reception and uses and influences of media text perceptions in different traditions are also studied.

RTMP 242 Critical Media Theory
This module distinguishes between administrative research and Critical research. The module looks at the culture industry and focuses is mainly on how cultural products are commodified, standardised, and modified to maximise profit. It also studies the works of critical thinkers in different epochs like the British Cultural Studies, African scholars and others.

RTMP 431 Drone Technology Operation
This is a practical course that equips students with skills and knowledge to effectively use Small Unmanned Aerial Systems (SUAS) or drones. It introduces them to aerial photography and drone camera systems, inspection, surveying and mapping, as well as SUAS operation best practices.

RTMP 432 Basic Broadcast Engineering and Production Management
The practical module gives students a basic understanding of setting up for radio, television and online production, including aspects of formats, studio design, infrastructure and ICT maintenance. Students also learn how to manage productions from both administrative and business management perspectives. This includes managing crew and cast, budgeting, marketing, commissioning and scheduling with emphasis on the functions of a producer.

RTMP 433 Documentary Production
This is a practical module that seeks to enable students to produce documentaries for audio-visual media. Students are introduced to theoretical underpinnings of the documentary genre, which they will employ in creating productions such as docu-dramas, radio documentaries, ethnographic documentaries, observational films etc. Students learn how to use contemporary technologies to create documentaries for dissemination through multimedia platforms

RTMP 434 Media Economics
This is an introductory module to media economics and media organisations as business organisations. The concept and role of the market and marketplace are analysed. The module also focuses on consumer choice and market responses, the media goods/ services market, market structures and market power, media ownership, their funding patterns implications on performance, monopoly and competition in the market, media labour and political economy.

RTMP 435 Cellphilmmaking and Mobile Journalism
The practical module introduces students to the art of making short films and gathering news using mobile phones. It covers cinematography techniques, audio recording, lighting, editing, and online content sharing attuned to mobile communication technology. The basics of audio-visual storytelling including techniques for visual content for mobile audiences are also covered in addition to organising workflows using low-cost apps and gear.

RTMP 436 Podcasting
This practical course acquaints students with podcasting skills. It encourages them to reflect on stories they disseminate, to evaluate their purpose and reach. Students gain insights into current trends and technologies in audio production and dissemination. Students are taught to gather sound using professional sound gear as well as cell phones. It improves students' broadcast skills, including writing, research, interviewing, editing and on-air presentation.

JDMS 436 Media, Governance and Human Rights
The module explores the role of the media in relation to human rights and governance issues. It seeks to equip students with knowledge of international human rights instruments and the state's obligations to preserve, alert and protect the rights of its citizens. The media's informative, educative and watchdog roles shall be related to human rights in light of the concept of the global village, cultural diversity, neo-colonialism and imperial agendas. The module critiques human rights as a means to oppression and also as a means to emancipation.

RTMP 438 Global Media Structures
This explores the nature and structure of the global media systems in the developed and developing world. It covers concepts such as imperialism, international relations and international media structures; the nature of the international flow of information in a uni-polar world, the electromagnetic spectrum and the politics of space allocation, public, private and corporate ownership of media organisations and distribution networks.

RTMP 439 The Media and Specific Communities
The module defines and analyses the role of the media in maintaining and/or fracturing the stability of modern societies through the examination of the coverage of specific social issues such as gender, race, class and ethnicity. Other topics include media and children, "victims", opposition parties and others. Specific case studies will be drawn from Zimbabwe, Africa and the world.

JDMS 437 Political Economy and the Media
The module focuses on the nexus between politics and the economy. It examines the political and economic contexts of media systems in Zimbabwe and other post-colonial African states. It explores issues of ownership, advertising, funding and financing and organisation of the media, and government policies in relation to diversity and pluralism of and in the media. This will be linked to debates on the role of the media in social transformation and the sustenance of democracy and development.

JDMS 438 Data Journalism
This module introduces students to the basics of gathering, cleaning, analysing and interpreting information from multiple data sets. It covers mapping, chart making, data mining and cleaning, and using software for data analysis to develop engaging visualisations as a way of enhancing reporting.

RTMP 442 Principles and Practice of Social Marketing
The module focuses on the principles and practice of social marketing as a distinct form of planned communication; the definition of terms; elements and products of social marketing; principles of persuasion and communication by objectives; the concept and principles of opinion building; Social Marketing Research processes; Andresen's new paradigm of social marketing; Ethics issue; impact assessment; Evaluation of case studies in different media and critics of social marketing.

RTMP 443 Dissertation
Students will work on a topic related to radio, television multimedia and cultural studies and compile a research report of about 12-15 000 words, under a supervisor.

REGULATIONS FOR THE POSTGRADUATE DIPLOMA IN STRATEGIC COMMUNICATION STUDIES (PGDSC)

Duration:	12 months
Minimum Credit Load:	120
Maximum Credit Load:	216
Maximum MBKS Credit Load:	188
Credit Load	150
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

To develop knowledge, skills and competencies in the field of communication relevant to various employment capabilities and careers in the world of work and society. To prepare students for further studies and lifelong learning in the field of Communication.

2.0 ENTRY REQUIREMENTS

A good honours degree in the field of English/Linguistics or Communication.

3.0 PROGRAMME CHARACTERISTICS

3.1 **AREA OF STUDY:** Communication

3.2. SPECIALIST FOCUS: Communication theory, business communication, public relations, public communication, practical aspects of communication, discourse, communication technology

3.3 ORIENTATION: Research and innovation-oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 DISTINCTIVE FEATURES: The programme builds on communication needs in Zimbabwe and abroad and focuses on knowledge development and application using a student-centred approach

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

3.1 Careers as public relations practitioners, researchers, consultants, liaison officers, marketing practitioners, publishers, editors, advertisers and translators

3.2 MA studies in Communication or related fields.

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, research projects, individual independent study.

6.0 LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

- ✓ Ability to demonstrate knowledge, understanding and mastery of communication
- ✓ Ability to use principles of language and communication to understand personal and interpersonal communication
- ✓ Ability to identify and define different communication systems and practices
- ✓ Ability to analyse communication texts of various genres
- ✓ Ability to identify and solve communication-related organisational problems
- ✓ Use appropriate research methods to create new insights into communication theories and practices
- ✓ Develop new communication practices and technologies that enhance efficiencies and outputs of the communication industry
- ✓ Create new business ventures in the text-book writing and communication industries
- ✓ Communicate effectively and present information using multi-media to both experts and non-experts in the communication industry

7. GENERAL PROVISIONS

7.1 The Post Graduate Diploma in Strategic Communication studies is studied through taught modules with continuous assessment and examinations will be offered at the end of each semester, and an examinable dissertation.

7.2 Normally, the programme is completed over three semesters comprising two semesters of taught modules and continuous assessment and one semester dedicated to research work (dissertation/ thesis writing).

7.3 Each student is required to earn at least two hundred and ten (240) credits in the taught component of the programme, and sixty (60) credits in the dissertation.

7.4 Students may select any combination of modules on offer to satisfy the requirements of the degree.

7.5 Each module contains material equivalent to forty-eight (48) hours contact time.

7.6 The Departmental Higher Degrees Committee shall assign dissertation/thesis supervisors to students.

8. PROGRAMME ASSESSMENT

8.1 The overall assessment shall be based on continuous assessment and formal examination.

8.2 ***Continuous Assessment***

Assignments related to the objectives of the programme will be set. These may include, but are not limited to, essays, group presentations, tests and reports. A candidate who fails to fulfil continuous assessment requirements may be barred from sitting the examination.

8.3 ***Examinations***

8.3.1 Examinations shall normally be written at the end of each semester.

8.3.2 Each module will be examined by a paper which is, at most, three (3) hours long.

8.3.3 In determining marks for modules, weighting will be as follows:

Continuous assessment 30% Examination 70%

9. PROVISION FOR PROGRESSION

Students will retain credits from modules passed. All module work must be completed before registering for the dissertation.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations.

11. GRADING AND DEGREE CLASSIFICATION

80% -100%	Distinction
70%-79%	Merit
60-69%	Credit
50%-59%	Pass
0%-49%	Fail

12. DEGREE WEIGHTING

Refer to Section 10 of the Faculty Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11. PROGRAMME STRUCTURE

DSC 612	Public Speaking	15
DSC 613	Health Communication	15
DSC 614	Occupational Discourse	15

MODULE SYNOPSES

DSC 601 Concepts in Communication

The module introduces the subject of communication by focusing on the major concepts, ideas and key terms on the subject. In this regard, the module provides definitions, milestone points and prominent scholars on communication.

DSC 602 Public Relations Communication
This module focuses on the theoretical and practical elements of Public Relations Communication. Emphasis is placed on the various communication efforts made by organisations to endear themselves to their public and how they utilise new communication technologies in this regard.

DSC 603 Research Methods in Communication
This module equips students with skills in conducting research that is aimed at producing knowledge about human communication. Students shall learn the various scientific procedures for carrying out research in the field of communication.

DSC 604 Strategic Writing
This module stresses the importance of writing to achieve specific organisational goals. Among the texts students shall learn include annual reports, managerial speeches, news releases, flyers and pamphlets. Students shall also learn how to prepare oral presentations and news conferences.

DSC 605 Web and Mobile Communications
In this module, students learn important terminology and principles of communication enabled by networked telephones and computers. It provides an opportunity to examine the significance of talking, texting or sending data over wireless networks and how these can be managed. The evolution of language accompanying these communications is also a key point of discussion.

DSC 606 English for Specific Purposes
The module educates students on the variants of English as a language. It proceeds by examining the uses of English in such areas as academia, law, medicine and business by dwelling on the salient features of each usage.

DSC 607 Discourse Analysis
The module examines linguistic units larger than the sentence, including conversational structure, speech acts and the ethnography of speaking. Drawing insights from language theories, it equips students with conceptual insights on the use of language in real-life situations.

DSC 608 Introduction to Communication Technology
The module provides an overview of new communication technologies and how they are changing the face of communication between individuals, groups, organisations, communities and nations.

DSC 609 Advertising
The module looks at patterns, practices, processes and channels of advertising as targeted communication. It looks at the nature and types of advertising, particularly how organisations use various codes to create messages to sell products and services.

DSC 610 Communication Planning
The module looks at the reasons for and benefits of systematic communications planning, the steps involved in creating short-term and long-term communication plans and the factors to consider in preparing plans. Students shall be exposed to different communication planning models.

DSC 611 Communication Ethics
The module focuses on the ethical issues that impact on communication processes in organisations. Honesty, privacy, copyright, confidentiality and respect are just some of the issues that shall be discussed.

DSC 612 Public Speaking
Through simulations of real-life oral presentations and addresses, the module focuses on the principles and techniques for speaking in public. The module emphasises the use of language, the structure and effective delivery of ideas, register, non-verbal communication, audiences and the use of supporting evidence in public speaking.

DSC 613 Health Communications
This module provides an understanding of the practice of communicating promotional information on health to communities during public health campaigns in communities, health education in schools and between doctors and patients. The module emphasises how messages are structured, the channels used to convey these messages and the ethical implications involved in such communications.

DSC 614 Occupational Discourse
The module examines language use in several Zimbabwean professional contexts such as academia, law, medicine and business. Emphasis is on the variants of English in different set-ups.

DSC 620 Research Project

In this module, the student is expected to demonstrate the independent ability to formulate a research idea related to the field of strategic communication as explored in the various modules covered, crafting research questions/objectives, choosing an appropriate methodology, deciding on a research sample, identifying relevant data gathering techniques and conducting research with the guidance of an academic supervisor. The dissertation will be expected to be between 5000 and 6500 words or 15 to 20 pages of font 12 with double line spacing and it should be in the area of English and Communication.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN FILM, TELEVISION AND DIGITAL TECHNOLOGIES (AH24)

Duration	18 months
Credit load	310 credits
Minimum Credit Load	270
Maximum Credit Load	330
Maximum MBKs Credit Load	234
ZNQF Level	SADC-QF-Level 9

1.0 PURPOSE OF PROGRAMME

The Master of Arts in Film, Television and Digital Technologies Degree (MFTDT) is structured to meet the media and communication needs of Zimbabwe, the region and beyond. It intends to equip students with both academic and practical skills that enable them to enter the media industry as well as to do research and academic studies. The programme aims to develop the sound conceptual, technical, analytical, critical, managerial and entrepreneurial skills that are required to succeed in the field of Film, Television and Digital Media.

2.0 ENTRY REQUIREMENTS

To be enrolled into the programme, prospective students should have a good Honours Degree in Radio, Television and Multimedia Production, Film and Theatre Arts, Media and Society Studies, Media and Cultural Studies, Journalism and Media Studies, Media Studies and any related discipline. A Postgraduate diploma in related areas is also recognised.

3.0 PROGRAMME CHARACTERISTICS

3.1 Areas of study Theories of Film, Television and Digital Technology; Communication and the Media; Media and Cultural Studies; Media and Society Studies, Practical Media Production (television, film and video, social media and marketing) and Communication.

3.2 Specialist focus Film, Television and Digital Media studies with emphasis on theory and practical production in the digital age

3.3 Orientation Research and innovation-oriented. Teaching and learning are professionally oriented and focused on theory and practice in media, social identities, societal relations (cultural studies) and communication.

3.4 Distinctive features The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability: MFTDT graduates have career opportunities in a wide range of industries which include the following:

Mainstream and alternative (communication) film and video, television, digital media production organisations, social research organisations, advertising agencies and information and publicity departments in different private and public sector organisations, nongovernmental organisations, teaching and lecturing, media consultancy and entrepreneurships.

4.2 Further studies Doctoral studies in Film and Television, Journalism and Media Studies, Media and Society Studies, Media Studies, Journalism Studies, Development Studies and Advertising, Marketing and International Relations, and related communication disciplines.

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods: Lectures, tutorials, screening, seminars, group work, presentations, public lectures, practicals, guest lectures, dissertations, lecture notes, assisted private studies and field trips.

5.2 Assessment methods: Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work- related learning supervision and assessment

6.0 PROGRAMME COMPETENCIES

6.1 Generic:

- Multidisciplinary: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- Quantitative and innovative reasoning: Capability to draw on big data and use analytics for informed decision-making and strive to seek new ways of doing things
- Communication skills: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- Analysis and synthesis: Capacity for analysis and synthesis using logical arguments and proven facts
- Ethical commitment: Professional integrity and awareness of the impact of media (both conventional and new digital media) on civil and political society, nation-states, and business
- Entrepreneurial skills: Capability to identify and create new business ventures based on knowledge, new thinking paradigms and new information and communication technologies.

6.2 DISCIPLINE SPECIFIC:

- Deep knowledge: Ability to analyse, critique and provide positive transformative insights for communication and media systems and phenomena, and conduct media and communication businesses that are ethically bound.
- Production skills: Ability to expertly produce media content and texts such as newspapers (conventional and online), films and video, and television and radio through providing both hands-on and managerial skills.
- Technology development skills: Ability to harness new information and communication technologies for purposes of content production for both legacy and digital media for economic growth and societal transformation.
- Problem-solving skills: Ability to solve a wide range of problems in Film, Television and Digital Media Studies by identifying their fundamental aspects and using both theoretical and empirical methods
- Analytical and computational skills: Ability to originate and produce media texts on computers and smartphones, as well as use data to analyse communication, media and cultural phenomena using appropriate ICT packages.

7.0 LEARNING OUTCOME

- Ability to demonstrate knowledge and understanding of Film, Television and Digital Technology Studies.
- Ability to use principles of Film, Television and Digital Technology Studies.
- Ability to identify and define different policies, systems and practices for Film, Television and Digital Technology Studies.
- Ability to understand Film, Television and Digital Technology Studies practices, technology applications and associated products.
- Ability to analyse Film, Television and Digital Media Technology systems and technological applications in business and industry.

- Ability to identify problems in Film, Television and Digital Technology Studies and develop appropriate solutions.
- Ability to use appropriate research methods to create new insights into Film, Television and Digital Technology Studies.
- Ability to develop new Film, Television and Digital Technology Studies models, policies and practices that enhance efficiencies and output of the Journalism and Media Studies function, business and industry.
- Ability to create new business ventures in the Film and Television industry.
- Ability to communicate effectively and present information using multi-media to both experts and non-experts in the Film and Television industry.

8.0 PROGRAMME ASSESSMENT

8.1 GENERAL PROVISIONS

- The Master of Arts Film Television and Digital Technologies Degree is a one-and-a-half-year programme.

8.2 PROGRAMME ASSESSMENT

Continuous Assessment: 30%: Test (20%), Practicals (5%), Assignments (5%)

Written Examinations: 70%

Practical modules do not have written exams thus continuous assessment will constitute 100%

Other: a) Research Project is assessed on the basis of a research project (75%),

Oral presentation (25%)

8.3 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations for Postgraduate Diplomas and taught Masters Degrees.

8.4 FAILURE TO SATISFY EXAMINERS

Refer to General Regulations for Graduate Degrees.

9.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 8 of the Faculty Regulations for Postgraduate Diplomas and Taught Masters Degrees.

9.1 DEGREE WEIGHTING

Refer to Section 10 of the Faculty Regulations for Postgraduate Diplomas and Taught Masters Degrees.

MODULE SYNOPSES

MFTDT 731 Film and Television Theory

This module focuses on film and television history and theory for fiction and non-fiction genres. It explores the birth and growth of film and video with reference to technological and social developments in the developed world, Africa and Zimbabwe; film genres; local and international film industry, its products, distribution and consumption patterns; challenges and prospects of film production in Zimbabwe and Africa; theories of film analysis with particular emphasis on context and texts from different traditions.

MFTDT 732 Research Methods for Screen Media

Students learn the broad approaches to visual media research, including qualitative, quantitative and mixed methods research. Focus is on methods and concepts attuned to the study of visual media as texts, industries or their audiences. Such concepts include semiotics, discourse analysis, content analysis and genre analysis. Students will learn to apply appropriate methodological approaches to varying research problems. Students must be able to compile research findings, as well as draw evidence-derived conclusions.

MFTDT 733 Film for Social Change

The module locates the role of film and television in influencing social behaviour, including communicating human rights issues. Attention is given to visual media and its influence on public opinion formation and community development, different characteristics of political media, health communication, participatory video, democracy and the media, and techniques of fostering community participation in productions about themselves. Film and Television representation of social issues is critically explained in the context of discourses of self-actualisation, the influence of media star personalities, group identity, nation-building and globalisation.

MFTDT 734 Writing for Screen Media

This is a practical module that focuses on advanced techniques of writing for screen media, including TV scripts, feature film screenplays and storyboards. The major focus is placed on narrative structure in concept development.

MFTDT 735 Directing for Film and Television

This practical module focuses on techniques for directing film and television productions such as films, television dramas, music videos, advertisements, corporate videos, weddings and funerals etc. Directing is learnt in varying scenarios such as single-camera and multiple-camera production, small and large crew production, micro and big budget production, live coverage etc. Students are taught advanced cinematographic techniques

MFTDT 736 Production Management

This module focuses on the understanding and application of production management for single and multiple-camera studio and on-location productions. Students will learn how to create and manage budgets and schedules and provide cost reporting throughout. With real-world scenarios for both Zimbabwean and foreign filmmaking, students will gain an in-depth understanding of compliance, copyright, time management and legal requirements of programme production and delivery.

MFTDT 737 Visual Literacy and Reception Analysis

The module seeks to develop students' ability to see, understand and communicate visually. It improves students' semiology skills so that they appreciate the decoding to which their film texts may be subjected by audiences. Theories on the power and nature of visual media and processes of mass communication are studied together with theoretical approaches to understanding the nature of media audiences and their media consumption processes and habits.

MFTDT 738 Creative Economies and Technology

The module focuses on the political economy of creative industries including film, television, advertising and music, encouraging students to think strategically about their importance. It traces debates on creative arts as industries, including the democratisation of production spaces by digital media, and the role of governments, corporates, communities and incubation/innovation hubs in the development of creative economies. Issues such as policy and regulation in the development of the creative arts, as well as techniques to measure the value of creative industries, will also be studied.

MFTDT 739 Documentary Production

This practical module focuses on documentary production processes from idea conception up to post-production. The documentary production value chain is also studied with emphasis on the roles of different service providers in production. This module equips students with the advanced skills required in producing documentaries for multimedia platforms, such as scriptwriting, sound, lighting, interviewing, voice-over narration, piece-to-camera presentation, cinematography, editing and other technical operations.

MFTDT 740 Adapting Literary Texts to Screen

The practical module focuses on techniques for the adaptation of literary texts such as novels and poems into television drama, soap operas and films. Students get an appreciation of Zimbabwe's rich literary traditions as well as the dynamics of publication industries. Focus is also placed on copyright acquisition and contracting original authors. Students learn techniques of screenwriting for fiction films, casting and location scouting and directing soundtracks to simulate literary narratives that will be adapted for screen.

MFTDT 741 Digital Technologies and Screen Cultures

This module enables students to explore the role of popular screen culture in student engagement levels, the capabilities of the smartphone camera for screen literacy learning, and the potential of digital communication technology for cultural participation, media democratisation and global citizenship. The module interrogates the modes and ideologies that govern screen content as well as reflects on how screen literacy learning so framed could point to a new pedagogy of cosmopolitanism, cultural diversity and multiculturalism.

MFTDT 831 Dissertation

The module helps students to plan, design and carry out their dissertation on how to choose a suitable topic, undertake a literature to review, and apply appropriate research methodology and theoretical conceptions to the analysis of research findings under a supervisor. The length of the dissertation shall be at least 30 000 words.

MFTDT 832 Critical Media Theory

The module is a systematic study of a wide array of Critical Media Theory aspects which include the following: Specificities and dimensions of Critical and Administrative Research in communication, the critical project and the enlightenment, Dialectic of the Enlightenment and the Culture Industry, Cultural Studies in Britain especially the traditions of the Centre for Contemporary Cultural Studies and its scholars. The module also studies the different traditions of Critical (Media) Theory at different global centres and in different global contexts including African critical traditions, experiences and perspectives.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN STRATEGIC COMMUNICATION STUDIES (AH35)

Duration:	18 months
Minimum Credit Load:	270
Maximum Credit Load:	340
Maximum MBKS Credit Load:	234
Credit Load	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

To develop knowledge, skills and competencies in the field Communication relevant to various employment capabilities and careers in the world of work and society. To prepare students for further studies and lifelong learning in the field of Communication.

2. ENTRY REQUIREMENTS

A good honours degree in the field of English/Linguistics or Communication.

3. PROGRAMME CHARACTERISTICS

3.1 AREA OF STUDY: Communication

3.2 SPECIALIST FOCUS: Communication theory, business communication, public relations, public communication, practical aspects of communication, discourse, communication technology

3.3 ORIENTATION: Research and innovation-oriented. Teaching and learning are professionally oriented and focused on both theoretical and practical aspects.

3.4 DISTINCTIVE FEATURES: The programme builds on communication needs in Zimbabwe and abroad and focuses on knowledge development and application using a student-centred approach

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Careers as Senior Public relations practitioners, Senior Researchers, Senior Consultants, Teachers and lecturers, Liaison officers, Marketing practitioners, Publishers, Editors, Advertisers and Translators

4.2 Doctoral studies in Communication or related fields

5. PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, research projects, individual independent study.

6. LEARNING OUTCOMES

By the end of the programme, a graduate will be able to:

- ✓ Ability to demonstrate knowledge, understanding and mastery of communication.
- ✓ Ability to use principles of language and communication to understand personal and interpersonal communication.
- ✓ Ability to identify and define different communication systems and practices.
- ✓ Ability to analyse communication texts of various genres.
- ✓ Ability to identify and solve communication-related organisational problems.
- ✓ Use appropriate research methods to create new insights into communication theories and practices.
- ✓ Develop new communication practices and technologies that enhance efficiencies and outputs of the communication industry.
- ✓ Create new business ventures in the text-book writing and communication industries.
- ✓ Communicate effectively and present information using multi-media to both experts and non-experts in the communication industry.

7. GENERAL PROVISIONS

a. The Master of Arts in English Applied Linguistics (MAAEL) is studied through taught modules with continuous assessment and examinations will be offered at the end of each semester, and an examinable dissertation.

b. Normally, the programme is completed over three semesters comprising two semesters of taught modules

and continuous assessment and one semester dedicated to research work (dissertation/ thesis writing).

c. Each student is required to earn at least two hundred and ten (240) credits in the taught component of the programme, and sixty (60) credits in the dissertation.

d. Students may select any combination of modules on offer to satisfy the requirements of the degree.

e. Each module contains material equivalent to forty-eight (48) hours of contact time.

f. The Departmental Higher Degrees Committee shall assign dissertation/thesis supervisors to students.

8. PROGRAMME ASSESSMENT

a. The overall assessment shall be based on continuous assessment and formal examination.

b. ***Continuous Assessment***

Assignments related to the objectives of the programme will be set. These may include, but are not limited to, essays, group presentations, tests and reports. A candidate who fails to fulfil continuous assessment requirements may be barred from sitting the examination.

8.3 ***Examinations***

8.3.1 Examinations shall normally be written at the end of each semester.

8.3.2 Each module will be examined by a paper which is, at most, three (3) hours long.

8.3.3 In determining marks for modules, weighting will be as follows:

Continuous assessment 40%

Examination 60%

9. PROVISION FOR PROGRESSION

Students will retain credits from modules passed. All module work must be completed before registering for the dissertation.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations.

11. GRADING AND DEGREE CLASSIFICATION

80% -100%	Distinction
70%-79%	Merit
60-69%	Credit
50%-59%	Pass
0%-49%	Fail

12. DEGREE WEIGHTING

Refer to Section 10 of the Faculty Regulations for Postgraduate Diplomas and Taught Masters Degrees.

14.0 MODULE SYNOPSES

MASCS 731 Strategic Communications: Theory and Practice
This module emphasises theoretical and practical aspects of communication between organisations and their major stakeholders including employees, customers, donors, investors, government, NGOs and other associations.

MASCS 732 Research for Strategic Communication
The module covers the importance of researching a communication strategy. It focuses on the analytical skills, techniques and methodologies necessary to identify and gather useful data on social, economic, political, cultural and technological trends which affect communication strategy. Such information is important for making decisions that affect an organisation and its environment

MASCS 733 Principles in Persuasion
The module introduces students to strategies and processes of persuasion and social influence while underlining the theories and concepts which underpin such strategies. The goal is to create professional communicators who can influence people's beliefs and attitudes regarding various topics through advertising, political campaigns and activism, among other endeavours, while remaining ethically grounded.

MASCS 704 Professional Copy-editing and Evaluation
This is a practical module meant to equip students with practical skills in editing and proofreading, and the procedures required in the publication of print and web material. Attention is expanded to include information on production, design, market research, commissioning, product development, project management, quality control and product promotion.

MASCS 705 Communication Variation and Register
The module explores the varieties of language associated with various groups in society. Drawing insights from linguistic and sociological theories, the module pays attention to the distribution of specific registers across sections of society. In this regard, how identity markers such as gender, ethnicity, race, class and geographical origin sculpt communication shall be carried out.

MASCS 706 Advanced Occupational Discourse
The module focuses on language development and use in occupational contexts. It examines how various professionals use technical language in communicating within particular discourse communities to get something done. Examples shall be drawn from several professions including law, medicine, politics and teachers.

MASCS 734 Communication for Social Change
The module looks at how communication techniques, principles and practices can be utilised to address real-life challenges and to foster a culture of dialogue and change. It emphasises innovative communicative approaches to reach out to marginalised communities with a view of facilitating change.

MASCS 735 Online Communication Management
The module is intended to offer conceptual and operational tools for administering online communications in organisations. It is cognisant of the evolution of communication processes in both small and big organisations. The goal is therefore to equip students with the skills of organising and directing effective online communication strategies and tactics across a range of settings such as advertising and marketing.

MASCS 736 Communication Models
The module focuses on the various conceptual models used to explain the human communication process. It provides a historical and theoretical overview of the models that have been used to understand communication from classical times to the present. Models relevant to African and Zimbabwean contexts shall be emphasised.

MASCS 737 Communication within Organisations
The module addresses the various dimensions of communication among individuals within an organisation. Emphasis is on patterns, practices, processes and channels of communication among individuals of similar and different stations. Resultantly, questions of leadership, organisational culture and team dynamics become pertinent.

MASCS 711 Performance Communication
The module dwells on a number of verbal skills such as rhetoric, interviewing, story-telling, poster presentations and debating. It covers the conceptual and practical issues surrounding conversational practice and performance.

MASCS 738 Global Communication and Culture
The module emphasises the role of new communication technologies in shaping a global culture. Students look closely at the emergence of network societies, the benefits of global communication networks and the risks they pose to individuals and communities.

MASCS 713 Non-profit Communication Strategy
The module looks at communication efforts and programmes designed to cater for non-profit organisations. It focuses on the various ways in which non-profit companies engage in strategic communications to raise funds, carry out service campaigns and appeal to stakeholders.

MASCS 802 Dissertation
This is a research module which culminates in the submission of findings to the Department for examination towards the end of the semester. The research shall be in an area of communication approved by the Department.

DEPARTMENT OF RELIGIOUS STUDIES AND ETHICS

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN RELIGIOUS STUDIES (HRS)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	540
Actual Credit Load	540
MBKs Credit Load	384
Level: ZNQF-Level	8

1.0 PURPOSE OF THE PROGRAMME

- The Religious Studies Programme seeks to produce graduates who can
  (1) provide leadership in different religious institutions nationally, regionally and even internationally either through teaching, consultancy, counselling, pastoring or any support service to communities in need;

(2) facilitate research and publication in Religious Studies and promote African values and initiatives; (3) initiate theological and religious initiatives that address the many challenges of the world such as war, HIV/AIDS, famine and environmental change.

2.0 ENTRY REQUIREMENTS

2.1 NORMAL ENTRY

- To be eligible, candidates must have at least five 'O' Level passes or the assessed equivalent including English and at least two 'A' level pass in any of the following: Family and Religious Studies, History, Sociology, Shona, Ndebele, Economics, Accounts, Literature in English and any other relevant subject in the Humanities.

2.2 SPECIAL ENTRY

- Refer to Section 3.2 of the General Academic Regulations for the Undergraduate degree programmes. Candidates must have acquired a Diploma in Religious Studies or Theology from a recognised theological institution acquired normally in not less than 18 months and at least 5 subjects at "O" level or its equivalent. Candidates with relevant work experience may also be admitted.

2.3 MATURE ENTRY

- Persons who are 25 years of age for males and 23 years for females may apply for mature entry provided they passed at least 5 'O' levels including English and must have demonstrated suitability for university studies by virtue of their attainments and/or relevant work experience. For more information refer to General Academic Regulations Section 3.3 for the Undergraduate degree programmes.

2.4 VISITING SCHOOL:

This is a 3-year degree programme aimed at individuals already in employment. In addition to satisfying the general entry requirements, they should also either have a diploma in the relevant field or any other tertiary qualification. Levels 2 and 3 run concurrently.

3.0 PROGRAMME CHARACTERISTICS

3.1 Areas of study

New Testament Studies, Old Testament Studies, World Religions, African Traditional Religions, Philosophy of Religion, Christian Theology, Christian History and Thought, HIV/AIDS ministry in Zimbabwe, History of Christianity, Islam, Social Ethics, Religious Perspectives on Sexuality, Marriage & Family, Theology and Development, The Bible in an African Context, Theology and Gender Studies, Research Methods in Religious Studies and Theology, Religion and the Media, Christian Leadership, Religion and Society in Africa, New Religious Movements, Counselling and Theology, Religion, Conflict, Peace and Development

3.2 SPECIALIST FOCUS

Engagement of Religion in Contemporary Issues such as HIV/AIDS, Gender, Development, Ecology, Social Transformation.

3.3 ORIENTATION

The programme takes a multi-cultural approach where diversity and tolerance of other religions are emphasised.

3.4 DISTINCTIVE FEATURES -

Interaction with seasoned scholars (Sabbatical Fellows).

- Grooming of versatile religious studies graduates who can relate and be problem solvers to contemporary challenges.
- A strong and active tradition of language and textual expertise.
- Regular research seminars with visiting speakers.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 EMPLOYABILITY:

Religious Studies graduates can find employment; in high schools offering lessons on all issues covered under the new curriculum: Family and Religious Studies (Form 1-4 & 5-6); work in religious institutions as counsellors, lecturers, administrators or pastors; in NGOs as gender activists, counsellors; those who are pastors already can be employed as Chaplains for the uniformed forces like the Prisons, Police, Army; in welfare institutions as gender activists, HIV/AIDS counsellors and advisors; in colleges and universities as lecturers and any other religious oriented fields.

4.2 FURTHER STUDIES

Master's and Doctoral Studies

5.0 PROGRAMME DELIVERY

5.1 TEACHING AND LEARNING METHODS

Lectures, Tutorials, Seminars, Group Work, Work- Related Learning, and research projects.

6.0 INTENDED LEARNING OUTCOMES

- Conduct rigorous research and publish on religious issues, especially the Afrocentric dimensions of culture, heritage, religion and modes of being.
- Apply relevant analytical skills and insights from Religious Studies discourses to transform society and inform national development.
- Teach and impart religious knowledge to diverse categories of learners.
- Demonstrate knowledge and understanding of religion and religious plurality.
- Provide thoughtful and empathetic leadership to different religious communities.
- Provide consultancy and support services to communities in need.
- Demonstrate an appreciation of the pervasive nature of religion in all facets of human life by making interventions that address the many challenges of the world such as war, social inequality, HIV/AIDS, famine and environmental change.

7.0 GENERAL PROVISIONS

7.1 The programme consists of 33 modules worth (12) credits each and a research project which is worth (24) credits

7.2 Bachelor of Arts Honours in Religious Studies is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of first registration.

7.3 The degree programme offers core/compulsory and elective/optional modules.

7.4 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".

7.5 For a student to graduate, they should have accumulated at least five hundred and forty (540) credits including university-wide modules. Of these total credits, 384 Credits shall be accrued from MBKs.

8.0 PROGRAMME ASSESSMENT

8.1 Overall assessment shall consist of continuous assessment and formal examinations

8.2 To be admitted to examinations, a student must have satisfied continuous assessment requirements for all approved modules of study.

8.3 In the case of a research project, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of the research project, submitted at a date determined by the Departmental Board.

8.4 Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.

8.5 The final mark will be weighted as 25% for continuous assessment and 75% for examination.

9.0 PROVISION FOR PROGRESSION

Refer to Section 10 of the General Academic Regulations for Undergraduate degree programmes and Section 6 of the Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for the Undergraduate degree programmes.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

- Not all electives will be on offer in any given year. Electives on offer will depend on availability of teaching staff.

MODULE SYNOPSES

HRS 101 Introduction to the New Testament

The module will introduce students to the study of the New Testament, its social, religious and literary settings including the canonisation of the New Testament. The module will focus also on critical approaches to the New Testament.

HRS 102 Introduction to the Old Testament

The module shall introduce students to the study of the Old Testament; its social, religious and literary settings, including the canon of the Bible. The module will focus on equipping students with tools for biblical interpretation and the ability to analyse relevant texts in the light of contemporary religious development in Africa.

HRS 103 Introduction to the Study of Religion

The module introduces students to the study of religion. It focuses on issues such as the definition of religion, theories of origin, history of religion, insider/outsider perspectives and research ethics. The module also examines the characteristics, strengths and weaknesses of selected theories for the study of religion such as the anthropological, sociological, historical, phenomenological, psychological, psychological and feminist approaches. The module shall examine the various theories and underlying concepts in the study of the beliefs and practices of various religions of the world. This will help the students to appreciate and understand other religions while getting to know their religion better.

HRS 104 Introduction to African Indigenous Religions

The module shall discuss the understanding and development of African Indigenous Religions. The module will focus on the religions of Africa, themes, rites of passage, beliefs and religious practices of selected African communities. It shall attempt to encourage an understanding of the contribution of African Indigenous Religions to religious syncretism amongst African Muslims and Christians.

HCS 115 Introduction to Computers

This module is provided for all those who are not familiar with computers. It is an introductory course which aims to equip students with basic computer skills. Students will be taught the basics of working with a computer as well as the use of common software packages. At the end of the course, students should be able to use the internet and process language documents using a computer.

CS131 Basic Communication Skills

Refer to Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

CS132 Extended Communication Skills

Refer to Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

HRS 105 Introduction to Christian Theology

The module shall introduce students to fundamental doctrines in theology like; Revelation, Faith, Scripture, Tradition, the Triune God, Revelation, Salvation, Eschatology, and to contemporary issues in theology like inculturation, peace building, gender and development in Africa.

HRS 106 Introduction to Ethics

The module shall introduce students to the philosophical study of morality, including the theory of right and wrong behaviour, the theory of value (goodness and badness), and the theory of virtue and vice. Besides providing familiarity with the primary questions addressed within moral philosophy and the most influential answers given by well-known philosophers, this module is designed to help students develop their abilities to read, explicate, analyse, and evaluate philosophical literature, write and express themselves well about their own ethical positions regarding contemporary moral problems, and think critically and analytically about ethical issues.

HRS 107 Introduction to Religions of the World

This module shall carry out an introductory survey of the religions of the world that are practised in the global village. It focuses on the basic histories and worldviews of these world religions. The necessity to know more about other religions, apart from our own, arises due to the fact of multiple influences of religion in various aspects of life today, globally and locally. The module surveys religions that originated in South Asia (Hinduism, Theravada Buddhism and Jainism), Southwest Asia (Baha'i Faith), East Asia (Taoism, Confucianism and Mahayana Buddhism) and the Caribbean Islands (Rastafarianism) but have permeated the other parts of the world. The module concludes by reflecting on how the religions of the world will relate in future. The study of these world's religions is historical, comparative and, above all phenomenological.

HRS 205 Philosophy of Religion
This module shall discuss and reflect on the philosophical theories guiding the study of religious inquiry and the quest for meaning. People have died or have been killed in the name of religion. Religion it is not a matter of intellectual persuasion or conviction, religion touches the very core of a person. It demands conviction, commitment and sacrifice.

HRS 108 Themes in Christian History and Thought
The module shall attempt to give a brief overview of some themes in Christian history and thought from the Early Church to contemporary issues in Christian thought and practice. The module will try to cover themes that have particular reference to ministry in Africa; Early Church, Patristic Theology, Ecumenical Councils, Scholastic Theology, Reformation, Protestantism, Missionary Movement, Evangelical Movement, Pentecostalism and Fundamentalism

HRS 109 Sociology of Religion
The module shall explore religion in its varied manifestations as a social institution, as a cultural practice, and as a pattern of beliefs and activities that are shaped by societal conditions and that, in turn, shape these conditions. Thus, the module explores the social dimension of religion through a consideration of the relationship of religion and society. It examines the social theories that have been propounded by social theorists and critics such as E. Durkheim, Karl Marx, Max Weber& others.

HRS 110 History of Christianity in Africa
The module shall make a survey of the History of Christianity in Africa from the Church of Alexandria to the rapid growth of African Christians in the 19th century with the advent of colonialism and the Independence of most African states.

HRS 111 Logic
This module shall investigate and classify the structure of statements and arguments, both through the study of formal systems of inference and through the study of arguments in natural language. It deals with propositions or declarative sentences, used to make an assertion that are capable of being true and false. It covers core topics such as the study of fallacies and paradoxes, as well as specialised analysis of reasoning using probability and arguments involving causality and argumentation theory.

HRS 113 Life and Ministry of Jesus and Palestinian Christianity
This module shall focus on the historical, organisational and doctrinal development of the Christian community from its origin in Jesus' ministry to the time of the Jerusalem council.

HRS 216 The Old Testament (Pentateuch, Prophecy and Contemporary Issues, Writings, Wisdom Literature)
The module exposes the student to a number of issues through the study of the Old Testament. Some of the issues are broken down into units to allow in-depth understanding. For instance, the module introduces students to the phenomenon of prophecy from the emergence of this movement in Israel in 1100BCE until 800BCE. Students study concepts of prophecy, activities of individual prophets and their message in the Pre-Canonical period. The module relates these to contemporary issues such as conflict resolution and development.

HRS 201 The New Testament (Acts, Pauline and Deutero-Pauline Literature, Johannine Literature, Pastoral Letters, Apocalyptic Literature)
This module focuses on selected major themes in the New Testament, with special reference to Acts, Pauline, Deutero-Pauline, non-Pauline letters and apocalyptic literature and how these themes apply to the Zimbabwean context.

HRS 202 Islam: Africa
The study of Religions in Africa will not be complete without an in-depth study of Islam's, beliefs and doctrines, as one of the major religions in Africa. The module shall discuss the historical development of Islam and the challenges of contemporary Muslims in Africa.

HRS 205 Philosophy of Religion
This module discusses and reflects on the philosophical theories guiding the study of religious inquiry and the quest for meaning. People have died or have been killed in the name of religion. Religion is not a matter of intellectual persuasion or conviction, religion touches the very core of a person. It demands conviction, commitment and sacrifice.

HRS 206 Religion and Gender
The module shall introduce students to gender concepts, theology of feminism as well as various roles and status of women in the Bible and in our African context. Topics to be covered include the role of women in the Bible, the ordination of women, the impact of education and urbanisation, women's struggle for emancipation and participation in Church life.

HRS 215 Introduction to Gender Studies
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and in their social interactions. Topics covered include understanding gender, theories of gender inequalities, historical development of gender, gender analysis, gender issues in Zimbabwe, redressing gender imbalances, empowerment and strategies for creating a gender- responsive environment. Every student has to pass the course to graduate.

HRS 204 Religion and Development
The module shall introduce students to the discipline of development studies. It begins with classical theories, examining their contribution to the growth and development of economies. The module also addresses major themes in development discourses such as the global millennium goals, globalisation and its impact on the development of poor societies of the world, gender equity; notions of democracy; good governance and human rights and others in the context of Christian teaching and social theology.

HRS 207 Old Testament Ethics
This module shall examine the ethical position of the Old Testament. It focuses on what the Old Testament teaches on particular moral issues, the proof texts we can search out to support a moral perspective and the ethical themes that run through the Old Testament literature.

HRS 208 Religion and Ethics
This module focuses on the interface between religion and the concept of right and wrong in different contexts, especially in Zimbabwe. It explores ethical issues with special reference to African Indigenous Religion, Christianity, and Islam. Ethical theories, namely, Natural Law, Divine Command, Utilitarianism, the Golden Rule, the Categorical Imperative, and Unhu/Ubuntu, will be analysed in relation to their applicability to ethical problems in Zimbabwe. The module seeks to develop, in students, a reflective awareness of their morality and opinions in relation to some of the current issues in the Zimbabwean context.

HRS 219 Religion and Gender
The module shall introduce students to gender concepts, theology of feminism as well as various roles and status of women in the Bible and in our African context. Topics to be covered include the role of women in the Bible, the ordination of women, the impact of education and urbanisation, women's struggle for emancipation and participation in Church life.

HRS 412 New Testament Ethics
This module shall examine the ways in which New Testament texts construct patterns of morality and ethics; consider whether a 'moral vision' can be synthesised from the varied New Testament writings; appraise the hermeneutical issues involved in using the Bible in ethics today, and examine some models for the application of New Testament ethics to contemporary morality.

HRS 210 Research Methods in Religious Studies
This module shall focus on imparting basic research methodology and techniques such as conducting field investigation, social analysis, administering questionnaires and interpreting the findings in an academic manner.

HRS 211 Religious Education
The module shall equip students to acquire and develop strategies for teaching religious education in various settings. The module will examine theories of religious and moral development and the underlying theological concepts of teaching religious education.

HRS 213 Elementary Biblical Greek
This module shall provide an introduction to the language known as Koine Greek, in which the New Testament was written. It will cover some of the basic grammar and vocabulary of the language. By the end of the module, students should be able to read some select passages from John's gospel. The module will also address basic grammatical ideas and structures common to all Indo-European languages. The module will also be looking at some of the historical and linguistic background of the Koine Greek

HRS 214 Elementary Biblical Hebrew
This module shall provide the student with a basic understanding of the Ancient Hebrew language and build a foundation for further study of the Hebrew Bible. Students will learn the basics of Hebrew grammar and syntax and be able to read and appreciate short passages of Hebrew taken directly from the Old Testament. The course will provide a firm basis for further study in the language.

HRS 419 Clinical Pastoral Education
This module is an interfaith professional education for ministry. It shall bring students into supervised encounters with persons in crisis. Out of an intense involvement with persons in need, and the feedback from peers and teachers, students develop new awareness of themselves as persons and of the needs of those to whom they minister. From theological reflection on specific human situations, they gain a new understanding of ministry. They also develop skills in interpersonal and inter-professional relationships.

HRS 217 Administration and Finance
This module shall enable students to evaluate and question key financial structures, documents and figures. Sound financial management is essential to organisational success. Key figures in all types of organisations need to be able to understand the language of accounting and finance to take a considered role in corporate planning and dialogue.

HRS 218 Selected Themes in African Indigenous Religions
The module shall discuss in an in-depth manner, issues such as the concept of God, rituals, symbolism, evil, indigenous medicine etc. among Africans. The module provides knowledge on selected topics which are relevant to the understanding of African Indigenous Religions.

HRS 221 Pastoral Counselling

The module shall introduce students to pastoral counselling, while focusing on the care of the sick, marriage guidance, bereavement, grief and loss. The students will be encouraged to draw from traditional forms of counsel and guidance and their applicability to Christian pastoral care.

DSH 222 Project Management, Monitoring and Evaluation
The module shall provide a solid foundation in the concepts, tools and techniques of project management, monitoring and evaluation. Other critical aspects of the project cycle will be surveyed.

HRS 301, 302 & 303 Work -Related Learning (WRL)

This module enables students to develop the ability to translate theoretical knowledge to real-life experiences by applying practical skills in a proficient manner. The course also equips students with effective time management skills as well as work-related documentation process, the importance of evidence-based research and the ability to draw together knowledge and skills from different disciplinary. The module has the following breakdown. Employer's Assessment. The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities. Academic Supervisor's Assessment. The Academic Supervisor's assessment looks at the student's conduct at the workplace. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and addressing issues at the workplace as well as relating and communicating with colleagues. Work-Related Learning Report This is a report written by the student based on their activities and experiences during Work-Related Learning. The report format is provided by the Department.

HRS 401 African Christian Theology
The module shall discuss the emerging theologies of Africa in relationship to the historical and contemporary issues in African Christian Theology such as African Christologies, inculturation, black theology, and ecumenism in Africa. The students will be invited to study and reflect on the work of some African theologians such as Bujo, Nyamiti, Magesa, Mugambi, Moyo, Muzorewa, and Tutu.

HRS 403 Religion and the Media
This is a practical and introductory module aimed at equipping students with the basic skills required in the production of print media, radio, television and the internet with particular emphasis on how religion is reported in the Media. The module shall focus on media ethics, the role of the media, Freedom of expression and censorship, production of media products, effective communication, and critical analysis of media products.

HRS 404 The Bible in an African Context
The module shall discuss the reception and influence of the Bible within an African context, and related issues on language, interpretation translations and the impact of the Bible on African institutions such as marriage, polygamy, faith healing, rites of passage and other contemporary issues.

HRS 407 Religion, Peace and Security
The module shall look at aspects of peace building, conflict transformation, post- war reconstruction, mediation, rehabilitation, reconciliation and healing and people-centered participatory development. Using biblical sources of sustainable peace building and exploring the theological bases for a just war theory and pacifism shows how effective Christian non-violence can meet the multiple challenges of African conflict situations.

HRS 402 Religion and Health
The module examines the relationship between religion and health. It examines religious responses to disease outbreaks such as HIV and AIDS as well as the novel COVID-19 pandemic. It focuses on the care and intervention programmes, development of life skills, support networks and behaviour change programmes that have been/are being instituted to combat the problems. The module also critically analyses the spiritual benefits of religion as well as the challenges thereof.

HRS 406 Psychology of Religion
The module shall trace the relationship between psychology and religion and explore some of the possible effects of religion on behaviour, thought and feelings. It seeks to look at how religion affects what people think and do. The module examines the psychological theories propounded by theorists and critics such as Sigmund Freud, Carl Jung, Carl Rodgers, and Rudolph Otto among others.

HRS 410 Ethics and Disability
The aim of the module is to introduce the study of Disability from an ethical perspective. The module shall investigate through skill-building independent research, writing and presentations, how disability is interconnected with issues such as stigma, gender, social exclusion, social movements, globalisation, war and conflict.

HRS 409 Religion and Entrepreneurship, Tourism and Sports
The module examines the relationship between religion and entrepreneurship. It examines whether religion has any impact on decision-making that promotes economic growth, i.e. the decision to become an entrepreneur. It aims to shed light on two questions: (1) What are the channels by which religion influences economics and (2) Are the impacts on economic activity the same across all religions? The module

also explores the contribution of spiritual/religious tourism, anchored on faith-based travel, as one of the segments of cultural tourism that has resulted in the growth of many economies. The need to balance between religion, 'tourismification' of cultural heritage assets and the law occupies a central place in the module where they are assessed as collaborators and competitors.

HRS 405 African Indigenous Religions and Contemporary Issues
The module shall discuss the interface AIRs and contemporary issues, homosexuality, disability, ecology, sustainable development, food security, tourism etc. The module seeks to provide in-depth knowledge of the selected issues.

HRS 408 Research Project
Research Project enables students to conceive and execute a major research project in an area of their choice. With guidance from a member of the academic staff as supervisor, the learners plan and design an independent research project which relates to their overall programme of study. Candidates are expected to write a project of between 9000- 12000 words. The project counts as two (2) modules.

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN RELIGIOUS AND FAMILY STUDIES (AH10)

Duration	4 years
Actual Credit Load	540
Maximum Credit Load	540
MBKs Credit Load	384
Level:	ZNQF-Level 8

1.0 PURPOSE OF THE PROGRAMME
• The Religious and Family Studies Programme seeks to produce graduates who can competently and effectively teach the Family and Religious Studies curriculum in high schools as well as in colleges. It also produces graduates who are capable of providing leadership in different religious institutions nationally, regionally and even internationally either through teaching, consultancy, counselling, pastoring or any support service to communities in need.

2.0 ENTRY REQUIREMENTS
2.1 Normal Entry
• To be eligible, candidates must have at least five 'O' Level passes or the assessed equivalent including English and at least two 'A' level passes in any of the following: Family and Religious Studies, History, Sociology, Shona, Ndebele, Economics, Accounts, Literature in English and any other relevant subject in the Humanities.
2.2 Special entry
• Refer to Section 3.2 of the General Regulations. Candidates must have acquired a Diploma in Religious Studies or Theology from a recognised theological institution acquired normally in not less than 18 months and at least 5 subjects including English Language at "O" level or its equivalent. Candidates with relevant work experience may also be admitted.
2.3 Mature entry
• Persons who are 25 years of age for males and 23 years for females may apply for mature entry provided they passed at least 5 'O' levels including English and must have demonstrated suitability for university studies by virtue of their attainments and/or relevant work experience. For more information refer to General Academic Regulations 3.3.

2.4 Visiting School
This is a 3-year degree programme aimed at individuals already in employment. In addition to satisfying the general entry requirements, they should also either have a Diploma in the relevant field or any other tertiary qualification. Levels 2 and 3 run concurrently.

3.0 PROGRAMME CHARACTERISTICS
3.1 AREAS OF STUDY
New Testament Studies, Old Testament Studies, World Religions, African Traditional Religions, Philosophy of Religion, Christian Theology, Christian History and Thought, Religion and Health, History of Christianity, Islam in Africa, Social Ethics, Religious Perspectives on Sexuality, Marriage & Family, Religion and Development, The Bible in an African Context, Religion and Gender Studies, Research Methods in Religious Studies and Theology, Religion and Media, Christian Leadership, Religion and Society in Africa, New Religious Movements, Counselling and Theology, Religion, Peace and Security.

3.2 SPECIALIST FOCUS
Engagement of Religion in Contemporary Issues such as Health (HIV & AIDS and COVID-19), Gender, Development, Ecology, and Social Transformation.

3.3 ORIENTATION
The programme takes a multi-cultural approach where diversity and tolerance of other religions is emphasised.

3.4 DISTINCTIVE FEATURES -
Interaction with seasoned scholars (Sabbatical Fellows).
- Grooming of versatile religious studies graduates who can relate and be problem solvers to contemporary challenges.
- A strong and active tradition of language and textual expertise
- Regular research seminars with visiting speakers

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION
4.1 EMPLOYABILITY:
Religious and Family Studies graduates can find employment; in high schools offering lessons on all issues covered under the new curriculum: Family and Religious Studies (Form 1-4 & 5-6); in colleges and universities as lecturers, work in religious institutions as counsellors, lecturers, administrators or pastors; in NGOs as gender activists, counsellors; those who are pastors already can be employed as Chaplains for the uniformed forces like the Prisons, Police, Army; in welfare institutions as gender activists, HIV and AIDS counsellors and advisors; and any other religious oriented fields.

4.2 FURTHER STUDIES
Master's and Doctoral Studies

5.0 PROGRAMME DELIVERY
5.1 Teaching and Learning Methods Lectures, Tutorials, Seminars, Group Work, Work- Related Learning, research project..

6. INTENDED LEARNING OUTCOMES
6.1 Conduct rigorous research and publish on religious issues, especially the Afrocentric dimensions of culture, heritage, religion and modes of being.
6.2 Apply relevant analytical skills and insights from Religious Studies discourses to transform society and inform national development.
6.3 Teach and impart religious knowledge to diverse categories of learners.
6.4 Demonstrate knowledge and understanding of religion and religious plurality.
6.5 Provide thoughtful and empathetic leadership to different religious communities.
6.6 Provide consultancy and support services to communities in need.
6.7 Demonstrate an appreciation of the pervasive nature of religion in all facets of human life by making interventions that address the many challenges of the world such as war, social inequality, Health (with a particular focus on HIV & AIDS and COVID-19), famine and environmental change.

7.0 GENERAL PROVISIONS
7.1 The programme consists of 33 modules worth (12) credits each and a research project which is worth (24) credits.
7.2 Bachelor of Arts Honours in Religious and Family Studies is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of first registration.
7.3 The degree programme offers core/compulsory and elective/optional modules.
7.4 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".
7.5 For a student to graduate, they should have accumulated at least five hundred and forty (540) credits including university-wide modules. Of these total credits, 384 Credits shall be accrued from MBKs.

8.0 PROGRAMME ASSESSMENT
8.1 Overall assessment shall consist of continuous assessment and formal examinations.
8.2 To be admitted to examinations, a student must have satisfied continuous assessment requirements for all approved modules of study.
8.3 In the case of a research project, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of the research project, submitted at a date determined by the Departmental Board.
8.4 Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.
8.5 The final mark will be weighted as 25% for continuous assessment and 75% for examination.

9.0 PROVISION FOR PROGRESSION
Refer to Section 6 of the Faculty of Arts and Humanities Regulations for the Undergraduate Degrees.

10.0 FAILURE TO SATISFY EXAMINERS
Refer to Section 11 of the General Academic Regulations for the Undergraduate Degree Programmes.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for the Undergraduate Degree Programmes.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for the Undergraduate Degree Programmes.

MODULE SYNOPSES

HRFS 101 Introduction to the New Testament

The module introduces students to the study of the New Testament, its social, religious and literary settings including the canonisation of the New Testament. The module focuses also on critical approaches to the New Testament.

HRFS 102 Introduction to the Old Testament

The module introduces students to the study of the Old Testament; its social, religious and literary settings, including the canon of the Bible. The module focuses on equipping students with tools for biblical interpretation and the ability to analyse relevant texts in light of contemporary religious development in Africa.

HRFS 103 Introduction to the Study of Religion

The module introduces students to the study of religion. It focuses on issues such as the definition of religion, theories of origin, history of religion, the insider/outsider perspectives and research ethics. The module also examines the characteristics, strengths and weaknesses of selected theories for the study of religion such as the anthropological, sociological, historical, phenomenological, psychological, psychological and feminist approaches. The module shall examine the various theories and underlying concepts in the study of the beliefs and practices of various religions of the world. This will help the students to appreciate and understand other religions while getting to know their religion better.

HRFS 104 Introduction to African Indigenous Religions

The module discusses the understanding and development of African Indigenous Religions. The module focuses on the religions of Africa, themes, rites of passage, beliefs and religious practices of selected African communities. It attempts to encourage an understanding of the contribution of African Indigenous Religions to religious syncretism amongst African Muslims and Christians.

HRFS 106 Introduction to Ethics

The module introduces students to the philosophical study of morality, including the theory of right and wrong behaviour, the theory of value (goodness and badness), and the theory of virtue and vice. Besides providing familiarity with the primary questions addressed within moral philosophy and the most influential answers given by well-known philosophers, this module is designed to help students develop their abilities to read, explicate, analyse, and evaluate philosophical literature, write and express themselves well about their ethical positions regarding contemporary moral problems, and think critically and analytically about ethical issues.

HCS 115 Introduction to Computers

This module is provided for all those who are not familiar with computers. It is an introductory course which aims to equip students with basic computer skills. Students will be taught the basics of working with a computer as well as the use of common software packages. At the end of the course, students should be able to use the internet and process language documents using a computer.

CS131 Communication Skills

Refer to Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

HRFS 107 Introduction to Religions of the World

This module carries out an introductory survey of the religions of the world that are practised in the global village. It focuses on the basic histories and worldviews of these world religions. The necessity to know more about other religions, apart from our own, arises due to the fact of multiple influences of religion in various aspects of life today, locally and globally. The module surveys religions that originated in South Asia (Hinduism, Theravada Buddhism and Jainism), Southwest Asia (Baha'i Faith), East Asia (Taoism, Confucianism and Mahayana Buddhism) and the Caribbean Islands (Rastafarianism) but have permeated the other parts of the world. The module concludes by reflecting

on how the religions of the world will relate in future. The study of these world's religions is historical, comparative and, above all phenomenological.

HRFS 108 Themes in Christian History and Thought
The module attempts to give a brief overview of some themes in Christian history and thought from the Early Church to contemporary issues in Christian thought and practice. The module covers themes that have particular reference to ministry in Africa; Early Church, Patristic Theology, Ecumenical Councils, Scholastic Theology, Reformation, Protestantism, Missionary Movement, Evangelical Movement, Pentecostalism and Fundamentalism

HRFS 109 Sociology of Religion
The module explores religion in its varied manifestations as a social institution, as a cultural practice, and as a pattern of beliefs and activities that are shaped by societal conditions and that, in turn, shape these conditions. Thus, the module explores the social dimension of religion through a consideration of the relationship of religion and society. It examines the social theories that have been propounded by social theorists and critics such as E. Durkheim, Karl Marx, Max Weber& others.

HRFS 110 History of Christianity in Africa
The module makes a survey of the History of Christianity in Africa from the Church of Alexandria to the rapid growth of African Christians in the 19th century with the advent of colonialism and the Independence of most African states.

HRFS 113 Life and Ministry of Jesus and Palestinian Christianity
This module focuses on the historical, organisational and doctrinal development of the Christian community from its origin in Jesus' ministry to the time of the Jerusalem council. The module examines Jesus' teachings in the context of contemporary times with a view to finding out how the teachings could be harnessed to speak to Africa's contemporary lived experiences.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for the Undergraduate Degree Programmes.

HRFS 105 Introduction to Christian Theology
The module introduces students to fundamental doctrines in theology like; revelation, faith, scripture, tradition, the Triune God, salvation, eschatology, and to contemporary issues in theology like inculturation, peace building, gender and development in Africa.

DSH 222 Project Management, Monitoring and Evaluation
The module provides a solid foundation in the concepts, tools and techniques of project management, monitoring and evaluation. Other critical aspects of the project cycle will be surveyed.

HRFS 111 Logic
This module investigates and classifies the structure of statements and arguments, both through the study of formal systems of inference and through the study of arguments in natural language. It deals with propositions or declarative sentences, used to make an assertion that are capable of being true and false. It covers core topics such as the study of fallacies and paradoxes, as well as specialised analysis of reasoning using probability and arguments involving causality and argumentation theory.

HRFS 202 Islam: Africa
The study of Religions in Africa is not be complete without an in-depth study of Islam's, beliefs and doctrines, as one of the major religions in Africa. The module discusses the historical development of Islam and the challenges of contemporary Muslims in Africa.

HRFS 208 Religion and Ethics
This module focuses on the interface between religion and the concept of right and wrong in different contexts, especially in Zimbabwe. It explores ethical issues with special reference to African Indigenous Religion, Christianity, and Islam. Ethical theories, namely, Natural Law, Divine Command, Utilitarianism, the Golden Rule, the Categorical Imperative, and Unhu/Ubuntu, will be analysed in relation to their applicability to ethical problems in Zimbabwe. The module seeks to develop, in students, a reflective awareness of their morality and opinions in relation to some of the current issues in the Zimbabwean context.

HRFS 218 Selected Themes in African Indigenous Religions
The module discusses in an in-depth manner, issues such as the concept of God, rituals, symbolism, evil, indigenous medicine etc. among Africans. The module provides knowledge on selected topics which are relevant to the understanding of African.

HRFS 215 Introduction to Gender Studies
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and their social interactions. Topics covered include understanding gender, theories of gender inequalities, historical development of gender, gender analysis, gender issues in Zimbabwe, redressing gender imbalances, empowerment and strategies for creating a gender responsive environment. Every student has to pass the course r to graduate.

ENT 131 Entrepreneurship 1
Refer to the Faculty of Commerce Regulations.

HRFS 213 Elementary Biblical Greek
This module provides an introduction to the language known as Koine Greek, in which the New Testament was written. It covers some of the basic grammar and vocabulary of the language. By the end of the module, students should be able to read some select passages from John's gospel. The module also addresses basic grammatical ideas and structures common to all Indo-European languages. The module will also be looking at some of the historical and linguistic background of the Koine Greek

HRFS 217 Administration and Finance
This module enables students to evaluate and question key financial structures, documents and figures. Sound financial management is essential to organisational success. Key figures in all types of organisations need to be able to understand the language of accounting and finance to take a considered role in corporate planning and dialogue.

HRFS 207 Old Testament Ethics
This module examines the ethical position of the Old Testament. It focuses on what the Old Testament teaches on particular moral issues, the proof texts we can search out to support a moral perspective and the ethical themes that run through the Old Testament literature.

HRFS 221 Pastoral Counselling
The module introduces students to pastoral counselling while focusing on the care of the sick, marriage guidance, bereavement, grief and loss. The students are encouraged to draw from traditional forms of counsel and guidance and their applicability to Christian pastoral care.

HRFS 201 The New Testament (Acts, Pauline and Deutero-Pauline Literature, Johannine Literature, Pastoral Letters, Apocalyptic Literature)
This module focuses on selected major themes in the New Testament, with special reference to Acts, Pauline, Deutero-Pauline, non-Pauline letters and apocalyptic literature and how these themes apply to the Zimbabwean context.

HRFS 204 Religion and Development
The module focuses on the relationship between religion and development. It begins with classical theories that sidelined religion examining the inevitable contribution of religion to development discourse. In the process, it discusses theories that recognise the invaluable contribution of religion in development. The module also addresses the religious aspect in major themes in development discourses such as the global millennium goals, globalisation and its impact on the development of poor societies of the world, gender equity; notions of democracy; good governance and human rights and others in the context of Christian teaching and social theology.

HRFS 205 Philosophy of Religion
This module discusses and reflects on the philosophical theories guiding the study of religious inquiry and the quest for meaning. People have died or have been killed in the name of religion. Religion is not a matter of intellectual persuasion or conviction, religion touches the very core of a person. It demands conviction, commitment and sacrifice.

HRFS 206 Religion and Gender
The module introduces students to gender concepts, the theology of feminism as well as various roles and status of women in the Bible and in our African context. Topics to be covered include the role of women in the Bible, the ordination of women, the impact of education and urbanisation, women's struggle for emancipation and participation in Church life.

HRFS 210 Research Methods in Religious Studies
This module focuses on imparting basic research methodology and techniques such as conducting field investigation, social analysis, administering questionnaires and interpreting the findings in an academic manner.

HRFS 216 The Old Testament (Pentateuch, Prophecy and Contemporary Issues, Writings, Wisdom Literature)
The module exposes the student to a number of issues through the study of the Old Testament. Some of the issues are broken down into units to allow in-depth understanding. For instance, the module introduces students to the phenomenon of prophecy from the emergence of this movement in Israel in 1100 BCE until 800 BCE. Students study concepts of prophecy, activities of individual prophets and their message in the Pre-Canonical period. The module relates these to contemporary issues such as conflict resolution and development.

HRFS 211 Religious Education
The module equips students in acquiring and developing strategies for teaching religious education in various settings. The module examines theories of religious and moral development and the underlying theological concepts of teaching religious education.

RFS 214 Elementary Biblical Hebrew

This module provides the student with a basic understanding of the Ancient Hebrew language and to build a foundation for further study of the Hebrew Bible. Students learn the basics of Hebrew grammar and syntax and are able to read and appreciate short passages of Hebrew taken directly from the Old Testament. The course provides a firm basis for further study in the language.

HRFS 301, 302 & 303 Work- Related Learning (WRL)
This module enables students to develop the ability to translate theoretical knowledge to real-life experiences by applying practical skills in a proficient manner. The course also equips students with effective time management skills as well as work-related documentation process, the importance of evidence-based research and the ability to draw together knowledge and skills from different disciplinary. The module has the following breakdown. Employer's Assessment. The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities. Academic Supervisor's Assessment. The Academic Supervisor's assessment looks at the student's conduct at the work place. Focus is on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and addressing issues at the workplace as well as relating and communicating with colleagues. Work-Related Learning Report. This is a report written by the student based on their activities and experiences during Work-Related Learning. The report format is provided by the Department.

HRFS 401 African Christian Theology
The module discusses the emerging theologies of Africa in relationship to the historical and contemporary issues in African Christian Theology such as African Christologies, inculturation, black theology, and ecumenism in Africa. The students are invited to study and reflect on the work of some African theologians such as Bujo, Nyamiti, Magesa, Mugambi, Moyo, Muzorewa, and Tutu.

HRFS 402 Religion and Health
The module examines the relationship between religion and health. It examines religious responses to disease outbreaks such as HIV and AIDS as well as the novel COVID-19 pandemic. It focuses on the care and intervention programmes, development of life skills, support networks and behaviour change programmes that have been/are being instituted to combat the problems. The module also critically analyses the spiritual benefits of religion as well as the challenges thereof.

HRFS 403 Religion and Media
This module discusses the interface between religion and the media. It seeks to expose students to the significance of various media such as the radio, television, mobile phone and internet and how these affect religious practice in society. The module also focuses on media ethics and how religion is reported in the media. Media reporting of religion will be discussed in conjunction with freedom of the media, freedom of the press, freedom of information and freedom of expression and association, in relation to how they are exercised and experienced when reporting religion.

HRFS 404The Bible in an African Context
The module discusses the reception and influence of the Bible within an African context, and related issues on language, interpretation, translations and the impact of the Bible on African institutions such as marriage, polygamy, faith healing, rites of passage and other contemporary issues.

HRFS 405 African Indigenous Religions and Contemporary Issues
The module discusses the interface AIRs and contemporary issues, homosexuality, disability, ecology, sustainable development, food security, tourism etc. The module provides in-depth knowledge of the selected issues.

HRFS 406 Psychology of Religion
The module traces the relationship between psychology and religion and explores some of the possible effects of religion on behaviour, thought and feelings. It looks at how religion affects what people think and do. The module examines the psychological theories propounded by theorists and critics such as Sigmund Freud, Carl Jung, Carl Rodgers, and Rudolph Otto among others.

HRFS 412 New Testament Ethics
This module examines the ways in which New Testament texts construct patterns of morality and ethics; to consider whether a 'moral vision' can be synthesised from the varied New Testament writings; to appraise the hermeneutical issues involved in using the Bible in ethics today, and to examine some models for the application of New Testament ethics to contemporary morality.

HRFS 419 Clinical Pastoral Education
This module is an interfaith professional education for ministry. It brings students into supervised encounters with persons in crisis. Out of an intense involvement with persons in need, and the feedback from peers and teachers, students develop new awareness of themselves as persons and of the needs of those to whom they minister. From theological reflection on specific human situations, they gain a new understanding of ministry. They also develop skills in interpersonal and inter-professional relationships.

HRFS 407 Religion, Peace and Security

The module looks at aspects of peace building, conflict transformation, post -war reconstruction, mediation, rehabilitation, reconciliation and healing and people -centered participatory development from various religious perspectives. The interest is in finding out how religion can meet multiple challenges of African conflict situations.

HRFS 409 Religion and Entrepreneurship, Tourism and Sports
The module examines the relationship between religion and entrepreneurship. It examines whether religion has any impact on decision-making that promotes economic growth, i.e. the decision to become an entrepreneur. It aims to shed light on two questions: (1) What are the channels by which religion influences economics and (2) Are the impacts on economic activity the same across all religions? The module also explores the contribution of spiritual/religious tourism, anchored on faith-based travel, as one of the segments of cultural tourism that has resulted in the growth of many economies. The need to balance between religion, 'tourismification' of cultural heritage assets and the law occupies a central place in the module where they are assessed as collaborators and competitors.

HRFS 410 Ethics and Disability
The aim of the module is to introduce the study of Disability from an ethical perspective. The module investigates through skill-building independent research, writing and presentations, how disability is interconnected with issues such as stigma, gender, social exclusion, social movements, globalisation, war and conflict.

HRFS 408 Research Project
Research Project enables students to conceive and execute a major research project in an area of their choice. With guidance from a member of the academic staff as supervisor, the learners plan and design an independent research project which relates to their overall programme of study. Candidates are expected to write a project of between 9000- 12000 words. The project counts as two (2) modules

REGULATIONS FOR THE BACHELOR OF ARTS HONOURS DEGREE IN RELIGIOUS STUDIES AND HUMAN DEVELOPMENT (AH11)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	540
Actual Credit Load	540
MBKs Credit Load	384
Level:	ZNQF-Level 8

1.0 PURPOSE OF THE PROGRAMME

The Honours Degree in Religious Studies and Human Development programme seeks to produce graduates who are able to:

(1) provide leadership in different religious & developmental institutions nationally, regionally and even internationally either through teaching, consultancy, counselling, pastoring or any support service to communities in need;

(2) facilitate research and publication on religious and ethical issues as well as on human development;

(3) promote African values and initiatives;

(4) Initiate ethical and developmental initiatives that address the many challenges of the world such as war, HIV/AIDS, famine and environmental change.

2.0 ENTRY REQUIREMENTS

2.2 Normal Entry

To be eligible, candidates must have at least five 'O' Level passes or the assessed equivalent including English and at least two 'A' level passes in any of the following: Family and Religious Studies, History, Sociology, Shona, Ndebele, Economics, Accounts, Literature in English and any other relevant subject in the Humanities.

2.2 Special entry

•Refer to Section 3.2 of the General Regulations. Candidates must have acquired a Diploma in Religious Studies, Theology or Development Studies from a recognised institution acquired normally in not less than 18 months and at least 5 subjects at "O" level or its equivalent. Candidates with relevant work experience may also be admitted.

2.3 Mature entry

Persons who are 25 years of age for males and 23 years for females may apply for mature entry provided they passed at least 5 'O' levels including English and must have demonstrated suitability for university studies by virtue of their attainments and/or relevant work experience. For more information refer to General Academic Regulations 3.3.

2.4 Visiting School:

This is a 3-year degree programme aimed at individuals already in employment. In addition to satisfying the general entry requirements, they should also either have a Diploma in the relevant field or any other tertiary qualification. Levels 2 and 3 run concurrently.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREAS OF STUDY

New Testament Studies, Old Testament Studies, World Religions, African Traditional Religions, Philosophy of Religion, Christian Theology, Christian History and Thought, HIV/AIDS ministry in Zimbabwe, History of Christianity, Islam, Social Ethics, Religious Perspectives on Sexuality, Marriage & Family, Theology and Development, The Bible in an African Context, Theology and Gender Studies, Research Methods in Religious Studies and Theology, Religion and the Media, Christian Leadership, Religion and Society in Africa, New Religious Movements, Counselling and Theology, Religion, Conflict, Peace and Development.

3.2 SPECIALIST FOCUS

Engagement of Religion in Contemporary Issues such as HIV/AIDS, Gender, Development, Ecology, and Social Transformation.

3.3 ORIENTATION

The programme takes a multi-cultural approach where diversity and tolerance of other religions are emphasised.

3.4 DISTINCTIVE FEATURES -

Interaction with seasoned scholars (Sabbatical Fellows).

-Grooming of versatile religious, ethics and human development graduates who can relate and be problem solvers to contemporary challenges.

-A strong and active tradition of language and textual expertise.

-Regular research seminars with visiting speakers.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 EMPLOYABILITY:

Religious, Ethics and Human Development graduates can work in religious and development institutions as counsellors, lecturers, administrators or pastors; in NGOs as gender activists, counsellors; in welfare institutions as gender activists, HIV/AIDS counsellors and advisors; in colleges and universities as lecturers and any other religious, ethical and development -oriented fields.

4.2 FURTHER STUDIES

Masters and Doctoral Studies.

5.0 PROGRAMME DELIVERY

5.1 TEACHING AND LEARNING METHODS

Lectures, Tutorials, Seminars, Group Work, Work- Related Learning, and research projects.

6.0 INTENDED LEARNING OUTCOMES

6.1 Conduct rigorous research and publish on religious, ethical and human developmental issues, especially the Afrocentric dimensions of culture, heritage, religion and modes of being.

6.2 Apply relevant analytical skills and insights from religious, ethical and human development discourses to transform society and inform national development.

6.3 Teach and impart religious knowledge to diverse categories of learners.

6.4 Demonstrate knowledge and understanding of religion, ethics and human development.

6.5 Provide thoughtful and empathetic leadership to different communities.

6.6 Provide consultancy and support services to communities in need.

6.7 Demonstrate an appreciation of the pervasive nature of religion in all facets of human life by making interventions that address the many challenges of the world such as war, social inequality, HIV/AIDS, famine and environmental change.

7.0 GENERAL PROVISIONS

7.1 The programme consists of 33 modules worth (12) credits each and a research project which is worth (24) credits

7.6 Bachelor of Arts Honours in Religious, Ethics and Human Development is a full-time degree programme. Normally, a student will be required to complete the programme in not less than four years from the date of first registration.

7.7 The degree programme offers core/compulsory and elective/optional modules.

7.8 Students can include in their programme of study, modules offered by other departments, in line with the concept of "Flexible Packaging".

7.9 For a student to graduate, they should have accumulated at least five hundred and forty (540) credits including university -wide modules. Of these total credits, 384 Credits shall be accrued from MBKs.

8.0 PROGRAMME ASSESSMENT

8.1 Overall assessment shall consist of continuous assessment and formal examinations.

8.2 To be admitted to examinations, a student must have satisfied continuous assessment requirements for all approved modules of study.

8.3 In the case of a research project, the Departmental Board of Examiners shall determine a mark for each student based on the presentation to a panel of the Departmental Board of Examiners and improvements done to the final version of the research project, submitted at a date determined by the Departmental Board.

8.4 Each formal examination shall be held during an examination period at the end of a semester in which the module is completed.

8.5 The final mark shall be weighted as 25% for continuous assessment and 75% for examination.

8.0 PROVISION FOR PROGRESSION

See Section 10 of the General Academic Regulations for Undergraduate Degrees of the Midlands State University and Section 6 of the Faculty Regulations for the Undergraduate degree programmes.

9.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Academic Regulations for the Undergraduate degree programmes.

10.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 9 of the Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

11.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

PROGRAMME STRUCTURE

NB.

- *MBK Modules
- The electives can be chosen from within the Department or from other departments.

Level 1 Semester 1

Code	Module Description	Credits
HREDS 101	Introduction to Human Development	12

- Not all electives will be on offer in any given year. Electives on offer will depend on the availability of teaching staff.

MODULE SYNOPSES

HREDS 101 Introduction to Human Development
The module introduces students to shifts in development thinking, ranging from economic growth, employment creation, redistribution with growth, basic needs, bottom-up development, and participatory development to human development. This module introduces the challenge of underdevelopment followed by theories of growth and development that emphasise the importance of growth as the principal performance yardstick. Against the above background, approaches like Basic Needs and Quality of Life, which are "people- centric" will be taught.

HREDS 103 Introduction to the Study of Religion
The module introduces students to the study of religion. It focuses on issues such as the definition of religion, theories of origin, history of religion, insider/outsider perspectives and research ethics. The module also examines the characteristics, strengths and weaknesses of selected theories for the study of religion such as the anthropological, sociological, historical, phenomenological, psychological, psychological and feminist approaches. The module examines the various theories and underlying concepts in the study of the beliefs and practices of various religions of the world. This helps the students to appreciate and understand other religions while getting to know their religion better.

HREDS 104 Introduction to African Indigenous Religions
The module discusses the understanding and development of African Indigenous Religions. The module focuses on the religions of Africa, themes, rites of passage, beliefs and religious practices of selected African communities. It encourages an understanding of the contribution of African Indigenous Religions to religious syncretism amongst African Moslems and Christians.

HREDS 106 Introduction to Ethics
The module introduces students to the philosophical study of morality, including the theory of right and wrong behaviour, the theory of value (goodness and badness), and the theory of virtue and vice. Besides providing familiarity with the primary questions addressed within moral philosophy and the most influential answers given by well-known philosophers, this module is designed to help students develop their abilities to read, explicate, analyse, and evaluate philosophical literature, write and express themselves well about their ethical positions regarding contemporary moral problems, and think critically and analytically about ethical issues.

HCS 135 Introduction to Information Technology
This module is provided for all those who are not familiar with computers. It is an introductory course which aims to equip students with basic computer skills. Students are taught the basics of working with a computer as well as the use of common software packages. At the end of the course, students will be able to use the internet and process language documents using a computer.

CS 131 Basic Communication Skills
Refer to Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

HREDS 107 Introduction to Religions of the World
This module carries out an introductory survey of the religions of the world that are practised in the global village. It focuses on the basic histories and worldviews of these world religions. The necessity to know more about other religions, apart from our own, arises due to the fact of multiple influences of religion in various aspects of life today, globally and locally. The module surveys religions that originated in South Asia (Hinduism, Theravada Buddhism and Jainism), Southwest Asia (Baha'i Faith), East Asia (Taoism, Confucianism and Mahayana Buddhism) and the Caribbean Islands (Rastafarianism) but have permeated the other parts of the world. The module concludes by reflecting on how the religions of the world will relate in future. The study of these world's religions is historical, comparative and, above all phenomenological.

HREDS 108 Themes in Christian History and Thought
The module gives a brief overview of some themes in Christian history and thought from the Early Church to contemporary issues in Christian thought and practice. The module covers themes that have particular reference to ministry in Africa; Early Church, Patristic Theology, Ecumenical Councils, Scholastic Theology, Reformation, Protestantism, Missionary Movement, Evangelical Movement, Pentecostalism and Fundamentalism

HREDS 109 Sociology of Religion
The module explores religion in its varied manifestations as a social institution, as a cultural practice, and as a pattern of beliefs and activities that are shaped by societal conditions and that, in turn, shape these conditions. Thus, the module explores the social dimension of religion through a consideration of the relationship of religion and society. It examines the

social theories that have been propounded by social theorists and critics such as E. Durkheim, Karl Marx, Max Weber & others.

HREDS 110 Governance and institutions for human development
The module introduces students to basic concepts of governance. Students are familiarised with the elements of governance that include institutions, delivery mechanisms and legislations. The above information is vital for students to understand the links between governance and human development that are realised through the enabling conditions of political freedom, participation, decentralisation, empowerment, equity and accountability.

HREDS 112 Old Testament Ethics
This module examines the ethical position of the Old Testament. It focuses on what the Old Testament teaches on particular moral issues, the proof texts we can search out to support a moral perspective and the ethical themes that run through the Old Testament literature.

HREDS 113 Life and Ministry of Jesus and Palestinian Christianity
This module focuses on the historical, organisational and doctrinal development of the Christian community from its origin in Jesus' ministry to the time of the Jerusalem council.

CS 132 Extended Communication Skills
Refer to Faculty of Arts and Humanities Regulations for the Undergraduate degree programmes.

HREDS 105 Introduction to Christian Theology
The module introduces students to fundamental doctrines in theology like; Revelation, Faith, Scripture, Tradition, the Triune God, Revelation, Salvation, Eschatology, and to contemporary issues in theology like inculturation, peace building, gender and development in Africa.

DSH 222 Project Management, Monitoring and Evaluation
The module provides a solid foundation in the concepts, tools and techniques of project management, monitoring and evaluation. Other critical aspects of the project cycle will be surveyed.

HREDS 111 Logic
This module investigates and classifies the structure of statements and arguments, both through the study of formal systems of inference and through the study of arguments in natural language. It deals with propositions or declarative sentences, used to make an assertion that is capable of being true and false. It covers core topics such as the study of fallacies and paradoxes, as well as specialised analysis of reasoning using probability and arguments involving causality and argumentation theory.

HREDS 202 Islam: Africa
The study of Religions in Africa will not be complete without an in-depth study of Islam's, beliefs and doctrines, as one of the major religions in Africa. The module discusses the historical development of Islam and the challenges of contemporary Muslims in Africa.

HREDS 208 Religion and Ethics
This module focuses on the interface between religion and the concept of right and wrong in different contexts, especially in Zimbabwe. It explores ethical issues with special reference to African Indigenous Religion, Christianity, and Islam. Ethical theories, namely, Natural Law, Divine Command, Utilitarianism, the Golden Rule, the Categorical Imperative, and Unhu/Ubuntu, will be analysed in relation to their applicability to ethical problems in Zimbabwe. The module seeks to develop, in students, a reflective awareness of their morality and opinions in relation to some of the current issues in the Zimbabwean context.

HREDS 218 Selected Themes in African Indigenous Religions
The module discusses in an in-depth manner, issues such as the concept of God, rituals, symbolism, evil, indigenous medicine etc. among Africans. The module provides knowledge on selected topics which are relevant to the understanding of African Indigenous Religions.

HREDS 215 Introduction to Gender Studies
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, Gender Issues in Zimbabwe, Redressing Gender Imbalances,

Empowerment and Strategies for creating a gender- responsive environment. Every student has to pass the course to graduate.

ENT 131 Entrepreneurship 1

Refer to the Faculty of Commerce Regulations

HREDS 213 Elementary Biblical Greek
This module provides an introduction to the language known as Koine Greek, in which the New Testament was written. It covers some of the basic grammar and vocabulary of the language. By the end of the module, students should be able to read some select passages from John's gospel. The module also addresses basic grammatical ideas and structures common to all Indo-European languages. The module also looks at some of the historical and linguistic background of the Koine Greek

HREDS 217 Administration and Finance
This module enables students to evaluate and question key financial structures, documents and figures. Sound financial management is essential to organisational success. Key figures in all types of organisations need to be able to understand the language of accounting and finance to take a considered role in corporate planning and dialogue.

HREDS 221 Pastoral Counseling
The module introduces students to pastoral counselling, while focusing on the care of the sick, marriage guidance, bereavement, grief and loss. The students are encouraged to draw from traditional forms of counsel and guidance and their applicability to Christian pastoral care.

HREDS 201 The New Testament (Acts, Pauline and Deutero-Pauline Literature, Johannine Literature, Pastoral Letters, Apocalyptic Literature)

This module focuses on selected major themes in the New Testament, with special reference to Acts, Pauline, Deutero-Pauline, non-Pauline letters and apocalyptic literature and how these themes are applicable to the Zimbabwean context.

HREDS 204 Religion and Development
The module introduces students to the discipline of development studies. It begins with classical theories, examining their contribution to the growth and development of economies. The module also addresses major themes in development discourses such as the global millennium goals, globalisation and its impact on development of poor societies of the world, gender equity; notions of democracy; good governance and human rights and others in the context of Christian teaching and social theology.

HREDS 205 Philosophy of Religion
This module discusses and reflects on the philosophical theories guiding the study of religious inquiry and the quest for meaning. People have died or have been killed in the name of religion. Religion is not a matter of intellectual persuasion or conviction, religion touches the very core of a person. It demands conviction, commitment and sacrifice.

HREDS 206 Religion and Gender
The module introduces students to gender concepts, the theology of feminism as well as various roles and status of women in the Bible and in our African context. Topics covered include the role of women in the Bible, the ordination of women, the impact of education and urbanisation, women's struggle for emancipation and participation in Church life.

HREDS 210 Research Methods in Religious Studies
This module focuses on imparting basic research methodology and techniques such as conducting field investigation, social analysis, administering questionnaires and interpreting the findings in an academic manner.

HREDS 216 The Old Testament (Pentateuch, Prophecy and Contemporary Issues, Writings, Wisdom Literature)

The module exposes the student to a number of issues through the study of the Old Testament. Some of the issues are broken down into units to allow in-depth understanding. For instance, the module introduces students to the phenomenon of prophecy from the emergence of this movement in Israel in 1100 BCE until 800 BCE. Students study concepts of prophecy, activities of individual prophets and their message in the Pre-Canonical period. The module relates these to contemporary issues such as conflict resolution and development.

HREDS 211 Religious Education

The module equips students in acquiring and developing strategies for teaching religious education in various settings. The module will examine theories of religious and moral development and the underlying theological concepts of teaching religious education.

HREDS 214 Elementary Biblical Hebrew
This module provides the student with a basic understanding of the Ancient Hebrew language and to build a foundation for further study of the Hebrew Bible. Students learn the basics of Hebrew grammar and syntax and are able to read and appreciate short passages of Hebrew taken directly from the Old Testament. The module provides a firm basis for further study in the language.

HREDS 301, 302 & 303 Work- Related Learning (WRL)
This module enables students to develop the ability to translate theoretical knowledge to real-life experiences by applying practical skills in a proficient manner. The course also equips students with effective time management skills as well as work-related documentation process, the importance of evidence-based research and the ability to draw together knowledge and skills from different disciplinary. The module has the following breakdown. Employer's Assessment. The host supervisor's assessment looks at the student's conduct and behaviour, interpersonal skills development, operational competencies and leadership qualities. Academic Supervisor's Assessment. The Academic Supervisor's assessment looks at the student's conduct at the work place. The focus will be on the ability to link working and learning, being initiative, creativity, ingenuity and perseverance in identifying and addressing issues at the workplace as well as relating and communicating with colleagues. Work-Related Learning Report This is a report written by the student based on their activities and experiences during Work- Related Learning. The report format is provided by the Department.

HREDS 401 African Christian Theology
The module discusses the emerging theologies of Africa in relationship to the historical and contemporary issues in African Christian Theology such as African Christologies, inculturation, black theology, and ecumenism in Africa. The students are invited to study and reflect on the work of some African theologians such as Bujo, Nyamiti, Magesa, Mugambi, Moyo, Muzorewa, and Tutu.

HREDS 402 Religion and Health
The module examines the relationship between religion and health. It examines religious responses to disease outbreaks such as HIV and AIDS as well as the novel COVID-19 pandemic. It focuses on the care and intervention programmes, development of life skills, support networks and behaviour change programmes that have been/are being instituted to combat the problems. The module also critically analyses the spiritual benefits of religion as well as the challenges thereof.

HREDS 403 Religion and the Media
This module discusses the interface between religion and the media. It seeks to expose students to the significance of various media such as the radio, television, mobile phone and internet and how these affect religious practice in society. The module also focuses on media ethics and how religion is reported in the media. Media reporting of religion will be discussed in conjunction with freedom of the media, freedom of the press, freedom of information and freedom of expression and association, in relation to how they are exercised and experienced when reporting religion.

HREDS 405 African Indigenous Religions and Contemporary Issues
The module discusses the interface AIRs and contemporary issues, homosexuality, disability, ecology, sustainable development, food security, tourism etc. The module provides in-depth knowledge of the selected issues.

HREDS 406 Psychology of Religion
The module traces the relationship between psychology and religion and explores some of the possible effects of religion on behaviour, thought and feelings. It seeks to look at how religion affects what people think and do. The module examines the psychological theories propounded by theorists and critics such as Sigmund Freud, Carl Jung, Carl Rodgers, and Rudolph Otto among others.

HREDS 412 New Testament Ethics
This module examines the ways in which New Testament texts construct patterns of morality and ethics; to consider whether a 'moral vision' can be synthesised from the varied New Testament writings; to appraise the hermeneutical issues involved in using the Bible in ethics today, and to examine some models for the application of New Testament ethics to contemporary morality.

HREDS 419 Clinical Pastoral Education
This module is an interfaith professional education for ministry. It brings students into supervised encounters with persons in crisis. Out of an intense involvement with persons in need, and the feedback from peers and teachers, students develop new awareness of themselves as persons and of the needs of those to whom they minister. From theological reflection on

specific human situations, they gain a new understanding of ministry. They also develop skills in interpersonal and inter-professional relationships.

HREDS 407 Religion, Peace and Security
The module looks at aspects of peace- building, conflict transformation, post-war reconstruction, mediation, rehabilitation, reconciliation and healing and people -centered participatory development. While using biblical sources of sustainable peace- building and exploring the theological bases for a just war theory and pacifism and shows how effective Christian non-violence can meet the multiple challenges of African conflict situations.

HREDS 409 Selected Issues in Human Development
This module highlights the emerging issues in human development that are related to processes like globalisation, trade, technology, migration and the larger and fundamental issues of human rights. Students will explore the impact of these issues in light of increasing inequalities in growth and poverty across countries.

HREDS 410 Ethics and Disability
The module aims to introduce the study of Disability from an ethical perspective. The module investigates through skill-building independent research, writing and presentations, how disability is interconnected with issues such as stigma, gender, social exclusion, social movements, globalisation, war and conflict.

HREDS 408 Research Project
Research Project enables students to conceive and execute a major research project in an area of their choice. With the guidance from a member of the academic staff as supervisor, the learners plan and design an independent research project which relates to their overall programme of study. Candidates are expected to write a project of between 9000- 12000 words. The project counts as two (2) modules.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN RELIGIOUS STUDIES (MARS)

Duration	18 months
Minimum Credit Load	270
Maximum Credit Load	340
Actual Credit Load	270
Maximum MBKs Credit Load	210
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME
The Programme seeks to develop sound conceptual, analytical and critical skills in students that are required for success in the field of African Indigenous Religions; Religion and Ethics; Religion and Sustainable Development; Religion and Gender; Phenomenology of Religion; Christian History and Thought; Theology; Old Testament Studies; and New Testament Studies. It also seeks to engage students intellectually and professionally in the critical theological, philosophical, ethical and religious issues pertinent to the needs of the 21st Century.

2.0 ENTRY REQUIREMENTS
To be eligible for admission, an applicant must have a good Honours degree in Religious Studies or a dual Honours degree that includes Religious Studies or an equivalent qualification. For Biblical studies, biblical languages are a prerequisite. Those who intend to pursue Masters Studies in the Old Testament must have done biblical Hebrew at the undergraduate level and those who intend to pursue studies in the New Testament must have done New Testament Greek.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREAS OF STUDY

African Indigenous Religions; Religion and Ethics; Religion and Sustainable Development; Religion and Gender; Phenomenology of Religion; Christian History and Thought; Practical Theology; Old Testament Studies; and New Testament Studies.

3.2 SPECIALIST FOCUS
Engagement of Religion in Contemporary Issues such as HIV/AIDS, Gender, Development, Ecology, Social Transformation.

3.3 ORIENTATION

The programme takes a multi-cultural approach where diversity and tolerance of other religions is emphasised.

3.4 DISTINCTIVE FEATURES

-Interaction with seasoned scholars (Sabbatical Fellows).

- Grooming of versatile post-graduates who can relate and be problem solvers to contemporary challenges.

- A strong and active tradition of language and textual expertise

- Regular research seminars with visiting speakers

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 EMPLOYABILITY:

Religious Studies graduates can find employment; in high schools offering lessons on all issues covered under the new curriculum: Family and Religious Studies (Form 1-4 & 5-6); work in religious institutions as counsellors, lecturers, administrators or pastors; in NGOs as gender activists, counsellors; those who are pastors already can be employed as Chaplains for the uniformed forces like the Prisons, Police, Army; in welfare institutions as gender activists, HIV/AIDS counsellors and advisors; in colleges and universities as lecturers and any other religious oriented fields.

4.2 FURTHER STUDIES

PhD Studies

5.0 **PROGRAMME DELIVERY**

5.1 Teaching and Learning Methods - Lectures, Tutorials, Seminars, Group Work, Research project.

6. LEARNING OUTCOMES

1. AFRICAN INDIGENOUS RELIGION

On successful completion of the Programme, the holder of this qualification should be able to;

1.1 Explore relationships between African Indigenous Religion(s) and theological, social, economic, political and technological discourses.

1.2 Demonstrate knowledge and understanding of the significance of African Indigenous religious system.

1.3 Analyse a variety of approaches used in the study of African Indigenous Religion(s).

1.4 Interrogate the value of African Indigenous Religion(s).

1.5. Evaluate the use of African indigenous concepts to solve societal challenges.

1.6 Apply an understanding of the significance of African Indigenous Religious conviction ina pluralistic context.

2. PHENOMENOLOGY OF RELIGION

On Successful completion of the Programme, the holder of this qualification should be able to;

2.1 Describe religious phenomena amongst religions of human kind.

2.2 Demonstrate an understanding and interpretation of the meaning of religion in a pluralistic context.

2.3 Assess the importance of religion on matters of peace, environment, women, and disability.

2.4 Evaluate the socio-scientific approaches to the study of religions.

2.5 Utilise phenomenological concepts to engage in interreligious dialogue.

2.6 Apply concepts of religious phenomena to human rights, politics and the digital world.

3. CHRISTIAN HISTORY AND THOUGHT

On successful completion of the Programme, the learner should be able to:

3.1 Demonstrate knowledge and understanding of Christian history and thought.

3.2 Research and publish in the area of Christian history and thought.

3.3 Apply the knowledge learnt to solve the many complexities arising from the diverse forms of Christianity today in Zimbabwe and the world over.

4. ISLAMIC STUDIES

On successful completion of the Programme, the learner should be able to:

4.1 Apply knowledge of Islam to their day-to-day interactions with Muslims

4.2 Demonstrate understanding of the impact of Islamic teachings on various aspects of life.

4.3 Conduct informed research studies on Muslims and Muslim society.

5. STUDIES IN AFRICAN AND ASIAN RELIGIONS

On successful completion of the Programme, the learner should be able to:

5.1 Demonstrate knowledge of the essence of African and Asian religions and philosophies.

5.2 Apply knowledge gained in conducting research on African and Asian religions.

5.3 Utilise the knowledge acquired to foster inter-religious dialogue.

5.4 Evaluate African and Asian Philosophies.

6. NEW TESTAMENT STUDIES

On successful completion of the Programme, the holder of this qualification should be able to:

6.1 Demonstrate significant knowledge of the history and methods of the study of the New Testament.

6.2 Make a historical reconstruction of the life and teaching of Jesus and the Early Church from the text of the New Testament.

6.3 Analyse the major themes running across the New Testament Books.

6.4 Utilise the major themes to synthesise the theology of the New Testament.

6.5 Evaluate selected theories of New Testament interpretation from key New Testament Scholarship.

6.6 Apply the theological knowledge learnt to solve the diverse challenges arising from the New Testament in Zimbabwe today.

7. OLD TESTAMENT STUDIES

On successful completion of the Programme, the holder of this qualification should be able to:

7.1 Demonstrate significant knowledge of the history and methods of the study of the Old Testament.

7.2 Make a historical reconstruction of the life and faith of ancient Israel from the text of the Old Testament

7.3 Analyse the major themes running across the Old Testament Books.

7.4 Utilise the major themes to synthesise the theology of the Old Testament.

7.5 Evaluate selected theories of Old Testament interpretation from key Old Testament Scholarship.

7.6 Apply the theological knowledge learnt to solve the diverse challenges arising from the Old Testament in Zimbabwe today.

8. THEOLOGY STUDIES

On successful completion of the Programme, the learner should be able to:

8.1 Demonstrate knowledge and understanding of theology.

8.2 Provide leadership in theological issues through consultancy and support services to communities.

8.3 Facilitate research and publication in theology.

8.4 Initiate theological initiatives that address the many practical challenges of the world such as war, HIV/AIDS, famine and environmental change.

9. RELIGION AND ETHICS

On l completion of the Programme, the learner should be able to:

9.1 Identify important ethical issues that occur in workplaces and methods for dealing with them.

9.2 Demonstrate a professional code of conduct in the workplace.

9.3 Morally guide people in different institutions nationally and regionally.

9.4 Initiate religious and ethical principles that address the many challenges of the world such as war, HIV/AIDS, famine and environmental change.

10. RELIGION AND GENDER

On successful completion of the Programme, the learner should be able to:

10.1 Utilise gender as an analytical category in an interreligious context.

10.2 Analyse gender discourses in cultural and religious circumstances.

10.3 Apply aspects of gender in interdisciplinary and trans-disciplinary contexts.

10.4 Demonstrate religiously motivated gender attitudes in practical professional applications.

10.5 Develop in-depth knowledge of basic texts, traditions and discourses in theology and religious studies.

11. RELIGION AND SUSTAINABLE DEVELOPMENT

On successful completion of the Programme, the learner should be able to:

11.1 Sustainably cherish natural resources with respect to the core religious values of their communities.

11.2 Offer religious-oriented consultancy and support services to communities in need of managing their God-given natural resources.

11.3 Research and publish in religious studies and sustainable development

11.4 Initiate religious and sustainable initiatives that address the many challenges of the world such as war, HIV/AIDS, famine and environmental change.

7.0 GENERAL PROVISIONS

7.1. The programme consists of 9 modules worth twenty (20) Credits each and a dissertation worth ninety (90) Credits.

7.2. Examinations will normally be taken at the end of each semester for each module on the dates to be advised by the University Examinations Office.

7.3. To be admitted to any of the examinations of the degree, the student must:

7.3.1. Be registered for the degree with the Midlands State University in accordance with the General Regulations for students,

7.3.2. Have attained continuous assessment marks, and have attended at least 80% of the lectures offered in the module for which the examination is to be sat.

7.4 To be awarded the Masters of Arts Degree in Religious Studies, a student must pass all modules including the dissertation and must have attained at least 270 credits

8.0 PROGRAMME ASSESSMENT

8.1 Overall assessment shall consist of continuous assessment and formal Examinations.

8.2 In the case of a dissertation, refer to General Regulations for Postgraduate Degrees, Section 20.

8.3 The final mark will be weighted as 30% for continuous assessment and 70% for examination.

9.0 PROVISION FOR PROGRESSION

Refer to Section 17 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 13 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

12.0 DEGREE WEIGHTING

Refer to Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

Summary of Modules arranged in logical sequence, and allocation of credits

AFRICAN INDIGENOUS/TRADITIONAL RELIGION

Level 1 Semester 1

Module name		**Credits**
*MARS 501	Approaches to the Study of African Indigenous Religion/ History and Methods of the Study of African Indigenous Religions	20

MODULE SYNOPSES (For all the 80% Modules Threshold)

Option

(a): AFRICAN INDIGENOUS RELIGION

MARS 501 Approaches to the Study of African Indigenous Religion /History and Methods in the Study of African Indigenous Religions

The module seeks to acquaint students with the history and methods in the academic study of African Indigenous Religions (AIRs). It makes a survey of the major trends and historiography of AIRs. The module tackles methods such as anthropology, the history of religion, and the phenomenology of religion. The module examines the ideas of key proponents to interrogate methodological issues that reveal some harmonious and discordant voices.

MARS 502 Comparative Study of Some Zimbabwean and non-Zimbabwean Indigenous Religions

The module explores African Indigenous Religions from a comparative perspective. It focuses on Zimbabwean and non-Zimbabwean Indigenous Religions. It covers the religious beliefs and practices of the African communities like the

Shona/Ndebele, Yoruba, Akan and Chewa, among others. The module tackles the traditional cosmology, the spirit world of ancestral spirits, alien spirits, and nature spirits. In addition, myths and rituals, symbolic objects, symbolic beliefs like omens, prohibitions and dreams are examined. Issues of health and well-being, traditional medicine, witchcraft and sorcery as well as death and the hereafter are also explored.

MARS 503 African Indigenous Religions and Environment

The module shall examine the contribution of African Indigenous Religions to the preservation and reclamation of the environment. The module examines some of the beliefs and practices underlying African Indigenous religion's attitudes to nature. The module makes use of examples from various African Indigenous Religions found in Africa.

MARS 505 Major Themes in the Study of African Indigenous Religions/ Contemporary Issues in African Indigenous Religions

The module shall explore topical issues in African Indigenous Religions that include salvation, health, marriage and sexuality, death, and politics. The module explores trends in these concepts with a desire to see how African Indigenous Religions interface with social changes.

MARS 506 Religion and Indigenous Knowledge Systems

The module shall explore how communities in diverse world regions preserve traditionally valued knowledge and create new knowledge. It examines how such communities navigate and respond to global forces such as natural disasters, environmental changes, political restructuring, health concerns, economic volatility, livelihood uncertainties, education crises, ethnic conflicts and develops problem-solving approaches. The connectedness between indigenous knowledge systems and indigenous religious traditions is the cornerstone of this module**.**

MARS 504 African Traditional Religion and Modernity/ African Indigenous Religion, Human Rights and Development

The module covers the interface between African Indigenous Religion and modernity, which entails human rights and development. It considers the various ways in which AIR influences and is influenced by the human rights discourse and development.

MARS 507 Inter-Religious Dialogue: African Indigenous Religion and Islam/ Christianity, etc

The module shall examine the role of inter-religious dialogue as a factor of mutual understanding, social cohesion and peace- building in world societies (international level) and within our society (national level). The module considers how African Indigenous Religion intersects with other religions found in the African context, especially Islam and Christianity.

MARS 500 Advanced Research Methods and Theories

The module shall provide students with the tools needed to study religions at an advanced level and to enable them to become initiated into the scholarly standards in their respective fields. An exploration is undertaken of the professional and ethical standards for undertaking research. Practical and empirical research methods are explored. Issues for research such as emic/etic perspectives, the significance of insider information, gendered discourses, questions of power and indigenous categories are explored.

MARS 509 Sociology of Religion

The module shall examine the social theories that have been propounded by social theorists and critics such as Emile Durkheim, Karl Marx, Milton Yinger, and Calvin Smith, among others. It also interrogates the social values of religion within social institutions such as politics, economy, culture and social interactions.

MARS 508 Dissertation

This is a research study of at least 25 000 to 30 000 words that is based on a research area in Religious Studies. The work must show originality and contribute to the body of knowledge in the area of investigation. The work must reflect a critical analysis of the issues at stake.

(b): PHENOMENOLOGY OF RELIGION

MARS 510 Phenomenological Approaches to the Study of Religion /History and Methods of the Study of Religion

This module examines the contributions of classical and modern phenomenologists in the study of religion. It explores the various phenomenological strands that have been employed in the study of religion. Above all, it discusses the strengths and weaknesses of these approaches in contemporary religious discourses.

MARS 511 Major Themes in the Study of Religions

The module shall provide students with an in-depth study of some of the major themes shaping the discipline of religious studies. Themes such as the concept of religion; insider/outsider perspectives; post modernism/postmodern religion; religion and culture; texts power/religious authority; gender; belief; myth and ritual; religion, migration, diaspora and transnationalism; religious pluralism and religion and science shall be looked at.

MARS 512 Religion, Food and Security

The module shall enable students to familiarise themselves with the main lines of the current debates about food and farming, as well as to give a thorough grounding in the theological background. The module has three parts. The first examines the basic issues surrounding religion and land use, religion and water sources and the likely impacts of climate change. The second considers some of the key issues in religion and contemporary farming; the third, likewise, in religious teachings on food security

MARS 515 Selected Religious Traditions from Asia and Africa/ Inter-Religious Dialogue

The module focuses on selected religious traditions from Asia and Africa with a view to promoting inter-religious dialogue. A thematic approach shall be adopted on concepts such as salvation, life after death, and gender relations, among others

MARS 568 Religion and Ecology

The discourse on ecology has often sidelined religion. The module shall explore the contribution of different religious traditions to the ecology discourse. The module explores also the emergence, history, theories, and practices of eco-feminism and the environmental justice movements as subfields of radical ecology, environmentalism, feminist activism, and Women's and Gender Studies.

MARS 514 Religion and Human Rights

The module shall focus on how dominant religions in Africa influence the African worldview with a particular focus on human rights and development issues. Among the topics given detailed attention are: women's rights, responses of African traditional communities to development initiatives such as the construction of a dam or a town that affects their sacred shrines, the African Charter, non-governmental organisations & human rights.

(c): CHRISTIAN HISTORY

MARS 516 History and Methods of the Study of Christian History and Thought/ Perspectives on the Study of Christian History

The module examines Christian historiography from four perspectives. The focus is on the imperialist, sectarian, Marxist and liberal approaches to the study of Christian history and thought. The thrust is to configure how and why the Christian message, from the beginning, was grafted on human history. The module examines how, the majority of church historians, have divided the trajectory of Christian history into four (4) broad areas, namely; the Early Church Era up to the end of the New Testament writings, the Imperial Church Era of the Patristic Fathers, the Medieval Church Era which closes with the Great Reformation of the 16th century and the foundations of the Modern Era to the present day.

MARS 517 Christian History: Early Church to the Reformation

The module shall explore some themes in Christian history and thought from the early Church to the beginning of the Reformation and assess its impact on the development of Christianity.

MARS 521 Christian History and Thought from the Reformation to the Present

The module covers Christian history within a specific context, pre-Reformation or Reformation to present. The aim is to show some milestones in Christian history. How an epoch is linked to a particular way of doing theology shall also be covered.

MARS 518 Survey of Christianity in Africa

The module examines the history of Christianity in Africa. The African mission cycles are studied to trace properly the implantation of Christianity in specific African regions like the Kongo, Ethiopia, Sudan and Munhumutapa. In addition, the module evaluates the notions of the 'balance sheet' for Christianity and the emergence of 'African Christianity' in light of decolonisation and globalisation.

MARS 519 Christianity and Islam in Contact

The module shall examine the relationship between these two major religions in their quest for world domination. The module explores the many points of contact between Christianity and Islam. It also highlights how this relationship has impacted on Africa.

MARS 507 Inter-Religious Dialogue: Christianity and African Culture

The module shall examine the role of inter-religious dialogue as a factor of mutual understanding, social cohesion and peace-building in world societies (international level) and within our society (national level). The module considers how Christianity intersects with African culture.

MARS 520 New Religious Movements

The module explores the rise, development, nature, practices, belief and doctrinal systems of New Religious Movements (NRMs) in Africa, in general and Zimbabwe, in particular. Students are expected to evaluate why the NRMs continue to be almost more popular than the mainline historical churches in the Zimbabwean context today.

(d): ISLAMIC STUDIES

MARS 522 History and Methods of the Study of Islam

This module seeks to expose students to the methods used in the study of Islam. The historical, social-scientific, anthropological, theological, phenomenological and feminist methods will be employed. The methods will be used in light of the religious intellectual and cultural orientation. Both the historical and the contemporary aspects of Islam will be explored through an analysis of Quranic and Hadith literature.

MARS 523 Early History and Development of Islam

The module traces the origins of Islam and its early development and expansion in Arabia. It covers the period just before the advent of Islam, Muhammad's prophethood and the growth of Islam as a religio-political organisation in Medina. It covers the period of the orthodox caliphate up to the division of Islam into two major groupings.

MARS 524 Islam Southern Africa

The module surveys Islam in Africa, with reference to Southern Africa. The mutual interaction of Islam and African cultures is a central theme. The module also considers inter-religious dialogue between Islam and Christianity in Southern Africa.

MARS 525 Islam and Gender/ Women in Islam

The module covers Islam and notions of masculinity and femininity. It explores how Islam constructs, reconstructs and deconstructs gender. It considers how Islamic teachings affect gender relations in various aspects of life-social, political, economic, and so on.

MARS 526 Contemporary Islam in North and West Africa

The module focuses on contextualised Islam in the contemporary period. It covers the influence of Islam on societies in North and West Africa. It also considers the interplay between Islam and contemporary problems and issues such as health, gender-based violence, and human rights, among others.

MARS 527 Christianity and Islam in contact

The module shall examine the relationship between these two major religions in their quest for world domination. The module explores the many points of contact between Christianity and Islam. It also highlights how this relationship has impacted on Africa.

(e): STUDIES IN AFRICAN AND ASIAN RELIGIONS

MARS 528 History and Methods in the Study of African and Asian Religions

The module seeks to acquaint students with the history and methods in the academic study of African and Asian religions. The perennial problem of defining religion and a thorough examination of selected methods from the sub-disciplines like Humanistic studies of religion; Social-Scientific studies of religion and the Phenomenology of religion are pursued. The key proponents and their ideas are interrogated to unveil some harmonious and discordant voices in the study of these religions.

MARS 529 Study of Selected African and Asian Religious Texts

The module explores selected religious texts from selected religions in the African and Asian contexts. Students are expected to make an in-depth study of selected texts from religions like African Indigenous Religions, Christianity, Islam, Hinduism, Buddhism, Taoism, Confucianism, Sikhism, Baha'i Faith and Rastafari. The origins, nature, status and teachings contained in selected religious texts are also explored. Students are expected to juxtapose the written scriptures with the oral texts from African Indigenous Religions as a way of evaluating 'holy writ'.

MARS 530 Major Themes in the Study of African and Asian Religions

The module examines the major themes in the study of African and Asian religions such as Christianity, Judaism, Islam, Hinduism, Buddhism, Taoism, Confucianism, Sikhism, Baha'i Faith, Rastafari and African Indigenous Religions. Students

are expected to do a detailed study of selected themes like salvation; scripture; sacred places; symbolism; myths and rituals; music; status of women; human rights; the environment; food and dietary issues; HIV and AIDS; migration, diaspora and transnationalism.

MARS 507 Interreligious Dialogue in African and Asian Religions
The module focuses on the intersection of African and Asian religions with a view to promoting mutual understanding. Emphasis shall be on similarities rather than differences.

MARS 531 Human Rights and Development in African and Asian Religions
The module focuses on the interface between African and Asian religions and development as well as human rights. It seeks to show the ways in which the said religions influence and are influenced by development and human rights discourses. The ambivalence of the religions when it comes to human rights and development shall be explored.

MARS 533 Religion, Gender & Health
The module shall critically examine the portrayal of men and women in religion and explore related issues of health and well-being. It aims to provide an understanding of the breadth and diversity of the role of men and women in religion, and open up discussion on the critical role religion plays in shaping health policies and practices. Students will undertake case studies on topics which may include sexual and reproductive health and rights, sex education, mental health from a gender perspective, the medicalisation of childbirth, environmental health, HIV and AIDS, substance use and abuse, and sex work.

(f): NEW TESTAMENT STUDIES

MARS 534 Methods in the Study of the New Testament/Approaches to the Study of the New Testament
The module shall examine various approaches which have been proffered in an effort to appreciate and understand the New Testament. Approaches such as reader-response criticism, redaction criticism, the New Hermeneutic and others have been coined by both Jewish and Christian scholars as well as those whose interests have been primarily historical or literary and new inroads continue to be made such as reading in front of the text, post-colonial feminist interpretation and others.

MARS 535 History and Trends in the Study of the New Testament
The module will focus on the history of methods of interpretation, both traditional and modern. The following methods will be dealt with in detail: methods in the Hebrew Scriptures and Judaism, the use of the Hebrew Scriptures by Jesus, Paul and the Early Church, Methods in the Patristic period, Medieval and the Reformation.

MARS 536 Greek Translation and Analysis of Texts
The module focuses on an in-depth knowledge of Greek textual criticism. It discusses, analyses, and synthesises the grammatical principles (syntax), semantics and lexicography of the Greek language. The module will also enable the translation of more complex selected Greek passages to provide insight into the linguistic detail and coherence of each sentence and or periscope. Passages for translation will be taken from the New Testament and the LXX.

MARS 537 Trends in the Quest for the Historical Jesus
The module shall look at past and current trends that have characterised the search for the historical Jesus. Beginning with a variety of sources and criteria used within the 'Quests for the Historical Jesus,' the module shall go on to look at the divergent theological interpretations of the life and teachings of this mysterious Galilean.

MARS 538 Hellenistic Greek: Reading and Exegesis of Selected Texts
This module examines the analysis of the Greek text. Reading and exegesis will be based on one gospel and one epistle. This module will also explore various morphologies in the Greek language.

MARS 539 Major Themes in the Study of the New Testament
The module shall seek to utilise various approaches that have been proffered to understand the voice of the New Testament. A critical look at the major themes of the New Testament from various angles will enable students to appreciate its many different voices expressing the breadth and beauty of the human experience of God over the ages.

MARS 540 Contemporary Scholarship in the New Testament
The module shall provide a critical examination of the work of some selected current leading New Testament Scholars. The focus will be on the critical evaluation of their writings, assessing how this has influenced current discourse in New Testament scholarship. At least one of such scholars to be examined must be African.

(g): OLD TESTAMENT STUDIES

MARS 541 History and Trends in the Study of the Old Testament
The module explores the selected methods in the study of the Old Testament from the rise of biblical interpretation up to the 16th century. The scope of this module covers the following areas: the rise of biblical criticism, challenges, Jewish exegesis, and biblical interpretation in the Apostolic, Patristic, Medieval, and Reformation up to the modern era.

MARS 542 Methods in the Study of the Old Testament/Approaches to the Study of the Old Testament
The module shall examine the approaches which have been proffered in an effort to appreciate and understand the message of the Old Testament. To understand the Bible various approaches have been utilised by both Jewish and Christian scholars as well as those whose interests have been primarily historical or literary and new inroads continue to be made.

MARS 543 Egyptology/Ancient Egypt and its Influence on the Old Testament
The module shall explore the histories, languages, cultures and sciences of ancient Egypt, Mesopotamia and their neighbours. These regions, sometimes known collectively as the Ancient Near East, have a long history stretching back to the formation of the first complex societies and have a strong influence on the formation of the Old Testament.

MARS 544 Advanced Classical Hebrew/ Further Studies in Biblical Hebrew
The module examines Biblical Hebrew at an advanced level building up from the introductory level. The scope of the module covers the following areas: review of Introduction to Biblical Hebrew, absolute and construct nouns, pronouns, pronominal suffixes, adjectives, participles, nominal sentences, relative clauses, various forms of the perfect aspect: qal, piel, niphal and hiphil, translation of words, phrases and sentences.

MARS 545 Classical Hebrew: Reading and Exegesis of Selected Texts
The module shall provide students the opportunity to read the Hebrew Bible in its original language. Selected passages from the Hebrew Bible will be used for exegesis.

MARS 546 Major Themes in the Old Testament
The module shall apply various approaches to the study of the Bible in understanding of major themes of the Hebrew Bible. A critical look at the major themes of the Old Testament from various angles will enable one to appreciate its many different voices expressing the breadth and beauty of the human experience of God over the ages

MARS 547 Assyriology
The module shall introduce students with little or no previous knowledge to the study of Ancient Mesopotamia in the historical period. It provides an appreciation of the principal languages of Ancient Mesopotamia, Akkadian and Sumerian, and allows the study of aspects of Mesopotamian culture, from 5000 BC through the earliest literate and urban societies of the Near East to the Assyrian and Babylonian empires.

(h): THEOLOGY STUDIES

MARS 548 Major Themes in the Development of Theology
The module is an analytical survey of major theological trends in the development of Christian theology. This includes in-depth study of the Patristic, Medieval, Enlightenment, Modern and Contemporary periods.

MARS 549 Major Western Theologians
The module focuses on post-Reformation theologians in the West. It outlines how the Reformation ushered in the spirit of thinking outside the box of the dogmatic theology of the proceeding eras. Some of the theologians to be studied include Karl Barth, Schleiermacher, Paul Tillich, Dietrich Bonhoeffer, Rudolf Bultmann, Karl Rahner and others.

MARS 550 Liberation Theology
The module uncovers the development of theology in the Third World context of South America (also known as Latin America). It looks at how Marxian ideologies were applied by South American theologians to address the socio-economic forms of oppression perpetrated by the West.

MARS 551 African Theology
The module covers God-talk in an African context. It considers the sources of African theology and discusses the different theologies that fall under the brand of African Theology. It also examines how African Theology is similar and different from other theologies. The contribution of African theology to development shall also be explored.

MARS 552 Black Theology
This module covers a brand of theology that originated in America among African-American people. It examines how theology can liberate non-white people from various forms of oppression. It also demonstrates how theology mixes with civil rights.

MARS 553 Theologies of African Independent Churches
The module shall explore the theologies of the AICs in society today. It looks at the AICs' engagement with social changes in contemporary society. African Independent/Initiated/Instituted Churches (AICs) place emphasis on the biblical warrant to include African cultural norms into their modes of worship, theology, and practice, though to varying degrees.

(i): RELIGION AND ETHICS

MARS 555 Religion and Environmental Ethics
The module shall introduce environmental ethics through an engagement with issues of population growth and resource use, sustainability, non-human animal welfare, biodiversity loss, environmental justice, and global climate change. The module seeks to engage students' ethical reasoning and reflection on environmental issues in particular. The module also reiterates the inherent influence of various world religious traditions in shaping and implementing environmental ethics and decision-making.

MARS 556 African Ethics
The module shall examine African ethical values, focusing on Ubuntu/Unhu and its relevance in the African context. It also explores key issues such as African bioethics, business ethics, traditional attitudes to the environment and the possible development of a new form of democracy based on indigenous African political systems.

MARS 557 Religion, Food and Security
The module shall enable students to familiarise with the main lines of the current debates about food and farming, as well as to give a thorough grounding in the theological background. The module has three parts. The first examines the basic issues surrounding religion and land use, religion and water sources and the likely impacts of climate change. The second considers some of the key issues in religion and contemporary farming; the third, likewise, in religious teachings on food security.

MARS 558 Bioethics and Religious Heritage
The module shall look at religious and moral issues involved in bioethics. Tapping on religious heritage, the module seeks to develop moral wisdom and build a stronger commitment to act morally on issues such as doctor-patient relationships, life-sustaining treatments (including CPR, and medical nutrition and hydration), reproductive Iissues (including contraception, artificial reproductive technologies, abortion) & controversial issues like euthanasia, physician-assisted suicide, and the stem cell controversy).

MARS 559 Religion and Business Ethics
The module shall trace the development of business ethics from the larger field of General Ethics as a discipline which addresses morally correct conduct in human affairs. Its genesis in the field of philosophical studies is traced. The module underscores how issues of faith and religion have a major bearing on business engagements and more importantly on making business decisions.

MARS 560 Religion and Indigenous Knowledge Systems
The module shall explore how communities in diverse world regions preserve traditionally valued knowledge and create new knowledge. It examines how such communities navigate and respond to global forces such as natural disasters, environmental changes, political restructuring, health concerns, economic volatility, livelihood uncertainties, education crises, ethnic conflicts and develops problem-solving approaches. The connectedness between indigenous knowledge systems and indigenous religious traditions is the cornerstone of this module.

(j): RELIGION AND GENDER

MARS 562 Approaches to the Study of Religion and Gender/ History and Methods of the Study of Religion and Gender
The module shall present some major developments in the academic discipline of religion and gender. Key factors and forces which led to the emergence of this academic discipline are explored in this module. The module also presents some of the key theories that have emerged over time in the history of the study of religion and gender.

MARS 563 Femininities and Masculinities
The module focuses on major issues such as femininities and masculinities. The module shall examine how femininities and masculinities are constructed and represented in religious and secular spaces. The module shall challenge negative and harmful ideas of what a "real man" and "real woman" is and advocate for transformative ways to empower and liberate males and females from oppressive notions of what it means to be a man or woman.'

MARS 564 Religion and Gender in African Indigenous (Traditional) Religions
Drawing insights from African Indigenous Religions, the module shall illustrate how the diverse African religious traditions shape the concept of gender in a particular African setting. The module acknowledges the importance of paying specific attention to the different experiences of African men and women which influence and inform their understanding of gender roles in their particular lived realities

MARS 565 Religion, Gender and Contemporary Themes
The module explores how religion intersects with gender and contemporary themes such as health, human rights and gender-based violence.

MARS 566 Religion and Gender in Selected Traditions (eg Islam/New Religious Movements)
The module shall illustrate the connectedness between religion, culture and gender roles from different religious contexts. It foregrounds the continuities and discontinuities of gender roles in the selected contexts. The overall aim of the module is to illustrate that each context has its particular strengths and weaknesses and to show that these specific experiences can be used as the vantage point to inculcate transformed and renewed communities.

MARS 567 Women and the Bible in Africa: Becoming a Transformed Woman
Using stories of Biblical women who endured and overcame many challenges, this module shall respond to some of the key issues confronting many African women daily and motivate them to become renewed and transformed. Some of the key themes covered in this module include infertility, single parenting, poverty, the raising and teaching of children, life with an unbelieving or unfaithful husband, and maintaining faith in desperate times.

MARS 567 Women and the Bible in Africa: Becoming a Transformed Woman
Using stories of Biblical women who endured and overcame many challenges, this module shall respond to some of the key issues confronting many African women daily and motivate them to become renewed and transformed. Some of the key themes covered in this module include infertility, single parenting, poverty, the raising and teaching of children, life with an unbelieving or unfaithful husband, and maintaining faith in desperate times.

(k): RELIGION AND SUSTAINABLE DEVELOPMENT

MARS 568 Religion and Ecology
The discourse on ecology has often sidelined religion. The module shall explore the contribution of different religious traditions to the ecology discourse. The module explores also the emergence, history, theories, and practices of eco-feminism and the environmental justice movements as subfields of radical ecology, environmentalism, feminist activism, and Women's and Gender Studies.

MARS 569 Religion and Development Strategies in Africa
The module shall explore various aspects of how societies since immemorial have been using religion to advance as well as address some of the challenges that inhibit human development on the African continent. Tapping from the indigenous knowledge systems, the module appreciates the religious-based development strategies and solutions with the hope of reviving the fruitfulness of Africa, thus curbing hunger that is ever stalking the African continent

MARS 570 Theories on the Origin and Development of Religion
This module critically examines various theories that have been proposed by various scholars on the origin and development of religion. Special attention will be made to the following categories of scholars: evolutionary/anthropologists, sociologists, psychologists and phenomenologists. Their theories are to be used as a basis of analysis for the origin and development of religions in Africa today.

MARS 571 Religion and Sustainable Communities
The module shall examine how contemporary world citizens are turning to religion in light of the disintegration of society's moral fabric. The module also explores how religion plays a fundamental role amidst various actions taken by global citizens, local communities and governments to create towns and communities that are more sustainable. This focus on solutions helps establish several principles for sustainable community building that can be integrated into educational programmes.

MARS 571 Religion and Sustainable Communities
The module shall examine how contemporary world citizens are turning to religion in light of the disintegration of society's moral fabric. The module also explores how religion plays a fundamental role amidst various actions taken by global citizens, local communities and governments to create towns and communities that are more sustainable. This focus on solutions helps establish several principles for sustainable community building that can be integrated into educational programmes.

MARS 572 Religion and Globalisation
The module shall examine the relationship between religious cultures and the forces of globalisation. It explores how religious cultural systems have been involved with globalisation. It proposes a cultural approach that is more sensitive to how the discourses of religion and globalisation are connected in a binary relationship to one another.

MARS 573 Religion, Gender and Sustainable Development
The module shall explore in particular women's experiences of development in different parts of the world. It also explores ways in which women from a number of countries are working to promote sustainable development in their communities.

MARS 574 Indigenous Knowledge and Sustainability
The module shall explore the importance of indigenous values and spirituality in providing guidance for sustainable living. Such principles and values encourage a spirit of harmony between people, their natural environments and their spiritual identities.

ELECTIVES

MARS 575 – Critical Issues in Philosophy of Religion
The module shall examine some core issues in the philosophy of Religion. It discusses issues such as the problem of evil, the existence of God, moral responsibility, problem of religious language and seeks solutions to these issues within modern scholarship in this area of study.

MARS 576 – Ethics and Social Transformation in Africa
The module shall examine how ethical precepts of religious groups and institutions in Africa have informed social transformations and developments in Africa. It examines the sources of religious studies and social ethics within the philosophical analysis of some ethical theories and analyses how the main religions on the continent - Islam, Christianity and African Traditional Religion (ATR) have used their ethical precepts to interrogate social changes in Africa.

MARS 577 Classical Hebrew
The module shall introduce students to Classical Hebrew and it shall focus on an understanding of the Hebrew alphabet, basic vocabulary, and sentence construction. Hebrew is a Semitic language of the Afro-Asiatic language family. Culturally, it is considered the Jewish language. In its modern form, it is spoken by most of the seven million people in Israel while Classical Hebrew has been used for prayer or study in Jewish communities around the world for over two thousand years.

MARS 578 Elementary Biblical Greek
The module shall provide an introduction to the language known as Koine Greek, in which the New Testament was written. It will cover some of the basic grammar and vocabulary of the language. By the end of the module, students shall be able to read some select passages from John's gospel.

MARS 579 Religion and Water Sustainability
The module shall introduce students to the place of religion in water sustainability in developing countries. It analyses and contrasts the traditional and Western methods of harnessing and managing water bodies. The module aims to foster an analytical and critical perspective on water and development through critical dimensions such as livelihoods and poverty, gender, beliefs, community participation, governance, political economy and collaborative stakeholder management.

MARS 580 Religion and Bio-diversity
The module shall examine biodiversity at a local, national and global level including the measurement and assessment of biodiversity and its implications. Of particular interest is an exploration of how the status of domestic pets continues to gain momentum in the modern world. The module also discusses how the apparent expression of disdain for game hunting and slaughtering of animals for human consumption and other uses is developing into a new religious movement among some advocates of animal rights

MARS 581 The Old Testament Pseudepigrapha
The module shall cover apocalyptic literature, testaments, legends, wisdom and philosophical literature, prayers, psalms and odes, and fragments of lost Judeo-Hellenistic works. The writers of the Bible depended on other sources for much of their work. Some of these sources may have been lost forever, but many have recently come to light. Known as the

Pseudepigrapha, this collection of writings is for the most part, Jewish or Christian and is often attributed to ideal figures in Israel's past.

MARS 582 Religion and World Hunger
The module shall look at how religion has either fostered or helped curb world hunger given that hunger is the world's top health concern, killing more people than AIDS, malaria, and tuberculosis combined. The place of religion in 'food security' issues is thus of concern in this module.

MARS 583 Religious Fundamentalism
The module shall explore particular manifestations of religious fundamentalism in relation to socio-political developments in different parts of the world. The 21st C has seen the rise of global religious fundamentalism and this has challenged theories of secularisation and progress.

MARS 584 African Spirituality
The module shall examine the historical development of African religious symbols and themes that have shaped its spirituality and mysticism. The module shall highlight the works and writings of African mystics and writers who affirm that African religiosity and spirituality are inevitable expressions of the African being.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN ETHICS AND HUMAN DEVELOPMENT (AH26)

Duration	18 months
Minimum Credit	270
Maximum Credit Load	340
Actual Credit Load	270
Maximum MBKs Credit Load	210
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME

The purpose of this programme is to equip students with skills and knowledge to support people with socioeconomic challenges. This field is ideal for people seeking to help others; who possess the skills to improve societal systems. Organisations such as preschools, addiction recovery centres, and government agencies need professionals skilled in data analytics, programme planning, personnel management, counselling, and communication.

2.0 ENTRY REQUIREMENTS

***Normal Entry*:** A good honours degree, with at least 2.2, from a recognised university in any discipline. Equivalent qualifications for admission into the programme will be considered. Prospective candidates with two years post-qualification experience in their field have an added advantage.

3.0 PROGRAMME CHARACTERISTICS

3.1 AREAS OF STUDY

Principles of Leadership Ethics, Family and Youth Development, Advanced Studies in Gender and Organisational Leadership, Ubuntu and Principles of Leadership, Gerontology, Advanced Research Methods and Statistics, Contemporary Ethical Problems in Zimbabwe, Health and Well-being

3.2 SPECIALIST FOCUS

Impart students with therapeutic approaches that equip them to work in many settings.

3.3 ORIENTATION

The programme takes a multicultural approach where diversity and tolerance of other religions are emphasised.

3.4 DISTINCTIVE FEATURES

- Interaction with seasoned scholars (Sabbatical Fellows).
- Grooming of versatile post-graduates who can relate and be problem solvers to contemporary challenges.
- A strong and active tradition of language and textual expertise

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **EMPLOYABILITY:**

Organisations such as preschools, addiction recovery centres, and government agencies need professionals skilled in data analytics, programme planning, personnel management, counselling, and communication hence post-graduates in Ethics and Human Development can choose careers in these fields. They can also serve marginalised groups, such as the LGBT community, single-parent families, and immigrants or choose careers in social work, senior citizen activism, or non-profit management.

4.2 **FURTHER STUDIES**

PhD Studies

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods-Lectures, tutorials, seminars, group work, research project.

6. 0 LEARNING OUTCOMES

6.1 Demonstrate ethical, interpersonal and engagement skills necessary for effective leaders to achieve innovative and collaborative resolution to community and organisational systems.

6.2 Demonstrate skills and knowledge to support people with socioeconomic challenges.

6.3 Assess the cause of conflict in organisational settings and come up with strategies to resolve and leverage conflict in diverse environments.

6.4 Evaluate and resolve multiple ethical perspectives and their impact on organisational effectiveness.

6.5 Apply ethics in various social setups to reach common goals.

7.0 GENERAL PROVISIONS

7.1 The programme consists of 9 modules worth twenty (20) Credits each and a dissertation worth ninety (90) Credits.

7.2 Examinations will normally be taken at the end of each semester for each module on the dates to be advised by the University Examinations Office.

7.3 To be admitted to any of the examinations of the degree, the student must:

7.3.1 Be registered for the degree with the Midlands State University in accordance with the General Regulations for students,

7.3.2 Have attained continuous assessment marks, and have attended at least 80% of the lectures offered in the module for which the examination is to be sat.

7.4 To be awarded the Master of Arts Degree in Ethics and Human Development, a student must pass all modules including the dissertation and must have attained at least 270 credits

8.0 PROGRAMME ASSESSMENT

8.1 Overall assessment shall consist of continuous assessment and formal Examinations.

8.2 In the case of a dissertation, refer to General Regulations for Postgraduate Degrees, Section 20.

8.3 The final mark shall be weighted as 30% for continuous assessment and 70% for examination.

9.0 PROVISION FOR PROGRESSION

Refer to Section 17 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 13 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

DEGREE WEIGHTING

Refer to Section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters Degrees.

SUMMARY OF MODULES

Level 1 Semester 1

Module name	**Credits**

MODULE SYNOPSES

MAEHD 500 Theories of Human Development
The module examines the development process, looking at the series of changes that occur as a result of an interaction between biological and environmental factors. Why might our behaviour as an adult be so different from when we were infants? Why and how does one stage of development follow the next? Are the changes that we experience abrupt in nature or smooth and predictable? The module provides a comprehensive view of the primary theoretical models of human development including those from the biological, psychoanalytic, behavioural, and cognitive developmental perspectives. Along with a brief discussion of the historical background for each of these approaches, the module examines the application of these theories to various aspects of human development, such as the effectiveness of early intervention, individual differences, adolescence, and socio-biology.

MAEHD 501 Classical and Modern Ethical Theories
This module introduces students to the nature of ethics and a critical reflection on some of the most influential ethical theories from the classical to the modern era. The purpose of this module is to introduce to students the various ethical theories and enable them to understand and appreciate their place. An understanding and appreciation of ethical theories will develop among students' evaluative skills when confronted with moral dilemmas in real-life situations and transform them into their ethical conduct.

MAEHD 502 Family and Youth Development
This module enables students to have an in-depth understanding of childhood, adolescence, and early adult development. They examine biological, social, and psychological changes during these years. Courses include theories in family science, effective management of family resources, and applied concepts in parenting and family life education

MAEHD 503 Ubuntu and Principles of Leadership Ethics
Ubuntu and principles of leadership is a module that seeks to derive ethical leadership principles from the African ethic of Ubuntu. The module proceeds from an understanding of Ubuntu as a moral theory and then demonstrates how it can lead to ethical leadership. Ubuntu in this module is compared to some Western theories of leadership drawing similarities and differences. Ubuntu is also applied to contemporary issues in ethical leadership and the idea is to demonstrate that the values of Ubuntu can promote ethical leadership and can provide solutions for contemporary challenges in ethical leadership like corruption and multi-culturalism. The purpose of this course is to provide students with an in-depth knowledge of the Ubuntu ethic and how it can promote good corporate governance.

MAEHD 504 Advanced Research Methods and Theories
The module provides the learners with research methods skills that can be used within languages, literature and cultural studies. The primary objective of this module is to reacquaint learners with a variety of research traditions and related methodological and epistemological issues. The module gives the learner skills to understand the relation between qualitative, quantitative and mixed methods research designs in relation to their applicability, and their ability to contribute to an understanding of specific research issues. The module also offers learners an opportunity to address current methodological issues as they pertain to their research interests thereby providing each with the potential to knowledgeably justify and explain her or his chosen methodology and method. It is in this module that learners practice their ability to prepare and carry out interviews, observations, case studies, document analyses and surveys. The learners also practice the analysis of results that have been collected by means of the chosen method(s) and instruments. Furthermore, the module also acquaints the learners with the type of research paradigm which subsequently determines the methods of data collection and analysis. It also enables learners to reflect upon the process of acquiring relevant information. The module therefore endeavours to equip learners to develop research proposals, review related literature focusing on global, regional trends in

the specific area of study, write research and take note of ethical considerations in everything that is done in a research endeavour.

MAEHD 505 Gerontology
This module introduces students to issues related to late adulthood. Gerontology draws from many disciplines, including law, social work, geography, and economics. Gerontologists may work with data, manage programmes, or serve as counsellors. The module includes theories of ageing, biologies of ageing, and clinical neuroscience of ageing.

MAEHD 506 Family and Community Services
In this module, students study personal, family, and community interaction across the lifespan. They develop skills to design, implement, sustain, and manage family and community programmes. The module includes issues like resilience in families, lifespan development, and foundations and principles of family and community services.

MAEHD 507 Organisational Politics and Conflict Management
The module is about organisational politics and conflict management. It tackles the concept of conflict which is nothing but the clashing of opposing interests. The module provides the skills and competencies on how to deal with politics in organisations.

MAEHD 509 Contemporary Ethical Problems in Zimbabwe
This is an applied ethics module which addresses the ethical dilemmas people make in day –to- day life. The module tackles such issues as homosexuality, masturbation, abortion, euthanasia, corruption, capital punishment, animal rights, politics, social injustice and peace. The module introduces students to the problems that constitute our human societies today and how they can solve the dilemmas.

MAEHD 508 Dissertation
This module provides the student with the opportunity to research a topic of their choice. With guidance from a member of the academic staff as supervisor, students will plan and design an independent research project which relates to their overall programme of study. At this level, students should show the potential of conducting independent research and the topics chosen need to be attempting to solve societal challenges.

MAEHD 510 Advanced Business Ethics
The module equips students with the knowledge of applying basic ethical theories and moral philosophies in reaching decisions when faced with an ethical dilemma in the business world. This module is also designed to provide an analysis and examination of significant contemporary ethical issues and challenges existing throughout the professional business arena. The module empowers students with tools with which to evaluate ethical dilemmas in business and to foster awareness of the benefits and limitations of bringing ethical theory into the business environment.

MAEHD 511 Health and Well-being
Emphasisng holistic health in nonclinical settings, this module prepares lifestyle coaches and skills, and programme planning health consultants to create corporate wellness programmes, educate clients, and establish community health initiatives. The module includes assessment and integration of research, wellness coaching communication for health educators.

MAEHD 512 Human Rights and Organisational Leadership
Human Rights and Organisational Leadership is a module which provides a key understanding of human rights and their place in organisational leadership. It also distinguishes between man and woman rights and shows how these are applied and respected in the corporate world. The module discusses ethical problems associated with human rights at the workplace, for instance, issues of hiring and firing workers. The purpose of this module is to foster an understanding of human rights both male and female rights and show how these are employed at the organisational level. It also provides the key elements of organisational leadership.

MAEHD 516 Ethics in Organisational Communication
This module examines how the philosophical world of ethics can be applied to organisational communication. The focus is on finding out how ethics can add value, by addressing the downside of its absence, especially, but not limited to, the handling of dilemmas and contradictions in organisational communication.

MAEHD 517 Non-profit Management
Learners in this module study strategic planning, accounting, community relations, and programme management. Courses include philanthropy, the non-profit sector, and programme evaluation and information management. Many programmes require students to complete a capstone project.

REGULATIONS FOR THE MASTER OF ARTS DEGREE IN CHURCH LEADERSHIP, ETHICS, AND PRACTICAL ETHICS (AH27)

Duration	18 months
Minimum Credit	270
Maximum Credit Load	340
Actual Credit Load	270
Maximum MBKs Credit Load	210
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME

The purpose of this programme is to guide learners in exploring management philosophies and biblical hermeneutics. Learners also gain an in-depth understanding of the various styles of leadership and learn how to further the objectives of churches, non-profit organisations, businesses and communities. Learners also are enabled to guide others in their explorations of hermeneutical studies and inspire them to achieve their spiritual goals.

2.0 ENTRY REQUIREMENTS

Normal Entry: A good honours degree, with at least 2.2, from a recognised university in any discipline Equivalent qualifications for admission into the programme will be considered Prospective candidates with two years post-qualification experience in their field, have an added advantage

3.0 PROGRAMME CHARACTERISTICS

3.1 AREAS OF STUDY

Advanced Studies in Leadership Theories, Organisational Behaviour and Culture
Advanced Business Ethics, Principles of Leadership Ethics, Advanced Studies in Gender and Organisational Leadership, Ubuntu and Principles of Leadership, Project Management, Monitoring and Evaluation, Organisational Politics and Conflict Management, Advanced Research Methods and Statistics, Contemporary Ethical Problems in Zimbabwe.

3.2 SPECIAL FOCUS

Preparation of those who would like to step into leadership positions in the church, the para-church, ministry or similar settings.

3.3 ORIENTATION

The programme takes a multicultural approach where diversity and tolerance of other religions are emphasised.

3.4 DISTINCTIVE FEATURES

Interaction with seasoned scholars (Sabbatical Fellows).
Grooming of versatile post-graduates who can relate and be problem solvers to contemporary challenges. A strong and active tradition of language and textual expertise. Regular research seminars with visiting speakers.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 EMPLOYABILITY:

Post-graduates in Church Leadership and practical ethics Religious Studies graduates can find employment in churches, non-profit organisations, businesses and various community setups where they can inspire people to achieve their spiritual goals. They can work in these institutions as counsellors, lecturers, administrators or pastors; in NGOs as gender activists, development partners, and counsellors; those who are pastors already can be employed as Chaplains for the uniformed forces like the Prisons, Police, and Army; in welfare institutions as gender activists, HIV/AIDS counsellors and advisors; in colleges and universities as lecturers and any other religious oriented fields.

4.2 FURTHER STUDIES

PhD Studies

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods- Lectures, tutorials, seminars, group work, research project.

6. 0 LEARNING OUTCOMES

6.1. Demonstrate ethical, interpersonal and engagement skills necessary for effective leaders to achieve innovative and collaborative resolution to community and organisational systems.
6.2. Analyse the spaces on the continuum between the corruptive nature of power and social responsibilities.

MODULE SYNOPSES

MACLPE 500 Advanced Studies in Leadership Theories
Advanced Studies in Leadership Theories is a module which offers a higher understanding of the major leadership philosophies throughout the history of mankind. The module is designed in a way that gives students an appreciation of the concept of leadership itself and how elusive it can be. The purpose of this module is to provide the students with a deeper understanding of theories of leadership.

MACLPE 501 Classical and Modern Ethical Theories
This module introduces students to the nature of ethics and a critical reflection on some of the most influential ethical theories from the classical to the modern era. The purpose of this module is to introduce to students various ethical theories and enable them to understand and appreciate their place. An understanding and appreciation of the ethical theories will develop among students' evaluative skills when confronted with moral dilemmas in real- life situations and transform them in their ethical conduct.

MACLPE 502 Ecclesiastical Models and Leadership
Living in an age of ecclesiastical chaos where so many wildly different kinds of churches exist side by side in the same towns and cities, this module provides the learner with models of the Church. These models have great value in helping church leaders to get beyond the limitations of their particular outlook and to enter into fruitful conversations with others. Such conversation is essential if ecumenism is to get beyond its present impasses.

MACLPE 503 Ubuntu and Principles of Leadership Ethics
Ubuntu and Principles of Leadership is a module that seeks to derive ethical leadership principles from the African ethic of Ubuntu. The module proceeds from an understanding of Ubuntu as a moral theory and then demonstrates how it can lead to ethical leadership. Ubuntu in this module is compared to some Western theories of leadership drawing similarities and differences. Ubuntu is also applied to contemporary issues in ethical leadership and the idea is to demonstrate that the values of Ubuntu can promote ethical leadership and can provide solutions for contemporary challenges in ethical leadership like corruption and multi-culturalism. The purpose of this course is to provide students with an in-depth knowledge of the Ubuntu ethic and how it can promote good corporate governance.

MACLPE 504 Advanced Research Methods and Theories
The module is designed to provide the learner with research methods skills that can be used within languages, literature and cultural studies. The primary objective of this module is to reacquaint learners with a variety of research traditions and related methodological and epistemological issues. The module gives the learner skills to understand the relation between qualitative, quantitative and mixed methods research designs in relation to their applicability, and their ability to contribute to an understanding of specific research issues. The module also offers learners an opportunity to address current methodological issues as they pertain to their research interests thereby providing each with the potential to knowledgeably justify and explain her or his chosen methodology and method. It is in this module that the learners practice their ability to prepare and carry out interviews, observations, case studies, document analyses and surveys. The learners also practice the

analysis of results that have been collected by means of the chosen method(s) and instruments. Furthermore, the module also acquaints the learners with the type of research paradigm which subsequently determines the methods of data collection and analysis. It also enables learners to reflect upon the process of acquiring relevant information. The module therefore equips learners to develop research proposals, review related literature focusing on global, and regional trends in the specific area of study, write research and take note of ethical considerations in everything that is done in a research endeavour.

MACLPE 505 Advanced Studies in Gender and Organisational Leadership
Leadership is often regarded as the single most critical factor that determines the quality of success or failure of an organisation. Histories of nations, organisations and intuitions show that events may be altered drastically by the sudden change of leadership. The module equips students with basic skills on how both men and women can lead organisations. More is articulated on how gender and organisational leadership walk together.

MACLPE 506 Project Management, Monitoring and Evaluation
How will you measure your project's success? This module helps students to answer this question by introducing the basics of monitoring and evaluation (M&E). In this module issues like how to a make successful projects plan for data collection, management, analysis, and use. The module tackles topics like introduction to Monitoring, Linking M&E to Project Design, Identifying Indicators & Targets, the purpose of monitoring and evaluation, How to conduct monitoring and evaluation, and how to develop a monitoring and evaluation plan.

MACLPE 507 Organisational Politics and Conflict Management
The module is all about organisational Politics and Conflict management. It tackles the concept of Conflict which is nothing but the clashing of opposite interests. The module provides the skills and competencies on how to deal with politics in organisations.

MACLPE 509 Contemporary Ethical Problems in Zimbabwe
This is an applied ethics module which addresses the ethical dilemmas people make in day –to- day life. The module tackles such issues as homosexuality, masturbation, abortion, euthanasia, corruption, capital punishment, animal rights, politics, social injustice and peace. The module introduces students to the problems that constitute our human societies today and how they can solve the dilemmas.

MACLPE 508 Dissertation
This course provides the student with the opportunity to research a topic of their choice. With guidance from a member of the academic staff as supervisor, students will plan and design an independent research project which relates to their overall programme of study. At this level, students should show the potential of conducting independent research and the topics chosen need to be attempting to solve societal challenges

MACLPE 510 Advanced Business Ethics
The module equips students with the knowledge of applying basic ethical theories and moral philosophies in reaching decisions when faced with an ethical dilemma in the business world. This module is also designed to provide an analysis and examination of significant contemporary ethical issues and challenges existing throughout the professional business arena. The module empowers students with tools with which to evaluate ethical dilemmas in business and to foster awareness of the benefits and limitations of bringing ethical theory into the business environment.

MACLPE 511 Ethics in Grooming and Etiquette
This module introduces students to etiquette and grooming. It is meant to familiarise students with dress and grooming in a formal set-up and also to explain the importance and the use of courtesy. The module also familiarises students with table manners observed at business lunches and dinners, e-mail etiquette, telephone manners and overall conduct at the place of work. The module intends to equip students with basic manners which would make them suited to every life situation and be considered ethical.

MACLPE 512 Human Rights and Organisational Leadership
Human Rights and Organisational Leadership is a module which provides a key understanding of human rights and their place in organisational leadership. It also distinguishes between man and woman rights and shows how these are applied and respected in the corporate world. The module discusses ethical problems associated with human rights at the workplace, for instance, issues of hiring and firing workers. The purpose of this module is to foster an understanding of human rights both male and female rights and show how these are employed at the organisational level. It also provides the key elements of organisational leadership.

MACLPE 513 Leadership and Management

The module explores the conceptual notions of organisational leadership and management. In this module, the major thrust is on the role of leaders to ensure development in organisations. The module gives students skills on good management and how to provide services to the community in an appropriate, efficient, equitable, and sustainable manner.

MACLPE 514 Ethics in Marketing and Advertising Ethics

Ethics in Marketing and Advertising is an applied module which looks at the ethical concerns of marketing and advertising in business. It takes a closer look into the principles and theories of ethical advertising and competition in business. The module is meant to foster an understanding of ethical marketing practices in business through an understanding of the moral theories and principles guiding advertising.

MACLPE 515 Employee Training and Development

Employee training and development is a module which addresses the continued efforts of a company to boost the performance of its employees. Companies aim to train and develop employees by using an array of educational methods and programmes. The module states that training and development have emerged as a crucial element of strategy. Other perks of employee training and development tackled in the module include improvements in employee performance, boosting company reputation, and addressing weak links in the organisation.

MACLPE 516 Ethics in Organisational Communication

This module examines how the philosophical world of ethics can be applied to organizational communication. The focus is on finding out how ethics can add value, by addressing the downside of its absence, especially, but not limited to, the handling of dilemmas and contradictions in organisational communication.

MACLPE 517 Leadership Ethics, law and Policy Making

This module is designed to introduce students to the general issues relating to leadership ethics, law and policy -making. The module provides a general overview of the various philosophical approaches to leadership ethics and the legal systems in relation to their influence on decision -making. The purpose of this module is to foster in students an understanding of the general relationship and the nature of the interaction between leadership ethics, the law and the processes of decision-making.

FACULTY OF EDUCATION

REGULATIONS FOR THE UNDERGRADUATE AND POSTGRADUATE DEGREES

1. INTRODUCTION

1.1 These regulations shall be read in conjunction with the general Regulations for Undergraduate degrees and General Academic Regulations for Postgraduate Diplomas and Taught Masters and Doctorate Degrees hereinafter referred to as General Academic Regulations.

1.2 These regulations are in respect of the following programmes offered by the Faculty of Education:

- Bachelor of Education Dual Honours Degree in Commerce and Entrepreneurial Studies (EDU39)
- Bachelor of Education Dual Honours Degree in Humanities (EDU23)
- Bachelor of Education Honours Degree in English and Literacy Education (EDU28)
- Bachelor of Education Honours Degree in Accounting and Financial Literacy for Development (EDU40)
- Bachelor of Education Honours Degree in Business Studies and Enterprise Development (EDU50)
- Bachelor of Education Honours Degree in Economics and Development Policy (EDU51)
- Bachelor of Education Honours Degree in Indigenous, Multicultural Languages and Literature (EDU24)
- Bachelor of Education Honours Degree in Theatre Arts and Entrepreneurial Design (EDU52)
- Bachelor of Education Honours Degree in Educational Leadership, Management and Development (EDU54)
- Bachelor of Education Honours Degree in Lifelong Learning and Global Change
- Diploma in Adult and Continuing Education (EDU55)
- Bachelor of Education Honours Degree in Early Childhood Development and Child Protection (EDU06)
- Bachelor of Education Honours Degree in Psychology and Intervention Designs (EDU56)
- Bachelor of Education Honours Degree in Primary Education and Management Practices (EDU57)
- Bachelor of Education Honours Degree in Sociology, Heritage and Civic Studies (EDU58)
- Bachelor of Education Honours Degree in Philosophy and Critical Thinking (EDU59)
- Bachelor of Education Honours Degree in Early Childhood Development and Child Protection (EDU60**)**
- Bachelor of Education Honours Degree in Inclusive Education and Assistive Technologies (EDU12)
- Bachelor of Education Honours Degree in Agriculture and Environment Management (EDU15)
- Bachelor of Education Honours Degree in Biology and Applied Technologies (EDU70)
- Bachelor of Education Honours Degree in Chemistry and Applied Technologies (EDU19)
- Bachelor of Education Honours Degree in Computer Science and Emerging Technologies (EDU26)
- Bachelor of Education Honours Degree in Food Technology and Design (EDU71)
- Bachelor of Education Honours Degree in Mathematics and Applied Statistics (EDU26)
- Bachelor of Education Honours Degree in Mathematics and Applied Statistics *(HBEDFYMT)*
- Bachelor of Education Honours Degree in Science (HBBEDFYSC)
- Bachelor of Education Honours Degree in Physical Education, Sports Science and Management (EDU73)
- Bachelor of Education Honours Degree in Physics and Applied Technologies (EDU74)
- Bachelor of Education Honours Degree in Textile Technology and Design (EDU09)
- Master of Education Degree in Educational Sociology and Social Pathology (EDU30)

1.3 The Faculty of Education also offers the following Postgraduate Programmes:

- Master of Education Degree in English and Literacy Education (EDU77)
- Master of Education in Indigenous, Multicultural Languages and Literature (EDU23)
- Master of Education in History and Development Studies (EDU22)
- Master of Education Degree in Curriculum and Instruction (EDU78)
- Master of Education Degree in Educational Leadership, Management and Development (EDU08)
- Master of Education Degree in Lifelong Learning and Global Change (EDU79)
- Postgraduate Diploma in Tertiary Education (EDU80)
- Master of Education Degree in Early Childhood Development and Child Protection (EDU07)
- Master of Education Degree in Psychology and Intervention Designs (EDU68)
- Master of Education Degree in Primary Education and Management Practices (EDU69)
- Master of Education Degree in Philosophy and Critical Thinking (EDU82)
- Master of Education Degree in Inclusive Education and Assistive Technologies (EDU83)

- Postgraduate Diploma in Education (EDU30)
- Master of Education Degree in Agriculture and Applied Environmental Science (EDU84)
- Master of Education Degree in Biology and Applied Technologies (EDU85)
- Master of Education Degree in Chemistry and Applied Technologies (EDU86)
- Master of Education Degree in Food Technology and Design (EDU18)
- Master of Education Degree in Geography and Environmental Education (EDU17)
- Master of Education in Mathematics and Applied Statistics (EDU23)
- Master of Education Degree in Textile Technology and Design (EDU20)

1.4 The appropriate degree shall be awarded to a student who has completed an approved programme in accordance with these regulations.

1.5 The Bachelor of Education Honours degrees are for four semesters for in-service programmes and eight semesters for pre-service programmes.

2. ENTRY REQUIREMENTS

2.1 Normal Entry

For one to qualify for normal entry to a diploma or degree programme in the Faculty of Education, one must satisfy the general entry requirements specified in the General Academic Regulations and must also meet the requirements specified in the following programmes:

2.1.1 Bachelor of Education Degree (In-service)

- Should possess a teaching qualification approved by the University.
- Normally have 'O" Level passes in the proposed teaching subject.
- Specialised in the proposed teaching subject.
- For a Bachelor of Education Honours Degree in Lifelong Learning and Global Change candidates should hold a Diploma in Adult Education or any approved equivalent from a recognised institution.
- For the 5-year programmes, the candidate should have 5 'O' Levels including Science subjects.
- To qualify for the 4-year programme, candidates should have at least 2 'A' levels in the relevant subjects.

2.1.2 Bachelor of Education (Honours) degree (Pre-service)

To qualify for entry, candidates should have at least 2 'A' Levels in the relevant subjects.

2.1.3 Bachelor of Adult Education Degree

To qualify for entry, candidates should hold a diploma in Adult Education or any approved equivalent from a recognised institution.

2.1.4 Master of Education Degree

To be eligible for the programme, an applicant must normally have:

2.1.4.1 obtained a BEd degree or approved equivalent from any recognised university in the appropriate subject area.

2.1.4.2 obtained a degree or a Post-Graduate Diploma in Education or approved equivalent from any recognised university.

2.1.5 Post Graduate Diploma in Education

To qualify for entry into the programme, an applicant must normally:
possess an undergraduate degree approved by the University.

2.1.6 Diploma in Adult Education and Continuing Education

To qualify for entry into the programme, an applicant must normally:

2.1.6.1 have passed at least (5) 'O' Levels including English Language or

2.1.6.2 possess qualifications accepted as an equivalent by the University or

2.1.6.3 have at least 2 years of relevant experience in the broad fields of Adult Education.

3. GENERAL PROVISIONS

3.1 Bachelor of Education Degree (In-service)

3.1.1 A candidate should study at least 22 modules as follows:
At least 6 common modules.

3.2 Bachelor of Education (Honours) Pre-service

3.2.1 A candidate should study at least 40 modules as follows:

At least 21 common modules and 19 core modules from their teaching subject area.

3.3 In each semester, a student shall register for at least 5 modules.

3.4 The student shall not be admitted into the subsequent semester or higher-level module unless he/she has passed all pre-requisites for the module prior to the start of the semester in which he/she intends to study that module.

3.5 A student may change his/her registration for modules to be taken in any semester during the first two weeks of that semester.

4. ASSESSMENT

4.1 The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

4.2 All other modules shall be assessed by continuous assessment and formal examinations.

4.2.1 Continuous assessment shall constitute 40% of the final assessment.

4.2.2 Written examinations shall constitute 60% of the final assessment.

4.2.3 In order to pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

5. PROVISIONS FOR PROGRESSION

5.1 Students progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

5.2 To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

5.3 Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

6. GRADING AND CLASSIFICATION OF DEGREE/DIPLOMA

6.1 To be awarded a Diploma in Education, a student must pass all modules and must have attained at least 48 credits.

6.2 To be awarded a Bachelor of Education degree, a student must pass all modules.

6.3 The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

6.4 The classification of all modules and Diplomas has to be as stated in Section 8 of the General Academic Regulations for Undergraduate Diplomas.

7. DEGREE WEIGHTING

Refer to Section 5 of the general Academic Regulations.

Academic levels shall be considered for purposes of degree weighting as follows:

BED (full time)	50% for each of the two levels
BED (Block Release)	50% for each of the two levels
BED (Honours) 4 years	25% for each of the four levels
BED (Honours) 5 years	20% for each of the 5 levels

8. FAILURE TO SATISFY THE EXAMINER

8.1 For Undergraduate Diplomas, refer to Section 9 of the General Regulations for Undergraduate Diplomas.

8.2 For undergraduate Degrees, refer to Section 9 of the General Regulations for Undergraduate Degrees

8.3 For Post Graduate Diploma and taught Masters, refer to Section 21 of the General Regulations for Postgraduate Diplomas and taught Masters.

DEPARTMENT OF EDUCATIONAL FOUNDATIONS, PRIMARY EDUCATION AND PEDAGOGY

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN PSYCHOLOGY AND INTERVENTION DESIGNS (EDU56)

Duration:	2 years
Minimum Credit Load:	240
Maximum Credit Load:	300

Maximum MBKs Credit Load: 192
ZNQF Level: 8

1. PURPOSE OF THE PROGRAMME

This programme is designed for candidates who have a teaching qualification at the Diploma or Certificate level. The major goal is to develop in candidates a high level of awareness and understanding in the area of Psychology of Education and psychological intervention designs and their application to human development across the life span.

2. ENTRY REQUIREMENTS

Normal Entry

Diploma in Education from an accredited and recognised institution.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Educational Psychology

Specialist Focus:

The development of keen awareness in educators of the need for the development of skills and values that are sensitive to sustainable development and continual educational improvement.

Orientation:

Creating school educators who can design intervention strategies that effectively enhance the process of development among learners.

During the programme, students will be introduced to the University Innovation Hub where they will get orientation on how to develop simple ideas into productive and innovative ventures.

Students will also visit the University Industrial Park where they will be exposed to productive activities and industrial work to develop their appreciation of the philosophy of industrialisation.

Students are expected to use this exposure to initiate productive ventures in their schools of practice with school pupils, fellow teachers, and where possible, with the communities around the school.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates can be employed as specialist teachers in schools, supervisors of education programmes, lecturers in institutions offering teacher education programmes, education inspectors, designers and developers of education curricula, consultants for educational programmes, or researchers in education.

5. PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory practical work, seminars, group work, research projects, and individual independent study.

Conventional Mode: 36 hours of face-to-face lectures per module or blended learning in cases where there is a need for such.

Block release: 36 hours per module of face-to-face lectures conducted during school holidays or blended learning in cases where there is a need for such.

6. LEARNING OUTCOMES

- Identify pertinent issues in the field of education and apply relevant methodologies and analysis tools to conduct research that leads to sustainable and innovative solutions. Publications and other verifiable results.
- Design and implement monitoring evaluation tools that assure the quality of

  teaching in the school.

- Translate research output into policy action programmes that are readily adoptable by practitioners and policy-makers in the field.
- Demonstrate sound entrepreneurial and management skills that can be applied in running schools, identifying school and community-based entrepreneurial opportunities that can be commercialised to aid school development.
- Evaluate, review and design curricula that are guided by the philosophy of Unhu/Ubuntu and observance of safe and ethical practices in the field of education.
- Design, implement, monitor and evaluate innovative educational curricula and policies that foster problem-solving and critical thinking skills, and that embrace indigenous knowledge systems and the latest technologies.
- integrate relevant research and theory in education and embrace the latest developments in Information Communication Technology.
- Identify challenges faced by learners in the classroom, investigate the causes and be able to design and implement intervention strategies that enhance learner progress.

7. GENERAL PROVISIONS

- The programme consists of at least 24 modules.
- Each module is worth 12 credits except for the research project which is worth 24 credits. In each semester a student should register for at least six modules.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9. PROVISION FOR PROGRESSION

Refer to section 5 of the Faculty Regulations

- Students progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.
- To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.
- Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.
- Students progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.
- To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.
- Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

- A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations or 'repeat' or 'withdraw'.
- If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.
- 'Withdraw' means that the student shall withdraw from the university.
- For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.
- 'Carry over' means carry over modules from the previous level to the subsequent level.
- Retake means redo module(s) that failed in the previous semester within the same level.

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations
To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels.

13. PROGRAMME STRUCTURE

13. MODULE SYNOPSES

BCHS131 Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BPID101 Psychology of Teaching and Learning

The module introduces students to the theories of human development and theories of learning that inform the instructional process and promote academic success for all learners. This will enable them to understand individual learning styles and the relevant teaching styles as they work with all types of learners, including both those who are gifted and talented and those who have learning disabilities.

BPID102 Trends and Traditions in Philosophy of Education

This module provides students with a basic theoretical grounding in Philosophy and Philosophy of Education. Students will be exposed to modes of thinking and analysis that are unique to Philosophy of Education. Foundational issues such as the historical development, trends and traditions of human thought will be explored.

BPID103 Sociological Foundations of Education

The module introduces students to four main sociological perspectives and exposes them to basic sociological concepts that include socialisation and the dynamics of social interaction. The interrelationships between the state, the education institutions and the citizens are built into the module to provide students with the necessary social interaction skills needed to guide the process of learning in the classroom.

BPID104 The Psychology of Mental Health

The module introduces students to the psychology of mental health and helps them to create and support a culture in which mental health issues are acknowledged. The module further assists students to uphold positive mental health wellbeing through the provision of relevant information, proper advice and necessary support.

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BPID105 Learning Differences

This module equips students with knowledge of characteristics of learners with learning differences as well as disabilities and the learning support that the learners need to be able to navigate their way through school life.

BPID106 Contemporary Issues in Educational Psychology

The module seeks to explore contemporary issues in Educational Psychology at any given time so that students can carry out meaningful researches which aim at finding solutions to current problems in an innovative and creative manner.

BPID107 The Brain Goes to School

This module deals with principles of human learning, focusing on cognitive neuroscience. Brain processing information becomes vital in that students learn most intensely when they forget that they are learning, as they explore learning. Learners who talk about how they and others think become better learners. In this module, the implications of linking neuroscience to educational innovations will be analysed and synthesised.

BPID108 Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BPID109 The Psychology of Adolescence

The module seeks to help students understand that the adolescence stage is marked by substantial changes in physical maturation, cognitive abilities, and social interactions. Students will understand issues unique to teenagers, how to

distinguish problem behaviour from typical or normal behaviour, and how to respond to teenagers more appropriately thereby building confidence and skills to deal with adolescents.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BPID201 Inclusive Education and Assistive Technologies
The module seeks to enhance students' knowledge of how they can adapt the curriculum through the use of assistive technologies to support students with diverse learning needs within an inclusive environment.

EDGS231 Gender Studies for Educators
The module aims to provide students with an introduction to the concept of gender and its significance to education. The module exposes students to how education spaces construct gender differences; the implications of these differences on learners and how schools can close the gender gaps. Key issues to be studied include theoretical perspectives on gender, cultural dimensions of gender, and deconstruction of gender and their implications for the education sector.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

BPID202 Life Skills Education
The module aims at familiarising students with basic aspects of life skills and to provide a systematic understanding of theoretical perspectives and practical strategies of life skills education. Having life skills is an essential part of being able to meet the challenges of everyday life, and this module covers the fundamentals of the life skills that lead to success and happiness.

ENTIE232 Entrepreneurship Innovation in Education
The module exposes students to entrepreneurship and innovation theories and thinkers. The module provides students with the skills needed to develop, create and manage productive businesses. Emphasis is placed on career development through a variety of experiential activities and projects, which include brainstorming and developing business and productive plans and testing them in practice.

BPID203 The Psychology of Personality Development
The module introduces students to personality formation and the theories of personality development that promote academic success for all learners. This will enable students to understand individual learners and their personality differences. Such knowledge will help students to navigate around the application of several styles of innovative teaching to cater for all learners despite their personality differences.

BPID204 Digital Media for Children and Adolescence
This module aims to introduce students to digital media for children and adolescents, highlighting the benefits and risks to the health of children and teenagers. The module helps students to promote health and wellness in children and adolescents, it is important to maintain adequate physical activity, healthy nutrition, good sleep hygiene, and a nurturing social environment. Students will apply a Healthy Family Media Use Plan.

BPID205 Psychological Intervention Designs in Education
The module equips students with a knowledge of useful psychological intervention designs and techniques that can be used in the classroom to enhance learner progress. The module also equips students with the skills of designing an instructional intervention. These include defining and understanding the problem and its causes, identifying which causal or contextual factors are modifiable and implementing the instructional design focusing on learning areas like reading and mathematics so that parents and the school can track individual children's progress.

BPID206 Narratives of Early Childhood
The module seeks to assist students in understanding the importance of children's narratives especially in educational research in early childhood education. The aim is for the students to be able to encourage learners to narrate their psychological experiences and perspectives of their own lives thereby viewing them as social actors and experts in their understanding of the world.

BPID207 Psychological Guidance and Counselling Practices
This module seeks to provide students with knowledge of the process of helping individuals to discover their educational, vocational and psychological potentialities which they can use to achieve an optimal level of personal happiness and social usefulness.

BPID208 Social Psychology and Sustainable Future
The module provides students with an understanding of major theoretical formulations and models in the area of Social Psychology and provides them with a knowledge of individual, organisational and social aspects of environmental risks.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN INCLUSIVE EDUCATION AND ASSISTIVE TECHNOLOGIES (EDU12)

Duration	2 years
Actual Credit Load	300
Minimum Credit Load	240
Maximum Credit Load	300
Total MBKs Credit Load	192
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

To develop in candidates a high level of awareness and understanding of inclusive education in diverse socio-cultural contexts. To produce specialists who are innovative and versatile in lesson delivery and in the production and use of instructional materials in creative and sustainable ways to transform the teaching and learning experiences.

2.0 ENTRY REQUIREMENTS

Normal Entry**:** A teaching diploma in either ECD/ Infant Education, Primary Education, Secondary Education or an equivalent recognised by Midlands State University.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Inclusive Education

Specialist Focus: Training teachers in Inclusive Education and Assistive Technologies and emphasising the physical, social, intellectual, emotional and moral development of learners through innovative and sustainable methods.

Orientation: The teaching and learning process is driven by critical thinking, innovation and the development of entrepreneurial skills, culminating in the production of goods and services in the context of inclusive education in primary school.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as supervisors, special care unit managers, teachers, education officers, curriculum developers, consultants, remedial tutors etc.

Further Studies: Master's and Doctoral Studies in Inclusive Education and Assistive Technologies

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, and virtual lessons in various forms such as Google classes, seminars, group tasks, research projects, and individual independent study.

6.0 LEARNING OUTCOMES

- Offer an in-depth knowledge and a more up- to- date focus on Inclusive Education and Assistive Technologies to teachers who have basic qualifications in primary and secondary school teaching.
- Produce teacher-researchers sensitive to the dynamic contexts of inclusive education and assistive technologies in primary and secondary schools.

- Inculcate in teachers critical, analytical and reflective skills s to be effective decision-makers in their field through innovative and sustainable ways.
- Enhance the teachers' understanding of current curriculum theories and pedagogy in the design and implementation of inclusive education and the use of assistive technologies.
- Reinforce teachers' awareness of the dynamic trends in Inclusive Education.

7.0 GENERAL PROVISIONS

- For this programme, candidates shall study at least 24 modules.
- Each module is worth 12 credits except for the Research Project which is worth 24 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations' or 'repeat' or to 'withdraw'.

If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.

'Withdraw' means that the student shall withdraw from the university.

For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

'Carry over' means carry over modules from the previous level to the subsequent level.

Retake means redo module(s) that failed in the previous semester within the same level.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

To be awarded a Bachelor of education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels.

14.0 MODULE SYNOPSES

BCHS131 Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BIEAT101 Introduction to Inclusive Education and Assistive Technologies
The module seeks to introduce students to national and international key legal and policy frameworks in inclusive and special needs education and to equip students with knowledge of terms, models, legislation and policies relating to inclusive education and assistive technologies. The focus is on enriching students academically and professionally by studying in some detail the nature and application of these frameworks in inclusive settings.

BIEAT102 Psychological Issues in Inclusive Education and Assistive Technologies
This module equips students with learning theories as well as the cognitive, emotional and social learning processes that underlie human development. Emphasis is placed on developing students' skills to better understand diverse learners and foster improved learning that recognises individual differences.

BED133 Information Communication Technology
This module guides students to critically and creatively apply concepts, principles, hardware and software associated with the infusion of information communication technology (ICT) in solving educational problems and meeting challenges in their roles as facilitators of learning.

BIEAT103 Sociological and Contemporary Issues in Inclusive Education and Assistive Technologies
The module explores sociological theories and topical issues in inclusive education and assistive technologies. These include health and life skills, advocacy and HIV/AIDS awareness. Different theoretical explanations and attitudes towards disability and special needs are also explored. The module also interrogates how cultural and religious beliefs impact society's perceptions of disability.

BIEAT104 Philosophical Issues in Inclusive Education and Assistive Technologies
The module seeks to equip students with knowledge of models, theories and perceptions that provide a philosophical basis for inclusive, special needs education and use of assistive technologies.

BIEAT105 Adaptations for Sensory and Neuro-Developmental Disabilities
This module is designed to provide students with a basic understanding of the nature, classification and characteristics of different types of sensory disabilities and neuro-developmental disabilities and the degree to which they impact a learner's ability to access educational opportunities. It also aims to prepare students to provide effective educational programmes for such learners in the mainstream and in specialised settings.

BIEAT106 Adaptations for Locomotor and Multiple Disabilities
The module seeks to develop an understanding about planning effective educational programmes for learners with locomotor and multiple disabilities, as well as creating in the students an awareness of these conditions. The module also intends to ensure the acquisition of the requisite skills to enable the students to craft effective therapeutic programmes for learners with such disabilities and to be able to refer them for medical intervention where necessary.

BIEAT106 Curriculum Planning and Design
The module introduces students to the general theory of curriculum. It explains the content of the curriculum, its elements and the forces that shape it. To this end, broader definitions are explored as well as the processes of curriculum development. The process of modifying, accommodating and adapting the curriculum without 'watering down' the contents is explored.

BIEAT108 Adaptations for the Gifted/Talented Learner and Children in Difficult Circumstances
The module seeks to equip students with a strong knowledge base and skills needed to provide effective educational programmes which are designed to meet the academic, social and emotional needs of gifted and talented learners. The students will be able to identify the learners through appropriate strategies and will plan and use relevant instructional approaches related to suitable curriculum models.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BIEAT109 Sign Language, Braille and other Curriculum Languages
The module seeks to assist students to be proficient in Sign Language, Braille and be able to make their adaptations and modifications to the content and complexity of teaching it and other curriculum languages in a manner that suits the profiles

of students with disabilities. Students are encouraged to make innovations to instructional adaptations which in turn become critical components of the learner outcomes in inclusive settings.

BIEAT201 Mathematics, Science and Technology
The module seeks to assist students in the development of their ability to integrate mathematics, science and technology through problem-based learning in their instruction. Through adapting and modifying instruction for students with disabilities, teachers create a more positive atmosphere that encourages the students to take risks in problem- solving which in turn strengthens their understanding of concepts.

BIEAT202 Visual and Performing Arts
This module seeks to expose students to instructional adaptations and modifications to the teaching of art, creative arts, music, movement and dance. Emphasis is on fostering an understanding and appreciation of cultural and social values, as well as competencies that are essential for employment creation, problem- solving, critical thinking and self-discipline.

BIEAT203 Agriculture
The module seeks to assist students in making instructional adaptations and modifications in the teaching of agriculture thereby promoting the acquisition of agricultural skills through problem-solving activities in a sustainable manner. Students also acquire entrepreneurial skills relevant to agriculture.

BIEAT204 Assessment Issues in Inclusive Education and Assistive Technologies
The module exposes students to the purposes and uses of assessment in inclusive, special needs education and the use of assistive technologies. The design and use of different tools of assessment are considered, together with how assessment information is used for planning and restructuring inclusive classroom instruction.

EDGS 231 Gender Studies for Educators
The module aims to provide students with an introduction to the concept of gender and its significance to education. The module exposes students to how education spaces construct gender differences, the implications of these differences on learners and how schools can close the gender gaps. Key issues to be studied include theoretical perspectives on gender, cultural dimensions of gender, and deconstruction of gender and their implications for the education sector.

BIEAT105 Teaching Practice
The module is designed to equip students with practical skills required in inclusive and special needs settings. Students will gain professional growth through practicum in a variety of settings which include mainstream inclusive schools, special schools, resource rooms, early childhood settings and home-based care. The focus will be on the application of theory to real-life situations with learners in a school environment or with individual children living with disabilities in the community.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

BIEAT206 Technologies in Inclusive Education and Assistive Devices
This module introduces students to assistive technology interventions and provides information about the purpose, use and potential benefits of these interventions. Assistive interventions can support access to and participation in everyday learning opportunities for learners with special educational needs. Access and participation are two of the defining features of high-quality inclusion.

BIEAT207 Guidance and Counselling in Inclusive Education and Assistive Technologies
This module seeks to expose students to theoretical and practical aspects of Guidance and Counselling in Inclusive and Assistive Technologies. Students are introduced to theories of Guidance and Counselling and their application. Innovative practices in the counselling process are also introduced.

BIEAT208 Entrepreneurship for Inclusive and Special Needs Educators
The module is intended to equip students with knowledge of key concepts and theories of entrepreneurship in the context of Inclusive and Special Needs Education. The focus is on entrepreneurship as a viable and strong option for students in the development of autonomous skills and self-confidence.

BIEAT209 Family, Heritage and Religious Education

This module seeks to assist students in instructional adaptations in the development of unhu/ubuntu, social responsibility and a sense of sound ethical norms from other religions. The module enhances an understanding and appreciation of family relationships, gender and respect for human dignity and diversity.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN PRIMARY EDUCATION AND MANAGEMENT PRACTICES (EDU57)

Duration:	2 years
Minimum Credit Load:	240
Maximum Credit Load:	288
Maximum MBKs Credit Load:	192
ZNQF Level:	8

1. PURPOSE OF THE PROGRAMME

To develop in candidates a high level of awareness and understanding of Primary school education in different socio-cultural contexts. The programme aims to produce Primary school education specialists who are versatile and who have significant specialisation in two learning areas on the primary school curriculum.

2. ENTRY REQUIREMENTS

Diploma in Primary Education or its equivalent from an accredited and recognised institution**.**

3. PROGRAMME CHARACTERISTICS

Areas of Study:

Primary Education, with specialisation in two primary school teaching subjects

Specialist Focus:

The development of keen awareness in primary school educators of the need for the development of skills and values that are sensitive to sustainable development and continual educational improvement. Students specialise in the teaching of two subjects in the primary school curriculum by doing a module in each of the two subjects every semester.

Orientation:

Creating primary school educators who can apply current pedagogic thinking in their educational practice to facilitate creativity and innovation among learners.
In their 1st Semester, students will be introduced to the University Innovation Hub where they will receive talks and participate in discussions on how to develop simple ideas into productive and innovative ventures.

In their 2nd and 3rd Semesters, the students will be required to take turns to visit and work in the University Industrial Park to get a feel of productive activities and industrial work and appreciate the philosophy of industrialisation.

Students are expected to use this exposure to initiate productive ventures in their schools of practice with school pupils, fellow teachers, and where possible, with the communities around the school, culminating in school-based innovation hubs and industrial parks.

4 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as specialist teachers in primary schools, supervisors of education programmes, lecturers in institutions offering teacher education programmes, education inspectors, designers and developers of Primary

Education curricula, consultants for educational programmes, or researchers in education, Content Developers and consultants etc.

Further Studies: Master's and Doctoral Studies in Primary Education.

5 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods

Virtual and Google Class lectures, some face-to-face lectures where possible, tutorials, seminars, group tasks, panel discussions, research projects, and independent study.
Full-time Mode: 36 hours of lectures per module over a semester, or their equivalent in virtual lectures or blended learning where the situation demands this.
Weekend School Mode: 36 hours of lectures per module over 12 -weekend sessions, or their equivalent in virtual lectures or blended learning where the situation demands this.
Block Release Mode: 36 hours of lectures per module over 3-week block sessions or their equivalent in virtual lectures or blended learning when the situation requires this.

5.2. Assessment Methods:

6. LEARNING OUTCOMES

Students should become practitioners who:

- are familiar with pertinent issues in the field of education and be comfortable in the use of advanced data analysis tools and techniques that assist in finding sustainable and innovative solutions using publications and other verifiable outcomes, especially in their programme areas of teaching specialisation;
- possess verifiable skills in designing and implementing monitoring and evaluation tools that serve to improve their practice, informed by foundational concepts and theories;
- exhibit quality teaching skills that inform their day-to-day practice and the ability to facilitate learning among their learners;
- show sound creative, innovative and entrepreneurial skills that enable them to identify viable business opportunities, establish enterprises, and commercialise patents/copyrights resulting from their pedagogical theory and practice;
- find inspiration and guidance from salient educational theories, especially in their areas of teaching specialisation, to improve their educational practice and professional ethics;
- are able to use the latest ICT technologies to develop problem-solving and creative teaching skills in ways that embrace indigenous knowledge systems.

7. GENERAL PROVISIONS

For the Bachelor of Education Honours Degree in Primary Education programme, candidates shall study at least 23 modules.
Each module is worth 12 credits except for the Research Project which is worth 24 credits each.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.
All other modules shall be assessed by continuous assessment and formal examinations.
Continuous assessment shall constitute 40% of the final assessment,
Written examinations shall constitute 60% of the final assessment
To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9. PROVISION FOR PROGRESSION

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.
All other modules shall be assessed by continuous assessment and formal examinations.
Continuous assessment shall constitute 40% of the final assessment,
Written examinations shall constitute 60% of the final assessment
To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations or 'repeat' or to 'withdraw'.

If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.

'Withdraw' means that the student shall withdraw from the university.

For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

'Carry over' means carry over modules from the previous level to the subsequent level.

Retake means redo module(s) that failed in the previous semester within the same level.

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels

13. MODULESYNOPSES

COMPULSORY MODULES

BCHS131 Culture and Heritage Studies
The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BEPM101 Curriculum Theory, Innovation and Practices in Education
The module enhances students' knowledge of the concept curriculum, curriculum planning processes and content selection and organisation. Emphasis is on Curriculum Implementation; Curriculum change, innovation and educational practices.

BEPM102 Sociological Perspectives and Emerging Issues in Education
The module acquaints students with the main schools of modern sociological perspectives and emerging issues pertaining to human relationships in families, organisations and other groups in society. The module covers issues such as socialisation, media parenting practices child abuse, child trafficking and urbanisation.

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

ENGLISH

BEN101 Linguistics and Language Teaching
This module focuses on language situation and language policy in Zimbabwe, Language situation and teaching in Zimbabwe inguistic and extra-linguistic domains, language teaching approaches/methods.

BEN102 Literature and Criticism
The module focuses on: the definition of literature, literary genres and their characteristics, introduction to literary criticism theories and their salient features introduction to basic characteristics of selected theories (Afrocentrism, Africana-Womanism, Marxism, Feminism Psychoanalytic Formalism, and Deconstruction).

BEN103 Theories of Language Arts
The module focuses on pure linguistics (micro) theoretical linguistics (micro), applied linguistics (utility), first language acquisition: cognitivism versus behaviourism, second language learning – acquisition and learning – similarities and differences, language in social function, language levels, types and roles and competence- performance debate.

NDEBELE

BND101 Imbali yolimi lwesiNdebele lokuthuthuka kwalo (History and developments of the Ndebele language)

Ulimi lwesiNdebele olukhulunywa lamuhla solwehlukile alubalu qathaniswa lolwayizolo. Okumqoka ngolimi yikuthi lona kalumi ndawonye kodwa luhlezi luguquka njalonje. Kwabanye linguquko isilethe umnotho omkhulu elimini lomdabuko lwesiNdebele kukanti kwabanye linguquko kayifanelanga yemkelwe loba ngasiphi isikhathi. Lokhu kusuke kuphe ingqobe Ababalisi kanye lezingcwethi ezihlolisisa ngolimi ukuba zidingisise njalo zicubungule kabanzi imbali Yolimi lwesiNdebele kanye lenguquko esibekhona

BND102 Imihlahlandlela yelithiritsha (Theories of Literature)
Ikhosi le ikhangelelwe ukwambulela abafundi imihlahlandlela lemicabango ehlukeneyo yokuhlaziya imibhalo. Ibala elithi umhlahlandlela kule ikhosi lizasetshenziswa njengomzamo wokuphendla indlela yokuthi ulutho lusebenza njani kusetshenziswa imicabango. Elithi imibhalo lona limele imihlobo yonke yelithiritsha yesiNdebele engalotshwanga lelotshiweyo. Imibhalo ekhangelelwe ukuhlaziywa kusetshenziswa imihlahlandlela lemicabango etshiyeneyo

ngeyabafundi bebanga lemfundo yeSekhondari kusukela eviyweni lakuQala kusiya kweleSithupha. Kule ikhosi imibhalo igoqela inkondlo, inganekwane, imidlalo, izibongo zamakhosi, imilolozelo, amanoveli kanye leminye imihlobo engabe ingaganjwanga. Ngamafitshane, likhosi izahlomisa abafundi ngolwazi lwemihlahlandlela leminakano esetshenziswa ukuhlaziya imibhalo yemihlobo etshiyeneyo.

CHISHONA

BSH101 Nhoroondo yeMutauro weChiShona [History of the Development of the ChiShona Language]

The modules focus on the history and development of the ChiShona as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which ChiShona has standardised.

BSH102 Pfungwa Dzokuongorora Nadzo Uvaranomwe (Theories of Literary Criticism)

The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afrocentrism, Formalism, Structuralism, Feminism and others will be studied with a view to finding out their relevance in analysing the ChiShona text.

BSH103 Mutinhiro weMutauro neMubatanidzwa weMutinhiro [Phonetics and Phonology]

The module is a study of speech sounds and their patterning in the ChiShona language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It will also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the ChiShona language.

TJIKALANGA

BKAL101 Nhubelelo nepfumbidzo yeTjiKalanga (History and Development of Kalanga)

The module focuses on the history and development of the TjiKalanga as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which TjiKalanga has standardised.

BKAL102 Dusiwa kwemisindo nemawi eTjiKalanga (Phonetics and Phonology)

The module is a study of speech sounds and their patterning in the TjiKalanga language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It will also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the TjiKalanga language.

BKAL103 Luzibo gwebapali gunotungamila lithiritja (Theories of Literature)

The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afrocentrism, Formalism, Structuralism, Feminism and others will be studied with a view to finding out their relevance in analysing the TjiKalanga text.

NAMBYA

BNA101 Ibhatuko lyolulimi lwechiNambya nokubhudilila kwalo. (History and Development of Nambya)

The modules focus on the history and development of the ChiNambya as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which Xitsonga has standardised.

BNA102 IFonetiki neFonoloji [Phonetics and Phonology]

The module is a study of speech sounds and their patterning in the ChiNambya language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It will also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the ChiNambya language.

BNA103 Indangalilo jokupenyengula makwalo. (Theories of Literature)

The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afro-centrism, Formalism, Structuralism, Feminism and others will be studied with a view to finding out their relevance in analysing the ChiNambya text.

XITSONGA

BXT101 Matimu na Nhluvuko wa Xitsonga (History and Development of Xitsonga)

The modules focus on the history and development of the Xitsonga as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonization.
The student is expected to apply these to assess the extent to which Xitsonga has standardized.

BXT102 Fonetiki na Fonoloji [Phonetics and Phonology]
The module is a study of speech sounds and their patterning in the Xitsonga language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It shall also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the Xitsonga language.

BXT103 Mihlavutelo yo Xopaxopa Matsalwa (Theories of Literature)
The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afrocentrism, Formalism, Structuralism, Feminism and others shall be studied with a view to finding out their relevance in analysing the Xitsonga text.

TONGA
BTON101 Lwaano lwamulaka wachiTonga akusumpulwa kwawo (History and Development of Tonga)
The module focuses on the history and development of Tonga as a written language. It traces the various stages that it went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which Tonga has standardised.

BTON102 Fonetikisi aFonoloji. (Phonetics and Phonology)
The module is a study of speech sounds and their patterning in the Tonga language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It shall also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the Tonga language.

BTON103 Mizeezo yakulangisisya malembe (Theories of Literature)
The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afro-centrism, Formalism, Structuralism, Feminism and others will be studied with a view to finding out their relevance in analysing the Tonga text.

TSHIVENḐA
BVEN101 Ḓivhazwakale ya Mveledziso ya Luambo (History and Development of Tshivenḓa)
The module focuses on the history and development of the Tshivenda as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which Tshivenda has standardised.

BVEN102 Fonetiki na Fonolodzhi (Phonetics and Phonology)
The module is a study of speech sounds and their patterning in the Tshivenda language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It will also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the Tshivenda language.

BVEN103 Ṱhyiori dza Maṅwalwa (Theories of Literature)
The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afrocentrism, Formalism, Structuralism, Feminism and others will be studied with a view to finding out their relevance in analysing the Tshivenda text.

SeSOTHO
BSOT101 Histori ea tsoelopele ea puo ea seSotho (History of the development of seSotho language)
The module focuses on the history and development of the Sesotho as a written language. It traces the various stages that the language went through towards standardisation. It handles issues of orthography, diglossia, codification, grammar, lexicography and harmonisation. The student is expected to apply these to assess the extent to which Sesotho has standardised.

BSOT102 Fonetiki le fonoloji ea seSotho (Phonetics and phonology)
The module is a study of speech sounds and their patterning in the Sesotho language. It focuses on the classification, description and transcription of speech sounds with respect to their articulatory features. It shall also introduce students to some basic phonological processes such as assimilation and how speech sounds combine in the Sesotho language.

BSOT103 Likhopolo ka tselingoliloeng (Theories of literature)

The module exposes the student to various theories of literature criticism and writing. These are tools that enable students to get deeper analyses of literary texts. Theories such as Marxism, Afro-centrism, Formalism, Structuralism, Feminism and others shall be studied with a view to finding out their relevance in analysing the Sesotho text.

SIGN LANGUAGE

BSL101 Linguistics and Language Teaching

The module focuses on language situation and language policy in Zimbabwe, language situation and teaching in Zimbabwe, linguistics and extralingustics domains, language teaching approaches/Methods. Background to linguistics and language teaching, theories of second language acquisition, branches of linguistics, the definition of linguistic terms, the relationship between linguistics, language and literature, the relevance of theories of linguistics to primary school teachers.

BSL102 Hearing Impairment

The module is designed to help students to be aware of the impact and psycho-social effects of hearing impairment on the learner. The module shall cover identification, intervention as well as the various educational adaptations. The history of Deaf Education as well as the cultural and linguistic aspects of the hearing impaired shall be discussed.

BSL103 Foundations and Cultural Issues in Special Needs Education

The module covers historical and philosophical foundations relating to various categories of exceptionalities. Sociological and psychological issues pertaining to children with special needs shall be tackled. In addition, the relationships between culture and disability shall be discussed within Zimbabwean contexts.

SOCIAL STUDIES

BSS101 History and Philosophy of Social Studies

The module guides students on the origins, meaning and development of the discipline, the development of Social Studies in America, Europe, Asia and Africa, the nature of Social Studies, relationships with other disciplines, its concepts, aims and objectives, and reception of the discipline on the curriculum.

BSS102 Natural and Environmental Issues in Social Studies

The module focuses on human-environment interaction, environmental shaping of relations of communities, the role of demographic pressures, man's greed, diseases in communities, government policies, exploitation and control of nature and relations between communities.

BSS103 Values Education

The module examines the classification of values; theories of values development; functions of values; approaches to the teaching values

SCIENCE AND TECHNOLOGY

BST101 General Chemistry

The module guides students in understanding Matter; Chemical formulas and compositions stoichiometry; Chemical equations thermochemistry; Atomic and molecular structure; Chemical periodicity; Gases and kinetic molecular theory; Radioactivity and nuclear chemistry

BST102 Environmental Chemistry

The module focuses on the scope of environmental chemistry; the Chemistry of the atmosphere and

Geosphere; Environmental biochemistry; Environmental pollution

BST103 Environmental Pollution and Control

The module examines pollution types, sources, effects and control measures; impact on the environmental and human health; global warming ozone depletion effects of global warming; loss of biodiversity; agrochemicals and the environment; mining and the

environment and bioremediation.

MATHEMATICS

BMA101 Calculus 1

The module deals with real number systems, sequences, functions, limits, continuity, derivatives, and integration.

BMA102 Linear Mathematics
The module gives students an opportunity to work on Vectors, vectors space, matrices, determinants and inverse matrix, diagonal matrix, eigenvalues and eigenvectors, linear transforms

BMA103 Application of Learning Theories in Mathematics
The module guides students in the application of cognitive theories, social constructivist theories, educational learning theories and behaviourist theories. In the learning of mathematics.

RELIGIOUS AND MORAL EDUCATION

BRME101 History and Philosophy of Religious and Moral Education
The module guides students to appreciate the history and rationale for Religious and Moral Education in the Zimbabwean school curriculum; trends in Religious and Moral.

Education in Africa

BRME102 Phenomenology of Religion
The module examines the reasons for the rise of the phenomenology of religion; the phenomenology of religion as a method of studying religious and moral education; the meaning of religion from a phenomenological perspective and its applicability in the study of different religious phenomena.

BRME103 Studies in Selected Indigenous Religions
The module examines African indigenous religious beliefs and practices in Zimbabwe; Unhu/Ubuntu, rites of passage, sacred practitioners and sacred places, myths, rituals and the indigenous religious cosmology. It discusses selected case studies of indigenous religions from other African states – Nigeria, Ghana, Botswana, South Africa etc.

COMPUTER SCIENCE
BCS101 Introduction to Computer Science and Educational Applications
This module introduces basic computer concepts.

Topics covered include data processing cycle, number systems, computer arithmetic, types of computers, computer peripherals, types of computer software including systems software, application software and utility software, basics of computer network and data communication.

BCS102 Fundamentals of Computer Organisations and Architecture
This module covers the fundamental concepts in the architecture of computer systems including register, structure, memory organisation and management, organisation of peripherals, and machine-level operations. Topics to be covered include variations in computer architectures including buses, and internal and external memory. I/O and interfacing, instruction Sets, RISC computers. These concepts are integrated through the use of assemblers, linkers and loaders.

BCS104 Introduction to Programming
This module introduces simple programmes writing using assignments. Topics covered include variables, simple types, operators and expressions, conditional and repetitive statements, inputs and output, simple functions, programme structure and organisation, definition and scope, and introduction to classes and objects.

PHYSICAL EDUCATION AND SPORT
BPE101 Introduction to Sport Science
This module is designed to expose the students to the components of the sport sciences. It equips students with an understanding of sports performance and the factors that affect behaviour in sport.

BPE102 Foundations of PE and Sport Science
The module focuses on theoretical content and practical skills essential for teaching a wide range of physical activities at the secondary school level, historical, philosophical, psychological, sociological, physiological and biological foundations of physical education.

BPE103 Gymnastics
The module has a practical orientation that includes exercises that require balance strength, flexibility, agility, coordination and endurance.

COMPULSORY MODULES
BEPM103 Psychological Perspectives and Emerging Issues in Education
The module acquaints students with the main schools of modern sociological theory and psychological issues pertaining to patterns in human development, human learning and psycho-social development. This provides them with a tool kit from

which they can build their understanding of educational practice in diverse social contexts. Some of the issues to be covered in the module include contemporary parenting practices, child socialisation processes, learning and the development of the self as well as the concept of culture and its influences in shaping children's personalities.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BEPM104 Measurement and Assessment in Primary Education
The module equips students with measurement and assessment techniques such as diagnostic, formative and summative in education. Emphasis is on the quality of the teaching-learning process, because it allows to establish whether or not objectives have been achieved and to establish the learning pace of each learner. Students' knowledge of assessment methods, such as examinations, projects, online discussions, journals, case studies, or presentations is enhanced.

BEPM105 Philosophical Perspectives, Critical Thinking and Emerging Issues in Primary Education
The module equips students with the ability to critically engage with issues such as freedom, authority and the development of responsibility, equality and social justice in education, democracy and the cultivation of democratic citizenship through education, education and human rights and, critical pedagogy.

SPECIALISATION MODULES

ENGLISH

BEN104 Zimbabwean Literature
The module focuses on the study of selected Zimbabwean literature, colonial and post-colonial periods.

BEN105 African Literature
The module focuses on African Literature written in English covering the pre-colonial, colonial and post-colonial periods

BEN106 Oral Literature
The module focuses on Characteristics, Oral versus written art, Forms of oral literature, Including Panegyric, Elegiacs, Songs, and Narratives.

NDEBELE

BND103 Ilithiritsha engalotshwanga (Ndebele oral literature)

Msebenzi welithiritsha engalotshwanga uzahlomisa ababalisi ngobuciko bokuhlaziya ilithiritsha engalotshwanga ebalisa inkondlo, ingoma, izaga, izitsho, amazilo, amalibho, izinganekwane, izibongo kuxoxwa ngempawu zelithiritsha engalotshwanga, ukwethula umsebenzi wale ilithiritsha kulabo abayisebenzisayo.

BND104 Izindlelala zokufundisa IsiNdebele (Methods of Teaching Ndebele at Primary Level)
Izifundo zokuqhutshwa kwesiNdebele ephurayimari ikhangelelwe ukuhlomisa abafundi abaqeqetsha ezifundweni zeBachelor of ephurayimari Education Degree ngamakhono adingakalayo ukuze bethule ulwazi ebafundini bebanga laphansi. Ikhosi le izakwambulela abafundi ukuthi ukufundisa kuphathelane lani njalo iphathise ekuthuthukiseni ubuciko obudingakalayo ekusebenziseni izindlela ezehlukeneyo ekuqhubeni izifundo zesiNdebele ebangeni laphansi. Likhosi ikhangelelwe njalo ukuthuthukisa amakhono olimi okuswelakala abafundi bebanga laphansi babe lawo.

CHISHONA

BSH104 Kuturikira [Translation and Interpretation]
The module aims to equip students with various translation skills and strategies that help in minimising loss of content from the source to the target language

BSH105 Dudziramutauro reChiShona [ChiShona Grammar]
The module gives the student the basis of the Shona linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle Shona's grammatical constructions at these levels of linguistic analyses.

BSH106 Kupepeta Zvinyorwa zveChiShona (Editing Shona Texts)
The module introduces the students to the basics of editing ChiShona texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

TJIKALANGA

BKAL104Handulila netolika (Translation and Interpretation)

The course aims to equip students with various translation skills and strategies that help in minimising loss of content from the source to the target language

BKAL105 Misiwa kwelulimi (Grammar)
The module gives the student the basis of the TjiKalanga linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle TjiKalanga grammatical constructions at these levels of linguistic analyses.

BKAL106Pepetewa kwezikwagwa (Editing Texts)
The module introduces the students to the basics of editing TjiKalanga texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

NAMBYA

BNA104 Kutolika nokupandulila lulimi (Translation and Interpretation)
The module aims to equip students with various translation skills and strategies that help in minimising loss of content from the source to the target language.

BNA105 Bulongwa bwolulimi lwechiNambya (Grammar)
The module gives the student the basis of the ChiNambya linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle ChiNambya grammatical constructions at these levels of linguistic analyses.

BNA106Kupyeka makwalo (Editing texts)
The module introduces the students to the basics of editing ChiNambya texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

XITSONGA

BXT104Vhundzuluxi ni Vutokoli [Translation and Interpretation]
The module aims to equip students with various translation skills and strategies that help in minimising loss of content from the source to the target language.

BXT105 Vuhleri bya Matsalwa (Editing Texts)
The module introduces the students to the basics of editing Shona texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

BXT106 Vuvulavuri (Grammar)
The module gives the student the basis of the Xitsonga linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle Tsonga grammatical constructions at these levels of linguistic analyses.

TONGA

BTON104 Kutolekela akupandulula (Translation and Interpretation)
The course aims to equip students with various translation skills and strategies that help in minimising loss of content

from the source to the target language

BTON105 Mbambwemulaka (Grammar)
The module gives the student the basis of the Tonga linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle Tonga grammatical constructions at these levels of linguistic analyses.

BTON106 Kupupulula malembe (Editing Texts)

The module introduces the students to the basics of editing Tonga texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

TSHIVHENDA

BVEN104 Vhupinduleli na Vhudologeli [Translation and Interpretation]

The module aims to equip students with various translation skills and strategies that help in minimising loss of content from the source to the target language

BVEN105 U Dzudzanya Dzibugu (Editing Texts)
The module introduces the students to the basics of editing Tshivenda texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers.

BVEN106 Girama (Grammar)
The module gives the student the basis of the Tshivenda linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle Sesotho grammatical constructions at these levels of linguistic analyses.

SESOTHO

BSOT104Sebupeo - puo ea Sesotho (Grammar)
The module gives the student the basis of the Sesotho linguistic structure. It handles phonology, morphology, syntax and semantics. It helps them to handle Sesotho grammatical constructions at these levels of linguistic analyses.

BSOT105 Hlolisiso ea mengolo (Editing Sesotho Texts)
The module introduces the students to the basics of editing SeSotho texts. It equips the students with various editorial skills to handle different literary genres such as the novel, poem, short story and drama including research papers

SIGN LANGUAGE

BSL104 Theories of Language Arts
The module examines language acquisition and learning and theories of language teaching and learning. It also entails exploring the relationship between language and the mind and the interface between language and society touching on communication in general. In addition, it explores the relationship between language and literature.

BSL105 Zimbabwean Sign Language 1
The module focuses on cultural perspective of Deaf Education; Sign Language as a natural language; Norms in Sign Language Use; Hand shapes; Movement; Location; Basic Interpersonal Communication Skills (BICS); Cognitive Academic Level Processing (CALP) for the Social and Natural Sciences from ECD to High School; ZSL as a subject; ZSL as a language of instruction.

BSL106 Deaf Culture and Deaf Education
This module is designed to make students of education appreciate learners who are deaf and hard of hearing and their families within a particular culture. The course is meant to reveal the importance of deaf culture in society. Students are expected to read about, discover and examine cultural issues in order to improve their practice as Zimbabwean sign language teachers.

SOCIAL STUDIES

BSS104 Pedagogical Issues in the Teaching of Primary School Social Studies
The module focuses on dominant themes of Social Studies programmes, issues related to the teaching and learning of Social Studies, scope and sequence of Social Studies, content, models of teaching the subject, concept formation and resources for the subject.

BSS105 Culture and Gender in Development
The focus of the module is on mainstreaming, gender and development, empowerment of women and youths, peace and security, social cohesion and solidarity as critical tenets for prosperity.

BSS106 Conflict Transformation
The module guides students in understanding peace and conflict transformation, harmony, stability, order, cooperation, tolerance and progress, conflict prevention, conflict management and conflict resolution at community, national, regional continental and international levels, and human security.

SCIENCE AND TECHNOLOGY

BST104 Biogeography
The focus of this module is on the nature of biogeography; The Historical Development of Biogeography; Energy flows in Ecosystems; Nutrient cycles; Types of Biomes; Species interaction; Biological diversity; Theories of evolution; Island biogeography; Impact on Biotic resources; Sustainable use of resources.

BST105 Environmental Physics
The focus of the module is on the properties of gases and liquids; Transport of heat, mass and momentum; Radiation Environment; Microclimatology of Radiation; Heat Transfer; Mass Transfer; Micrometeorology.

BST106 Environmental Pollution and Control
The module deals with pollution types, sources, effects and control measures; impact on the environmental and human Health; global warming ozone depletion effects of global warning; loss of biodiversity; agrochemicals and the environment; mining and the environment; bioremediation.

MATHEMATICS

BMA104 Mathematical Discourse and Structures
The focus of the module is on sets and relations. Logic, groups, rings and fields. The complex field.

BMA105 Probability and Statistics

The focus of this module is on sets, sample spaces, probability concepts, independent events, mutually exclusive events, conditional probability, Bayes' Theorem. Discrete and continuous variables, Expectation and variance, Special Distributions, Generating functions, Central limit theorem.

BMA106 Calculus II
The module focuses on functions of several variables, limits and continuity, partial derivatives, and multiple integrals. Series.

RELIGIOUS AND EDUCATION

BRME104 Contemporary Issues in Religious and Moral Studies
This module introduces students to contemporary issues in Religious and Moral Studies. It intends to help students analyse selected religious responses on current issues such as sexual orientation, religion and technology, religious fundamentalism, religious enterprise, health and disability, human rights, religion, war and politics, global warming and religion and development.

BRME105 Sociology of Religion
The module introduces students to the meaning of sociology and sociology of religion, the importance of religion to society, sociological perspectives in the study of religion, religion in conflict transformation, feminism, social change, and politics, gender, violence, sexuality and HIV/AIDS in Zimbabwe, sociological factors for the rise of denominations and sects in Zimbabwe, membership in religious groupings, and the child's religious background affect his/her socialisation.

COMPUTER SCIENCE

BCS105 Database concepts
The module focuses on indicative content: Introduction and conceptual modelling, databases and database users, database concepts and architecture, data modelling using the ER model, EER, relational database constraints, relational algebra and calculus, basic constraints and queries, normalisation and functional dependencies. It includes Java and PHP and Web databases.

BCS106 Object Oriented Programming I
The module introduces the Principles of Object- Oriented Programming, Tokens, Expressions and Control Structures. Functions in Classes and Objects, Constructors and Destructors, Operator Overloading and Type Conversions, Inheritance: Extending Classes, Pointers, Virtual Functions and Polymorphism, Managing Console I/O Operations, Working with Files, Object-Oriented Systems Development: Projects.

B**CS107 Teaching and Learning in Computer Science Education**
This module introduces the rationale of computers in education, TPCK, how computers are used in education, how computers enhance the teaching of science and mathematics in the classroom, CAS, MATHEMATICA and other software.

PHYSICAL EDUCATION AND SPORT
BPE104 Pedagogical Issues in Physical Education

The module guides students on scheming, planning, records keeping, evaluation, and teaching styles.

BPE105 Human Anatomy and Physiology

The module focuses on anatomical and physiological components of the human body, physiology of exercise, kinesiology, and bioenergetics.

Level 2 Semester 1

COMPULSORY MODULES

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEPM201 Entrepreneurship and Professionalism in Primary Schools
The module equips students with knowledge of theories of entrepreneurship and be able to apply them in starting business ventures in education. Students develop a conceptual framework of entrepreneurship and distinguish between wage employment, self- employment and entrepreneurship. Students are equipped with skills to embark on both short-term and long-term business enterprises which address educational and societal problems.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and interpretation of policies and statutes that govern financial and asset management in educational institutions.

BEPM202 Leadership, Classroom Dynamics and Management Practices in Primary Schools
The module equips students with leadership skills so that they are able to direct the talents and energies of teachers, pupils, and parents toward achieving common educational goals. The module further enhances students' classroom management skills and techniques that teachers use to keep students organised, orderly, focused, attentive, on task, and academically productive during a class. Universal classroom management strategies such as modelling ideal behaviour involving learners in establishing rules and guidelines, documenting rules, avoiding punishing the class unnecessarily, encouraging innovation and creativity and offering praise are emphasised.

The module guides students on language planning, status planning, corpus planning, language as a social entity, language and power, language and race, language and gender, language attitudes, utilitarian value of language, language and education, Language policy and nationhood, and linguistic imperialism.

BEN202 English Language and the School Curriculum

The module focuses on curriculum design, theories and models; curriculum design processes; curriculum models as examples, background, content and function of English in Zimbabwe; English as a colonial Language and an official Language; English as a Second Language and Official Language; English at work – practical functions of English Language. Theories, approaches, methods and content in ESL teaching; Teachers and ESL methods and content in ESL teaching; schools and ESL theories and approaches; The content of ESL and Approaches that underpin them.

NDEBELE

BND201 Ukuhlaziya amaNoveli (Analysis of novels)

Umnkantsho wale ikhosi usekufundweni kwemihlobo etshiyeneyo yamanoveli isiNdebele. Ekufundweni kwayo kukhangelelwe ukuthi abafundi benelise ukucubungula, ukukhwabitha lokuzwisisa indikimba, abalingiswa, izehlakalo kanye lokusetshenziswa kolimi. Lokhu kumqoka ekucubunguleni lekuchasiseni amanoveli endulo lawalezinsuku.

BND202 Izichazamazwi (Lexicography)

Umnkantsho wale ikhosi usekubunjweni kwezichazamazwi lokuqakatheka kwazo ekufundeni isiNdebele. Ikhosi le izakwenza abafundi bazwisise imihlobo etshiyeneyo yezichazamazwi lokusetshenziswa kwazo. Izabahlomisa njalo ngobuciko bokuqoqa lokuhlela izichazamazwi lokuhlaziya leyongqubo.

BND203 Ukulaya lokucebisa esiNdbeleni (Guidance and Counselling in Ndebele)

Ukuchaza ukulaya, ukuchaza ukucebisana, ukuveza ukuqakatheka kokucebisana, ukwambula izindlela zokucebisana zasendulo, ukwethula imihlahlandlela yokucebisa, ukuqathanisa ukucebisana kwasendulo lokwakulezinsuku.

CHISHONA

BSH201 Kudzidzisa ChiShona Zvakanaka kuPuraimari (Effective Teaching ChiShona at Primary Level)

The module seeks to develop teachers who can handle the teaching of ChiShona competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

BSH202Nganonyorwa [Analysis of ChiShona novels]

The module seeks to afford students the opportunity to critically examine various Shona texts applying different literary theories to selected texts.

TJIKALANGA

BKAL201 Iwhalongano (Analysis of TjiKalanga Novels)

The module seeks to afford students the opportunity to critically examine various TjiKalanga texts applying different literary theories to selected texts.

BKAL202 Diyiwa kwelulimi muphurayimari kunansindo (Effective Teaching of TjiKalanga at Primary school level]

The module seeks to develop teachers who can handle the teaching of TjiKalanga competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

NAMBYA

BNA201 Ingano jinokwalwa (Analysis of ChiNambya Novels)

The module seeks to afford students the opportunity to critically examine various ChiNambya texts applying different literary theories to selected texts.

BNA202 Kulayijwa kunandyo kolulimi lwechiNambya mundayijo yopasi (Effective Teaching of Nambya at Primary school level]

The module seeks to develop teachers who can handle the teaching of Nambya competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

XITSONGA

BXT201 Matsalwa (Analysis of Xitsonga Novels)

The module seeks to afford students the opportunity to critically examine various Shona texts applying different literary theories to selected texts.

BXT202 Tindlela ta nkoka ta madyondziselo ya ririmi eka phurayimari (Effective Teaching of Xitsonga at Primary school level]

The module seeks to develop teachers who can handle the teaching of XiTsonga competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

TONGA

BTON201 Kuyiisigwa kwinikwini kwamulaka kuPulayimali (Effective Teaching of Tonga at Primary school level]

The module seeks to develop teachers who can handle the teaching of Tonga competently by exposing the teacher to new pedagogic methods. The course compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

BTON202 Malembe aNoveli Analysis of ChiTonga Novels)

The module seeks to afford students the opportunity to critically examine various Tonga texts applying different literary theories to selected texts.

TSHIVENDA

BVEN201 Vhukoni ha u Gudisa Luambo kha Murole wa Phuraimari (Effective Teaching of TshiVenda at Primary school level]

The module seeks to develop teachers who can handle the teaching of TshiVenda competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

BVEN202 Nganea (Analysis of Tshivenda Novels)

The module seeks to afford students the opportunity to critically examine various Tshivenda texts applying different literary theories to selected texts.

SESOTHO

BSOT201 Horutisa seSotho ka tsoanelo Phuraimari (Effective teaching of seSotho at primary school level)

The module seeks to develop teachers who can handle the teaching of seSotho competently by exposing the teacher to new pedagogic methods. The module compares traditional and contemporary education. It equips the teacher with relevant skills in the implementation of the curriculum.

BSOT202 Pali (Analysis of Sesotho Novels)

The module seeks to afford students the opportunity to critically examine various Sesotho texts applying different literary theories to selected texts.

SIGN LANGUAGE

BSL201 ZSL and the School Curriculum

This module is designed to make students examine the concept of the curriculum /syllabus, theories informing curriculum planning and development, types of syllabuses, the rationale for the type of syllabus, the curriculum used in schools, syllabus interpretation and implementation.

BSL202 Applied Linguistics

The module seeks to explore an overview of applied linguistics, linguistics and language teaching; The sociolinguistic status of English in Zimbabwe; The role of the first language in second language learning; Theories of second language acquisition; individual learner differences and L2

SOCIAL STUDIES

BSS201 Trends in Social Studies Research

The module interrogates controversial issues in social studies etc., paradigms and axioms guiding social studies research.

BSS202 Social and Economic Issues in Social Studies

The module focuses on how African societies have related to their economic and social environments over time and how the environment has shaped these relationships; the impact of periodic disasters, demographic pressures, disease and man's societies; government policies in colonial and post-colonial period and their impact on African communities and their impact

BSS203 Heritage Education

The module intends to guide students on the concept of heritage; dimensions of heritage; development of the heritage education discourse; functions of heritage education; heritage concepts and issues; and approaches to the provision of heritage education.

SCIENCE AND TECHNOLOGY

BST201 Principles of Science and Technology Education

The module focuses on the teaching of science and technology in the primary schools-BEST approach, the constructivist approach, the philosophy guiding the teaching of science –ecocentricist and technicist; teaching through and using the environment; science and technology syllabus interpretation.

BST202 Plant and Animal Physiology

The module deals with plant and animal cells and tissues; Transport across the membrane; Transmission of impulse Mineral nutrition photosynthesis; plant growth regulators, kidney and urine, Menstrual cycle

BST203 Energy Systems

The module focuses on the generation of forms of energy (conventional and indigenous ways)-electrical, sound, wind, geothermal, mechanical, chemical, light and nuclear energy; transformations, conservation, interaction of forces, and magnetism.

MATHEMATICS

BMA201 Financial Mathematics

The modules focus on time series analysis, index numbers, compound discounting and annuities, business equations and graphs.

BMA202 Analysis

The focus of the module is on set theory, real field, functions, limits and continuity of functions, Cauchy sequences, differentiation, and Riemann integral.

BMA203 Ordinary Differential Equations

The module focuses on first-order differential equations, second-order differential equations, Laplace transforms, and power seriesand applications.

RELIGIOUS AND MORAL EDUCATION

BRME201 Religion and Gender Issues

This module intends to examine the place of religion in the context of gender issues in Zimbabwe; relationships between religion and gender; status ascribed to men and women in various religious traditions such as African Traditional Religion(s), Christianity, Islam and Judaism; religious teachings and practices and gender-based violence.

BRME202 Religion and Ethics

The module focuses on ethical theories and their application in solving current problems and perspectives of various ethical and religious traditions.

COMPUTER SCIENCE

BCS201 Data Communication and Networks

The module explores the Organisation, Management and the networked environment, Information technology infrastructure, Ethical and social issues in Information systems, Telecommunications, The Internet and wireless technology, Securing information systems, Global trends in Information systems, key system applications for the digital age, E-commerce; Digital markets and digital goods.

BCS202 Operating System Concepts

The module introduces operational procedures, visible Windows and other operating systems, Network technologies, Protocols, LANS, WANS, microprocessors, BIOS, CMOS, motherboards, and hard drive technologies. It incorporates installing, and upgrading Windows, configuring users, and groups, authorisation, user access controls (UAC), Troubleshooting, and maintenance of systems components/ peripherals, safe storage of data and recovery from disasters, safe disposal of computer waste-green computing.

BCS203 Curriculum Development in Computer Science Education

The module focuses on models of curriculum development, holistic approaches, the content of computer science in secondary/primary schools, sources of computer science recommendations, programming, and competencies.

PHYSICAL EDUCATION

BPE201Individual and Team Sport
The module focuses on fundamentals and techniques in individual and team sport.

BPE202 Sports Coaching and Methodology
The module exposes learners to multiple teaching and sports coaching methods.

Level 2 Semester 2

COMPULSORY MODULES

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

BEPM203 Guidance, Counselling and Contemporary Issues in Primary Schools

The module equips students with knowledge of different guidance and counselling perspectives and their application in the primary school sector and beyond. The module enables students to interrogate issues pertaining to counselling of learners in relation to school achievement and behaviour. Students also deal with contemporary issues such as pandemics, abuses, and disabilities in relation to guidance and counselling.

BEPM204 Inclusive and Special Needs Education in Primary Schools

The module equips students with knowledge of cultural practices, policies, legislation and modern practices in inclusive and special needs education. The module helps students to appreciate the practice of educating students with disabilities alongside their peers without disabilities, in the same classroom. The module emphasises the importance of positive attitudes and the use of innovative methods such as individualised instruction to ensure all learners can access mainstream education and also get the right support to help them develop their talents and achieve their goals.

SPECIALISATION MODULES

ENGLISH

BEN203 Women in Literature

The module focuses on the presentation of women in selected literary works, women as producers of and subjects in literature.

BEN204 Creative Writing

The module seeks to develop students' creative abilities in the various genres of literary experience. The module further aims at converting students from being mere consumers of literature to being producers in their own right. It is hoped that the module shall empower students to be able to use their creative skills for survival in life after university.

BEN205 World Literature
The module focuses on the examination and comparison of literature from different LEVELs of the world; comparison at various levels including thematic concerns, stylistic devices employed and the historical antecedents shaping and giving rise to given texts; The selection of literary works to be studied to include novels drama and poetry.

BEN206 Children's Literature

The module guides students on Defining children's literature, characteristics of children's literature, children's literature and adult literature compared and contrasted, children's literature in kaleidoscopic cultural terrain, analysis, evaluation, and selection of children's literature, 'classic', traditional and contemporary literary, structure, style and themes in children's literature.

NDEBELE

BND204 Amasiko Lokukhulumisana esiNdebeleni (Culture and Communication in Ndebele)

Amasiko lokukhulumisana yizinto eziqakathekileyo phakathi kwesizwe sinye ngasinye. Lanxa kunjalo, kusweleka kunanzelelwe ukuba amasiko lokukhulumisana akumanga ndawonye kodwa kuya kuguquka ngokuqhubeka kwesikhathi. Ekuqhutshweni kwale ikhosi abafundi bakhangelelwe ukuba bahlonyiswe ngolwazi lamaqhinga okukhulumisana okufaneleyo esintwini okudingakala kuvuselelwe njalo kulondolozwe.

BND205 Imibhalo yesiNdebele ephathelene lempilo yakulezinsuku (Ndebele Contemporary)

Ikhosi le iphathelene lemibhalo yesiNdebele emayelana lezehlakalo zitholakala empilweni yalamhla. Okuyikho okumqoka ngale ikhosi yizindikimba, abalingiswa lezizinda njengokwethulwa kwakho emanovelini, ezinkondlweni lemidlalweni. Kukhangelelwe ukuthi ikhosi le izakwambulela abafundi iminakano eyehlukeneyo ngobudlelwano bezingwalo lempilo yakulezinsuku.

BND206 Imidlalo yesiNdebele (Ndebele drama)

Ikhosi le ikhangela kabanzi ukufundwa kwemidlalo okumqoka ekwethulweni kwemibiko kusetshenziswa imidlalo ezizweni zabaNsundu. Ukuqakatheka kwekhosi le kusekuthini imidlalo isetshenziswa njengesikhali sokuletha inguquko lokuvezwa kokwenzakala emphakathini. Ekuqhutshweni kwale ikhosi abafundi bazahlonyiswa ngobuciko lolwazi okuqondene lokuhlaziya imihlobo yemidlalo etshiyeneyo

BND207 Ilithiritsha yabantwana yesiNdebele (Children's Literature in Ndebele)

Ibala elithi imibhalo lizasetshenziswa kule ikhosi limele imihlobo yonke yelithiritsha yesiNdebele elotshiweyo lengalotshwanga. Ikhosi le izazama ukwembulela abafundi iminakano evezwe zingwethi ngemibhalo yabantwana langendlela okumele ikhangelwe ngayo. Kungakho ikhosi le izagxila kumibhalo yabantwana bebanga lemfundo yaphansi beviyo lakuqala kusiya kwele sikhombisa. Lapha ilithiritsha igoqela amanoveli, indatshana, inkondlo, imidlalo kanye leminye nje imihlobo yelithritsha engabe ingaqanjwanga lapha. Kukhangelelwe ukuthi abafundi bazasebenzisa ulwazi abayabe beluthole lapha ekuthuthukiseni izifundo zemibhalo ezindlini zokufundela kumfundo yaphansi. Ngaleyondlela imfundo le izazama ukukhupha amacebo okuhluza imibhalo elotshiweyo lengalotshwanga kuhloswe ukuphathisa ababalisi abafundisa kuzikolo zemfundo yaphansi kanye lalabo bonke abafuna ukuthuthukisa imfundo yabantwana abakulawa mabanga emfundo.

BND208Amasiko Lengculaza (Culture, HIV and AIDS)

Ikhosi le iphathelene lengculaza okuyinto entsha emphakathiniwabaNsundu. Ukuvela kwayo kwaphambanisa amasiko abaNsundu ababelendlela yabo yombono ngempilo. Ekuqhubekeni kwalikhosi kukhangelelwe ukuba abafundi baziswe ngokuphathwa kwalesisifo somhlaba wonke mayelana lemikhuba yesiNntu.

CHISHONA

BSH203 Ukama hweMutauro, Pfungwa neNharaunda (Socio-Psycholinguistics)

The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BSH204 Mitemo yezveMitauro muZimbabwe [Language Policy and Planning in Zimbabwe]

The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BSH205 Kuumba Zvinyorwa (ChiShona Creative Writing)

The module equips students with expertise in creative writing. This is a practical course that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students shall produce a tangible piece of creative work.

BSH206 Mapazi eMutauro weChiShona [ChiShona Dialects]

The module seeks to expose students to the concept of dialectology both regional and social dialects. The students apply these concepts in the study of ChiShona dialects.

TJIKALANGA

BKAL203 Bukamu pakati kwelulimi nenkumbulo netjaba (Socio-Psycholinguistics)

The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BKAL204 Milayo inotungamila ndimi muZimbabwe [Language Policy and Planning in Zimbabwe]

The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BKAL205 Kwala nebunyambi (Creative writing)

The module equips students with expertise in creative writing. This is a practical module that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students should be able to produce a tangible piece of creative work.

BKAL206 Ndinyana (Dialects)

The module seeks to expose students to the concept of dialectology both regional and social dialects. The students shall apply these concepts in the study of TjiKalanga dialects.

NAMBYA

BNA203 Kulyijana kolulimi lwechiNambya nemiyeyo namagalilo abanhu (Socio-Psycholinguistics)

The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BNA204 Milawu yokushingiswa kwendimi muZimbabwe. [Language Policy and Planning in Zimbabwe]

The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BNA205 Kukwalwa kwenyaya jokuzwibumbila (Creative writing)

The module equips students with expertise in creative writing. This is a practical module that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students should be able to produce a tangible piece of creative work.

BNA206 Milebelekelo (Dialects)

The module seeks to expose students to the concept of dialectology both regional and social dialects. The students shall apply these concepts in the study of ChiNambya dialects.

XITSONGA

BXT203 Matirhiselo ni Vukunguhati bya Tindzimi etikweni ra Zimbabwe [Language Policy and Planning in Zimbabwe]

The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BXT204 Vuxaka ni swa Miehleketo eka swa Ririmi (Socio-Psycholinguistics)

The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BXT205 Vutsari bya Vutshila (Creative Writing)
The module equips students with expertise in creative writing. This is a practical module that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students should be able to produce a tangible piece of creative work.

BXT206 Marin`wana (Dialects)
The module seeks to expose students to the concept of dialectology both regional and social dialects. The students apply these concepts in the study of Xitsonga dialects.

TONGA

BTON203 Zyamiyeeyo azyabukkale mumilaka (Socio- Psycholinguistics)
The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BTON204 Mulawo wamulaka amabambe muZimbabwe [Language Policy and Planning in Zimbabwe]
The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BTON205 Zyakulifulila (Creative Writing)
The module equips students with expertise in creative writing. This is a practical module that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students shall produce a tangible piece of creative work.

BTON206 Ngambwiido mumulaka wachiTonga (Dialects)
The module seeks to expose students to the concept of dialectology both regional and social dialects. The students apply these concep**ts in the study of Tonga dialects.**

TSHIVENDA

BVEN203 Vhushaka ha zwa kuhumbulele na matshilisano kha zwa luambo (Pyscho-Socio-Linguistics)
The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BVEN204 Milayo ya Kushumiselwe kwa zwa Luambo Zimbabwe (Language Policy and Planning in Zimbabwe)

The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BVEN205 Vhutsila ha Maṅwalwa (Creative Writing)
The module equips students with expertise in creative writing. This is a practical course that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students should be able to produce a tangible piece of creative work.

BVEN206 U Nyambotavhi (Dialects)
The module seeks to expose students to the concept of dialectology both regional and social dialects. The students apply these concepts in the study of Tshivenda dialects.

SESOTHO

BSOT203 Meaho le tsebelisoeapuo (Socio-Psycholinguistics)
The module introduces students to the basic aspects of psycho and socio-linguistics such as theories of first and second language acquisition and language and society interface.

BSOT204 Leano le hlopho ea puo Zimbabwe (Language Policy and Planning in Zimbabwe)
The module exposes students to language planning theories and processes. These are then applied to the Zimbabwean situation as far as language planning and policy are concerned.

BSOT205 Botsoiriri bahongola (Creative writing)
The module equips students with expertise in creative writing. This is a practical module that talks through the various processes of creative works in composition writing, poetry writing, and the writing of novels, short stories and plays. Students should be able to produce a tangible piece of creative work.

BSOT206 Moseanooaleleme (Dialects)
The module seeks to expose students to the concept of dialectology both regional and social dialects. The students apply these concepts in the study of Sesotho dialects.

SIGN LANGUAGE

BSL203 Zimbabwean Sign Language 2
The module seeks to develop reflective schoolteachers who are able to use ZSL grammar and vocabulary with sufficient accuracy to participate effectively in most formal and informal conversations on social and work topics. Such teachers would have spontaneous elaboration, when appropriate, on all familiar topics and unfamiliar topics alike. Their vocabulary base would be broad and conversation would be fluent and shared. There is evidence of some colloquial use and cultural references. The teachers would be expected to develop very good to excellent topics. The teachers would be able to use signs, finger- spelling, numbers, and ZSL grammar with superior native-like fluency and accuracy on all conversational levels. These superior signers would use the language with complete flexibility and intuition acceptable by well-educated native speakers. The teachers would be expected to use their wide range of vocabulary to develop ZSL for specific academic purposes at the different grade levels and to use the language in sign- bilingual education programmes.

BSL204 Sign Language Interpretation 1
This module provides an introductory overview of the profession of sign language interpretation as it initiates teachers of Zimbabwean Sign Language (ZSL) on the exciting journey to becoming ZSL interpreters. To this end, the module explores the foundations, principles and practices of translation and interpretation while paying particular attention to the professional code of ethics and other professional concerns.

BSL205 Sign Language Interpretation 2
The module assists students to put into practice the theories and principles they have acquired in BSL204 Sign Language Interpretation 1. The module assists the students to identify ways in which they as academics can interpret to and from English and at least one local language with ZSL as source and target language alternatively. Students are exposed to situations of spontaneous and prepared interpretation in academic, social and legal spheres. The interpretation is grounded on emerging professionalism and professionalisation in the field. These interpreters would be superior signers who use ZSL with complete flexibility and intuition acceptable by well-educated native speakers. The interpreters would be expected to use their wide range of vocabulary to interpret for specific academic purposes at the different grade/form levels and in social or legal situations.

BSL206 Disability Activism
The module develops appreciation of disabled people's organisations (DPOs) locally and internationally. It introduces principles and practices of activism to emancipate and empower people with disabilities as minorities. The module assists students to analyse the rationale and manner in which they as academics can lead disability activist practices in an environment that is largely oblivious to the unintended outcomes of its interventions for people with disabilities. The analysis is grounded on an emerging activist ethos that focuses on individual initiatives but is aimed at collectively protesting ableism and rethinking human rights, not only in the restricted area of education but in a democratic, extended sense for people with disabilities in society generally. The module, therefore, discusses ableism in education in Zimbabwe before analysing emergent activism in DPOs in general. Students are expected to identify oppressive practices in these specific educational or social situations for people with disabilities and engage in practical, results-oriented activism that fronts the people with disabilities themselves.

SOCIAL STUDIES

BSS204 World Political Systems
The module focuses on the evolvement of world political systems; Greek and Roman origins of concepts of democracy; Western political thinkers and the evolution of democratic institutions; liberal democracy and constitutionalism; communism and socialism; militarism and dictatorship; global unity; regional groupings and integration.

BSS205 Poverty and development
The module seeks to develop an integrated approach to the theory and practice in developmental issues, with an emphasis on the contemporary relevance and application of the development agenda. The module equips students with theoretical knowledge, skills, values and attitudes that can enable them to make an important contribution to development as practitioners or advisors. The module starts by examining the contested meaning of the concept, development; the end of World War II and the development agenda; and, development and labelling. The module then discusses theories of development; aid, inequality and development; globalisation; and, development challenges for Independent Sub-Saharan Africa.

BSS206 Human Rights Education
The module examines the foundations and definition of human rights: legal, philosophical and political perspectives of human rights, the nature of human rights- civil, political, social and cultural rights, and the functions of and key problems in human rights.

SCIENCE AND TECHNOLOGY

BST204 Genetics and Evolution
The module deals with Mendelian experiments and problems; sex determination; blood groups; Molecular genetics- DNA; protein synthesis; mutations

BST205 Climatology and Geomorphology
The module introduces students to the concepts and Approaches to the study of climatology; atmospheric composition; vertical distribution of temperature and pressure; atmospheric stability and instability; atmospheric moisture; Ttheories of rainfall formation; air circulation models; indigenous methods of weather forecasting; developments and concepts in geomorphology; plate tectonics; factors and processes in landform development.

BST206 Issues in Biotechnology
The module seeks to guide students on the scope of biotechnology; Food biotechnology; medical biotechnology; agricultural biotechnology; industrial and environmental biotechnology; hazards and benefits of biotechnology**.**

BST207 Issues in Public Health
The module focuses on human health-water borne and air-borne diseases; transmissions and prevention strategies; ways of disposing wastes in rural and urban areas; role of drugs in curing diseases.

BST208 Forces and Magnetism
The module deals with the interaction of forces; magnetic force, attraction or repulsion that arises between electrically charged particles because of their motion. It is the basic force responsible for such effects as the action of electric motors and the attraction of magnets for iron.

BST209 Climate Change and Adaptation
The module focuses on how climate varies over time either due to natural variability or as a result of human activity. Impact, adaptation and vulnerability to climate change; food security.

MATHEMATICS

BMA204 Mechanics 1
This module focuses on vectors and forces, equilibrium, Newton's laws of motion, kinematics and dynamics, projectiles, Work, energy and power, momentum and impacts, circular motion simple harmonic motion, oscillations, and orbits.

BMA205 Numerical Methods
The module focuses on errors, matrix norms, Gaussian elimination with scaled pivoting, Jacobi method, Gauss-Seidel method, numerical differentiation and integration.

BMA206 Statistics

The module focuses on measurements of scale, measures of central tendency and dispersion, central limit theorem order statistics, estimation theory, and hypotheses testing.

RELIGIOUS AND MORAL EDUCATION

BRME203 Christianity in the Contemporary Context
The module examines the history, beliefs and practices of Christianity, churches responses to social issues such as prejudice and discrimination, homosexuality, feminism, prosperity gospel, drug abuse and globalisation.

BRME204 Studies in Judaism
The module focuses on the origin and historical development, foundational texts, central beliefs, festivals, sacred places and practices in Judaism.

BRME205 Islam: Faith and Practice
The module examines Islam's origins, historical development, sacred books, central beliefs and practices. It assesses the significance of studying the beliefs and practices of Muslims in Zimbabwe's multi-cultural schools.

BRME206 Religion and Conflict Resolution in Zimbabwe
The module discusses the relationship between religion and conflict resolution - family, church, ethnic, class, national, international conflicts and peace building.

BRME207 Studies in African Initiated Churches in Zimbabwe
The module discusses the growth and nature of African Initiated Churches (AICs) in Zimbabwe. It examines the teachings, beliefs and practices of AICs. The module assesses the interface between AICs and emerging issues such as health, the environment, human rights and so forth.

COMPUTER SCIENCE

BCS204 Internet and Web Design
This module introduces The World Wide Web, The Internet and Mark-up (HTML), Style: CSS, User experience and Design principles, Dynamic Web content development with PHP, PHP file includes, development of PHP web applications, python scripts, web security and web content management systems.

BCS205 Assessment in Computer Science Education
The module introduces the nature of measurement, assessment and evaluation skills, validity and reliability of measurement in computer science. Measurement and debugging errors. Types of measurement and assessment. Programme evaluation and models of evaluation. Application of computers in assessment of tasks in learning processes.

BCS206 Software Engineering

This module introduces software engineering techniques and principles for software projects. It includes software engineering concepts, software project management, techniques of software engineering, process models, The SDLC; requirements specification OO analysis and design, and conceptual modelling.

PHYSICAL EDUCATION

BPE203 Sport Management and Administration
The module equips students with skills in the management and administration of sport.

BPE204 Socio-Psychology of Sport
The module exposes learners to the relationships between psychology, social relationships and sport.

BPE205 Biomechanics of Sport
The module equips students with biomechanical terms and their application in physical education, force and its effects, levers and types of levers and their functions**.**

BPE206 Sport Injuries
The module exposes learners to sport medicine, classification, management and treatment of sport injuries using modern and indigenous methods.

BPE207 Field and Track Athletics
The module aims at equipping students with the basic knowledge of what athletics entails and further information dwells on the practical components.

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN EARLY CHILDHOOD DEVELOPMENT AND CHILD PROTECTION (EDU60)

Duration:	2years
Minimum Credit Load:	240
Maximum Credit Load:	300
Maximum MBKs Credit Load:	192
ZNQF Level:	8

1. PURPOSE OF THE PROGRAMME

To develop in candidates a high level of awareness and understanding of early childhood development in socio-cultural contexts with respect to children's provisional and protective rights. To produce specialists who are innovative and versatile in lesson delivery and the production of instructional materials in creative and sustainable ways to transform the teaching and learning experiences into real-life experiences.

2. ENTRY REQUIREMENTS

Normal Entry

Teaching Diploma in Education with specialisation in Early Childhood Development/ Infant Education or Primary Education or an equivalent from an accredited and recognised institution.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Early Childhood Development and Learning

Specialist Focus:

Training teachers in Early Childhood Development and Child Protection and emphasising children's rights and protection, the physical, social, intellectual, emotional and moral development of learners through innovative and sustainable methods based on current trends.

Orientation:

The teaching and learning process is driven by critical thinking, innovation and the development of entrepreneurial skills, culminating in the production of heritage-based goods and services in the context of early childhood development.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates can be employed as supervisors, infant care unit managers, teachers, education officers, curriculum developers, consultants, entrepreneurs, project implementers etc.

5. PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, and virtual lessons in various forms such as Google classes, seminars, group tasks, research projects, and individual independent study.

Assessment Methods:

6. LEARNING OUTCOMES

- Offer an in-depth knowledge and a more up–to–date focus on early childhood

  development protective and provisional rights to teachers who have basic qualifications in child development.

- Produce teacher researchers sensitive to the dynamic contexts of child development in the 0–8-year group, through needs assessment, reflective analysis and rationalisation.
- Inculcate teachers critical, analytical and reflective skills to be effective decision-makers in their field through innovative and sustainable ways.
- Enhance the teachers' understanding of current curriculum theories and pedagogy in the design and implementation of child-centred, play-based and developmentally appropriate activities.

- Reinforce teachers' awareness of the developmental needs of children, their rights, laws policies and conventions that govern children's welfare and the educational trends in Early Childhood Development.
- Produce innovative early childhood personnel, who are well equipped with strategies for project implementation, and who take cognisance of required resources (human, financial & material), potential challenges and possible mitigation measures to the challenges.
- Instil in early childhood teachers, soft skills required at the workplace and in administrative positions, skills such as communication, problem-solving, critical analysis, leadership and teamwork.

7. GENERAL PROVISIONS

- For this programme, candidates shall study at least 23 modules.

  Each module is worth 12 credits except for the Research Project and Practicum which are worth 24 credits each.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9. PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations
A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations or 'repeat' or 'withdraw'.
If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.
'Withdraw' means that the student shall withdraw from the university.
For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.
'Carry over' means carry over modules from the previous level to the subsequent level.
Retake means redo module(s) that failed in the previous semester within the same level.

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels.

13. PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
BCHS131	Culture and Heritage Studies	12
ECDP101	Psychological and Sociological Foundations of Early Childhood Development	12
ECDP102	Historical and Philosophical Foundations in Early Childhood Development	12
ECDP103	Curriculum Planning, Designing and Models in Early Childhood Development	12
BED133	Information and Communication Technology in Education	12
ECDP104	Child Protection Conventions, Laws and Policies	12

Level 1 Semester 2

BED131	Research Methods and Statistics	12
ECDP105	Theories of Child Development and Learning in Early Childhood	12
ECDP106	Teaching, Assessment and Evaluation in Early Childhood Development	12
ECDP107	Heritage and Civic Education in Early Childhood Development	12
ECDP108	Contemporary Issues and Trends in Early Education Development	12
ECDP109	Science, Technology, Mathematics and Innovation in Early Childhood Development	12

Level 2 Semester 1

ECDP201	Language and Literacy in Early Childhood Development	12
EDGS201	Gender Studies for Educators	12
ECDP202	Entrepreneurship for Early Childhood Development Educators	12
ECDP203	Practicum	24
ECDP204	Financing and Managing Early Childhood Development Projects	12
BEFM231	School Administration and Financial Management in Education	12

Level 2 Semester 2

ECDP206	Guidance, Counselling and Conflict Resolution in Early Childhood Development	12
ECDP207	Nutrition, Health and Safety in Early Childhood Development	12
ECDP208	Inclusive Education and Children at Risk in Early Childhood Development	12
ECDP209	Play, Creativity and Innovation in Early Childhood Development	12
ECDP210	Management of Early Childhood Settings	12
BED202	Research Project	24

14. MODULE SYNOPSES

BCHS131 Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

ECDP101 Psychological and Sociological Foundations of Early Childhood Development

The module is designed to equip students with the requisite knowledge of selected psychological paradigms, theories and processes that will enable them to comprehend possible implications and applications in teaching and learning. The module

also introduces students to the Sociological theories and perspectives that influence the teaching and learning practices in ECD. The module aims to apply sociological insights, methods and discipline to the study of educational and social problems that are of concern to Early Childhood Development and society at large.

ECDP102 Historical and Philosophical Foundations in Early Childhood Development

The module tracks the development of early childhood education. The module further exposes students to the historical perspectives and trends in early childhood education. This module also examines different schools of philosophy and how they influence educational practice in general and early childhood education in particular. The evolution of ECD from the Scandinavian and Western Movement, pre-colonial era to the present day shall be explored. It forms the base of the interactive process where the class operates as a community of inquiry.

ECDP103 Curriculum Planning, Designing and Models in Early Childhood Development

The main thrust of this module is on the nature of early childhood curriculum. Particular attention is paid to curriculum planning and design and the implication these processes have on implementation. Theories of curriculum planning and design are critically analysed. Models specific to early childhood curricula such as Reggio Emilio, Whariki, Highscope and Developmentally Appropriate Practices will be explored.

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the Internet of Things and emerging technologies and their application in classroom teaching.

ECDP104 Child Protection Conventions, Laws and Policies

This module provides students with a working knowledge of relevant conventions, laws, policies, regulations and research related to child welfare protection. Students examine the relevance of statutes in different cultural, historical, socioeconomic developmental contexts. Students apply the knowledge to create safety nets for enabling optimum child growth, learning and development. Global, regional and national statutes shall be explored in relation to their impact on child development and wellness.

BED131 Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

ECDP105 Theories of Child Development and Learning in Early Childhood

This module exposes students to theories of child development and learning to address developmental concepts as they relate to early childhood development. The module exposes students to further theoretical knowledge which informs their understanding of the development of young children in different domains. Theories specific to early infant and toddler development such as Macmillan, Stern and Mahler's shall be explored.

ECDP106 Teaching, Assessment and Evaluation in Early Childhood Development

The module exposes students to different tools of assessment and evaluation used in early childhood development. Emphasis is on the design and use of these tools and above all how assessment information is used for planning and structuring classroom instruction. The module includes different forms of assessment. Students shall be exposed to methods of assessing learners in various developmental domains through the use of various authentic assessment techniques and readiness assessments. The assessment techniques shall inform Developmentally Appropriate Practices (D.A.P) in ECD teaching and learning.

ECDP107 Heritage and Civic Education in Early Childhood Development

The module empowers students to formulate themes through which the Early Childhood Development learners are made aware of themselves as individuals. It exposes students to values and attitudes that enhance co-existence of citizens as well as enhancing their appreciation of the physical and social environment. It aims at equipping the students with skills to develop pro-social behaviour among learners. Values and attitudes that are developed include respect for self, others, elders and the dead, patriotism and hard-working among others.

ECDP108 Contemporary Issues and Trends in Early Childhood Development
This module is designed for undergraduate candidates specialising in Early Childhood Development. Specifically, it highlights the relationship between the national and global trends and issues in Early Childhood Development, both past and present. Further, it examines the current trends and developments in Early Childhood Development. The module focuses on childhood issues that affect development such as child-rearing practices, bedwetting, and childhood diseases. This will in turn help students to appreciate the strengths, challenges, innovations and reforms in Early Childhood Development both at national and international levels.

ECDP109 Science, Technology, Mathematics and Innovation in Early Childhood Development
This module is designed for students to undertake an in-depth study of philosophical considerations, theoretical perspectives and pedagogical issues in Science and Mathematics in Early Childhood Development. The module equips students with skills on how to design and develop an innovative curriculum for innovation and industrialisation. It further exposes students to ethno-mathematics concepts. Students shall be exposed to theories and technologies that explore numeracy development.

ECDP109 Language Arts in Early Childhood Development
The module enables students to engage in an in-depth study of the concept of language, language acquisition theories and how young children master receptive and expressive language skills. It also enables students to design child-centred language arts environments and capacitates them to effectively communicate using national and other languages. Language aspects such as theories of language development, emergent literacy, language readiness and suitable assessment techniques shall be explored in the module.

EDGS231 Gender Studies for Educators
The module aims at providing students with an introduction to the concept of gender and its significance to education. The module exposes students to how education spaces construct gender differences; the implications of these differences on learners and how schools can close the gender gaps. Key issues to be studied include theoretical perspectives on gender, cultural dimensions of gender, and deconstruction of gender and their implications for the education sector.

ECDP202 Entrepreneurship for Early Childhood Development Educators
The module equips students with the knowledge and entrepreneurial skills required to set up and successfully operating and managing different forms of Early Childhood Development enterprises to address the needs of communities and the education sector in an innovative and creative manner. The students shall be equipped with skills to professionally sustain business.

ECDP203 Practicum
The module equips students with innovative skills in working with communities. It further provides students with opportunities to put theory into practice. The students shall practice in an area of choice such as the ECD class, the education offices and other government departments dealing with childhood issues. The module also provides the students with an opportunity to implement an ECD related community project.

ECDP204 Financing and Managing Early Childhood Development Projects
This module provides Early Childhood educators with a working knowledge of the financial aspects of managing an Early Childhood Development (ECD) school. It emphasises social justice in early childhood through examining laws, policies and models related to budgeting and finance. Students are expected to plan, design sustainable budgets and maintain financial records in early childhood development schools.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

ECDP206 Guidance, Counselling and Conflict Resolution in Early Childhood Development
This module equips the students with the requisite knowledge on how to help the early childhood learner in his or her formative years to understand, accept and overcome problems that may confront them in their lives. The student will explore in-depth theories underpinning counselling at the Early Childhood Development level. Counselling theories like psychoanalysis, behaviourists theories, humanistic counselling, crisis counselling and multicultural counselling will be explored. The related requisite counselling techniques and the expected qualities of a good counsellor will be critically exposed to the students.

ECDP207 Nutrition, Health and Safety in Early Childhood Development
The module reviews current concepts and issues in the field of health, safety and nutrition and their relationship to the growth and development of the young child. The module helps students to assist young children to develop good habits and attitudes, and to assume lifelong responsibility for their well-being.

ECDP208 Inclusive Education and Children at Risk in Early Childhood Development
This module develops students' understanding of policy issues in the provision of inclusive education in ECD. It empowers students with versatility and the ability to adapt to inclusive drives taking place in their communities. The module enables students to identify, assess, include and manage children with diverse needs. In addition, the module enables students to interpret conventions and policies at international, regional and national levels. The module further exposes students to the different intervention strategies suitable for different cultural practices that place children at different risks and how these could be minimised.

ECDP209 Play, Creativity and Innovation in Early Childhood Development
The module reviews the concept of play and the role of play in child development and learning. The module also engages students in an intensive study of theories of play, functions of play and issues on learning and development through play in indigenous and modern communities. The module instils essential knowledge, values and attitudes that promote the teaching and learning of Creative Arts and promote innovation in early childhood development.

ECDP210 Management of Early Childhood Settings
The module equips students with administrative, management and supervision skills in educational activities in the early years. Theories and applications in the areas of leadership, administration, motivation and policy studies are covered with a particular focus on mastering innovative strategies in the management process.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN PHILOSOPHY AND CRITICAL THINKING (EDU59)

Duration	2 years
Actual Credit Load	300
Minimum Credit Load	240
Maximum Credit Load	300
Maximum MBKs Credit Load	192
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

To develop in candidates an acute awareness and understanding of Philosophy and Philosophy of Education in different socio-cultural contexts and to produce specialists who are versatile, critical, creative and innovative.

2.0 ENTRY REQUIREMENTS

Normal Entry**:** Diploma in Education from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Philosophy of Education

Specialist Focus: The development of critical awareness in educators for continual educational development that is sensitive to sustainable development.

Orientation: Creating analytical educators who understand the pivotal role of educational ideas in the quest for social development, innovation and industrialisation

In their 1st Semester, students will be introduced to the University Innovation Hub where they will receive talks and participate in discussions on how to develop simple ideas into productive and innovative ventures.

In their 2nd and 3rd Semesters, the students will be required to take turns to visit and work in the University Industrial Park to get a feel of productive activities and industrial work and appreciate the philosophy of industrialisation.

Students are expected to use this exposure to initiate productive ventures in their schools of practice with school pupils, fellow teachers, and where possible, with the communities around the school.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, implementers of education programmes, lecturers in institutions offering education programmes, education inspectors, designers and developers of Primary, Secondary or Tertiary education curricula, consultants for educational programmes, curriculum planners, or researchers in education.

Further Studies: Master's and Doctoral Studies in Philosophy of Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Face-to-face and virtual lectures, tutorials, seminars, group tasks, research projects, and independent study

6.0 INTENDED LEARNING OUTCOMES

Students should become practitioners who:

- are familiar with pertinent issues in the field of education and are comfortable in the use of advanced data analysis tools and techniques that assist in finding sustainable and innovative solutions using publications and other verifiable outcomes;
- possess verifiable skills in designing and implementing monitoring and evaluation tools that serve to improve their practice, informed by clear and relevant philosophical concepts and theories;
- exhibit critical thinking skills that inform their day-to-day practice and the ability to impart such skills to their learners;
- show sound creative, innovative and entrepreneurial skills that enable them to identify viable business opportunities, establish enterprises, and commercialise patents/copyrights resulting from their philosophical theory and practice;
- find inspiration and guidance from salient philosophies and Critical Pedagogy to improve their educational practice and professional ethics;
- are able to use the latest ICT technologies to develop problem-solving skills and critical thinking in their charges in ways that embrace indigenous knowledge systems.

7.0 LEARNING OBJECTIVES

By the end of the programme, students should be able to:

- identify pertinent issues in the field of education and apply advanced methodologies and data analysis tools and techniques to conduct research that leads to sustainable, innovative solutions, publications and other verifiable outcomes;
- design and implement monitoring evaluation tools that assure the quality of teaching of Philosophy of Education and Professional Development issues at all levels of education and training;
- translate research output into policy briefs that are readily adaptable by practitioners and policy-makers in the field;
- demonstrate sound entrepreneurial and management skills, that can be applied in running educational institutions, identifying business opportunities, establishing enterprises, and commercialising patents/copyrights resulting from research and development activities;
- evaluate, review and design curricula that are guided by Critical Pedagogy and observance of innovative and ethical practices in the field of Philosophy of Education and Professional Development;

- design, implement, monitor and evaluate innovative educational curricula and policies that foster problem-solving and critical thinking skills, and embrace indigenous knowledge systems and the latest technologies;
- integrate relevant research and theory to develop a broad repertoire of the Philosophy of Education and Professional Development-appropriate pedagogies and strategies and embrace the latest developments in ICT.

8.0 GENERAL PROVISIONS

Each module is worth 12 credits except for the research project which is worth 24 credits.

9.0 PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment.

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

10.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

11.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations' or 'repeat' or to 'withdraw'.

If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.

'Withdraw' means that the student shall withdraw from the university.

For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

'Carry over' means carry over modules from the previous level to the subsequent level.

Retake means redo module(s) failed in the previous semester within the same level.

12.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

13.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels.

MODULE SYNOPSES

BCHS131 Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to Unhuism/Ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Students explore landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BPCT101 Psychology of Teaching and Learning

The module introduces students to the theories of human development and theories of learning that inform the instructional process and promote academic success for all learners. This shall enable them to understand individual learning styles and the relevant teaching styles as they work with all types of learners, including both those who are gifted and talented and those who have learning disabilities.

BPCT102 Trends and Traditions in Philosophy of Education

This module provides students with a basic theoretical grounding in Philosophy and Philosophy of Education. Students shall be exposed to modes of thinking and analysis that are unique to the Philosophy of Education. Foundational issues, such as the historical development, trends and traditions of human thought are explored.

BPCT103 Sociological Perspectives of Education

The module introduces students to four main sociological perspectives and exposes them to basic sociological concepts that include socialisation and dynamics that relate to social interaction. The interrelationships between the state, the education institutions, and the citizens are built into the module to provide students with the necessary social interaction skills needed to guide the process of learning in the classroom.

BPCT104 History of Education in Africa and Zimbabwe
Students are given an opportunity to analytically and critically explore the traditions, patterns and dynamics in the historical development of education in Africa and Zimbabwe. Object lessons that inform the present and future trajectories of educational development in Africa are also investigated. The module extensively encompasses the development of education in pre-colonial, colonial and post-colonial Africa.

BED133 Information Communication Technology in Education
This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics to be covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BPCT105 Critical Thinking, Creativity and Innovation in Education

This module exposes students to the twin processes of critical thinking and creativity. It allows students to explore the importance and usefulness of creative and critical thinking in modern problem -solving based learning and living environments. The module draws students to appreciate the critical symbiotic relationships between critical thinking, creativity and innovation in and outside the educative process.

BPCT106 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BPCT107 Philosophical Perspectives in Inclusive and Special Needs Education
The module explores different philosophical views of Special Needs and Inclusive education. It analyses the philosophical basis of such education and compares the different ways of assisting both the learners with challenges and those with exceptionalities while critiquing some special needs education practices and theories.

BPCT108 African Philosophical Thought and Education
The module introduces students to the meaning, history and content of African philosophy and African philosophic thought systems. It explores the contested space of the existence and the nature of African philosophy and allows students to examine the implications of African thinking to educational practice in the contemporary world.

BPCT109 Theories of Social Justice and Educational Inequalities
This module looks at various theories of social justice and compares their implications for educational practice. It brings to the fore the numerous instances of educational inequalities that exist in learning environments. Students should appreciate the use of social justice principles to achieve fairness and equality of educational opportunity.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

ENTIE232 Entrepreneurship and Innovation in Education
The module exposes students to entrepreneurship and innovation theories in educational contexts. The module provides students with the skills needed to develop, create and manage businesses. Emphasis is placed on career development through a variety of experiential activities and projects, which include the production of goods and services.

EDGS231 Gender Studies for Educators

The module aims to provide students with an introduction to the concept of gender and its significance to education. The module exposes students to how education spaces construct gender differences, the implications of these differences on learners and how schools can close the gender gaps. Key issues to be studied include theoretical perspectives on gender, cultural dimensions of gender, and deconstruction of gender and their implications for the education sector.

BPCT201 Philosophy for Children (P4C)

The module focuses on the need to develop philosophical thinking in young children. It introduces students to the Philosophy for Children (P4C) movement and allows them to make efforts to design materials to help children develop thinking skills using stories that are specially crafted for the purpose.

BPCT202 Critical Pedagogy and Education

The module traces the origins of Critical Pedagogy in Critical Theory and follows its development to modern times. It makes students question the overt and covert functions of education. Students are exposed to alternative critical pedagogies that may make a difference in the lives of many disadvantaged and marginalised learners.

BPCT203 Freedom, Authority and Responsibility in Education

The module examines the concepts of freedom and authority. It lets students appreciate the close relationship between the two in educational practice as well as the need to achieve proper balance between them. The module further analyses how a balance of authority and freedom in education circles can be instrumental in developing a healthy sense of responsibility in children.

BPCT204 Education and Sustainable Development

The module interrogates the relationship between education and socio-economic development. It equips students with tools that are useful in enhancing development, e.g. creativity, innovation, production and entrepreneurship. Students assess various philosophical perspectives on development and find ways of making education serve development.

BPCT205 Philosophical Analysis of Human Rights Issues in Education

This module provides students with an opportunity to deploy the philosophical theories, concepts and modes of analysis to attain a critical understanding of human rights issues in education. The students shall also explore the philosophical foundations and historical development of human rights discourses and practices. The module allows students to identify and analyse issues such as the categories of human rights, and international and national legal instruments pertaining to human rights.

BPCT206 Philosophical Inquiry and Education

Students are given an opportunity to develop their understanding and skills in philosophical inquiry and research. This is a seminar/workshop-based module which creates space for students to deploy philosophical research methods to explore self-chosen topics in education.

BPCT207 Philosophy of Knowledge and Education

The module explores the meaning of knowledge and the philosophical discourse surrounding Epistemology. Students examine different types of knowledge systems, including the major orientations of African, Eastern and Western perspectives on knowledge. The concepts of scepticism and the 'epistemology of ignorance' are examined in relation to their application in education.

BPCT208 Social Justice and Education for Citizenship

The module provides students with a firm grounding in the interplay between social justice and citizenship education. Students explore, through multiple theoretical lenses, historical and contemporary instances of social injustices in education. Students shall also interrogate theoretical frameworks that inform citizenship education, examining issues such as the nature of democracy, democracy in education, human rights and peace education.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the

resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN SOCIOLOGY, HERITAGE AND CIVIC STUDIES (EDU58)

Duration	2 years
Actual Credit Load	300
Minimum Credit Load	240
Maximum Credit Load	300
Maximum MBKS Credit Load	192
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

This programme is designed for candidates who have a teaching qualification at diploma or certificate level. The major goal is to develop in candidates a high level of awareness and understanding in the area of Sociology of Education and Heritage. The graduates should also understand the interconnection between society, heritage and the education process to be able to proffer solutions to social problems.

2.0 ENTRY REQUIREMENTS

Normal Entry**:** Diploma in Education/certificate in education from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Sociology, Heritage and Civic Studies

Specialist Focus: The produce educators who understand the importance of society, appreciate social diversity and have the skills and knowledge to mould learners into responsible and productive citizens.

Orientation: Creating school educators who appreciate the diversity in society and understand the influence of this diversity on the academic achievement of learners.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as specialist teachers in schools, supervisors of education programmes, lecturers in institutions offering teacher education programmes, education inspectors, designers and developers of education curricula, consultants for educational programmes, or researchers in education.

Further Studies: Master's and Doctoral studies in Sociology of Education Heritage and Civic Studies.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, virtual lecturers and Google classes seminars, group tasks, panel discussions, research projects, and independent study.

6.0 LEARNING OUTCOMES

- Pertinent issues in the field of education and apply relevant methodologies and analysis tools to conduct research that leads to sustainable and innovative solutions, publications and other verifiable results;
- Design and implement monitoring evaluation tools that assure the quality of teaching in the school.
- Translate research output into policy action programmes that are readily adoptable by practitioners and policy-makers in the field.
- Demonstrate sound entrepreneurial and management skills, that can be applied in running schools, identifying school and community-based entrepreneurial opportunities that can be commercialized to aid school development.
- Evaluate, review and design curricula that are guided by the philosophy of *Unhu/Ubuntu* and observance of safe and ethical practices in the field of education.

- Design, implement, monitor and evaluate innovative educational curricula and policies that foster problem-solving and critical thinking skills, and that embrace indigenous knowledge systems and the latest technologies.
- Integrate relevant research and theory in education and embrace the latest developments in Information Communication Technology.

7.0 GENERAL PROVISIONS

The programme consists of at least 24 modules. Each module is worth 12 credits except for the research project which is worth 24 credits. All modules are compulsory.

8.0 PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10. FAILURE TO SATISFY EXAMINERS

A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations or 'repeat' or 'withdraw'.

If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.

'Withdraw' means that the student shall withdraw from the university.

For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

'Carry over' means carry over modules from the previous level to the subsequent level.

Retake means redo module(s) failed in the previous semester within the same level.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 50% for each of the two levels.

14.0 MODULE SYNOPSES

BCHS131 Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BSH101 Sociological Foundations in Education

The module introduces students to four main sociological perspectives which include functionalism, Marxism, interactionism and feminism. It also exposes them to basic sociological concepts that include, sociological imagination, socialisation and to dynamics of social interaction. The interrelationships between the state, the education institutions and the citizens are built into the module to provide students with the necessary social interaction skills needed to guide the process of learning in the classroom.

BSH102 Introduction to Civic Education

This module introduces the student to concepts of civic education and the justification for the teaching of civic education in schools. The module will teach skills that will enable graduates to impart civic skills to learners in schools. It focuses on good citizenship, democracy civil law and social justice and interrelationships. The module enables students to understand the relationship between the law of law and human rights and social interaction in an educational setting.

BED133 Information Communication Technology
This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BSH103 Psychology of Teaching and Learning
The module introduces students to the theories of human development and theories of learning that inform the instructional process and promote academic success for all learners. This shall enable them to understand individual learning styles and the relevant teaching styles as they work with all types of learners, including both those who are gifted and talented and those who have learning disabilities.

BSH104 Trends and Traditions in Philosophy of Education
This module provides students with a basic theoretical grounding in Philosophy and Philosophy of Education. Students are exposed to modes of thinking and analysis that are unique to Philosophy of Education. Foundational issues such as the historical development, trends and traditions of human thought shall be explored.

BSH105 Studies in Inclusion and Exclusion
Students are introduced to the concepts of inclusion and exclusion in the context of education. Students will also learn about the theories of inclusion and exclusion in education. The module considers case studies, narratives and life stories to illustrate the meaning behind the theory and policy of inclusion and exclusion. Experiences of young people in relation to issues such as refugee status and asylum seekers, affiliation to religious sects, language and gender will be analysed in the context of inclusion and exclusion.

BSH106 Deviance and Social Control in Diverse Social Contexts
The module exposes learners to varying definitions of the concept of deviance as well as theoretical explanations of deviance in varying social contexts. The module discusses and critiques theories of deviance, and causes of deviance among learners as well as discusses child friendly strategies for curbing deviance among learners. Students also discuss the link between deviance and productivity in society.

BSH107 Emerging Social Issues and Education
This module focuses on contemporary issues in education with particular reference to the influence of pandemics like COVID -19 and HIV on education provision. Topics include parenting, the effects of globalisation on children's socialisation and identity formation are discussed. Students are introduced to new and innovative ways of teaching in the new normal as well as the challenges related to education in the new normal

BSH108 Heritage, Collective Identity and Education
The module analyses the concepts of heritage in relation to collectiveidentity and education. It attempts to justify the importance of heritage in the construction of a collective identity. Topics to be covered include forms of heritage, and assessments of social and economic values of heritage. Examining people-centred approaches to heritage preservation, the roles of education, government and civil society in preserving heritage. An analysis of the activities of international bodies like UNESCO in heritage preservation will also be undertaken and the differences between UNESCO' activities and conventions on heritage in different countries.

BED131 Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BSH109 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BSH201 Interface between Family and Academic Achievement
The module is designed to help students appreciate the link between family and learners' achievement. Students will be made to understand the importance of family contexts to academic achievement. To this end topics to be discussed include the nurture-nature debate, deprivation theories, social and cultural capital, socio-ecological theories, parental involvement and parenting, parental status and parenting styles will be explored.

BSH202 Cyber Culture and Education
The module focuses on cultural perspectives on the use of information and communication technologies in educational settings. Social problems relating to the use of information communication technologies in educational settings will be studied. Particular emphasis will be laid on cyber bullying in institutions of learning. Strategies for developing a positive cyber culture will be explored.

BSH203 Education, Technology and Social Change
The module explores the concept 'social change and interrogates the role of education and technology in driving social change. The module also discusses the need for educator involvement in transforming education systems to adapt young people to the challenges of a global digital knowledge economy. Factors that influence social change and the place of educators in the discourse on social change are discussed. Strategies for positive social change will also be studied.

EDGS231 Gender Studies for Educators
The module aims to provide students with an introduction to the concept of gender and its significance to education. The module exposes students to how education spaces construct gender differences and the implications of these differences on learners and how schools can close the gender gaps. Key issues to be studied include theoretical perspectives on gender, cultural dimensions of gender, and deconstruction of gender and their implications for the education sector.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills of budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

ENTIE232 Entrepreneurship and Industrialisation in Education
The module exposes students to entrepreneurship and innovation theories in educational contexts. The module provides students with the skills needed to develop, create and manage businesses. Emphasis is placed on career development through a variety of experiential activities and projects, which include the production of goods and services. Topics to be covered include digital preservation of indigenous heritage in schools, innovative approaches to cultural heritage management by schools, the role of the educator in innovation and constraints in innovation in education.

BSH204 Mass Media, Culture and Education
The module unpacks the concept of mass media and interrogates the influence of the different types of mass media on education. Educational factors influencing the use or under-use of mass media in schools will be studied. Strategies for

the integration of some forms of mass media into the teaching and learning process shall also be discussed. Challenges experienced by educators in integrating the mass media into learning contexts will also be explored.

BSH205 Classrooms as Spaces for Creativity

In this module, students discuss the need for creativity in the classroom. Strategies for enhancing creativity in the classrooms are discussed as well as barriers to creativity in the classroom.

BSH206 Introduction to Gender, Sexuality and Education

The module explores the concepts of gender, and sexuality and how the different perceptions of these concepts influence education. Students learn about the different perceptions of gender and sexuality in African contexts. The module also allows the students to explore the different theoretical perspectives which underpin issues of gender differentiation and the educational attainment of learners.

BSH207 Teachers in the Innovation and Industrialisation Discourse

The module explores the role of the teacher in the discourse on innovation and industrialisation. Strategies for igniting the desire for innovation among students will be explored. Some of these strategies include industrial excursions, and student involvement in projects. Topics to be covered will include learning to labour gracefully, cultural heritage and innovation, innovation, entrepreneurship and business ethics.

BSH208 Social Differentiation and Education.

The module introduces students to the concept of social differentiation. Students shall critically analyse how race, ethnicity, wealth and education status determine social status. Topics to be studied include mobility, the nature-nurture debate, and ascribed and prescribed statuses. Determinants of upward and downward social mobility will also be explored.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN EARLY CHILDHOOD DEVELOPMENT AND CHILD PROTECTION (EDU06)

Duration	4 years
Actual Credit Load	528
Minimum Credit Load	480
Maximum Credit Load	540
Total MBKs Credit Load	384
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

To develop in candidates a high level of awareness and understanding of early childhood development in socio-cultural contexts, with respect to children's provisional and protective rights. To produce specialists who are innovative and versatile in lesson delivery and the production of instructional materials in creative and sustainable ways to transform the teaching and learning experiences into real-life experiences.

2.0 ENTRY REQUIREMENTS

Normal Entry**:** At least two A'level passes

Mature entry: Refer to Section 3.3 of the General Academic Regulations for Undergraduate programmes.

3.0 Programme Characteristics

Areas of Study: Early Childhood Development and Learning.

Specialist Focus: Training teachers in Early Childhood Development and Child Protection and emphasising children's rights and protection, the physical, social, intellectual, emotional and moral development of learners through innovative and sustainable methods based on current trends.

Orientation: The teaching and learning process is driven by critical thinking, innovation and the development of entrepreneurial skills, culminating in the production of heritage-based goods and services in the context of early childhood development.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as supervisors, infant care unit managers, teachers, education officers, curriculum developers, consultants, entrepreneurs and project planners, field officers, welfare officers, etc.

Further Studies: Master's and Doctoral Studies in Early Childhood Development.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, and virtual lessons in various forms such as Google classes, seminars, group tasks, research projects, and individual independent study.

6.0 LEARNING OUTCOMES

- Offer in-depth knowledge and a more up-to-date focus on Early Childhood.

  Development protective and provisional rights for teachers who have basic qualifications in child development.

- Produce teacher researchers sensitive to the dynamic contexts of child development in the 0–8-year group through needs assessment, reflective analysis and rationalisation.
- Inculcate in teachers critical, analytical and reflective skills to be effective decision-makers in their field through innovative and sustainable ways.
- Enhance the teachers' understanding of current curriculum theories and pedagogy in the design and implementation of child-centred, play-based and developmentally appropriate activities.
- Reinforce teachers' awareness of the developmental needs, their rights, laws, policies and conventions that govern children's welfare and educational trends in Early Childhood Development.
- Produce innovative early childhood personnel, who are well equipped with strategies for project implementation, and who take cognisance of required resources (human, financial & material), potential challenges and possible mitigation measures to the challenges.
- Instil in early childhood teachers, soft skills required at the workplace and in administrative positions, skills such as communication, problem-solving, critical analysis, leadership and teamwork.

7.0 GENERAL PROVISIONS

- For this programme, candidates shall study at least 34 modules.
- Each module is worth 12 credits except for the Research Project which is worth 24 credits and Practicum which is worth 120 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

The assessment of a practical field module or project modules shall be based on written reports submitted to a Departmental Board.

All other modules shall be assessed by continuous assessment and formal examinations.

Continuous assessment shall constitute 40% of the final assessment,

Written examinations shall constitute 60% of the final assessment

To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

Students' progress automatically from semester one (1) to semester two (2) at each level except where Senate directs otherwise.

To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.

Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

A candidate who fails to satisfy the examiners may be required by the Senate to write 'supplementary examinations or 'repeat' or 'withdraw'.

If a student is repeating a module(s) he or she shall only be credited with the marks obtained during the repeat examination.

'Withdraw' means that the student shall withdraw from the university.

For the prescribed project candidates shall be informed in advance of the deadline for submission of such project.

'Carry over' means carry over modules from the previous level to the subsequent level.

Retake means redo module(s) failed in the previous semester within the same level.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

To be awarded a Bachelor of Education degree, a student must pass all modules.

The classification of all modules and degrees shall be as stated in Section 5 of the General Academic Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

The degree is weighted at 25% for each of the four levels.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
BCHS101	Culture and Heritage Studies	12
ECDPP101	Sociological Foundations of Early Childhood Development	12
ECDPP102	Psychological Foundations of Early Childhood Development	12
ECDPP103	Historical Foundations of Early Childhood Development	12

BED232	Research Project	24

14.0 MODULE SYNOPSES

BCHS131 Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

ECDPP101 Sociological Foundations of Early Childhood Development

The module introduces students to the Sociological theories and perspectives that influence teaching and learning in ECD. The module aims to enhance students' understanding of the sociology of education and be able to apply different strategies in solving sociological issues of socialisation, abuses, disease outbreaks, child trafficking and other educational and social problems that are of concern to Early Childhood Development and society at large.

ECDPP102 Psychological Foundations of Early Childhood Development

The module is designed to equip students with the requisite knowledge of selected psychological paradigms, theories and processes that enable them to comprehend possible implications and applications in teaching and learning. Theories of human development and learning shall be explored in relation to Early Childhood development principles and practices.

ECDPP103 Historical Foundations of Early Childhood Development

The module tracks the development of early childhood education both nationally and internationally. The module exposes students to the historical perspectives and trends in early childhood education in pre and post-independent Zimbabwe including policies and legislation which is in place to protect children from diverse backgrounds. Students acquire background information which forms the backbone of their understanding of other foundation disciplines.

CS131 Basic Communication Skills

The module is intended ideally for a one-semester on academic and business communication skills, which meets for three (3) hours per week. The module is aimed at assisting students to achieve their full potential through equipping them with the necessary communication skills essential for their studies as well as post university work experience.

BED133 Introduction to Information Communication Technology

This module guides students to critically and creatively apply concepts, principles, hardware and software associated with the infusion of information communication technology (ICT) in solving educational problems and meeting challenges in their roles as facilitators of learning. The module covers the fundamental concepts of computer and telecommunication uses in education. Its focus is on the application of ICTs as tools and resources for teaching and learning.

ECDPP105 Inclusive Practices and Emerging Issues in Early Childhood Development

This module develops students' understanding of policy issues in the provision of inclusive education in ECD. It empowers students with versatility and the ability to adapt to inclusive drives taking place in their communities. The module enables students to identify, assess, include and manage children with both diverse and special needs.

ECDPP106 Philosophical Foundations in Early Childhood Development

This module examines different schools of philosophy and how they influence educational practice in general and early childhood education in particular. The evolution of ECD from the Scandinavian and Western Movement, pre-colonial era to the present day shall be explored. It forms the base of the interactive process where the class operates as a community of inquiry.

ECDPP107 Curriculum Planning, Designing and Models in Early Childhood Development

The main thrust of this module is on the nature of early childhood curriculum. Particular attention is paid to curriculum planning and design and the implication these processes have on implementation. Theories of curriculum planning and design are critically analysed. Models specific to early childhood curriculum such as Reggio Emilio, Whawhirk, Highscope and Developmentally Appropriate Practices will be explored.

ECDPP108 Child Development and Life Skills

The module equips students with skills-based child development health education with emphasis on relevant skills for children's growth, development and survival. A multi-dimensional way of creating and maintaining healthy lifestyles and conditions through the development of knowledge, attitudes and skills using a variety of learning experiences, with an emphasis on participatory methods. Students are also equipped with important tools for child development, such as independent thinking, socialisation, and assertiveness.

ECDPP109 Child Protection Conventions, Laws and Policies

This module provides students with a working knowledge of relevant conventions, laws, policies, regulations and research related to child welfare protection. Students examine the relevance of statutes in different cultural, historical, socioeconomic developmental contexts. Students apply the knowledge to create safety nets for enabling optimum child growth, learning and development. Global, regional and national statutes shall be explored in relation to their impact on child development and wellness.

ECDPP110 Theories of Child Development and Learning in Early Childhood

This module exposes students to theories of child development and learning to address developmental concepts as they relate to early childhood development. The module exposes students to further theoretical knowledge which informs their

understanding of the development of young children in different domains. Theories specific to early infant and toddler development such as Macmillan, Stern and Mahler's shall be explored.

ECDPP111 Play as a process of learning in Early Childhood Development
The module reviews the concept of play and the role of play in child development and learning. The module also engages students in an intensive study of theories of play, functions of play and issues on learning and development through play in indigenous and modern communities.

ECDPP201 Contemporary Issues and Trends in Early Childhood Development
This module is designed for undergraduate candidates specialising in Early Childhood Development. Specifically, it highlights the relationship between the national and global trends and issues in Early Childhood Development, both past and present. Further, it examines the current trends and developments in Early Childhood Development. The module focuses on childhood issues that affect development such as child-rearing practices, bedwetting, and childhood diseases. This will in turn help students to appreciate the strengths, challenges, innovations and reforms in Early Childhood Development both at national and international levels.

ECDPP202 Creative Arts and Innovation in Early Childhood Development
The module exposes students to global competitive levels of creative and innovative skills which are the cornerstone of entrepreneurship. Essential skills in the design and development of new product services and processes are going to be explored. The module will enhance the students' ability to think and build upon the capacity of one's imagination to visualise new possibilities. Students' imagination will be ignited, their creative drives fostered, and their innovative thinking stimulated to generate and implement new ideas that are vital to the long-term economic interests of our nation's Early Childhood Programmes**.**

ECDPP203 Introduction to Competency Based Curriculum
This module is designed to equip ECD educators with the 21st-century teaching and learning systems for transformation. It provides students an overview of the history, theories, and contemporary influences of the Competence Based Curriculum (CBC) and pedagogical dimensions. The module exposes students to the structure of competency-based curriculum, the Learning Areas and the relationship with ECD world best practices such as Developmentally Appropriate Practice, inclusivity, community engagement and industrialisation.

ECDPP 204 Teaching, Assessment and Evaluation in Early Childhood Development
The module exposes students to different tools of assessment and evaluation used in early childhood development. Emphasis is on the design and use of these tools and above all how assessment information is used for planning and structuring classroom instruction. The module includes different forms of assessment. Students shall be exposed to methods of assessing learners in various developmental domains through the use of various authentic assessment techniques and readiness assessments. The assessment techniques shall inform Developmentally Appropriate Practices (D.A.P) in ECD teaching and learning.

ECDPP205 Visual and Expressive Arts in Early Childhood Development
The module examines visual arts theories, history, activities and experiences grounded under artistic expression, creative expression, historical and cultural context, aesthetic values, connections, relationships and application. Students also explore the Expressive Arts components such as music, dance and drama. The module helps students to implement Visual and Expressive Arts curriculum ideas for infants, toddlers, preschoolers and lower primary learners. It enables students to design, produce and market culturally sensitive learning materials.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

ECDPP206 Language Arts and Literacy in Early Childhood Development
The module enables students to engage in an in-depth study of the concept of language, language acquisition theories and how young children master receptive and expressive language skills. It also enables students to design child-centred language arts environments and capacitates them to effectively communicate using national and other languages. Language aspects such as theories of language development, emergent literacy, language readiness and suitable assessment techniques shall be explored in the module.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also

introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

ECDPP207 Science, Technology, Mathematics and Innovation in Early Childhood Development

This module is designed for students to undertake an in-depth study of philosophical considerations, theoretical perspectives and pedagogical issues in Science and Mathematics in Early Childhood Development. The module equips students with skills on how to design and develop an innovative curriculum for innovation and industrialisation. It further exposes students to ethno mathematics concepts. Students shall be exposed to theories and technologies that explore numeracy development.

ECDPP208 Instructional Media and Micro Teaching in Early Childhood Development

The module equips students with knowledge and skills in designing and constructing technologically oriented instructional media to facilitate students' achievement of instructional objectives in the learning process. It also equips students with skills to interpreting syllabi into schemes of work and lesson plans and carryout lesson delivery and evaluations. Through micro teaching the student to put theory into practice with a small group before taking up a full class during practicum.

ECDPP209 Pedagogy and Professionalism in Early Childhood Education

The module equips students with pedagogies which include teaching styles, feedback, and assessment. The module also enhances students' professionalism through the acquisition of the knowledge, skills, and practices those teachers must possess to be effective educators and also knowledge of policies, legislation and code of conduct that govern and safeguard the profession. Students are also going to be exposed to reflection of what is wrong, what is just, unjust, good and bad in terms of human behaviour in their professional contact.

ECDPP210 Entrepreneurship for Early Childhood Development Educators

The module equips students with the knowledge and entrepreneurial skills required in setting up and successfully operate and manage different forms of Early Childhood Development enterprises to address the needs of communities and the education sector in an innovative and creative manner. The students shall be equipped with skills to professionally sustain business.

ECDPP301 Preschool Practicum

The module equips students with innovative skills in working with communities. It further provides students with opportunities to put theory into practice. The students shall practice in Preschool classes. The module also provides the students with an opportunity to implement an ECD related community project.

ECDPP302 Infant Practicum

The module equips students with innovative skills in working with communities. It further provides students with opportunities to put theory into practice. The students shall practice in infant classes. The module also provides the students with an opportunity to implement an ECD-related community project.

ECDPP401 Financing and Managing Early Childhood Development Projects

This module provides Early Childhood educators with a working knowledge of the financial aspects of managing an Early Childhood Development (ECD) school. It emphasises social justice in early childhood through examining laws, policies and models related to budgeting and finance. Students are expected to plan, design sustainable budgets and maintain financial records in early childhood development schools.

ECDPP402 Heritage and Civic Education in Early Childhood Development

The module empowers students to formulate themes through which the Early Childhood Development learners are made aware of themselves as individuals. It exposes students to values and attitudes that enhance co-existence of citizens as well as enhancing their appreciation of the physical and social environment. It aims at equipping the students with skills to develop pro-social behaviour among learners. Values and attitudes that are developed include respect for self, others, elders and the dead, patriotism and hard-working among others.

ECDPP403 Nutrition, Health and Safety in Early Childhood Development

The module reviews current concepts and issues in the field of health, safety and nutrition and their relationship to the growth and development of the young child. The module helps students to assist young children to develop good habits and attitudes, and to assume lifelong responsibility for their well-being.

BEFM231 School Administration and Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

ECDPP404 Children at Risk in Different Socio- Cultural Contexts

This module explores factors that negatively impact development in different circumstances. Students examine the impact of exposure to multiple risk factors such as divorce, death, family structure, socio- economic background on development and learning. The module further exposes students to the different intervention strategies that build resilience among young children suitable for different cultural practices that place children at different risks and how these could be minimised.

ECDPP405 Guidance, Counselling and Conflict Resolution in Early Childhood

The module seeks to equip students with knowledge of guidance and counselling theories and applications in schools and the classroom, for instance, group and individual counselling The module also enhances students' abilities to deal with conflict through acquiring skills such as decision-making abilities being courteous, confidentiality and being empathetic.

ECDPP406 Management of Early Childhood Settings

The module equips students with administrative, management and supervision skills in educational activities in the early years. Theories and applications in the areas of leadership, administration, motivation and policy studies are covered with a particular focus on mastering innovative strategies in the management process.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN EARLY CHILDHOOD DEVELOPMENT AND CHILD PROTECTION (EDU07)

Duration:	1 ½ years
Minimum Credit Load:	270
Maximum Credit Load:	300
Maximum MBKs Credit Load	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

To develop in candidates a high level of awareness and understanding of early childhood development and equip them with sound teaching methods and skills to design and develop innovative instruction that can transform the teaching and learning experiences.

2. ENTRY REQUIREMENTS

Normal Entry

Bachelor of Education degree in Early Childhood Development/ Education or an equivalent from an accredited and recognised institution.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Master of Education Degree in Early Childhood Development and Child Protection.

Specialist Focus:

Early Childhood development concepts and their application to teaching and learning situations and social settings in innovative and creative ways with a focus on enhancing the holistic development of a fully functional individuals within the education sector and society at large.

Orientation:
The teaching and learning process is theoretically and practically driven by research and the quest for innovation and sustainable development. Particular attention is paid to the aspects of human development and the development of a balanced personality that can cope in the face of ever-changing societal demands and adverse life circumstances.

Distinctive Features:

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates who complete the programme can expect to be employed as supervisors, lecturers, education inspectors curriculum developers, training consultants, researchers etc.
Further Studies: Master's and Doctoral studies in Early Childhood Development and Child Protection.

5. PROGRAMME DELIVERY

5.1. **Teaching and Learning Methods**:

Face-to-face and virtual lectures in Google and module classes, tutorials, group tasks, seminar presentations, research projects and independent study.

6. LEARNING OUTCOME

- Apply innovative solutions to the developmental trajectory of the country.
- Apply advanced educational tools in research and development and carry out policy development, analysis and evaluation.
- Engage in professional and academic interactions guided by the philosophy of Unhu/Ubuntu and demonstrate financial management skills.
- Demonstrate competency in disciplinary content peculiar to various areas of study and apply pedagogical skills in diverse educational contexts.
- Design, implement, monitor and evaluate educational curricula and policies.
- Demonstrate critical thinking by understanding the development of educational ideas and their application in current educational practice.

7. GENERAL PROVISIONS

- For the Master of Education Degree programme, candidates shall study at least 14 modules.
- Each module is worth 18 credits except for the Internship and dissertation with 36 credits and 90 credits respectively.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9. PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations

13. PROGRAMME STRUCTURE

MED744	Dissertation	90

13. MODULE SYNOPSES

MECDP701 Theories of Child Development in Socio- Cultural Contexts

The module enhances students' mastery of theories of child development and learning in the early childhood phase. The module focuses on emerging issues such as proximodistal and cephalo-caudal developmental trends, the effect of adult-child relationship on an infant's development, infant/toddler group care, culturally sensitively in child care settings and appropriate environments for positive infant and toddler development.

MECDP 702 Curriculum Innovation and Industrialisation in Early Childhood Development

The module exposes students to some of the fundamental theories and issues that must be considered in designing an ECD curriculum for innovation and industrialisation. It also informs students on contemporary issues that have a bearing on the early childhood curriculum.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MICT 732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MECDP 703 Pertinent Contemporary Issues in Early Childhood Development

The module examines current policies in Early Childhood Development. It enables students' understanding of contemporary issues such as incest, child abuse, natural disasters, pandemics and domestic violence, their impact and mitigation strategies.

MECDP 704 Management of Early Childhood Programmes

This module examines issues and responsibilities related to the management of early childhood development programmes. It enables students to develop knowledge, skills and attitudes in the management of programmes for young children. The module focuses on general theories and practices of management and supervision that will allow students to manage planning, organisation, curriculum evaluation, resources, finances and programmes in relation to Early Childhood Development.

MECDP 705 Child Rights and Social Justice

The module focuses on 'social justice' theories and upholding child rights in early childhood development. It examines the child rights conventions, laws and policies and obligations of various stakeholders such as governments, parents and Non-Governmental rganisations as defined in global human rights laws. It also analyses how these laws affect growth and development among children in normal and difficult circumstances.

MECDP 706 Cross- Cultural Parenting Systems and Practices in Early Childhood Development

This module seeks to guide students in the investigation and interrogation of parenting knowledge and practices in early childhood both traditional and comparativeto develop models for optimum development in children. Students explore how cultural practices and social policies complement each other in the development of children.

MECDP 707 Project Planning, Implementation and Evaluation in Early Childhood Development

This module equips students with skills to do market research, identify areas of need and choose meaningful projects which address the gaps in the market. The module also enhances students' abilities to plan, manage and evaluate projects, hereby developing them to develop their entrepreneurial skills.

FED132 Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions such as the School Services Fund, the General-Purpose Fund and School Development Association Funds.

MECDP708 Social Budgeting for Diverse Socio-Cultural Contexts

The module helps students to examine various safety nets for children. It equips students with skills to plan for unforeseen circumstances such as natural disasters and operates effectively during such times.

MED733 Gender Discourse in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept "gender," its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MECDP709 Internship and Community Development

The major aim of the module is to put theory into practice. The module exposes students to the applicability and relevance of the various modules studied by putting theory into practice. Dimensions of the internship include an internship workshop; attachment at an ECD-related institution and a Community Development Project. Students will acquire skills in assessment, monitoring, project planning, evaluation and community engagement to promote sustainable development and solve emerging societal challenges.

MED744 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters Level.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN INCLUSIVE EDUCATION AND ASSISTIVE TECHNOLOGIES PROGRAMME (EDU72)

Duration:	1 ½ years
Minimum Credit Load:	270
Maximum Credit Load:	300
Maximum MBKs Credit Load:	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

This programme is designed for candidates who have studied Inclusive Education and Assistive Technologies at the undergraduate level. The major goal is to develop in candidates a high level of awareness and understanding of inclusive and special needs education in diverse socio-cultural contexts. The programme aims to produce Inclusive Education specialists who are versatile.

2. ENTRY REQUIREMENTS

Normal Entry

A Bachelor of Education degree in Inclusive Education and Assistive Technologies or an approved equivalent from any recognised university.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Inclusive education

Specialist Focus:

Training teachers in Inclusive Education and Assistive Technologies and emphasising the physical, social, intellectual, emotional and moral development of learners through innovative and sustainable methods.

Orientation:

The teaching and learning process is driven by critical thinking, innovation and the development of entrepreneurial skills, culminating in the production of goods and services in the context of inclusive education in primary schools.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as supervisors, special care unit managers, teachers, education officers, curriculum developers, consultants, remedial tutors etc.

Further Studies: Doctoral Studies in Inclusive Education and Assistive Technologies

5. PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, and virtual lessons in various forms such as Google classes, seminars, group tasks, research projects, and individual independent study.

6. LEARNING OUTCOMES

By the end of the programme, students should be able to:

- apply innovative solutions to the developmental trajectory of the country.
- apply advanced educational tools in research and development.
- carry out policy development, analysis and evaluation.
- demonstrate financial management skills.
- engage in professional and academic interactions guided by the philosophy of Unhu/ Ubuntu.
- demonstrate competency in disciplinary content peculiar to various areas of study.
- apply pedagogical skills in diverse educational contexts.
- design, implement, monitor and evaluate educational curricula and policies.
- demonstrate mastery of research processes.
- demonstrate critical thinking by understanding the development of educational ideas and their application in current educational practice. Identify and provide solutions to educational and development problems through continuing education.

7. GENERAL PROVISIONS

- For this programme, candidates shall study at least 12 modules.

- Each module is worth 18 credits except for the Practicum and Research Project which are worth 36 and 90 credits respectively.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9. PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

Level 1 Semester 1

13. MODULESYNOPSES

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MIEAT702 Historical Perspectives and Theories in Inclusive Education

The module covers theoretical frameworks, treaties, conventions and world declarations on inclusive education. How the theories impact on implementation and management of inclusive education programmes shall be discussed and analysed. The module also explores inclusive service models, theories, approaches and perspectives in depth.

MIEAT703 Human Rights and Inclusive Education

The module examines the rights of children living with disabilities and those from different developmental contexts such as poor socio-economic status and minority groups. Aspects covered in this module include among others theories of citizenship, global and regional conventions and national policies that enhance inclusivity in education.

MIEAT704 Inclusive Education in Diverse Socio-Cultural Contexts

The module examines socio-cultural theories relevant to Inclusive and Special Needs Education. The module also covers the quality of Life index issues in Community-based rehabilitation (CBR) and school-to-career schemes. The social and cultural relevance of the CBR matrix is analysed in relation to inclusive service provision in communities.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research:

- the different philosophical orientations in research;
- research paradigms;
- theoretical and conceptual frameworks;
- research designs;
- data collection methodologies;
- advanced quantitative and qualitative data analysis techniques;
- as well as discussion of findings and making conclusions.

The module introduces students to significant educational research problems whose resolution has the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness etc.

MIEAT705 Digitalisation in Inclusive Education.

The module covers digitalisation and the use of assistive devices and interventions for learners with communication difficulties. Computer-based applications for children with communication disorders, wireless communication systems for children with severe communication difficulties, Picture Exchange Communication Systems, Bliss symbolism and others shall be examined.

MIEAT705 Practicum

The module entails practical engagement in Inclusive Education aspects. Students will be equipped with the ability to undertake needs analysis and action research approaches in solving or alleviating challenges encountered by people with disabilities in the communities they serve.

MIEAT706 Disability, Gender and Health

The module examines the interface between disability, gender and health. Intervention models, opportunities and facilitators in community participation are analysed using an acceptance of diversity approach. Legal and policy issues as well as criticisms of related gender, disability and health interventions are to be examined in the national and global contexts.

FED132 Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general purpose financial statements, bank reconciliation statements, and skills of budgeting

and budgetary control as well as accounting requirements of Treasury Instructions such as the School Services Fund, the General Purpose Fund and School Development Association Funds.

MIEAT707 Programme Design, Implementation and Evaluation

This module equips students with analytical skills to set up Inclusive Education programmes. The module covers aspects that include fundamentals of programme and project design, implementation and evaluation. Issues to do with constructing, using and assessing the theory of change, stakeholder mapping and engagement are explored.

MED733 Gender Studies in Education

The module is meant to afford the students a chance to interrogate and critically analyse issues in education as well as proffer intervention strategies to bring about gender equity and equality in society through the school system. Areas to be covered include; foundations of gender studies, gender inequality theories, gender analysis, gender issues in education, strategies and approaches for redressing gender imbalances as well as empowerment in education.

MIEAT708 Comparative Studies in Inclusive Education and Assistive Technologies

The modules examine various models of Inclusive education. The students compare the various models and in turn, use them to design ideal Inclusive Education models in their work places. Students analyse aspects like the policies, goals, approaches and support structures that Inclusive Education and Assistive Technologies are built upon.

MED744 Dissertation

The dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education and social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters level.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN PSYCHOLOGY AND INTERVENTION DESIGNS (EDU68)

Duration:	1 ½ years
Minimum Credit Load:	270
Maximum Credit Load:	330
Maximum MBKs Credit Load:	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

To enrich education professionals with deep analytical skills in pedagogical issues in the area of Psychology of Education. It aims to equip students with the theoretical background and practical skills to contribute meaningfully in dealing with challenges in the field of education.

2. ENTRY REQUIREMENTS

Normal Entry

Bachelor of Education degree from an accredited and recognised institution or Postgraduate Diploma in Education, Graduate Diploma in Education or Graduate Certificate in Education.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Educational Psychology

Specialist Focus:

Psychological concepts and their application to social settings with a focus on enhancing the development of a fully functional individual within educational settings and society.

Orientation:

The teaching and learning process is theoretically and practically driven by research and the quest for innovation and sustainable development. Particular attention is paid to the aspects of human development and the development of a balanced personality that can cope in the face of ever-changing societal demands and adverse life circumstances

Distinctive Features:

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates who complete the programme can expect to be employed as lecturers in tertiary institutions, consultants in a variety of private enterprises, including Non-Governmental Organisations and other humanitarian organisations, curriculum planners, policy architects, training specialists, education consultants and board members in government departments and international organisations and enrol for PhD studies.

Further Studies: Master's and Doctoral studies in Educational Psychology

5. PROGRAMME DELIVERY

Teaching and Learning Methods:

Face-to-face and virtual lectures in Google and Moodle classes, tutorials, group tasks, seminar presentations, research projects and independent study.

Assessment Methods:

6. LEARNING OUTCOMES

- Apply innovative solutions to the developmental trajectory of the country.
- apply advanced educational tools in research and development.
- carry out policy development, analysis and evaluation.
- demonstrate financial management skills.
- engage in professional and academic interactions guided by the philosophy of Unhu/Ubuntu.
- demonstrate competency in disciplinary content peculiar to various areas of study.
- apply pedagogical skills in diverse educational contexts.
- design, implement, monitor and evaluate educational curricula and policies.
- demonstrate mastery of research processes.
- demonstrate critical thinking by understanding the development of educational ideas and their application in current educational practice.
- identify and provide solutions to educational and development problems through continuing education.

7. GENERAL PROVISIONS

- For the Masters in Educational Psychology Degree Programme, candidates shall study at least 14 modules.
- Each module is worth 18 credits except for the dissertation which is worth 90 credits.

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9. PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

Level 1 semester 1

Code	Module Description	Credits
MPID701	Human Development	18
MPID702	Human Learning and Performance	18
MED731	Advanced Research Methods and Statistics	18
MICT732	Advanced Information Communication Technology in Education	18
MPID703	Personality Theories and Development	18

One Elective module from areas other than Educational Psychology selected from the following:

MEPCP718	Critical Thinking and Education	18
MEDSS716	Sociology of the School_	18

13. MODULE SYNOPSES

MPID701 **Human Development**

This module delves into the biological and psychological aspects of human development throughout the entire lifespan. The module aims to develop in students a basic understanding of the existing major research findings and the fundamental concepts in human development that enable them to spot possible signs of problems and make timely interventions that help create the right conditions for human development.

MPID702 Human Learning and Performance

This module equips students with a knowledge of various psychological learning theories and research that provide a framework for understanding learning issues. The module is designed to elevate students' sensitivity to thematic and scholarly psychological principles and debates to ultimately enhance the quality of teaching and learning in educational settings.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has a potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MPID703 Personality Theories and Development

This course is designed to impart to the students a knowledge of how personality development occurs in human beings as hypothesised by various theorists. The course aims to widen and deepen the students' knowledge and understanding of the existing human behaviour and interactions and enhance the development of healthy personalities in learners.

MPID704 Cognitive Psychology

The basic goal of this module is to expose students to the scientific study of mental processes such as information processing, creativity, problem-solving and motivation. It enables the student to gain a deeper understanding of how the cognitive processes change over the course of human development, to employ strategies that enhance these processes and ultimately improve people's daily existence and overall well-being.

MPID705 Measurement, Assessment and Evaluation in Education

This module endeavours to shed light on the advanced principles of test planning, test construction, test administration, test scoring and the use of test results. It further explores how measurement enhances the quality of the teaching and learning process and the ultimate decisions which are made by various stakeholders. The module exposes students to advanced skills in test development, test use and analysis in educational settings.

MPID706 Social Psychology

The focus of social psychology is to expose students to theories that explain interpersonal and group dynamics and social challenges and the factors that influence them. The students would have a better understanding and appreciation of how social relationships influence human functioning and be in a position to improve the way individuals relate to each other.

MPID707 Inclusive and Special Needs Education

The module introduces students of Educational Psychology to the social-emotional context of the inclusive education of pupils with exceptionalities. The module discusses inclusive education from the perspective of successful participation in knowledge acquisition in various settings rather than from a placement perspective. Curriculum adaptations that enable the acquisition and assessment of knowledge will be explored in the module.

FED132 Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions such asthe School Services Fund, the General Purpose Fund and School Development Association Funds.

MPID708 Guidance and Counselling for Innovation and Sustainability

This module is designed to impart a diversity of professional counselling techniques to students so that they will be better positioned to address human challenges such as psychological difficulties, academic failure, diseases and health issues, marital problems, unstable relationships, unemployment and various forms of abuse using innovative and sustainable guidance and counselling strategies.

MED733 Gender Discourse in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept "gender," its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development,

MED744 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management,

environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters Level.

Elective Modules

MEPCP 718 Critical Thinking and Education

The course introduces students to the nature, characteristics and benefits of Critical Thinking. Students interrogate the place of critical thinking in education and explore the nexus between critical thinking, creativity and innovation. The course seeks to improve the quality of thinking in students, making critical thinking a way of life by developing specific critical thinking skills, attitudes and values, with a view to imparting the same to their students later.

MEDSS716 Sociology of the School

This module focuses on the Sociology of the school and in particular the manner in which schools are organised. Students are exposed to the study of the school as a formal organisation using Weber's bureaucratic model. Interaction patterns within the school and the impact of these patterns on relationships within the school are examined.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN EDUCATIONAL SOCIOLOGY AND SOCIAL PATHOLOGY (EDU87)

Duration:	1 ½ years
Minimum Credit Load :	270
Maximum Credit Load :	330
Maximum MBKs Credit Load :	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

To enrich education professionals with deep analytical skills in pedagogical issues which relate to the Sociology of Education by equipping them with theoretical background and practical skills which will enable them to deal with educational challenges in the field of education.

2. ENTRY REQUIREMENTS

Normal Entry

Bachelor of Education degree from an accredited and recognised institution or Postgraduate Diploma in Education, Graduate Diploma in Education or Graduate Certificate in Education.

3. PROGRAMME CHARACTERISTICS

Areas of study:

Educational Sociology

Specialist Focus

Understanding how human behaviour is shaped by social factors and education's role in driving social change and innovation.

Orientation:

A distinct emphasis on understanding the dynamics of social order and social problems and their impact on education. Transformation of the teaching and learning experience through innovative methods and strategies.

Distinctive Features:

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates who complete the programme can expect to be employed as lecturers in tertiary institutions, consultants in a variety of private enterprises, including NGOs and other humanitarian organisations,

curriculum planners, policy architects, training specialists, education consultants and board members in government departments and international organisations researchers in social issues and innovative solutions and enrol for PhD studies.

Further Studies: Master's and Doctoral studies in Educational Sociology.

5. PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, face-to-face and virtual lectures in the form of Google and Moodle classes, tutorials, seminar presentations, hands-on, site-based learning, site visits, work-related learning, research projects and independent study.

6. LEARNING OUTCOMES

- Identify pertinent issues in the field and apply advanced methodologies and data analysis tools and techniques to conduct research that leads to sustainable innovative solutions, publications and other verifiable outcomes. The research should contribute to the development of innovative ideas in Educational Sociology.
- Design and implement monitoring evaluation tools that assure the quality of teaching of Educational Sociology at all levels of education and training.
- Translate research output into policy briefs that are readily adaptable by practitioners and policy-makers in the field.
- Demonstrate sound entrepreneurial and management skills that can be applied in running educational institutions, and identifying business opportunities.
- Evaluate, review and design curricula that are guided by the philosophy of Unhu/Ubuntu and observance of safe and ethical practices in the field of Educational Sociology.
- Design, implement, monitor and evaluate innovative educational curricula and policies that foster problem-solving and critical thinking skills, and embrace indigenous knowledge systems and the latest technologies.
- Integrate relevant research and theory to develop a broad repertoire of Educational
- Sociology -appropriate pedagogy strategies and embrace the latest developments in ICT.

7. GENERAL PROVISIONS

For the Masters of Educational Sociology Degree programme, candidates shall study at least 14 modules.

Each module is worth 18 credits except for the dissertation which is worth 90 credits

8. PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9. PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10. FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11. GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12. DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

MEPCP 718	Critical Thinking and Education	18

13. MODULESYNOPSES

MEDSS711 Sociological Theories of Education

This module introduces students to theoretical perspectives in Sociology as a discipline. In the course students are introduced to macro theories (Marxism, Functionalism, Postcolonialism, and Feminism) and micro theories (Symbolic interactionism and phenomenology). Critical analysis of the development of Sociology as a discipline is undertaken with special emphasis on social and intellectual forces that spurred the development of the discipline. The module looks at recent developments in sociology.

MEDSS712 Sociology and Innovation

This module interrogates theories of innovation as well as structural arrangements of the social spaces in which innovation takes place, and characteristics of social networks, organisations, and institutions that influence innovation. The module is grounded on Max Weber's theory of bureaucracy The influence of social networks, ethnicity, and societal needs on innovation will be interrogated.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has a potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MEDSS713 Morality, Education and Innovation

The module is intended to introduce students to issues and discourses on morality and education. Topics to be discussed include ethics, empathy, mutual respect and honesty as well as civic rights pertaining to morality. Students should be able to appreciate and interrogate current moral problems and challenges facing society.

MEDSS714 Culture and Education
The module looks at the relationship between culture and academic achievement. Students are required to analyse aspects of culture such as sub culture and multiculturalism. Sociological theories are also utilised to interrogate the concept of culture with an emphasis on the presence of cultural diversity in society. Students are expected to come up with strategies that education can utilise to accommodate learners from diverse socio-economic backgrounds.

MEDSS715 Social Deviance, Criminality and Social Control
The module focuses on the concept's criminality and social deviance. Theories of deviance include the differential association theory, the cultural strain theory, the conflict theory and the labelling theory. Factors contributing to deviance as well as strategies for social control will be discussed**.**

MEDSS716 Sociology of the School.
This module focuses on the Sociology of the School and in particular the manner in which schools are organised. Students are exposed to the study of the school as a formal organisation using Weber's bureaucratic model. Interaction patterns within the school and the impact of these patterns on relationships within the school are examined.

MEDSS717 Social Pathology and Education
The module examines the link between social problems and education. Topics to be studied include educational problems brought on by pandemics, and the changing economic, religious and political spheres and this impacts the changes in education. Challenges brought about by social inequality, social mobility and disability also be interrogated.

FED132 Financial Management in Educational Institutions
The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions such as the School Services Fund, the General-Purpose Fund and School Development Association Funds.

MEDSS718 Education Social and Economic Development in Third World Countries
This module is anchored in the Sociology of Development. In the module, students are exposed to challenges faced by developing nations in initiating development trajectories. In this regard, students are exposed to different theories in development discourse. These theories include modernisation theory, underdevelopment theory as well as dependency theory. The emphasis is to enable students to appreciate the diverse challenges encountered by developing countries in the implementation of development programmes.

MED733 Gender Discourse in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept "gender," its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MED744 Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters Level.

Elective Modules

MEDIP718 Guidance and Counselling for Innovation and Sustainability
This module is designed to impart a diversity of professional counselling techniques to students so that they will be better positioned to address human challenges such as psychological difficulties, academic failure, diseases and health issues, marital problems, unstable relationships, unemployment and various forms of abuse using innovative and sustainable guidance and counselling strategies.

MEPCP 718 Critical Thinking and Education

The course introduces students to the nature, characteristics and benefits of Critical Thinking. Students interrogate the place of critical thinking in education and explore the nexus between critical thinking, creativity and innovation. The course seeks to improve the quality of thinking in students, making critical thinking a way of life by developing specific critical thinking skills, attitudes and values, with a view to imparting the same to their students later.

DEPARTMENT OF EDUCATIONAL POLICY STUDIES AND LEADERSHIP

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN LIFELONG LEARNING AND GLOBAL CHANGE (EDU46)

Duration:	2 years
Actual Credit Load	264
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

The purpose of the programme is to provide theoretical knowledge and practical expertise to facilitate the development of industry locally, regionally and globally. To develop an increased understanding of the philosophical, sociological and psychological foundations underpinning the field of adult education.

2.0 ENTRY REQUIREMENTS

Normal Entry

Diploma in Adult and Continuing Education or approved equivalent from a recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of study: Lifelong Education

Specialist Focus: Lifelong Education

Orientation:

Application of theoretical knowledge and evidence that informs best practices in Lifelong Learning to solve problems facing society with a thrust on innovations for industrialisation and modernisation.

Distinctive Features:

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of the Degree Programme can be employed in government, private sector and Non-Governmental Organisations as adult educators, managers, mediators, trainers, rural development officers and supervisors in peace missions.

Graduates may advance to Master's degree in Lifelong Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Blended learning, research, project portfolios, fieldwork, seminar presentations, tutorials, group tasks and discussions.

Assessment Methods:

- Except for the research project, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the research project shall be based on the final written research report submitted to the Department Board of Examiners.

6.0 LEARNING OUTCOMES

- Apply Soft Skills such as Unhu/Ubuntu.
- Apply critical thinking in both their professional and personal interaction.
- Apply innovative and technological competencies in Lifelong Learning.
- Plan, implement and evaluate Lifelong Learning programmes.
- Use innovative technology-enhanced teaching strategies to implement the lifelong learning curriculum.

7.0 GENERAL PROVISIONS

- The programme consists of 21 modules.
- Each module is worth 12 credits except the research project which is worth 24 credits.
- A student shall register for all the modules offered in each semester.
- To be awarded the Bachelor's Education degree in Lifelong Learning, a student shall pass all modules and must have attained 264 credits.

8.0 PROGRAMME ASSESSMENT

- Except for the research project, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the research project shall be based on the final written research report submitted to the Department Board of Examiners.

9.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However, he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules in that level.

10.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

11.0 GRADING AND DEGREE CLASSIFICATION

75%+	-	Distinction
65%-74%	-	Pass with a 2.1
60%-64%	-	Pass with a 2.2
50% -59%	-	Pass with a 3
49% - below	-	Fail

12.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:
BED (Honours) full time/Block Release 50% for each of the two levels.

13.0 PROGRAMME STRUCTURE

13. MODULE SYNOPSES

BLLL 101 Philosophical Foundations of Lifelong Learning

This module equips the students with a precise and firm historical foundation of the philosophy of adult education. It also introduces students to major schools of philosophical thought and presents a sample of educational philosophers whose ideas have significantly influenced Lifelong Learning Education to date.
The module deals with problems of reality (metaphysics) truth (epistemology and value axiology).

BLLL102 Sociological Foundation of Lifelong Learning
The module assists students develop an understanding of the socio-cultural issues influencing adult education programmes. The module further gives students a sociological imagination through sociological theories; issues of class, poverty, environment and globalisation with special regard to their implication on lifelong learning education provision in Zimbabwe.

BLLL103 Human Capital Development in Lifelong Learning
The module introduces students to the theoretical underpinnings of the Human Resources Management concept and ensures they have an idea of the value that organisations can derive from applying the concept of human resources. It also helps the students to develop and implement coherent and systematic plans for the administration and management of adult education programmes and supervise adult education personnel.

BED133 Information and Communication Technology
The module introduces students to Information Communication Technologies (ICTs) used in education and training environments. The module provides them with an opportunity to explore criteria for the appropriate use of ICT. Students identify and monitor issues arising from the use of ICT and other emerging technologies that can be applied in their work place.

BCHS131 Culture and Heritage Studies
The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. The module further explores landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BLLL104 Programme Planning, Implementation and Evaluation

The module equips students with skills to manage their activities and implement their projects, large or small, for survival in a volatile economic environment. It is designed to equip participants with a broad understanding of project identification, preparation and appraisal.

BLLL105 Psychological Foundations of Lifelong Learning

The module equips students with knowledge and skills to facilitate adult learning. It focuses on andragogy as an adult learning theory. Psychology is explained along characteristics of adult learners and motivation theories. In relation to culture and heritage, the module underscores how the modern practice of adult education is rooted in pre-colonial adult education by emphasising methods used in facilitating learning through practice.

BLLL106 Lifelong Learning and the Law

The module covers the introduction to law as applied in Zimbabwe. Emphasis shall be on law as applied in the courts. Students are expected to demonstrate knowledge of the main principles. Case law authorities shall be used to illustrate how the principles involved in the law are applied. Areas to be covered include procedural law, criminal law and, civil law.

BLLL107 Design and Development of Instructional Materials

The module equips students with the knowledge and skills required to design, develop and deliver instruction efficiently and effectively. Emphasis shall be placed on analysing basic models such as ADDIE and the transformation of relevant knowledge into prototype learning materials that are relevant to the local needs of adult learners. This is a practically–oriented module.

BLLL108 Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BLLL109 Techniques and Practice of Open and Distance Education and E-learning

The module develops in participants a systematic and scholarly approach to understanding the concept, origins and development of distance education and the theories underpinning distance education; and analyses different organisational models in the provision of distance education and apply the techniques and practices in distance education in the field of lifelong learning.

BLLL110 Training Techniques

The module seeks to familiarise the adult learner with various training techniques for innovation used during training such as problem-solving techniques, lesson presentation skills, ice-breaking techniques, training games and communication skills. Methods that evolved from traditional practices are emphasised.

BLLL111 Comparative Studies in Lifelong Learning

The module exposes students to knowledge of the historical development of comparative education and promotes skills of accurate analysis of the growth of Lifelong Learning education locally and globally. It emphasises the ability to accurately capture similarities with a view to solving common adult education problems in local settings. Content to be covered includes historical background, phases in the development of comparative education, approaches used in comparative education and different case studies.

BLLL112 Environmental and Sustainable Development

The module introduces participants to the various dimensions of sustainable development; strategies in the management of natural resources; and analyses some of the environmental and sustainable developmental strategies that are currently in place. Areas to be covered include climate change, pollution, green gases, greenhouses and energy.

BLLL113 Gender Studies in Lifelong Learning

The module exposes students to the concept of gender and the importance of gender studies as a field of study. Students shall further be introduced to gender analysis frameworks, teasing out how the family, the workplace and public spaces construct gender inequalities and the implications of these on development. Theories of gender inequalities and ways of redressing gender imbalances shall be interrogated.

BLLL114 Disaster and Livelihood Management

The module equips the participants with the right skills, knowledge and attitudes to managing environmental disasters within their catchment areas. It also empowers them to determine proactive approaches to disaster management identify institutional arrangements and legal frameworks for disaster mitigation, and design post-disaster management strategies.

BLLL115 Development Studies

This module exposes students to economic, social and political changes in general and the major challenges they pose in the various institutions or agencies of development. The module is multi and interdisciplinary and promotes innovation and industrialisation. It offers students the opportunity to design an individual, cross-disciplinary programme of study of selected topics in development.

BLLL116 Health and Safety in Lifelong Learning

The module exposes students to the Public Health multi-disciplinary principles and practices. Students examine issues that threaten the overall health of the community with a view to coming up with effective lifelong education programmes that promote public health. Areas covered include public health, awareness of public health as a public good, fundamental rights and information dissemination.

BLLL117 Management Information Systems

The module aims to explore various aspects that are essential in understanding Information Technology as a business tool. Both hardware and software components of Information Systems shall be explored. These shall then be blended into the effective and efficient running of an electronic business, especially in telecommunications, internet security, integrity and access. The module shall also look at ethical issues in Information Systems.

BLLL118 Entrepreneurship and Financial Management

The module equips students with entrepreneurship skills that enable them to be creative and innovative. It capacitates students with creative and innovative skills that can be used in industrialisation and management of finances. Areas to be covered include the entrepreneurship process, features of entrepreneurs, creation and innovation.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR BACHELOR OF EDUCATION HONOURS DEGREE IN EDUCATIONAL LEADERSHIP, MANAGEMENT AND DEVELOPMENT (EDU54)

Duration:	2 years
Actual Credit Load:	288
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF level:	8

1.0 PURPOSE OF THE PROGRAMME

The purpose of the degree programme is to develop, in teachers, the knowledge, skills and competencies in educational leadership and management relevant to school improvement and development in a context of change that demands entrepreneurship, innovation and enterprising in line with sustainable development goals and education 5.0

2.0 ENTRY REQUIREMENTS

2.1 Diploma in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of study: Education

Specialist Focus: Educational Leadership and Management

Orientation:

Application of theoretical knowledge and evidence that inform best practices in leadership and management to solve problems facing educational settings, taking the lead in evidence-based decision making to transform educational institutions with a thrust on institution-level innovations for industrialisation and modernisation.

Distinctive Features:

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates can be employed as heads of departments, heads of primary or secondary schools, college principals, heads of training divisions in both public and private sectors, and education officers and inspectors.

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**:

  Blended learning, seminar presentations, tutorials, group tasks, discussions and a research project.

- **Assessment Methods:**

- Except for the research project, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the research project shall be based on the final written research report submitted to the Department Board of Examiners.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced strategies in leading and managing educational institutions.
- Apply innovative and technological techniques when carrying out research in educational leadership and management.
- Monitor, assess and evaluate learners, learning processes, school-level projects and programmes.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation

7.0 General Provisions

- The programme consists of 23 modules.
- Each module is worth 12 credits except the research project, which is worth 24 credits.
- A student shall register for all the modules offered in each semester.
- To be awarded the Bachelor of Education degree, a student shall pass all modules including a research project and shall have attained 288 credits.

8.0 PROGRAMME ASSESSMENT

- Except for the research project, the final assessment in each module shall be by continuous assessment and formal examinations.

- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the research project shall be based on the final written research report submitted to the Department Board of Examiners.

9.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However, he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules in that level.

10.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

11.0 Grading and Degree Classification

- 75%+ - Distinction
- 65%-74% - Pass with a 2.1
- 60%-64% - Pass with a 2.2
- 50% -59% - Pass with a 3
- 49% - Below - Fail

12.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:
BED (Honours) full time/Block Release 50% for each of the two levels.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

14.0 MODULE SYNOPSES

BCHS131 Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. The module further explores landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BLMD101 Schools Curriculum Competencies and Innovation

The module introduces students to the theory of curriculum. It explains the concept 'curriculum,' its elements, forces that shape it as well as the foundations of the curriculum. Students are exposed to the process of curriculum development, curriculum models, modalities of dissemination associated with each model, barriers to implementation, curriculum evaluation and the rationale for changing the curriculum.

BLMD102 Philosophical Perspectives in Educational Management

The module justifies the use of philosophy in educational management practices. It covers the concept of philosophy of education, branches of philosophy, classical and contemporary philosophies and comparative education among other pertinent aspects of philosophy of education. The module introduces students to the use of these philosophical perspectives as conceptual frameworks for management thought and practice in educational leadership and management.

BLMD103 Theories of Leadership and Supervision

The module deals with the concept of leadership in terms of authority, influence and power. It covers trait theories, behavioural theories like situational theory, transactional and transformational leadership theory, contemporary theories like instructional leadership, servant leadership and ethical leadership. It also covers leadership roles, supervisory roles, supervision models and rating of educational personnel. The application of the theories and roles in day-to-day leadership and management practice is foregrounded.

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BLMD104 Organisational Theory

The module introduces students to theories that have and continue to explain and predict how groups and individuals behave in varying organisational structures, cultures and circumstances. Some of the topics covered include organisational theories, implications and groups.

BLMD105 Organisational Development

The module introduces students to a critical and science-based process that helps educational organisations build capacity to change and achieve greater effectiveness by developing, improving, and reinforcing strategies, structures, interventions and processes. Students are also introduced to OD theories, characteristics, activities and stages. The OD students should understand the relevance of the Global OD Competence Framework (Global ODCF) and the need to differentiate competencies for OD practitioners in the operating environment.

BED 131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BLMD106 Educational Planning for Development
The module introduces students to philosophical considerations of important factors for national development. Students are exposed to the relationship between politics, educational planning and the provision of education, and the social and economic factors to be considered in educational planning and development. It covers topics like national educational planning goals, educational planning models and quantitative techniques in educational planning.

BED231 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BLMD107 Collective Bargaining in Education
The module covers labour relations in the Public Service, the theoretical perspective of collective bargaining, phases in collective bargaining, the legal framework of collective bargaining in Zimbabwe, Public Service Trade Unions and the political discourse in Zimbabwe, the nature of collective bargaining in the Public Service in Zimbabwe, Public Service Trade Unions and the tripartite social dialogue processes for economic recovery in Zimbabwe.

BEIE 501 Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business and production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BLMD108 Conflict Transformation and Management in Education
The module arms students with knowledge and skills to resolve and manage conflict in educational institutions. The module exposes the educational manager to perceptions of conflict, theory on conflict, and conflict transformation management approaches to conflicts like avoiding, confrontation, collaboration, compromising, and problem solving. The ministerial statutes for example statutory 1 of 2000 and circulars that guide the conflict resolution and management process in education are critical study areas of this module.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

BLMD110 People Analytics and Human Capital Development in Education
The module introduces students to the role of the school head as the Human Resource Management officer within the school. The module also introduces students to theories and practices of human resources management in education. The students learn about the rationale for human resources management and development in education, human resources planning, recruitment, selection, placement and development, managing health and safety in education and performance management.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gaps by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BLMD111 Educational Management and Legal Issues

Legal issues have become pronounced in education and educational management in particular. The educational manager as a source of guidance and enlightenment on legal matters affecting education, requires an appreciation of the law, which provides the legal frameworks of institutional operations. This module introduces practising and aspiring educational managers to an understanding of the basics of the country's constitution, international conventions, sources of educational law and legal issues related to educational management.

BLMD112 Project Management

This module propagates the spirit of entrepreneurship through projects and project management in line with Vision 2030 and Education 5.0. This module equips students with a solid foundation in project management concepts, tools and techniques for effective project management such as project identification, planning, financing, implementation, monitoring and evaluation in the context of school management and school development. General bookkeeping, project equipment, resources management and general accountability are also covered in the module.

BLMD113 Policy Studies in Education

The module familiarises students with general policy issues and educational policy in particular. Educational management students must be able to interpret and implement policies. The module covers the concept of public policy, models of policymaking, policy problems and issues, pre-independence and post-independence policies. The module also covers the policy process and its actors. Whilst policymaking is portrayed as a national issue, the role of school heads in policymaking at the school level has a special point of emphasis in this module.

BLMD114 Management and Sustainable Development in Education

The module helps students identify knowledge, issues, perspectives, skills and values central to sustainable development in each of the three components of sustainability: environment, society and economy and integrate them into the curriculum and management practice. The module makes management students aware of the measures of sustainable development namely technology, reduce, reuse, and recycle. The module addresses issues of poverty, exclusion, unemployment, climate change, conflict and humanitarian aid and Economics of Education.

BLMD115 Economics of Education

This module introduces students to the world of economics and education economics in particular. The module gives students an appreciation of the application of the theories and principles of educational economics. Some of the topics covered include education as a public and private good, economic and non-economic good, production function theory, educational demand and educational supply, opportunity costs in education and cost recovery measures.

BLMD116 Staff Development in Schools

Both classical and neo-classical organisational theorists concur on the need and value of staff development for organisational efficiency and effectiveness. Educational managers are the key drivers of staff development in schools and this module defines their roles in staff development. The module introduces staff development theories and practices in education. The module also focuses on management, partnership and Intermediate models, designing personnel development programmes and approaches to staff development.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR DIPLOMA IN ADULT AND CONTINUING EDUCATION (EDU55)

Duration:	1 ½ years
Actual Credit Load:	120
Minimum Credit Load:	120
Maximum Credit Load:	180

Total MBKS Credit Load: 96
ZNQF Level: 6

1.0 PURPOSE OF THE PROGRAMME

To provide various adult education provisions and skills to adult educators to solve problems in their special fields.

2.0 ENTRY REQUIREMENTS

Normal Entry

Have passed at least five (5) 'O' level subjects including English Language.

3.0 PROGRAMME CHARACTERISTICS

Areas of study: Education

Specialist Focus: Adult and Continuing Education

Orientation:

Application of theoretical knowledge and evidence that inform best practices in adult education with a thrust on innovations for industrialisation and modernisation

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Diploma holders can find employment in different Public Service Ministries, Universities,

Non- governmental organisations and informal sector, as lecturers, managers, trainers and development workers.

Bachelor's Degree in Lifelong Learning and Masters' Degree in Lifelong Learning.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Blended learning, action research, project portfolios, seminar presentations, tutorials, group tasks and discussion.

Assessment Methods:

Continuous assessment shall constitute 40% of the final assessment. The written examination shall constitute 60% of the final assessment. To pass a candidate should obtain at least 50% of continuous assessment and examination combined.

6.0 LEARNING OUTCOMES

- Apply soft skills such as Unhu/Ubuntu.
- Apply critical thinking in both their professional and personal interaction.
- Apply innovative and technological competencies in adult education.
- Plan, implement and evaluate adult and continuing education programmes.
- Use innovative technology-enhanced teaching strategies to implement the adult and continuing education curriculum.

7.0 GENERAL PROVISIONS

- The programme consists of 14 modules.
- Each module is worth 8 credits except the research project which is worth 16 credits.
- A student shall register for all the modules offered in each semester.
- To be awarded the Diploma in Adult and Continuing Education, a student shall pass all modules and shall have attained 120 credits.

8.0 PROGRAMME ASSESSMENT

- Except for the research project, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

- Assessment of the research project shall be based on the final written research report submitted to the Department Board of Examiners.

9.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However, he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules in that level.

10.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

11.0 GRADING AND DEGREE CLASSIFICATION

See General Academic Regulations

12.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:
BED (Honours) full time/Block Release 50% for each of the two levels.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
DAEC131	Introduction to Adult Education	8

DAEC 142	Training of Trainers	8
DAEC 143	Research Project	16

13. MODULE SYNOPSES

DAEC131 Introduction to Foundations of Adult and Continuing Education

This module introduces students to the theoretical basis of Adult and Continuing Education. The module covers three main themes namely; philosophical, psychological and sociological influences on adult education as a field of practice.

DAEC132 Research Methods in Adult and Continuing Education

This module provides the students with basic skills in identifying and stating problems in adult education as well as collecting, analysing and interpreting qualitative and quantitative data. Emphasis in the module is an appreciation of basic research methods and research report writing skills at the appropriate level and hinged on practical, real-life adult education problems.

DAEC133 Guidance and Counselling in Adult Education
The modules inoculate students with an awareness of current challenges and unpleasant social environments and equip them with vital guidance and counselling skills in terms of their roles as practising counsellors as well as relevant counselling techniques they are supposed to employ. The basic related theories underpinning counselling in institutions of teaching and learning such as Psychoanalysis, Behaviourist counselling. Humanistic counselling, Crisis counselling and Multicultural counselling are covered.

HCS 135 Information and Communication Technology
The module introduces adult students to Information, Communication Technologies used in education and training environments and provides them with an opportunity to explore criteria for the appropriate use of information communication technologies.

DAEC135 Environmental Management
The module is designed to train adult educators in a broad range of skills for employment in environmental management education roles, cleaner production, waste minimisation and economically sustainable development. The module includes methods of minimising, managing and reusing industrial and domestic by-products with regard to the environment and enables the graduate to advise management on its legislative duties.

DAEC136 Design and Delivery of Instruction
The module will introduce the basic concepts of design and delivery of instruction. Emphasis will be placed on analysing basic principles of design and delivery of instruction. Focus will be given to principles of adult learning. Approaches to the delivery of instruction will also be covered including lectures, demonstrations, role play and brainstorming among others.

DAEC137 Adult Education and the Law
This module will cover the introduction to law as applied in Zimbabwe. Emphasis will be on the law as applied in the courts. By the end of the course, the students are expected to demonstrate knowledge of the main principles and rules of law. Case law authorities will be used to illustrate how the principles involved in the law are applied to the breaches of the law. The students will be expected to apply these principles in practice.

DAEC138 Entrepreneurship in Adult and Continuing Education
The module seeks to tackle social and economic challenges encountered in the 21st century. It seeks to help adult learners embrace creativity, innovation and risk to plan and manage projects. Having acquired entrepreneurial skills, the learners shall be equipped with the expertise to start their enterprises.

DAEC139 Principles and Practices of Community engagement and innovation
The module provides a critical interrogation of the central conceptual issues as well as an examination of how to design a programme of effective community engagement. This module begins by asking: Why involve citizens in planning and policymaking? This leads to an examination of the politics of planning, conceptualisations of community and the tension between local and professional knowledge in policymaking.

DAEC141 Vocational Education and Training
The module provides an overview of Vocational Education and Training (VET). Focus shall be given to the historical development of VET globally, in Africa and Zimbabwe. International policy directions on VET are also covered; these include UNESCO TVET Strategy and SADC VET. VET Curricular as well as curriculum responsiveness in the era of economic challenges and unemployment are also covered in this module.

DAEC 142 Training of Trainers
Train the trainer module seeks to impact the quality of training delivered by internal trainers and on professional development too. Some of the topics to be covered include adult learning theory, teaching/learning styles, learning space design, presentation, facilitation, aims, objectives, instructional methods, instructional media, lesson plans and evaluation.

GSAE201 Gender Studies in Adult and Continuing Education
The module introduces the students to the field of gender studies, key gender studies concepts and an awareness of the influence of gender at the family level (such as on the distribution of resources) up to the public sphere shall be made.

Ways of closing gender gaps (such as the passing of policies, laws, gender empowerment and mainstreaming) shall also be studied.

DAEC140 Human Rights Education

The module introduces adult learners to human rights education. The module covers aspects related to the moral basis for human rights and the universality of human rights. It also introduces learners to approaches to facilitating human rights education in adult education contexts. Areas to be covered include democracy, civil society, separation of powers, participation, rule of law and constitutionalism.

DAEC 143 Research Project

Students are expected to conduct a research project in an area related to adult education under the guidance of a supervisor. The research project exposes students to the research process and learners come up with home-grown solutions to the problems.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN CURRICULUM AND INSTRUCTION(EDU78)

Duration:	1 ½ years
Actual Credit Load:	324
Minimum Credit Load:	270
Maximum MBK Credit Load:	330
Total MBKs Credit Load	234
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The programme aims at developing and producing innovative curriculum specialists with requisite knowledge and skills relevant to twenty-first century developmental and educational needs. It seeks to equip the students with world-class knowledge, skills and instructional competencies in the theory and practice of curriculum studies, thereby enabling them to design, develop and produce quality curriculum plans and related curriculum materials that meet the socio-economic needs of their country. Inputs from a needs analysis that the section conducted with stakeholders, namely, industry and commerce, sampled primary and secondary school, and polytechnic and teacher training college educators culminated in this rebranded programme. While it seeks to equip the students with scholarly, academic skills, the programme is premised on the social constructivist philosophy as it seeks to produce specialists capable of contributing to practical socio-economic transformation of their country. It seeks to equip the students with innovative skills that they will apply in the utilisation of current industrial parks in universities around them, and /or the establishment of new industrial parks in schools as venues for collaborative work with industry, commerce, students and the broader community, where saleable products are produced and commercialised.

2.1 ENTRY REQUIREMENTS

Bachelor of Education Degree from an accredited and recognised institution or Postgraduate Diploma in Education, Graduate Diploma in Education, Grad CE, BSc. Education.

Modes of Entry: Block Release and Weekend School

2.0 PROGRAMME CHARACTERISTICS

Areas of study: Education

Specialist Focus: Curriculum Studies

Orientation:

Applying theoretical knowledge and best practices in Curriculum and Instruction to solve problems facing educational settings, taking the lead in charting institution-level innovations for industrialisation and modernisation.

Distinctive Features:

3.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of Master of Education in Curriculum and Instruction can: be employed as lecturers in tertiary institutions and offer consultancy and/or advisory services in a variety of government and private enterprises, including NGOs

and other humanitarian organisations. They can also be employed as school heads, college principals, heads of departments, curriculum developers, curriculum analysts, policy architects, training specialists, education consultants and board members in government departments, private institutions and international organisations.

4.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

The programme shall be delivered through blended learning, field trips, project portfolios, action research, seminar presentations, group tasks, discussions and tutorials.

Assessment Methods:

- Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report (70%) submitted to the Department Examiners Board, and the oral defence (30%) combined.

5.0 LEARNING OUTCOMES

- Identify pertinent issues in the field and apply advanced methodologies and data analysis tools and techniques to conduct research that leads to sustainable innovative solutions, publications and other verifiable outcomes. The research should contribute to the development of innovative ideas in Curriculum Studies.
- Design and implement monitoring and evaluation tools that assure the quality of teaching of curriculum studies at all levels of education and training.
- Translate research output into policy briefs that are readily adaptable to practitioners and policy-makers in the field.
- Demonstrate sound entrepreneurial and management skills that can be applied in educational institutions identify business opportunities, establish enterprises, and commercialise patterns/copyrights resulting from research and development activities.
- Evaluate, review and design curricula that are guided by the philosophy of *unhu/* ubuntu and observance of safe and ethical practices in the field of curriculum and instruction.
- Design, implement, monitor and evaluate innovative educational curricula and policies that foster problem-solving and critical thinking skills, and embrace indigenous knowledge systems and the latest technologies.
- Integrate relevant research and theory to develop a broad repertoire of Curriculum and Instruction, appropriate pedagogical strategies and embrace the latest developments in Information Communication Technology.

6.0 GENERAL PROVISIONS

- The programme consists of 13 modules each worth 18 credits plus a dissertation worth 90 credits.
- A student shall register for all modules offered in the three semesters.
- To be awarded a Master of Education degree, a student shall pass all modules including dissertation, and shall have attained at least 324 credits.

7.0 PROGRAMME ASSESSMENT

- Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report (70%) submitted to the Department Examiners Board, and the oral defence (30%) combined.

8.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules.

9.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

13. MODULE SYNOPSES

MECI701 Advanced Curriculum Planning, Design, Development and Instruction

The module exposes students to the concept's curriculum planning, design, development and instruction. It examines the principles and approaches to curriculum planning and critically analyses the major issues underlying it. The module equips students with skills and competencies to design instructional strategies appropriate for entrepreneurial projects needed by the community.

MECI702 Advanced Psychological and Sociological Foundations of the Curriculum and Instruction

The module equips students with both psychological and sociological tools for analysing and understanding the premises on which curricula and instructional practices are based at different points in time. Furthermore, students shall explore ways in which social, economic and technological determinants of the curriculum and instruction can be applied to innovation and industrialisation projects in classrooms, schools and the community.

MECI703 Advanced Historical and Philosophical Foundations of the Curriculum and Instruction

The module equips students with historical and philosophical antecedents that have shaped curriculum and instruction practices over the years. Through foregrounding curriculum and instruction in past educational practices and attendant educational philosophies, students shall acquire insights pertaining to contemporary curricular practices. They shall utilise these historical and philosophical insights as a theoretical platform for designing and producing curriculum and instruction programmes relevant to innovation and industrialisation.

MECI704 Advanced Curriculum Evaluation

The module explores the meaning, purposes and processes of curriculum evaluation in its various forms. It also explores some models of curriculum evaluation and analyses the personnel for evaluation and their roles. Students shall explore how analysis and evaluation inform each other. Through studying the various evaluation models and meta-evaluation, students shall acquire evaluation research skills that enable them to improve existing curriculum and instructional designs. They shall use research-based evidence to craft new educational programmes relevant to innovation and industrialisation.

MED731 Advanced Research Methods and Statistics

The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has a potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MICT732 Advanced Information Communication Technology in Education

The module exposes students to the theory and practical application of information and communication technologies in relation to Curriculum and Instruction. In this module, students learn how to apply technologies to teaching and learning in the workplace and to exploit entrepreneurial opportunities for innovation and industrialisation.

MECI 705 Advanced Curriculum Analysis

The module exposes students to a deeper understanding, knowledge and research skills necessary for analysing curricula. Students shall study topics such as comparative analysis, functional analysis and materials analysis of current global and local curriculum, and instructional designs among others. Through curriculum analysis, students shall develop skills that enhance their ability to design curriculum and instruction programmes that enhance innovation and industrialisation.

MECI 706 Current Themes and Discourses in Education and the Curriculum

This module seeks to acquaint students with skills to analyse, synthesise and evaluate critical themes, issues and trends as much as they influence the curriculum and instruction in particular and education in general. It enables students to explore ways in which school programmes can use some of the current themes and discourses in implementing the outcomes-based curriculum to propagate innovation and industrialisation.

MECI 707 Advanced Curriculum Change and Innovation

This module puts into perspective the concept of curriculum changes and how it differs from curriculum innovation. It emphasises the need for planned change in school programmes. Using strategies for curriculum change and innovation, students shall explore ways of involving teachers in applying curriculum and instruction to the production of technological and entrepreneurial artefacts by teachers and learners.

MED733 Gender Discourse in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and education in particular. It inculcates a critical analysis of the concept "gender," its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MED704 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research, which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at Masters Level.

FMED732 Financial Management in Education Institutions

The module introduces financial management practices followed in schools and other educational institutions. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MECI708 Curriculum Policy Analysis in Post-Colonial Africa

The module introduces students to various ways of critically analysing curriculum policy within a broad social, economic and political context, considering contemporary developments in education policy in institutional, local, national and global contexts. Students explore existing policy issues and practices and apply insights drawn from current discourses such as literacy studies and critical theory to innovation and industrialisation.

MLMD111 Advanced Guidance and Counselling for Educational Managers

The module introduces students to problems of the external environment, which, often impact heavily on the education environment, giving rise to a host of social problems and challenges in educational settings. This module helps students to fulfil their roles as effective educational managers by equipping them with a wide range of social and personal support skills, which enable them to provide guidance and counselling to learners and educators.

REGULATIONS FOR MASTER OF EDUCATION DEGREE IN EDUCATIONAL LEADERSHIP, MANAGEMENT AND DEVELOPMENT (EDU08)

Duration:	1 ½ years
Actual Credit load:	324
Minimum Credit Load:	288
Maximum Credit Load:	330
Total MBKS Credit Load:	234
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The programme aims to develop serving and future educational leaders and managers with requisite skills in the theory and practice of educational leadership, management and development. This will be achieved through the advancement of critical analysis, and comprehension of theoretical foundations of educational leadership and management for innovative application to modern educational development.

1.1 ENTRY REQUIREMENTS

Bachelor of Education degree or approved equivalent from any recognised university; OR a Postgraduate Diploma in Education or approved equivalent from a recognised university.

1.2 Mode of Entry: Block release or weekend school

2.0 PROGRAMME CHARACTERISTICS

Areas of study: Education

Specialist Focus: Educational Leadership, Management and Development

Orientation:

Applying theoretical knowledge and best practices in Leadership, Management and Development to solve problems facing educational settings, taking the lead in charting institution-level innovations for industrialisation and modernisation

Distinctive Features:

3.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates of the MED in Educational Leadership, Management and Development can be employed as lecturers in tertiary institutions offer consultancy and/or advisory services in a variety of government and private enterprises including NGOs and other humanitarian organisations. They can be employed as school heads, college principals, heads of departments, policy architects, training specialists, education consultants and board members in government departments, private institutions and international organisations and can also become self-employed in educational leadership, management and development entrepreneurs who can partner government in the provision of education through establishing private educational institutions and providing consultancy as trainers in educational leadership and management.

Graduates can further their education by embarking on advanced (Doctoral) study in either PhD Educational Leadership, PhD Management or PhD Development.

4.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

The programme shall be delivered through blended learning, research, seminar presentations, group tasks and tutorials.

Assessment Methods:

- Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report (70%) submitted to the Department Examiners Board, and the oral defense (30%) combined.

5.0 LEARNING OUTCOMES

- Use critical thinking to evaluate and interpret evidence, and apply theories and principles of educational leadership and management;
- Appreciate the complexity of socio-cultural diversity and inequalities in their application of educational leadership, management and development skills in diverse educational institutions;
- Demonstrate effective communication skills following professional practices acceptable within education systems and stakeholders; and
- Apply basic research methods in educational leadership that are sensitive to participants' and stakeholders' humanity and developmental needs.

6.0 GENERAL PROVISIONS

- The programme consists of 13 modules each worth 18 credits plus a dissertation worth 90 credits.
- A student shall register for all modules offered in the three semesters.
- To be awarded a Master of Education Degree in Leadership, Management and Development a student shall pass all modules including dissertation, and must have attained at least 324 credits.

7.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

8.0 GRADING AND DEGREE CLASSIFICATION

- 80%+ - Distinction
- 70%-79% - Merit
- 60%-69% - Credit
- 50% -59% - Pass
- 49% - Below – Fail

9.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:

Maters full time/Block Release 50% for each of the two levels.

10.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
MLMD101	Advanced Theories of Leadership and Management	18
MLMD102	Leadership, Development and Quality Issues in Education	18
MLMD103	Organisational Behaviour	18
MED 731	Advanced Research Methods and Statistics	18
MICT732	Advanced Information Communication Technology in Education	18

Level 1 Semester 2

MLMD108	Managing Change of Innovation	18

One elective from the following

MLMD109	*Advanced Economics of Education	18
MLMD110	*Programme Evaluation in Education	18
MLMD111	*Advanced Guidance and Counselling for Educational Managers	18
MLMD112	*Leading Learning in Crises Contexts	18
MLMD113	Educational Planning and Evaluation	18
MED704	Dissertation	90

11.0 MODULE SYNOPSES

MLMD101 Advanced Theories of Leadership and Management

The module provides students with a deeper understanding and application of leadership and management theories to educational leadership, management and development by tracing the evolution of leadership theory from the Great Man/Trait Theory, Psychodynamic Leadership, Ethical Leadership, Synodic Leadership, Teacher Leadership, Distributed Leadership to contemporary theories such as Team leadership and Transformational leadership, as well as the evolution of management theory from classical to contemporary approaches and exploring their relevance to the practice of educational leadership and development.

MLMD102 Leadership Development and Quality Issues in Education

The module exposes students to developmental issues in the leadership scenario as portrayed by ancient theories and current best practices and approaches in leadership for the pursuance of leadership development and quality issues in education. Students further explore the rationale for quality education, issues of equity, equality and relevance in the international forum, and education traditions and associated notions of quality. Topics covered include the concept of quality, determinants of quality, quality assurance, total quality management, continuous improvement strategies and parental involvement and quality in schools.

MLMD103 Organisational Behaviour
This module provides a comprehensive analysis of individual and group behaviour in organisations by educational managers through the lens of Organisational behaviour theory and practices. Organisational behaviour brings a thorough understanding of how organisations can be managed more effectively and at the same time enhance the quality of education personnel work life through studying human behaviour at workplaces. Aspects to be covered include, rewarding behaviour, stress, culture, organisational structure and leadership.

MLMD104 Supervision, Assessment and Evaluation
The module takes students through theoretical foundations of supervision and critical analyses of practices in the supervision of education personnel. The module further exposes students to principles of testing and evaluation, the typologies, tools and techniques employed in the assessment and evaluation of teaching and learning to include continuous assessment and end-of-cycle testing/examination.

MED731 Advanced Research Methods and Statistics
The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methods, procedures and techniques; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have a potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MICT732 Advanced Information Communication Technology in Education
This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MLMD105 Strategic Human Resource Development in Education
The module emphasises the role of the education manager as the chief Human Resources manager in educational set-ups. It brings in a broad but intense approach to strategic and human resources functions. Key areas covered among others include aspects of strategic human resource planning, management and development that include person specification, job analysis and measurement, recruitment, selection, appointment, induction; performance appraisal; staff development and staff development approaches, and staff appraisal issues, staff rights, welfare matters, processes and conditions of service.

MED743 Gender Discourse in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept "gender," its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development,

MLMD106 Policy and Legal Issues in Education
The module's point of emphasis is that the educational manager is the custodian of educational policy, the implementer of educational policy and the interpreter and implementer of legal provisions that relate to educational organisations. As such students shall master policy and legal provisions that guide educational managers in their management work. The module focuses on policy formulation models and their application to the education, training and management scenarios. This module is based on the idea of the interaction between education and politics; political ideology, policy analysis and the philosophy of the land.

MLMD107 Corporate Ethics and Financial Management in Education
The module introduces corporate ethics and financial management practices followed in schools and other educational institutions. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions

MLMD108 Managing Change and Innovation
The module equips students with theories of change to manage change, development and innovation in schools. Key aspects to be covered include the definition of change, innovation based on the management of organisations, change processes in innovative schools, types of innovation and the change triggers from both internal and external sources, and management of decision making for the reduction of resistance in the organisation.

A student shall select one elective module from:

MLMD109 Advanced Economics of Education
The module reinforces and advances economic concepts related to educational management already learnt. The module introduces students to the nature and scope of Economics as it relates to the human, material and financial resources required for the production, distribution and consumption of education as a social service. The effects of macro – economic fundamentals such as the fiscal and monetary policy on education and development shall feature prominently along with issues of education, training and employment in the context of educational leadership and management

MLMD110 Programme Evaluation in Education
The module enables students to master the concepts of measurement, assessment and evaluation of educational programmes. This module exposes students to relevant theories, models and practices for evaluating educational programmes for organisational effectiveness and efficiency.

MLMD111 Advanced Guidance and Counselling for Educational Managers
The module exposes problems of the external environment, which often impact heavily on the education environment and give rise to a lot of social problems and challenges in educational settings. The overall thrust of this module is to equip postgraduate students with social and personal support skills, which allow them to provide much-needed guidance and counselling to the learners and educators.

MLMD112 Leading Learning in Crises Contexts

The module exposes students to historical experiences and perspectives on leading schools in times of crises or pandemics. This requires reflections on global and local pandemics or crises in terms of provisioning for learning and assessment, capacity building, challenges and strategies towards blended learning and the place of technology in educational development.

MLMD113 Educational Planning and Evaluation
The module intends to introduce candidates to the world of quantitative planning and evaluation techniques using planning and evaluation models in the education context. Emphasis shall be placed on the practical application of planning, mini research and evaluation techniques as they apply to educational planning programmes. Candidates shall be expected to evaluate and identify opportunities for change and innovation in educational planning. The role of the educational manager in the whole process of educational planning dominated all topics that are covered by this module**.**

MED744 Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a PhD holder or Professor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research, which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at Masters Level.

REGULATIONS FOR MASTER OF EDUCATION IN LIFELONG LEARNING AND GLOBAL CHANGE (EDU79)

Duration:	1 ½ years
Actual Credit Load:	306 Credits
Minimum Credit Load:	270 Credits
Maximum Credit Load:	330 credits
Total MBKS Credit Load:	288 credits

ZNQF Level: 9

1.0 PURPOSE OF THE PROGRAMME

To equip professional adult educators with innovative, managerial, leadership and problem-solving competencies which they should apply in their areas of specialisation for productivity.

To produce creative professionals who combine theoretical, practical and entrepreneurial skills, which they can apply in real-life situations in line with Agenda 2030 and Education 5.0.

1.1 ENTRY REQUIREMENTS

Bachelor of Lifelong Learning Degree or equivalent from an accredited and recognised institution.

2.0 PROGRAMME CHARACTERISTICS

Areas of study: Lifelong Education

Specialist Focus: Lifelong Learning

Orientation:

Application of theoretical knowledge and evidence that informs best practices in lifelong learning to solve problems facing society with a thrust on innovations for industrialisation and modernisation.

Distinctive Features:

3.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Master's holders can find employment in different government ministries, public sector and Non-Government Organisations as managers, lecturers, trainers, development workers and informal workers. Graduates of the Master of Education in Lifelong Learning can further their education by embarking on (Doctoral) studies in the area of Lifelong Learning and Global Change.

4.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Blended learning, project portfolios, seminar presentations, field work, action research, tutorials, group tasks and discussions

4.1 ASSESSMENT METHODS

Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.

- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report (70%) submitted to the Department Examiners Board, and the oral defense (30%) combined.

5.0 LEARNING OUTCOMES

- Apply Soft Skills: Unhu/Ubuntu and Critical Thinking.
- Apply sound Research and Technological Competencies.
- Demonstrate mastery of subject content competencies.
- Ability to adapt to changes taking place.
- Ability to analyse and exploit entrepreneurial opportunities.
- Construct a creative learning environment.
- Ability to utilise cultural heritage for social and economic development.
- Capacity to effectively communicate using national and other languages.
- Ability to manage finances.
- Ability to develop innovative curricula.

6.0 GENERAL PROVISIONS

- The programme consists of 13 modules each worth 18 credits plus a dissertation, which is worth 90 credits.
- A student shall register for all the modules offered in each semester
- To be awarded the Master of Education in Lifelong Learning a student shall pass all modules including the dissertation, and shall have attained 306 credits

7.0 PROGRAMME ASSESSMENT

- Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report (70%) submitted to the Department Examiners Board, and the oral defense (30%) combined.

8.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules.

9.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

10.0 GRADING AND DEGREE CLASSIFICATION

- 80%+ - Distinction
- 70%-79% - Merit
- 60%-69% - Credit
- 50% -59% - Pass
- 49% - Below - Fail

11.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:
Maters full time/Block Release 50% for each of the two levels.

12.0 PROGRAMME STRUCTURE

13. MODULE SYNOPSES

MLLL701 Advanced Theories of Lifelong Learning

The module enables students to develop a basic understanding of the behaviour of adults to enhance their ability to develop better learning programmes and strategies. Students are also expected to be independent learners who are able to source information on their own and judge the worth of such material. Various philosophies and their roles in the design, implementation and evaluation of learning programmes in the various fields studied.

MLLL702 Community Development

The module equips learners with relevant skills to gain insights into the dynamics of Sustainable Community Development. It also helps candidates to profile the tenets of development in under developed countries; narrate development theories; identify players in the development paradigm and determine global development trends. Areas to be covered include point of entry, purpose of community development, and principles of community development.

MLLL703 Trends and Issues in Lifelong Learning

The module introduces the students to the current major trends, issues and topics worldwide in lifelong learning. It emphasises the acquisition and utilisation of knowledge and skills in the fields of lifelong learning. Topics covered include lifelong learning, public policy, education and training, ICT and globalisation.

MLL704 History of Adult Education

The module enables students to understand factors that influenced the emergence of Adult Education movements in different parts of the world at different times and the effects of these movements on social, economic and political developments in the respective countries. The focus is on the origins and growth of modern Adult Education in different countries.

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MED731 Advanced Research Methods and Statistics

The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MLLL711 Workers Education and Industrial Labour

The module examines the meaning, evolution and dimensions of the concept of the worker's education as part of the whole field of adult education within the context of a detailed analysis of the industrial labour relations across the globe in general, and Zimbabwe in particular. Factors that influence or facilitate the growth of the movements of worker's education in the former metropolitan countries as well as in Zimbabwe shall be assessed. Some of the areas to be covered include Labour Unions, Collective Bargaining, and Occupational Safety for the workers.

MLLL705 Strategic Management in Lifelong Learning

The module focuses on the managerial tasks of crafting, implementing and executing organisational strategies. Students are equipped with the skills to keep a continuous eye on the goals and objectives of the organisation. Topics covered include

Strategic Management process, environmental scanning, strategy formulation, strategy implementation strategic leadership, corporate governance, business ethics and strategy evaluation.

MLLL706 International Relations and Lifelong Learning

The module addresses relations between nations across the globe. The important topics covered include areas of trade and economic co-operation in general; scientific, technical and cultural exchange; development, aid, diplomatic ties and military alliances. Emphasis is on North-South relations. Some of the areas to be covered include Theories of International Relations, Role of International Studies in Lifelong Learning, Diplomacy, Development and Debt.

MLLL707 Gender Studies and Development in Lifelong Learning

The module exposes students to theoretical and practical training on managing development from a gender perspective. Gender theories and approaches to development shall be applied and critically analysed at the project level. Topics to be covered include approaches to development; gender planning, designing and implementation of projects; gender budgeting, development interventions and modes of gender appraisal.

MLLL708 Conflict Management and Resolution in Lifelong Learning

This module introduces the concept of conflict management. Elements of peace, peace-making and peace-building are studied. It empowers educators with skills to foster peace and conflict resolution in communities and institutions. They are further empowered with ideas on conflicts, negative aspects of conflicts, why violence is the worst form of social change, causes of conflict and dealing with conflict. Learners shall help in the peace-building process and activities in communities. Areas to be covered include causes of conflict, theories of conflict, ways of resolving conflict and effectiveness of unresolved conflict to individuals, families and nations.

MLLL801 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research, which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation etc. Students are expected to produce and submit a dissertation that meets the standards of research work at Masters Level.

MLLL709 Change Management and Development

The module provides valuable change management models, processes, strategies and practices for implementation in different contexts for organisational effectiveness. Concepts of organisational development, change management strategies, organisational effectiveness and efficiency. Technological leadership skills for the contemporary world shall be dealt with to equip students with the skills needed to attain Agenda 2030 targets.

MLLL710 Entrepreneurship Education and Business Innovations

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN TERTIARY EDUCATION (EDU80)

Duration:	1 ½years
Actual Credit Load:	252
Minimum Credit Load:	270
Maximum Credit Load:	330
Total MBKS Credit Load:	216
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The programme seeks to equip students with educational theory and practical skills that are required for effective teaching and learning in Tertiary and Higher Education.

2.0 ENTRY REQUIREMENTS

- **Normal Entry**

A first degree from a recognised university or institution or any other degree recognised by the university.

Teaching/training experience in higher and tertiary education institutions.

2.1 PROGRAMME CHARACTERISTICS

Areas of study: Tertiary Education

Specialist Focus: Andragogy in tertiary education

Orientation:

Application of appropriate theories, practices and technologies in the handling of young and mature adults.

Distinctive Features:

3.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates have career opportunities in a wide array of institutions and organisations, including being lecturers in universities and tertiary institutions, researchers in research institutions, and consultants in public sectors and Non-Governmental Organisations.

Further studies: Doctoral studies in Adult and Lifelong Learning.

4.0 PROGRAMME DELIVERY

- Teaching and Learning Methods:

Using blended learning, action research, project portfolios, seminar presentations, tutorials, group tasks and discussions.

4.1 ASSESSMENT METHODS

- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.

5.0 LEARNING OUTCOMES

- Demonstrate an ability to analyse the higher and tertiary education context.
- Develop an understanding of teaching and learning practices in higher and tertiary education.
- Perform the core elements of the teaching task (planning, design, communication, assessment, evaluation).
- Demonstrate an ability to infuse innovation, critical and higher order thinking skills in teaching.
- Use a range of assessment techniques to support and evaluate student learning.
- Critically reflect on the relationship between the five pillars of Education 5.0 (Teaching, research; community engagement, innovation and industrialisation).
- Incorporate the use of ICTs in the delivery of teaching and learning.
- Reflect on and critique their teaching practices in relation to student and peer assessment of their teaching.

6.0 GENERAL PROVISIONS

- The programme consists of 8 modules.
- Each module is worth 18 credits except the Research Project and Lecture Practice and Microteaching worth 36 credits each.
- A student shall register for all the modules offered in each semester.
- To be awarded the Postgraduate Diploma in Tertiary and Higher Education, a student shall pass all modules and shall have attained 252 credits.

7.0 PROGRAMME ASSESSMENT

Continuous Assessment shall contribute 40% and the examination shall contribute 60 % of the final mark. To pass a candidate should obtain at least 50% of continuous assessment and examination combined.

8.0 PROVISION FOR PROGRESSION

To proceed from one level to another, the candidate must obtain the minimum number of credits required but must fail in not more than two core modules. However he /she must pass all such core modules before obtaining the degree. To proceed to the next level, the candidate must at least pass 75% of the modules.

9.0 FAILURE TO SATISFY EXAMINERS

If a candidate fails all modules at the end of the first semester, he/she shall retake failed modules.

10.0 GRADING AND DEGREE CLASSIFICATION

See General Academic Regulations

11.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows:
Maters full time/Block Release 50% for each of the two levels.

12.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
PDTE531	Foundations of Education	18
PDTE532	Assessment and Evaluation Techniques	18
PDTE533	Instructional Technology	18
PDTE534	Curriculum Issues in Tertiary Education	18

Level 1 Semester 2

PDTE535	Administrative Issues in Tertiary Education	18
PDTE536	Didactics in Tertiary Education	18
PDTE537	Teaching Practice in Tertiary Education	36
PDTE538	Dissertation	36

13.0 MODULE SYNOPSES

PDTE531: Educational Foundations

The module exposes students to the nature, functions, branches and theories of philosophy in education, implications of Philosophical and Sociological Foundations on Education 5.0 doctrine, Historical influences on higher education in Western society; history and importance of the sociology of education to higher education; dominant contemporary theories; nature, theories of learning; student counselling and importance of Psychology to a higher education practitioner.

PDTE532: Student Assessment and Evaluation Technics

The module exposes students to theory, practice and types of student assessment, objectives, student learning outcomes and measurement, Bloom's, Anderson & Krathwohl's taxonomies, item writing and analysis, marking guides, e-assessment, analysis and grading tests and examinations, moderation of examination papers,internal and external assessor's reports, student support, academic integrity and plagiarism, assessing practical work, attachment supervision and the university credit system.

PDTE533: Instructional Technology

The module exposes students to synchronous and asynchronous learning, file management; MS word processing, designing innovative and commercialise teaching/learning content, statistical packages, PowerPoint for instruction, virtual classrooms and laboratories, multimedia, smart classrooms, message boards, Internet for research, social media, designing online questionnaires/surveys, website design, hyperlinks, uploading teaching material; e-marking; online tests, conference lectures; e-learning software.

PDTE534: Curriculum Issues in Tertiary Education

The module introduces students to models, components, elements, types and stakeholders of curricula, Bloom's, Anderson and Krathwohl's taxonomies of learning domains, curriculum development: design, planning, implementation, monitoring, assessment and evaluation; module writing; open and distance learning (ODL) packaging; infusing contemporary issues into curriculum design, indicators of a sustainable curriculum; analysis and review; evaluation models.

PDTE535: Administrative Issues in Tertiary Education

The module covers management in higher education covering management structures, formal and informal organisations, theories; principles and functions of management; culture and management; lifelong learning; policy design, the policy cycle; quality management in higher and tertiary education: quality assurance structures, quality enhancement, leadership in educational institutions: styles, theories and evaluation of leadership effectiveness; management, personal attributes, and professional ethics.

PDTE536: Didactics in Tertiary Education

The module introduces teaching/training methods. It also explores the characteristics of an adult learner. The use of technology in teaching and Education 5.0; andragogic principles; the adult learner; improving student throughput; conditions of learning; learning styles; motivation; effective teaching, training, facilitation and learning approaches: active/ interactive methods/approaches and strategies; challenges, reflections on theory and practice.

PDTE537: Teaching Practice in Tertiary Education

The module equips students with innovative skills and strategies of teaching, training and facilitation, E-learning in teaching Microteaching session lecture preparation; layout of presentation; lecture execution and its steps; methods; use of multimedia; application to real life; content mastery; professional aspects: attitude/conduct, dress and appearance, language use, voice projection, time management, rapport; documentation: resource file, course outlines, lecture presentations, lecture evaluations.

PDTE538: Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research, which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at Postgraduate Level.

DEPARTMENT OF HUMANITIES, BUSINESS DEVELOPMENT AND ARTS EDUCATION

REGULATIONS FOR THE BACHELOR OF EDUCATION DUAL HONOURS DEGREE IN COMMERCE AND ENTREPRENEURIAL STUDIES (EDU39)

Duration:	**4 Years**
Minimum Credit Load:	**480**
Maximum Credit Load:	**540**
Maximum MBKs Credit Load:	**384**
ZNQF Level:	**8**

1.0 PURPOSE OF THE PROGRAMME

To prepare pre-service teachers to teach 2 subjects (Economics, Accounting, Business Studies, Physical Education, Sport and Mass Displays) up to 'A 'Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry: To be admitted, an applicant should have passed two 'A' levels in any two of the following subject areas: Accounting; Business Studies; Economics; Physical Education, Sport and Mass Displays, or equivalent. In addition, the applicant should have passed 5 'O' Levels that should include English Language and Mathematics. Equivalent qualifications from other institutions will be considered.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Commerce and Entrepreneurial Studies Education
Specialist Focus: Training Commerce and Entrepreneurial Studies Education Teachers

Orientation: Analysis of economic problems and designing strategies to address the problems. Development of entrepreneurial and management skills.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants.

Further Studies: Master's and Doctoral studies in Commerce education

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods Lectures, tutorials, seminars, group work, industrial visits, micro teaching, teaching practice, research project, individual independent study, and virtual and online learning.

6.0 LEARNING OUTCOMES

A holder of the Bachelor of Education Dual Honours degree in Commerce and Entrepreneurial Studies will be able to:

- Use innovative technology-enhanced teaching strategies to implement curriculum in two commercial subjects.
- Apply sound research and technological techniques when carrying out research in Commerce and Entrepreneurial Studies education. monitor, assess and evaluate learners, learning processes, tasks and projects related to Commerce and Entrepreneurial Studies education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialization in the commercials field.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

For the Bachelor of Education Dual Honours degree in Commerce and Entrepreneurial Studies Programme, candidates shall study at least 34 modules.

- Each module is worth 12 credits except for the Research Project and Teaching Practice which are worth 24 and 120 credits respectively.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

Distribution of Common Modules per Level

All students under the BEd Dual Honours Commerce and Entrepreneurial Studies degree are expected to study all the twelve common modules specified in the following table which shows the distribution of these modules per level.

Level 1 Semester 1
Common Modules

Code	Module Description	Credits
BED132	Applied Educational Foundations	12
BED144	School Curriculum and Innovation	12
CS131	Basic Communication Skills	12
Level 1 Semester 2		
BED133	Educational Technology and Innovation	12
BCHS 131	Culture and Heritage Studies	12
Level 2 Semester 1		
BED231	Assessment and Evaluation Techniques	12
EDGS231	Gender Studies for Educators	12
Level 2 Semester 2		
BED131	Research Methods and Statistics	12
BED139	Teaching, Educational Media & Micro-Teaching	12
BEIE501	Entrepreneurship and Industrialisation in Education	12
Level 3 Semester 1		
BED314	Clinical Report	30
Level 3 Semester 2		
BED321	Teaching Practice	30
BED323	School-Based Teaching Practice Assessment	20
BED324	Teaching Practice Exit Competencies	40
Level 4 Semester 1		
BEFM231	School Administration & Financial Management in Education	12
Level 4 Semester 2		
BED323	Research Project	24

BED132 Psychological Perspectives and Issues in Primary Education
The module explores philosophical, psychological and sociological theoretical perspectives and their application to education. Students are exposed to aspects of the module which include the intellectual, emotional, social, physical and moral development of learners in different environments. Contextual learning and critical engagement of ideas are core to this module.

BED133 Educational Technology and Innovation
This module seeks to equip students with skills for improving learning and teaching through the use of various instructional media that include audio-visual communication. The module will also familiarise students with different computer software including MS Word, MS Excel, MS Access, PowerPoint and Publisher.

BED144 School Curriculum and Innovation
Schools' curriculum development is guided by basic curriculum models, as well as modalities of dissemination associated with each model. Barriers to implementation, curriculum evaluation, and the rationale for changing the curriculum are considered. This module introduces students to the theory of curriculum. It explains the concept of "curriculum," its elements, the forces that shape it as well as the basic foundations of the curriculum. Students are exposed to the process.

BCHS131Culture and Heritage studies
This module introduces scholars to the definition terms of culture and heritage. The module exposes the learners to issues like civic education, spirituality, tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners are challenged to be tolerant and enjoy the multicultural status of the nation.

BEIE501 Entrepreneurship and Financial Management
The module gives basics on how business is managed from a small scale to a high scale. The module exposes the learners to various business models and financial management systems that can be used to start and sustain business projects. Marketing strategies also form part of this module.

EDGS231 Gender Studies for Educators
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace, and in all their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, and Gender Issues in society, Redressing Gender Imbalances, Empowerment and Strategies for creating a gender responsive environment. Every student has to pass the module to graduate.

BED231Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes analysis of the concepts evaluation, assessment and measurement in education, contemporary ideas on how to improve assessment and evaluation in schools, test designing, analysis of test results, national examinations and grading.

BED131 Research Methods and Statistics
The module introduces the learners to the basic principles of research. Qualitative and quantitative approaches to research will be used. A mixed methods research approach shall be introduced in this module. Research instruments shall be explored to give the learners an appreciation of these instruments.

BED232 Research Project
In the final year of their studies, students carry out research in a subject-related area. The research project enables the students to sharpen their research skills and at the same time apply the content learnt during the studies. At the end of the projects, students are expected to have acquired research skills and learnt presentation and project proposal writing skills.

BEIE501 Entrepreneurship and Industrialisation in Education
This module equips students with the relevant knowledge to successfullyset up and operate an educational institution. Issues covered include identifying the educational needs of communities, factors to consider in deciding to set up an educational institution, legal frameworks, school rules and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and marketing the new educational ventures.

SUBJECT SPECIFIC MODULES

ACCOUNTING AND FINANCIAL LITERACY FOR DEVELOPMENT MODULES

Level 1 Semester 1

Code	Module Description	Credits
AFLD 101	Basic Accounting Concepts and Principles	12

Level 1 Semester 2

AFLD102F	Financial Reporting	12

Level 2 Semester 1

AFLD201	Financial Accounting for Companies	12
AFLD305	Applied Accounting Education	12

Level 2 Semester 2

AFLD202	Costing	12

Level 4 Semester 1

AFLD401	Management Accounting	12
AFLD402	Audit Theory and Practice	12

Level 4 Semester 2

AFLD403	Financial Statement Analysis	12
AFLD405	Company Law and Financial Reporting	12

MODULE SYNOPSES

AFLD101 Basic Accounting Concepts and Principles

This module is designed to introduce the basic accounting concepts and principles as a foundation for further study. It covers the definition of terms as well as the basic steps of accounting for business transactions. The module enables students to carry out the double-entry accounting system for sole traderships and to correct book-keeping errors.

AFLD102 Financial Reporting
This module is designed to introduce the presentation of basic financial statements such as the income statement and the statement of financial position, for both incorporate and non-corporate businesses. It also covers year-end adjustments for the financial statements.

AFLD 305 Applied Accounting Education
The module is designed to introduce students to planning and teaching techniques. It looks at issues such as compiling the school syllabus from the national syllabus, preparing schemes of work from the school syllabus and detailed lesson plans from the scheme of work. Students are also introduced to the process of evaluating all the planned activities. They are exposed to teaching approaches in general and to approaches to teaching Accounting in particular.

AFLD 201 Financial Accounting for Companies
The module enables students to gain knowledge and insight into the drafting of financial statements of companies to comply with the requirements of the Companies Act, Chapter 24:03 and International Financial Reporting Standards [IFRS's]. The module also introduces the student to different types of financial instruments and their characteristics.

AFLD202 Costing
This module covers basic costing concepts including the definition of cost terms and purposes including costs for inventory valuation and income determination, the behaviour of costs and the classification of costs from various perspectives. It also involves the two costing systems which are marginal (variable) costing and absorption (total) costing. The characteristics of each costing method are analysed.

AFLD401 Management Accounting
This module introduces the students to the concepts of management accounting as distinct from costing. It covers budgets and budgetary control, including various types of budgets and the needs for them and behavioural aspects of budgets.
The module also focuses on concepts of capital budgeting and capital investment appraisal. Specifically, it looks at the choice of different methods of assessing the viability of capital projects to further the goals of financial management.

AFLD402 Audit Theory and Practice
The module introduces the student to auditing theory, which includes basic auditing concepts, approaches and generally accepted auditing standards. The module lays a foundation for more advanced studies in auditing at level four. It enables students to audit the processes of business entities.

AFLD403 Financial Statement Analysis
This module is designed to introduce the student teachers to concepts of financial statement analysis with a view to assessing a firm's current strengths and weaknesses as well as its prospects. Various models of financial statement analysis shall be discussed.

AFLD405 Company Law and Financial Reporting
The module equips the student with a sound understanding of the effects of company law on financial reporting. By the end of the module, the student should have mastered the Companies Act's legal provisions on financial reporting. The student should also be able to understand the Zimbabwe Stock Exchange requirements in aiding financial reporting.

BUSINESS STUDIES AND ENTERPRISE DEVELOPMENT MODULES

Level I Semester 1

Code	Module Description	Credits
AFLD403	Financial Statement Analysis	12
AFLD405	Company Law and Financial Reporting	12

HUBS103	Human Resource Management	12

Level 2 Semester 1

HUBS201	Entrepreneurship Management	12
HUBS202	Applied Business Studies Education	12

Level 2 Semester 2

HUBS203	Financial Accounting for Managers	12

Level 4 Semester 1

HUBS401	Production Management	12
HUBS402	Project Management	12

Level 4 Semester 2

HUBS403	Applied Marketing	12

MODULE SYNOPSES

HUBS101 Management Principles

The module covers management thought, decision-making evolution of management, managerial functions (planning, organising, leading and controlling), delegation of duties and responsibilities, structure of organisations, leadership types and styles, theories of motivation, and management of change. It also covers managing change, organisational culture, corporate social responsibility, organisational structure and design, and strategic management.

HUBS102 Business Communication

The module focuses on types of business communication; effective written and oral forms of communication, internal and external communication, listening skills, communication process; business report writing, formal and informal reports; guidelines, functions and types of business reports; meetings, types of meetings, resolutions, minutes of meetings; communication for employment; oral presentations and guidelines for oral presentations. It equips students with good communication skills.

HUBS103 Human Resource Management

The module covers HRM functions; the traditional Personal Management and the Human Resource Management concept; human resource models and the strategic role of Human Resource Management, strategic importance of HRM, job analysis and design, human resource planning, labour laws; staff recruitment, selection, retention, promotion, demotion and termination of employment.

HUBS201 Entrepreneurship Management

The module focuses on the utilisation of resources, breaking barriers to entrepreneurship, decisions in small businesses, small business ownership, financing a small business, and sources of finance. The module also focuses on management that fosters a culture of innovation, risk management, employee empowerment, efficient capital, franchising, innovation and creativity, niche marketing, small businesses, and e-commerce.

HUBS203 Financial Accounting for Managers

The module exposes students to basic accounting for managers. Aspects covered include accounting records and double entry accounting system, accounting concepts and measurements, simple income statements and statements of financial position, budgeting, cash flow statements, use of accounting ratios to analyse and interpret financial statements, capital structure and leverage, and generally accepted accounting practice (GAAP). Students prepare financial statements for use by managers.

HUBS401 Production Management

The module covers production management strategies; goals and objectives of production management; the production management system; performance measurement and strategic role of the production management system; operations and supply management; project management; manufacturing and service processes; quality management, lean manufacturing; demand forecasting techniques; inventory control techniques; and scheduling.

HUBS202 Applied Business Studies Education

The module covers the aims of Business Studies education, theories of learning, national and school syllabuses, planning and scheming, teaching methods, use of teaching media and information communication technology; and test construction in Business Studies. It enables students to demonstrate good teaching skills.

HUBS402 Project Management
The module focuses on network analysis and project scheduling techniques, project structuring, project finance, hiring and management of personnel, control of materials, monitoring the project, budgeting, and project completion. It enables students to initiate and manage projects.

HUBS403 Applied Marketing
The module covers the marketing function, marketing mix and practices, the difference between marketing and selling concepts, strategic marketing, consumer behaviour, types of markets, marketing information and research techniques, target marketing and segmentation, marketing communication, marketing strategies, direct marketing, personal selling advertising, sales promotion; products, services and branding, product life cycle, development of new products; pricing strategies; retailing and wholesaling and e-commerce. It enables students to carry out marketing functions in business organisations.

ECONOMICS AND DEVELOPMENT POLICY MODULES

Level 1 Semester 1

Code	Module Description	Credits
HUEC101	Applied Economics 1	12
Level 1 Semester 2		
HUEC102	Applied Statistics for Economists	12
HUEC103	Labour Economics	12
Level 2 Semester 1		
HUEC201	Applied Economics Education	12
Level 2 Semester 2

HUEC402	Industrial Economics	12
Level 4 Semester 2		
HUEC403	International Trade Theory and Practice	12
HUEC404	Investment Analysis	12

Module synopses

HUEC101 Applied Economics 1
The module focuses on basic economic problems, economic systems, demand and supply, market equilibrium, elasticity concepts, and the theory of the firm. It enables students to design strategies that address the basic economic problems to attain efficiency in the production and consumption of goods and services. Students shall apply elasticity concepts in production and consumption decision-making.

HUEC103 Labour Economic
The module covers demand and supply of labour, market equilibrium, Marginal Revenue Product Theory, wage determination, competitive and non-competitive labour markets, collective bargaining,minimum wage legislation and other determinants of wage,; trade unionism, unemployment and economic policies to curb unemployment, and trade-off between unemployment and inflation.

HUEC102 Applied Statistics for Economists
The module focuses on theoretical and practical approaches to decision-making and business forecasting, hypothesis testing, goodness of fit, linear regression, index numbers and time series analysis. Students shall make forecasts of production output, sales and profits given different scenarios of risk.

HUEC201 Applied Economics Education
The module covers the aims of Economics education, practical theories of learning, national and school syllabi, scheming and lesson planning, teaching methods, instructional media, ICT, and testing in Economics. Students shall be able to plan, teach and evaluate learning. Evaluation includes both formative and summative evaluation. Particular attention is paid to subject-specific pedagogical strategies.

HUEC202 Applied Economics II
The thrust of the module is on budget constraints, utility maximisation, revealed preference, technology, profit maximisation, market structures, perfect competition, monopolistic competition, monopoly, and oligopoly. Utility maximisation is analysed graphically and mathematically. Students shall analyse profit- maximisation by firms operating in different market structures found in their economy.

HUEC401 Applied Economics III
National income accounting, consumption theories, investment theory, IS-LM model, macro-dynamics, balance of payments constraints and remedies, national income determination, income distribution, the multiplier process, monetary and fiscal policy, international trade, balance of payments, and foreign exchange markets. The module enables students to analyse macroeconomic problems and design fiscal and monetary policies to address them.

HUEC402 Industrial Economics

The module focuses on how different market structures operate, the level of competition and barriers to entry, decisions made by firms and consumers, product differentiation and advertising, dominance and integration, oligopoly models, cooperation, and international trade. It enables students to analyse market structures and come out with strategies to address their inherent problems.

HUEC403 International Trade Theory and Practice
The module focuses on trade theories, free trade, trade protection, exchange rates, balance of payments, and regional co-operation and integration. It empowers students to apply trade theories and policies to improve the performance of economies in international trade. Students shall be in a position to evaluate the benefits of regional and international co-operation and integration to their economy.

HUEC404 Investment Analysis
The module focuses on financial markets, sources and uses of funds, investment risks and returns, efficiency of capital markets, valuation of securities, and investment appraisal techniques. It enables students to use various techniques to appraise investment projects and make sound investment choices which maximise stakeholders' wealth.

PHYSICAL EDUCATION, SPORTS SCIENCE AND MANAGEMENT MODULES

Level 4 Semester 2

HUEP403	Testing, Measurement and Technology in Sport	12
HUEP404	Sociological and Psychological Issues in Sport	12

MODULE SYNOPSES

HUEP101 Historical Issues of Physical Education, Sports and the Olympic Movement

This module focuses on the value of Physical Education, Sport and Mass Displays in the development of individuals and societies throughout the history of the human race. It has been and is still an important part of society in terms of economic and social development. The purpose of this introductory module is to help students appreciate the role that Physical Education and Sport have been playing in the holistic development of individuals from time immemorial.

HUEP102 Athletics Skills, Coaching and Officiating

This module covers track and field events. This shall also include the theory and practical learning of both coaching and officiating; knowledge of athletics facilities; rules; planning and management of tournaments.

HUEP103 Pedagogy and Coaching: The Science for Attainment

This module imparts knowledge of theories and principles of training, which shall enable them to teach, guide and correct the learners expertly and confidently. Also, the students shall be taught how to interpret the syllabus and make the relevant documentation in preparation for teaching and coaching. Focus shall be on principles of training, teaching styles, methods of practice, components of fitness and other relevant documentation.

HUEP103 Generic Games' Skill: Theory and Practice

This module focuses on imparting students with both practical and theoretical knowledge of selected games. They should be able to demonstrate practical skills, the ability to prepare for teaching episodes or coaching sessions, play, officiate and coach the selected ball games. They shall also be educated on the various equipment and facilities, and how to prepare or adapt fields for activities. Students will also learn about the classes of selected games and their origins.

HUEP201 Anatomy and Physiology of the Human Body

The module covers efficiency in coaching and teaching in Physical Education and Sports and is meant to assist students in the prevention of injuries and improvement of techniques based on their understanding of the human body, systems and structures.

HUEP202 The Art and Science of Movement in Gymnastics: Theory and Practice

The module seeks to impart skills and knowledge in choreography and formations among other related aspects and how to teach or coach mass displays in educational institutions and clubs.

HUEP202 Generic Sports Management and Organisation

The module imparts knowledge on how sport in the various categories of educational institutions is managed and organised. This knowledge will make the students contribute meaningfully to sports programmes, not only in educational institutions but also in other sectors where management skills are required since they are transferable.

HUEP203 Aquatic Skills and Outdoor Sports

The module equips students with practical and theoretical aquatic skills so that they are able to impart them to learners. The students will also be equipped with skills in life-saving which they will apply, not only during lessons but in other situations if the need arises. This module will also teach students the nature and value of outdoor sports so that they are able to plan and organise outdoor activities.

HUEP401 Nutrition and Sports Medicine

This module focuses on common injuries in sport and their prevention and first aid. It will, thus, assist students in handling learners in the event of unfortunate occurrences of bone fractures, bleeding, muscle sprains and muscle tears. Students learn the correct diet for various purposes in sports so that they can advise athletes on the proper nutrition and related habits before, during and after physical activity. Also, students will be taught about obesity, drug-related issues like abuse of drugs, and doping and the negative consequences of illegal use of drugs in sports. This module aims at making students appreciate the role of sport as a healthy way of spending free time.

HUEP402 Biomechanics of Human Movement
The module focuses on mechanics of movement, forces and body levers, linear motion and angular kinetics. The students shall appreciate that coaching points should be explained and justified scientifically. Students should be able to apply knowledge of biomechanics in coaching sports skills to improve efficiency and performance of the learner.

HUEP403 Testing, Measurement and Technology in Sport
This module focuses on the various ways of testing and measuring the performance of the learners. Performance is measured to check progress, and also to identify areas of weakness that require working on and skills development. Not only performance is measured in Sport, but also achievement and fitness. The student should be able to assess the learners and draw conclusions on the effectiveness of training programmes.

HUEP404 Sociological and Psychological issues in sport
The module explores contemporary issues like drug abuse, match-fixing, cheating and violence to educate the students about their adverse effects on the development of sport and socio-economic development in general. Apart from the negative aspects the students shall learn about such aspects as voluntarism, gender, media and sport, Also the knowledge of Sport Psychology is quite fundamental as it enhances the teacher's or coach's understanding of the different behaviours shown by players before, during and after the game.

REGULATIONS FOR THE BACHELOR OF EDUCATION DUAL HONOURS DEGREE IN HUMANITIES (EDU27)

Duration:	4 Years

Common Modules Synopsis

EFA331 Sociological Foundations of Early Childhood Education

The module introduces students to sociological perspectives and their implications for early childhood education. The foci are on micro and macro settings and their impact on early childhood learners in terms of socialisation, gender socialisation and education. The module also provides students with a platform to research contemporary issues that relate to ECE, e.g., children's rights, children in difficult circumstances, the links between the family and the education system and issues that relate to multicultural education.

EFA332 Psychological Theories of Child Development

This module introduces students to the nuances of psychological theories pertaining to early childhood development in the areas of physical, emotional, cognitive, moral, language and personality development. Other theories such as Gesell's Maturational theory, Bowlby's theory of imprinting and Mahler's relationship theory are covered. Implications of these theories to teaching and learning in early childhood settings are examined.

BED133 Educational Technology and Innovation

This module seeks to equip students with skills for improving learning and teaching through the use of various instructional media that include audio-visual communication. The module will also familiarise students with different computer software including MSWord, MS Excel, MS Access, PowerPoint and Publisher.

BED144 School Curriculum and Innovation

Schools' curriculum development is guided by basic curriculum models, as well as modalities of dissemination associated with each model. Barriers to implementation, curriculum evaluation and the rationale for changing the curriculum are considered. This module introduces students to the theory of curriculum. It explains the concept of "curriculum," its elements, the forces that shape it as well as the basic foundations of the curriculum. Students are exposed to the process.

BCHS131Culture and Heritage studies
This module introduces scholars to the definition terms of culture and heritage. The module exposes the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners are challenged to be tolerant and enjoy the multicultural status of the nation.

BEIE501 Entrepreneurship and Financial Management
The module gives basics on how business is managed from a small scale to a high scale. The module exposes the learners to various business models and financial management systems that can be used to start and sustain business projects. Marketing strategies also form part of this module.

BED314 Clinical Practice Report
The module exposes students to the basic/fundamental professional aspects of an interactive nature at the administration level. The module also explores how theories and knowledge gained at university apply in practice. It provides students with the essentials of the principles and practice of teaching, introducing students to statutory instruments regulating professional conduct. This module shall be a report with four chapters covering the school, department, reflections on professional experience and the policy environment.

BED321, BED323 & BED324
In the 2 semesters that the students are in teaching practice, they are expected to demonstrate a sound understanding of the basics of their programme of study. The 321 component is the report that the student produces indicating that they were able to match theory with practice. Component 323 is the assessment by the lecturers. BED 324 is assessed by school supervisors.

EDGS231 Gender Studies for Educators
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and all their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, Gender Issues in Society, Redressing Gender Imbalances, Empowerment and Strategies for Creating a Gender Responsive environment. Every student has to pass the module to graduate.

BED231Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BED131 Research Methods and Statistics
The module introduces the learners to the basic principles of research. Qualitative and Quantitative approaches to research will be used. A mixed methods research approach shall be introduced in this module. Research instruments shall be explored to give the learners an appreciation of these instruments.

BED232 Research Project
In the final year of their studies, students carry out research in a subject-related area. The research project enables the students to sharpen their research skills and at the same time apply the content learnt during the studies. At the end of the projects, students are expected to have acquired research skills and learnt presentation and project proposal writing skills.

BEIE501 Entrepreneurship and Industrialisation in Education
This module equips students with the relevant knowledge to successfullyset up and operate an educational institution. Issues covered include identifying the educational needs of communities, factors to consider in deciding to set up an educational institution, legal frameworks, school rules and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and marketing the new educational ventures.

STRUCTURE OF THE BACHELOR OF EDUCATION DUAL HONOURS DEGREE
The degree is a Dual Honours pre-service degree under which students shall select and study **any two** subject areas of specialisation from the optional degree programmes provided as detailed in Table 1 below.

Degree Categories under the BED Hons Degree

Degree	**Subject Areas**
Bachelor of Education Hons Degree in Humanities	
(BED Humanities Dual Hons)	English; Family and Religious Studies; Geography; History; Heritage Studies; Indigenous Languages; Theatre Arts; Music and Dance,

Distribution of Common Modules per Level

All students under the B Ed Honours Degree are expected to study all the twenty-one common modules specified above.

Subject Specific Modules per Degree Programme

Under the Dual Honours BED degree, each student shall study two subject areas of their choice, within a specific degree category. The modules to be studied under each degree and subject area are specified below.

BACHELOR OF EDUCATION DUAL HONOURS DEGREE IN HUMANITIES

A student who opts for the Bachelor of Education Humanities degree shall be expected to choose two subject areas of specialisation from the following: English; Family and Religious Studies; Geography; History and Heritage Studies; Indigenous Languages; Physical Education, Sport and Mass Displays; Visual and Performing Arts. The modules for Geography and Physical Education, Sport and Mass Displays shall be as presented under the other programmes.

ENGLISH MODULES

AEEN 233	Comment and Appreciation of Poetry, Prose and Drama	12
AEEN234	Caribbean and African American Literature	12
Level 4 Semester 1		
AEEN431	Creative Writing	12
AEEN432	World Literature	12
Level 4 Semester 2		
AEL333	Language Across the Curriculum	12
AEEN434	Language Policy and Planning	12

Module Synopses

AEEN131 Literary Theory

The purpose of the module is to capacitate students with the tools to explicate and illuminate Zimbabwean, African, Caribbean, Afro American and World literature texts in different genres in preparation for teaching literature in English at secondary school and tertiary levels. The module develops skills that ensure compatibility between texts and literary theories in the process of meaning-making for clarity of explanation.

AEEN132 Phonetics and Phonology

The purpose of the module is to develop language awareness on the phonological and morphological systems of the English Language which provides a knowledge base for the teaching of pronunciation stress and intonation at secondary school and tertiary levels. The module looks at the sound systems of the English Language, places of articulation and manner of articulation and the regressive process.

AEEN133 Zimbabwean Poetry, Drama and Prose
The module gives students the opportunity to use literary theories in unpacking literary genres that originate from Zimbabwe. The literature covers the colonial and post-colonial epochs. Students develop an appreciation of the aesthetic values that are captured in the literary genres. The focus is on factors that shaped Zimbabwean Literature.

AEEN134 Morphology and Syntax in English Language
The module is a continuation of language awareness taking from phonetics and phonology with the desire to create a knowledge base on language form which leads to an understanding of the tangible language structures that are used as tools for human communication. Syntax focuses on sentence structure in English, and morphology looks at word formation

AEEN231 African Poetry, Drama and Prose
The module seeks to interrogate the African experience from the precolonial to the modern age. The relationship between orature and contemporary literature is established. The historical and social milieus' influence on the thematic, stylistic and linguistic features are focused on.

AEEN232 Analysis of Written and Spoken Discourse
The module aims to equip students with skills to analyse language use by members of a speech community. The focus is on both language form and language function. Spoken discourse and written discourse are studied to create a knowledge base to help learners in secondary school and tertiary level write and speak better. Topics such as cohesion and coherence in sentences, and turn-taking opening and closing sequences of social encounters are looked at.

AEEN336 Applied English Education
The teaching of English to English as Second Language learners (ESL) calls for a knowledge base that makes it possible for the teacher to make informed decisions that maximise learning. This module seeks to equip students with a knowledge base that facilitates the teaching of both English Language and Literature. Theories of first language acquisition and second language acquisition and learning are discussed to find out how they influence language teaching.

AEEN233 Comment and Appreciation of Poetry, Prose and Drama
This module equips the student with critical analytical skills. Emphasis is on the relationship between meaning and style. All the key genres of literature that is, poetry, prose and drama are focussed on. Passages covered include the seen and unseen.

AEEN234 Caribbean and African American Literature
The module seeks to familiarise students with an appreciation of Caribbean and African American Literature. The module facilitates the application of literary theories acquired to unpack the relevant texts as well as to undertake a comparative analysis between this literature as well as African and other world literatures.

AEEN431 Creative Writing
The module focuses on developing creative abilities. Skills inherent to the creative writing process are covered. These include theme identification, theme development, characterisation, plot structure and plot development, setting, tone, mood/ atmosphere, language, rhythm, pace and imagery. Theoretical knowledge of these skills shall be examined.

AEEN433 Language Across the Curriculum
Language is a conduit through which learning takes place in the curriculum process. The module examines the relationship between language and abstract thought processes such as those found in sciences in describing the techniques and processes and in evoking responses to develop listening, speaking, reading and writing skills across the curriculum

AEEN432 World Literature

The aim of the module is to expose students to the historical and socio-cultural contexts that inform literature from Europe, Asia and America. Literary theories are applied to interrogate the thematic concerns and stylistic features of texts selected from drama, prose and poetry. The module covers a wide range of eras.

AEEN434 Language Policy and Planning
Zimbabwe is a multilingual nation and the module gives insight into its linguistic heritage and the roles assigned to its languages to instigate debate and research on the economic viability, social acceptability and pedagogical soundness of the language decisions that Zimbabwe has made from the colonial, pre-colonial and post-colonial epochs.

INDIGENOUS LANGUAGES MODULES

(NB: Indigenous Languages as the 13 captured in Constitution)

Indigenous Languages Modules

Level 1 Semester 1

AEIL432	Dialectology	12

Level 4 Semester 2

AEIL433	Language, Culture and Development	12
AEIL434	Trends in Contemporary Novel in Zimbabwe Indigenous Languages	12

MODULE SYNOPSES

AEIL131 Morphology and Syntax in Indigenous Languages
This module introduces the student to the basics of the linguistic structures of indigenous languages. Its main focus is on the morpheme as the smallest meaningful grammatical unit in a linguistic structure and how it builds into lexical items, phrases and sentences when Zimbabweans use language on a daily basis. The module also introduces the different syntax mapping theories.

AEIL132 Developments in Zimbabwe Indigenous Languages Orthographies

This module introduces the theories and principles of orthography building before it embarks on a diachronic study of the developments in Zimbabwe's indigenous language orthographies. In the process, the module exposes and evaluates the roles different stakeholders in language choice and use have played in the building of orthographies for officially recognised Zimbabwe indigenous languages.

AEIL133 Theories of Literature and Criticism
This module introduces the theoretical approaches that can be employed in literary exegesis. In the process, it studies both Western-oriented and African-centred theories of literature. In that way, it exposes the student-teacher to the diversity and richness of indigenous and exotic Africa's theoretical heritages. The major thrust of the module helps the student to master the approaches and to use them to carry out practical and critical appreciation of Zimbabwean literature in indigenous languages.

AEIL134 Children's Literature
This module introduces children's literature. And exposes the student-teacher to the major characteristics of the literature in question and to the art and process of producing it. The module introduces theories of cognitive development, psycho-social development moral judgement and approaches to bringing up children in Africa as critical canons for creating, studying and understanding children's literature.

AEIL135 Basics in Language Structure
This is a bridging module that introduces students to basic concepts in word, phrase and sentence building in indigenous Zimbabwean languages. It aims at acquainting students of African Languages with aspects such as the class system of the languages that will be studied and with other components that relate to the linguistic structure of those languages. The module focuses on the substantial, verbal and ideophonic hierarchies of the indigenous languages that will be on offer.

AEIL232 Speech Styles and their Social Context
This module is about language and the situation in which it operates. It deals with general aspects of communicative competence and styles of speech as they apply to the Zimbabwean community. The module covers speech community, speech repertoire, social dialects, registers, and styles, through rules governing discourse, age and sex as determinants in language, religious language and language in joking and restrained relationships.

AEIL311 Applied Indigenous Languages Education
The module introduces the students to the theoretical and practical aspects of teaching Indigenous Languages, with a particular focus on the officially recognised indigenous languages. The module covers syllabus interpretation, scheming and planning, methods of teaching Indigenous Languages and how to conduct assessment in Indigenous Languages. The module also prepares the student for teaching practice.

AEIL233 Trends in Contemporary Poetry in Zimbabwe Indigenous Languages
This module uses selected poetry anthologies to make an in-depth study of oral and written African poetry as a type of creative art. Major poets and texts representative of their works are looked at. The focus is on the style, themes, contexts and characteristics of each poetic genre etc. The functions of poetry are considered from the point of view of the historical development of society.

AEIL234 Trends in Contemporary Zimbabwean Dramatic Plays in Indigenous Languages
This module deals with the study of dramatic plays. It calls for the need to pay attention to the study of the background of African drama and to appreciate the strengths and weaknesses of the genre. The student is acquainted with the different forms of African drama, how it is rooted in African tradition and culture, and how it is modified by contemporary demands.

AEIL431 Cultural Heritage, Tourism and Sustainable Development
Heritage and culture, need to be properly managed with the view to preserving them for posterity. The essence of this module is to raise awareness among the students about the need to ensure the utilisation of cultural heritage in the development of the people's socio-economic conditions in a sustainable way.

AEIL432 Dialectology
The module seeks to provide the student with some knowledge of dialects of Zimbabwe's indigenous languages and how the different dialects of a language are related to each other. The module helps students to appreciate arguments raised concerning standard language and how it is attained. The focus shall be placed on the main dialects of officially recognised Indigenous Languages of Zimbabwe.

AEIL433 Language, Culture and Development

This module introduces theoretical approaches to the study of language and its relationship to culture and development. In the process, the module surveys perspectives in the study of culture and their relationship to development in its different facets. The module makes sure student-teachers acquire know-how and know-what in the relationship that exists between language and culture

AEIL434 Trends in Contemporary Novel in Zimbabwe Indigenous Languages
This module is guided by the principle of *sitz im leben* (setting in life). The module aids the student-teacher to embark on a diachronic study of the development of the Zimbabwean novel in indigenous languages from the 1950s. The module also upholds the dialectics of form and content in its study of the novel.

MODULE SYNOPSES

AEHI131 History of Zimbabwe to 1890
This module is a survey of Zimbabwe's social and economic developments since the Early Iron Age and then examines the origins and socio-economic structure of the early and later Shona states and ends with a discussion of Nguni conquests of the 19th century and the period of Treaties and Concessions with white settlers.

AEHI132 History of Zimbabwe since 1890
The module covers the colonial administration in Rhodesia, Company rule, Responsible government and the colonial administration after UDI, the rise of mass nationalism, early recruitment and training of freedom fighters, and phases of the armed struggle to independence. The module also addresses post-independence developments in Zimbabwe, focusing on social, political and economic policies.

AEHI133 Issues in African History to Colonial Rule
The module covers African cultural heritage norms and values, state formation, long-distance trade, mercantile capital, slave trade, European imperialism, colonial administrative systems, colonial development policies and African reactions, the impact of Christianity and Western education, growth of African nationalism and the struggles for independence.

AEHI134 African Nationalism from the pre- to post-Independence era
The module covers Pan-Africanist Movements and the rise of mass nationalism in Africa. Modes and phases of armed struggle to the gaining of independence are considered. The module also embraces post-independence developments in Africa, focusing on social, political and economic policies.

AEHI231 Africa in the 21st Century
This module examines the dynamics of African politics and economies since the attainment of independence, focusing specifically on development strategies, economic and political challenges and possible solutions to the various problems encountered by the post-colonial African state.

AEHI232 Constitutionalism, Human Rights and Democracy in Africa
The module seeks to examine theories and practices of constitutionalism in different African countries. The module also makes conceptual and normative inquiries into linkages between constitutionalism, the concept of human rights, the rule of law and democracy.

AEHI338 Applied History and Heritage Studies Education
The module exposes students to various views and perceptions on the nature of History as distinct from Heritage Studies, and implications for teaching and learning the two learning areas. The module focuses on syllabus interpretation and breaking down content into schemes of work and lesson planning, the designing of teaching and learning materials, management of a variety of teaching and learning situations in History and Heritage Studies

AEHI233 Cultural Heritage, Indigenous Knowledge Systems and African Civilisations
The module addresses ancient civilisation in Africa, Egypt in particular. Issues considered include science, religion, development of writing and architecture. The module adopts an Afro-optimistic approach with the objective of reviving marginalised indigenous knowledge. Issues of sustainability, intellectual property rights and their implications with respect to IKS are considered for purposes of protecting local knowledge systems from capitalist exploitative interest.

AEHI234 Religion and Society in Africa
The module examines the relationship between religious and political/social developments in Africa by way of concrete regional examples from the pre-colonial era to the present, thereby carving out historical continuities and contingencies as well as regional commonalities and differences. The module covers aspects of Indigenous Religion, Christianity and Islam among others.

AEHI432 Europe 1800-1945
The module covers Europe's political organisation, the economy before 1914, nationalism, the spread of formal democracy, the setting of international relations, international relations between 1901 and 1914, the Great War, The Peace Conference and the treaties, economic maladjustments, democracy between the wars, totalitarianism and dictatorship, social and cultural change 1918-1939, the approach to the Second World War and Europe and the Second World War.

AEHI433 Regional and International Co-operation
The module examines the history of regional integration in Africa The module's scope covers various socio-economic, developmental and political considerations, including the promotion of intra-regional trade, socio-economic policy coordination, and management or development of shared physical infrastructure and the environment. The effects of globalisation towards reshaping global-state-society relations are considered.

AEHI434 World Revolutions Since 1917
The module covers the Russian, Chinese and Cuban Revolutions, origins, trends and international implications on political ideologies.

Level 4 Semester 2

AERS433	Human Rights and Social Justice	12
AERS434	Religion, Peace and Security	12

MODULE SYNOPSES

AERS131 Jesus and the New Testament
The module introduces students to the study of the New Testament, its social, religious and literary settings including the canonisation of the New Testament. The module also focuses on critical approaches to the New Testament.

AERS132 Introduction to the Old Testament
The module introduces students to the study of the Old Testament; its social, religious and literary settings, including the canon of the Bible. The module focuses on equipping students with tools for biblical interpretation and the ability to analyse relevant texts in light of contemporary religious development in Africa.

AERS133 Introduction to Religious Studies and World Religions
The module examines the various theories and underlying concepts in the study of the beliefs and practices of such world religions as Religions of Africa, Christianity, Hinduism, Buddhism, Confucianism, Taoism, Judaism and Islam. This helps students to appreciate and understand other religions while getting to know their religion better.

AERS134 Introduction to African Traditional Religions
The module discusses the understanding and development of African Traditional Religions. The module focuses on the indigenous religion in relation to marriage, gender relations, land, natural environment, health and politics.

AERS135 Pauline Writings
The module examines Pauline Literature in the context of marriage, enterprising, gender relations and politics.

AERS231 Religion and Development
The module addresses major themes in development discourses such as the global millennium goals, including globalisation and its impact on the development of poor societies of the world, gender equity; notions of democracy; good governance and human rights; health; the environment and community development in the context of Judaism, Christianity, Indigenous Religion and Islam.

AERS232 Religion and Gender
The module focuses on gender concepts, the theology of feminism as well as various roles and the status of women in Judaism, Christianity, and Islam and in the African context. Topics to be covered include the role of women, ordination of women, impact of education and urbanisation, women's struggle for emancipation and participation in religious life.

AERS313 Applied Family and Religious Studies Education

The module covers a variety of interactive Religious Studies teaching and learning strategies and builds awareness of requisite skills to acquire and develop resources which facilitate effective teaching and learning of the subject.

AERS233 Religion and Spiritual Well-Being
The module focuses on the role of religion in health and well-being. It develops awareness of a broad, research-based, critical understanding of the special place of religion in health and well-being issues, relationships between social capital

and health, and relationships between religion, economic and material environment, public services and positive community well-being.

AERS234 Religion and Disability
The aim of the module is to introduce the study of Disability from a religious perspective. The module investigates how disability is interconnected with issues such as stigma, gender, social exclusion, social movements, globalisation, war and conflict through skill-building, independent research, writing and presentations

AERS431 Religious Perspective on Sexuality, Marriage and Family
The module discusses and reflects on sexuality, marriage and family drawing examples from different religions while reflecting on contemporary writings. The module covers related subjects such as premarital sex, sexuality and human development, marriage preparation, homosexuality, pornography, polygamy or extramarital affairs, faithfulness, and divorce.

AERS432 Prophets and Prophetic Writings
This module examines the phenomenon of Israelite prophecy as one of the key factors in the maintenance of the religious faith in ancient Israel. The non-literary prophets of the historical books of the Bible and their various roles are examined. A further look shall be made on the literary prophets of both the northern and southern kingdoms paying particular attention to the literary features and major themes of their books. The module closes with perspectives on the exile as reflected in Jeremiah, Ezekiel and Second Isaiah.

AERS433 Human Rights and Social Justice
This module is an introduction to the human rights and social justice perspectives and how they intersect with social work values, ethics and practice in local and global contexts. A practice framework that integrates a human rights perspective which promotes the dignity, respect, and well-being of all persons with a social justice perspective which seeks to understand, challenge, and combat oppression, unequal access to resources, and social inequities are discussed .

AERS434 Religion, Peace and Security
The module looks at aspects of peace building, conflict transformation, post-war reconstruction, mediation, rehabilitation, reconciliation and healing and people-centred participatory development from the angle of four religions namely: Christianity, Indigenous, Islam and Judaism.

THEATRE ARTS

Level 4 Semester 2		
AETA433	Play Production	12
AETA434	Literary Appreciation of Drama	12

Module Synopses

AETA131 History of Theatre and Cultural Dimensions
This module surveys the history of theatre arts in Zimbabwe and Southern Africa, Africa as well as African-Caribbean and World Theatre. The module explores the cultural functions of theatre arts. It covers theatre and performance styles in Zimbabwe, Southern Africa and the world.

AETA132 Theatre Technology and Design
The module covers the technical aspects of theatre arts such as the use of the various technologies and designs used in theatre arts. Technical design projects are also given attention. Conceptual design sketches, conceptual design models and design portfolios are discussed. The module has a multimedia approach to theatre arts covering a wide range of aspects such as audio-visual effects, filming and photography, scenography, stage/set design, costume design, puppetry and make-up.

AETA133 Arts Management (Enterprise Skills)
This entrepreneurial module develops awareness in theatre administration, arts project planning and management (including implementation), structures and styles of management, enterprise skills, business models, monitoring and evaluation, project proposal writing events planning, management and health and performance. The legal aspect of theatre arts students may be required to write an arts management portfolio.

AETA134 Contemporary Theatre Genres
This module covers modern genres of theatre such as physical theatre, musical theatre, commercial theatre, applied theatre, community theatre, theatre for development and performance poetry among others.

AETA231 Creative Processes and Performance
The module covers core theatre arts skills. Focus is on script writing, acting, directing, stage management and performance Designing creative portfolios is covered.

AETA232 Aesthetic Values and Performance Criticism
The module enables students to critique drama texts and theatre arts performances for sensitising them to the entire spectrum of theatre arts performance. Aspects covered include performance criticism, attachment of meaning, characterization, dialogue, symbolic impressions, performance and aesthetic and elements of production and performance criticism portfolio.

AETA233 Applied Theatre Arts Education
The module develops pedagogical competencies in Theatre Arts, as well as knowledge of the curriculum and its interpretation. Students learn about the theories of Theatre Arts and their implications for classroom practices.

AETA234 Theories and Ideology in Theatre Arts
The module covers the theoretical and ideological aspects of theatre arts for the purpose of sensitising the students to the role of ideology in the entire spectrum of theatre arts from production to analysis. A wide range of theories shall be covered from Marxism, nationalism, surrealism, and feminism among others.

AETA235 Film and Video Production in Theatre Arts
This is a practical module which covers the audio-visual capturing of stage performances for posterity. Camerawork, video editing and sound editing are taught.

AETA431 Radio Drama
This is a practical module which develops skills in performing theatre arts productions for radio. While the students are equipped with the theoretical foundation of production for radio, the examination is a practical production for radio.

AETA432 Adaptation
The module covers the adaption of drama texts into stage performance, how to adapt a novel into a stage production and a film into a stage production as well as to adapt a stage production into a film. Adaptation of drama texts, novels, films and stage productions into poetry is taught. Basic aspects of translation are covered.

AETA433 Play Production
This is a practical module in which the students are required to stage a practical stage production. Skills already taught in foundational modules such as scriptwriting, directing, set design, costume and make-up, acting, stage management as well as theatre design and technology are examined.

AETA434 Literary Appreciation of Drama

This is a module which develops the critical skills of analysing drama texts. It covers aspects such as themes and issues, characterisation, language and style. Literary texts shall be from Zimbabwe, Southern Africa, Africa and other continents. The texts shall cover different epochs.

AEMD434	History of Western Music	12

MODULE SYNOPSES

AEMD131 Interpretation of Indigenous Musical Arts and Dance

The module seeks to discern the indigenous knowledge systems and the role played by music and dance. Ways of interpreting indigenous musical arts are discussed.

AEMD132 Dance as a Historical, Social, Cultural, Indigenous and Ritualistic Art

The module covers dance as it relates to historical, social and cultural aspects of society as a way of capturing the fears and aspirations of society explaining who dances, why they dance when and where the dances are performed. Students describe the music that is compatible with the dance types. The module also covers the practical aspects of dance.

AEMD133 Social, Environmental, Cultural and Historical Influences in Indigenous Music and Dance

Indigenous music and Dance are essential elements of cultural heritage, that provide an important manifestation of a nation's philosophy, The module covers the social, environmental, cultural and historical influences of Indigenous music and Dance. The module also exposes the connections to the fields of cultural anthropology, ethnology, and ethnomusicology.

AEMD134 Zimbabwe Musical Arts and Dance Heritage

Dance and music cannot be separated and this module seeks to analyse the interplay between music and dance. Traditional instruments and their variations are looked at including the dance types that are compatible with the instruments. Music genres in Zimbabwe are discussed. The relationship between music dance and theatre are examined.

AEMD135 Theory of Music

The module is intended to develop fundamental knowledge and skills to practically interpret and write notations in relation to music in terms of its rhythm, pitch, scales and keys up to seven sharps and seven flats. The module also explores concepts related to musical space, including intervals, triads and chords.

AEMD231 Performance Proficiency (Marimba and Recorder)
The module introduces the background fundamental knowledge and manipulative skills of the mentioned instruments. The study entails the historical development, playing technique, tuning, structure, care, storage and maintenance of the instruments. Proficiency in practical performance in the instruments is examined.

AEMD232 Performance Proficiency (Guitar and keyboard)
The module introduces students to the background and fundamental knowledge and manipulative skills of the mentioned instruments. The study entails analysing the historical development, playing technique, tuning, structure, care, storage and maintenance of the instruments. Proficiency in practical performance in the instruments is examined.

AEMD233 Applied Music and Dance Education
The module covers the following aspects of the pedagogy of Music and Dance: syllabus interpretation; scheming and planning; teaching and learning media; methods of teaching; contemporary and curriculum issues in Music and Dance; and assessment and evaluation.

AEMD234 Performance Proficiency (Voice and Mbira)
The module introduces the background fundamental knowledge and manipulative skills of the mentioned instruments. The study entails analysing the historical development, playing technique, tuning, structure, care, storage and maintenance of the instruments. The candidates shall demonstrate proficiency in the practical performance of the instruments.

AEMD235 Music and Dance Video Documentation
The study involves basic principles for music and dance videos, camera usage and techniques for production, and the creation of footage for television broadcasts. Students undertake projects to produce adverts, short video diaries and documentaries for commercial television broadcasts.

AEMD431 Zimbabwe Popular Music and Dance Studies
This module aims to trace the birth, history and development of popular music and dance and how this influences popular music in Zimbabwe. Students also analyse different styles in Western, African and Zimbabwean forms and characteristics of popular music and dance.

AEMD432 Studio Design and Set Up
The module covers the principles of designing recording studios. Students are tasked to experiment, explore and create their own studio designs and setups. Candidates defend their designs as they are subjected to current industry standard practices for commercial music recording for various genres.

AEMD433 Introduction to Music Technology and Multimedia Designs in Musical Arts
The module introduces the essential elements of music technology for today's musicians. It provides an overview of the fundamental principles and practices, hardware and software programmes, and seeks to help students adapt new music technologies to apply these in multimedia designs.

AEMD434 History of Western Music
The module seeks to give students a broad overview of Western music from the Middle Ages to the twentieth century. Focus is on the composers, their music and its application to music composition.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN ENGLISH AND LITERACY EDUCATION (EDU28)

Duration	2 Years
Credit Load:	288
Minimum Credit Load	240
Maximum Credit Load	300
Maximum MBKS Credit Load	192
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach English up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry: Diploma/Certificate in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Teaching of English as a Second Language (ESL), Teaching of Literature in English and literacy education

Specialist Focus: Capacitating teachers with Teaching of English as a Second Language (ESL), Teaching of Literature in English and literacy education skills.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on practical aspects

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates who complete the programme can expect to be employed as teachers, lecturers, Education Inspectors, Training Officers, consultants, etc.

Further Studies: Master's and Doctoral studies in English language education, Literature in English Education and language and literacy education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, research projects, and individual independent study.

6.0 LEARNING OUTCOMES

- Ability to think critically about English language, Literature in English and language and literacy education.
- Demonstrate research and technological competencies in English language, Literature in English and language and literacy education.
- Demonstrate mastery of subject content competencies in English language, Literature in English and language and literacy education.
- Demonstrate versatility and ability to adapt to change.
- Ability to analyse and exploit entrepreneurial opportunities in Language, Literature in English and literacy education.
- Construct creative learning environments for English Language and Literature in English education.
- Ability to utilie language for social and economic development.
- Capacity to communicate effectively.
- Ability to develop innovative curricula in English language, Literature in English and language and literacy education.
- Capacity to monitor, assess and evaluate learners, learning processes and educational programmes in English language, Literature in English and language and literacy education.

7.0 GENERAL PROVISIONS

- For this Bachelor of Education Degree programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

MODULE SYNOPSIS

BED133 Information Communication Technology in Education
This module seeks to equip students with skills for improving learning and teaching through the use of various instructional media that include audio-visual communication. The module will also familiarise students with different computer software including MS Word, MS Excel, MS Access, PowerPoint and Publisher. Upon completion of the module, students should be able to design and use instructional media, create databases and tables, query information from tables, open/close files and directories, analyse students' performance using Excel formulas and research from the Internet.

BED144 Schools curriculum competencies and innovation
This module introduces students to the theory of curriculum. It explains the concept of "curriculum," its elements, forces that shape it as well as the basic foundations of the curriculum. Students are exposed to the process of curriculum development guided by basic curriculum models, as well as modalities of dissemination associated with each model. Barriers to implementation, curriculum evaluation and the rationale for changing the curriculum are considered.

BCHS131 Culture and Heritage studies
This module will introduce scholars to definitions of terms of culture and heritage. The module will expose the learners to issues like civic education, spirituality, tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

HENGL101 Literary Theory
The purpose of the module is to capacitate students with the tools to explicate and illuminate Zimbabwean, African, Caribbean, Afro American and World literature texts in different genres in preparation to teach literature in English at secondary school and tertiary levels. The module develops skills that ensure compatibility between texts and literary theories in the process of meaning-making for clarity of explanation.

HENGL102 Phonetics and Phonology
The purpose of the module is to develop language awareness of the phonological and morphological systems of the English Language which provides a knowledge base for the teaching of pronunciation stress and intonation at secondary school and tertiary levels to enhance innovation and the provision of goods and services The module looks at the sound systems of the English Language, places of articulation and manner of articulation and the regressive process.

HENGL103 Zimbabwean Poetry, Drama and Prose
The module gives students the opportunity to use literary theories in unpacking literary genres that originate from Zimbabwe. The literature covers the colonial and post-colonial epochs. Students develop an appreciation of the aesthetic values that are captured in the literary genres. Focus is on factors that shaped Zimbabwean Literature.

HENGL104 Morphology and Syntax in English Language
The module is a continuation of language awareness taking from phonetics and phonology with the desire to create a knowledge base on language form which leads to an understanding of the tangible language structures that are used as tools for human communication. Syntax focuses on sentence structure in English, and morphology looks at word formation

BED131 Research Methods and Statistics
The module will introduce the learners to the basic principles of research. Qualitative and Quantitative approaches to research will be used. A mixed methods research approach will be introduced in this module research instruments will be explored to give the learners an appreciation of these instruments

BED231 Measurement and Evaluation in Education
The aim is to introduce candidates to the assessment and evaluation techniques using assessment and evaluation models as they apply to educational programmes. Students will explore principles of test contribution, administration, scoring, item analysis and technical adequacy from both theoretical and practical perspectives. Candidates are also expected to evaluate the current situation in the schools in the assessment and evaluation section to identify opportunities for change.

EDGS 231 Gender Studies for Educators
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and all their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, and Gender Issues in Society, Redressing Gender Imbalances, Empowerment and Strategies for Creating a Gender Responsive environment. Every student has to pass the module to graduate.

HENGL105 African Poetry, Drama and Prose
The module seeks to interrogate the African experience from the pre-colonial to the modern age. The relationship between orature and contemporary literature is established. The historical and social milieus' influence on the thematic, stylistic and linguistic features are focused on.

HENGL106 Analysis of Written and Spoken Discourse
The module aims to equip students with skills to analyse language use by members of a speech community. The focus is on both language form and language function. Spoken discourse and written discourse are studied to create a knowledge base to help learners in secondary school and tertiary level write and speak better. Topics such as cohesion and coherence in sentences, turn-taking, opening and closing sequences of social encounters are looked at.

HENGL201 Methods of Teaching English
Teaching English as a second language is a complex undertaking which requires a knowledge base that facilitates informed decision-making for optimal learning. It is against this backdrop that this module seeks to equip in-service teachers with teaching methods in both English Language and Literature to enable insightful decision-making in their teaching and to open up new avenues for research in language teaching and literature.

BEIE501 Entrepreneurship for Educators
The modules give basics on how business is managed from a small scale to a high scale. The module will expose the learners to various business models and financial management systems that can be used to start and sustain business projects. Marketing strategies will also form part of this module.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting requirements of Treasury Instructions, the School Services Fund, the General-Purpose Fund and School Development Association Funds. Students shall have been equipped with financial literacy to establish their business enterprises.

BED132 Applied Educational Foundations

This module equips students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

HENGL202 Comment and Appreciation of Poetry, Prose and Drama

This module equips the student with critical analytical skills. Emphasis is on the relationship between meaning and style. All the key genres of literature that is, poetry, prose and drama are focused on. Passages covered include the seen and unseen.

HENGL203 Caribbean and African American Literature
The module seeks to familiarise students with an appreciation of Caribbean and African American Literature. The module facilitates the application of literary theories acquired to unpack the relevant texts as well as to undertake a comparative analysis between this literature as well as African and other world literatures.

HENGL204 Creative Writing
The module focuses on developing creative abilities. Skills inherent to the creative writing process are covered. These include theme identification, theme development, characterisation, plot structure and plot development, setting, tone, mood/ atmosphere, language, rhythm, pace and imagery. Theoretical knowledge of these skills shall be examined.

HENGL205 World Literature
The aim of the module is to expose students to the historical and socio-cultural contexts that inform literature from Europe, Asia and America. Literary theories are applied to interrogate the thematic concerns and stylistic features of texts selected from drama, prose and poetry. The module covers a wide range of eras.

HENGL206 Language across the Curriculum
Language is a conduit through which learning takes place in the curriculum process. The module examines the relationship between language and abstract thought processes such as those found in sciences in describing the techniques and processes and in evoking responses to develop listening, speaking, reading and writing skills across the curriculum.

HENGL207 Language Policy and Planning
Zimbabwe is a multilingual nation and the module gives insight into its linguistic heritage and the roles assigned to its languages to instigate debate and research on the economic viability, social acceptability and pedagogical soundness of the language decisions that Zimbabwe has made from the colonial, pre-colonial and post-colonial epochs.

BED135 Contemporary Issues in Education
The module exposes students to the most current global trends that address the needs of Agenda 3030 and how they affect the Zimbabwean Education system. It equips students with knowledge and skills meant to address socio-economic and political challenges faced in promoting innovation, industrialisation and modernisation through Education 5.0.

BED232 Research Project
In the final year of their studies, students carry out research in a subject-related area. The research project enables the students to sharpen their research skills and at the same time apply the content learnt during the studies. At the end of the projects, students are expected to have acquired research skills and learnt presentation and project proposal writing skills.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN INDIGENOUS LANGUAGES, KNOWLEDGE SYSTEMS AND MULTICULTURALISM (EDU24)

Duration: 2 Years

Credit Load	300
Minimum Credit Load:	240
Maximum Credit Load:	300
Maximum MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach Indigenous languages up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry: Diploma/Certificate in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Indigenous languages, knowledge systems, literature and culture Education.

Specialist Focus: Training teachers in Indigenous Languages, knowledge systems, literature and culture Education.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on innovation and industrialisation.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, lecturers, Education Inspectors, school managers, education officers, examination officers and curriculum developers, training officers, consultants, translators and interpreters, creative writers, book editors, cultural attaches, etc.

Further Studies: Master's and Doctoral studies in indigenous languages, literature and culture.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, heritage site visits, micro teaching, teaching practice, research project, individual independent study, virtual and online learning.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Indigenous Languages, knowledge systems, literature and culture curriculums.
- Apply sound research and technological techniques when carrying out research in Indigenous languages, knowledge systems, literature and culture.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to Indigenous Languages education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.
- Adapt to societal changes in their environments to promote unity and harmony through sports.
- Developing a sense of self-discipline and sense of achievement and fairness.
- Fostering a sense of responsibility, transparency, integrity and participatory citizenship.

7.0 GENERAL PROVISIONS

- A candidate should study at least 22 modules comprising at least 10 common modules and 12 core modules from their teaching subject areas.
- Each common and subject-specific module is worth 12 credits except for the project which is worth 24 credits

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

MODULE SYNOPSES

BCHS131 Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED144 Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

IKSM101 Phonetics and Phonology

This module shall equip students with skills for identifying speech sounds in a studied indigenous language and the organs that articulate them. The module shall also equip students with skills for appreciating sounds in terms of their phonation and their manner and place of articulation and in terms of permissible and non-permissible linguistic sequences etc.

IKSM102 Orthography Building and Development in Zimbabwe's Indigenous Languages

Drawing examples from the history of orthography building of anyone Zimbabwean indigenous language, this module shall equip students with know-how on building and developing a good orthography. The module shall achieve that through establishing and critiquing approaches that were used to build an orthography for the chosen language. In the process, the module cajoles students to come up with strategies for use in improving that language's current orthography.

IKSM103 Transcultural Studies in Theories of Literature and Criticism

This module exposes students to various theories of literature that were developed both in non-African and African cultures and histories. In doing so, the module helps students to appreciate how different cultures model different theoretical approaches to the study of literature at different historical moments. Furthermore, the nodule introduces students to the practical application of theoretical underpinnings to the study of literature in indigenous languages.

IKSM104 Contemporary trends and issues in language policy and planning

This module studies contemporary trends and topical issues in language policy making and implementation. The module shall introduce students to principles and models of language policy, language planning and policy implementation. In so doing, the module shall aid students in appreciating the centrality of language planning and policy making to innovation, industrialisation and nation building and to become participants in language matters.

BED131 Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned to sustainable development issues such as environmental conservation and poverty eradication.

BED231 Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

IKSM201 Morpho-syntactic structure of Indigenous Languages

This module introduces students to the basics of morpho-syntactic structure of indigenous languages and the different syntax mapping theories. In the process, the module shall equip learners with skills needed for identifying the morpheme and its various forms in a linguistic structure and how it builds into lexical items, phrases and sentences when Zimbabweans use language as both a means of communication and a carrier of culture.

IKSM202 Applied Indigenous Languages, Knowledge Systems, Literary and Cultural Education

This module introduces the pre-service teachers to the theoretical and practical aspects of teaching indigenous languages, knowledge systems, literature and culture. The module covers such aspects as, syllabus interpretation, scheming and planning, assessment and evaluation strategies, and methods of teaching indigenous languages, literature, heritage and cultures.

IKSM203 Multiculturalism and Developments in Speech Styles and their Social Contexts

This module shall give students knowledge of the different speech styles and registers that abound in the different ethnic cultures of Zimbabwe. It shall also give students know-how on when and how they are employed during various moments and contexts of communicative interaction. The module shall cajole students to debate the value of changes that occur in the different speech forms to multiculturalism and linguistic diversity in Zimbabwe.

IKSM204 Indigenous Knowledge Systems and Developments in poetry and drama in Indigenous Zimbabwean Languages

This module shall help learners to appreciate the components of a good poem and a good drama and how much the creation of poems and dramas is influenced by both a people's knowledge systems and the history that shapes those systems. Furthermore, the module shall equip students with the competencies and potentials needed in the writing and criticism of poems and plays using the principle of *sitz im leben* (setting in life).

EDGS231 Gender Studies for Educators

The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEIE501 Entrepreneurship and Industrialisation in Education

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM231 School Administration and Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills of budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

BED132 Applied Educational Foundations

This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

IKSM205 Developments and Innovations in African Oral Literature and Philosophies of Life

This module introduces students to the different genres of oral literature that are found in indigenous Zimbabwean languages and to the philosophies of life which they exalt and spread. In so doing, the module shall help students to appreciate oral literary art forms as reservoirs and components of culture that serve as valid points of reference to Zimbabweans when they seek to embrace innovation and attain democracy, human rights and good governance.

IKSM206 Languages, dialects and linguistic diversity in Zimbabwe

This module equips students with knowledge of the relationship between language, dialect and linguistic diversity. The module further equips students with knowledge of the different dialects and sub-dialects of a single indigenous language that they will be studying. Above all, the module shall help students to appreciate languages and dialects as components of a rich tapestry of linguistic diversity which can foster innovation and industrialisation in Zimbabwe.

BED232 Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

IKSM206 Contemporary Issues in Education

The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

IKSM207 The Novel in Indigenous Zimbabwean Languages, Multiculturalism and Trends in Socio-historical Developments

This module prescribes for study novels in any one of Zimbabwe's indigenous languages. The module shall empower students with knowledge of how much the contemporary and topical trends in multiculturalism and socio-historical phenomena inform the writing and criticism of novels in indigenous languages. The module shall also equip students with competencies and potential in the writing and criticism of novels using the *sitz im leben* (setting in life) approach.

IKSM208 Language, Cultural Heritage, Tourism and Sustainable Development

This module introduces students to the concepts of tourism, sustainable development, cultural heritage and management. The module shall raise students' awareness of the importance and value of the relatedness of these concepts to innovation, industrialisation and nation and economy building. Above all, the module shall cajole learners to come up with novel strategies for promoting the concepts for the benefit of all Zimbabweans.

MODULE SYNOPSES

BED140 Computer Applications in Education

This module equips students with skills to design, develop, use and evaluate instructional media technologies that are used to improve teaching and learning. Instructional technologies covered include traditional materials such as chalkboards, hand-outs, charts, slides, overheads, real objects, and videotape or film, as well as new and emerging technologies computers multimedia, electronic whiteboards**,** Internet, and e-learning platforms.

BED144 School Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include, but are not limited to, creativity, innovation, industrialisation, and entrepreneurship.

HUEC101 Applied Economics 1

The module focuses on basic economic problems, economic systems, demand and supply, market equilibrium, elasticity concepts, and the theory of the firm. It enables students to design strategies which address the basic economic problems to attain efficiency in the production and consumption of goods and services. Students shall apply elasticity concepts in production and consumption decision-making.

HUEC102 Applied Statistics for Economists

The module focuses on theoretical and practical approaches to decision-making and business forecasting, hypothesis testing, goodness of fit, linear regression, index numbers and time series analysis. Students shall make forecasts of production output, sales and profits given different scenarios of risk.

HUEC103 Labour Economics

The module covers demand and supply of labour, market equilibrium; Marginal Revenue Product Theory, wage determination; competitive and non-competitive labour markets, collective bargaining; minimum wage legislation and other determinants of wages, trade unionism,unemployment and economic policies to curb unemployment, and trade -off between unemployment and inflation.

BCHS131 Culture and Heritage studies

This module introduces scholars to the definition terms of culture and heritage. The module will expose the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

HUEC202 Applied Economics II

The thrust of the module is on budget constraints, utility maximisation, revealed preference, technology, profit maximisation, market structures, perfect competition, monopolistic competition, monopoly, and oligopoly. Utility maximisation is analysed graphically and mathematically. Students shall analyse profit- maximisation by firms operating in different market structures found in their economy.

BED131 Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education, selection of appropriate research designs and data collection tools, data analysis techniques, research findings and conclusions, and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

HUEC203 Environmental Economics
The module focuses on the goal of sustainable development and its achievement through the application of economic principles of productive and allocative efficiency; innovation; cost-benefit analysis; equity/equality, poverty alleviation and economic policy; green growth; negative externalities; consumption and lifestyles; and opportunity cost.

BED231 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BEIE501 Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

HUEC 401 Applied Economics III
National income accounting, consumption theories, investment theory, IS-LM model, macro-dynamics, balance of payments constraints and remedies, national income determination, income distribution, the multiplier process, monetary and fiscal policy, international trade, balance of payments, and foreign exchange markets. The module enables students to analyse macroeconomic problems and design fiscal and monetary policies to address them.

HUEC402 Money and Banking
The module covers technical aspects of financial decision-making, the flow of funds, how companies make money, banking patterns as a form of investment and problems in the financial environment in which companies have to operate. Emphasis is given to sensitivity analysis and the treatment of risk.

HUEC201 Methods of Teaching Economics
The module focuses on the application of pedagogical content knowledge specific to the teaching and learning of Economics. It enables students to design appropriate teaching and learning strategies and to design valid and reliable test instruments. Focus is also on the use of information and communication technology (ICT) in Economics education.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

HUEC405 International Trade Theory and Practice

The module focuses on trade theories, free trade, trade protection, exchange rates, balance of payments, and regional co-operation and integration. It empowers students to apply trade theories and policies to improve the performance of economies in international trade. Students shall be in a position to evaluate the benefits of regional and international co-operation and integration to their economy.

HUEC404 Investment Analysis
The module focuses on financial markets, sources and uses of funds, investment risks and returns, efficiency of capital markets, valuation of securities, and investment appraisal techniques. It enables students to use various techniques to appraise investment projects and make sound investment choices which maximise stakeholders' wealth.

BED135 Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics, how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage on current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

HUEC406 Economic Reform and Development
The module focuses on real and unstated objectives of economic reform programmes, placing emphasis on the conditionalities of the reforms, circumstances surrounding the institution of reforms and the effects of reforms on economies. Investment opportunities brought by reforms and debt management are also considered.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN BUSINESS STUDIES AND ENTERPRISE DEVELOPMENT (EDU50)

Duration:	2
Actual Credit Load	288
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME
To prepare in-service teachers to teach Business Studies up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs.

2.0 ENTRY REQUIREMENTS
Normal Entry: Diploma/Certificate in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS
Areas of Study: Business Studies and Enterprise Development Education
Specialist Focus: Training teachers in Business Studies education
Orientation: Development of entrepreneurial mindsets and skills, and application of management principles in organisations.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION
Employability: Graduates can be employed as teachers, lecturers, Education Inspectors, Training Officers, consultants, laboratory technicians in related chemical industries etc.
Further Studies: Master's and Doctoral studies in Business Studies education

5.0 PROGRAMME DELIVERY
Teaching and Learning Methods: Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research project, individual independent study

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Business Studies curriculum.
- Apply sound research and technological techniques when carrying out research in Business Studies education.

- Monitor, assess and evaluate learners, learning processes, projects and programmes related to Business Studies education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education degree programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

MODULE SYNOPSES

BED140 Computer Applications in Education
This module equips students with skills to design, develop, use and evaluate instructional media technologies that are used to improve teaching and learning. Instructional technologies covered include traditional materials such as chalkboards, hand-outs, charts, slides, overheads, real objects, and videotape or film, as well as new and emerging technologies computers multimedia, electronic whiteboards**,** Internet, and e-learning platforms.

HUEC101 Applied Economics 1
The module focuses on basic economic problems, economic systems, demand and supply, market equilibrium, elasticity concepts, and the theory of the firm. It enables students to design strategies which address the basic economic problems to attain efficiency in the production and consumption of goods and services. Students shall apply elasticity concepts in production and consumption decision-making

HUBS101 Management Principles
The module covers management thought, decision-making evolution of management, managerial functions (planning, organising, leading and controlling), delegation of duties and responsibilities, structure of organisations, leadership types and styles, theories of motivation, and management of change. It also covers managing change, organisational culture, corporate social responsibility, organisational structure and design, and strategic management.

HUBS103 Human Resource Management
The module covers HRM functions traditional Personal Management and Human Resource Management concept; human resource models and the strategic role of Human Resource Management, strategic importance of HRM, job analysis and design, human resource planning, labour laws; staff recruitment, selection, retention, promotion, demotion and termination.

BED144 School Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131 Culture and Heritage studies
This module introduces scholars to the definition terms of culture and heritage. The module will expose the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

HUEC202 Applied Economics II
The thrust of the module is on budget constraints, utility maximisation, revealed preference, technology, profit maximisation, market structures, perfect competition, monopolistic competition, monopoly, and oligopoly. Utility maximisation is analysed graphically and mathematically. Students shall analyse profit- maximisation by firms operating in different market structures found in their economy.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

HUBS203 Financial Accounting for Managers
The module exposes students to basic accounting for managers. Aspects covered include accounting records and double entry accounting system; accounting concepts and measurements; simple income statements and statements of financial position; budgeting; cash flow statements; use of accounting ratios to analyse and interpret financial statements; capital structure and leverage; generally accepted accounting practice (GAAP).

HUBS201 Entrepreneurship and Financial Management
The modules give basics on how business is managed from a small scale to a high scale. The module will expose the learners to various business models and financial management systems that can be used to start and sustain business projects. Marketing strategies will also form part of this module.

HUBS 204 Business Communication
The module focuses on types of business communication; effective written and oral forms of communication, internal and external communication, listening skills, communication process; business report writing, formal and informal reports; guidelines, functions and types of business reports; meetings, types of meetings, resolutions, minutes of meetings; communication for employment; oral presentations and guidelines for oral presentations.

BED231Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BEIE501 Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

HUBS202 Methods of Teaching Business Studies
The module covers the aims of Business Studies education, theories of learning, national and school syllabuses, teaching methods, use of teaching media and information communication technology; and test construction in Business Studies. It enables students to design and apply strategies specific to teaching and learning in Business Studies.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

HUBS401 Production Management
The module covers production management strategies, goals and objectives of production management, the production management system, performance measurement and strategic role of the production management system, operations and supply management; project management; manufacturing and service processes, quality management, lean manufacturing, demand forecasting techniques, inventory control techniques and scheduling.

HUBS402 Project Management
The module focuses on network analysis and project scheduling techniques, project structuring, project finance, hiring and management of personnel, control of materials, monitoring the project, budgeting and project completion.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

HUBS403 Principles of Marketing
The module covers the marketing function; marketing mix and practices the difference between marketing and selling concepts, strategic marketing, consumer behaviour, types of markets, marketing information and research techniques, target marketing and segmentation, marketing communication, marketing strategies, direct marketing, personal selling, advertising, sales promotion, products, services and branding, product life cycle, development of new products, pricing strategies, retailing and wholesaling and e- commerce.

BED135 Contemporary Issues in Education

The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN THEATRE ARTS AND ENTREPRENEURIAL DESIGN (EDU52)

Duration:	2 years
Actual Credit Load	288
Minimum Credit Load:	240
Maximum Credit Load:	300
MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers with knowledge, skills and attitudes with which to teach Theatre/Performing Arts up to 'A' level and help learners prepare for life and work.

2.0 ENTRY REQUIREMENTS

Normal Entry: Diploma/Certificate in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Theatre/Performing Arts.

Specialist Focus: Training teachers in Theatre/Performing Arts.

Orientation: Research and innovation with emphasis on the personal development of learners, participatory action to address health, social and economic challenges through Theatre/Performing Arts.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, lecturers, education inspectors, training officers, arts consultants and administrators, TV/Radio broadcasters, etc.

Further Studies: Master's and Doctoral studies in Theatre/Performing Arts.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, research projects, field trips, virtual and online teaching, individual independent study, entrepreneurship training.

6.0 LEARNING OUTCOMES

- Ability to carry out an independent, limited research or development project in accordance with applicable norms for research ethics.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation within the sporting arena.
- Apply soft skills such as Ubuntu and critical thinking in both professional and personal interactions given the increase in drug abuse, violence, corruption and match-fixing in sports.
- Adapt to societal changes in their environments to promote unity and harmony through sports.
- Developing a sense of self-discipline and sense of achievement and fairness.
- Fostering a sense of responsibility, transparency and integrity.
- Participatory citizenship.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Degree in Theatre Arts and Entrepreneurial Design, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the research project which is worth 24 credits.

MODULE SYNOPSES

BED133 Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the Internet of Things and emerging technologies and their application in classroom teaching.

EFA334 Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131 Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

TAED101 History of Theatre and Cultural Dimensions
This module surveys the history of theatre arts in Zimbabwe and Southern Africa, Africa as well as African-Caribbean and World Theatre. The module explores the cultural functions of theatre arts. It will cover theatre and performance styles in Zimbabwe, Southern Africa and the world.

TAED102 Theatre Technology and Design
The module covers the technical aspects of theatre arts such as the use of the various technologies and designs used in theatre arts. Technical design projects are also given attention. Students will be taught to produce conceptual design sketches, conceptual design models and design portfolios. The module has a multimedia approach to theatre arts covering a wide range of aspects such as audio-visual effects, filming and photography, scenography, stage/set design, costume design, puppetry and make-up.

TAED103 Contemporary Theatre Genres
This module exposes students to the modern genres of theatre such as physical theatre, musical theatre, commercial theatre, applied theatre, community theatre, theatre for development, and performance poetry among others.

TAED104 Aesthetic Values and Performance Criticism
The module enables students to critique drama texts and theatre arts performances for the purpose of sensitising them to the entire spectrum of theatre arts performance. Aspects covered include performance criticism, attachment of meaning, characterisation, dialogue, symbolic impressions, performance and aesthetics and elements of production. Students may be required to produce a performance criticism portfolio.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED231 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

TAED105 Creative Processes and Performance
The module equips trainee teachers with core theatre arts skills. Focus will be on script writing, acting, directing, stage management and performance. Trainees will be required to write a creative portfolio.

TAED106 Applied Theatre Arts Education
The module develops the students' pedagogical content knowledge in the teaching and management of classes in Theatre Arts. Theories of learning and performance in this learning area will be dealt with.

TAED107 Theories and Ideology in Theatre Arts
The module covers the theoretical and ideological aspects of theatre arts for sensitising the students to the role of ideology in the entire spectrum of theatre arts from production to analysis. A wide range of theories shall be covered from Marxism, nationalism, surrealism, and feminism among others.

BEIE501 Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for

entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

TAED201 Film and Video Production in Theatre Arts
This is a practical module which teaches the audio-visual capturing of stage performances for posterity. Camerawork, video editing and sound editing will be taught.

TAED202 Radio Drama
This is a practical module which equips students with the skills to perform theatre arts productions for radio. While the students shall be equipped with the theoretical foundation of production for radio, the examination shall be a practical production for radio.

TAED203 Adaptation
The module teaches students how to adapt a drama text into a stage performance, how to adapt a novel into a stage production and a film into a stage production as well as adapting a stage production into a film. Adaptation of drama texts, novels, films and stage productions into poetry will also be taught. Basic aspects of translation will be covered

TAED204 Play Production
This is a practical module in which the students will be required to stage a practical stage production. Skills already taught in foundational modules such as scriptwriting, directing, set design, costume and make-up, acting, stage management as well as theatre design and technology will be examined.

TAED205 Literary Appreciation of Drama
This is a module which develops the critical skills of analysing drama texts. It shall cover aspects such as themes and issues, characterisation, language and style. Literary texts shall be from Zimbabwe, Southern Africa, Africa and other continents. The texts shall cover different epochs.

EFA336 Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

MODULE SYNOPSES

BED140 Computer Applications in Education

This module equips students with skills to design, develop, use and evaluate instructional media technologies that are used to improve teaching and learning. Instructional technologies covered include traditional materials such as chalkboards, hand-outs, charts, slides, overheads, real objects, and videotape or film, as well as new and emerging technologies computers multimedia, electronic whiteboards, Internet, and e-learning platforms**.**

BED144 Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

AFLD 101 Basic Accounting Concepts and Principles

This module is designed to introduce the basic accounting concepts and principles as a foundation for further study. It covers the definition of terms as well as the basic steps of accounting for business transactions.

AFLD102 Financial Reporting

This module is designed to introduce the presentation of basic financial statements such as the income statement and the statement of financial position, for both incorporated and non-corporate businesses. It also covers year-end adjustments for the financial statements.

AFLD201 Financial Accounting for Companies

The module is intended to enable students to gain knowledge and insight into the drafting of financial statements of companies to comply with the requirements of the Companies Act, Chapter 24:03 and International Financial Reporting Standards [IFRS's]. The module also introduces the student to different types of financial instruments and their characteristics.

BCHS131 Culture and Heritage Studies

This module introduces scholars to the definition terms of culture and heritage. The module exposes the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

AFLD305 Applied Economics 1

The module focuses on basic economic problems, economic systems, demand and supply, market equilibrium, elasticity concepts, and the theory of the firm. It enables students to design strategies which address the basic economic problems to

attain efficiency in the production and consumption of goods and services. Students shall apply elasticity concepts in production and consumption decision-making.

BED131 Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

AFLD401 Management Accounting
This module introduces the student teachers to the concepts of management accounting as distinct from costing. It covers budgets and budgetary control, including various types of budgets and the needs for them and behavioural aspects of budgets.
The module also focuses on concepts of capital budgeting and capital investment appraisal. Specifically, it looks at the choice of different methods of assessing the viability of capital projects to further the goals of financial management.

AFLD202 Costing
This module is designed to cover basic costing concepts including the definition of cost terms and purposes including costs for inventory valuation and income determination, the behaviour of costs and the classification of costs from various perspectives. It also involves the two costing systems which are marginal (variable) costing and absorption (total) costing. The characteristics of each costing method are analysed

BED231 Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

AFLD203 Applied Economics II
The thrust of the module is on budget constraints, utility maximisation, revealed preference, technology, profit maximisation, market structures, perfect competition, monopolistic competition, monopoly, and oligopoly. Utility maximisation is analysed graphically and mathematically. Students shall analyse profit- maximisation by firms operating in different market structures found in their economy.

AFLD403 Financial Statement Analysis
This module is designed to introduce the student teachers to concepts of financial statement analysis with a view to assessing a firm's current strengths and weaknesses as well as its prospects. Various models of financial statement analysis shall be discussed.

BEIE501 Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM231 School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills of budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EDGS231 Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

AFLD404 Methods of Teaching Accounting
The module focuses on pedagogical approaches to the effective teaching and learning of accounting. It also covers the use of instructional media and the application of information and communication technology (ICT) in accounting education.

BED232 Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

AFLD405 Company Law and Financial Reporting
The aim of the module is to equip the student with a sound understanding of the effects of company law on financial reporting. By the end of the module, the student should have mastered the Companies Act's legal provisions on financial reporting. The student should also be able to understand the Zimbabwe Stock Exchange requirements in aiding financial reporting.

AFLD402 Audit Theory and Practice
The module introduces the student to auditing theory, which includes basic auditing concepts, approaches and generally accepted auditing standards. The module lays a foundation for more advanced studies in auditing at level four.

BED135 Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics, how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN ENGLISH AND LITERACY EDUCATION (EDU28)

Duration:	**$1^1/_2$ years**
Actual Credit Load	**306**
ZNQF Level:	**9**

1.0 PURPOSE OF THE PROGRAMME
To prepare highly specialised personnel who have research and innovation skills for higher education, government departments and Non-Governmental Organisations.

2.0 ENTRY REQUIREMENTS
Normal Entry: To qualify for entry into the programme applicants must normally: -

2.1 have obtained a Bachelor of Education degree in English or approved equivalent from any recognised university;

2.2 have obtained a degree and a Postgraduate Diploma in Education with specialisation in English or has an approved equivalent from a recognised university

3.0 PROGRAMME CHARACTERISTICS
Areas of Study: English Language, Literature and Literacy

Specialist Focus: English Language, Literature and Literacy Education

Orientation: Research and Innovation

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION
Employability: The programme is designed to enhance the competence of graduates as classroom practitioners, lecturers, training officers, heads of departments, school managers, education officers, examination officers and curriculum developers.

Further Studies: Doctoral studies in English

5.0 PROGRAMME DELIVERY
Teaching and Learning Methods: Lectures, tutorials, seminars, group work, micro-teaching, teaching practice, research project, individual independent study, virtual and online learning.

6.0 LEARNING OUTCOMES

- To apply innovative solutions to the developmental trajectory of the country.
- Develop the capacity to apply advanced educational tools in research and development.
- Develop the ability to carry out policy development, analysis and evaluation.
- Engage in professional and academic interactions guided by the philosophy of Unhu/ Ubuntu.
- Demonstrate competency in disciplinary content peculiar to various areas of study.
- Demonstrate the ability to apply pedagogical skills in diverse educational contexts.
- Be able to design, implement, monitor and evaluate educational curricula and policies.
- Demonstrate mastery of research processes.
- Demonstrate critical thinking by understanding the development of educational ideas and their application in current educational practice.
- Develop the ability to identify and provide solutions to educational and development problems. through continuing education.
- Demonstrate ability to manage educational programmes and institutions.

7.0 GENERAL PROVISIONS

- The programme consists of at least 13 modules.
- Each module is worth 4 credits.
- A student should register for at least 3 modules in each of the first three semesters.
- To be awarded a Master of Education degree, a student must pass all modules and must have attained at least 44 credits.
- The duration of the programme shall be four semesters on a Block Release basis.

8.0 PROGRAMME ASSESSMENT

- Except for the dissertation, the final assessment in each module shall be by continuous assessment and formal examinations.
- Continuous assessment shall constitute 40% of the final assessment.
- The written examination shall constitute 60% of the final assessment.
- To pass, a candidate should obtain at least 50% of continuous assessment and examination combined.
- Assessment of the dissertation shall be based on the final written research report submitted to the Department Examiners Board and the oral defence combined.

9.0 PROVISION FOR PROGRESSION

- Students' progress automatically from semester one (1) to Semester two (2) at each level except where Senate directs otherwise.
- To proceed to the next level, a student should have passed at least 75% of the modules normally scheduled for that level.
- Students carrying over modules will be examined at the next regularly scheduled examination normally taken at the end of the semester.

10.0 FAILURE TO SATISFY EXAMINERS

- For Undergraduate Diplomas, refer to Section 9 of the General Regulations for Undergraduate Diplomas.
- For Undergraduate Degrees, refer to Section 9 of the General Regulations for Undergraduate Degrees.
- For Postgraduate Diplomas and Taught Masters, refer to Section 21 of the General Regulations for Postgraduate Diplomas and Taught Masters.

11.0 GRADING AND DEGREE CLASSIFICATION

The Master of Education Degree in English and Literacy Studies shall be classified as follows

- 80%-100% Pass with Distinction
- 70%-79% Pass with Merit
- 50%-69% Pass
- 0%- 49% Fail

12.0 DEGREE WEIGHTING

Academic levels shall be considered for purposes of degree weighting as follows: BEd (full time) 50% for each of the two levels BED (Block Release) 33.3% for each of the three levels BED (Honours) 25% for each of the four levels.

13.0 PROGRAMME STRUCTURE

MODULE SYNOPSES

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research, the different philosophical orientations in research, research paradigms, theoretical and conceptual frameworks, research designs, data collection methodologies, advanced quantitative and qualitative data analysis techniques, as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MEEL711 Psycho and Socio-Linguistic Aspects of Language Teaching

The module introduces participants to psycholinguistics and sociolinguistics and their pedagogical implications. The module focuses on central topics in Psycholinguistics and Sociolinguistics that are relevant to the teaching and learning of languages. For Psycholinguistics, the focus is on the study of how humans learn, represent, comprehend and produce language. The module covers major sub-fields such as language and the brain, language acquisition and learning and language and thought. For Sociolinguistics, the module explores the relationships between language and society focusing on major issues such as language and gender language variation, language policy and planning, diglossia, pidgins and

creoles. Implications for the classroom in terms of selection and grading of content, teaching methods, reinforcement as well as testing is of paramount importance to practising teachers.

MEEL712 Theory of Language Teaching

The module aims to equip students with insights into the theoretical principles which inform current practice in language teaching. Through discussions of what happens in a classroom, students shall critically examine how these theoretical principles inform the role of the teacher, the learner and the learning materials.

MEEL713 Curriculum and Pedagogical Issues in Language and Perspectives on Literature and Teaching

This module exposes students to perspectives on literature and provides experience for participants with methods and assumptions guiding the illumination and interpretation of literacy texts. In particular, it identifies and discusses various points of view on literature by considering a chronological and intellectual progression through the motivating ideas of Formalism, Structuralism, Post-structuralism, Feminism, Marxism, Modernity, Liberalism/neoliberalism, Postmodernism, Social Darwinism, Orientalism, Negritudism/Cultural Nationalism, Afrocentricity and Globalisation. The module examines the operation of these concepts in texts as well as parallels of different aspects of the chosen theories to provide more comprehensive readings of texts. Focus is on the compatibility of texts and literary theories and the application of theoretical points to real-world/educational situations.

MEEL715 Language Developments and Curriculum Implications

The module surveys how language policy in monolingual, bilingual and multilingual speech communities affect curriculum practice. It will be debated whether the teaching of English as a second language translates to linguistic empowerment or linguistic imperialism. The module covers the following topics, linguistic diversity, the new linguistic order, linguistic imperialism, Multilingualism as a curse or a blessing, Indigenous languages as mediums of instruction, Sustainable Development Goal (SDG) Number 4, language developments in colonial Zimbabwe and curriculum implications, The coming in of English, -Afrikaans vs English, -1908 Hole Committee on Education,
Domboshava 1920, Tjolotjo 1921, Phelps-Stokes Commission, The Kerr Commission of 1952, The Carr-Saunders Commission of 1953, Judges Commission, Rhodesia Literature Bureau, Language developments in Zimbabwe since independence and curriculum implications, Corpus and Status Planning in Zimbabwe, The 1987 Education Act and subsequent amendments, The Language Plan of Action for Africa, The Harare declaration, The Asmara Declaration, African Languages Lexical (ALLEX) African Languages Research Institute (ALRI), Zimbabwe Indigenous Languages Promotion Association (ZILPA), The Nziramasanga Commission, 2013 Constitution and Stabilising indigenous languages.

MEEL716 Measurement and Evaluation in English Language and Literature Education

This module is on how assessment can be made an integral part of the teaching and learning of language and literature. It focuses on the theory, concepts and practices of measurement and evaluation in English Language and Literature. The module covers the development, administration and marking of assessment tasks and tests as well as approaches to summarising and reporting student achievement. Students shall reflect on a range of formal tools and different assessment skills as well as how they might be integrated. At all stages, the implications for teaching and learning shall be emphasised. Areas to be covered include Principles of Data Collection, tools of assessment (cognitive, affective and psychomotor), analysis and interpretation of data, reliability theory, test and evaluation development, validation and assessment. Trends in measurement and evaluation in English Language and Literature Education shall be looked at.

MEEL717 Language and Learning

The module encourages students to consider the theories underlying language and language learning and to develop new ways of thinking about language within the classroom. The module pays particular attention to issues of language and learning to gain insights into how different modes and practices of communication impact our understanding of the complexities of language in the process of learning. The module covers topics such as Overview of Agenda 2030 for sustainable development -implications for language focused instructional design (LFID), Overview of SDG 4-implications for LFID, Definitions of language and implications for LFID, Definitions of learning and implications for LFID, Constructivism and learning in the 21st century, Cognitivism and Content learning Concept development, Language and concept development model, Subject literacy Academic language, Language and cultural capital, Language disorders and

instructional interventions, Expressive disorders, Phonological disorders, Stuttering, Dyslexia, Dysgraphia, Content and language integrated learning, Case studies.

FMED132 Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MED 734 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters Level.

MODULE SYNOPSES

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development,

current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research among others.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MEHD731 Historiographical Issues in Zimbabwean History

The module examines the study of the writing of Zimbabwean History. It surveys major issues in the history of Zimbabwe. The major themes to be explored include ancient civilization, early European encounters and the arrival of the Matabeleland, British colonialism, self-government, UDI, guerrilla warfare and the attainment of majority rule. It shall also examine major historical issues in post-independent Zimbabwe.

MEHD732 Developmental Issues in African History Before 1900

The module examines the major themes in African historybefore1900. It also explores the political, social and economic history of African states; taking specific cases to illuminate general themes; we consider for example history of ancient Egypt and its socio-economic and political influence on Africa and world affairs. The module also considers early mercantile and social interaction between Africans and non-Africans and the resulting dilemma of conquest of most parts of Africa by 1900.

MEHD733 Curriculum and Pedagogical Issues in History Education

The module covers curriculum theory, design, implementation and evaluation as applied in the History curriculum. It also explores teaching approaches and techniques pertaining to the subject of History. It seeks to develop critical analytical skills among students focusing on current history curricula in Zimbabwe and even more widely. A detailed case study of the current competence-based curriculum in Zimbabwe should be undertaken.

MED743 Advanced Gender Studies in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

FMED132 Advanced Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MEHD736 Contemporary African Affairs and Development

The module tackles the history of post-colonial Africa. It seeks an understanding of the transformations. Formations in the post-colonial African societies in relation to global and local processes. It interrogates the following themes: Successes and challenges of post-colonial states in Africa since independence, roles of regional and international organisations and external factors shaping post-colonial African history, causes of high levels of political violence in some African countries, and the role of Africa in the globalising world.

MEHD734 Political Economy of Colonialism and Independent Africa

The module considers the political and economic systems of colonial and imperial Africa. It examines the methods and implementation of political and economic hegemony by the mother countries (British, French, Portuguese and Germans) on different African systems. The module also examines the major political, social and economic themes of Independent Africa. It considers the intricate political dimensions within Africa today and its interactions with the global world.

MEHD735 Race Citizenship and Development in Africa

The module considers some of the main dimensions and discourses in which gender relations are crucial in understanding and analysing the phenomena of nations and nationalism, and the specific boundaries of inclusions and exclusions that they construct. It further analyses three major dimensions of nationalist projects that relate to citizenship, culture and origin using several theories such as the feminist literary theory, sociological, postmodern and poststructuralist theories.

MEHD737 Measurement and Evaluation in History Education

The module is designed to enable students to explain the nature and function of various assessment instruments used in the History curriculum. They are also expected to design and evaluate the various assessment instruments used at all levels of History education. The students are also expected to analyse the essential features of an effective and efficient assessment programme.

MEHD738 Contemporary World Affairs

The module tackles the history and culture of the contemporary world since 1945. It seeks to make a survey of world history from 1945 to the present with a particular focus on modern Asia, Europe, Africa, the Americas, the Indian subcontinent and the Middle East. Emphasis will be placed on the various important political, economic, social, intellectual, cultural and religious changes that have shaped the development of world affairs and interaction since the end of World War 2.

MED734 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a thesis that meets the standards of research work at Masters Level.

Minimum Credit Load:	270
Maximum Credit Load:	330
Total MBKS Credit Load:	234
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

To prepare highly specialised personnel for higher education, government departments and Non-Governmental organisations who have research and innovation skills.

2.0 ENTRY REQUIREMENTS

Normal Entry: To qualify for entry into programme applicants must normally: -

2.1 have obtained a Bachelor of Education degree or approved equivalent from any recognised university.

2.2 have obtained a degree and a Postgraduate Diploma in Education or approved equivalent from a recognised university.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Indigenous African languages, knowledge systems, literature, heritage and culture.

Specialist Focus: Indigenous African languages, knowledge systems, literature, heritage and culture.

Orientation: Research, industrialisation and innovation.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as classroom practitioners, lecturers, training officers, heads of departments, school managers, education officers, examination officers, curriculum developers, writers of literature, editors and consultants in language, literature, heritage and cultural matters.

Further Studies: Doctoral studies in African languages, knowledge systems, literature, heritage and culture.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, individual and group work and presentation, visiting industrial and heritage sites, micro-teaching, dissertation writing, individual independent study, virtual and online learning.

6.0 LEARNING OUTCOMES

- To apply innovative solutions to the developmental trajectory of the country.
- Capacity to apply advanced educational tools in research and development.
- Ability to carry out policy development, analysis and evaluation.
- Engage in professional and academic interactions guided by the philosophy of Unhu/ Ubuntu.
- Demonstrate competency in disciplinary content peculiar to various areas of study.
- Ability to apply pedagogical skills in diverse educational contexts.
- Be able to design, implement, monitor and evaluate educational curricula and policies.
- Demonstrate mastery of research processes.
- Demonstrate critical thinking by understanding the development of educational ideas and their application in current educational practice.
- Ability to identify and provide solutions to educational and development problems through continuing education.
- Ability to manage educational programmes and institutions.
- Ability to align education in indigenous languages, knowledge systems, literature, culture and heritage to innovation, industrialisation and nation and economy building.

7.0 GENERAL PROVISIONS

- For the Master of Education in Indigenous Languages, Knowledge Systems and Multiculturalism Degree programme, candidates shall study at least 14 modules comprising 5 common and 9 subject content area modules.
- Each module is worth 18 credits except for the project which is worth 90 credits.

MODULE SYNOPSES

MED743 Advanced Gender Studies in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MICT732 Advanced Information Communication Technology in Education

This module helps students to acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st century contexts, ICT in educational research, among others.

FMED132 Advanced Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business

transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MED731 Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution has the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MED734 Dissertation

The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at Masters Level.

MEIL701 Theories of Literature, Multiculturalism, and Critical Literary Practice in Africa

This module shall empower students with skills and competencies in critical literary practice. It shall achieve that through promoting a rigorous exegesis of literary theories that were developed in the diverse global cultures at different historical times on the basis of their applicability to the study and understanding of African people's literature, culture and worldview.

MEIL702 Tourism, Sustainable Development and Language Cultural Heritage Studies and Management

The module equips postgraduate students at Master's level with an in-depth understanding, of approaches to managing tourists and tourism and some other cultural industries for sustainable development. Ultimately, the module shall equip students with skills and competencies in the management and upkeep of world heritage sites that are found in Zimbabwe for the betterment of Zimbabwe's tourism.

MEIL704 Social History, Indigenous Knowledge Systems and Multiculturalism in African Literature

This module prescribes for study, of poetic and short-story anthologies, plays and novels that emerge from the different societies and cultures of the African continent. The ultimate goal of the module is to help students appreciate fiction as a rich reservoir of African people's history, knowledge systems and values of culture and as a worthy point of reference for innovation industrialisation and revolutionary action.

MEIL705 Syntax Innovation and Linguistic Pluralism in Zimbabwe

This module surveys theories of morphology and syntax and then discusses how they apply to the study of indigenous Zimbabwean languages. Through its promotion of the study of the morpo-syntactic structures of the different Zimbabwe indigenous languages, the module shall aid learners in appreciating the richness of Zimbabwe's linguistic diversity and multiculturalism.

MEIL703 Curriculum and Pedagogical Issues in Indigenous Languages,

This module surveys current approaches to the teaching of indigenous African languages literature and Indigenous Knowledge Systems and suggests how the approaches can be innovatively adopted for use in a classroom in Zimbabwe. In the process, the module grapples with how best listening, reading, writing and speaking skills can be employed in the teaching and learning of 'things indigenous.

MEIL706 Measurement and Evaluation in Indigenous Languages, Knowledge Systems, Literature and Multicultural Education

This module focuses on how both assessment and evaluation can be made integral to the teaching and learning of indigenous languages, knowledge systems, literature and cultures. The module shall help students assess different skills and how they might be integrated into the teaching and learning of indigenous languages, literature, cultures, heritage matters and knowledge systems in general.

MEIL708 Advanced Studies in Language Policy and Planning in Linguistic Diverse and Multicultural African Societies

This module focuses on language planning activities done in and language policies of different African states with special emphasis on the field of education. In the process, the module shall equip students with know-how and know-what, skills and potentials in language policy crafting and implementation as they are practised in diverse linguistic and multicultural contexts.

MEIL707 African Oral Literature and Indigenous Knowledge Systems

This module critically analyses the interconnectedness of orality, multiculturalism, indigenous knowledge systems and Zimbabwean people's philosophy of life in an ever-changing global terrain. Furthermore, the module shall rigorously scrutinise the centrality of the various genres of oral literature in promoting hunhu/ubuntu, invention, innovation and industrialisation in Zimbabwe.

DEPARTMENT OF SCIENCE, TECHNOLOGY AND DESIGN EDUCATION

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN AGRICULTURE AND ENVIRONMENT MANAGEMENT (EDU15)

Duration:	2 years
Actual Credit Load	300
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	288
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare pre- 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 Entry Requirements

Normal Entry**:**

Diploma/Certificate in Agriculture Education.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Agriculture

Specialist Focus: Training teachers in agricultural education

Orientation:

- Research and innovation-oriented. Teaching and learning that enhance creativity and problem-solving techniques to address social and economic challenges.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, laboratory technicians in related agriculture industries, agriculture extension officers, agronomists, seed and feed services, sales-chemicals, equipment, etc.

Further Studies:

Master's and Doctoral studies in Agriculture

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro teaching, teaching practice, research project, and individual independent study.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to teach Agriculture.
- Apply sound research and technological techniques when carrying out research in Agriculture.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to Agriculture.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Use appropriate research methods to develop new insights into contemporary teaching and learning practices.
- Identify and solve problems in the teaching and learning fraternity.
- Analyse and exploit entrepreneurial opportunities.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Degree programme in Agriculture, candidates shall study at least 24 modules.
- Each module is worth 12 credits except for the Project and Teaching Practice which are worth 24 credits each.

7.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

8.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

9.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations.

10.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

11.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

12.0 PROGRAMME STRUCTURE

Module Synopses

BCHS 131: Cultural and Heritage Studies
The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BED 133: Information Communication Technology in Education
This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the Internet of Things and emerging technologies and their application in classroom teaching.

BED 144: Schools Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to, creativity, innovation, industrialisation, and entrepreneurship.

SEAG 101: **Agricultural Practice**
To develop entrepreneurial skills in animal and plant production, financing, management and marketing. It also covers the processing of beef, dairy, cereal, fruit and vegetable products. Students shall be exposed to aspects of marketing, human resources, pricing, government policies and taxation.

SEAG 102: Horticulture Production
The module covers factors influencing horticulture in Zimbabwe; Plant growth regulators (PGRs), plant propagation technologies, soils and field management crop rotations, irrigation and drainage- hydrogeology, Integrated Pest Management (IPM), disease, moisture conservation, nutrition, harvesting/post-harvest handling, and storage marketing principles.

SEAG 103: Principles of Soil Science
The module focuses on soil formation, properties, structure, classification, management, land capability classification, soil profiling and soil testing. Basic Chemistry related to soil is also covered. Other aspects covered include soil fertility, plant mineral nutrition reclamation and pollution.

SEAG 104: Principles of Wildlife Management
The focus is on wildlife management, reproduction, conservation, game ranching, zoogeography and factors affecting animal distributions and wildlife values and perceptions. The module also covers malnutrition, predation and disease, nutrition, nutritional strategy, feeding habits and preference, water requirements and environmental physiology.

SEAG 105: GIS and Remote Sensing
The module explores how scientific and historical views of maps, and general school map work practices are traced back to Cartography. GIS, Global Positioning System (GPS) and Remote Sensing are introduced and applied to mapping systems. This module has practical and field components.

SEAG 106: Agricultural Economics and Farm Business Management

The module gives students an understanding of farm business management principles, and forms of business organisation that include records, accounting, auditing, information systems, labour, planning and budgeting. Students shall be exposed to various agricultural support schemes, cooperate governance, risk management and business ethics.

SEAG 107: Agricultural Marketing and Trade
The module focuses on developing students' knowledge of principles of agricultural marketing, laws governing local, regional and international marketing, the role of consumer behaviour, marketing models and product pricing.

BED 131: Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED 231: Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

EDGS 231: Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEIE 501: Entrepreneurship and Industrialisation in Agriculture
The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM 231: School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarizes students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EFS 131/EFPS 131/EFPH 131: Applied Educational Foundations
This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken creative capabilities inherent in them

SEAG 201: Crop Production and Physiology
The module gives students a general understanding of the anatomy and morphology of plants, factors affecting crop production, domestication and classification of cultivated plants, land use evaluation, crop farming technologies, plant growth analysis, plant nutrition and crop disease control and prevention.

SEAG 108: Pedagogics in Agriculture Education
The module is intended to develop students' knowledge and skills in syllabus interpretation, scheming and lesson planning in Agriculture. It also seeks to enhance the pedagogical skills of Agriculture pre-service teachers. It covers theoretical and practical approaches to the teaching of Agriculture and assessment issues and practices in Agriculture education.

SEAG 202: Farm Mechanisation and Structures
The module focuses on concepts of Mechanisation; Operational principles of two-stroke and four-stroke cycle engines, the fuel systems of petrol and diesel engines, cooling and lubrication systems of petrol and diesel engines. Knowledge of the above enables students to be efficient managers of farm machinery and equipment. Animal and tractor power – types,

potential, selection, determination of draught force requirements for mouldboard ploughs, and angles of attack of a mouldboard plough are covered.

SEAG 204: Animal Health and Nutrition
The module deals with nutritional descriptions of the components of feedstuffs, feed evaluation methods. Description of nutritive value and utilisation of feedstuffs including a comprehensive analysis of anti-nutritive factors; classification into cereal grains and processing by-products, protein-rich grains and oilseed cakes, animal by-products, grasslands and other forages, conserved forages, miscellaneous feedstuffs empower learners with the knowledge to manufacture their feedstuffs.

BED 232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

BED 136: Educational Management
The module introduces students to the basics of education management that speak to issues of sustainable development, innovation and industrialisation through effective and efficient management of school organisations. Students are familiarised to basic theories of educational management and the foundational building blocks of educational management namely, planning, organising, control, commanding and coordinating.

SEAG 205: Agricultural Biochemistry

Agricultural biochemistry combines the study of both chemistry and biology and how they are important in agricultural production, the processing of agricultural products into foods, feeds and beverages, whilst emphasising environmental monitoring and evaluation.

SEAG 203: Environmental Management
The module focuses on practices and processes that enable society, to reduce environmental impact without compromising agricultural productivity. The aim is to manage the interaction and impact of human activities on the natural environment with special reference to agricultural production and businesses.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN BIOLOGY AND APPLIED TECHNOLOGIES (EDU70)

Duration of Degree:	2 years
Actual Credit load	276
Maximum Credit Load:	300
Minimum Credit Load	240
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME
To prepare pre-service teachers to teach Biology up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS
Normal Entry**:**

Diploma/Certificate in Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS
Areas of Study:

Biology and Applied Technologies.

Specialist Focus:

Training teachers in Biology and Applied Technologies .

Orientation:

Teaching and learning that is research and innovation-oriented.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, laboratory technicians in related industries etc.

Further Studies:

Master's and Doctoral studies in Biology and Applied Technologies

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, farm-based activities, industrial visits, micro-teaching, teaching practice, research project, individual independent study, virtual and online teaching –google class, simulations: PhET application for simulations.

6.0 INTENDED LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Biology curriculum in secondary schools.
- Apply sound research and technological techniques when carrying out research.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to biology education.
- Guide learners in developing creativity, problem-solving, innovation and design skills in the field of Biology.
- Apply biological concepts to address issues in environmental protection, conservation, utilisation of natural resources for sustainable and ethical uses.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For this programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations.

Module Synopsis

BED 144: Schools Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods outside formal employment. Such competencies include creativity, innovation, industrialisation, and entrepreneurship.

BED 133: Information Communication Technologies in Education
This module seeks to equip students with skills for improving learning and teaching through the use of various instructional media that include audio visual communication. The module will also familiarise students with different computer software including MS Word, MS Excel, MS Access, PowerPoint and Publisher.

BCHS 131: Culture and Heritage Studies
This module introduces scholars to the definition terms of culture and heritage. The module will expose the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

SEBI 101: Diversity of Life and Conservation 1
The module focuses on taxonomy and phylogeny the goals of classification; the stages of classification; phonetics, and cladistics. It examines taxonomic keys and phylogenetic trees, diversity in the kingdom monera, protista, fungi, conservation of monera, protista and fungi, use of monera, fungi and protist for value addition.

SEBI 102: Biochemistry
This module introduces the molecular structure of water, amino acids and peptides; amino acids and proteins as acids and bases/ solving problems, protein structure; protein sequencing; analytical methods and techniques enzyme kinetics, enzyme

inhibition, carbohydrates, aldoses, ketoses, formation of hemiacetals, glycolysis, gluconeogenesis, pentose phosphate pathway, aerobic metabolism, oxidative phosphorylation, antioxidant systems, lipids fatty acids, and triglycerides.

SEBI 103: Cell Biology
The module discusses the structure of eukaryotic cells; the function of organelles, membrane structures transport across membranes; membrane synthesis, protein synthesis; sorting and delivery of the role of lysosomes in recycling cellular components, the functional importance of mitochondrial membranes in respiration, the components of the cytoskeleton; cell motility; cell differentiation, unlimited cell growth and cancer cells; applications in health, value addition.

BED 231: Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes: an analysis of the concepts of evaluation, assessment and measurement in education, contemporary ideas on how to improve assessment and evaluation in schools, test designing; analysis of test results; national examinations and grading.

BED 131: Research Methods and Statistics
The module introduces the learners to the basic principles of research; qualitative and quantitative approaches to research will be used; mixed methods research approach is introduced in this module; research instruments are explored to give the learners an appreciation of these instruments.

SEBI 104: Diversity of Life and Conservation 2
The module focuses on the kingdom's plantae and animalia. It explores the plant families of ecological and economic importance in the flora Zambesiaca, seeds, fruits and their dispersal, and adaptations of plants to pollinating agents; the module outlines the grades of organisation and the evolution of the two main lines of animals drawing examples from economically important classes/orders, conservation of flora and fauna, sustainable use of plants and value addition.

SEBI 203: Plant Morphology, Physiology and Productivity
The module introduces basic plant anatomy and architecture/morphology, tissues of the higher plant body and their functions, tissue organisationreproductive structures general adaptations of anatomy and morphology ecophysiology of photosynthesis and respiration; macronutrients and micronutrients; mechanisms and control of transport processes; plant hormones; application of knowledge for improved productivity in farming.

EDGS 231: Gender Studies for Educators
The module empowers the students with knowledge and skills that enable them to be gender sensitive in the University, workplace and all their interactions. Topics covered include: understanding gender, theories of gender inequalities, the historical development of gender, gender analysis, and gender issues in society, redressing gender imbalances, empowerment and strategies for creating a gender-responsive environment.

BEIE 501: Entrepreneurship and Industrialisation in Education
This module equips the students with the relevant knowledge of how to set up and successfully operate business/production units within and outside educational institutions. It covers issues such as how to identify the educational needs of communities, factors to consider in deciding to set up an educational institution, the legal framework including the Education Act and Statutory Instruments, the need for school rules and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and how to market the new educational institution.

BEFM 231: School Administration & Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting requirements of Treasury Instructions, the School Services Fund, the General-Purpose Fund and School Development Association Funds. Students shall have been equipped with financial literacy to establish their business enterprises.

EFS 131 & EFPS 131 & EFPH 131: Applied Educational Foundations
This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of learners from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

SEBI 105: Genetics and Evolution
The module explores genetics: mitosis and meiosis, mendelian genetics and the chromosome theory of heredity, mutation and variation, introduction to population genetics, evolution: population genetics and variation, the concept of, and evidence

for evolution, theory of evolution by natural selection, adaptation and adaptive radiation, the nature of species,specific mate recognition systems, isolating mechanisms and speciation, and application of principles of genetics in innovation.

SEBI 106: Animal Anatomy and Physiology
This module examines the function of tissues, organs, and organ systems, with an emphasis on the relationship between structure and function in animals from the level of the cell. The module shall dwell on bodily processes including respiration, circulation, digestion and excretion, digestion; circulation; respiration; excretion; nervous control; endocrinology; hormonal regulation, metabolism

SEBI 201: Principles of Ecology and Sustainable Management
This module introduces students to ecosystem processes and functions. The main relationships and interactions between biotic and abiotic components of ecosystems, major ecological zones of the world and the role of anthropogenic interference within natural ecological systems, nature and scope of ecology, levels of ecological organisation: individuals, populations, communities and ecosystems, population ecology, community ecology, the ecosystem, soil ecology, human impacts on ecosystems and sustainable management of resources.

SEBI 202: Biotechnology
The module examines the methods in biotechnology, ethical issues and legislation. It also focuses on viral elimination by meristeming, frost prevention, But genes, antisense technology, breeding for resistance/tolerance, gene therapy, bacteriology, microbiology sterilisation and euxinic culture, bacterial genetics the nature and replication of the bacterial genome, mutation, transformation, transduction and conjugation.

SEBI 203: Plant Morphology, Physiology and Productivity
The module considers the integrated structure and function of higher plants, Basic plant anatomy and architecture/morphology, tissues of the higher plant body and their functions. It also covers tissue organisation; reproductive structures, general adaptations of anatomy and morphology; and ecophysiology of photosynthesis and respiration. Macronutrients and micronutrients,mechanisms and control of transport processes, plant hormones, the application of knowledge for improved productivity are also included.

SEBI 204: Biomathematics
The module extends the range of usage of mathematical models in biology, ecology and evolution. Biologically, the course looks at models in evolution, population genetics and biological invasions. Mathematically the course involves the application of multivariable calculus, ordinary differential equations, stochastic models and partial differential equations, applications of the mathematical models in innovation

SEBI 205: Advanced Pedagogics in Biology
This module is designed to reflect on real classroom situations in comparison to theoretical, perspectives taken on becoming science teachers. The module focuses on classroom techniques, instructional procedures and languages, and teacher/learner interactions, updating classroom practices to be consistent with contemporary trends in science teaching, but which context and culturally sensitive, constructivist approach to Biology teaching, and 21st century teaching methods.

BED 135: Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Sustainable Development Goals, Gender, Human Rights, and Health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED 232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN CHEMISTRY AND APPLIED TECHNOLOGIES (EDU19)

Such competencies include creativity, innovation, industrialisation, and entrepreneurship.

SECH 111: Fundamental Principles of Physical Chemistry

The module explores the fundamental principles of chemical thermodynamics and its application to common chemical situations. In addition, the 1st and 2nd laws of thermodynamics are addressed, including topics such as thermochemistry, electrochemistry, chemical equilibrium and reaction kinetics. The laboratory practicals also form an integral part of the module.

SECH 112: Principles of Inorganic Chemistry

This module is an introduction to the fundamentals of atomic structure and chemical bonding. Simple Bonding Theories (Lewis structures, VSEPR theory, valence bond theory) Molecular Orbital Theory (sigma and pi bonding polyatomic MO diagrams). The module covers the chemical periodicity of period 2 and 3 elements, the chemistry of groups II, IV, VII as well as the chemistry of nitrogen and sulphur. Laboratory practicals are based on qualitative analysis.

SECH 115: Laboratory Skills and Techniques

This module is an introduction to the chemistry lab and it demonstrates the principles of chemistry and laboratory techniques. The module offers an opportunity to learn and master the basic chemistry lab techniques for carrying out experiments. The module also accords experience of basic laboratory skills in experimental planning, preparation, execution and documenting experimental results.

BED 131: Research Methods and Statistics

The module introduces the learners to the basic principles of research. Qualitative and Quantitative approaches to research shall be used. A mixed methods research approach shall be introduced in this module. Research instruments shall be explored to give the learners an appreciation of these instruments.

BED231: Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

SECH113 Fundamental Principles of Organic Chemistry

The module is an introductory course to organic chemistry, focusing primarily on the basic principles to understand the structure and reactivity of organic molecules. It includes extensive treatment of hydrocarbons, halogen derivatives, hydroxyl compounds, carbonyl compounds, carboxylic acids and derivatives, nitrogen compounds as well as polymerisation. The module provides an introduction to the chemistry of aromatic compounds.

SECH114 Fundamentals of Analytical Chemistry

The emphasis of this module is on the theory and applications of classical analytical techniques as well as the evaluation of experimental results. Topics including chemical equations and stoichiometry, introduction to statistical treatment of

analytical data; theory and application of gravimetric and titrimetric methods of analysis are covered by the module. The module includes laboratory practicals.

SECH116 Environmental Chemistry

The module provides students with the chemical basis for understanding our surroundings, and the global environment. This module examines the chemistry of the environment, emphasising the composition of the natural environment and the processes of natural and anthropogenic chemicals in the environment. It provides a broad overview of many important environmental issues thus providing the chemical basis for understanding the environment and environmental problems.

SECH211 Quantum Mechanics, Molecular Spectroscopy and Surface Chemistry

This module explores the fundamental principles of quantum mechanics and its application in modern chemistry as well as the interaction between matter and electromagnetic waves. The module covers fundamental and applied aspects of phase equilibria, surface chemical processes; theories of molecular adsorption/desorption, physical adsorption, chemisorption, adsorption isotherms and practical physical chemistry.

EDGS231 Gender Studies for Educators

The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and all their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, Gender Issues in society, Redressing Gender Imbalances, Empowerment and Strategies for creating a gender- responsive environment. Every student has to pass the module to graduate.

BE1E501 Entrepreneurship and Industrialisation in Education

This module equips the students with the relevant knowledge of how to set up and successfully operate business/production units within and outside educational institutions. It covers issues such as how to identify the educational needs of communities, factors to consider in deciding to set up an educational institution, the legal framework including the Education Act and Statutory Instruments, the need for school rules and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and how to market the new educational institution.

BEFM231 School Administration & Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting requirements of Treasury Instructions, the School Services Fund, the General-Purpose Fund and School Development Association Funds. Students shall have been equipped with financial literacy to establish their business enterprises.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations

This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of learners from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

SECH212 Coordination, Bioinorganic and Organometallic Chemistry

The module introduces the fundamental concepts of transition metal chemistry and coordination chemistry. It also focuses on the study of electronic structures and bonding in transition metal, electronic spectra of transition metal complexes, magnetic properties of transition metal complexes, organometallic chemistry, bioinorganic chemistry.

SECH215 Advanced Pedagogics in Chemistry

The module focuses on the development of the Chemistry teacher's pedagogical skills. Emphasis is on contemporary issues in chemistry education such as aims of chemistry education, philosophical issues in chemistry education, learning cycles, conceptual change models, constructivist approach to chemistry teaching and learning, cultural perspective of science education, curriculum issues in chemistry education, practical work in chemistry and administrative issues in science education.

SECH213 Organic Synthesis and Spectroscopy

The module introduces the key concepts of organic chemistry through a survey of the basic synthetic methods and reaction mechanisms. It also considers the application of spectroscopic technologies for the determination of molecular structure.

SECH214 Principles of Chemical Instrumentation and Analysis

This module equips the student with knowledge of instrumental methods of chemical analysis. Applications in different fields (environmental, medical, food, industrial, forensics, and materials science) will be highlighted. The fundamental principles of instrumental analytical chemistry through the learning of analytical methods based on the use of spectroscopic, electrochemical and chromatographic technologies will be addressed.

SECH217 Nano chemistry and Nano Technology

The course introduces students to issues such as nanoscale which refers to materials with dimensions on the scale of nanometres, Control of the material world at the scale of atoms and molecules which can produce materials with fundamentally different properties and behaviour and has been touted as the next technological revolution.

SECH216 Industrial Chemistry

The module deals with the development, optimisation and monitoring of various chemical processes used in industry for transforming raw materials etc., into useful commercial products for society. Industrial chemistry as an applied science plays a vital role in diverse areas that influence human society. The module equips students with knowledge and skills related to chemistry for job opportunities in industries in both private and public sectors such as manufacturing and processing industries, industries related to petroleum, and the environment.

SECH218 Green Chemistry and Sustainable Development

This module introduces the concept of sustainable chemistry and a holistic perspective of chemistry along the life cycle of chemical products. The module considers a range of factors that should be considered when designing more sustainable chemical products and processes for the future. It familiarises students with the principles for the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances.

BED232 Research Project

In the final year of their studies, students carry out research in a subject-related area. The research project enables the students to sharpen their research skills and at the same time apply the content learnt during the studies. At the end of the projects, students are expected to have acquired research skills and learnt presentation and project proposal writing skills.

BED135 Contemporary Issues in Education

The module exposes students to the most current global trends like Globalisation, Sustainable Development Goals, Gender, Human Rights, and Health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED136 Educational Management

The module introduces students to the basics of education management that speak to issues of sustainable development, innovation and industrialisation through effective and efficient management of school organisations. Students are familiarised with basic theories of educational management and the foundational building blocks of educational management namely, planning, organising, controlling, commanding and coordinating.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN COMPUTER SCIENCE AND EMERGING TECHNOLOGIES (EDU26)

Duration:	2 years
Actual Credit load	300
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach Computer Science up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry:

Diploma in Computer Science Education from accredited and recognised institution or equivalent.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Computer Science Education

Specialist Focus:

Training teachers in Computer science education

Orientation:

Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, Education Inspectors, Training Officers, consultants, laboratory technicians, IT consultancy, network support engineers, IT managers and the like in related industries.

Further Studies:

Master's and Doctoral studies in Computer Science Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research projects, individual independent study, virtual and online teaching.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the computer science curriculum
- Apply sound research and technological techniques when carrying out research in computer science education
- Monitor, assess, and evaluate learners, learning processes, projects and programmes related to physics education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation .
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Degree programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

MODULE SYNOPSES

BCHS131: Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised on for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

SECS101: Computer Technology Concepts and Practices

This module is designed to familiarise the students with computer technology concepts and the operation of computers and various application programmes and equip them to use computers in their respective areas of study to solve problems afflicting human society. It also covers work on a number of systems and emerging technologies like IoT, Cloud computing, Moodle and Moocs, and the like, basic application software, computer networking and computer security issues.

SECS102: Fundamentals of Computer Architecture

This module shows students how computers really work and how millions of transistors come together to form a complete computing system. Topics covered include transistors, logic gates, basic processor components, memory, input/output devices, and low-level machine instructions. This module has a required lab component and is required for the entire programme.

SECS103: Foundations of Computer Programming

This module covers essential elements of computer programming. It provides the student with the skills required to design, code, test and execute programmes that can be used to solve everyday problems inherent in business, civil society and government. Topics include compilers, interpreters, data types, variables, expressions, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging computer programmes, Fundamental data structures, primitive types and mini projects on programming.

SECS104: Mathematics for Computing

This module introduces the student to mathematical concepts for computing. Topics to be covered include binary and other number bases, mathematical sets and functions, logic and Boolean algebra, finite state machines, relations, graphs and trees.

SECS105: Systems analysis and design

The module introduces the student to systems theory and concepts. Topics to be covered include the system development life cycle SDLC, tools of the analyst, the planning phase, project management, analysis, design, implementation, testing, deployment and maintenance phases.

BED131: Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED231: Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

SECS106: Data Structures and Algorithms

This module focuses on designing, implementing and analysing efficient data structures and algorithms for computer programmes. Topics covered include algorithms and programmes, lists, queues, dictionaries, tree data structures, sorting techniques, directed and un-directed graphs, representation of graphs, heuristic algorithms, and implementation of data structures in any high-level programming language.

SECS 107: Advanced Pedagogics in Computer Science

This module is about computer technology and classroom dynamics, resources for the teaching of Computer Science, and Issues in the design of ICT learning environments. Emphasis shall be on strategies for teaching computing, development of marking criteria assessment of computer projects, and management of computer laboratories.

SECS 108: Object Oriented Programming I

This module aims to introduce students to the concept of OOP. It also introduces students to the C++ language and trains students to develop applications in C++. Topics to be covered include characteristics of OOD systems, classes and objects, message passing, Data abstraction, data hiding, inheritance and polymorphism.

SECS 109: Software Engineering with Objects

This module is an introduction to software engineering in industry. It covers the problems and solutions manifest in real software development and modification projects. Different models of the software engineering process are compared and contrasted. Current best practices in software engineering and various approaches to software process improvement are presented. Topics to be covered include approaches to software development, requirements concepts and analysis, classes and associations interactions, states and activities and use of UML tools in software development.

BEIE501: Entrepreneurship and Industrialisation in Education

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

EDGS231: Gender Studies for Educators

The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEFM231: School Administration and Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

BED144: Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

SECS201: Operating Systems and Hardware

This module covers the basics of operating systems, their characteristics and applications, Hardware concepts, storage devices, motherboards, configuration and maintenance, hardware and network security and troubleshooting, and recovery from disasters.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations

This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

BED232: Research Project

The student shall cover a substantial amount of work doing a systems design project which entails working with a live client to solve a business problem. At the end of it, all the student must be able to design and develop a software product that can be adopted by individuals, or a business organisation to demonstrate innovation and promote industrialisation.

SECS202: Managing Network Hardware and Security

This module covers networking fundamentals, Ethernet LANs and switches, IP version 4 addressing and subnetting and its implementation, IP version 6, fundamentals of WANs, virtual LANs and operating CISCO routers and network security

SECS203: Database Systems

This module covers database concepts and users, Architecture and ER modelling, relational models and relational algebra, database queries, functional dependencies and concurrency control in database transactions as well as database security.

SECS 204: Internet Programming

This module introduces The World Wide Web, The Internet and Mark-up (HTML), Style: CSS, User experience and Design principles, Dynamic Web content development with PHP. PHP files includes, development of PHP Web applications, python scripts, web security and web content management systems.

SECS205: Object oriented Programming 11

The module exposes students to the Java Virtual Machine (JVM), java classes and objects, constructors, inheritance, interfaces, threads and swings, applets and web application development capabilities.

SECS206: Management Information Systems

This module covers basic concepts in Management information systems. Information systems in global business today, ISs in organisations, ethical, legal and social issues in ISs, business intelligence, internet, telecommunications and wireless technologies, E-commerce and IS security, managing global projects and systems, and managing IT infrastructure.

BED135: Contemporary Issues in Education

The module exposes students to the most current global trends like globalisation, sustainable development goals, gender, human rights, and health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

REGULATIONS FOR THE BACHELOR OF EDUCATION DUAL HONOURS IN SCIENCE DEGREE (EDU16)

Duration:	4 years
Actual Credit Load	288
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach two Secondary School Science learning areas (Mathematics, Statistics; Biology; Chemistry; Physics; Computer Science and Geography) up to A-Level and produce highly qualified personnel for educational institutions, government departments, Non-Governmental Organisations and related industries.

2.0 ENTRY REQUIREMENTS

Normal Entry: Diploma/Certificate in Education or equivalent from an accredited and recognized institution in any two of the following learning areas Mathematics, Biology, Chemistry, Physics, Computer Science, and Geography.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Science Education

Specialist Focus: Upskilling Science Education teachers

Orientation: Teaching and learning, that is, heritage-based, research, innovation and industrialisation-oriented.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, and laboratory technicians in related industries.

Further Studies: Masters and Doctoral studies in Science Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, laboratory sessions, seminars, group work, fieldwork, industrial visits, research projects, independent study, virtual and online learning.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Science curriculum.
- Apply sound research and technological techniques when carrying out research in science education.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to science education.
- Employ the scientific method, experimentation, and critical thinking skills to synthesise scientific knowledge and apply

innovative research strategies to solve problems in resource conservation, productivity, technological change, and sustainable development within Zimbabwe, SADC, and the world.
- Analyse and exploit entrepreneurial opportunities to promote scientific innovation and industrialisation
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu/Unhu and critical thinking in both professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Dual Honours in Science Degree programme, candidates shall study at least 24 modules.
  - Each module is worth 12 credits except for the project which is worth 24 credits

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

Module synopses for Common Modules

EFS 131 & EFPS 131 & EFPH 131: Applied Educational Foundations
The module shall cover the foundations of teaching in the areas of psychology of education, philosophy of education and sociology of education. Theories in these areas that relate to teaching and learning are explored to capacitate students in designing and managing learning environments in their respective subject areas.

BCHS 131: Cultural and Heritage Studies
The module introduces scholars to terms of culture and heritage. The module exposes the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. The history of Zimbabwe and its different ethnic groupings in different geographical locations are explored. Learners shall be challenged to appreciate and enjoy the multicultural status of the nation.

BED133: Introduction to Information Communication Technology
This module guides students to critically and creatively apply concepts, principles, hardware and software associated with the infusion of information communication technology (ICT) in solving educational problems and meeting challenges in their roles. The module covers the fundamental concepts of computer and telecommunication uses in education. Its focus is on the application of ICTs as tools and resources for teaching and learning.

BED144: School Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competency-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed concerning how they empower students with life-long competencies that prepare students for sustainable livelihoods outside formal employment. Such competencies include creativity, innovation, industrialisation, and entrepreneurship, among others.

ASE302: Pedagogics in Science Education for Sustainable Development
The module shall focus on both theoretical and practical aspects of teaching science subjects, going beyond syllabus interpretation, and lesson planning. It covers discipline-specific theories of learning, contemporary issues and modern trends in Mathematics, Biology, Chemistry, Physics, Computer Science, Geography, Agriculture and Physical Education, Sports Science and Management. It aims to develop students' capacity to teach science in a manner that promotes sustainable development competencies, such as creativity and innovation.

BED231: Assessment and Evaluation Techniques
The module shall cover assessment and evaluation issues in education across all subject areas. The content of the module includes analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BED131: Research Methods and Statistics
The module explores the basic foundations of research, paradigms and ethical issues. It introduces the data collection and analysis techniques for both qualitative and quantitative research. The techniques require a mastery of descriptive and inferential statistics as skills that are employed in the conduct of supervised and independent research activities.

BEIE501: Entrepreneurship and Industrialisation in Education
This module equips the students with the relevant knowledge of how to set up and successfully operate business/production units within and outside educational institutions. It covers issues such as how to identify the educational needs of communities and factors to consider in deciding to set up an educational institution (the legal framework including the Education Act and Statutory Instruments). It also covers school rules and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and how to market the new educational institution.

EDGS231: Gender Studies for Educators
The module imparts knowledge and skills that enable gender-sensitive behaviour and attitude in the university, workplace and all social interactions. Topics that are covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, Gender Issues in Zimbabwe, Redressing Gender Imbalances, Empowerment and strategies for creating a gender-responsive environment.

BED232: Research Project

The module demands a demonstration of research skills through the conduct of supervised independent research and the submission of a dissertation for assessment. It requires an oral presentation to defend the dissertation.

BED135: Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Sustainable Development Goals, Gender, Human Rights, and Health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BEFM231: School Administration and Financial Management in Education
The module shall introduce sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting requirements of Treasury Instructions, the School Services Fund, the General-Purpose Fund and School Development Association Funds. Students shall have been equipped with financial literacy to establish their business enterprises.

Under this degree programme, a student shall choose two learning areas of specialisation from the following**:** Mathematics and Statistics; Biology and Applied Technologies; Chemistry and Applied Technologies; Physics and Applied Technologies; Computer Science and Emerging Technologies; Geography and Environmental Education.

The following tables show the modules to be done in each learning area and per level.

BIOLOGY

Level 1 Semester 1

Code	Module Description	Credits
SEBI201	Principles of Ecology and Sustainable Management (optional)	12
SEBI101	Diversity of Life and Conservation 1	12

Level 1 Semester 2

SEBI103	Cell Biology (optional)	12
SEBI104	Diversity of Life and Conservation 2	12
SEBI105	Genetics and Evolution	12

Level 2 Semester 1

SEBI106	Animal Anatomy and Physiology	12
SEBI203	Plant Morphology, Physiology and Productivity	12

Level 2 Semester 2

SEBI202	Biotechnology	12

Module Synopses

SEBI 201: Principles of Ecology and Sustainable Management
This module introduces students to ecosystem processes and functions; the soil, plants, animals, microorganisms and their interconnectedness. The main relationships and interactions between biotic and abiotic components of ecosystems, and the nature and the scope of ecology are explored. It also covers levels of ecological organisation, individuals, populations, communities and ecosystems population ecology and community ecology. The ecosystem, soil ecology; restoration, reclamation and sustainable management of resources are also included.

SEBI101: Diversity of Life and Conservation 1
The module focuses on Taxonomy and phylogeny the goals of classification; the stages of classification; phonetics, and cladistics. It examines Taxonomic keys and phylogenetic trees, Diversity in the kingdom Monera, Protista, Fungi, conservation of monera, protista and fungi, use of monera, fungi and protist for value addition. The module shall also focus on the kingdoms Plantae and Animalia exploring the Plant families of ecological and economic importance in the flora Zambesiaca, seeds, fruits and their dispersal, and adaptations of plants to pollinating agents.

SEBI103: Cell Biology

The module discusses the structure of eukaryotic cells,the function of organelles, membrane structures transport across membranes,membrane synthesis, protein synthesis, sorting and delivery of the role of lysosomes in recycling cellular components, functional importance of mitochondrial membranes in respiration, the components of the cytoskeleton, cell motility, cell differentiation, unlimited cell growth and cancer cells,applications in health and value addition.

SEBI106: Animal Anatomy and Physiology

This module examines the function of tissues, organs, and organ systems, with an emphasis on the relationship between structure and function in animals. From the level of the cell, the module shall dwell on bodily processes including respiration, circulation, digestion and excretion, digestion, circulation, respiration, excretion, nervous control, endocrinology,hormonal regulation, and metabolism.

SEBI203: Plant Morphology, Physiology and Productivity

The module considers the integrated structure and function of higher plants, Basic plant anatomy and architecture/morphology, tissues of the higher plant body and their functions. It also covers tissue organisation, reproductive structures, general adaptations of anatomy and morphology, ecophysiology of photosynthesis, respiration, macronutrients and micronutrients,mechanisms and control of transport processes, plant hormones, and application of knowledge for improved productivity are also included.

SEBI202: Biotechnology

The module examines the methods in biotechnology, ethical issues and legislation, viral elimination by meristeming, frost prevention, Bt genes, antisense technology, and breeding for resistance/tolerance. It also covers gene therapy, bacteriology, microbiology sterilisation and exenic culture. Bacterial genetics the nature and replication of the bacterial genome, mutation, transformation, transduction and conjugation. Applications of biotechnology in medicine, agriculture, industry and environmental remediation are also included.

CHEMISTRY

Level 1 semester 1

Level 2 semester 2

SECH 217	Nano chemistry and Nano Technology	12
SECH 218	Green Chemistry and Sustainable Development	12

Module Synopses

SECH 111: Fundamental Principles of Physical Chemistry

The module explores the fundamental principles of chemical thermodynamics and its application to common chemical situations. In addition, the 1st and 2nd laws of thermodynamics are addressed, including topics such as thermochemistry, electrochemistry, chemical equilibrium and reaction kinetics. The laboratory practicals also form an integral part of the module.

SECH112: Principles of Inorganic Chemistry

This module is an introduction to the fundamentals of atomic structure and chemical bonding. Simple Bonding Theories (Lewis structures, VSEPR theory, valence bond theory) Molecular Orbital Theory (sigma and pi bonding polyatomic MO diagrams). The module covers the chemical periodicity of period 2 and 3 elements, chemistry of groups II, IV, VII as well as the chemistry of nitrogen and sulphur. Laboratory practicals are based on qualitative analysis.

SECH115: Laboratory Skills and Techniques
This module is an introduction to the chemistry lab and it demonstrates the principles of chemistry and laboratory techniques. The module offers an opportunity to learn and master the basic chemistry lab techniques for carrying out experiments. The module also accords experience of basic laboratory skills in experimental planning, preparation, execution and documenting experimental results.

SECH113 Fundamental Principles of Organic Chemistry
The module is an introductory course to organic chemistry, focusing primarily on the basic principles to understand the structure and reactivity of organic molecules. It includes extensive treatment of hydrocarbons, halogen derivatives, hydroxyl compounds, carbonyl compounds, carboxylic acids and derivatives, nitrogen compounds as well as polymerisation. The module introduces the chemistry of aromatic compounds.

SECH114 Fundamentals of Analytical Chemistry

The emphasis of this module is on the theory and applications of classical analytical techniques as well as the evaluation of experimental results. Topics including chemical equations and stoichiometry, introduction to statistical treatment of analytical data; theory and application of gravimetric and titrimetric methods of analysis are covered by the module. The module includes laboratory practicals.

SECH116 Environmental Chemistry
The module provides students with the chemical basis for understanding our surroundings, and the global environment. This module examines the chemistry of the environment, emphasising on the composition of the natural environment and the processes of natural and anthropogenic chemicals in the environment. It provides a broad overview of many important environmental issues thus providing the chemical basis for understanding the environment and environmental problems.

SECH217: Nano chemistry and Nano Technology
The course introduces students to issues such as nanoscale which refers to materials with dimensions on the scale of nanometres, Control of the material world at the scale of atoms and molecules which can produce materials with fundamentally different properties and behaviour and has been touted as the next technological revolution.

SECH216: Industrial Chemistry
The module deals with the development, optimisation and monitoring of various chemical processes used in industry for transforming raw materials etc., into useful commercial products for society. Industrial chemistry as an applied science plays a vital role in diverse areas that influence human society. The module equips students with knowledge and skills related to chemistry for job opportunities in industries in both private and public sectors such as manufacturing and processing industries, industries related to petroleum, and the environment.

SECH218: Green Chemistry and Sustainable Development
This module introduces the concept of sustainable chemistry and a holistic perspective of chemistry along the life cycle of chemical products. The module considers a range of factors that should be considered when designing more sustainable chemical products and processes for the future. It familiarises students with the principles for the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances.

COMPUTER SCIENCE

Level 1 semester 1

Code	Module Description	Credits
SECS101	Computers and Computer Applications	12
SECS102	Fundamentals of Computer Architecture	12

Level 1 semester 2

SECS103	Foundations of Computer Programming	12
SECS104	Mathematics for Computing	12

Level 2 semester 1

SECS205	Object-Oriented Programming in C++	12
SECS201	Operating Systems and Hardware (optional)	12

Level 2 semester 2

SECS402	Database Systems	12

Module Synopses

SECS101: Computers and Computer Applications
This module covers computer concepts. Topics covered include data processing cycle, number systems, computer arithmetic, types of computers and computer peripherals. It also includes types of computer software including systems software, application software and utility software, and basics of computer network and data communication.

SECS102: Fundamentals of Computer Architecture
This module covers the fundamental concepts in the architecture of computer systems including register, structure, memory organisation and management, organisation of peripherals, and machine-level operations. Topics to be covered include variations in computer architectures including buses, and internal and external memory. I/O and interfacing, instruction sets, RISC computers. These concepts are integrated through the use of assemblers, linkers and loaders.

SECS103: Foundations of Computer Programming
This module introduces programmes in writing using assignments. Topics covered include variables, simple types, operators and expressions, conditional and repetitive statements, inputs and output. Simple functions, programme structure and organisation, definition and scope, and introduction to classes and objects are also covered.

SECS104: Mathematics for Computing
This module focuses on designing, implementing and analysing efficient data structures and algorithms for computer programmes. Topics covered include algorithms and programmes, lists, queues, dictionaries, tree data structures, sorting techniques, and directed and undirected graphs. It also covers the representation of graphs, heuristic algorithms, and implementation of data structures in any high-level programming language.

SECS205: Object-Oriented Programming in C++
The module introduces the principles of object-oriented programming, tokens, expressions and control structures. Functions in classes and objects, constructors and destructors, operator overloading, type conversions, inheritance,extending classes, pointers, virtual functions and polymorphism, managing console I/O operations, working with files, object-oriented systems development, and projects.

SECS201: Operating Systems and Hardware
The module introduces operational procedures, visible Windows and other operating systems, network technologies, protocols, LANS, WANS, microprocessors, BIOS, CMOS, motherboards, and hard drive technologies. It incorporates installing and upgrading Windows, configuring users, and groups, authorisation, user access controls (UAC), troubleshooting, and maintenance of systems components/ peripherals, safe storage of data and recovery from disasters, and safe disposal of computer waste-green computing.

SECS402: Database Systems
The module focuses on Indicative content: Introduction and conceptual modelling, databases and database users, database concepts and architecture. It also includes Data modelling using the ER model, EER, Relational Database constraints, Relational Algebra and Calculus, Basic Constraints and Queries, normalisation and functional dependencies. It covers Java and PHP and Web databases.

GEOGRAPHY

Level 1 Semester 1

Code	Module Description	Credits
SEGE101	Cartography, GIS and Geostatistical Analysis	12
SEGE103	Meteorology and Climatology	12

Level 1 Semester 2

SEGE104	Geomorphology	12
SEGE201	Biogeography and Sustainable Resources Management	12

Level 2 Semester1

SEGE202	Population, Settlement Dynamics and Agriculture	12
SEGE401	Hydrology and Fluvial Processes	12

Level 2 Semester 2

SEGE404	Regional Inequalities and Development Strategies	12
SEGE405	Mineral Beneficiation, Industrialisation and Trade	12

MODULE SYNOPSES

SEGE 101: Cartography, GIS and Geostatistical Analysis
The module explores how scientific and historical views of maps and general school map work practices are traced back to Cartography. GIS, Global Positioning System (GPS) and Remote Sensing are introduced and applied to mapping systems. The module also explores measurement levels and their application to statistical analysis. Univariate and multivariate statistical models are explored and how they are related to the geographical research process. This module has practical and field components.

SEGE103: Meteorology and Climatology
The module focuses on weather elements, instruments and measurement and synoptic weather symbols, weather statistics, rainfall types and distribution, weather forecasting, weather hazards, climate change and variability. These concepts are discussed in the context of teaching and learning weather studies in Zimbabwe schools & SADC in particular and the world in general.

SEGE104: Geomorphology
The module explores, rock weathering and resulting landforms, the internal structure of the earth, continental drift theory, plate tectonics, folding, faulting, volcanoes and earthquakes landforms resulting from water action and river processes, wind action and hazards associated with landform development processes. It interrogates tropical landform development and theories of landscape formation.

SEGE201: Biogeography and Sustainable Resources Management
The module explores the natural resources concept, renewable and non-renewable resources, and sustainable use of resources in relation to population pressures. Exploitation and conservation of resources such as wildlife, soil, and vegetation distribution are explored zeroing in on biomass, biomes, biodiversity, and adaptation.

SEGE202: Population, Settlement Dynamics, and Agriculture
The module focuses on trends in population growth, the population as a determinant of economic development, and the impact of population growth on health and diseases. The influence of conventional and indigenous knowledge systems on migration and population policies is explored. Urban morphology, related processes of urbanisation, suburbanisation, counter–urbanisation, and urban renewal are analysed are applied to relevant environments. Land use and land reform with reference to population pressure and settlement are also explored. The module also analyses the impact of biochemical, mechanical and socio-economic changes on Less Economically Developed Countries (LEDCs).

SEGE401: Hydrology and Fluvial Processes
The module tackles the drainage basin system: inputs, processes/flows, outputs, stores, and groundwater: occurrence, quantity and quality and sustainable management of groundwater. It analyses rainfall–discharge relationships within the drainage basin as well as hydrological hazards and mitigation and control.

SEGE404: Regional Inequalities and Development Strategies
The module assesses the indicators of economic development and explains regional inequalities in Zimbabwe, Africa and the world, their causes and impacts as well as solutions to regional disparities. The Core-periphery concept is explained, and case studies of regional disparities are identified, discussed and evaluated.

SEGE405: Mineral Beneficiation, Industrialisation and Trade
The module explores the use and future of traditional, clean, and green sources of energy generation in Zimbabwe. Sustainable use of mineral resources and Cost-benefit analysis (CBA) in mining is explored concerning mining legislation and policies in Zimbabwe such as Environmental Impact Assessment (EIA). Industrialisation models and their relevance to Zimbabwe's development are explored. Trade patterns & practices are analysed and tied to the resultant transport models.

MATHEMATICS AND STATISTICS MODULES

Level 1 Semester 1

Code	Module Description	Credits
SEMA101	Calculus	12
SEMA102	Linear Mathematics	12

Level 1 Semester 2

SEMA103	Applied Statistics	12
SEMA104	Numerical Methods	12

Level 2 Semester 1

SEMA105	Applications of Ordinary Differential Equations	12
SEMA106	Probability Theory	12

Level 2 Semester 2

SEMA401	Mechanics	12
SEM402	Vector Analysis (Optional)	12

MODULE SYNOPSES

SEMA 101: Calculus

The module shall introduce the Number systems; Natural, integral, rational and irrational; the principle of mathematical induction, the real number system: decimal and geometrical representation, inequalities and their solution sets. It also covers Functions; different types of functions and their inverses, Limits of functions, Continuity, Sequences and Series, Differentiation, Integration and their applications and the Mean value theorems.

SEMA102: Linear Mathematics

The module shall focus on Complex numbers: geometric representation, algebra, De Moivre's theorem polynomials and roots of polynomial equations, Matrices and determinants. It also covers the algebra of matrices, inverses, definition and manipulation of determinants, solutions of simultaneous linear equations, applications to geometry and vectors, Differential equations: separable, homogeneous, exact, integrating factors, and linear equations with constant coefficients.

SEMA106: Probability Theory

The module covers axiomatic probability, sets and events, sample space, conditional probability, independence, laws discrete and continuous random variables. It also covers probability density functions, means, variance, expectation, Independence, Chebyshev's inequality, moments and moment generating functions, common discrete distributions and continuous distributions.

SEMA104: Numerical Methods

The module covers numerical methods for solving problems in mathematics, numerical methods for root-finding, simple iterative methods and the Newton-Raphson method, convergence, Polynomial interpolation and splines. It also covers numerical integration and differentiation. The module also includes differential equations and modelling of real-life phenomena using differential equations. This includes solving Ordinary Differential Equations.

SEMA103: Applied Statistics

This module covers Data analysis; Variables and Graphs, Numerical Summary of Data, spread using quartiles, Box plots, Standard deviation, Normal Distributions, Standardized observations, and Normal Approximation. It also covers sampling distribution for the mean and standard deviation, central limit theorem, chi-square, student-t and F distributions. Distribution of min and max, estimation, interval estimation, confidence intervals, hypothesis testing, parametric and non-parametric tests, composite hypothesis, sampling from the normal distribution and tests of equality of two multinomial distributions are also included.

SEMA204: Real Analysis

The module covers a firm foundation in the theory of real analysis and uses definitions and logical reasoning to prove mathematical results or theorems. The students shall develop strong analytical skills which are useful in students' day-to-day lives. It provides students with various techniques for solving mathematical problems and prepares students for higher studies in mathematics and related fields.

SEMA401: Mechanics

The module covers kinematics, projectiles, vectors, Newton's Laws, forces, momentum, gravity, impulse and moments. It also covers geostationary orbits, relative velocity, uniform orbits, oscillations, elastic forces and resonance. It also includes equivalent systems of forces, systems of particles, elementary theory of rigid bodies, Archimedes Principle, and Hydrodynamics. Bernoulli's Principle and its applications, fluid flow are also included.

SEMA402: Vector Analysis

The module covers line, surface and volume integrals flux through surfaces, Grad, Curl and Stokes' Theorem characterisation of conservative vector fields, convergence and divergence theorem,solenoidal vector fields and vector potential, comparison of integral theorems with the fundamental theorem of calculus as well as Poisson's equation and its solution for some simple geometries.

PHYSICS

Level 1 Semester 1

Code	Module Description	Credits
SEMA 101	Calculus	12
SEPH 101	Waves and Optics	12

Level 1 Semester 2

SEPH102	Mechanics	12
SEPH103	Robotics	12

Level 2 Semester 1

SEPH203	Electricity and Magnetism	12
SEPH201	Modern and Thermal Physics	12

Level 2 Semester 2

SEPH204	Electronics and Electronic Communication	12
SEPH205	Quantum and Solid-State Physics	12

Module Synopses

SEMA101: Calculus
The module exposes number systems, natural, integral, rational and irrational. The principle of mathematical induction, the real number system, decimal and geometrical representation, inequalities and their solution sets, function,s different types of functions and their inverses, limits of functions, continuity, sequences and series, differentiation, integration and their applications and the mean value theorems.

SEPH101: General Mechanics, Waves and Optics
The module shall introduce the concepts covering kinematics, projectiles, vectors, Newton's laws, forces, momentum, gravity, work, energy, and power. It shall also deal with wave motion, the general equation of wave motion, reflection of waves, refraction of waves, Fermat's principle and its applications.

SEPH102: Mechanics
The module covers Kinematics, projectiles, vectors, Newton's Laws, forces, momentum, gravity, work, energy, power, conservative and dissipative forces, impulse and moments, circular motion, motion of planets and satellites – geostationary orbits, relative velocity, uniform relative translational motion, orbits, oscillations, elastic forces and resonance, equivalent systems of forces, systems of particles, and elementary theory of rigid bodies.

SEPH103: Robotics
The module introduces the student to the main concepts and skills needed to assemble, programme, and control a simple robot. The module shall cover various multidisciplinary topics necessary to understand the fundamentals of designing, building, and programming robots such as kinematics, dynamics, trajectory planning, control of robot manipulators, and sensing. In addition, the module shall address the basic manufacturing techniques, robot terminology, different types of automation, safety, basic robotic programming, interfacing robotic communications, automated work cells, and robotic applications.

SEPH201: Modern and Thermal Physics

The module seeks to focus on Modern Physics: Nuclear Physics: Thermal Physics: Thermometry, Zeroth law, laws of thermodynamics, heat transfer, entropy, Carnot cycle and heat engines, kinetic theory, ideal gas, kinetic interpretation of temperature and pressure, equipartition of energy, distribution of molecular speeds, Brownian motion, van der Waals equation.

SEPH203: Electricity and Magnetism

The module covers current and charge, Gauss's law and applications, dielectrics, magnetic fields and forces. Force on a current-carrying conductor and magnetic field. The magnetising field, magnetic susceptibility and permeability, Ohm's law, transformers, capacitors, Electrostatics, Cathode Ray Oscilloscope, The CRO as a voltmeter, a clock, and a display device.

SEPH204: Electronics and Electronic Communication

The module focuses on the following areas: Switching algebra, logic devices, combinational logic devices and Data flow model – -analysis and synthesis, data processing devices, data routing devices, sequential logic devices and FSM model mixed logic circuits, modular design of devices RTL architecture, analogue electronic devices and their models, analogue systems and their models. It shall also address digital transmission, analogue transmission, synchronous, asynchronous, and isochronous transmission modes, transmission media, circuit switching, packet switching, frame relay, routing: interior routing and exterior routing.

SEPH205: Quantum Physics and Solid State

The module shall cover atomic structure and atomic bonding, crystal structure, electrical and thermal conductivity of solids, Band theory, conductors, semiconductors, insulators, electronic properties and processes of semiconductors, the diode law, semiconductor devices; capacitors, resistors, diodes, transistors and thyristors, integrated circuits. It shall also address quantum mechanical principles.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN FOOD TECHNOLOGY AND DESIGN (EDU71)

Duration:	2 years
Actual Credit Load	300
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	300
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach Food Technology up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry**:**

Diploma/Certificate in Education or equivalent in which Food Technology is a major subject from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Food Technology

Specialist Focus:

Training teachers in Food Technology and Design.

Orientation:

Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates employed as teachers, lecturers, Education Inspectors, Training Officers, and laboratory technicians in related food industries.

Further Studies:

Master's and Doctoral studies in Food Technology and Design.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research project, and individual independent study.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to teach food technology and design.
- Apply sound research and technological techniques when carrying out research in food technology and design.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to food technology and design.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Degree programme in Food Technology and Design, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.

8.0 PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

MODULE SYNOPSES

BED133: Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED144: Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131: Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised on for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

SEFT101: Introduction to Food Creativity and Development

The module shall focus on the application of food preparation, principles and techniques in the preparation of standard food products as well as the principles of food laboratory management and their application in the planning and preparation of food. The module shall review the global food situation with an emphasis on Zimbabwe. Foods of plant and animal origin and their micro flora. The proximate composition and some natural chemical constituents of foods, the nutritional status of different foods, and basic physical, chemical and biological principles of food processing and preservation shall be looked into by use of WHO Anthroplus, Stata, SPSS NutriSurvey and ENA for SMART software.

SEFT102: Organic Chemistry

The module introduces students to basic organic chemistry concepts. The module shall deal with the composition and properties carbon carbon-related food and the chemical changes it undergoes as a result of processing and exposure to artificial environments. The focus is on the study of carbon compounds, their structure, bonding and nomenclature. It also

explores the chemistry of aromatic compounds, free radicals, macromolecules, carbohydrates, lipids, amino acids, peptides, proteins, synthesis of natural and complex synthetic polymers through the use of Stata and SPSS software.

SEFT103: Food Microbiology and Preservation Technology

The module focuses on the role and significance of microorganisms in foods with particular reference to food production technology, spoilage, preservation technology, sanitation and poisoning and the use of microorganisms in bioprocesses of textured food products, yoghurt, cheese and fermented foods, and their public health significance. The study of safety technology related to food production, the beneficial utilisation of microorganisms in food applications and consumption are part of the module.

SEFT104: Food Chemistry

The module emphasises how food products change under certain food processing techniques and chemistry of changes occurring during processing, storage and utilisation. It also explores the chemistry of aromatic compounds, free radicals, macromolecules, carbohydrates, lipids, amino acids, peptides, proteins, synthesis of natural and complex synthetic polymers. The effect of food processing innovations on texture, colour, flavour, stability and nutritional value shall also be covered.

BED131: Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED231: Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

SEFT107: Product Design Technology and Ingredient Functionality

The module focuses on biochemical and microbiological technology analysis of food quality and the technological methods of analysis. The module shall also focus on developing and evaluating interventions to achieve and maintain healthful eating patterns among populations and examine the relation and synergy between nutrition and physical activities. Students shall carryout various experiments and design various products using various ingredients and justify the effects of those ingredients in products. Software of NutriSurvey and ENA for SMART would be applied.

SEFT108: Food Service Management Technology

The module focuses on technology in the management of commercial and non-commercial food service systems through food production and preparation. The focus shall be on food service technology and delivery systems, menu writing, recipe standardisation, inventory control, purchasing, and storage, food production, budget management and financial controls of the food service systems. Emphasis shall be on microbial, chemical and physical hazards associated with foods and food processing environments.

SEFT109: Innovative Technology in Food Preparation and Management

The module focuses on the application of food preparation principles and techniques in the preparation of standard food products. The students are equipped with skills to be innovative and creative in designing techniques of new food products. They shall also be exposed to techniques in nutrient analysis using NutriSurvey. The module also focuses on nutritional changes in food during preparation considering texture, colour, flavour, stability and nutritional value. The role of preservation and management of micronutrients and macronutrients during food preparation is emphasised.

EDGS231: Gender Studies for Educators

The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions, and their implications on education. It also exposes students to different empowerment frameworks and legislation.

BEIE501: Entrepreneurship and Industrialisation in Food Technology and Design

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for

entrepreneurship and distinguish between wage employment, self-employment, and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEM231: School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations
This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

SEFT201: Human Physiology
The module integrates, synthesises and describes human anatomy and physiology to develop a working knowledge of human physiology in relation to nutritional sciences. The module focuses on identifying the main systems of the human body and describes how each of them works and contributes to the maintenance of normal body functioning. The students shall explore the role of nutrition in the maintenance of body homeostasis.

SEFT202: Nutrition and Metabolism
The module focuses on advances in bimolecular science and how it has increased the focus of nutrition on the metabolic pathways that transform nutrients. The module shall focus on metabolic cycles that include the glycolysis cycle and citric acid cycle. Concepts related to nutrition in the aetiology of diseases to monitor and reduce the risk for chronic diseases and birth defects are highlighted.

BED135: Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED136: Educational Management
The module introduces students to the basics of education management that speak to issues of sustainable development, innovation and industrialisation through effective and efficient management of school organisations. Students are familiarised to basic theories of educational management and the foundational building blocks of educational management namely, planning, organising, controlling, commanding and coordinating.

SEFT203: Food Product Development Technology and Marketing
This module focuses on the new product development process using available resources and the strategic features of new product development, developing strategic thinking, planning, and managing abilities throughout the entire new product. The emphasis shall be on idea generation, formulation, processing, market positioning, packaging, product cost, pricing, safety, experimentation and legal issues.

SEFT204: Methods of Teaching Food Technology and Design.
This module emphasises professional development which is diverse and involves a complex range of activities calling on the exercise of new and appropriate hands-on teaching methods, skills and organisational settings as well as the use of appropriate Information Communication Technology (ICT) equipment and tools. It also develops knowledge and skills in the designing of reliable and valid tests.

BED232: Research Project in Food Technology and Design
In this final year, two-semester module each student carries out a research project in an area of his/her choice in Food Technology and Design under the guidance of a supervisor. Students are encouraged to conduct research that shows creativity and innovation which has the potential to contribute to knowledge on food technology and environmental sustainability. Through the study, students are expected to apply their knowledge and skills in research in the resolution of

an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in Food Technology and Design education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN MATHEMATICS AND APPLIED STATISTICS (EDU26)

Duration:	5 years
Actual Credit load	540
Minimum Credit Load:	480
Maximum Credit Load:	540
Total MBKS credit load	384
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare pre-service teachers to teach Mathematics up to 'A'Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry: At least five 'O' level passes including Mathematics, English and at least one Science subject. Pass in Mathematics must be at least a B.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Mathematics Education.

Specialist Focus: Training teachers in Mathematics Education.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on practical aspects.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, laboratory technicians in related industries etc.

Further Studies: Master's and Doctoral studies in Mathematics Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research projects, individual independent study, virtual and online teaching

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the mathematics curriculum.
- Apply sound research and technological techniques when carrying out research in mathematics education.
- Monitor, assess and evaluate learners, learning processes, tasks and projects related to mathematics education.
- Employ the scientific method, experimentation, and critical thinking skills to synthesise mathematics knowledge and apply innovative research strategies to solve problems at the community level, national level and sustainable development within Zimbabwe and the world.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Hons Degree programme, candidates shall study at least 43 modules.
- Level one modules are worth 6 credits each, from level 2 to level 5. Each module is worth 12 credits except for the project which is worth 24 credits and Teaching Practice worth 120 credits.

8.0 ASSESSMENT

MODULE SYNOPSES

SEM101: Introduction to Calculus

The module covers number systems, functions, limits,differentiation, and integration as basic introductory concepts to calculus.

SEM102: Statistical Techniques

The module covers definitions of statistics, samples, parameters, statistics, variables, data, etc. Branches of statistics, descriptive and inferential; functions of statistics; graphical techniques: bar graphs, histograms, pie charts, box plots, dot plots, box and whisker plots, measures of central tendency and variability and probability sampling methods.

SEM103: Introduction to Probability

The module covers axioms of probability, sets and events, sample space, conditional probability, independence, and laws of probability. Empirical distributions, probability distributions, common, discrete and continuous probability distributions, use of probability tables, law of large numbers, Central Limit Theorem; normal approximation to Binomial and Poisson distributions.

SEM104: Introduction to Mechanics

The module covers forces and equilibrium, kinematics of motion in a straight line, Newton's laws of motion, and motion of a projectile.

SEM105: Numerical Methods, Sequences and Series

The module covers simple numerical methods for solving problems in mathematics, computer arithmetic and rounding errors, numerical methods for root finding, simple iterative methods, Newton-Raphson Method, trapezium rule, convergence, solution of linear algebraic equations, sequences, arithmetic and geometrical series,Binomial expansions and convergence of series.

SEM106: Complex Numbers and Vectors

The module covers complex numbers, geometric representation of complex numbers, algebra of complex numbers, De Moivre's theorem, definition of a vector, direction and position vectors, geometry of vectors, vector notation, types of vectors, magnitude of a vector, scalar product,vector equation of a straight line, equation of a plane and cross product.

SEM107: Coordinate and Analytic Geometry
The module builds on the understanding of geometry, what constitutes proof in geometry, geometry postulates, Pythagoras' theorem and its applications, coordinate geometry, and use of computer software.

SEM108: Algebra and Functions
The module covers functions and systems of equations, solving systems of equations using matrices (up to 3 unknowns), and graphical representation of functions (odd and even functions, hyperbolic functions, exponential functions, logarithmic functions), etc.

EFA331/332/333: Applied Educational Foundations
This module enhances students with psychological, sociological or philosophical theories that are central to the learning and development of learners from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

CS131: Basic Communication Skills
The module is intended ideally for a one-semester on academic and business communication skills, which meets for three (3) hours per week. The module is aimed at assisting students to achieve their full potential by equipping them with the necessary communication skills essential for their studies as well as post-university work experience.

BCHS131: Culture and Heritage Studies
The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised on for socio-economic development. The module further explores landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

AECS131: Introduction to Information Communication Technology
This module guides students to critically and creatively apply concepts, principles, hardware and software associated with the infusion of information communication technology (ICT) in solving educational problems and meeting challenges in their roles as facilitators of learning. The module covers the fundamental concepts of computer and telecommunication uses in education. Its focus is on the application of ICTs as tools and resources for teaching and learning.

SEMA101: Calculus
The module covers number systems, the principle of mathematical induction, functions, limits of functions, continuity, sequences and series, Differentiation and Integration (fundamental theorems of calculus), the mean value theorems for example Taylor's theorem, applications to maxima and minima, and curve sketching.

SEMA102: Linear Mathematics
The module focuses on complex numbers (geometric representation, algebra), De Moivre's theorem, polynomials and roots of polynomial equations, matrices and determinants (algebra of matrices, inverses, definition and manipulation of determinants, solutions of simultaneous linear equations, applications to geometry and vectors), differential equations: separable, homogeneous, exact, integrating factors, linear equation with constant coefficients.

SEMA103: Descriptive Statistics
This module covers data analysis; variables and graphs, numerical summary of data, mean, median and mode, spread using quartiles, box plots, standard deviation, normal distributions, standardised (Z- scores) observations, normal approximation, sampling distribution for the mean and standard deviation, sampling distribution, Central Limit Theorem, Confidence Intervals: Confidence Intervals in General, Confidence Interval for a population mean, computational techniques using statistical software oackages like SPSS and Stata.

EFA334: Schools Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

SEMA105: Applications of Ordinary Differential Equations
The module covers basic techniques for the solution of first and second-order differential equations, method of undetermined coefficients and method of variation of parameters, existence and uniqueness of solutions, series solution, differential equations of special functions and laplace transforms to the solution of ODEs.

SEMA201: Introduction to Discrete Mathematics
The module covers sets formulae, propositions, Boolean Algebra and its applications, logic, mathematical reasoning and proofexamples taken from various areas of mathematics, relations: binary, n- ary, reflexive, symmetric, transitive, equivalence relations and classes, partitions, order relations, inverse relations, functions: one-to-one, onto, and inverse functions, operations: sets with one or two binary operations, permutations, symmetry groups, modular arithmetic, etc.

SEMA205: Real Analysis
The module covers Archimedean property of Cauchy sequences, limits and continuity of real functions, Boundedness theorem, Intermediate value theorem, Uniform continuity, Differentiability, Local extrema, Rolle's theorem, Mean-value theorem, L'Hospital'srule, Leibuiz's theorem, Taylor's theorem, Applications to finding roots, and curve sketching, The Riemann integral, the Mean-value theorem for integrals, and the Fundamental theorem of calculus.

SEMA206: Hypothesis Testing
The module exposes students to the Introduction to the testing of hypothesis. Simple hypothesis versus simple alternative, Composite hypothesis. Sampling from the normal distribution, Chi-square tests, Tests of equality of two multinomial distributions and generalisations, tests of independence in contingency tables, and sequential tests of hypothesis. Hypothesis testing using statistical SPSS.

SEMA301: Further Calculus
The module introduces students to Theorems on differentiation. The Mean Value theorems. Applications to maxima and minima, Functions of several variables. Differentiation of functions of several variables, Lagrange multipliers. Multiple and triple integrals. Applications to finding area, volume, arc length, centroid, moments of inertia, etc. Series: tests of convergence, absolute and conditional convergence series of functions, and uniform convergence are also explored.

BED231: Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

EDGS231: Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

SEMA302: Probability Theory
The module covers Axiomatic probability, sets and events, sample space, conditional probability, Independence, laws discrete and continuous random variables, probability density functions, mean, variance, expectation, Independence, Chebyshev's inequality, moments and moment generating functions, Common Discrete Distributions and Continuous Distributions: Uniform, Normal, Exponential, gamma, beta, Use of tables, Joint Probability Distributions, Conditional and marginal distribution, covariance and correlation, Approximations, Central limit Theorem, Normal approximation to Binomial, Poisson, etc. Probability distribution using statistical software packages.

SEMA303: Pedagogics in Mathematics Education

The module introduces the pre-service mathematics teachers to the theoretical and practical aspects of teaching the subject. The content of the module includes syllabus interpretation, planning mathematics lessons, theories of learning mathematics, some contemporary issues in mathematics, innovative approaches to teaching mathematics and assessment in mathematics.

BED131: Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED140: Education Media Practice & Micro Teaching
This is a practical module which introduces pre-service teachers to the practice of teaching. The module focuses on the selection and use of educational media, interpreting syllabi into schemes of work and lesson plans; presenting lessons to peers using appropriate pedagogical approaches and technologies as an induction into actual teaching, reflecting on the lesson, and providing feedback to peers, analysing recorded lessons and micro-teaching in schools.

BEIE501: Entrepreneurship and Industrialisation in Education
The module equips the students with entrepreneurial skills on how to set up and successfully operate business and production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

SEMA304: Introduction to Numerical Methods
The module covers simple numerical methods for solving problems in Mathematics. Topics covered include: computer arithmetic and rounding errors, numerical methods for root-finding, simple iterative methods and the Newton-Raphson method, convergence, Polynomial interpolation and splines, solution of linear algebraic equations, scaled partial pivoting, numerical integration and differentiation, numerical integration of ODEs, Euler, second order and Runge-Kutta methods.

SEMA305: Statistical Inference
The module covers population and sample concepts as the basis of statistical inference, parameters and statistics, review of probability theory, Central Limit Theorem, Chi-square, student-t and F distributions, distribution of min and max, Estimation, Interval estimation, Confidence intervals, Hypothesis testing, Parametric and non-parametric tests, Composite hypothesis, Sampling from the normal distribution, tests of independence in contingency tables, Types of statistical data, Other goodness-of-fit tests; Kolmogorov'-Smirnov.
Statistical inference using statistical software Packages like SPSS and Stata.

SEMA306: Mathematics Teaching for Sustainable Development
The module explores how mathematics can be taught to enhance sustainability. Specifically, the modules develop students' capacity to teach mathematics in a manner that promotes sustainable development competencies such as creativity, innovation, problem-solving, modelling, leadership, collaboration, enterprise skills, technological literacy, etc. The module also explores how mathematics teaching and learning can integrate national and global issues such as poverty, environmental awareness, health, gender, and global warming.

BED321, BED323 & BED324
In the 2 semesters that the students are in teaching practice, they are expected to demonstrate a sound understanding of the basics of their programme of study. The 321 component is the report that the student produces indicating that they were able to match theory with practice. Component 323 is the assessment by the lecturers. BED 324 is assessed by school supervisors.

BED321, BED323 & BED324: Teaching Practice
The modules are largely Teaching Practice. They should reflect and demonstrate a sound understanding of the basics of the programme of study. The first component is the report that is produced indicating how the theory has been matched with practice. The second component is the assessment by the lecturers. The third component is assessed by school supervisors.

BEFM231: School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

SEMA402: Regression and ANOVA
The module covers correlation and regression, scatter plots, correlation matrix, Method of least squares, associated lines, assumptions underlying regression, checking the validity of assumptions, Outliers, Pearson's and Spearman's correlation coefficients, predictions, Regression in terms of sums of squares and sums of products, Estimation and testing, t and F-tests, Analysis of variance (ANOVA), Fitting a straight line by least squares.Application of statistical software packages in computations in regression and Analysis of variance.

SEMA403: Introduction to Graph Theory
The module introduces the abstract known as a graph, definitions and characterisation of classes of special graphs, distance and connectedness measures, various algorithms applied to graphs and some of their proofs, classical and contemporary.

SEMA404: Mechanics
The module covers Kinematics, projectiles, Newton's Laws, forces, momentum, work, energy, power conservative and dissipative forces, Orbits, Oscillations, elastic forces and resonance, Equivalent systems of forces plane statistics, system of particles, and elementary theory of rigid bodies.

SEMA405: Further Probability
The module exposes students to Bivariate probability distributions. Moment generating functions. Characteristic functions. Multinomial and multivariate normal distributions. Distributions of functions of random variables. Cumulative distribution function technique. Expectations of functions of random variables. The transformation Y=g(x). Probability integral transform. Other transformations for discrete and continuous random vectors. Sampling distributions.

BED232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his or her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

EFA336: Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Sustainable Development Goals, Gender, Human Rights, and Health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN MATHEMATICS AND APPLIED STATISTICS (EDU26)

Duration:	2 years
Actual Credit Load	276
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME
To prepare in-service teachers to teach **Mathematics** up to 'A' Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS
Normal Entry**:**

Diploma/Certificate in Mathematics Education or equivalent from an accredited and recognised institution.

3.0 Programme Characteristics
Areas of Study:

Mathematics Education.

Specialist Focus:

Training Mathematics Education Teachers.

Orientation:

Teaching and learning that is research and innovation-oriented.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, technicians in related industries etc.

Further Studies:

Master's and Doctoral studies in Mathematics Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research project, individual independent study, and virtual and online learning.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Mathematics and Statistics curriculum.
- Apply sound research and technological techniques when carrying out research in Mathematics and Statistics Education.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to Mathematics and Statistics education.
- Employ the scientific method, experimentation, and critical thinking skills to synthesise Mathematics knowledge and apply innovative research strategies to solve problems at the community level, national level and sustainable development within Zimbabwe and the world.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education (Honours) in Mathematics Degree programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits
-

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

Module synopses

BED133: Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED144: Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131: Culture and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised on for socio-economic development. The module further explores landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

SEMA101: Calculus

The module exposes number systems: natural, integral, rational and irrational, the principle of mathematical induction, the real number system: decimal and geometrical representation, inequalities and their solution sets, functions: different types of functions and their inverses, limits of functions, continuity, sequences and series, differentiation, integration and their applications and the mean value theorems.

SEMA102: Linear Mathematics

The module focuses on complex numbers: geometric representation, algebra, De Moivres theorem polynomials and roots of polynomial equations, matrices and determinants: algebra of matrices, inverses, definition and manipulation of determinants, solutions of simultaneous linear equations, applications to geometry and vectors, differential equations: separable, homogeneous, exact, integrating factors, linear equation with constant coefficients.

SEMA 103: Descriptive Statistics
This module covers data analysis; variables and graphs, numerical summary of data, spread using quartiles, box plots, standard deviation, normal distributions, standardised observations, normal approximation, sampling distribution for the mean and standard deviation, sampling distribution, central limit theorem, confidence intervals confidence intervals in general, confidence interval for a population mean, and how confidence Internals. data analysis using statistical software packages.

SEMA104: Probability Theory

The module covers Axiomatic probability, sets and events, sample space, conditional probability, independence, laws discrete and continuous random variables, probability density functions, mean, variance, expectation, Independence, Chebyshev's inequality, moments and moment generating functions, common discrete distributions and continuous Distributions.

SEMA105: Applications of Ordinary Differential Equations
The module examines the basic techniques for the solution of first and second-order differential equations, method of undetermined coefficients and method of variation of parameters, the Existence and Uniqueness of solutions, Series solution, Differential equations of special functions and Laplace transforms to the solution of ODEs.

SEMA106: Mathematics Teaching for Sustainable Development

The module focuses on global and national policies on development and sustainability. It explores how mathematics can be taught to enhance sustainability, and promote sustainable development competencies such as creativity, innovation, problem-solving, modelling, leadership, collaboration, enterprise skills etc. The module also explores how mathematics teaching and learning can integrate national and global issues.

BED231: Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

BED131: Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BEFM231: School Administration and Financial Appreciation
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EDGS231: Gender Studies for Educators

The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

SEMA201: Introduction to Discrete Mathematics
The module covers sets: formulae, propositions, Boolean Algebra and its applications, logic, mathematical reasoning and proof, relations: binary, n- ary, reflexive, symmetric, transitive, equivalence relations and classes, partitions, order relations, inverse relations, functions: one to one, onto, inverse functions, operations: sets with one or two binary operations: permutations, symmetry groups, and modular arithmetic.

BEIE501: Entrepreneurship and Industrialisation in Education

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

SEMA202: Advanced Pedagogics in Mathematics
This module is designed to meet the practical needs of in-service classroom science teachers. The purpose of the module is to reflect on real classroom situations in comparison to the theoretical, perspectives taken in the methodology module on becoming mathematics teachers. The module focuses on classroom techniques, instructional procedures and languages, and teacher/learner interactions. The teachers need to share challenges, useful ideas, suggestions, demonstrations, and examples of teaching science.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations
This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of learners from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

SEMA203: Statistical Inference
The module covers population and sample concepts as the basis of statistical inference, parameters and statistics, review of probability theory, Central Limit Theorem, Chi-square, student-t and F distributions, distribution of min and max, estimation, interval estimation, confidence intervals, hypothesis testing, parametric and non-parametric tests, composite hypothesis, sampling from the normal distribution and tests of equality of two multinomial distributions and statistical inference using statistical software Packages like SPSS, Minitab and Stata.

SEMA204: Introduction to Numerical Methods

The module introduces students to modern methods, techniques, and computational methods for solving problems in linear algebra, nonlinear equations, interpolation, approximation and integration. It will also involve the presentation of basic mathematical foundations of numerical methods and computing. Students will get hands-on experience in solving problems and give useful scientific tools for scientists, and engineers and others. Matlab software is of prime importance in this module.

SEMA205: Real Analysis

The module covers a firm foundation in the theory of real analysis and uses definitions and logical reasoning to prove mathematical results or theorems. The students shall develop strong analytical skills which are useful in students' day-to-day lives. It provides students with various techniques for solving mathematical problems and prepares students for higher studies in mathematics and related fields.

BED232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

BED135: Contemporary Issues in Education
The module exposes students to the most current global trends like globalisation, Sustainable Development Goals, gender, human rights, and health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

Duration:	2 years
Actual Credit Load	300
Minimum Credit Load:	240
Maximum Credit Load:	300

Total MBKS Credit Load: 192
ZNQF Level: 8

1.0 Purpose of the Programme

- To prepare in-service teachers with knowledge, skills and attitudes with which to teach Physical Education and sports science up to 'A' level and help learners prepare for life and work.

2.0 ENTRY REQUIREMENTS

Normal Entry**:**

Diploma/Certificate in Physical Education and Sports or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Physical Education and Sports.

Specialist Focus:

Training teachers in physical education, sports science and management.

Orientation:

Research and innovation with emphasis on the personal development of learners, participatory action to address health, social and economic challenges through physical education and sports.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, Education Inspectors, Training Officers, Sports Consultants and Administrators, Counsellors, etc.

Further Studies:

Master's and Doctoral studies in Physical Education, Sports Science and Administration.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, seminars, group work, research projects, field trips, virtual and online teaching, individual independent study, and entrepreneurship training.

6.0 LEARNING OUTCOMES

6.0 Ability to carry out an independent, limited research or development project in accordance with applicable norms for research ethics.
7.0 Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation within the sporting arena.
8.0 Apply soft skills such as Ubuntu and critical thinking in both professional and personal interactions given the increase in drug abuse, violence, corruption and match-fixing in sports.
9.0 Adapt to societal changes in their environments to promote unity and harmony through sports.
10.0 Developing a sense of self-discipline and sense of achievement and fairness.
11.0 Fostering a sense of responsibility, transparency and integrity.
12.0 Participatory citizenship.

7.0 GENERAL PROVISIONS

- For this Bachelor of Education Degree programme, candidates shall study 24 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits

Module Synopses

BED133: Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED144: Schools Curriculum Competencies and Innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131: Cultural and Heritage Studies

The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised on for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

SEPS101: Historical Issues of Physical Education, Sports and the Olympic Movement

The module focuses on the value of Physical Education, Sport Science and Management in the development of individuals and societies throughout the history of the human race. It has been and is still an important part of society in terms of economic and social development. This introductory module helps students appreciate the role that Physical Education and Sport have been playing in the holistic development of individuals from time immemorial.

SEPS102: Athletics Skills, Coaching and Officiating

This module covers track and field events. It also includes the theory and practical learning of both coaching and officiating, knowledge of athletics facilities, rules, and planning and management of tournaments. Students shall realise how coaching and officiating can be channels/avenues for business.

SEPS103: Pedagogy and Coaching: The Science for Attainment

The module embraces knowledge of theories and principles of training, which shall enable students to teach, guide and correct the learners expertly and confidently. The focus shall also be on principles of training, teaching styles, methods of practice, components of fitness and other relevant documentation which are handy for those intending to take up coaching as a hobby and as big business.

SEPS104: Generic Games' Skill: Theory and Practice

This module enables students to demonstrate practical skills, the ability to prepare for teaching episodes or coaching sessions, play, officiate and coach the selected ball games. They shall also be educated on the various equipment and facilities, and how to prepare or adapt fields for activities.

BED131: Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED231: Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

SEPS105: Anatomy and Physiology of the Human Body

The module covers efficiency in coaching and teaching with a special focus on assisting students in the prevention of injuries and improvement of techniques based on their understanding of the human body, systems and structures.

SEPS106: The Art and Science of Movement in Gymnastics: Theory and Practice

The module seeks to impart to students practical and theoretical knowledge of gymnastics which will enable them to appreciate its importance in enhancing both mental and physical health. It also aims at developing the students into effective teachers and instructors of gymnastics.

SEPS107: Generic Sports Management and Organisation

The module develops in students an understanding of the principles and functions in sports management which will enable them to actively take part in the management and development of sport programmes at school and in the community. The

knowledge gained shall make the students contribute meaningfully to sports programmes, not only in educational institutions but also in other sectors where management skills are required for a living.

EDGS231: Gender Studies for Educators

The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEIE501: Entrepreneurship and Industrialisation in Education

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

BEFM231: School Administration and Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations

This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

SEPS201: Aquatic Skills and Outdoor Sports

The module equips students with practical and theoretical aquatic skills necessary for life saving. This module shall also consider the nature and value of outdoor sport so that students are able to plan and organise outdoor activities and train communities in disaster management techniques.

SEPS202: Nutrition and Sports Medicine

The module develops an appreciation of the value of proper nutrition and related feeding habits in sports and the therapeutic role of sports in daily life. Practical skills in handling common injuries in sport and their prevention and first aid shall be carried out. The module assists students in mastering skills of handling learners in the event of unfortunate occurrences of bone fractures; bleeding; muscle sprains and muscle tears.

SEPS203: Biomechanics of Human Movement

The module covers mechanics of movement, forces and body levers, linear motion and angular kinetics for a scientific justification of the application of knowledge of biomechanics in coaching sports skills to improve the efficiency and performance of the learners. The acquired knowledge shall enable learners to set up and manage gyms for business.

SEPS204: Testing, Measurement and Technology in Sport

The module focuses on the various ways of testing and measuring the performance of the learners to check on progress and also identify areas of weakness that require further skills development. The students shall be able to assess the learners and draw conclusions on the effectiveness of training programmes in different sporting environments.

SEPS205: Sociological and Psychological Issues in Sport

The module focuses on contemporary issues like drug abuse, match-fixing, cheating and violence to educate the students about their adverse effects on the development of sport and socio-economic development in general. Voluntarism, gender, media and sport, shall also be considered for a broader understanding of how these aspects impact upon sport in general.

BED135: Contemporary Issues in Education

The module exposes students to the most current global trends like Globalisation, Millennium development goals, Gender, Human rights, and Health pandemics, how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED232: Research Project

In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN PHYSICS AND APPLIED TECHNOLOGIES (EDU74)

Duration:	2 years
Actual Credit Load	300
Minimum Credit Load:	240
Maximum Credit Load:	300
Total MBKS Credit Load:	192
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach physics up to 'A'Level and produce highly qualified personnel for educational institutions, government departments and Non-Governmental Organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry**:**

Diploma/Certificate in Physics Education or equivalent from an accredited and recognised institution.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Physics Education

Specialist Focus:

Training teachers in Physics Education

Orientation:

Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, laboratory technicians in related chemical industries etc.

Further Studies:

Master's and Doctoral studies in Physics Education

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research project, individual independent study, and virtual and online learning.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the Physics curriculum.
- Apply sound research and technological techniques when carrying out research in Physics education.
- Monitor, assess and evaluate learners, learning processes, project and programmes related to Physics education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

- For the Bachelor of Education Degree programme, candidates shall study at least 23 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.
-

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

Module Synopses

BED133: Information Communication Technology in Education

This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics include the role of ICT in education, software application in education, multimedia learning, the internet of things and emerging technologies and their application in classroom teaching.

BED144: Schools curriculum competencies and innovation

The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialisation, and entrepreneurship.

BCHS131: Culture and Heritage Studies

This module introduces scholars to the definition terms of culture and heritage. The module exposes the learners to issues like civic education, spirituality, and tangible and nontangible Zimbabwean resources. History of Zimbabwe and its different ethnic groupings in different geographical locations. Learners would be challenged to be tolerant and enjoy the multicultural status of the nation.

SEMA101: Calculus

The module exposes Number systems: Natural, integral, rational and irrational, The principle of mathematical induction, The real number system: decimal and geometrical representation, inequalities and their solution sets, Functions: different types of functions and their inverses, Limits of functions, Continuity, Sequences and Series, Differentiation, Integration and their applications and the Mean value theorems.

SEPH101: General Mechanics, Waves and Optics

The module shall introduce the concepts covering kinematics, projectiles, vectors, Newton's Laws, forces, momentum, gravity, work, energy, and power. It shall also deal with wave motion, the general equation of wave motion, Reflection of waves, refraction of waves, Fermat's principle and its applications.

SEPH102: Mechanics

The module covers Kinematics, projectiles, vectors, Newton's Laws, forces, momentum, gravity, work, energy, power, conservative and dissipative forces, impulse and moments, circular motion, motion of planets and satellites – geostationary orbits, relative velocity, uniform relative translational motion. orbits, oscillations, elastic forces and resonance, equivalent systems of forces, systems of particles, and elementary theory of rigid bodies.

BED231: Assessment and Evaluation Techniques

The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education, contemporary ideas on how to improve assessment and evaluation in schools; test designing, analysis of test results, national examinations and grading.

BED131: Research Methods and Statistics

The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

SEPH103: Robotics

The module introduces the student to the main concepts and skills needed to assemble, programme, and control a simple robot. The module shall cover various multidisciplinary topics necessary to understand the fundamentals of designing, building, and programming robots such as kinematics, dynamics, trajectory planning, control of robot manipulators, and sensing. In addition, the module shall address the basic manufacturing techniques, robot terminology, different types of automation, safety, basic robotic programming, interfacing robotic communications, automated work cells, and robotic applications.

SEPH104: Electric Circuits

The module covers Circuit theory Kirchhoff's law, loop theorem, currents in a multi-loop circuit, junction theorem, Thevenin Theorem, Norton Theorem, Maximum power theorem, AC circuit theory, impedance, reactance, phase diagrams, use of complex numbers in circuit theory, resonance, power factor, half power points, AC bridges, resistance, capacitance and inductance measurements, transformer, and three phase power systems.

SEPH105: Advanced Pedagogics in Physics

The module focuses on the development of the Physics teacher's pedagogical skills. Emphasis is on contemporary issues in Physics education such as aims of Physics education, philosophical issues in Physics education, learning cycles, conceptual change models, constructivist approach to chemistry teaching and learning, the cultural perspective of science education, curriculum issues in Physics education.

SEPH201: Modern and Thermal Physics

The module seeks to focus on Modern Physics: Nuclear Physics: Thermal Physics: Thermometry, Zeroth law, laws of thermodynamics, heat transfer, entropy, Carnot cycle and heat engines, kinetic theory, ideal gas, kinetic interpretation of temperature and pressure, equipartition of energy, distribution of molecular speeds, Brownian motion, van der Waals equation.

BEIE501: Entrepreneurship and Industrialisation in Education

The module equips the students with entrepreneurial skills on how to set up and successfully operate business/production units within and outside educational environments. Students are expected to develop a conceptual framework for entrepreneurship and distinguish between wage employment, self-employment and entrepreneurship. Familiarisation with the incubation hub and the transformation of education into an industry are considered.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations

This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

EDGS231: Gender Studies for Educators

The module empowers the students with knowledge and skills that enable them to be gender sensitive in the university, workplace and in all their social interactions. Topics covered include Understanding Gender, Theories of Gender Inequalities, Historical Development of Gender, Gender Analysis, Gender Issues in society, Redressing Gender Imbalances, Empowerment and Strategies for creating a gender responsive environment. Every student has to pass the module to graduate.

BEFM231: School Administration and Financial Management in Education

The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarises students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

SEPH202: Medical Physics
This module exposes the student to the basic physics of biomedical imaging as well as provides a broad insight into the applications of physics in medicine. The module introduces key physical principles as applied to medical imaging and radiation therapy. Topics covered shall include imaging metrics, radioactivity, radiation therapy, computed tomography, nuclear medicine, ultrasound, and magnetic resonance imaging.

SEPH203: Electricity and Magnetism
The module covers current and charge, Gauss's law and applications, dielectrics, and m agnetic field and forces. Force on a current-carrying conductor and magnetic field. The magnetising field, magnetic susceptibility and permeability, Ohm's law, transformers, capacitors, electrostatics, Cathode Ray Oscilloscope, the CRO as a voltmeter, a clock, and a display device.

SEPH204: Electronics and Electronic communication
The module focuses on the following areas: Switching algebra, logic devices, combinational logic devices and Data flow model – -analysis and synthesis, data processing devices, data routing devices, Sequential logic devices and FSM model Mixed logic circuits, modular design of devices RTL architecture, analogue electronic devices and their models, analogue systems and their models. It shall also address digital transmission, analogue transmission, synchronous, asynchronous, and isochronous transmission modes, transmission media, circuit switching, packet switching, frame relay, routing: interior routing and exterior routing.

SEPH205: Quantum Physics and Solid State
The module shall cover atomic structure and atomic bonding, crystal structure, electrical and thermal conductivity of solids, Band theory, conductors, semiconductors, insulators, Electronic properties and processes of semiconductors, the diode law, Semiconductor devices; capacitors, resistors, diodes, transistors and thyristors, Integrated circuits. It shall also address quantum mechanical principles.

SEPH206: Atomic and Nuclear Physics
The module exposes students to atomic and nuclear structures and provides an understanding of these phenomena based on quantum mechanics. The principles of quantum mechanics shall be applied to atoms, molecules and atomic nuclei to understand the structure of matter on a microscopic level, and their interaction with external electric and magnetic fields. The basic concepts and theories of nuclear physics are developed.

BED232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as showing their appreciation of research as a viable process of addressing contemporary challenges and issues in education and their local environments.

BED135: Contemporary Issues in Education
The module exposes students to the most current global trends like Globalisation, Sustainable Development Goals, Gender, Human Rights, and Health pandemics and how these feed into and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN SCIENCE (HBBEDFYSC)

Duration:	5 Years
Credit Load	540
Minimum Credit Load:	480
Maximum Credit Load:	540
Maximum MBKS Credit Load:	480
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare pre-service teachers to teach their science subject of choice up to 'A' Level and another minor science subject up to O' level. The programme also aims to produce highly qualified personnel for educational institutions, government

departments and Non-Governmental Organisations (NGOs) in science disciplines.

2.0 ENTRY REQUIREMENTS

At least five "O" level passes including Biology or Physics or Chemistry, Mathematics, and English. Pass in a science subject must be at least a B.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Biology, Chemistry, Physics.
Specialist Focus: Training teachers in Biology, Chemistry and Physics Education.
Orientation: Teaching, research and innovation in STEM subjects.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Graduates who complete the programme can expect to be employed as teachers, lecturers, education inspectors, training officers, consultants, laboratory technicians in related chemical industries etc.

Further Studies: Master's and Doctoral studies in Biology, Chemistry or Physics Education.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, laboratory classes, seminars, group work, industrial visits, micro-teaching, teaching practice, research project, individual independent study.

Assessment Methods: Written and oral examinations, tests, laboratory reports, seminar presentations, teaching practice reports, teaching practice assessments, mini-research project reports, final year research project reports, and continuous assessments.

6.0 LEARNING OUTCOMES

- Use innovative technology-enhanced teaching strategies to implement the science curriculum.
- Apply sound research and technological techniques when carrying out research in science education.
- Monitor, assess and evaluate learners, learning processes, projects and programmes related to science education.
- Analyse and exploit entrepreneurial opportunities to promote innovation and industrialisation.
- Adapt to educational changes in their environments to promote innovation and industrialisation.
- Apply soft skills such as Ubuntu and critical thinking in both their professional and personal interactions.
- Manage both personal and institutional finances.

7.0 GENERAL PROVISIONS

7.1 ●For the Bachelor of Education Hons Degree programme, candidates shall study at least 43 modules.

7.2 ● Each module is worth 12 credits except for the project which is worth 24 credits and Work-Related Learning worth 120 credits.

7.3 ● In each semester, a student shall register for at least 5 modules.

7.4 ● All students shall undertake Work-Related Learning (Teaching Practice) over 2 semesters.

8.0 PROGRAMME ASSESSMENT

Refer to Section 4 of the Faculty Regulations

Coursework: A coursework mark is determined using the assessment (during the course of an academic semester) of a student's performance in a module through various methods like tests, practical activities, and assignments or as clarified in a course outline. For each module, the final mark shall be determined by a combination of continuous assessment and examination marks. Continuous assessment shall normally constitute 40% of the final mark.

Written Examinations: The written examination constitutes 60% of the final mark.

A student who does not satisfy all coursework requirements shall not be eligible to sit for the examinations.

9.0 PROVISION FOR PROGRESSION

To proceed from one level to another a student should pass at least 75% of the modules in the level.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

MODULE SYNOPSES

AEBI134: Introduction to Cell Biology and Inherited Change
The module focuses on the physio-biochemical aspects of living organisms at the sub-cellular and cellular levels.

AECH136: Introduction to Physical-Inorganic Chemistry
The module seeks to provide the student with knowledge of atomic structure, bonding, and chemical and ionic equilibria. Students are expected to study aspects of selected ranges of elements and their compounds based on a study of patterns across periods and groups. The module also introduces the more important everyday aspects of nitrogen and sulphur and their compounds.

AEPH139: Introduction to General Physics, Mechanics and Waves
The module introduces students to the nature of physical measurements and techniques for measurement, laws of motion, properties and types of waves, and laws of reflection and refraction.

AEBI130: Introduction to Cellular Energetics and Regulatory Systems
The module exposes students to the basic anatomy and eco-physiology of multicellular plants and animals in relation to transport, gaseous exchange, energy transfer processes as well as regulation and control.

AECH331: Introduction to Organic Chemistry
The module provides a basic introductory framework that includes organic formulae, hydrocarbons, functional groups and their reactions, shapes of organic molecules and isomerism. It also focuses on organic compounds necessary for the maintenance of life in living organisms.

AEPH336: Introduction to Electricity and Magnetism
The module explores the concept of charge, conductors and insulators, and the electric and magnetic fields. It also covers aspects of electromagnetic induction, AC and DC currents as well as analogue and digital electronics.

AEBI133: Introduction to Ecology
The modules seek to examine levels of biological organisation: individuals, populations, communities, ecosystems, and the biosphere. It discusses concepts of habitat and niche; population growth and regulation life history strategies; inter- and intra-specific competition; predator-prey interactions, Biomes of the world, concentrating on tropical rain forests, savanna ecosystems, grasslands and arid lands, Biomass and productivity; utilisation by man.

AEM101: Calculus
The module exposes students to number systems: natural, integral, rational and irrational, the principle of mathematical induction, the real number system: Functions: the mean value theorems applications to maxima and minima, curve sketching, approximations and Newton's Method, functions of several variables (limits, continuity), Tailor's theorem, applications of maxima and minima, lagrange multipliers, multiple and triple integrals:

AECS131: Introduction to Computers and Computer Applications
This module introduces students to basic computer concepts. Topics covered include data processing cycle, number systems, computer arithmetic, types of computers, computer peripherals, types of computer software including systems software, application software and utility software, basics of computer network and data communication.

AEBI132: Diversity of Life 1
The module focuses on taxonomy and phylogeny the goals of classification; the stages of classification; phonetics and cladistics. It examines taxonomic keys and phylogenetic trees, diversity in the kingdom Monera, Protista, Fungi, Plantae and Animalia.

AEBI136: Diversity of Life 2
The module focuses on the kingdoms Plantae and Animalia. It explores the plant families of ecological and economic importance in the flora Zambesiaca, seeds, fruits and their dispersal, and adaptations of plants to pollinating agents. The module outlines the grades of organisation and the evolution of the two main lines of animals drawing examples from economically important classes/orders.

AECH131: Physical Chemistry I
The module explores the fundamental principles of chemical thermodynamics and its application to common chemical situations. In addition, the 1st and 2nd laws of thermodynamics are addressed, including topics such as thermochemistry, electrochemistry, chemical equilibrium and reaction kinetics. The laboratory practicals also form an integral part of the module.

AECH134: Analytical Chemistry I
The emphasis of this module is on the theory and applications of classical analytical techniques as well as the evaluation of experimental results. Topics including chemical equations and stoichiometry, introduction to statistical treatment of analytical data; theory and application of gravimetric and titrimetric methods of analysis are covered by the module. The module includes laboratory practicals.

AECH132: Inorganic Chemistry I
This module is an introduction to the fundamentals of atomic structure and chemical bonding. Simple Bonding Theories (Lewis structures, VSEPR theory, valence bond theory) Molecular Orbital Theory (sigma and pi bonding polyatomic MO diagrams). The module covers the chemical periodicity of period 2 and 3 elements, the chemistry of groups II, IV, VII as well as the chemistry of nitrogen and sulphur. Laboratory practicals are based on qualitative analysis.

AEPY135: Waves and Optics

The module focuses on the description of wave motion, the general equation of wave motion, elastic waves in a solid rod and in a spring, pressure waves in a gas column, transverse waves in a string, transverse elastic waves in a bar, waves in 2-dimensions: wave fronts, reflection of waves, refraction of waves, surface waves in a liquid, reflection and transmission of transverse waves at the interface, group velocity, sound waves: pressure waves, Fermat's principle and its applications, aplanatic points and aplanatic surfaces.

AEBI131: Principles of Ecology
The modules seek to examine levels of biological organisation: individuals, populations, communities, ecosystems, and the biosphere. It discusses concepts of habitat and niche; population growth and regulation life history strategies; inter- and intra-specific competition; predator-prey interactions, biomes of the world, concentrating on tropical rain forests, savanna ecosystems, grasslands and arid lands, Biomass and productivity; utilisation by man.

AEBI135: Cell Biology
The module discusses the structure of eukaryotic cells; the function of organelles, membrane structures transport across membranes; membrane synthesis, protein synthesis; sorting and delivery of the role of lysosomes in recycling cellular components, functional importance of mitochondrial membranes in respiration, the components of the cytoskeleton; cell motility; cell differentiation, unlimited cell growth and cancer cells.

AEBI231: Genetics and Evolution
The module explores genetics: mitosis and meiosis; mendelian genetics and the chromosome theory of heredity; mutation and variation; introduction to population genetics, evolution: population genetics and variation; the concept of, and evidence for evolution; theory of evolution by natural selection; adaptation and adaptive radiation; the nature of species; specific mate recognition systems; isolating mechanisms and speciation.

AEBI232: Animal Anatomy and Physiology
The module explores the introduction to animal physiology homeostatic, respiration in water and air, in fish, birds, mammals and insects; gas transport and properties of blood; circulatory patterns; locomotion in water and buoyancy; digestion, especially in herbivores; information and control (nervous and endocrine), including excitable cells; nervous system and control of effectors; and hormonal control.

AEPY232: Electricity and Magnetism
The module covers current and charge, Gauss's law and applications, dielectrics, magnetic field and forces. Force on a current-carrying conductor and magnetic field; the magnetizing field, magnetic susceptibility and permeability, Ohm's law, transformers, capacitors, electrostatics, Cathode Ray Oscilloscope, the CRO as a voltmeter, a clock, and a display device.

AECH133: Organic Chemistry I
The module is an introductory course to organic chemistry, focusing primarily on the basic principles to understand the structure and reactivity of organic molecules. It includes extensive treatment of hydrocarbons, halogen derivatives, hydroxyl compounds, carbonyl compounds, carboxylic acids and derivatives, nitrogen compounds as well as polymerisation. The module also provides an introduction to the chemistry of aromatic compounds.

AECH431: Laboratory Techniques
This module is an introduction to the chemistry lab and it demonstrates the principles of chemistry and laboratory techniques. The module offers an opportunity to learn and master the basic chemistry lab techniques for carrying out experiments. The module also accords experience of basic laboratory skills in experimental planning, preparation, execution and documenting experimental results.

AECH432: Environmental Chemistry
This module examines the chemistry of the environment, emphasizing the composition of the natural environment and the processes of natural and anthropogenic chemicals in the environment. It provides a broad overview of many important environmental issues thus providing the chemical basis for understanding the environment and environmental problems.

AEPY231: Modern and Thermal Physics
The module seeks to focus on modern physics: nuclear physics: thermal physics: thermometry, Zeroth law, laws of thermodynamics, heat transfer, entropy, Carnot cycle and heat engines, kinetic theory, ideal gas, kinetic interpretation of temperature and pressure, equipartition of energy, distribution of molecular speeds, Brownian motion, van der Waals equation.

BED321: BED323 & BED324
In the 2 semesters that the students are on work-related learning, they are expected to demonstrate a sound understanding of the basics of their programme of study. The 321 component is the report that the student produces indicating that they

were able to match theory with practice. Component 323 is the assessment by the lecturers. BED 324 is assessed by school supervisors.

AEBI233: Molecular Organization and Genetics
The module serves as an introduction to chemicals of life, and biological molecules including carbohydrates, proteins, lipids, nucleotides and water. It also examines the chemical basis of heredity, the genetic material: DNA, RNA and their structure, organisation of DNA into chromosomes, gene expression, the Central Dogma, genetic code, transcription, translation, gene structure and function.

AEBI234: Biotechnology
The module examines the methods in biotechnology ethical issues and legislation. It also focuses on viral elimination by meristeming, frost prevention, Bt genes, antisense technology, breeding for resistance/tolerance, gene therapy, bacteriology, microbiology sterilisation and axenic culture, bacterial genetics, the nature and replication of the bacterial genome, mutation, transformation, transduction and conjugation.

AEBI431: Plant Morphology and Physiology
The module considers the integrated structure and function of higher plants, basic plant anatomy and architecture/morphology, tissues of the higher plant body and their functions, tissue organisation, reproductive structures, general adaptations of anatomy and morphology, ecophysiology of photosynthesis and respiration, macronutrients and micronutrients, mechanisms and control of transport processes as well as plant hormones.

AEBI432: Human Health and Immunology
The module focuses on health and immunology; types of immunity, cytotoxic T lymphocytes, cytokines; primary and secondary responses; antigens and antigen processing; antibodies, antigen interactions, non-covalent interactions, affinity, avidity, specificity; antigen reactions, theory of vaccination; basis of cellular immunity - clonal selection theory of McFarlane Burnet; immune tolerance; monoclonal vs polyclonal antibodies; HIV and AIDS.

AEBI433: Biomathematics
The module focuses on statistics. Variability and error; precision and accuracy, populations and samples; descriptive statistics, graphical presentation of data, measures of the centre, measures of dispersion, estimation and hypothesis testing, the normal distribution, inferences about the mean, standard error of the sample mean, testing hypotheses about the mean, t-tests, confidence intervals, comparing two samples, contingency tables; Chi-squared tests for two-way tables, Mann Whitney U-test, relative merits of parametric and non-parametric procedures.

AEBI434: Biological Methods and Techniques
The module examines laboratory safety practices and procedures; preparation of solutions and standards in laboratories; absorbency spectroscopy, principles, techniques and biological applications; electrophoresis, types, principles and applications of each type; centrifugation, basis, types and applications; and chromatography. It also gives an introduction to biosensors.

AECH231: Physical Chemistry II
This module explores the fundamental principles of quantum mechanics and its application in modern chemistry as well as the interaction between matter and electromagnetic waves. The module covers fundamental and applied aspects of phase equilibria, surface chemical processes; theories of molecular adsorption/desorption, physical adsorption, chemisorption, adsorption isotherms and practical physical chemistry.

AECH232: Inorganic Chemistry II
The module introduces the fundamental concepts of transition metal chemistry and coordination chemistry. It also focuses on the study of electronic structures and bonding in a transition metal, electronic spectra of transition metal complexes, magnetic properties of transition metal complexes, organometallic chemistry and bioinorganic chemistry.

AECH233: Organic Chemistry II
The module introduces the key concepts of organic chemistry through a survey of the basic synthetic methods and reaction mechanisms. It also considers the application of spectroscopic techniques for the determination of molecular structure.

AECH234: Analytical Chemistry II
This module introduces the important methods of quantitative instrumental analysis within the general rubric of separation and measurement. It covers fundamentals of modern analytical instrumentation, background theory and principles of operation. Topics covered include spectroscopic methods; mass spectrometry; separation methods; and electro-analytical methods. Practical experience is gained through the operation of chemical instruments in the lab.

AECH433: Nano Chemistry
The module provides the basic concept of Nanochemistry and changes in chemical and physical properties due to size reduction. It offers a comprehensive overview of the synthesis, characterization, fictionalization, and application of nanomaterials. Emphasis is placed on understanding the design and properties of hierarchical nanostructures that are utilized in advanced engineering applications.

AECH434: Biochemistry
The module is an introductory study to the major molecules of biochemistry-amino acids, proteins, enzymes, nucleic acids, lipids, and saccharides- their structure, chemistry, biological function, and biosynthesis. The module provides an introduction to metabolic pathways and bioenergetics, including glycolysis, fermentation and respiration, oxidation of fatty acids, and photosynthesis.

AECH139: Industrial Chemistry
The module provides knowledge of the various industrial chemical processes and their industries; cement, pulp and paper, soap and detergent, fermentation, sulphur and nitrogen industries etc. The module introduces the actual operations in chemical industries and provides knowledge of raw materials sourcing and processing, intermediates and conversion of chemical materials to final products. It imparts concepts such as optimisation, mass balance and energy balance.

AEM402: Mechanics
The module covers kinematics, projectiles, vectors, Newton's Laws, forces, momentum, gravity, work, energy, power, conservative and dissipative forces, impulse and moments, circular motion, motion of planets and satellites – geostationary orbits, relative velocity, uniform relative translational motion, orbits, oscillations, elastic forces and resonance, equivalent systems of forces, system of particles, and elementary theory of rigid bodies, equations of motion, elastic and inelastic collision (1D & 2D), and hydrostatics.

AEPY233: Electric Circuits
The module covers circuit theory: Kirchhoff's law, loop theorem, currents in multi-loop circuits, junction theorem, Thevenin Theorem, Norton Theorem, Maximum power theorem, AC circuit theory: impedance, reactance, phase diagrams, use of complex numbers in circuit theory, resonance, power factor, half power points, AC bridges, resistance, capacitance and inductance measurements, transformer, and three phase power systems.

AEPY234: Electromagnetism
The module covers vector calculus, Maxwell's equations, Fresnel's Equations, Brewster's law, Antennas, transmission lines ideal or lossless, coaxial cables, characteristics impedance, reflections and short-circuited, the diffusion equation, energy absorption, Gauss's law in integral and differential form as well as waveguides.

AEPY431: Electronics
The module focuses on the following areas: switching algebra, logic devices, combinational logic devices and data flow model – analysis and synthesis, data processing devices, data routing devices, sequential logic devices and FSM model mixed logic circuits, modular design of devices RTL architecture, analogue electronic devices and their models, analogue systems and their models.

AEPY432: Solid State Physics
In the module students will be exposed to atomic structure and atomic bonding, amorphous and crystalline compounds, crystal structure, waves in crystals, defects and disorders in crystals, dislocations in crystals, heat capacities, electrical and thermal conductivity of solids, the Wiedermann-Franz Law, free election theory, band theory, density of states, conductors, semiconductors, insulators, intrinsic and extrinsic semiconductors, electronic properties and processes of semiconductors: drift, diffusion recombination, the p-n junction and its characteristics, the diode law, semiconductor devices: characteristics and circuit configurations - capacitors, resistors, diodes, transistors and thyristors and Integrated circuits

AEPY433: Quantum Physics
The module seeks to cover linear operators and observables, Hermitian operators, Spin Operator, normalization, commutation relations, de Broglies hypothesis, Linear Harmonic Oscillators, matrix mechanics, angular momentum, addition of angular momentum, vectors, WKB method , variational method, pertubation theory, both time-dependent and time-independent, born approximation, hydrogen atom, various formulation of QM, probability density, Stern-Gerlach experiment, potential barrier and tunnelling problem, central force, and Pauli Exclusion Principle.

AEPY434: Electronic Communication
The module covers data and signals, analogue signal characterization (amplitude, frequency, phase), digital signals: fourier series, fourier transform, transmission: digital transmission, analogue transmission, transmission modes: serial, parallel, synchronous, asynchronous, and isochronous, transmission media: guided media (twisted pair, coaxial, fibre optic), unguided media- wireless, modulation:: DAC, ASK, FSK, PSK QAM; analogue data to analogue signal coding:: FDM,

TDM, WDM, spread spectrum: FHSS, DSSS, switching: circuit switching, packet switching, frame relay, routing: interior routing and exterior routing.

REGULATIONS FOR THE BACHELOR OF EDUCATION HONOURS DEGREE IN TEXTILE TECHNOLOGY AND DESIGN (EDU09)

Duration	2 years
Actual Credit Load	276
Minimum Credit Load	240
Maximum Credit Load	300
Maximum MBKS Load	192
ZNQF LEVEL:	8

1.0 PURPOSE OF THE PROGRAMME

To prepare in-service teachers to teach Textile Technology and Design subjects up to 'A' level. To produce highly qualified personnel for educational institutions, government departments and non-governmental organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry:

A teaching diploma with specialisation in Textiles Technology and Design.
Normally be employed as a full-time teacher in an approved school or college or doing appropriate educational work throughout the duration of the programme.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Textile Technology and Design

Specialist Focus:

Training teachers in Textile Technology and Design

Orientation:

Teaching and learning that enhance creativity and problem-solving techniques to address social and economic challenges.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, and consultants.

Further Studies:

Master's and doctoral studies in Textile Technology and Design

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods

Seminars, tutorials. group work, virtual and online teaching, research project, entrepreneurship training, creative thinking activities, problem-solving, individual independent study, field trips, and entrepreneurship training.

6.0 LEARNING OUTCOMES

- Use appropriate research methods to develop new insights into contemporary teaching and learning in Textiles Technology and Design.
- Identify and solve problems in the teaching and learning of Textiles Technology and Design.
- Apply sound research and technological techniques when carrying out research in Textile Technology and Design Education.
- Monitor, assess and evaluate learners, learning processes, tasks and projects related to Textile Technology and Design education.
- Analyze and exploit entrepreneurial opportunities to promote innovation and industrialization.
- Adapt to social and educational changes in their environments to promote innovation and industrialization.
- Apply soft skills such as Ubuntu and critical thinking in both professional and personal interactions.

- Manifestation of patriotism
- Self-management skills
- Exhibit communication and teamwork skills
- Leadership skills
- Planning and organizational skills

7.0 GENERAL PROVISIONS

- For this Bachelor of Education Degree programme, candidates shall study at least 24 modules.
- Each module is worth 12 credits except for the project which is worth 24 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations.

Provision for Progression

Refer to Section 5 of the Faculty Regulations.

9.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations.

10.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations.

11.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations.

12.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits

Module Synopses

BCHS131: Cultural and Heritage Studies
The module examines the concepts of culture and heritage as they relate to unhuism/ubuntuism, innovation and industrialisation. Emphasis is placed on the values of social, historical, architectural, scientific and cultural heritage that can be capitalised for socio-economic development. Exploration of landscapes that contain cultural heritage associated with knowledge, songs, stories, art objects and human remains.

BED133: Information Communication Technology in Education
This module employs a hands-on approach to equip students with the knowledge, skills, and attitudes necessary for the innovative use of information communication technology to enhance classroom teaching and learning. Topics covered include the role of ICT in education, software application in education, multimedia learning, the Internet of things and emerging technologies and their application in classroom teaching.

BED144: Schools Curriculum Competencies and Innovation
The module introduces students to the schools' curriculum and basic theories of curriculum development. It explores the philosophy of the Zimbabwean competence-based curriculum and its implications for teaching. The specific competencies in the curriculum are analysed in relation to how they empower students with life-long competencies that prepare students for sustainable livelihoods inside and outside formal employment. Such competencies include but are not limited to creativity, innovation, industrialization, and entrepreneurship.

SETT101: Creative Art and Wardrobe Management
The module aims to develop an understanding of the holistic nature of the design process and introduce the principles of designing for Fashion. It introduces the student to the basic principles of research and design development for fashion through creative garment drawing and investigates fundamental design development for different figure types, occasions and selection and management ideas.

SETT102: Organic Chemistry for Textiles Technology development
The module aims to provide students with an understanding of the fundamental concepts of chemistry; atomic structure, periodic table of elements as well as chemical bonding. It introduces the student to fundamental principles of organic chemistry and a knowledge of the most important functional groups and their reactions that are essential in the textile industry.

SETT103: Industrial Construction Technology
The module aims at creating learners' interest in constructing textile items in line with changing trends in the apparel industry. It focuses on the selection and application of appropriate components and trims, and basic sewing garment construction techniques. The module also involves the utilisation of specialized industrial garment construction equipment.

SETT104: Applied Pattern Development and Alterations
The module aims to provide students with an understanding of pattern creation and alteration in relation to garment and fabric types. Students have an opportunity to develop a variety of patterns in relation to size charts, select patterns in relation to fabrics, movement and comfort, as well as demonstrate technological and creative skills in designing styles for different age groups, drafting, making and altering patterns for different functions and figure types.

BED131: Research Methods and Statistics
The module introduces students to the basic principles of research. It develops the students' knowledge and skills in the following areas: identification of research problems in education; selection of appropriate research designs and data collection tools; data analysis techniques; research findings and conclusions; and research report writing. The module also introduces students to educational research that is aligned with sustainable development issues such as environmental conservation and poverty eradication.

BED231: Assessment and Evaluation Techniques
The module covers assessment and evaluation issues in education across all subject areas. The content of the module includes an analysis of the concepts of evaluation, assessment and measurement in education; contemporary ideas on how to improve assessment and evaluation in schools; test designing; analysis of test results; national examinations and grading.

SETT105: Innovative Children's Pattern Development

The module provides hands-on experiences in pattern creation and adaptation in relation to children's wear. Students develop patterns in relation to size charts and consider patterns in relation to fabrics, movement and comfort. It also focuses on the selection and application of appropriate components and trims, basic sewing and construction techniques in the construction of fashionable products.

SETT106: Fibre Processing Technology and Management
This module aims to introduce fibre theory and fibre classification systems. It provides a general overview of textile industry materials such as fibres, yarns and fabrics in relation to fibre properties, processing, use and care.

SETT107: Industrial Garment Production and Management Techniques
The module seeks to develop knowledge and skills in the development of garments from conceptualizing the design through to the production of the garment. Concepts include basic market research, research analysis, development of design ideas, pattern development, user-friendly techniques, preparation of relevant production process documentation and total project evaluation Specialized industrial equipment and ICTs are used. Uses software such as C.A.D

EDGS231: Gender Studies for Educators
The module exposes students to the concept of gender and its significance to education. It also exposes students to how education spaces construct gender differences and the implications of these differences on learners and staff, and how schools can close the gender gap by studying theoretical perspectives on gender, cultural dimensions and their implications to education. It also exposes students to different empowerment frameworks and legislation.

BEFM231: School Administration and Financial Management in Education
The module introduces students to sound administration and financial management practices followed in schools and other educational institutions. It tackles the basic tenets of the nature and purpose of administration and familiarizes students with skills in budgeting and budgetary control. Students are further introduced to the accounting systems in schools and the interpretation of policies and statutes that govern financial and asset management in educational institutions.

EFS131 & EFPS131 & EFPH131: Applied Educational Foundations
This module enhances students with basic philosophical, psychological and sociological theories that are central to the learning and development of children from diverse backgrounds. The module also interrogates the interconnection between educational foundations and innovation, thereby further equipping students with vibrant critical thinking skills to awaken the creative capabilities inherent in them.

BEIE501: Entrepreneurship in Textile Technology and Design Business
This module facilitates the application of their clothing and design, and managerial skills in establishing a clothing enterprise which they can run profitably. The module draws from, and links with other modules in Textiles Technology and Design in which entrepreneurship ideas and skills are infused into documented productive enterprises.

SETT201: Creative Interior Decoration and Crafts
The module seeks to advance students' knowledge of interior decoration skills and crafts through the construction of soft furnishings and extend this knowledge to their application and usage in interiors. Attention is paid to colour combinations and artistic effects. The use of locally available materials and waste management for sustainability are inculcated for local use and industrialisation of skills

BED135: Contemporary Issues in Education
The module exposes students to the most current global trends like globalisation, Millennium Development Goals, gender, human rights, and health pandemics and how they feed into Agenda 2030 and also how they affect the Zimbabwean Education system. The thrust is to leverage current trends in promoting innovation, industrialisation and modernisation through Education 5.0.

BED232: Research Project
In this final year, two-semester module each student carries out a research project in an area of his/her choice under the guidance of a supervisor. Through the study, students are expected to apply their knowledge and skills in research in the resolution of an identified research problem, as well as show their appreciation of research as a viable process of addressing contemporary challenges and issues in education and in their local environments.

BED136: Educational Management

The module introduces students to the basics of education management that speak to issues of sustainable development, innovation and industrialisation through effective and efficient management of school organisations. Students are familiarized with basic theories of educational management and the foundational building blocks of educational management namely, planning, organising, controlling, commanding and coordinating.

SETT202: Methods of Teaching Textiles and Textile Technology

Emphasis shall be on professional development which is diverse and involves a complex range of activities calling on the exercise of new and appropriate teaching methods, skills and organizational settings. It shall also develop knowledge and skills in the designing of reliable and valid tests, assignments and programmes.

SETT203: Clothing Retailing and Marketing Strategies

The module seeks to develop a full understanding of the merchandising and buying function of the apparel retail businesses and a thorough understanding of the role and contemporary issues facing merchandisers and buyers. It highlights the key principles and approaches beneficial for problem-solving in a merchandising context.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN AGRICULTURE AND APPLIED ENVIRONMENTAL SCIENCE (EDU75)

Duration	$1^{1}/_{2}$Years
Actual Credit Load	324
Minimum Credit Load	270
Maximum Credit Load	330
Total MBKS Load	234
ZNQF Level;	9

1.0 PURPOSE OF THE PROGRAMME

- To increase the students' knowledge base in the area of agriculture education and equip practitioners with requisite practical, theoretical and creative skills.

- To prepare professionals who can teach Agriculture to the undergraduate level and produce highly qualified personnel for educational institutions, government departments and non-governmental organisations (NGOs).

2.0 ENTRY REQUIREMENTS

Normal Entry**:**

To be eligible for the programme, an applicant must normally have:

- a B.Ed degree in agriculture or approved equivalent from any recognised university in the appropriate subject area.
- a BSc degree in agriculture and a Post-Graduate Diploma in Education or approved equivalent from any recognised university.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Agriculture and Environmental Science Education

Specialist Focus:

Agriculture and Environmental Science

Orientation:

- Agriculture and Environmental science education which promotes creativity and problem-solving techniques to address agrarian and socio-economic challenges.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

- Graduates can be employed as teachers, lecturers, education inspectors, training officers in multiple agricultural disciplines, consultants/policy developers in environmental change research.

Further Studies:

Further education in PhD in area of specialization, Agriculture, Agricultural Economics, Wildlife and Environmental Management, Fisheries, Indigenous Agricultural Practices, Agricultural Climatology, Environmental Management & Agriculture and Applied Environmental Science.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, seminars presentations, practical assignments, field trips, group work, virtual and Online teaching, demonstrations, entrepreneurship training, laboratory-based experiments, research projects, problem-solving, individual independent study, creative thinking activities,

6.0 LEARNING OUTCOMES

- Use appropriate research methods to develop new insights into contemporary teaching and learning of agriculture and environmental practices.
- Identify and solve problems in the teaching and learning of agriculture.
- Apply sound research and technological techniques when carrying out research in Agriculture and Applied Science education.
- Design, implement, monitor, assess and evaluate policy, curricula, tasks and projects related to Agriculture and Applied Science education.
- Select and apply relevant scientific tools to analyze options for climate change adaptation in agriculture.
- Critically reflect on the environmental impacts on crop production and their mitigation.
- Ability to apply the knowledge and skills of farming and cropping systems and their interactions in an analysis of real-life system limitations.
- Evaluate cropping and livestock systems by using the acquired overview of the complexity of biological, chemical and physical factors affecting production.
- Compare global, regional and local land use governance policies.
- Reflect on the future perspectives for sustainable land use.
- Apply soft skills such as Ubuntu/Unhu and critical thinking in both professional and personal interactions.
- Manifestation of patriotism
- Self-management skills
- Exhibit communication and teamwork skills
- Leadership skills

7.0 GENERAL PROVISIONS

- A candidate shall study at least 12 modules comprising 5 common modules and 7 core modules from their teaching subject areas.
- Each module is worth 18 credits except for the project which is worth 90 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations

MODULE SYNOPSES

MICT732: Advanced Information Communication Technology in Education
This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational agricultural research, among others.

MED741: Advanced Research Methods and Statistics
The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSEAG701: Climate Change and Land Use
The module explores specific issues relating to climate and how different land use systems can be managed to adapt to current and long-term climate change. This is considered together with an analysis of the potential for reducing GHG emissions in agriculture and forestry by carbon sequestration, fossil fuel substitution, circular production and food system transition. Global demand for arable land, drivers of land use change and land use governance are discussed in relation to climate change, food security and environmental sustainability.

MSEAG702: Sustainable Crop Production
The module is designed to enable students to understand and analyse modern cropping systems for purposes of increasing yields and resource efficiency in production. Students shall get to understand the main agronomic constraints for increasing crop production, the methods used to develop crops, crop management and cropping systems in order to increase crop yields and close the yield gap. Students shall also analyse complex, real-life problems within crop production. Aspects of mechanization must come out clearly.

MSEAG703: Land Reform and Agribusiness
The module looks at how land reform programmes were executed in different countries leading to gender, class and race empowerment/ disempowerment. It also focuses on land management in the agricultural sector. Students shall gain an insight into the relationship between land ownership, and the production and marketing side of the supply chain and also develop knowledge of the relationship between the suppliers, producers and consumers.

MED743: Gender Discourse in Agriculture Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Agriculture Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development. It's very critical to link Gender studies to Agriculture where the majority (>70%) of farmers are women.

MSEAG704: Sustainable Animal Production
The module covers developments of scientific and technical knowledge in various areas of animal production by focusing on executing and implementing modern technologies associated with animal production, defining avenues leading to the best solutions to problems that the sector faces such as the epidemic surveillance in animal production and traceability of animal products. The importance of sustainability of animal production and respect for the environment and practical problem-solving capacity in the sector are considered.

MSEAG705: Food and Nutrition Security
The module addresses the role of agriculture towards the provision of adequate and nutritious food to consumers and how to achieve the desired individual, national and global nutrition impact. The dietary gap and policies to stimulate the agricultural production of nutritious foods are discussed.

MSEAG706: Water Management and Governance
The module provides knowledge, skills and competencies to help comprehensively analyze, critically reflect and effectively contribute to solving contemporary water problems. The question of how to balance objectives of social equity with those of ecological integrity and productivity is at the heart of societal efforts to deal and live with water. Institutional and policy aspects shall also be considered through an analysis of water policy in Zimbabwe and elsewhere.

FMED732 Financial Management in Educational Institutions
This module must just be on the Management of Educational Institutions, it should cover both financial and human/material resources. The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MSEAG707: Agroecology
The module focuses on the knowledge and skills related to the management of ecosystems, the impact of agricultural production on the environment etc. Initiatives on how Zimbabwean farmers practice agroecology to overcome the challenges of climate change are explored. Case studies such as the agroecological training on bio-fertilizers in Togo, the Shashe Agroecological School in Zimbabwe and Bio gardening innovations in Kenya are critiqued as viable techniques in ensuring thcreation of food security in the developing world.

MSEAG708: Trends in Agriculture Education
The module explores cross-cutting themes in the area of agriculture science and education in Zimbabwe, SADC and the world over. The production and use of GMOs and their ethical use in nutritional security are explored, and so is their threat to biodiversity and the future of agricultural research. The place of Indigenous Knowledge Systems, smart agricultural practices, e.g. Pfumvudza, mechanization and formal and informal agricultural education (agricultural extension), webinars and other online programmes.

MED744: Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Master's Level.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN BIOLOGY AND APPLIED TECHNOLOGIES (EDU73)

Duration: $1^1/_2$ years

Actual Credit Load	288
Minimum Credit Load:	270
Maximum Credit Load:	330
Total MBKS Credit Load:	234
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

To prepare highly specialised personnel for higher education, government departments and non-governmental organisations who have research and innovation skills.

2.0 ENTRY REQUIREMENTS

Normal Entry**:**

Normal Entry: BSc Education, Bachelor of Education Degree, or BSc with Post Graduate Diploma in Education, Graduate Diploma in Education, Grad CE, PGDTE or equivalent from accredited and recognized institutions.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Biology Education

Specialist Focus:

Biology teaching, learning and research

Orientation:

Pedagogical issues, research, innovation, problem solving, industrialisation

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants and researchers

Further Studies:

Doctoral studies in Biology Education

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, farm-based activities, industrial visits, micro-teaching, teaching practice, research project, individual independent study, virtual and online learning Google class, simulations: PhET application for simulations.

6.0 LEARNING OUTCOMES

- apply innovative solutions to promote innovation and industrialisation of the country
- apply advanced educational tools in research, policy development, analysis and evaluation
- employ innovative and technology-enhanced teaching strategies
- apply entrepreneurial and financial management skills in educational and personal projects
- engage in professional and academic interactions guided by the philosophy of unhu/ubuntu
- design, implement, monitor and evaluate innovative curricula and policies to promote innovation and industrialization and manage educational programmes and institutions.

7.0 GENERAL PROVISIONS

- For the Master of Education in Biology Degree programme, candidates shall study at least 12 modules.
- Each module is worth 18 credits except for the project which is worth 90 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations

13.0 PROGRAMME STRUCTURE

MODULE SYNOPSES

MICT 732: Advanced Information Communication Technology in Education

This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics

The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSEBI701: Biodiversity and Climate Change

The module seeks to provide broad, integrated knowledge on key issues in the climate change and sustainable development field. The module covers topics such as sustainable development; the climate system, anthropogenic forcing and climate system response, Threats to the Biodiversity, socioeconomic importance of biodiversity, biodiversity conservation, and mechanisms to reduce the negative impacts of climate change.

MSEBI702: Advanced Biotechnology Applications

The module discusses the process of genetic engineering and its use in Biotechnology, defines biotechnology, the methods and applications of biotechnology and examines the consequences of developments in this area. It covers many aspects of medical biotechnology, agricultural biotechnology, industrial biotechnology and environmental biotechnology, biotechnology research and development, and the wide range of biotechnology applications, ethics and societal issues relevant to controversial applications of biotechnology.

MSEBI703: Curriculum and Pedagogical Issues in Biology
Analysis of the current Biology curricula in Zimbabwe in terms of relevance and consistency with developments in the field of Biology, contemporary issues in Biology pedagogy, and use of ICT in teaching and learning of Biology.

MED743: Gender Discourse in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MSEBI704: Advanced Microbiology
The module examines microbial physiology, microbial evolution, medical microbiology, environmental microbiology, industrial microbiology, aeromicrobiology, and food microbiology. The module is divided into the following sections, Bacteriology, Mycology, Protozoology, Phycology, Parasitology and Virology. Structures, life cycles and economic importance of all the microorganisms. Techniques to study microorganisms, methods of survey, culture, stain, identify, engineer and manipulate aseptic techniques, plating methods and calculation of concentration of microorganisms.

MSEBI705: Advanced Biological Science techniques
This module provides the advanced laboratory techniques required of a Biology graduate. Molecular cloning, polymerase chain reaction, gel electrophoresis, macromolecule blotting and probing, microarrays, allele-specific oligonucleotide, microscopy, practical application, advantages and disadvantages of the techniques and use of techniques in research.

MSEBI706: Social Biology
The module examines processes that underlie social behavior and discusses solutions and approaches to a variety of problems and issues, examining contemporary issues in biology, health, well-being and well-ness.

MSEBI707: Measurement and Evaluation in Biology Education
Introduction to educational testing, measurement and evaluation in Biology Education, types of evaluation, measurement techniques, characteristics of a good test, norm-referenced and criterion-referenced tests, reliability, validity and usability, principles of test construction and administration in Biology Education. Item analysis and test score interpretations.

FMED732 Financial Management in Educational Institutions
The module introduces financial management practices followed in schools and other educational institutions. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MED744: Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Masters Level.

Module Synopses

MICT732: Advanced Information Communication Technology in Education
This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics
The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSECH701: Advanced Physical Chemistry
This module covers advanced aspects of physical chemistry relevant to industry and the environment. Topics to be covered include green chemistry, catalysis, surface chemistry, photochemistry electrochemical methods and computational chemistry.

MSECH702: Advanced Inorganic Chemistry
This module shall cover selected topics in inorganic chemistry at an advanced level, with an emphasis on the recent primary literature. Topics may include aspects of transition metal chemistry; coordination compounds of the transition elements, including the lanthanides and actinides; aspects of organometallic; bioinorganic and solid-state chemistry.

MED743: Gender Discourse in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MSECH703: Advanced Synthetic Organic Chemistry
The module deals with a range of advanced topics in organic chemistry such as free radical chemistry in organic synthesis, solid phase synthesis, and supramolecular chemistry. The module blends a theoretical knowledge of advanced concepts in organic synthesis and spectroscopic analysis with a focus on applying these skills in industry. It provides training, knowledge and a perspective of a broad range of chemical industries reliant upon organic chemistry.

MSECH704: Advanced Chemical Instrumentation and Analytical Techniques
This module enables students to gain an in-depth understanding of concepts and principles of advanced chemical instrumentation applied for a wide variety of advanced chemistry disciplines (such as catalysis, synthetic chemistry, materials & biomaterials chemistry, analytical & bio-analytical sciences, computational chemistry, environmental chemistry and chemical biology). A selection of rapidly evolving instrumental technologies significant to the chemical industry and chemical research shall be presented with specific reference to what is currently state-of-the-art.

MSECH705: Current Trends in Chemistry Education
The module examines trends in emerging chemistry education research.It provides an in-depth examination and analysis of current chemistry education literature and research and its implications for improving the quality of chemistry teaching.

MSECH706: Curriculum and Pedagogical Issues Chemistry Education
This module provides an opportunity for students to engage in discussion and critical analysis of contemporary issues in chemistry education. Students will analyze the current chemistry curricula in Zimbabwe for relevance and consistency with trends in the field of chemistry and explore strategies to build 21st-century competencies in learners.

MSECH707: Measurement, and Evaluation in Chemistry Education
This module introduces basic concepts in educational testing, measurement and evaluation in chemistry education, and the application of measurement and evaluation principles to a range of contemporary assessment issues in chemistry education. Students shall acquire knowledge and dispositions on designing, developing, administering, analyzing and interpreting a variety of assessment measures in chemistry education. Emphasis is on the design and use of educational assessment procedures to improve and support the quality of teaching and learning.

MSECH708: Nanoscience and Nanotechnology
This module shall focus on nanomaterials, chemical synthesis and characterization techniques. Emphasis is on how nanomaterials and nanotechnology can be used to develop new materials and products. Current and future applications of nanostructured materials will be reviewed with respect to their impact in commercial products and technologies. Particular emphasis will be placed on biomedical, environmental, Nano sensing, food and engineering applications.

MSECH709: Sustainable Industrial and Environmental Chemistry
This module aims to provide an overview of industrial and environmental chemistry, with a focus on industries relevant to Zimbabwe's current and future chemical industry. Students shall gain competencies for the development and management of industrial processes for the production of chemicals, with particular attention to aspects related to the improvement of sustainability in the chemical industry. Extra emphasis will be placed on trends in sustainable development.

MED744: Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Masters Level.

FMED732: Financial Management in Educational Institutions
The module introduces financial management practices followed in schools and other educational institutions. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN FOOD TECHNOLOGY AND DESIGN (EDU18)

Duration	$1^{1/2}$Years
Actual Credit Load	288
Minimum Credit Load	270
Maximum Credit Load	330
Total MBKS Load	234
ZNQF Level;	9

1.0 Purpose of the Programme

- To increase the students' knowledge base in the subject area and equip practitioners with requisite practical and theoretical skills.

- To prepare pre-service teachers to teach Food Technology Design up to 'A 'Level and produce highly qualified personnel for educational institutions, government departments and non-governmental organisations (NGOs).

2.0 Entry Requirements

Normal Entry**:**

To be eligible for the programme, an applicant must normally have;

- Obtained a BED degree or approved equivalent from any recognised university in the appropriate subject area.
- Obtained a degree or a Post-Graduate Diploma in Education or approved equivalent from any recognised university.

3.0 Programme Characteristics

Areas of Study:

Food Technology and Design

Specialist Focus:

Training teachers in Food Technology and Design

Orientation:

- Food Technology and Design education which promotes creativity and problem-solving techniques to address social and economic challenges.

4.0 Career Opportunities and Further Education

Employability:

- Graduates can be employed as teachers, lecturers, education inspectors, training officers and counsellors in Nutrition related diseases.

Further Studies:

Further education in PhD in area of specialization, Food Technology and Design.

5.0 Programme Delivery

Teaching and Learning Methods:

Lectures, tutorials, seminars presentations, practical assignments, field trips, group work, virtual and Online teaching, demonstrations, entrepreneurship training, micro-teaching, teaching practice, research projects, problem-solving, individual independent study and creative thinking activities.

6.0 Learning Outcomes

- Use appropriate research methods and technology to develop new insights into contemporary teaching and learning practices in Food Technology and Design.
- Identify and solve problems in the teaching and learning of Food Technology and Design.
- Apply sound research and technological techniques when carrying out research in Food Technology and Design.
- Design, implement, monitor, assess and evaluate food policy, curricular, tasks and projects related to Food Technology and Design.

- Identify, analyse and exploit entrepreneurial opportunities to promote innovation, industrialization and food quality control.
- Initiate and adapt to educational changes in their environments to promote innovation and the use of advanced tools of production for industrialization.
- Develop an awareness of technological changes in the teaching and learning of Food Technology and Design.
- Produce innovative Food Designs using up-to-date technological applications.
- Apply soft skills such as Ubuntu/Unhu and critical thinking in both professional and personal interactions.
- Manifestation of patriotism
- Self-management skills
- Exhibit communication and teamwork skills
- Leadership skills
- Planning and organizational skills

7.0 General Provisions

- A candidate shall study at least 12 modules comprising 5 common modules and 7 core modules from their teaching subject areas.
- Each module is worth 18 credits except for the project which is worth 90 credits.

8.0 Assessment

Refer to Section 4 of the Faculty Regulations

9.0 Provision for progression

Refer to Section 5 of the Faculty Regulations

10.0 Failure to satisfy Examiners

Refer to Section 8 of the Faculty Regulations

11.0 Grading and Degree Classification

Refer to Section 6 of the Faculty Regulations

12.0 Degree Weighting

Refer to Section 7 of the Faculty Regulations

MODULE SYNOPSES

MICT732: Advanced Information Communication Technology in Education
This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics
The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSEFT701: Food Processing Systems Technology

The module investigates various commercial and non-commercial food processing technologies/methodologies and their underlying principles. It covers raw materials used in selected food processing techniques. Food processing techniques should include microbiological, biochemical, nutritional and rapidly changing technological aspects. The principles of processing technologies include; freezing, chilling, canning, extrusion and aseptic. Brewing, fermentation, meat, dairy, vegetables and cereal technologies are also covered.

MSEFT702: Contemporary Issues in Food Technology and Design
The module focuses on the nutritional problems in developing and transitional societies. Dietary, epidemiological, public health, social and biological aspects of nutritional technology in the processing of food, including maternal, and child nutrition and nutrition emergencies are covered. Students are exposed to relevant nutrition and dietetics software that includes ENA for SMART Anthro plus and Nutri Survey. Other aspects covered include prevention, management and treatment of prevalent diseases, nutritional care, support for vulnerable groups and management of drug and food interactions in emerging disease therapy.

MSEFT703: Professional Ethics in Food Technology and Design
As part of ethical development, students are required to complete the professional Ethics module. The module gives exposure to a range of ethical perspectives and includes several self-tests which require one to reflect on one's own ethical behaviour and values in the industry. The Code of Professional Ethics lays down the standards of integrity, professionalism and confidentiality required in food product designing, development and marketing.

MED743: Advanced Gender Studies in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MSEFT704: Advanced Food Product Development Technology and Sustainability
The module focuses on the idea of product; generation, formulation, processing, market positioning, packaging, cost, pricing, safety, legal issues, and experimentation. The procedures involved in developing new and existing products from product concept to product launch are essential. Emphasis shall be on microbial, chemical and physical hazards associated with foods and food processing environment, good manufacturing and sanitization programs, and hazard analysis critical control points (HACCP). Emphasis shall also be on sustainable technologies in food product preparation, packaging and marketing that are not detrimental to the environment.

MSEFT705: Food Policy and Program Planning
The module gives students the opportunity to examine the formulation, analysis and impact of current food policies on a given population (consumers, industry, and government). The study shall put emphasis on food safety during processing, preparation, packaging, marketing and purchasing as well as labelling. The module shall allow students to analyse and review current national (Zimbabwe), regional and international policies and consider their wider implications. The module

shall cover products such as fruits, vegetables, meat and dairy. Genetically modified foods and their impact on policy health and consumers will also be covered.

MSEFT706: Food Safety Technology and Quality Management

The module is designed to provide the student with an appreciation of the value of quality assurance and quality control procedures in the production of food to meet legal, safety and quality requirements. The module shall expose students to risk factors that contribute to food-borne illnesses. An awareness and application of the International Standards Organization (ISO), Hazard Analysis Critical Control Point (HACCP), Quality Control Assurance and Total Quality Management safety management systems should be covered.

MSEFT707: Innovations and Enterprise in Food Technology and Design

This module equips the students with the relevant knowledge of how to set up and successfully operate food-related business/production units within and outside educational institutions. The module shall assist students to understand and be able to apply principles and processes that underpin sustainable innovative food development including engineering and culinary uses of foods. The engineering shall focus on techniques involved in the production, processing, preservation, packaging, labelling, quality management and distribution of food products. It also covers issues such as how to identify the educational needs of communities, factors to consider in deciding to set up businesses, the legal framework and relevant Statutory Instruments, the need for business ethics and regulations, disciplinary procedures, staff recruitment, training and development, budgets and budgetary control and how to market the new business venture.

FEMD 732: Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions

MSEFT708: Curriculum and Pedagogical Issues in Food Technology and Design Education

The module examines the current Food Technology and Design curriculum in Zimbabwe in terms of relevance and consistency with developments in the field of food technology. Contemporary issues in Food Technology and Design pedagogy, e.g., problem-solving; cognitively guided instruction; analysis of learners' thinking; evidence-informed practice; etc. as platforms for instructional decisions and teachers' development of pedagogical content knowledge are also explored.

MSEFT709: Communication Skills in Nutritional Health

This module is designed to provide and improve appropriate (ICT) for nutrition educators since nutrition is an integral part of treatment in the health care system. The module shall expose students to several approaches to nutritional health such as social marketing, social mobilization and development support communication. The module shall explore the rationale for communication in nutritional health. It will also cover motivation which could be influenced by personal beliefs, perceived cost/benefit, and perceived efficacy. The students should also be able to independently research scientific and non-scientific information as well as work and or interact with individuals from diverse cultures.

MSEFT710: Measurement and Evaluation in Food Technology and Design Education

Introduction to educational testing, measurement and evaluation in Food Technology and Design Education, types of evaluation, measurement techniques, characteristics of a good test, norm-referenced and criterion-referenced tests, reliability, validity and usability, principles of test construction and administration in Food Technology and Design Education, item analysis and test score interpretations.

MED744: Dissertation

A dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Masters Level.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN GEOGRAPHY AND ENVIRONMENTAL EDUCATION (EDU17)

Duration:	$1^1/_2$ years
Actual Credit Load	288 credits
Minimum Credit Load:	270 credits
Maximum Credit Load:	330 credits
Total MBKS Credit Load:	234 credits
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

To prepare highly specialised personnel for higher education, government departments and non-governmental organisations who have research and innovation skills.

2.0 ENTRY REQUIREMENTS

Normal Entry**:**
Normal Entry: BSc Education, Bachelor of Education Degree, or BSc with Post Graduate Diploma in Education, Graduate Diploma in Education, Grad CE, PGDTE or equivalent from accredited and recognized institutions.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:
Geography and Environmental Education

Specialist Focus:

Science-based Geographical Enquiry

Orientation:

Pedagogical issues, research and innovation, problem solving

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:
Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, researchers, and environmental officers.

Further Studies:

Doctoral studies in Geography Education and /or Environmental Education

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, laboratory classes, seminars, group work, farm-based activities, industrial visits, micro-teaching, teaching practice, research projects, individual independent study, and virtual and online learning.

6.0 LEARNING OUTCOMES

- apply innovative solutions to promote innovation and industrialisation of the country
- apply advanced educational tools in research, policy development, analysis and evaluation
- employ innovative and technology-enhanced teaching strategies
- apply entrepreneurial and financial management skills in educational and personal projects
- engage in professional and academic interactions guided by the philosophy of *unhu/ubuntu*
- design, implement, monitor and evaluate innovative curricula and policies to promote innovation and

industrialization and manage educational programmes and institutions.

7.0 GENERAL PROVISIONS

- For the Master of Education in Geography Degree programme, candidates shall study at least 12 modules.
- Each module is worth 18 credits except for the project which is worth 90 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

MODULE SYNOPSES

MICT732: Advanced Information Communication Technology in Education

This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include Models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics

The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution

have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSEGE701: Trends in Geography and Environmental Education
The module explores the dialectical development of geographical and environmental thought and the current trends that characterize the discipline and its content up to the 21st century such as Geography in space, place and time. The relevance of Geographical paradigms such as Environmentalism; Spatial Analysis/Positivism; Cultural Geography; and Radical Geography are critiqued.

MSEGE702: Climate Change and Sustainable Development
The module offers students investigative techniques on natural and man-made climate change over time including greenhouse effects, tectonic climate forcing, astronomic (Milankovich) cycles, deep ocean circulation, and biological feedback as central. The focus is on modelling and understanding the impact of our carbon footprints on sustainable living and socio-economic development. Thus, the module focuses on understanding the symbiotic between climate and development, i.e., how climate has an impact on development and how development also impacts climate change. Focus is also on the achievement of MDGs, SDGs, basic tenets of green economies and their implications to Zimbabwe, SADC and the wider world. Contextual problem-solving and multi-disciplinary thinking will be emphasised.

MED743: Gender Discourse in Education
The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

MSEGE703: Curriculum and Pedagogical Issues in Geography and Environmental Education
The module covers such aspects as introduction to curriculum perspectives, quality of Geography education, ways of achieving quality education, evaluation, and citizenship education, notion of development over time, curriculum theory, development and implementation and analysis of the current Geography curriculum in Zimbabwe.

MSEGE704: Aspects of Population Geography
This module examines historical and contemporary issues in the population that are topical and the basis of most socio-economic problems in society. It focuses on how populations have been understood across time and space and the critical geographic approaches that examine trends in the population at different scales (local, state, and global) and other various issues (fertility, mortality, borders and migration, labour etc).

MSEGE705: Environmental Systems and Hazards
The module focuses on both natural and human-induced hazards and their impacts on people and property. Different types of hazards such as geological hazards, atmospherically induced hazards, hydrological hazards, biological hazards, epidemics, and technological hazards are analysed, the impact on society evaluated and solutions proffered.

MSEGE706: Advanced Geographical Techniques
The module offers an advanced study in computer-based techniques for storage, retrieval, analysis and representation of spatially referenced data. Emphasis is placed on the use of GIS technology to solve geographic problems associated with mapping natural and human-induced hazards, and environmental impact assessment, as well as remote sensing techniques.

MSEGE707 Urban Environments and Sustainability
The module provides an in-depth analysis of issues relating to urbanization, urban growth and urban planning, migration, and globalization. Furthermore, the module looks at the macro perspective of examining urban systems and related policy issues as well as the micro perspectives that focus on urban problems associated with the economy, shelter, service delivery, poverty, and local governance.

MSEGE708: Curriculum and Pedagogical Issues in Geography and Environmental Education

The module examines the current geography curriculum in Zimbabwe in terms of relevance and consistency with developments in the field of geography and the environment. Contemporary issues in geography and environmental education pedagogy, e.g., problem-solving; cognitively guided instruction; analysis of learners' thinking; evidence-informed practice; etc. as platforms for instructional decisions and teachers' development of pedagogical content knowledge are also explored.

FMED732: Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions such as the School Services Fund, the General-Purpose Fund and School Development Association Funds.

MED744: Dissertation

A dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Master's Level.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN MATHEMATICS AND APPLIED STATISTICS (EDU33)

Duration:	1½ years
Actual Credit Load	306
Minimum Credit Load:	270
Maximum Credit Load:	330
Total MBKS Credit Load:	234
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

To prepare highly specialised Mathematics Educators for Higher Education, government departments and non-governmental organisations (NGOs) who have research and innovation skills.

2.0 ENTRY REQUIREMENTS

Normal Entry:

BSc Education Mathematics and Statistics, Bachelor of Education Mathematics, or BSc Mathematics and Statistics with Post Graduate Diploma in Education, Graduate Diploma in Education, Grad CE, PGDTE or equivalent from accredited and recognized institutions.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study:

Mathematics Education

Specialist Focus:

Mathematics teaching and learning, research

Orientation:

Pedagogical issues, research and innovation

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability:

Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants, research assistants etc.

Further Studies:

Doctoral studies in Mathematics Education

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, seminars, group work, industrial visits, teaching practice, research projects, individual independent study, virtual and online learning.

6.0 LEARNING OUTCOMES

- apply innovative solutions to promote innovation and industrialisation of the country
- apply advanced educational tools in research, policy development, analysis and evaluation

- employ innovative and technology-enhanced teaching strategies
- apply entrepreneurial and financial management skills in educational and personal projects
- engage in professional and academic interactions guided by the philosophy of *unhu/ ubuntu*
- design, implement, monitor and evaluate innovative curricula and policies to promote innovation and industrialization
- manage educational programmes and institutions.

7.0 GENERAL PROVISIONS

- For the Master of Education in Mathematics Degree programme, candidates shall study at least 13 modules.
- Each module is worth 18 credits except for the project which is worth 90 credits.

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 8 Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 6 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 7 of the Faculty Regulations

13.0 PROGRAMME STRUCTURE

MODULE SYNOPSES

MICT732: Advanced Information Communication Technology in Education

This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics
The module develops postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSEMT701: Mathematics and Education for Sustainable Development
The module explores the role of mathematics in education for sustainable development. Specifically, the module examines how mathematics education can be used as a vehicle for developing 21st-century competencies. It also seeks to develop students' ability to analyse the impact of global issues such as poverty by integrating such issues into the pedagogy of mathematics.

MSEMT702: Foundations for Tertiary Pure Mathematics
The module exposes students to theorems and differentiation of higher order derivatives and Leibniz formula; the mean value theorems: e.g., Rolle's Theorem. Functions of several variables; multiple and triple integrals: e.g., Applications to finding area Series: e.g., uniform convergence.

MSEMT703: Curriculum and Pedagogical Issues in Mathematics Education
The module examines the current mathematics curriculum in Zimbabwe in terms of relevance and consistency with developments in the field of Mathematics. Contemporary issues in mathematics pedagogy, e.g., problem-solving; cognitively guided instruction; analysis of learners' thinking; evidence-informed practice; etc. as platforms for instructional decisions and teachers' development of pedagogical content knowledge are also explored.

MED743: Gender Discourse in Education
The module is meant to afford the students a chance to interrogate and critically analyse gender issues in education as well as proffer intervention strategies in order to bring about gender equity and equality in society through the school system. Areas to be covered include; foundations of gender studies, gender inequality theories, gender analysis, gender issues in education, strategies and approaches for redressing gender imbalances as well as empowerment in education.

MSEMT704: Advanced Ordinary Differential Equations
The module focuses on formulating differential equation models and interpreting them. It enables students to relate and apply differential equations to many other areas such as engineering, dynamical systems, fluid dynamics, finance and biology. It also presents the ideas of the theory of nonlinear differential equations and illustrates them with examples and applications**.**

MSEMT705: Trends in Mathematics Education
The module exposes students to introductory trends in mathematics research, Contemporary research themes in mathematics; the impact of research on teachers' mathematics knowledge domains Effects of research in mathematics education on mathematics content and pedagogy as well as how to analyse research reports

MSEMT706: Advanced Statistical Concepts for Research
Introduction to testing of hypothesis; composite hypothesis, the module helps develop a new sense of appreciation for the power of statistics and the major role it plays in science and technology. The module also aims to develop the statistical confidence, knowledge and expertise of students and provide the solid foundation in statistics necessary for a practicing Mathematics educator and researcher.

MSEMT707: Measurement and Evaluation in Mathematics Education
Introduction to educational testing, measurement and evaluation in mathematics education, Types of evaluation, measurement techniques, Characteristics of a good test, norm-referenced and criterion-referenced tests, reliability, validity and usability, principles of test construction and administration in mathematics education. Item analysis and test score interpretations.

MSEMT 708: Multivariate Analysis
Non-parametric tests: Runs Test, Sign Test, Mann-Whitney Test, Kruskal-Wallis Test, Wilcoxin Test. Properties of Tests; Non-parametric Confidence Interval. Multivariate analysis of variance; Two-Group MANOVA. Application of Statistical software packages like SPSS, Minitab in Parametric and non-parametric tests.

FMED732: Financial Management in Educational Institutions
The module introduces financial management practices followed in schools and other educational institutions. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MED744: Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and in social issues such as poverty, disaster and risk management, environmental conservation, etc. Students are expected to produce and submit a dissertation that meets the standards of research work at the Master's Level.

REGULATIONS FOR THE MASTER OF EDUCATION DEGREE IN TEXTILE TECHNOLOGY AND DESIGN (EDU20)

Duration	$1^{1/2}$Years
Actual Credit Load	288
Minimum Credit Load	270
Maximum Credit Load	330
Total MBKS Load	234
ZNQF Level;	9

1.0 PURPOSE OF THE PROGRAMME
- To increase the students' knowledge base in Textiles Technology and Design and equip practitioners with requisite practical and theoretical skills.

2.0 ENTRY REQUIREMENTS
Normal Entry**:**

To be eligible for the programme, an applicant must normally have;
Obtained a BED degree in Textiles Technology and Design or approved equivalent from any recognised university in the appropriate subject area.

3.0 PROGRAMME CHARACTERISTICS
Areas of Study:
Textiles Technology and Design

Specialist Focus:
Textiles Technology and Design, Business and entrepreneurship

Orientation:
Practical skills, innovations and industrialization which enhance creativity and problem-solving techniques to address social and economic challenges.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION
Employability:
Graduates can be employed as teachers, lecturers, education inspectors, training officers, consultants in Textile Technology and Design,

Further Studies:
Further education in PhD in area of specialization

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, seminars presentations, practical assignments, field trips, group work, virtual and Online teaching, demonstrations, entrepreneurship training, micro-teaching, teaching practice, research projects, problem-solving, individual independent study, and creative thinking activities.

6.0 LEARNING OUTCOMES

- Use appropriate research methods to develop new insights into contemporary teaching and learning practices in Textiles Technology and Design.
- Identify and solve problems in the teaching and learning of Textiles Technology and Design.
- Apply sound research and technological techniques when carrying out research in Textiles Technology and Design.
- Design, implement, monitor, assess and evaluate policy, curricula, tasks and projects related to textile technology and design education.
- Identify, analyse and exploit entrepreneurial opportunities to promote innovation, industrialization and Textiles Technology and Design quality control.
- Initiate and adapt to educational changes in their environments to promote innovation and industrialization.
- Produce innovative Textile Designs using up-to-date technological applications.
- Apply soft skills such as Ubuntu/Unhu and critical thinking in both professional and personal interactions.
- Manifestation of patriotism
- Self-management skills
- Exhibit communication and teamwork skills
- Leadership skills
- Planning and organizational skills

7.0 GENERAL PROVISIONS

- A candidate shall study at least 12 modules comprising 5 common modules and 7 core modules from their teaching subject areas.
- Each module is worth 18 credits except for the project which is worth 90 credits.
-

8.0 ASSESSMENT

Refer to Section 4 of the Faculty Regulations

9.0 PROVISION FOR PROGRESSION

Refer to Section 5 of the Faculty Regulations

MODULE SYNOPSES

MICT732: Advanced Information Communication Technology in Education

This module helps students acquire advanced specialist theoretical and practical knowledge of ICTs in educational environments. The topics covered include models of ICT curriculum integration, educational ICT policy development, current and emerging issues in digital learning, contemporary learning design theories and frameworks, and framing assessment within 21st-century contexts, ICT in educational research, among others.

MED741: Advanced Research Methods and Statistics

The module seeks to develop postgraduate students' knowledge in the following areas of educational research: the different philosophical orientations in research; research paradigms; theoretical and conceptual frameworks; research designs; data collection methodologies; advanced quantitative and qualitative data analysis techniques; as well as discussion of findings and making conclusions. The module also introduces students to significant educational research problems whose resolution have the potential to contribute to knowledge in educational areas such as pedagogy and assessment, as well as in sustainable development issues such as health, poverty eradication, environmental awareness, etc.

MSETT701: Social and Psychological Aspects of Textiles Technology and Design

The module explores the role of clothing in the dynamics of everyday life and provides an analysis of fashion theories and how they relate to clothing decision-making processes. Social psychology of clothing is an interdisciplinary area of study that cuts across anthropological, psychological and sociological aspects of consumer behaviour.

MSETT702: Contemporary Issues in Fashion and Textiles

The module develops students' understanding of contemporary issues in the textile and clothing industry. Students explore issues about sustainability, the forgotten markets and make a critical analysis of the issues/challenges and suggest suitable and practical solutions. The module trains students to think outside the box.

MED743: Gender Discourse in Education

The module explores fundamental perspectives in Gender Studies to address historical gender inequalities in society and Education in particular. It inculcates a critical analysis of the concept of gender, its historical development and ideologies that perpetuate gender differences. The module explores implications for sustainable development goals on gender, education and development. It also explores gender inequalities in STEM as one of the pillars of development.

FMED732: Financial Management in Educational Institutions

The module introduces financial management practices followed in schools and other educational institutions across Faculty disciplines. It considers basic accounting concepts and conventions, including the double entry system of recording business transactions, preparation of general-purpose financial statements, bank reconciliation statements, and skills of budgeting and budgetary control as well as accounting requirements of Treasury Instructions.

MSETT703: Contemporary Clothing Design

This module provides hands-on experiences which are designed to avail students the opportunity to explore contemporary clothing designing skills and practices through the application of knowledge of materials, techniques and processes involved in creating well-constructed garments for different markets from the design brief. It explores the elements and principles of design, the design process and their application in different scenario

MSETT704: Fibre Science Theory

The module focuses on assessing the influence of fibre properties on textile end products. It also deals with textile testing techniques that are used to evaluate the quality and performance of textile products.

MSETT705: Curriculum and Pedagogical Issues in Fashion and Textiles Education
The module is designed to enable students to analyze recent pedagogical developments in Fashion and Textiles Education at all levels. It covers the design, implementation and evaluation of teaching/learning approaches and techniques pertaining to Fashion and Textiles.

MSETT706: Measurement and Evaluation in Fashion and Textiles Education
The module aims to develop students' understanding of key principles of testing, measurement and evaluation. The module also equips the students with knowledge and skills in constructing and employing the essentials of measurement in order to evaluate pupils' achievement.

MSETT707: Applied Clothing Construction Technology
This module seeks to develop students' design and construction skills at a higher level. It consolidates pattern-making and pattern-grading skills using both manual and computerized design systems. Field visits to relevant clothing and textile industries.

MSETT708: Entrepreneurship and Industrialization in Fashion and Textiles
The module provides students with the opportunity to be innovative and explore entrepreneurship in the fashion and textiles industry. Concepts include business proposal writing, policy and legal issues, business ethics in the fashion industry, identification of entrepreneurship opportunities and sources of funding. Students come up with a practical business model using appropriate technology.

MED744: Dissertation
The Dissertation is a research study carried out over two semesters by each postgraduate student under the guidance of a supervisor. Students are expected to apply their knowledge and skills in conducting research on contemporary educational and social issues in their area of specialisation. Students are encouraged to conduct research which has the potential to contribute to knowledge and policies in education, and to environmental, social and economic sustainability issues in fashion and textiles including design and production activities. Students are expected to produce and submit a dissertation that meets the standards of research work at the Master's Level.

FACULTY OF LAW

FACULTY REGULATIONS FOR UNDERGRADUATE AND POSTGRADUATE DEGREES

INTRODUCTION

1.1 These regulations shall be read in conjunction with the General Academic Regulations for diplomas, undergraduate and postgraduate Degrees hereinafter referred to as General Regulations.
1.2 These Regulations are in respect of the Bachelor of Laws degree, Master of Laws in Constitutional and Human Rights Law and Master of Laws in Corporate & Commercial Law & Diploma in Paralegal Studies.

REGULATIONS FOR THE BACHELOR OF LAWS HONOURS DEGREE (LLBS)

Duration	:	5 years
Actual Credit Load	:	576 Credits
Maximum Credit Load	:	600
Minimum MBK/S credit load	:	480
ZNQF Level	:	8

1. PURPOSE OF THE PROGRAMME

1.1 To provide students with a rigorous and robust education in law relevant to the Zimbabwean legal landscape, which provides a broad base of legal knowledge, and which provides a broad choice of modules in a coherent programme and which integrates and synthesises both the theoretical and practical aspects of the study of law, encourages the practical application of law, and which provides the opportunity to place the law in the context of other disciplines in order to provide an integrated understanding of law and its function in society.
1.2 A curriculum which emphasizes critical and analytical skills leading to employment opportunities in the legal profession and in a range of other careers.
1.3 A programme which meets the requirements of the Council for Legal Education on standards of legal education.

2. ENTRY REQUIREMENTS

Normal Entry

To qualify for normal entry into the Bachelor of Laws Honors Degree programme, a candidate must satisfy the minimum requirements as prescribed under the General Regulations and in addition, the candidate must have passed the English Language with at least a B or better at 'O' Level, and must also have obtained a pass in 'A' Level English Literature or History and any two 'A' Level subjects from the Humanities, Social Sciences, Commercials or Sciences.

Special and Mature Entry

Refer to the General Regulations.

.

3. DURATION

The program shall normally be completed over a period of ten semesters on a full- – time basis.

4. GENERAL PROVISIONS

4.1. A candidate is required to register for a minimum of eight modules per year.
4.2. The Work Related Learning level is worth one hundred and twenty (120) credits.

5. ASSESSMENT

5.1. Evaluation of students shall normally be based on continuous assessment as well as formal university examinations that are held at the end of each semester.
5.2. Continuous Assessment will account for 30% of the overall assessment.
5.3. The final examination accounts for 70% of the overall assessment.

5.4. Departments shall determine which items will be included in the continuous assessment and shall define the relevant weighting to each item.
5.5. To be admitted to the examinations, a candidate must; be a registered student of the University in accordance with the General Regulations.
   i. Have satisfactorily attended and completed the approved modules of study. Satisfactory completion of modules shall require submission of written assignments and tests that constitute the continuous assessment.
   ii. Have attended and participated in seminars, tutorials and practical classes, work-related learning placement and other activities as stated by the Regulations.

6. FAILURE TO SATISFY EXAMINERS

Refer to the General Regulations.

7. PROVISIONS FOR PROGRESSION

7.1. A maximum score of 50% will be awarded to a student who fails a module and is allowed to retake/repeat.
7.2. A candidate will not be allowed to progress to a subsequent semester having failed 3 or, more modules from the preceding semester.
7.3. A candidate will not be allowed to progress to the 3rd year carrying a first-year module.
7.4. A candidate will not be allowed to go for Work Related Learning (4th-year level) with a failed core module. A candidate can proceed on Work Related Learning carrying not more than one elective module.
7.5. For more Provisions on Progression refer to the General Academic Regulations.

8. WORK-RELATED LEARNING GENERAL GUIDELINES

8.1. Students proceed on supervised Work Related Learning in their Level 4 of study.
8.2. Once a student is on Work Related Learning with an organization approved by the Faculty, he/she is not allowed to change /move to another organization without the approval of the Faculty.
8.3. A student who moves from an organization without the approval of the Faculty shall be penalized by having 25% deducted from the final Work Related Learning mark that he/she would have obtained.
8.4. Work Related Learning comprises two components, normally placement at Magistrates Courts (public sector) for six months and law firms/private sector for four months.
8.5. Successful completion of the Work-Related Learning component at level 4 is compulsory for all candidates.

9. GRADING AND DEGREE CLASSIFICATION

Refer to the General Regulations**.**

10. DEGREE WEIGHTING

All levels carry an equal weighting of 20%.

PROGRAMME CHARACTERISTICS

Areas of Study:

History of Roman Dutch Law, Interpretation of Statutes, Contract Law, Criminal Law, Constitutional Law, Criminal Procedure, Constitutional Law, Law of Depict, Criminal Procedure, Law of Evidence, Property Law, Commercial Law, Civil Procedure, Family Law, Company and Corporate Law, Public International Law, Public International Law, Gender and the Law, Accounting for Legal Practitioners, Jurisprudence, Law and Corporate Governance, Human Rights Law, Convincing, Labour Law, Advanced Civil Procedure, Clinical and Practical Skills Training, Work Related Learning Report, Academic Supervisor's Report, Employer's Assessment Report, Intellectual Property, Legal Ethics, Notarial Practice, Dissertation, Law of Insurance, Banking Law, Succession and Administration of Estates, Alternative Dispute Resolution, Administrative and Local Government Law, Law of Insolvency, International Humanitarian Law, International Business Transactions, Disability Rights, Child Law, Mining Law, International Criminal Law, Law of Taxation, Energy Law, E-Commerce, International Trade Law, International Economic Law, International Investment Law, Mental Health Law, Medical Law, Professional Negligence Law, Social Security Law, Law and Development, Customary Law, Consumer Law, Criminology, Penology, Conflict of Laws, Environment Law, Democracy & Good Governance, Biotechnology and Law, Media Law, Telecommunications Law,and Cyber Law.

PROGRAMME COMPETENCES

Generic:

- **Multidisciplinary**: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena.
- **Communication skills**: Ability to communicate effectively and to present information orally and in writing and using

ICTs to both expert and non-expert audiences.

- **Analysis and synthesis**: Capacity for analysis and synthesis using logical arguments and proven facts.
- **Ethical commitment:** Professional integrity.
- **Entrepreneurial skills:** Capability to identify and create new business ventures based on knowledge and new thinking paradigms.

PROGRAMME STRUCTURE
Level 1 semester 1
All modules are compulsory

Code	Module Name	Credits
LB131	Introduction to Law	12
CS131	Basics of Communication Skills	12
HCS135	Introduction to Information Technology	12
LB138	Interpretation of Statutes	12

LB557	Aviation Law	12

MODULE SYNOPSES

LB131 Introduction to Law

This course is the gateway to the study of law and introduces students to the theory of law, dealing with topics such as the concept of law, logical thinking and reasoning, justice, morality, research skills and writing, law and freedom, natural law, law, sovereignty and the state, the judicial process, law and custom, conceptual thinking and the law. Legal concepts and new challenging areas in law are explored such as legal problems and procedure, the nature of legal reasoning and law and development. The English Maxims or Principles of Equity shall be explained to students and an assessment of their relevance to our legal system shall be made

CS131-Basics of Communication Skills

Refer to the Department of Communication Skills.

HCS135 - Introduction to Information Technology
Refer to the Department of Information and Marketing Sciences.

LB133 History of Roman-Dutch Law
This course charts the way for students into the nature of the Zimbabwean legal system, history and development of our legal system. It examines the subject from the pre-colonial, colonial and post-colonial perspectives. This enables students to appreciate the dichotomy of legal dualism in Zimbabwe and to suggest solutions to the problem. Thus, the concept of harmonization is explored. The sources of our law are discussed, together with a look at government institutions and their structures, in particular courts and their structures and procedures, legal reasoning and opinions. Roman Dutch Law is identified as the basis of our legal system together with the English Common Law and their impact in Southern Africa. The historical development of Roman-Dutch Law is traced and also its introduction to Zimbabwe. The component of Roman Law is explained by examining it from the historical perspective including its introduction and impact in Europe.

LB105 Law of Contract
Nature and scope of the contract; formation of contract – capacity, offer and acceptance, vitiating factors – mistake; consensus ad idem; void and voidable contracts; duress; caveat subscriptor; contracts in restraint of trade; transfer of contractual rights; breach of contract; remedies for breach of contract.

LB136 Criminal Law
Definition, function and purpose of criminal law; criminal courts; controversy over criminal jurisdiction of customary law courts; the burden of proof; types of crimes; punishment; the essential ingredients of a crime- wrongful act(actus reus) and mental element (mens rea); defenses to criminal charges-affecting the mental element and unlawfulness of the act; assisting the commission of a crime; specific crime; inchoate crimes; types of crimes against the person, property, the State; administration of justice, the dignity of the Head of State; jurisdiction over international crimes; Criminal Law Codification and Reform Act.

LB137 Constitutional Law
Constitutional history and law of Zimbabwe; the Constitution of Zimbabwe; the separation of powers; sovereignty and independence; independence of the judiciary; democracy and the electoral process; the legislature; portfolio committees; the Executive; the Presidency; its authority and powers; the Cabinet; State functions; the judiciary; citizenship and nationality; human rights; the Commissions set up under the Constitution of Zimbabwe; capital punishment and the discrimination between men and women.

LB138 Interpretation of Statutes
The process of statutory interpretation, sources and history of statutory interpretation, common law rules, maxims, presumptions of statutory interpretation, internal aids to statutory interpretation, judicial function in the interpretation of statutes, the statute book and the interpretation of statutes, and interpretation of statutory instruments.

LB139 Family Law
The module deals with the nature and definition of marriage and matters attendant thereto. It goes further to discuss issues to deal with children.

LB109 Law of Delict
Genesis of the Law of Delict; the lex Aquila; the duty of care; fault; negligence; foresee ability and the reasonable person; causation; loss and remoteness of damages; defenses; assessing damages; vicarious liability; particular delicts; suing the state for delicts; the pauperian action; the action injuriarum; defamation; defenses; pleadings; injuries; delictual liability in insurance.

LB201 Criminal Procedure
Introduction; criminal procedure and human rights; pre-trial procedure; other powers of the police; arrest with and without warrant; use of force in effecting an arrest and in search and seizure; written notice; summonses; powers of civilians; warmed and cautioned statements and their confirmation; jurisdiction; other procedures leading to trial; verdict and sentencing; orders for compensation and restitution; review process; appeals; bail pending appeal.

LB202 Law of Evidence
Preliminary issues; the burden and standard of proof; presumptions, competence; compellability; examination; cross-examination; re-examination; similar fact evidence; character evidence; hearsay – the exclusionary rule; the exceptions; confessions and improperly obtained evidence in criminal cases; opinion evidence; judgments as evidence of facts on which

they are based; corroboration and identification; privilege and public policy; criminal law and Evidence Act; legal research skills; fact management: preparation to proof; evidence in Customary Law Courts.

LB203 Law of Property
Introduction; real rights; personal rights corporeal and incorporeal; movables and immovable; acquisition and enjoyment of real rights; co-ownership; sectional title; servitudes; protection of real rights; vindication; spoliations; mortgage; pledge; lien. Aspects of property rights and land reform, and constitutional property law will be given adequate focus.

LB204 Commercial Law
The course deals with mercantile activities and Law; the contract of sale; consensus ad idem; the merx and the passing of ownership and risk; implied warranties; latent and patent defects; remedies; defenses; relief; special sales; auctions, FOB; CIF; FOR; lay-byes; hire purchase; international trade and financing; consumer protection; carriage of goods; aspects of banking and insurance law; law of negotiable instruments and other commercial documents; the law of agency.

LB205 Civil Procedure (Lower Courts)
Jurisdiction in civil actions; summons and service of summons; undefended actions; procedures to be followed by the parties in contested and uncontested actions; exceptions; debt collection procedures; payments into court; applications to strike off; judgments; applications; including interlocutory applications; judgments and their enforcement procedure in customary law courts.

LB207 Corporate and Company Law
Evolution and development of corporate and limited liability; the early 'bubble'; private and public companies; the limited liability company; sham companies; lifting the corporate veil; promoting the company; duties and expenses of promoters; the Memorandum of Association and Articles of Association; capital and shares; reduction of share capital; directors and their duties and liabilities; conduct of corporate meetings and proceedings; judicial management and winding up; insider dealing. Partnerships – definitions; history; types; sharing of partnership profits and loss; assets; other forms of voluntary organizations; dissolution.

LB208 Public International Law
This course deals with the general principles of international law. Specialized areas are dealt with separately in the programme. The divided world; definition; nature; history and development; sources; international and municipal law; subjects of international law/legal personality; recognition of states and government; state territory; state responsibility; treaties; the settlement of international disputes – peaceful and the use of force. A bird's eye view of human rights law; armed conflict and international humanitarian law; international criminal law; the United Nations and other international and regional organizations.

LB209 Gender and the Law
Feminist theories; masculinities and gender; the concepts of equality and equity; the Constitution and equality; customary law and equality; gender and reproductive rights; gender and domestic violence; gender and sexual harassment; gender and sex work; gender and health; gender and labor law; gender and the criminal justice system; gender and family law; women in the legal profession; national and international instruments governing gender equality; law reform, including affirmative action.

ENT131 Entrepreneurship 1
Refer to the department of Entrepreneurship.

LB302 Accounting for Legal Practitioners
The course is intended to train students in accounting principles and procedures relevant to legal practitioners and practice and to Trust Accounts regulations and by-laws in keeping with the requirements of the provisions of the Legal Practitioners' Act and related legislation. Liability of commercial banks for clients' funds deposits raided by the Reserve Bank or other government institutions from the banks without depositors' consent.

LB303 Jurisprudence
Legal philosophy; legal theory; natural law and positivist theories of law; indigenous perspectives; critique of classical natural law and positivism; critical legal theories; Marxist theories of law; other theories; philosophy of *ubuntu/ unhu* and the total person and the law; origins of law, state and government; sociological jurisprudence, feminist jurisprudence, legal realism, legal realism.

LB304 Conveyancing
The module imparts knowledge about the Land Registration system in Zimbabwe, drafting documents such as Deeds of Transfer, Mortgage Bonds, Power of Attorney, Subdivisions and Consolidations as required by the Deeds Registries Act [Chapter 20:05].

LB306 Human Rights Law
Introduction; sources; the internal legal system and human rights under the Constitution of Zimbabwe; the role of the United Nations; the International Bill of Rights; the Three Generations of Rights; group rights; crimes against the dignity of mankind; the Rome Treaty 1998; human rights and Indigenous laws; the International Criminal Court. The law of armed conflict, Geneva Conventions of 1948 and additional Protocols, the role of the International Committee of the Red Cross, and the rights of civilians and military personnel in an armed conflict.

LB306 Labour & Employment Law
Historical background; employer/employee relations; contents of labour law; capitalism and labour; the contract of employment – formation and termination; kinds of labour; trade unions and employers' unions; collective bargaining; industrial actions; safety at work; workers' rights and entitlements; labour courts; jurisdiction of the Labour Court; paradox of the jurisdiction of the Labour Court and High Court in labour matters and relevant legislation; labour rights under the Constitution of Zimbabwe.

LB310 Intellectual Property Law
The law regulating copyrights, patents, trademarks, and traditional knowledge. Legal import of the
Copyright and Neighboring Rights Act and other legislation regulating patents and trademarks locally, regionally and internationally. The role of the African Regional and Intellectual Property Organization (ARIPO) and the World Intellectual Property Organization (WIPO).

LB311 Insurance Law
The module equips students with a comprehensive knowledge of the law of insurance in Zimbabwe. It examines the nature and formation of the contract, insurable interest, and duty of good faith warranties, agency, and subrogation, duration of the contract, life and third-party insurance.

LB312 Banking Law
The module aims to provide students with an understanding of the banking law, relationship between banking practice and law and the practical application of banking law.

LB313 Law of Succession and Administration of Estates
This course seeks to explore testamentary and non-testamentary succession both under customary law and general law. It will further look into the rights of out-of-wedlock children to inherit from their fathers' estates. Also, it looks at the process of the administration of an estate from the stage of registration to the stage of the winding up of the estate and the role of an executor/executrix as well as the Master of the High Court. Examination of the general law of succession and relevant statutory provisions, general law and statutes governing the administration of estates; customary law relating to succession and administration of estates; testate and intestate succession; registration of deaths; presumption of death; types of wills; capacity to make wills; requirements for valid wills; codicils; revocation of wills; interpretation of wills; administration of estates; inheritance and testate and intestate succession; legacies; conditional bequests; succession and polygamous unions; spouses and issues under general law and customary law; statutory law.

LB315 Alternative Dispute Resolution
The module is designed to introduce students to the various approaches to dispute resolution. It identifies and critically discusses approaches such as negotiations, mediations, arbitration, mini-trials, and summary jury trials.

LB316 Administrative and Local Government Law
This course seeks to equip law students with the knowledge of administrative law and the right to administrative justice as provided for in the Constitution of Zimbabwe and other pieces of legislation. Administrative law consists of rules that are recognized by courts of law which relate to administrative action. Administrative law deals with rules which are not strictly law- e.g. ministerial circulars and memoranda, and public corporations' decisions. The course will therefore deal with both legal and non-legal rules.

LB317 Law of Insolvency
The module discusses the history of the law of insolvency in Zimbabwe. It makes reference to the Insolvency Act of Zimbabwe and discusses the practical ways of declaring a legal person or entity insolvent.

LB318 International Humanitarian Law
The module deals with the various roles, principles and customs of International Humanitarian Law which applies during international and internal armed conflicts.

LB319 International Business Transactions

The module imparts an understanding of and ability to analyse the fundamental legal concepts, principles and theories relating to certain major aspects of international business law such as export sales/international sale of goods, transportation and finance implications, marketing operations abroad, mergers and acquisitions and dispute settlement and mechanisms.

LB323 Disability Rights
The module examines disability as a legal category with implications for the rights of PWDs. It introduces various concepts and theories of disability and examines how law constructs and regulates the lives of PWDs. The module also encompasses an analysis of the national, regional and international frameworks for the realization of disability rights.

LB324 Child Law
The module introduces students to children's rights and addresses several issues that are not covered in other related modules such as family law, succession and criminal law. It examines various legal instruments at international, regional and domestic levels. It identifies and establishes the protection of children's rights at the international, regional and national levels.

LB325 International Criminal Law
The module will cover both substantial and procedural aspects of international criminal law. Under substantive aspects, the module will cover a *capita selecta* of important international crimes such as crimes against humanity and genocide. Under the procedural aspects, the module will cover aspects of direct and indirect enforcement of the ICL rulings.

LB501 Dissertation
The meeting of the term dissertation shall be defined in the General Regulations. A student is required to submit a dissertation of not less than 10,000 words and not more than 12,000 words. The student shall choose a topic in law to write on and be supervised by a lecturer of his/her own choice. The topic and supervisor are subject to approval by the Head of the relevant department.

LB502 Notarial Practice
The module introduces students to notarial practice and teaches them how to draft notarial documents and how to lodge the same with the Deeds Registry. The documents include the Deeds for Change of Name, Deed of Trusts, and Notarial Covering Bonds etc.

LB503 Professional Legal Ethics
Introduction and definitions; ethics relevant to the practice of law; professional ethics and regulations; professional conduct; moral philosophy; social theory; sociology of the legal profession; public law theories of regulation. Basic skills of advocates; opening and closing speeches; advocacy in action; effective communication; the art of advocacy.

LB504 Civil Procedure (Superior Courts)
This course deals with procedures in the High Court, Supreme Court and the Constitutional Court. Matters to be dealt with include jurisdiction, parties to action, processes and procedures leading to judgments; appeals; contested and uncontested matters; appearance to defend; pleadings; discovery; pre-trials; set down; trial; applications; costs and taxation; and execution.

LB505 Clinical and Practical Skills Training
The module introduces students to the practical elements of legal practice, focusing as it does on interviewing; research skills; legal writing and drafting; researching agreements and dispute resolution; and advocacy – the 'DRAIN' competencies = Drafting; Research; Advocacy; Interviewing; Negotiation.

LB520 Mining Law
The module focuses on broad terms such as mine health and safety, mining and the environment, exploration and mining, and miscellaneous issues. In addition, concepts such as duty of care, enabling legislation, safety management systems, the role of risk management, the role of the regulator, and mining laws in developing countries, industrial law and other issues are also dealt with.

LB521 Law of Taxation
Focus on the tax system in Zimbabwe which involves **"Gross Income"** and **"Taxable Income**". It also covers topics such as exemptions, deductions, rebates, computation of normal tax liability, the taxation of married women and minor children, special provisions relating to companies, donations tax, tax invasions, objections and appeals.

LB524 E-Commerce
The module provides students with an intensive survey of technologies used to support all aspects of electronic business and how these technologies interact and the law that regulates the use of these technologies.

LB526 International Trade Law
The module deals with the rules of international trade governing the World Trade Organisation (WTO) and Regional Trade Law from a developing country's perspective. It analyses the fundamental legal concepts, principles, theories and their relationship to International Trade Law practice.

LB527 International Investment Law
The module introduces students to international investment law. It explores the history of international investment law, the sources, bilateral investment treaties, duties and rights of host state and investor, multilateral agreement on investment and dispute settlement.

LB529 Advocacy
The module is aimed at equipping students with the relevant knowledge, skills and values in procedural law and practice. It enables law graduates to apply research, argumentation, and writing skills and use practical evidence in certain areas of substantive law relevant to practice in Zimbabwe.

LB530 Mental Health Law
The module identifies and analyses legal issues encountered by people with mental health challenges. In addition, it critically evaluates aspects of the operation of mental health law in its historical, socio-economic and political contexts, including the legal (rights-based) and medical approaches.

LB531 Medical Law
The module aims at investigating a range of areas of law which are of topical interest but which are not otherwise specifically addressed in the Medical Law.

LB532 Professional Negligence Law
The module examines the different fast-growing areas of specialists. It looks at the nature and definition of professions, the general legal and regulatory principles and their application to selected professions.

LB533 Social Security Law
The module introduces students to the requirements of a properly functioning social security system. It also explains how social security legislation is structured in Zimbabwe. The module makes reference to case law in interpreting the social security law.

LB534 Law and Development
The focus of this module is not only on law as written rules but also on customary law, norms, practices and issues of enforcement in relation to development.

LB536 Customary Law
Customary Law is the other but often ignored part of the Zimbabwean Legal dualism. Its place, practical and constitutional, in the Zimbabwean legal system is highlighted. The indigenous procedures and substantive rules applied in customary law courts are critically examined in such areas as the family, property, inheritance, land, communal use of land, women, assumption of traditional leadership, the hierarchy of the courts, and treatment of strangers. Human rights under customary law are dealt with in the course. The Constitution of Zimbabwe will be referred to in determining the status of customary law in our legal system. Regional variations, if any, in 'customary laws', will be identified and a brief contrast with other African customary laws will be made. Finally, the future of customary law in our legal system shall be assessed.

LB537 Consumer Law
The module discusses the rationale for consumer law and the different forms of regulating consumer markets.

LB543 Criminology
The module examines the classical theories of positivism and modern biological theories. It also deals with the various concepts of crime and the environment, atomic theory, subcultures and gangs, conflict and critical criminology.

LB544 Penology
The module evaluates general theories regarding crime control. It also highlights the functions of the Zimbabwe Prison System. It also examines criminal statistics and explores the need for public participation in the criminal justice process as well as the alternative punishment systems.

LB546 Conflict of Laws

The module examines the nature and scope of the law. It explores the historical development, jurisdiction, the choice of law in selected topics including delict, contract and actions involving judgments sounding in money, immovable property, and incorporeal and matrimonial matters.

LB548 Environmental Law
The module puts more emphasizes on the right to a clean environment as a third-generation right. It analyses the Environmental Management Act where Zimbabwe is seeking to domesticate the International Environmental Instruments. Furthermore, the module highlights major themes and principles and provides practical examples of environmental law.

LB549 Law, Democracy and Good Governance
Module is meant for those with an interest in a deeper understanding of constitutional issues. It will focus on Democracy and Good Governance.

LB550 Biotechnology and Law
The module introduces students to the legal regulation of sciences especially biotechnology. It examines the theories of regulation and goes on to consider the ethical and safety considerations of the use of biotechnology. Furthermore, it considers the issue of patenting of biotechnological inventions, including University patents.

LB551 Media Law
The module provides a succinct and lucid introduction to all areas of the law relating to printing, broadcasting and electronic media. It offers practical and well-referenced insight into key media issues.

LB552 Telecommunications Law
The module focuses on the legal implications surrounding Information Technology and Telecommunications. It covers the legal aspects of Information security, liability, intellectual property, e-commerce, telecommunications and access to public information.

LB553 International Economic Law
The module deals with international economic governance. It begins with a brief introduction to economics and then deals in depth with the law governing the World Bank, International Monetary Fund (IMF) and the World Trade Organization. It also deals with International Investment Law.

LB554 Cyber Law
The module deals with the internet, cyberspace, and their respective legal issues. Cyber law encompasses several subtopics including freedom of expression, access to and usage of the internet, and online privacy.

LB555 Securities Law
The module seeks to consider and evaluate in detail the main topics within securities law. It concerns the role and regulation of capital markets: the Exchanges and the variety of other institutions devoted to the trading of securities, the economic theory that explains how capital markets operate and the incentives that motivate their various players. These beginning segments lay the groundwork for a more informed discussion of the substantive law that governs capital markets which the module seeks to address.

LB556 Space Law
This module provides an introduction and overview of aviation and space law, international and domestic. After reviewing what "space" means physically and legally, the module examines the origins and development of international space law in international treaties and agreements and the purported underlying policy consensus relating to peaceful exploration for the benefit of all humankind. Much of the focus is on the recent decades of space activity, the more recent nature of international space law and the fast-developing national laws competitively supporting and governing the increasing private-sector participation in space. Critical legal and policy issues are considered relating to space-based natural resources extraction and ownership on the Moon, planets and asteroids, human settlements, in-space manufacturing, space debris and other environmental concerns

LB558 Aviation Law
The course provides an overview of the basic fundamentals of international aviation law with a particular focus on air service agreements, open skies agreements, traffic rights, the legal and institutional framework of international aviation and the roles and functions of principal organizations involved in the regulation of the aviation industry.

REGULATIONS FOR THE MASTER OF LAWS IN CONSTITUTIONAL AND HUMAN RIGHTS LAW (LLM)

Duration	:	18 months
Type of Degree	:	Masters
Credit Load	:	336 credits
ZQNF Level	:	Level 9

1. INTRODUCTION

1.1 These regulations should be read in conjunction with the University's General Academic Regulations for Postgraduate degree programmes.

1.2 The Master of Laws (LLM) degree in Constitutional and Human Rights Law is a three-semesterprogramme offered on a block-release basis. The programme is aimedat professionals who possess an LLB qualification seeking specialized knowledge inthe areas of constitutional and human rights law.

2. OBJECTIVES

2.1 The programme provides an academic opportunity for students intending to deepen their understanding and knowledge of constitutional and human rights law. The degree invites students to explore and appreciate the convergenceof constitutional and human rights law in a constitutional democracy and the importance of such convergence to a legal system.

2.2 The development of constitutional and human rights law in the public interest litigation context is critical in the development of the country's legal system. In light of Zimbabwe's new constitutional dispensation, the programme provides options to candidates who wish to enhance their litigation skills in constitutionaland human rights law.

3. CAREER PROSPECTS

The LLM programme enhances career prospects in various areas for a target group that includes but is not limited to law graduates, practicing attorneys, academics, civil societypractitioners, members of the judiciary, and law officers in government departments.

4. ENTRY REQUIREMENTS

4.1 Applicants shall possess a Bachelor of Laws degree (LLB). Applicants arerequired to have at least a 2.2 (Lower Second) degree class or the equivalent thereof.

4.2 Other factors such as relevant professional experience will also be taken into consideration in assessing applications.

5. GENERAL PROVISIONS

5.1 The Master of Laws in Constitutional and Human Rights Law is studied throughtaught modules with continuous assessment and examinations offered at the endof each semester.

5.2 The programme is completed over a period of three semesters. The degree programme shall be by block release. The method of learning will be through lectures and seminars. Contact shall be a minimum of 60 hours per semester for each module. Each semester has three (3), two-week blocks.

6. ASSESSMENT

6.1 Overall assessment shall be based on continuous assessment and formal examinations.Each candidate is required to earn twenty (20) credits in the taught modules and sixteen (16) credits in the research component.

6.2 Examinations shall be written at the end of each semester. Each module will be examined by a paper which is, four (4) hours long. In determining the final marks formodules, weighting will be as follows:

Continuous assessment	40%
Examinations	60%

7. PROGRESSION

7.1 For a candidate to proceed to the next level of the programme, the candidate must have passed at least two modules per level.

7.2 If a candidate fails all modules at the end of the first semester, he or she shall retake the failed modules.

8. EXAMINATIONS

8.1 Two external examiners shall be appointed by the Senate on the recommendation of theFaculty Higher Degrees Committee to examine written modules in respect of the LLM programme.

8.2 Candidates who have neither finished nor submitted their dissertations in the third semester shall be required to re-register for their work to be assessed and/or submittedfor examination.

8.3 Upon failure in a particular module(s), candidates can retake the failed modules in the following semester.

9. DEGREE CLASSIFICATION

80% - 100%	Distinction
70% - 79%	Merit
60% - 69%	Credit
50% - 59%	Pass
Below 50	Fail

10. PROGRAMME STRUCTURE

The Master of Laws (LLM): Constitutional and Human Rights Law shall be a taught programme with a dissertation which commences in the second semester and is submitted in the final (third) semester. The degree programme will run for three semesters and is structured as follows:

First (Opening) semester	:	3 core modules.
Second (Penultimate) semester	:	2 electives plus dissertation.
Third (Final) semester	:	dissertation

11. PROGRAMME COMPETENCES

Generic:

- **Multidisciplinary**: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on the understanding of complex phenomena.
- **Communication skills**: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences.
- **Analysis and synthesis**: Capacity for analysis and synthesis using logical arguments and proven facts.
- **Ethical commitment:** Professional integrity and awareness of Constitutional and Human Rights Law and its impact on democratic governance.
- **Entrepreneurial skills:** Capability to identify and create new business ventures based on knowledge and new thinking paradigms.

12. INTENDED LEARNING OUTCOMES

12.1 The ability to analyse, critically evaluate and produce a synthesis of well-established and innovative legal rules, doctrines, policies, principles and concepts.

12.2 The programme provides an academic opportunity for students intending to deepen their understanding and knowledge of constitutional and human rights law.

12.3 The degree invites students to explore and appreciate the convergence of constitutional and human rights law in a constitutional democracy and the importance of such convergence to a legal system.

12.4 In light of Zimbabwe's post-2013 constitutional dispensation, the programme provides options to candidates who wish to enhance their litigation skills in constitutional and human rights law.

MODULE SYNOPSES

LM601 Advanced Constitutional Law
The module seeks to provide a focused and deeper appreciation of the jurisprudential and theoretical basis for constitutionalism, aspects of constitution-making process, constitutions and constitutionalism in Zimbabwe. It is further aimed at extending knowledge of constitutional principles, concepts and constitutional rights, and constitutional interpretation. Issues to be canvassed further include democratic governance through commissions and related institutions, the convergence of constitutional law and human rights in Zimbabwe, electoral systems and participatory democracy, the rule of law and judicial matters.

LM602 Advanced Human Rights Law
The primary objectives of the module are to build an understanding of the conceptual, philosophical and ideological nature of human rights in light of their origin; explore the national understanding, application, attitudes, and perceptions of human rights; study in detail the normative content of human rights as provided for in the Bill of Rights as complemented by international and regional human rights treaties; explore the opportunities for promotion and protection of human rights by utilizing both judicial, quasi-judicial and non-judicial procedures and institutions; familiarize candidates with promotion and protection options at international level including treaties, institutions, and procedures and prevailing jurisprudence in the area; critique and assess the strengths and weaknesses of international protection.

LM603 Research Methodology
The module is meant to equip students with the knowledge and skills necessary to conduct research, to critically evaluate published research and to explore different ways of translating research questions in quantitative or qualitative studies.

LM604 International Criminal Law
The main objective of the module is to highlight to students that without accountability and provision of remedies to victims, international human rights law is nothing but the proverbial brutum fulmen. Through the lens of international criminal law, students will appreciate that the purpose of human rights law is not only to set standards for governments, non-state actors and their agents, it is to prescribe the consequences of a failure to meet those standards – through criminal sanctions.

LM605 Environmental Law
The module deals with the environmental regulatory framework and the international environmental regulatory framework and how it relates to, enhances, and influences the domestic regulatory framework.

LM606 Women's Rights
The module focuses on the concept of women's rights within the equality and non-discrimination framework and specific issues of concern to women within the context of feminist legal theories. It further examines how gender shapes and informs the law and how legal doctrine affects our understanding of women's rights.

LM607 Refugee Law
The module aims to inculcate an appreciation of the national and international legal framework for the protection of refugees and asylum seekers and the attendant state practice using Zimbabwe as the main case study.

LM608 Child Rights
The module examines the scope of children's rights as protected by the United Nations Convention on the Rights of the Child (CRC), the African Charter on the Rights and Welfare of the Child (ACRWC), the Constitution of Zimbabwe (2013) and the Zimbabwean legislation that seek to protect children's rights. Additionally, the module seeks to scrutinize the ideas and attitudes towards children on one hand and family dynamics, educational practices, socio-economic structures as well as cultural and social differences.

LM609 Disability Rights Law
The module explores disability as a legal category with implications for the rights of PWDs. Students will be taught various concepts and theories of disability rights with the aim of showing how the law constructs and regulates the lives of PWDs. In essence, historical approaches and contemporary arguments pertaining to disability are discussed within the context of

national laws, policies and institutions addressing disability rights. Further, regional and international laws directly and indirectly addressing disability are explored and unpacked.

LM610 Comparative Constitutional Law
The module introduces students to the study of constitutional law through the lens of comparative law. Students are introduced to the theoretical foundations of comparative constitutional law and to the rich diversity of constitutional law in the world today.

LM611 Constitutional and Human Rights Litigation
The module focuses on the central ways in which constitutional claims are actually litigated in Zimbabwe. The bulk of the course looks at constitutional litigation, procedures, institutions, jurisprudence, and the interface with human rights law.

LM612 Constitutional Property Law
The module is rooted in the convergence between constitutional law and property rights law. It enables students to appreciate mainstream debates emerging from the conflict between private property rights and governmental interests in land reform, land tenure reform and land redistribution in the public interest.

LM613 Advanced International Humanitarian Law
The focus of the module is on contemporary international humanitarian law issues that have human rights implications and how such issues can be understood from a humanist perspective which considers the concept of humanity as the foundational basis of both international humanitarian law and international human rights law.

LM614 Dissertation
Students are required to produce and submit a dissertation (thesis) of between 20,000 to 25,000 words at the end of the third (final) semester for examination. The dissertation shall be completed over a period of two semesters.

REGULATIONS FOR THE MASTER OF LAWS DEGREE IN CORPORATE AND COMMERCIAL LAW (LMC)

Duration	:	18 Months
Credit Load	:	288
Minimum Credit Load	:	270
Maximum Credit Load	:	288
ZNQF Level	:	9

1. PURPOSE OF THE PROGRAMME

1.1 To equip students with up-to-date knowledge of traditional and emerging fields of commercial practice in Zimbabwe.
1.2 To equip students with analytical and problem-solving skills for a challenging and evolving commercial and corporate world.
1.3 Competently draft novel and advanced commercial contracts on various aspects of the law such as construction, mining, agriculture, public-private partnerships, and joint ventures.
1.4 To produce knowledge products (like publications, specialised research, journal articles, policy briefs, thematic papers and books).
1.5 To promote academic and practical expertise in the area of commercial law generally and to stimulate academic debate, critical thinking and possible advocacy around certain of the more complex and controversial areas of corporate law and commercial practices.

2 ENTRY REQUIREMENTS

2.1 Applicants should possess a Bachelor of Laws degree (LLB)
2.2 Applicants are required to have at least a 2.1 (Upper Second) degree class or the equivalent thereof.
2.3 Other factors such as relevant professional experience will also be taken into consideration in assessing applications.

3. GENERAL PROVISIONS

3.1 These regulations should be read in conjunction with the University's General Academic Regulations for Postgraduate degree programmes.
3.2 The Master of Laws (LLM) degree in Commercial Law is a three-semester programme offered on a block-release basis. The programme is aimed at professionals who possess an LLB who seek to specialise in the areas of commercial & corporate law.

4 ASSESSMENT

4.1 The overall assessment shall be based on continuous assessment and formal examinations. Each candidate is required to earn twenty-four (24) credits in the taught modules and ninety-six (96) credits in the research component.

4.2 Examinations shall be written at the end of each semester. Each module will be examined by a paper that is four (4) hours long. In determining the final marks for modules, the weighting will be as follows:

Continuous assessment	**40%**
Examinations	**60%**

5 PROGRESSION

5.1 For a candidate to proceed to the next level of the programme, the candidate must have passed at least two modules per level.

5.2 If a candidate fails all modules at the end of the first semester, he or she shall retake the failed modules.

5.3 Research Methodology is a prerequisite for dissertation writing. For a candidate to proceed to the dissertation level, the candidate must have passed the Research Methodology module.

6 EXAMINATIONS

6.1 Two external Examiners shall be appointed by the Senate on the recommendation of the Faculty Higher Degrees Committee to examine written modules in respect of the LLM programme.

6.2 Candidates who have neither finished nor submitted their dissertations in the third semester shall be required to re-register for their work to be assessed and/or submitted for examination.

6.3 Upon failure of a particular module(s), candidates can retake the failed modules the following semester.

7 DEGREE CLASSIFICATION

80% - 100%	Distinction
70% - 79%	Merit
60% - 69%	Credit
50% - 59%	Pass
Below 50	Fail

8 PROGRAMME STRUCTURE

8.1 The Master of Laws (LLM): Commercial Law shall be a taught programme with a dissertation that commences in the second semester and is submitted in the final (third) semester.

8.2 The degree programme will run for three semesters and is structured as follows:

8.3 First (Opening) semester: 3 core modules.

8.4 Second (Penultimate) semester: 4 elective modules.

8.5 Third (Final) semester: dissertation continued.

9. MODULE SYNOPSES

CORE MODULES

LMC 111: Advanced Legal Theory & Research Methods

This module grounds students in the conceptual, philosophical and theoretical foundations of the law and how the law can be used to create goods and or services. It is also meant to equip students with the knowledge and skills necessary to conduct research, critically evaluate published research and explore different ways of translating research questions into quantitative or qualitative studies. The module will focus on the following aspects:

- Understanding the range of paradigms and data-gathering techniques available to the legal researcher.
- Distinguishing the purpose and product of qualitative research from that of quantitative research.
- Research methods, including the application and conceptualization of theory.
- Research design.
- Sampling, strategies for framing research and interview questions.
- Data coding and analysis.
- Ethical responsibilities of qualitative researchers, who have closer contact with "subjects" and "informants" than do their more quantitative counterparts.

LMC 112: Advanced Corporate Governance Law

The module guides the student into special aspects of Corporate Law and Governance. The module aims to equip students who intend to work as corporate in-house lawyers or company secretaries with advanced knowledge of the laws that regulate the governance of companies. The module also seeks to examine the framework of analyzing the relations between the company and other stakeholder groups. This module will focus on the following areas among others:

- Regulation of corporate groups
- Corporate governance theories
- Corporate governance in Africa
- The board of directors & governance
- Role of the company secretary
- Shareholder activism
- Corporate social responsibility (CSR)
- Corporate Reporting & Accountability
- The regulation of the governance of companies (public v private ordering)
- Future development and trends in corporate governance.

LMC113: Advanced Commercial Arbitration & Negotiation

Zimbabwe's arbitration law adopts the UNICTRAL model law on arbitration for both international and domestic arbitration. This ensures modern arbitration legislation is in line with international norms. Arbitration has become one of the most important methods of resolving cross-border commercial disputes. Zimbabwe is strategically positioned; it has the potential to be a centre for arbitration. In light of this, knowledge of international commercial arbitration will be indispensable for the international lawyer with an international clientele. This module will therefore equip students with skills to conduct national and international commercial arbitrations of complex commercial disputes and international commercial transactions including banking transactions involving paying and correspondent banks and resolve disputes arising out of these. The module will cover the following aspects:

- An introduction to investment arbitration
- The UNICTRAL Model Law
- The role of national courts in the international arbitration process
- An analysis of international arbitral institutions and their rules
- Conflict of laws in the context of international arbitration
- The setting up of the arbitral tribunal
- Drafting of an international arbitration clause

- Measures to make the arbitral proceedings more efficient and cost-effective
- Recognition, Challenging and enforcement of the arbitral award

LMC201: Dissertation

Students are required to produce and submit a dissertation (thesis) of between 20,000 and 25,000 words at the end of the third (final) semester for examination. The dissertation shall be completed in two semesters. Topics for the dissertation shall be carefully chosen and students are required to defend, justify, and explain their topics in *vivas* before a panel composed of Faculty Members. Research proposals shall be submitted and students are expected to proceed with the dissertation once approval to do so is granted. Concerning dissertation examination, at least one internal and one external examiner shall be nominated by the Faculty Higher Degrees Committee to evaluate the dissertation.

ELECTIVE MODULES

LMC121: Drafting Commercial Contracts

This module aims at condensing various aspects of commercial law into commercial agreements. It is the converging point of all aspects of commercial law as they all eventually require commercial agreements to operationalise various commercial activities. The focus of the module is to equip students with contract drafting skills for various commercial transactions. The key areas to be examined in the module include:

- The role of contracts in commercial business.
- Basics of contract drafting
- The contract formation process.
- Contract negotiation.
- Principles of effective contract drafting.
- Risks of badly drafted contracts.
- Contract drafting techniques.
- Reviewing and interpreting commercial contracts.
- Contract drafting exercises for various forms of contracts.
- The contract management cycle

LMC122: Business and Human Rights

The rise of contemporary economic globalisation has changed traditional discussions on the duties of businesses to increasingly being framed in terms of human rights and in a transnational and global manner. Yet, despite spite of growing support for the idea that businesses should respect human rights, it is still far from having global acceptance and recognition. This module addresses recent developments in linking business practices and human rights (including corporate social responsibility (CSR)) within the UN and in other international organisations and focuses on the efforts to make human rights an important normative framework for the conduct of business in different societal and political contexts. It offers arguments in favour of and against extending human rights to the corporate sector and discusses legal developments, including normative and remedial mechanisms. It examines the strengths and weaknesses of the CSR movement and the scope for making human rights regulatory measures for corporate behaviour. Topics to be covered include: Case studies of the CSR policies of selected companies in different social, economic and political contexts

- Impact of human rights on corporate behaviour
- Consumer rights and behaviour from the position of human rights ethics
- Practices and impact of different strategies of remedy and compensation
- Empirical cases of business conduct in light of human rights law.

LMC123: Import and Export Law

This course covers the law relating to the international sale of goods. It covers aspects of shipping law, international payment systems (with emphasis on documentary credits); and trade terms (with a focus on the latest revision of the Inco terms). The course includes practical training on drafting international sales contracts. Students will also be introduced to salient aspects of international dispute resolution and choice of law rules. Specific topics include:

- The role of banks in facilitating international trade,
- Introduction to shipping law,
- The role of Bills of Lading,
- Trade terms under common law and Incoterms,
- Determining applicable law in International Sales Contracts,
- Drafting of Arbitration clauses- institutional vs ad-hoc arbitration, choice of law clauses, customs and clearance.

LMC125: Electronic Transactions & Cyberspace Law

The importance of e-commerce and information technology in modern society has grown exponentially in recent times. The module allows students the opportunity to gain expertise in the legal regimes governing the supply and use of modern communications technology and the conduct of e-commerce. The module aims to familiarize students with the domestic and international law that regulates e-commerce and electronic transactions. The module will offer a theoretical as well as a practical foundation for an understanding of the necessity for the law to adopt new strategies and perspectives to approach the legal implications of developments of new communication technologies. It will explore, analyse, and compare the treatment of such issues at national, supranational, and international levels of Internet governance. Topics under this module include:

- Electronic transactions
- International and regional sources of the law governing electronic transactions
- Domestic sources of the law governing electronic transactions
- Electronic transacting and the doctrine of functional equivalence
- Electronic signatures
- Electronic contracts
- Electronic payments and virtual currencies
- Consumer protection
- Data privacy
- Electronic crime
- Security standards
- ISPs and their liability
- Online dispute resolution
- Taxing electronic commerce

LMC126: International Tax Law

We live in a globalised world, with business enterprises and companies now situated in more than one country. This raises tax implications in each of the countries in which a business enterprise may operate. This module will analyse the tax implications of cross border transactions and will cover the following:

- An introduction to and history of the international tax system
- Double Tax Agreements with specific emphasis being placed on the OECD and SADC Model Tax Conventions
- Key features of Zimbabwe's Double Tax Treaty network
- Unilateral relief from double taxation
- The theory and the practice of transfer pricing

LMC127: Advanced Competition Law

The module is an interdisciplinary course that combines law and economics. It offers students the opportunity to study the application of competition law in relation to different business phenomena, ranging from anti-competitive agreements and abuse of dominance to mergers. The module aims to equip legal practitioners with an understanding of the economic underpinnings of the law as well as skills in economic analysis. The areas covered include;

- Introduction to the economics and the goals of competition law and policy;
- economic principles underpinning the definition and control of anti-competitive practices
- Cartels and the problem of oligopolistic markets
- The role of markets and competition law in relation to the poor;
- The rationale for aggregate efficiency
- The relationship between the common good and the national good;
- The tension between a countries's right to regulate in the national interest and its obligation not to cause external harm.
- Merger control
- The relationship between intellectual property rights and competition law
- Predatory pricing
- Competition enforcement and procedure

LMC128: Corporate Financing & Securities Law

The module examines the legal rules governing how companies raise finance. The module aims to provide students with a deep, systematic and structured knowledge of the operation of the corporate finance market in general and how it affects both practitioners and transactions in this area in particular. The areas covered include;

- Securitization
- Capital structures;

- Equity vs debt financing;
- Distributions and the Solvency and Liquidity Test;
- Identifying and protecting shareholder rights;
- Securities markets and approaches to their regulation;
- Investor protection;
- Insider trading &market abuse;
- Major Asset Transactions:
- Compromises
- Takeovers
- Acquisitions
- Mergers)

LMC129: Procurement Law

This module exposes students to the legal and policy regulatory regime for public procurement, with the major focus being the domestic (Zimbabwean) legal regime and the model international norms, standards and principles. The main objective of this module is not only to deepen the understanding and knowledge of the public procurement legal terrain but to enable students to appreciate the fundamental institutional, practical and legal approaches to public procurement in Zimbabwe as far as it is informed by regional and international standards and best practices. The module will focus on the following aspects: -

- Introduction to Procurement Law
- General Procurement Rules and Principles
- Domestic Public Procurement Legal Framework
- The International Regime on Public Procurement
- E-procurement and the Law
- Public Procurement and Anti-Corruption Systems

LMC130: Advanced International Trade Law

We live in a world where an increasing amount of business is conducted across international borders. International Trade Law considers the role of law, institutions, lawmakers and regulators in the international business environment. In this module, we will look at the international legal and institutional framework that regulates transnational business and you will analyse the nature of legal and regulatory arrangements, such as:

- The basic principles of GATT
- The structure and role of the World Trade Organisation (WTO)
- The interplay between the WTO and other areas of global regulation (health and environmental protection) product standards
- International aspects of intellectual property rights
- Regulatory aspects of the internationalisation of services (especially financial)

LMC131: Advanced Labour Law

The significance of work in modern industrial society cannot be underscored. At the social, political and economic level, work remains the principal means through which economic activity is conducted. Thus, Labour Law as a discipline in its own right is worthy of study. This module aims to equip students with the necessary legal knowledge and skills in a labour relations environment that is increasingly technical and legalistic. Students will acquire advanced knowledge of all the relevant areas of labor law and will be able to use this in analysing and evaluating problem situations, identifying relevant legal issues, applying relevant legal principles to these issues, suggesting solutions and provide and responsible advice. Through this module, students will also be able to intelligently and scientifically critique the structure and principles of Labour Law. The following will be covered directly or indirectly;

- An introduction to labour law
- The contract of employment – Termination of contracts of employment under the common law and labour legislation.
- Dispute resolution mechanisms established under labour legislation
- Collective labour law including collective bargaining law, union organization and collective job action law.
- The employment of members of the civil service or state employees.
- An introduction to social security law in Zimbabwe

LMC132: Advanced Banking Law

It is indisputable that banks play a pivotal role in the economy. Therefore, this module covers the key legal issues and regulatory frameworks surrounding the bank-customer relationship and the payment systems in Zimbabwe. The knowledge built throughout the module allows students not only to solve practical legal problems but also position these

problems within a wider conceptual context of banking regulation such as the key role banks play in supporting businesses and driving economic growth, their active role in monitoring money laundering, the importance of ensuring competition and financial stability in the banking sector and the need to preserve the confidentiality of customers' information. Some of the specific themes and topics that the module offers typically include:

- Banking and banking supervision
- Banks and their customers
- Banks and finance
- Money laundering and control measures
- Money payments
- Paper payments and methods of payments other than negotiable Instruments
- Electronic banking
- Instruments of finance
- Bank governance

LMC134: Advanced Intellectual Property

This module provides you with the opportunity to undertake an in-depth evaluation of Zimbabwe's intellectual property law and its interaction with international law. We will introduce you to the key legal principles and political issues underpinning intellectual property protection. At the heart of our evaluation of the law is a strong focus on technological developments (e.g. film, television, software, the Internet, cloud storage, stem cell research). Some of the specific themes and topics that the module offers typically include:

- Intellectual property protection – is the legal framework fit for the modern age?
- Copyright –measures to address the growth of peer-to-peer sharing of copyrighted works.
- Patents – requirements/employee protection/biotech patents/software patents.
- Trademarks – requirements/non-standard marks such as sound, smell or colour/exclusions/Internet auction sites and keywords.

LMC134: Advanced Intellectual Property Law

This module provides an opportunity to undertake an in-depth evaluation of Zimbabwe's intellectual property law and its interaction with international law. At the heart of the evaluation of the law is a strong focus on technological developments (e.g. film, television, software, the Internet, cloud storage, stem cell research). Some of the specific themes and topics that the module offers typically include:

- Intellectual property protection – is the legal framework fit for the modern age?
- Copyright –measures to address the growth of peer-to-peer sharing of copyrighted works.
- Patents – requirements/employee protection/biotech patents/software patents.
- Trademarks – requirements/non-standard marks such as sound, smell or color/exclusions / Internet auction sites and keywords.

LMC 135: Advanced Company Law

This module is aimed at preparing legal advisers/consultants, compliance professionals and practicing attorneys/advocates who may frequently be called upon to provide legal advice, technical support and/or manage matters relating to company law. The module builds upon the knowledge acquired at the undergraduate level. This module will critically examine the legal rules and institutional framework designed for the regulation of Zimbabwean companies with a view to evaluating the history and theoretical conceptions of a company and the legal nature of a company and piercing the corporate veil, especially within groups of companies. It will focus on companies' constitutive documents and the relevance of the objects clause. In addition, the module will examine the several duties and liabilities of directors in Zimbabwe. Lastly, the module will consider shareholder remedies provided for in the new Companies and Other Business Entities Act [*Chapter 24:31*].

LMC 136: Aviation Law and Policy

The course provides an overview of the basic fundamentals of international aviation law with a particular focus on air service agreements, open skies agreements, traffic rights, the legal and institutional framework of international aviation and the roles and functions of principal organizations involved in the regulation of the aviation industry.

LMC 137: Advanced Taxation Law

The module focuses on the identification of tax mitigation and planning opportunities. issues covered include personal income tax mitigation strategies, taxation of unincorporated businesses, tax implications of business and corporate restructurings, use of income tax incentives, application of tax treaties and the taxation of cross-border economic activities, transfer pricing and tax avoidance.

REGULATIONS FOR THE DIPLOMA IN PARALEGAL STUDIES (DPLS)

Duration	:	18 months
Credit Load	:	340
Minimum Credit Load	:	270
Maximum Credit Load	:	340
ZNQF Level	**:**	**9**

1. INTRODUCTION

1.1 These Regulations shall be read together with the General Academic Regulations for the Undergraduate Degree Programmes, herein referred to as the General Regulations.

1.2 These regulations are in respect of the Diploma in Paralegal Studies offered by the Faculty of Law.

1.3 The Diploma in Paralegal Studies shall be awarded to candidates who have successfully completed the Programme and passed examination in accordance with the General Regulations.

2. OBJECTIVES

The programme aims to:

2.1 Improve access to justice by training a pool of paralegals with requisite skills and knowledge in paralegal work.

2.2 Enhance efficiency in the justice delivery system through specialised training for courts Help-Desk personnel, Government departments and civil society practitioners.

2.3 Provide basic legal knowledge to other professionals who have an interest in the law.

2.4 Identify contemporary issues and apply research skills to solve problems in their specialized fields.

2.5 Consolidate and formalize paralegal education training in Zimbabwe as a basis for further legal education.

3. CAREER PROSPECTS

The Diploma in Paralegal Studies offers employment opportunities for paralegals in Civil Society Organizations offering legal aid law firms Court Help-Desks and other Government departments.

4. ENTRY REQUIREMENTS

To be eligible for admission, applicants must have passed at least five "O" level subjects including English Language and Mathematics OR holds a qualification accepted by the University as equivalent to the foregoing. Relevant professional qualification(s) and/or experience will also be considered.

5. DURATION

The duration of the Diploma in Paralegal Studies is eighteen (18) months offered on a block release basis.

6. GENERAL PROVISIONS

6.1 All modules in the Diploma in Paralegal Studies are compulsory.

6.2 All modules carry the same credits with the exception of the research project.

7. ASSESSMENT

7.1 Final assessment shall consist of continuous assessment and written examinations.

7.2 Continuous assessment shall constitute **40%** of the final assessment.

7.3 Written examination shall constitute **60%** of the final assessment.

7.4 In order to pass a module, a student should obtain at least **50%** of continuous assessment and written examinations combined.

8. FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General regulations.

9. PROVISIONS FOR PROGRESSION

Refer to Section 8 of the General Regulations.

10. DIPLOMA WEIGHT

Refer to Section 21.2 of the General Regulations.

12. MODULE SYNOPSES

DPLS 101: Introduction to Paralegal Studies

The module introduces students to paralegal studies. It covers the definition of a paralegal and the nature of paralegal work. In doing so, the difference between paralegal work and that of legal practitioners is identified. The module also covers a general overview of the background and justification of paralegal work. The module includes a historical trajectory of the development of paralegal work in Zimbabwe, including an overview of the regulatory framework.

DPLS 102: Information Technology and Communication Skills

The module equips paralegals with baseline information technology skills. This includes problem solving, troubleshooting, planning, data capturing and Microsoft Windows. The communication skills part equips paralegals with good listening and communication skills. This includes skills in clarity and concision, friendliness, confidence, empathy, open-mindedness and respect.

DPLS 103: Introduction to the Zimbabwean Legal System

The module introduces the students to the discipline of law. It is the foundation on which the other modules are built. It explores the concept of law, its theoretical underpinnings and the historical development of the Zimbabwean Legal System. It further focuses on aspects such as divisions of the law, court structures, law-making process, legal aid and the place of customary law in the Zimbabwean Legal System.

DPLS 104: Constitutional Foundations

The module equips students with the general knowledge and understanding of constitutional law and its aspects. Students are introduced to the Zimbabwean Constitution and fundamental legal rights. It also focuses on constitutional law aspects such as the constitutional history of Zimbabwe, separation of powers, rule of law, democratic theory, judicial independence, fundamental human rights and rights of minorities and vulnerable groups such as women.

DPLS 105: Legal Research and Writing

The module covers legal research and writing. It covers basic methods of legal analysis, effective writing, and essential legal research tools and methodologies. This module introduces students to the fundamentals of good writing. Students are assisted in developing the ability to read and comprehend legal materials. The module further explores the process of legal research with the aim of developing a basic understanding of primary and secondary legal sources. On completion of the module, students should be able to use legal authorities in carrying out research.

DPLS 106: Civil and Criminal Law Procedures

The module is divided into two main sections. The first section focuses on civil law and procedure. The definition of civil law and its distinction with criminal law is addressed. In addition, the institution of civil claims, pursuance of civil claims and remedies in civil claims form the basis of this section. The second part is on criminal law and procedure. The section explains principles of criminal law, standards of proof, and processes and procedures as applied in the lower courts, including criminal law enforcement mechanisms.

DPLS 107: Child Rights

The module introduces participants to the basic aspects of the international and regional legal frameworks as well as the institutional mechanisms for protecting children's rights. It acquaints participants with the domestic legal and policy framework and the notion of 'universality of children's rights', creating awareness of the emerging child rights jurisprudence. It also enables participants to appreciate the content, scope, extent and application of children's rights in light of the social, economic, cultural and political realities of African societies. It therefore seeks to empower them with the ability to inform legislative and policy reform in order to realise children's rights in Zimbabwe.

DPLS 108: Family Law, Wills and Domestic Violence
The module broadly covers three aspects which are family law and the property legal regime, Wills and Domestic Violence. The family law section addresses marriage law and regimes in Zimbabwe, custody, access and guardianship of minors, birth registrations and maintenance. Gender and matrimonial property rights are also covered. The section on Wills addresses the legal regime relating to Will-making and inheritance through Wills. Thus intestate and testate succession is discussed. Finally, the section on domestic violence covers domestic violence law and its relation to peace and protection orders; and criminal sanctions.

DPLS109: Counselling Practice
The module equips students with counselling skills. The importance of counselling in the paralegal discourse and counselling methodologies are addressed. Thus the module gives students the art of responsive service to identified problems. The module canvasses the following aspects: guidance and counselling, responsive service mechanisms, swift service mechanisms, polite service mechanisms, fair service mechanisms and referral mechanisms.

DPLS 110: Disability Rights
Persons with disabilities (PWDs) are a historically disadvantaged group. Prejudice, exclusion and discrimination remain common experiences for PWDs. In Zimbabwe, the link between disability and exclusion is well established. In the end, PWDs continue to be side-lined in community life. The module examines disability as a legal category with implications for the rights of PWDs. This module defines PWDs, the concept of disability and the legal entitlements of PWDs. Causes of impairments, barriers faced by PWDs and remedies available in cases of violations of the legal entitlements for PWDs are discussed. Furthermore, the module examines the legal sources of disability rights in Zimbabwe and a historical trajectory of the protection of disability rights. Given the position that women and children are vulnerable groups, the module further examines challenges faced by women and children with disabilities and interventions that can be put in place to address such challenges. Finally, contemporary arguments pertaining to the protection, promotion and enforcement of disability rights are examined; especially the national laws and polices directly and indirectly addressing disability in Zimbabwe.

DPLS 201: Paralegal Clinical and Practical Skills
The module equips students with practical skills in paralegal work. The module covers the following aspects; advocacy skills, negotiation and mediation, practical exercises and role plays, identification and case referrals, facts gathering and client interviewing techniques, investigation skills, information gathering and evidence recording.

DPLS 202: Office Management and Accounting Practice
The module equips students with office management and organisational skills in administering paralegal work. The module includes the following aspects; Bookkeeping, Petty Cash, Office Procedure and general accounting principles and procedures. It further addresses office design and management. In addition, implementation, evaluation and maintenance of the process of work within an organization or office for the maintenance and improvement of efficiency and productivity are also addressed.

DPLS 203: Paralegal Ethics
The module covers rules of professional conduct for paralegals. It explores paralegal ethics, obligations and ethical dilemmas common in paralegal work. Students are equipped with the ability to determine whether an action may be an ethical violation or not. It also covers holding out issues, permitted activities, prohibited activities and possible sanctions. This module emphasises the fact that paralegals are not legal practitioners and should not do the work of legal practitioners. Their roles are confined to referrals to legal practitioners.

DPLS 204: Research Project
The module equips students with the development of critical analysis and research techniques. It refines the student's analytical skills to practical situations. The student is required to choose and defend a topic validating a gap in the field of paralegal work. The project shall be a legal writing of between 4 000 to 5 000 words.

FACULTY OF SOCIAL SCIENCES

FACULTY REGULATIONS FOR UNDERGRADUATE AND POSTGRADUATE PROGRAMMES

1. INTRODUCTION

1.1 These regulations shall be read in conjunction with the University's General Academic Regulations for Undergraduate and Postgraduate programmes, hereinafter referred to as the General Regulations, which have precedence over the Faculty Regulations. These regulations apply only to students registered for undergraduate and postgraduate programsin the Faculty of Social Sciences. The University shall be the examining authority for all programmes offered in the Faculty.

1.2 The Faculty of Social Sciences offers the following undergraduate programmes of study:
Certificate in Social Work (CSW)
Undergraduate Diploma in Social Work (UDSWK)
Bachelor of Science Honours Degree in Behavioural Psychology (HBP)
Bachelor of Science Honours Degree in Counselling Psychology (HCP)
Bachelor of Science Honours Degree in Developmental Psychology (HDP)
Bachelor of Science Honours Degree in Health Psychology (HHP)
Bachelor of Science Honours Degree in Organizational and Industrial Psychology (HOIP)
Bachelor of Science Honours Degree in Sociology (SOC)
Bachelor of Science Honours Degree in Sociology and Social Policy (SOSP)
Bachelor of Science Honours Degree in Anthropology (ANTH)
Bachelor of Science Honours Degree in Migration and Population Movements (MPM)
Bachelor of Science Honours Degree in Industrial Sociology (INDSO)
Bachelor of Science Honours Degree in Geography and Environmental Sustainability (GSE)
Bachelor of Science Honours Degree in Environmental Safety, Health and Quality Management (ESH)
Bachelor of Science Honours Degree in Environmental Disaster Risk Management and Resilience Building (GDR)
Bachelor of Science Honours Degree in Local Governance and Management (LGM)
Bachelor of Science Honours Degree in Public Management and Governance (HPMG)
Bachelor of Science Honours Degree in Political Science and Governance (HPSG)
Bachelor of Science Honours Degree in Human Resource Management (HHRM)
Bachelor of Science Honours Degree in Music Business, Musicology and Technology (MBMT)
Bachelor of Science Honours Degree in Peace and Security Studies (HPSS)
Bachelor of Science Honours Degree in Peace, Leadership and Governance (HPLG)
Bachelor of Science Honours Degree in Peace, Human Rights and Social Justice (HPHS)
Bachelor of Science Honours Degree in Social Work (SWK)

1.2.1 Regulations for Certificates and Undergraduate Diploma - refer to General Academic Regulations for Certificates and Diplomas (Section 6 of Academic Regulations).

1.3 The Faculty of Social Sciences offers the following postgraduate programs of study:
Postgraduate Diploma in Safety, Health and Environmental Management (DGES)
Postgraduate Diploma in Local Governance Management (PGDLGM)
Post Graduate Diploma in Project Planning and Management (DPPM)
Post Graduate Diploma in Public Management and Leadership (DPML)
Post Graduate Diploma in International Relations (DIR)

Post Graduate Diploma in Human Resource Management (DHRM)
Post Graduate Diploma in Humanitarian Emergency and Disaster Risk Management (DHEDM)
Postgraduate Diploma in Peacekeeping and Conflict Resolution (DPCR)
Postgraduate Diploma in Disability Studies (PDDS)
Postgraduate Diploma in Social Work (DSWK)
Master of Science Degree in Clinical Psychology (MCLIP)
Master of Science Degree in Community Psychology (MCP)
Master of Science Degree in Forensic Psychology and Criminology (MFPC)
Master of Science Degree in Organisational and Industrial Psychology (MOIP)
Master of Science Degree in Sociology and Social Anthropology (DPS)
Master of Science in Migration, Citizenship and Refugee Protection (MCRP)
Master of Science Degree in Demography and Population Studies (DPS)
Master of Science Degree in Social Research, Social Policy and Innovation (MSR)
Master of Science Degree in Safety, Health and Environmental Management (MSHE)
Master of Science Degree in Environmental Sustainability (MES)
Master of Science Degree in Geography (MGEO)
Master of Science in Local Governance Studies (MLGS)
Master of Science Degree in International Relations (MSIR)
Master of Science Degree in Public Management and Leadership (MPML)
Master of Science Degree in Human Resource Management (MHRM) Master of Science Degree in Human Capital Development (MHCD) Master of Science Degree in Music (MAM)
Master of Science Degree in Peace and Gender (MPGS)
Master of Science Degree in Global Peace and Security (MGPSS)
Master of Science Degree in Peace, Security and Development (MPSD) Master of Science Degree in Social Work (MSW)

1.4 Regulations for Post-Graduate - refer to General Academic Regulations for Post-Graduate diplomas and Taught Masters Degrees, Master of Philosophy degrees and Doctor of Philosophy Degrees.

2. ENTRY REQUIREMENTS

2.1 To qualify for admission to an undergraduate degree programme in the Faculty of Social Science a student must satisfy the general entry requirements as specified in the General Regulation and the specific Department Regulations.

2.2.1 Eligibility for admissions will be established by satisfying the said regulations and requirements of respective departments, but eligibility will not guarantee admission. A high-level pass in the specified subjects is necessary, and students with prior experience plus relevant passes may normally have an advantage in admission.

2.2 Special and Mature Entry

Refer to Sections 3.2 and 3.3 of the General Regulations.

3. DEFINITION OF TERMS

Refer to Section 1.7 of the General Regulations.

4. GENERAL PROVISIONS

4.1 The number of modules taken by any student from outside the department may be restricted.

4.2 The offering of elective modules depends on the availability of staff and/or teaching loads of available staff.

4.3 During Work- Related learning, the department may transfer a student from one department to the other.

4.4 The department may use its discretion to deploy students to specific organizations for Work-Related Learning thereby overriding students' preferences and personal arrangements.

5. CONTINUOUS ASSESSMENT

5.1 The continuous assessment per module shall account for 40% of the overall assessment.

5.2 Examinations

5.2.1 Examinations for the modules shall be set and marked by lecturers ofthe University in consultation, where feasible, with external examiners from appropriate universities and institutions.

5.2.2 To be admitted to the examination, a candidate must

5.2.2.1 be registered as a student in accordance with the General Regulations.

5.2.2.2 have satisfactorily covered modules of which at least 60% of them must be offered in the respective Honours degreeprogram they are registered.

6. PROVISION FOR PROGRESSION

6.1 Students shall earn at least three modules and below per level to be allowed to progress to the next level.

6.2 Students carrying over modules will be re-examined at the next regularly scheduledexaminations normally taken at the next semester examinations.

6.3 To successfully complete the programme, a student must have earned at least 480 credits.

7. FAILURE TO SATISFY EXAMINERS

Refer to Section 11 of the General Regulations.

8. WORK-RELATED LEARNING

Refer to Section 12 of the General Regulations.

9. REMARKING OF EXAMINATIONS

Refer to section 13.10 of the General Regulations.

10. GRADING AND DEGREE CLASSIFICATION

10.1 To be awarded the degree a student must pass all core modules at all levels.

10.2 The classification of all modules and degree programmes shall be as stated in section 5 of the General Regulations.

11. DEGREE WEIGHTING

11.1 All academic levels shall be considered for purposes of degree weighting.

The classification of weights is as follows:

Level 1	10%
Level 2	20%
Level 3	30%
Level 4	40%

1.1 Visiting School Degree Weighting

Level 1	10%
Level 2	50%
Level 3	40%

DEPARTMENT OF APPLIED PSYCHOLOGY

REGULATIONS FOR THE BACHELOR OF SCIENCE HONOURS DEGREE IN BEHAVIOURAL PSYCHOLOGY (HBP)

Duration:	4 years: Normal entry 3 years: Special/Mature entry
Actual Credit Load:	492
Minimum Credit Load:	480
Maximum Credit Load:	540
Maximum MBKs Credit Load:	408
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

- To inculcate in students the ability to demonstrate a sound knowledge of psychological theories, research methods and applications.
- To instil in students the ability for critical thinking required to apply psychological theories and methods in addressing behavioural problems.
- To capacitate students to apply psychological skills and techniques to a variety of dysfunctional behaviours.
- To produce graduates who are ethically and socially responsible.
- To mould and produce graduates who can effectively write, present, and effectively communicate research findings to others.

2.0 ENTRY REQUIREMENTS

For all pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better

Normal Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a minimum of any 2 "A" Level passes or relevant National Certificate

Special Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a professional qualification such as a Diploma in a Psychology-related field in which candidates must be employed

Mature Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better. Candidates must be at least 25 years of age and have a minimum of 3 years of working experience in a Psychology-related field in which they must be employed.

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Behavioural Psychology; Psychology Theories and Models; Assessment, evaluation and respective interventions for dysfunctional behaviours in diverse life settings
- Special focus: Behavioural Psychology, with special emphasis on theory-based research used to describe, explain, predict, modify and/or promote human behaviour and mental processes
- Orientation: Applied scientific model premised on the student-centred approach to the assessment of the nature and extent of human psychosocial challenges, and to the designing and implementation of appropriate interventions
- Distinctive features: The programme builds in students the research-technology-innovation management continuum and focuses on knowledge, skills and application development used to alleviate/terminate dynamic and contemporary human behavioural issues

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers :

- Counsellors, Educators, Juvenile correctional/rehabilitation centres, social workers, community development practitioners, motivational speakers
- Human and social services in settings including academia, clinical, occupational, environmental, sports, and community psychology; Public/government and private/ non-governmental institutions requiring psychological services

Further Education: Master's programmes in Behavioural Psychology specialty areas; Postgraduate studies in the Psychology special area

5. PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, role-plays, field visits/trips, individual and seminar/group presentations, independent study, active research
- **Assessment and Evaluation Methods**: Written assignments, presentations, tests, research projects, work-related learning reports, and end-of-semester examinations

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to:

- Apply acquired research skills and engage in innovative problem-solving research that addresses behavioural problems.
- Develop and apply interpersonal skills to different contexts.
- Utilise imparted behaviour change skills for the betterment of self and others.
- Understand and differentiate age-related behavioural problems.
- Understand concepts and overarching theories in Behavioural Psychology.
- Explain, evaluate and predict human behaviour and mental processes.
- Work with clients, supervisors and supervisees in line with values and rules of professional conduct for Behavioural Psychologists.
- Work effectively as an individual, in teams and in multidisciplinary environments.

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations

8.0 PROGRAMME ASSESSMENT

Continuous Assessment Work: It constitutes 40% of the final mark and comprises: Written assignments, workshop reports, institutional placement reports, seminar and group presentations, role-plays, field visits reports, in-class tests, and any other relevant assessments.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

Other:

- Dissertation is assessed on the basis of a research project (75%) and an oral presentation (25%).
- Work Related Learning is assessed based on a student's Industrial placement report (30%), assessment by work supervisor (40%) and assessment by academic supervisor (30%).

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

HBP 131 History of Behavioral Psychology

The module equips students with the knowledge to be able to trace the philosophical foundations of Behavioural Psychology to the present state of the discipline. Changes through the different perspectives are driven by the battle over what (subject) and how (methods) the content should be studied are highlighted as well as the prominent associated personalities.

PSY 132 Introduction to Psychology

The module introduces students to the richness and diversity of Psychology's fundamental principles, theories, concepts and findings, and equips them with tools necessary for the study of human behaviour and mental processes. Major domains of Psychology as a discipline are also explored on the basis of classic studies, and of current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

PSY 133 Introduction to Social Psychology
The module covers the nature and causes of individual/group behaviour and thought processes in social settings; the way people think about, feel, and behave, and how they influence and are influenced by others; perspectives, empirical research methods, findings; impression-formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping, prejudice; analysis of theory and research in Social Psychology.

HCS 135 Introduction to Information Technology

Refer to the Department of Information Systems.

CS 131 Communication Skills

Refer to the Department of Communication Skills.

HBP 132 Behavioural Gerontology
This module examines associated professional and research issues. The focus is on the utilization of Applied Behavior Analysis (ABA); behavioural analyses of older adults, who have multiple diagnoses; assessment techniques and best practices to facilitate behaviour change in older adults; addressing societal needs for behavioural analysis services and considering advanced professional issues in this area.

HBP 133 Behavior Theory in Practise
This module introduces measures of behavior and data collection procedures used in Applied Behavior Analysis (ABA). Concepts covered are: skills for selecting, defining, observing, measuring, recording and compiling observed and background information about behaviour to support behavior change strategies; schedules of reinforcement and punishment.

HBP 134 Forensic Behavioural Science

This module explores the interdisciplinary nature of Forensic Behavioural Science as an emerging field at the interface of the human services and criminal justice systems. It also examines possible risk and preventive factors that underlie criminal behavior; challenges faced by people with disabilities in correctional systems; utilization of Applied Behavioural Analysis (ABA) in law enforcement and in the prevention of criminal behavior tendencies.

PSY 135 Psychology Concepts, Methods and Applications
This module builds on the Introduction to Psychology module. Covered concepts, theories and methods augment the central themes and controversies of the discipline acquired earlier. This provides students with an understanding of the human mind and behaviour. Also examined are the psychodynamic perspective, humanism, post-modernism, personality, intelligence, and mental and behavioural issues. In workshop teams, students debate on raised issues.

PSY 136 Contemporary and Applied Social Psychology
The module focuses on challenges addressed by Social Psychology. Topics include attitudes and attitude change; prejudice, discrimination; aggression, conflict, conflict resolution; group behaviour; Social Psychology in politics, law and health; tendency to conform to social norms; Applied studies; application of Social Psychology basic principles to find, understand, interpret and use more specialized, and applied research findings.

PSY 231 Psychobiology
The module is on how biological processes influence human behaviour and mental functioning. It equips students with knowledge of genetics and the role of various body systems such as the nervous and endocrine systems in behaviour; the organisation, function and role of homeostatic organs in behaviour; and the human anatomy in explaining behaviours.

PSY 233 Principles of Learning
The module focuses on students' mastery of critical and creative thinking. topics include principles of learning, conditioning, motivation, memory, and associated neurobiological mechanisms; integration of principles with a socio-psychobiological context to explain and analyse (ab)normal behaviour; appropriate terminology used in explaining how the principles were arrived at from experimental studies.

PSY 234 Introduction to Research Methods and Statistics
The module introduces students to qualitative and quantitative paradigms/approaches and to respective methods. It allows students to demonstrate an understanding of the use of statistical tables and formulae in analysing and interpreting research data. It also exposes students to the association of variables, regression and prediction, statistical inferences and hypothesis-testing, Chi-square (x2) and analysis of variance (ANOVA).

GSSS 201 Gender Studies for Social Sciences

This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help

students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself

ENT 235 Entrepreneurship

Refer to the Department of Entrepreneurship

HBP 231 Mediation and Negotiation Strategies
The module focuses on the use of alternative dispute resolution processes which have rapidly increased in both public and private sectors as a less formal, cost-effective strategy to resolve problems, improve working relationships, and enhance productivity. Emphasis is on behaviour patterns that characterize conflicts; the need for behaviour change; Theory and practice of mediation, focusing on practical problem-solving and negotiation skills.

HCP 232 Childhood, Adolescence and Adulthood Development
The module provides knowledge on developmental theories and age-related changes in the human lifespan. Emphasis is on holistic development in all developmental domains; Effects of attachment patterns and parenting styles on behavioural outcomes, and children's rights; Effects of body changes, peer relationships, and initiations in adolescence; Theories of career choices; Midlife crises; Theories of ageing, developmental challenges and old age home life.

PSY 238 Personality

This module covers Personality and Motivation theories for students to gain an appreciation of approaches that can be considered in conceptualising personalities. Topics covered include An overview of Personality Psychology; Basic assumptions of human nature; and perspectives of personality, including the psychodynamic, dispositional, learning, behavioural and the humanistic-existential perspectives.

PSY 239 Cognitive Psychology

The module provides students with an understanding of how humans organize and interpret information to produce a conscious experience of objects, events, situations and people. Topics include perception, attention, accommodation, assimilation, information processing, memory, language and thought processes.
The module also explores ways by which cognition is utilised by humans in an attempt to ensure continued survival.

PSY 240 Ethics and Professional Practice

Students are oriented on: professional psychological assessment and psychotherapist identity; ethical, legal and professional codes of conduct; the Health Professions Act Chapter 27: 19 and the requisite Mandate; safe, acceptable practice; professional issues associated with risk in working with clients in diverse settings/circumstances; individual and team-based service models; communication and implications on practice; intern supervisee-supervisor relationships.

HBP330 Work-Related Learning Placement Report

The student will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HBP 331, HBP 332, HBP 333: Work-Related Learning

During the 2 semesters, students are placed in organisations/institutions/companies/(non)- governments, among other placements, to gain the requisite practical experience. The exposure prepares students for professional socialisation while they also benefit from the provision for mechanisms of situated cognition.

HBP 431 Multi-Dysfunctional Behaviours

The module gives an overview of behaviours that are deemed dysfunctional in various settings. Explanations are given of what makes such behaviours dysfunctional by considering how they negatively impact the individuals themselves as well as on others around them. Behaviour change promotes everyone's general well-being and productivity.

HBP 432 Perception and Action
The module exposes students to the influence of one's perception of their surroundings on dysfunctional behaviour. Focus is on the involvement of one's past experiences, environmental cues/triggers, and genetic, hormonal and functional systems. Concepts covered include the examination of the interface/relationship between social learning, neurology and psychiatry and their effect to their effects on brain lesions, trauma, toxicology and various mental under-developments.

PSY 432 Psychometrics

The module provides students with a grounding in the comprehension and application of psychometric tests, related theories, the nature and essence of psychometrics, test construction and use, and enhancement of effectiveness. Topics covered are methods of observing and measuring human behaviour; psychometric assessment methods and practice; testing principles of validity, reliability, standardization and on adopting/ adapting tests.

PSY 434 Educational Psychology
The module covers themes on general and specific learning, and socio-emotional difficulties in educational settings. It illustrates and integrates problems of learners with disabilities with the use of respective special teaching-learning methods. Also covered are case studies, surveys and consultations with education specialists, rehabilitation workers and other relevant pedagogy. Learners covered in this module range from kindergarten up to university students.

PSY 435 Health Psychology

This is an introduction to Health Psychology which examines the psychosocial impact of health, illness, and disability on individuals/family/society. Topics covered are the biopsychosocial approach to Health Psychology; health beliefs, attitudes and behaviour; patient-practitioner relationships; chronic and terminal illnesses; health promotion in local cultural contexts, on policy and health-provision in Zimbabwe; planning and evaluating interventions.

PSY 438 Principles of Psychotherapy

The module acquaints students with major approaches, namely the psychoanalytic, Adlerian, person-centred, rational-emotive, humanistic, and behavioural. It also explores: current issues/practices in psychotherapy, emotional, relational, behavioural and cognitive mechanisms of change, and empirical evidence for psycho-therapeutic processes; emotion regulation, cultural competency, therapeutic boundaries, principles, philosophy, tenets of the approaches, and therapist self-care.

PSY 439 Contemporary Critical Psychology

The module examines the implications of debates between mainstream and critical approaches to Psychology; philosophical foundations from Foucault and the analysis of bio-power, Derrida on deconstruction and Mbembe and the post-colony. Implications of the challenges are examined in relation to Mkhize, Burman and Gergen, and others. Attention is on relationships between critical theory and qualitative research methodologies in Health Psychology.

HBP 433 Lifestyle Behaviour Change

The module covers the relationship between lifestyle behaviours and health; application of Psychology to understanding choices of lifestyles which result in dysfunctional behaviours; use of Health Psychology Models in the prediction and change of negative lifestyle behaviours.

HBP 434 Evolution of Behaviour and Cognition

The module builds students' knowledge of the background in behaviour evolutionary processes and analyses. Topics covered includeevolution of behaviour, which forms the basis for current and/or future behaviours; analysis of comparative approaches to behavioural ecology, Evolutionary Psychology and behavioural change.

HBP 435 Dissertation
Students identify psychosocial problems and conduct research to address them. They apply previously taught research concepts and statistical skills, conceptualize ideas, review relevant literature, use appropriate methods/tools, collect, present, analyse and interpret data from which they draw conclusions and suggest recommendations. Under the guidance of a lecturer in the Department, students pursue a study on a relevant topic of their interest.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN COUNSELLING PSYCHOLOGY (HCP)

Duration:	4 years: Normal entry
	3 years: Special/Mature entry
Actual Credit Load:	492
Minimum Credit Load:	480
Maximum Credit Load:	540
Maximum MBKs Credit Load:	408
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

- To capacitate students with the requisite skills and techniques required in the profession of Counselling Psychology.
- To produce graduates who can effectively offer counselling services to clients with diverse psycho-social challenges.
- To instil in students the ability to promote a sense of general wellbeing of individuals and groups through making accurate assessments, and offering appropriate counselling skills and techniques.
- To produce graduates who can create positive relationships with clients and others in the helping profession.
- To instil in students the ability for critical thinking required to apply theories of counselling and methods in addressing psychosocial problems.
- To produce graduates who are ethically and socially responsible.
- To mould and produce graduates who can effectively independently conduct research, write, present, and communicate findings to others.
- To increase the provision of mental health services by equipping graduates with skills which prepare them to later open/operate counselling centres in schools and communities.
- To facilitate placement of graduates with university-linked industrial parks.

2.0 ENTRY REQUIREMENTS

For all pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better.

Normal Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better, plus a minimum of any 2 "A" Level passes or relevant National Certificate.
Special Entry: A relevant certificate/diploma in line with ZNQF.

Mature Entry: At least 5 'O' Level passes including English Language, Mathematics and a relevant Science subject at Grade C or better. Candidates must be at least 25 years of age and have a minimum of 3 years of working experience in a Psychology-related field in which they must be employed. Be a holder of a relevant professional certificate.

3.0PROGRAMME CHARACTERISTICS

- Areas of study: Counselling Psychology theories/approaches, skills and techniques.
- Special focus: Counselling Psychology, with special emphasis on evidence-based research and practice to alleviate diverse psychosocial issues/problems.
- Orientation: Applied Scientist-Practitioner Model and philosophy premised on the student-centred approach to the assessment of the nature and extent of human psychosocial challenges and to the effective application of appropriate counselling skills and techniques.
- Distinctive features: The programme builds in students the research-technology-innovation management continuum and focuses on knowledge, skills and application development used to alleviate/terminate dynamic and contemporary human psychosocial issues

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers: Academic counsellors, Career counsellors, Marriage and family counsellors, Mental health counsellors, Substance abuse counsellors, Child and adolescents Counsellors, Grief counsellors, and Rehabilitation Counsellors.

Further Education: Master's programmes in Counselling Psychology; Postgraduate studies in Counselling Psychology

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, role-plays, field visits/trips,

individual and seminar/group presentations, independent study, active research

- **Assessment and Evaluation Methods**: Written assignments, presentations, tests, research projects, work-related learning reports, and end-of-semester examinations

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to :

- Demonstrate skills, techniques and knowledge of, and competence in the use of psychological theories to inform practice in Counselling.
- Be culturally sensitive by applying diverse theory-based and appropriate practical skills and techniques to clients from various social settings/walks of life, of various demographics and with diverse cultural backgrounds.
- Make accurate assessments of clients' psychosocial problems so as to facilitate appropriate behaviour change by promoting their decision-making processes and enhancing their effectiveness, potential and ability to cope.
- Work effectively as individuals, with clients, in teams and in multi-disciplinary environments to create positive/productive interpersonal relationships in the helping profession.
- Utilise innovative evidence-based practices.
- Uphold professional codes of conduct and ethics in Counselling Psychology for the betterment of self and others.
- Conduct action research in multi-cultural settings and effectively write, present, utilise and communicate findings to others.
- Register as professional counsellors who can open and operate counselling centres for example in schools and communities.
- Utilise university-linked industrial parks to expand knowledge/skills/techniquesin Counselling.

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations

8.0 PROGRAMME ASSESSMENT

Continuous Assessment Work: It constitutes 40% of the final mark and comprises Written assignments, workshop reports, institutional placement reports, seminar and group presentations, role-plays, field visits reports, in-class tests, and any other relevant assessments.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

Other:

- Dissertation is assessed on the basis of a research project (75%) and an oral presentation (25%).
- Work Related Learning is assessed based on a student's institutional placement report (30%), assessment by work supervisor (30%) and assessment by academic supervisor (20%).
- Work Related Learning 3.1 is assessed based on work work-related learning placement report (40%).

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

14.0 MODULE SYNOPSES

HCP 131 Introduction to Counselling Psychology
The module introduces students to Counselling Psychology as a broad and diverse discipline within mental health care. The requisite key concepts prepare them to facilitate personal and interpersonal functioning across the human life span. Students' attention is also drawn to diverse issues that require counselling and these are inclusive of emotional, social, vocational, educational, health-related, developmental, and organisational concerns.

PSY 132 Introduction to Psychology
The module introduces students to the richness and diversity of Psychology's fundamental principles, theories, concepts and findings, and equips them with tools necessary for the study of human behaviour and mental processes. Major domains of Psychology as a discipline are also explored on the basis of classic studies, and of current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

PSY 133 Introduction to Social Psychology

The module covers: the nature and causes of individual/group behaviour and thought processes in social settings; The way people think about, feel, and behave, and how they influence and are influenced by others; perspectives, empirical research methods, and findings; Impression-formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping, prejudice; analysis of theory and research in Social Psychology.

HCS 135 Introduction to Information Technology

Refer to the Department of Information Systems.

CS 131 Communication Skills

Refer to the Department of Communication Skills.

HCP 132 Multicultural Issues in Counselling
This module characterizes the counselling practice that offers effective interventions to culturally diverse clients/contexts regarding race, ethnicity, and culture all of which influence one's identity, mental health, relational and personal issues and life circumstances. Other related factors of mental health are gender and gender identity, sexual orientation, age, socioeconomic status, disability, special populations, the marginalised and religion. The module grooms students to be culturally- competent counsellors.

HCP 133 Selected Theories in Counselling
The module introduces students to theories in counselling and their applicability to various psychosocial issues and populations. Topics covered include theories considered are psychoanalytic, behavioural, humanistic and cognitive; assumptions of the theories and their relevance in counselling; theory-driven practice; analyses of the theories to help determine appropriate ones for various problems and the eclectic approach.

PSY 135 Psychology Concepts, Methods and Applications
This module builds on the Introduction to Psychology module. Covered concepts, theories and methods augment the central themes and controversies of the discipline acquired earlier. This provides students with an understanding of the human mind and behaviour. Also examined are the psychodynamic perspective, humanism, post-modernism, personality, intelligence, and mental and behavioural issues. In workshop teams, students debate on raised issues.

PSY 136 Contemporary and Applied Social Psychology
The module focuses on challenges addressed by Social Psychology. Topics include ttitudes and attitude change; prejudice, discrimination; aggression, conflict, conflict resolution; group behaviour; Social Psychology in politics, law and health; tendency to conform to social norms; applied studies; application of Social Psychology basic principles to find, and understand, interpret and use more specialized, and applied research findings.

PSY 137 Psychology of Counselling
This module provides an overview of Counselling with emphasis on the need, role, qualities, relationship-building and ethical practice. Students are introduced to counselling and therapeutic theories, focusing on their tenets and applicability to child adolescence, couples, careers, drug abuse, couples and special populations. They analyse role-plays and explore counselling skills, techniques and process models that guide counselling.

PSY 231 Psychobiology
The module is on how biological processes influence human behaviour and mental functioning. It equips students with knowledge genetics and the role of various body systems such as the nervous and endocrine systems in behaviour; the organisation, function and role of homeostatic organs in behaviour; and the human anatomy in explaining behaviours.

PSY 233 Principles of Learning
The module focuses on students' mastery of critical and creative thinking. Topics include principles of learning, conditioning, motivation, memory, and associated neurobiological mechanisms; integration of principles with a socio-psychobiological context to explain and analyse (ab) normal behaviour; appropriate terminology used in explaining how the principles were arrived at from experimental studies.

PSY 234 Introduction to Research Methods and Statistics
The module introduces students to qualitative and quantitative paradigms/approaches and to respective methods. It gives students an opportunity to demonstrate an understanding of the use of statistical tables and formulae in analysing and interpreting research data. It also exposes students to the association of variables, regression and prediction, statistical inferences and hypothesis-testing, Chi-square (x2) and analysis of variance (ANOVA).

GSSS 201 Gender Studies for Social Sciences
This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help

students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ENT 235 Entrepreneurship

Refer to the Department of Entrepreneurship

HCP 231 Practicum
The module provides an opportunity for students to observe counselling sessions conducted by professional/qualified counsellors, who mentor them by conducting counselling sessions in their presence. In this way, students have a feel and an appreciation of the counselling process. On the basis of their observations, students produce a portfolio/report at the end of the semester following the given guidelines.

HCP 232 Childhood, Adolescence and Adulthood Development
The module provides knowledge on developmental theories and age-related changes in the human lifespan. Emphasis is on holistic development in all developmental domains; effects of attachment patterns and parenting styles on behavioural outcomes, and children's rights; effects of body changes, peer relationships, and initiations in adolescence; theories of career choices; midlife crises; theories of ageing, developmental challenges and old age home life.

PSY 238 Personality
This module covers personality and motivation theories for students to gain an appreciation of approaches that can be considered in conceptualising personalities. Topics covered include an overview of Personality Psychology; basic assumptions of human nature; perspectives of personality, including the psychodynamic, dispositional, learning, behavioural and the humanistic-existential perspectives.

PSY 239 Cognitive Psychology
The module provides students with an understanding of how humans organize and interpret information to produce a conscious experience of objects, events, situations and people. Topics include: Perception, attention, accommodation, assimilation, information processing, memory, language and thought processes. The module also explores ways by which cognition is utilised by humans in an attempt to ensure continued survival.

PSY 240 Ethics and Professional Practice

Students are oriented on: Professional Psychological Assessment and Psychotherapist identity; Ethical, legal and professional codes of conduct; The Health Professions Act Chapter 27: 19 and the requisite Mandate; Safe, acceptable practice; Professional issues associated with risk in working with clients in diverse settings/circumstances; Individual and team-based service models; Communication and implications on practice; Intern supervisee-supervisor relationships.

HCP330 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HCP331 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HCP332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HCP333 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

PSY 431 Psychopathology
This is a study of mental disorders. Concepts covered include the scientific study of the disorders, with a focus on their genetic, biological, psychological, and social causes, and respective symptoms. Students analyse symptoms to correctly classify the disorders so as to prescribe appropriate interventions.

PSY 432 Psychometrics
The module provides students with a grounding in the comprehension and application of psychometric tests, related theories, the nature and essence of psychometrics, test construction and use, and enhancement of effectiveness. Topics covered are methods of observing and measuring human behaviour; psychometric assessment methods and practice; testing principles of validity, reliability, standardization and on adopting/ adapting tests.

PSY 434 Educational Psychology
The module covers themes on general and specific learning, and socio-emotional difficulties in educational settings. It illustrates and integrates problems of learners with disabilities with the use of respective special teaching-learning methods. Also covered are case studies, surveys and consultations with education specialists, rehabilitation workers and other relevant pedagogy. Learners covered in this module range from kindergarten up to university students.

PSY 435 Health Psychology
This is an introduction to Health Psychology which examines the psychosocial impact of health, illness, and disability on individuals/family/society. Topics covered are the biopsychosocial approach to Health Psychology; Health beliefs, attitudes and behaviour; Patient-practitioner relationships; Chronic and terminal illnesses; Health promotion in local cultural contexts, on policy and health-provision in Zimbabwe; Planning and evaluating interventions.

PSY 436 Neuropsychology
The module exposes students to the anatomy, physiology and biology of the central nervous system which underlies human behaviour and mental processes. Topics covered include: Genetic, hormonal and functional systems; Examination of the interface between Psychology, Neurology and Psychiatry in relation to the psychological effects of brain lesions, trauma, toxicology and various forms of mental under-development

HCP 431 Gender Issues in Counselling
The module explores gender-related issues and the required counsellor sensitivity. An analysis of local perceptions on the meaning of gender is given to bring students into the appropriate context of counselling, poverty, research and other issues such as HIV/AIDS. Topics covered includemplications of gender issues e. g. stereotyping, socialization and imbalances; their impact; evaluation of theories on gender; gender configuration, and mitigation; analysis of gender mainstreaming.

HCP 432 Lifespan Development Counselling
The module is on theory-based counselling across the human lifespan. It builds on concepts previously covered in the module Childhood, Adolescence and Adulthood Development to enable age-appropriate counselling. The aim is to promote effective counselling.

PSY 438 Principles of Psychotherapy
The module acquaints students with major approaches, namely the Psychoanalytic, Adlerian, Person-centred, Rational-emotive, Humanistic, and Behavioural. It also explores: Current issues/practices in psychotherapy, emotional, relational, behavioural and cognitive mechanisms of change, and empirical evidence for psycho-therapeutic processes; Emotion regulation, cultural competency, therapeutic boundaries, principles, philosophy, tenets of the approaches, and therapist self-care

PSY 439 Contemporary-Critical Psychology
The module examines the implications of debates between mainstream and critical approaches to psychology; philosophical foundations from Foucault and the analysis of bio-power, Derrida on deconstruction and Mbembe and the post-colony. Implications of the challenges are examined in relation to Mkhize, Burman and Gergen, and others. Attention is on relationships between critical theory and qualitative research methodologies in Health Psychology.

HCP 433 Dissertation
Students identify psychosocial problems and conduct research to address them. They apply previously taught research concepts and statistical skills, conceptualize ideas, review relevant literature, use appropriate methods/tools, collect, present, analyse and interpret data from which they draw conclusions and suggest recommendations. Under the guidance of a lecturer in the Department, students pursue a study on a relevant topic of their interest.

REGULATIONS FOR THE BACHELOR OF SCIENCE HONOURS DEGREE IN

DEVELOPMENTAL PSYCHOLOGY (HDP)

Duration: 4 years: Normal entry

3 years: Special/Mature entry

Actual Credit Load: 492
Minimum Credit Load : 480
Maximum Credit Load 540
Maximum MBKs Credit Load : 408
ZNQF Level: 8

1.0 PURPOSE OF THE PROGRAM

- To produce graduates who can analyse and apply appropriate theories and principles underlying Developmental Psychology.
- To inculcate in students the ability to demonstrate a sound knowledge base of the human life span developmental changes.
- To promote human developmental milestones by taking advantage of differences and similarities between individuals/groups.
- To capacitate students to apply psychological knowledge to diverse entities of the human lifespan developmental stages at the individual level and the broader community at large.
- To produce well-rounded graduates who are ethically and socially responsible.
- To instil in students the ability for critical thinking required to apply Developmental Psychology theories and methods in addressing abnormal developmental changes.
- To mould and produce graduates who can effectively write and present research work, and communicate findings to others.
- To equip graduates with national critical skills which promote healthy developmental milestones.
- To introduce and/or increase the provision of services on positive human development by equipping graduates with skills that enable them to later open/operate the requisite centres in educational institutions and communities.
- To facilitate placement of graduates in university-linked industrial parks for them to generate innovative ideas for human development.

2.0 ENTRY REQUIREMENTS

For all pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better

Normal Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a minimum of any 2 "A" Level passes or relevant National Certificate.

Special Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a professional qualification such as a Diploma in a Psychology-related field in which candidates must be employed.

Mature Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better.
Candidates must be at least 25 years of age and have a minimum of 3 years of working experience in a Psychology-related field in which they must be employed.

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Developmental Psychology; Assessment, evaluation and respective interventions for developmental pathologies/ challenges.
- Special focus: Developmental Psychology theories, with emphasis on developmental milestones, changes and/or associated challenges with (non-)normative developments in foetuses, neonates/infants, children, adolescents, young adults, the middle-aged and the elderly.
- Orientation: Applied scientific model premised on the student-centred approach to the assessment of the nature and extent of human developmental changes and/or associated challenges, and to the designing and implementation of appropriate interventions.
- Distinctive features: The programme builds in students the research technology-innovation management continuum and focuses on knowledge, skills and application development used to alleviate/terminate dynamic and contemporary human development psychological issues across the human lifespan.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION:

Careers: Mainstream and special education; Social welfare; Speech and language therapists;

Counselling; Preventative and protective practitioners on adverse developmental issues

Further Education: Master's programmes and Postgraduate studies in Developmental Psychology specialty areas

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, role-plays, field visits/trips, individual and seminar/group presentations, independent study, active research. For students accepted on mature/special entry i. e. Visiting/Block, lectures will be delivered in 2 blocks of 2 weeks and 1 week.
- **Assessment and Evaluation Methods**: Written assignments, presentations, tests, research projects, work-related learning reports, and end-of-semester examinations

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to :

- Explain normative changes in the human lifespan developmental stages so as to identify the abnormal and appropriately intervene
- Utilise their understanding of the role and interaction of biological and environmental influences on development
- Manipulate environmental factors to promote human development such as in alleviating the effects of drought, and poverty reduction for improved food security and nutrition.
- Analyse human lifespan perspectives of development and evaluate evidence/ideas of competing developmental theories so as to appreciate the use of the eclectic approach
- Work with clients, supervisors and supervisees in line with ethical values and rules of professional conduct for Psychologists.
- Work effectively and efficiently as an individual, in teams and at multidimensional and multidisciplinary levels and environments.
- Demonstrate national critical skills which promote healthy developmental milestones
- Demonstrate human developmental expertise which enables them to register as professional Developmental Psychologists who centres for positive human development centres in educational institutions and communities
- Participate in/contribute to university-linked industrial parks by generating innovative ideas on positive human developmental milestones

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations

8.0PROGRAMME ASSESSMENT

8.1 Continuous Assessment Work: It constitutes 40% of the final mark and is comprised of:

- Written assignments; workshop reports; mainstream/special education institutions, social welfare institutions, and/or institutional placement reports; seminar and group presentations; role-plays; field visits reports; in-class tests; and any other relevant assessments.

8.2 Written Examinations: End-of-semester examinations constitute 60% of the final mark

8.3 Other:

- Dissertation is assessed on the basis of a research project (75%) and an oral presentation (25%)

- Work Related Learning is assessed based on a student's industrial placement report (30%), assessment by work supervisor (40%) and assessment by academic supervisor (30%).

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

PSY 132 Introduction to Psychology
The module introduces students to the richness and diversity of Psychology's fundamental principles, theories, concepts and findings, and equips them with tools necessary for the study of human behaviour and mental processes. Major domains of Psychology as a discipline are also explored on the basis of classic studies, and of current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

SOC 131 Introduction to Sociology

Refer to the Department of Community Studies.

HDP 131 Introduction to Lifespan Development

The module provides knowledge on developmental theories and to age-related changes in the human lifespan. Emphasis is on holistic development in all developmental domains; effects of attachment patterns and parenting styles on behavioural outcomes, and children's rights; effects of body changes, peer relationships, and initiations in adolescence; theories of career choices; midlife crises; theories of ageing, developmental challenges and old age home life.

HCS 135 Introduction to Information Technology

Refer to the Department of Information Systems.

CS 131 Communication Skills

Refer to the Department of Communication Skills.

HDP 132 Language Development and Communication in Children
The module covers concepts on language acquisition in children. The focus is on theories of language development; primary language specialization centres in the brain; influence of biological and environmental factors; components of language, inclusive of phonology, semantics, syntax, pragmatics and lexicon; age-related stages of language development.

HDP 133 Themes and Theories of Developmental Psychology
The module equips students with concepts on the genetics and heredity of developmental characteristics and abnormalities such as Autism and Down's Syndrome; Description of animal experiments and interpretation of results/findings for inference of implications to development in humans; Continuous and discontinuous development; Analyses of theories of development.

PSY 134 Human Diversity
The module focuses on and celebrates individual differences. Special attention is given to means of managing diversity in different contexts such as workplaces. The module further studies special populations, including the disabled, marginalized, sexually different populations and racial and ethnic groups.

PSY 135 Psychology Concepts, Methods and Applications
This module builds on the Introduction to Psychology module. Covered concepts, theories and methods augment the central themes and controversies of the discipline acquired earlier. This provides students with an understanding of the human mind and behaviour. Also examined are the psychodynamic perspective, humanism, post-modernism, personality, intelligence, and mental and behavioural issues. In workshop teams, students debate on raised issues.

PSY 136 Contemporary and Applied Social Psychology
The module focuses on challenges addressed by Social Psychology. Topics include attitudes and attitude change; prejudice, discrimination; aggression, conflict, conflict resolution; group behaviour; Social Psychology in politics, law and health; tendency to conform to social norms; applied studies; application of Social Psychology basic principles to find, understand, interpret and use more specialized, and applied research findings.

PSY 231 Psychobiology
The module is on how biological processes influence human behaviour and mental functioning. It equips students with knowledge of genetics and the role of various body systems such as the nervous and endocrine systems in behaviour; he organisation, function and role of homeostatic organs in behaviour; and he human anatomy in explaining behaviours.

HDP 231 Infant and Child Development
In this module, students will study contemporary research and theoretical perspectives on the psychological processes which take place from birth to 12 years. The focus will be on aspects of children's development including prenatal development, language and cognition, gender and identity, socio-emotional skills, family, social and cultural contexts.

PSY 234 Introduction to Research Methods and Statistics
The module introduces students to qualitative and quantitative paradigms/approaches and to respective methods. It gives students an opportunity to demonstrate an understanding of the use of statistical tables and formulae in analysing and interpreting research data. It also exposes students to the association of variables, regression and prediction, statistical inferences and hypothesis-testing, Chi-square (x2) and analysis of variance (ANOVA).

GSSS 201 Gender Studies for Social Sciences

This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ENT 235 Entrepreneurship

Refer to the Department of Entrepreneurship

PSY 233 Principles of Learning
The module focuses on students' mastery of critical and creative thinking. Topics include principles of learning, conditioning, motivation, memory, and associated neurobiological mechanisms; integration of principles with a socio-psychobiological context to explain and analyse (ab) normal behaviour; appropriate terminology used in explaining how the principles were arrived at from experimental studies.

HDP 232 Adolescence and Adulthood
The module provides knowledge on developmental theories. For adolescents, the focus is on explanations and effects of body changes, the influence of peer relationships, and initiations into adulthood in the African context. For adulthood, the focus is on theories of career choices in young adulthood; midlife crises and related issues in middle age; theories of ageing, developmental challenges and old age home life for the elderly.

PSY 238 Personality
This module covers Personality and Motivation theories for students to gain an appreciation of approaches that can be considered in conceptualising personalities. Topics covered include an overview of personality psychology; basic assumptions of human nature; perspectives of personality, including the psychodynamic, dispositional, learning, behavioural and the humanistic-existential perspectives.

HDP 233 Psychology in Education
In this module, students will explore how psychological theory and research can be applied to education. Students will develop knowledge of cognitive, developmental and social psychology and apply it to education. They will study theoretical models of learning and consider the connection between psychological research evidence and educational practice. Topics may include educational diversity: typical and atypical learners; intelligence, genetics and education; peer relationships and bullying; mental health in schools; classroom interventions; and the role of educational psychologists.

PSY 240 Ethics and Professional Practice
Students are oriented on professional psychological assessment and psychotherapist identity; ethical, legal and professional codes of conduct; the Health Professions Act Chapter 27: 19 and the requisite Mandate; safe, acceptable practice; professional issues associated with risk in working with clients in diverse settings/circumstances; individual and team-based service models; communication and implications on practice; and intern supervisee-supervisor relationships.

HDP 330 Work-Related Learning Placement Report
The student will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HDP 331, HDP 332, HDP 333: Work-Related Learning

During the 2 semesters, students are placed in organisations/institutions/companies/ (non)- governments, among other placements, to gain the requisite practical experience. The exposure prepares students for professional socialisation while they also benefit from the provision for mechanisms of situated cognition.

HDP 431 Developmental Psychopathology and Clinical Applications
This module exposes the student to the study of mental disorders, their causes, development and treatment. It will develop existing knowledge from previous modules while exploring social and cognitive psychology. Students will also study mental processes such as thinking, memory and emotion. Students will learn how to diagnose, assess, and treat children, adolescents and adults who have developmental disorders. This module gives you the skills to work in community settings with children and adolescents who have diverse psychopathologies.

HDP 431 Disabilities and Development
The module develops in students an understanding of diverse forms of disability and how they influence development. It extends to areas such as exceptionality, giftedness, mental abilities, hearing, vision, physical, speech, and language handicaps, albinism, learning disabilities and those disabilities that come with age or tragic life events. The module further extends into areas of rights and policies, education accommodation and the built environment for persons with disabilities.

PSY 432 Psychometrics
The module provides students with a grounding in the comprehension and application of psychometric tests, related theories, the nature and essence of psychometrics, test construction and use, and enhancement of effectiveness. Topics covered are methods of observing and measuring human behaviour; Psychometric assessment methods and practice; Testing principles of validity, reliability, standardization and adopting/ adapting tests.

HDP 432 Behavioral and Emotional Problems of Children
The module focuses on Abnormal Psychology and atypical development in children and adolescents. Emphasis is on behavioural and emotional problems, disorders and diagnosis and psychopathology contrasted to normal development. The aim is to enable students to acquire theoretical knowledge and understanding of the symptoms, causes, course and prevention of common disorders excluding physical and sensory handicaps.

PSY 436 Neuropsychology
The module exposes students to the anatomy, physiology and biology of the central nervous system which underlies human behaviour and mental processes. Topics covered include: Genetic, hormonal and functional systems; Examination of the interface between Psychology, Neurology and Psychiatry in relation to the psychological effects of brain lesions, trauma, toxicology and various forms of mental under-development

HDP 433 Ageing and Senescence

The module examines the theoretical basis of ageing. It builds on an analysis and cross-examination of real-life situations, problems/issues related to ageing and how these can be alleviated. Topics covered: The ageing process, including restrictions from certain activities, change of lifestyle to result in successful aging, changes in social policy, modified accommodation and lifelong learning. Age-related issues: Gender, race, ethnicity, social class, religion, and (dis)ability.

HDP 435 Applied Developmental Psychology
Applied Developmental Psychology is an emerging discipline which focuses on the use of developmental theory and research to promote positive developmental outcomes in individuals, families, and communities. Students will be taught to conduct theory-driven research to advance our knowledge of developmental processes. Students are trained on how to use science-based knowledge for many practical applications to promote healthy behavioural, social, cognitive, emotional, and biological development in persons of all ages. These applications include developing and administering assessment procedures that measure important developmental processes or important contextual influences on these processes (e.g., family environment, teaching strategies, cultural standards), designing and implementing interventions that promote optimal development with a particular emphasis on the prevention of developmental disorders, and disseminating information that promotes healthy development to the public, to professionals, and to policymakers.

PSY 438 Principles of Psychotherapy
The module acquaints students with major approaches, namely the psychoanalytic, Adlerian, person-centred, rational-emotive, humanistic, and behavioural. It also explores current issues/practices in psychotherapy, emotional, relational, behavioural and cognitive mechanisms of change, and empirical evidence for psycho-therapeutic processes; emotion regulation, cultural competency, therapeutic boundaries, principles, philosophy, tenets of the approaches, and therapist self-care.

PSY 439 Contemporary-Critical Psychology
The module examines the implications of debates between mainstream and critical approaches to Psychology; Philosophical foundations from Foucault and the analysis of bio-power, Derrida on deconstruction and Mbembe and the post-colony.

Implications of the challenges are examined in relation to Mkhize, Burman and Gergen, and others. Attention is on relationships between critical theory and qualitative research methodologies in Health Psychology.

HDP 434 Dissertation
Students identify psychosocial problems and conduct research to address them. They apply previously taught research concepts and statistical skills, conceptualize ideas, review relevant literature, use appropriate methods/tools, collect, present, analyse and interpret data from which they draw conclusions and suggest recommendations. Under the guidance of a lecturer in the Department, students pursue a study on a relevant topic of their interest.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN HEALTH PSYCHOLOGY (HHP)

Duration:	4 years: Normal entry 3 years: Special/Mature entry
Actual Credit Load:	492
Minimum Credit Load:	480
Maximum Credit Load:	540
Maximum MBKs Credit Load:	408
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

- To capacitate students to apply knowledge of the core domains of Health Psychology and the various theoretical and methodological perspectives associated with these domains.
- To impart foundational skills, techniques and expertise required to promote the mental health of humans in diverse settings.
- To produce socially responsible graduates with practical, ethical and professional skills in Health Psychology
- To instil in students the ability for critical thinking required for them to appropriately design, conduct, interpret and evaluate Health Psychology-related studies.
- Develop an understanding of behaviour change within health and healthcare contexts.
- To mould and produce graduates who can effectively write, present and interact with others.

2.0 ENTRY REQUIREMENTS

For all pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better

Normal Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a minimum of any 2 "A" Level passes or relevant National Certificate

Special Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a professional qualification such as a Diploma in a Psychology-related field in which candidates must be employed

Mature Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better. Candidates must be at least 25 years of age and have a minimum of 3 years of working experience in a Psychology-related field in which they must be employed.

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Health Psychology Theories; Models; Assessment, evaluation and respective interventions for psycho-social pathologies/challenges in various psychological domains in the human lifespan.

- Special focus: Health Psychology, with special emphasis on theory-based research used to describe, explain, predict, modify and/or promote human behaviour and mental processes in various life settings.
- Orientation: Applied scientific model premised on the student-centred approach to the assessment of the nature and extent of human psychosocial challenges, and to the designing and implementation of appropriate interventions.
- Distinctive features: The programme builds in students the research-technology-innovation management continuum and focuses on knowledge, skills and application development used to alleviate/terminate dynamic and contemporary human psychosocial issues.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers:

- Training health care workers, community well-being advisors, forensics, academia, sports coaches, youth and community advisors, social workers, Special needs Education Teaching, Health Psychologists, and Public Health Advisors.
- Human and social services in settings including academia, clinical, occupational, environmental, sports, and Community Psychology; Public/government and private/non-governmental institutions requiring Health Psychological services

Further Education: Masters and/or PhDs in Health Psychology and/or Public Health

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, role-plays, field visits/trips, individual and seminar/group presentations, independent study, active research
- **Assessment and Evaluation Methods**: Written assignments, presentations, tests, research projects, work-related learning reports, and end-of-semester examinations

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to:

- Evaluate psychological theories, current issues, discussions and evidence within the core knowledge domains of Health Psychology.
- Demonstrate a critical awareness of the applications of Health Psychology.
- Utilise evidence-based psychological approaches in modifying malfunctioning psychological health behaviour patterns.
- Conduct Health Psychology empirical studies in diverse settings, using diverse approaches and data collection tools.
- Apply acquired knowledge to alleviate Health Psychology-related problems in various settings.
- Demonstrate high levels of teamwork, communication skills and innovative problem-solving skills.
- Uphold codes of ethics, standards and values of professional conduct for Health Psychologists

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations

8.0 PROGRAMME ASSESSMENT

Continuous Assessment Work: It constitutes 40% of the final mark and comprises written assignments, workshop reports, work-related reports, seminar and group presentations, role-plays, field visits reports, in-class tests, and any other relevant assessments.

Written Examinations: End-of-semester examinations constitute 60% of the final mark

Other:

- Dissertation is assessed on the basis of a research project (75%) and an oral presentation (25%)
- Work Related Learning is assessed based on a student's Industrial placement report (30%), assessment by work supervisor (40%) and assessment by academic supervisor (30%).

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

HHP 131 Introduction to Health Psychology
The module examines Mental Health approaches and historical evolution in the cultural context. Topics covered include theories, research findings and applications to behaviour and health outcomes; behaviour change techniques; digital and other interventions; psychological adjustment to chronic illnesses; pain/symptom perception; sexual health and placebo responses.

PSY 132 Introduction to Psychology
The module introduces students to the richness and diversity of Psychology's fundamental principles, theories, concepts and findings, and equips them with tools necessary for the study of human behaviour and mental processes. Major domains of Psychology as a discipline are also explored based on classic studies, and of current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

PSY 133 Introduction to Social Psychology
The module covers the nature and causes of individual/group behaviour and thought processes in social settings; The way people think about, feel, and behave, and how they influence and are influenced by others; perspectives, empirical research methods, findings; impression-formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping, prejudice; analysis of theory and research in Social Psychology.

HCS 135 Introduction to Information Technology

Refer to the Department of Information Systems.

CS 131 Communication Skills

Refer to the Department of Communication Skills.

HHP 132 Substance Abuse in Families
The module is on psycho-sociological aspects of substance dependence in families. Topics covered are: Models to identify addictive behaviour and its aetiology; Addiction, its assessment methods, skills for treatment, collaborative approaches with other mental health professionals; Addictive, intergenerational patterns; Interventions for alcoholic/substance abusing; History, analyses and methods of clinical Relational treatment models.

HHP 133 Positive Psychology
This module focuses on understanding, testing, discovering and promoting the factors that allow individuals and communities to thrive. Positive Psychology is based upon 3 primary concerns: positive emotions, positive individual traits, and positive institutions. This module will introduce students to these fundamental aspects of Positive Psychology, apart from highlighting some of the core Positive Psychology concepts including happiness, flow, mindfulness, optimism, resilience, emotional intelligence, spirituality and self-related concepts (self-efficacy, self-esteem, ideal-self and real-self, self-regulation). This module will facilitate students' understanding of the positive aspects of human behaviour.

HHP 135 Psychology Concepts, Methods and Applications

This module builds on the Introduction to Psychology module. Covered concepts, theories and methods augment the central themes and controversies of the discipline acquired earlier. This provides students with an understanding of the human mind and behaviour. Also examined are the psychodynamic perspective, humanism, post-modernism, personality, intelligence, and mental and behavioural issues. In workshop teams, students debate on raised issues.

PSY 136 Contemporary and Applied Social Psychology
The module focuses on challenges addressed by Social Psychology. Topics include attitudes and attitude change; prejudice, discrimination; aggression, conflict, conflict resolution; Group behaviour; Social Psychology in politics, law and health; tendency to conform to social norms; applied studies; application of Social Psychology basic principles to find, understand, interpret and use more specialized, and applied research findings.

PSY 138 Emotional Intelligence
This module equips students with knowledge of theory and practice in Emotional Intelligence. Students are expected to develop skills to be able to recognise, regulate, express/elicit, and monitor their own and other people's emotions. The module also exposes students to current areas of interest which include developing emotional intelligence in people through sharing emotional experiences and carrying out emotional intelligence-enhancing exercises.

PSY 231 Psychobiology
The module is on how biological processes influence human behaviour and mental functioning. It equips students with knowledge of genetics and the role of various body systems such as the nervous and endocrine systems in behaviour; The organisation, function and role of homeostatic organs in behaviour; the human anatomy in explaining behaviours.

PSY 232 Child Development
The module introduces students to the scientific study of child development, focusing on age-related changes in various domains. Emphasis is on the holistic development of children, inclusive of social, emotional, cognitive, moral and physical. Students are exposed to issues related to children's wellbeing such as the influence of attachment patterns and parenting styles on behavioural outcomes, child abuse and children's rights.

PSY 234 Introduction to Research Methods and Statistics
The module introduces students to qualitative and quantitative paradigms/approaches and to respective methods. It gives students an opportunity to demonstrate an understanding of the use of statistical tables and formulae in analysing and interpreting research data. It also exposes students to the association of variables, regression and prediction, statistical inferences and hypothesis-testing, Chi-square (x2) and analysis of variance (ANOVA).

GSSS 201 Gender Studies for Social Sciences
This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself

ENT 235 Entrepreneurship
Refer to the Department of Entrepreneurship

HHP 231 Human Kinetics and Healthy Eating Behaviours
Human Kinetics is a discipline focused on the comprehensive study and practice of human movement and exercise, and its impact on health and physical performance. Topics include approaches to human appetite research; homeostatic and hedonic factors in appetite regulation; physiological and nutritional determinants of appetite; obesity and eating disorders; exercise and energy expenditure; gene-environment interactions in weight regulation and food choice; dieting/weight management; food addiction; appetite across the human lifespan.

HHP 232 Cultural Psychology
The module examines how culture shapes cognition, perception, motivation, and emotion. It will also look at cross-cultural differences in conceptions of the self, personality, interpersonal behaviour and group processes. Further, the module will look at culture and health. Gender and health will be examined from different cultural perspectives. Finally, the module will discuss how intercultural contact and/or acculturation impacts the individual, but also interpersonal and intergroup processes.

PSY 237 Adolescence and Adulthood Development

The module provides knowledge on developmental theories. For adolescents, the focus is on explanations and effects of body changes, the influence of peer relationships, and initiations into adulthood in the African context. For adulthood, the focus is ontheories of career choices in young adulthood; Midlife crises and related issues in middle age; Theories of ageing, developmental challenges and old age home life for the elderly.

PSY 239 Cognitive Psychology
The module provides students with an understanding of how humans organize and interpret information to produce a conscious experience of objects, events, situations and people. Topics include: Perception, attention, accommodation, assimilation, information processing, memory, language and thought processes. The module also explores ways by which cognition is utilised by humans in an attempt to ensure continued survival.

PSY 240 Ethics and Professional Practice
Students are oriented on: Professional Psychological Assessment and Psychotherapist identity; ethical, legal and professional codes of conduct; the Health Professions Act Chapter 27: 19 and the requisite Mandate; safe, acceptable practice; professional issues associated with risk in working with clients in diverse settings/circumstances; individual and team-based service models; communication and implications on practice; Intern supervisee-supervisor relationships.

HHP330 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HHP331 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HHP332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HHP333 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HHP 431 Impact and Experiences of Long-Term Conditions
This module provides students with skills and techniques to assess the experiences of individuals diagnosed with long-term conditions and the impact of the conditions on psychological functioning, and interventions. The module also covers theoretical models of health-related behaviour and cognition.

PSY 431 Psychopathology
This is a study of mental disorders. Concepts covered include the scientific study of the disorders, with a focus on their genetic, biological, psychological, and social causes, and respective symptoms. Students analyse symptoms to correctly classify the disorders so as to prescribe appropriate interventions.

PSY 432 Psychometrics
The module provides students with a grounding in the comprehension and application of psychometric tests, related theories, the nature and essence of psychometrics, test construction and use, and enhancement of effectiveness. Topics covered are methods of observing and measuring human behaviour; psychometric assessment methods and practice; testing principles of validity, reliability, standardization and adopting/ adapting tests.

HHP 432 Psychosomatic Pathways to Health and Illness
The module covers aspects of planning for and evaluating appropriate interventions for mental health problems. It builds on the Psychobiology module concepts on mechanisms of pathways between psychological and behavioural factors, and physical and psychological health outcomes. Key biological systems, and examples of stress, sleep and pain are used to explore how the pathways interact, and how they are measured as indices for health/disease.

PSY 436 Neuropsychology
The module exposes students to the anatomy, physiology and biology of the central nervous system which underlies human behaviour and mental processes. Topics covered includegenetic, hormonal and functional systems; examination of the interface between Psychology, Neurology and Psychiatry in relation to the psychological effects of brain lesions, trauma, toxicology and various forms of mental under-development.

HHP 433 Community Health Psychology
This module focuses on the social ecological perspective of health emphasizing how individual health behaviour is shaped by social forces. Topics include bio bio-behavioural factors in health; health behaviour change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Students are equipped with knowledge and skills to work with clients. Other topics covered include death, dying and bereavement, decision-making by clients, health literacy and issues related to client satisfaction.

HHP 434 Health Promotion and Behaviour Change The module provides an understanding of factors that influence health behaviour and behaviour change. Concepts covered are on models and values that inform health promotion practice and are on the requisite knowledge and skills to successfully design and evaluate health-based interventions.

PSY 438 Principles of Psychotherapy
The module acquaints students with major approaches, namely the Psychoanalytic, Adlerian, Person-centred, Rational-emotive, Humanistic, and Behavioural. It also explores: Current issues/practices in psychotherapy, emotional, relational, behavioural and cognitive mechanisms of change, and empirical evidence for psycho-therapeutic processes; Emotion regulation, cultural competency, therapeutic boundaries, principles, philosophy, tenets of the approaches, and therapist self-care

PSY 439 Contemporary-Critical Psychology
The module examines the implications of debates between mainstream and critical approaches to Psychology; Philosophical foundations from Foucault and the analysis of bio-power, Derrida on deconstruction and Mbembe and the post-colony. Implications of the challenges are examined in relation to Mkhize, Burman and Gergen, and others. Attention is on relationships between critical theory and qualitative research methodologies in Health Psychology.

HHP 435 Dissertation
Students identify psychosocial problems and conduct research to address them. They apply previously taught research concepts and statistical skills, conceptualize ideas, review relevant literature, use appropriate methods/tools, collect, present, analyse and interpret data from which they draw conclusions and suggest recommendations. Under the guidance of a lecturer in the Department, students pursue a study on a relevant topic of their interest.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN ORGANISATIONAL AND INDUSTRIAL PSYCHOLOGY (HOIP)

Duration:	4 years: Normal entry 3 years: Special/Mature entry
Actual Credit Load:	492
Minimum Credit Load:	480
Maximum Credit Load:	540
ZNQF Level:	8

1. PURPOSE OF THE PROGRAMME

- To inculcate in students the ability to demonstrate a sound knowledge base of a comprehensive range of psychological theories, research methods and applications in organizations and industry
- To instill in students the ability for critical thinking required to apply psychological theories, principles and research methods so as to promote the behavior of employees in the workplace by improving the overall work environment
- To provide an opportunity for students to increase workplace productivity and related issues through improving the physical and mental well-being of employees
- To capacitate students to apply psychological knowledge to a variety of organisational and industrial settings.
- To produce graduates who are ethically and socially responsible.
- To mould and produce graduates who can effectively write, present, and interact with others in workplaces.

2. ENTRY REQUIREMENTS

For all pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better

Normal Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a minimum of any 2 "A" Level passes or relevant National Certificate

Special Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better plus a professional qualification such as a Diploma in a Psychology-related field in which candidates must be employed

Mature Entry: At least 5 'O' Level passes/National Foundation Certificates including English Language, Mathematics and a relevant Science subject at Grade C or better. Candidates must be at least 25 years of age and have a minimum of 3 years of working experience in a Psychology-related field in which they must be employed.

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Organisational and Industrial Psychology; Theories/Models; Assessment, evaluation and interventions for psychosocial and behavioural problems in organisations and industry.
- Special focus: Organisational and Industrial Psychology, with special emphasis on theory-based research used to describe, explain, predict, modify and/or promote human behaviour and mental processes in diverse organisational and industrial settings so as to promote productivity.
- Orientation: Applied scientific practitioner model premised on the student-centred approach to the assessment of the nature and extent of human psychosocial challenges, and to the designing and implementation of appropriate interventions in organisations.
  and industry.
- Distinctive features: The programme builds in students the research-technology-innovation management continuum and focuses on knowledge, skills and application development used to alleviate/terminate dynamic and contemporary human psychosocial issues in organisations and in industry.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers: Human Resources specialists**;** Probation Officers**;** Human Resource Managers; Business consultants**;** Employee training professionals; Job analysers and evaluators**;** Employee selection and recruitment; Academics in teaching and conducting/publishing research; Work performance developers, appraisers, reviewers; Employee motivators; Wellbeing, conflict, stress and work adjustment; Consumer behavior and marketing; Job analysis and enrichment; Careers development, coaching and advisers; Organisational change management; Personnel training and development; Attitude surveys and research on workplace issues.

Further Education: Masters and Postgraduate diploma programmes in Organisational and Industrial Psychology, and any other related programmes; PhD studies in the field.

5. PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, role-plays, field visits/trips, individual and seminar/group presentations, independent study, active research
- **Assessment and Evaluation Methods**: Written assignments, presentations, tests, research projects, work-related learning reports, and end-of-semester examinations

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to:

- Apply acquired research skills to engage in innovative problem-solving in addressing psychological problems experienced in organisations and industry.
- Develop and apply interpersonal skills to different contexts in organisations and industry.
- Utilise coping skills imparted for the betterment of self and others.
- Understand and alleviate psychosocial problems in organisations and industry.
- Apply concepts and overarching theories in Organisational and Industrial Psychology.
- Explain, evaluate, predict and promote employee productive behaviour in the workplace.
- Work with clients, supervisors and supervisees in line with values and rules of professional conduct for Organisational and Industrial Psychologists.
- Work effectively as an individual, in teams and in multidisciplinary workplace environments.

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment Work: It constitutes 40% of the final mark and is comprised of: Written assignments, workshop reports, work placement reports, seminar and group presentations, role-plays, field visits reports, in-class tests, and any other relevant assessments.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

Other:

- Dissertation is assessed on the basis of a research project (75%) and an oral presentation (25%).
- Work Related Learning is assessed based on a student's Industrial placement report (30%), assessment by work supervisor (40%) and assessment by academic supervisor (30%).

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

PSY 132: Introduction to Psychology

The module introduces students to the richness and diversity of Psychology's fundamental principles, theories, concepts and findings, and equips them with tools necessary for the study of human behaviour and mental processes. Major domains of Psychology as a discipline are also explored on the basis of classic studies, and of current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

PSY 133: Introduction to Social Psychology

The module covers: The nature and causes of individual/group behaviour and thought processes in social settings; The way people think about, feel, and behave, and how they influence and are influenced by others; Perspectives, empirical research methods, findings; Impression-formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping, prejudice; analysis of theory and research in Social Psychology.

SOC 131: Introduction to Sociology

Refer to the Department of Sociology.

HCS 135: Introduction to Information Technology

Refer to the Department of Information Systems.

CS 131: Communication Skills

Refer to the Department of Communication Skills.

HOIP 131: Introduction to Organisational & Industrial Psychology
The module provides students with knowledge of human behaviour in workplaces and the application of psychological principles to change work behaviour. Emphasis is on: Employee motivation, job satisfaction and organisational development; Psychological variables which affect workers' behaviour and how workers cope with stress, and selection, training and performance measurement. The history of the field.

HOIP 132: Workgroup Dynamics and Diversity
The purpose of this module is to enable students to develop a solid knowledge base and sound understanding of the theory and practical implications of workgroup dynamics and diversity in organisational and industrial settings. The aim is to improve workplace group dynamics so as to promote employee productivity and organisational effectiveness.

HOIP 133: Human Resource and Career Psychology
The module is designed to impart knowledge to students on Human Resources and Career Psychology within the Zimbabwean organisational context. Students gain competency in applying the knowledge and assist individuals and organisations to critically evaluate and engage in human resources and career-related activities that promote workplace performance.

PSY 135: Psychology Concepts, Methods and Applications
This module builds on the Introduction to Psychology module. Covered concepts, theories and methods augment the central themes and controversies of the discipline acquired earlier. This provides students with an understanding of the human mind and behaviour. Also examined are the psychodynamic perspective, humanism, post-modernism, personality, intelligence, and mental and behavioural issues. In workshop teams, students debate on raised issues.

PSY 136: Contemporary and Applied Social Psychology
The module focuses on challenges addressed by Social Psychology. Topics include attitudes and attitude change; prejudice, discrimination; aggression, conflict, conflict resolution; group behaviour; Social Psychology in politics, law and health; tendency to conform to social norms; applied studies; application of Social Psychology basic principles to find, understand, interpret and use more specialized, and applied research findings.

HRM139: Industrial Relations

Refer to the Department of Human Resource Management.

HOIP231: Consumer Psychology
Human beings have basic needs that they fulfil by making transactions in the market mostly in the form of monetary exchange for goods and services. This module is designed to study how consumers behave and the consequences of various behaviour patterns. Additionally, the module looks at various psychological factors that shape the behaviour and actions of the consumer.

PSY 234: Introduction to Research Methods and Statistics
The module introduces students to qualitative and quantitative paradigms/approaches and to respective methods. It gives students an opportunity to demonstrate an understanding of the use of statistical tables and formulae in analysing and interpreting research data. It also exposes students to the association of variables, regression and prediction, statistical inferences and hypothesis-testing, Chi-square (x2) and analysis of variance (ANOVA).

GSS 231: Gender Studies for Social Sciences

Refer to the Department of Sociology.

ENT 235: Entrepreneurship

Refer to the Department of Entrepreneurship.

HOIP233: Employee Selection & Industrial Psychological Assessment
This module provides an introduction to the current issues and procedures that are used in employee selection. The module also introduces students to the origins and functions of psychological assessment in workplaces. The module covers technical and methodological principles; ability testing; personality testing; applications of testing.

HOIP234: Learning, Training & Development

The module equips students with skills to apply Psychological theories and methodology to the design/plan, implementation, monitoring and evaluation of learning, training and development of programs in organisations and industry. Also covered is the facilitation of effective learning by employees during training for optimal productivity**.**

HOIP235: Personality & Performance Management
The module explains the impact of individual differences on work performance. Topics covered include aspects of individual differences; their impact on performance; analysis of the impact; designing solutions to the impact for purposes of improving employee motivation, productivity and organisational effectiveness.

HOIP236: Work Attitudes & Job Motivation
The module is designed to examine issues related to work attitudes and employee job motivation and will focus on both the causes and consequences of these constructs.

PSY 240: Ethics and Professional Practice
Students are oriented on: Professional Psychological Assessment and Psychotherapist identity; ethical, legal and professional codes of conduct; the Health Professions Act Chapter 27: 19 and the requisite Mandate; safe, acceptable practice; professional issues associated with risk in working with clients in diverse settings/circumstances; individual and team-based service models; communication and implications on practice; intern supervisee-supervisor relationships.

HOIP330 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HOIP331 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HOIP332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HOIP333 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HOIP431: Ergonomics
The module provides students with knowledge of the theory and practical implications of human factors and interactions in workplace designs to improve productivity. Topics covered include the application of human factors and principles of ergonomics in planning and designing workstations; principles of human information processing in the designs; ergonomic principles in the design of controls, displays, symbols, and occupational health and safety.

HOIP 432: Forensic Industrial Psychology
The purpose of the module is to enable students to develop a sound understanding of the theory, principles and procedures relevant to the practice of Forensic Industrial Psychology within the local Zimbabwean and global context.

PSY 432 Psychometrics
The module provides students with a grounding in the comprehension and application of psychometric tests, related theories, the nature and essence of psychometrics, test construction and use, and enhancement of effectiveness. Topics covered are methods of observing and measuring human behaviour; psychometric assessment methods and practice; testing principles of validity, reliability, standardization and adopting/adapting tests.

PSY433 Organisational Culture and Climate
The module examines the development, nature, classifications, and characteristics of organizational culture and climate. Emphasis is placed on the investigation of behaviors and their relationship to organisational culture and climate. The interaction of the individual, groups, organization and environment are explored. Special attention is given to theories, models and methods for aligning culture and climate to the organisational vision and mission**.**

HOIP 434 Organisational Development and Change Management

The module acquaints students with knowledge of a broad range of behavioural practices in an Organisational Development (OD) practice context. It aims at building competencies in students to address complex problems in organisations by developing evidence-based and theory-driven recommendations to assist in building organisations' capability to change and to achieve greater effectiveness.

HOIP435 Leadership and Organisational Design
The purpose of this module is to develop a knowledge base of the principles and theories of leader behaviour in an organisational and industrial setting. The module focuses on decisions that have to be made on the most appropriate organisational structure(s) to ensure the delivery of organisational activity. Organisation design is about shaping an organisation to maximise its effectiveness and adaptive capacity.

HOIP 436 Employee and Organisational Wellness
The purpose of the module is to equip students with the competencies required to gather, analyse, evaluate and apply knowledge from existing research on employee and organisational wellness, to explain and proffer solutions to issues related to employee and organisational wellness.

HOIP 437 Psychological Adjustment in the Workplace
The module imparts knowledge on: The link between work and psychological well-being; Psychological adjustment in workplaces; Determinants of work maladjustment; Assessment of work adjustment; Types of workplace dysfunctions and other work-related and organisational adjustment problems; Organisational strategies and methods to manage and promote organisational and employee wellbeing.

PSY 439 Contemporary-Critical Psychology
The module examines the implications of debates between mainstream and critical approaches to Psychology; philosophical foundations from Foucault and the analysis of bio-power, Derrida on deconstruction and Mbembe and the post-colony. Implications of the challenges are examined in relation to Mkhize, Burman and Gergen, and others. Attention is on relationships between critical theory and qualitative research methodologies in Health Psychology.

HOIP 438 Dissertation
Students identify psychosocial problems and conduct research to address them. They apply previously taught research concepts and statistical skills, conceptualize ideas, review relevant literature, use appropriate methods/tools, collect, present, analyse and interpret data from which they draw conclusions and suggest recommendations. Under the guidance of a lecturer in the Department, students pursue a study on a relevant topic of their interest.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN COMMUNITY PSYCHOLOGY (MCP)

Duration:	2 years
Actual Credit Load:	408
Minimum Credit Load:	360
Maximum Credit Load:	430
Total MBKs Credit Load:	288
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

- To instill in students the ability for critical thinking required to demonstrate a sound knowledge of alleviating community psychosocial problems through ameliorative and transformative interventions.
- To equip students with theories and skills for use in promoting the engagement of the broader community in assessing psycho-ecological problems.
- To produce graduates who can apply Community Psychology knowledge, principles, values and competencies relevant to understanding people in context.
- To prepare students for community practice and employment in various community settings.
- To prepare students for further studies in related fields of Psychology and communities' needy areas.
- To produce graduates who are ethically and socially responsible.

2.0 ENTRY REQUIREMENTS

Normal Entry: Minimum of an upper second class (2.1) in a BSc Honours Degree in

Psychology.

3.0 PROGRAMME CHARACTERISTICS

- Areas of Study: Community Psychology.
- Specialist focus: Prevention of psychosocial challenges; Empowerment and citizen participation; Respect for human diversity; Evaluation; Social justice; Collaboration and partnerships; Wellness; Community change management.
- Orientation: Scientific-Practitioner Paradigm/Model used in community psychosocial challenges and interventions.
- Distinctive features: The programme builds on the philosophy of community practice, the application of Indigenous knowledge, and epistemic and social justice.
- Other: Practical ie. not too theoretical, and to be relevant on the ground.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

- **Career Opportunities**: Community/government and private mental health centres; Universities, colleges and schools; Community therapeutic services; Management of crisis centres; Community advocacy; Research institutions; Rehabilitation facilities and Correctional services; Human and social services; Academia; Non-governmental organisations; Motivational speakers, among other careers.
- **Further studies**: Doctoral studies in Community Psychology and Health Psychology.

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures, tutorials, individual/ independent study, group work, field visits, community practice, dissertation.
- **Assessment and evaluation methods**: Individual and group assignments, seminar/group presentations/reports, community practice reports, dissertations, field visit reports, tests, and examinations.

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates will be able to :

1. Demonstrate an understanding of the methods and values of Community Psychology and be able to place these within the broader field of Psychology as well as other related disciplines.
2. Evaluate effects of societal, cultural and environmental influences on psychological and community well-being.
3. Explore the relationship between people and their environments, and consider ways of improving this relationship.
4. Instil in clients coping strategies in dealing with psychosocial problems and utilize the stress-coping process.
5. Conduct research to identify and address community needs, and facilitate community participation to enable individuals and groups to solve their own problems, buffering/mediating the relationship between stress and disease.
6. Think in terms of the prevention of problems, and of alternatives to individually and group-oriented services such as mutual help models, and community and coalition building.
7. Familiarise with innovative programs and practices geared towards the prevention and empowerment of disenfranchised groups.
8. Apply knowledge to the development of a prevention/empowerment-oriented community-based intervention that addresses specific social problems that students identify in their communities.

7.0 GENERAL PROVISIONS

Refer to Section 4 of the Faculty Regulations

8.0 PROGRAMME ASSESSMENT

Continuous Assessment work:	It contributes 40% to the final mark and comprises: Written assignments, workshop reports, community placement reports seminar and group presentations, field visit reports, in-class tests, and any other relevant assessments.
Written Examinations:	

End-of-semester examinations constitute 60% of the final mark.

Other:

a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).
b) Community Practice 1 and 2 Proposal, and File: These are respectively assessed based on identification of a community problem, coming up with a proposal to address the problem and implementing the proposal.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Level 1: 50%
Level 2: 50%

14.0 MODULE SYNOPSES

MCP731 Foundations of Community Psychology

The module is on the roles of extra-individual processes, such as social settings, policies and law, in understanding social contexts which shape behaviour. The focus is on: Paradigms on principles of social ecology, prevention, power, social

justice, values, levels of analysis, and empowerment for a balance between personal, relational, and collective well-being; Theories and skills that promote engagement of communities in assessing and addressing problems.

MCP732 Psychological and Community Assessment
The module trains students in professional skills in community assessment within the Zimbabwean context. It covers: The nature and purpose of community needs assessment, informal assessment and therapeutic relationships, use of interviews, psychological tests in general, and interpreting, synthesising and communicating assessment findings. Also covered are various community assessment methods.

MCP733 Community Mental Health
The module provides knowledge on support and treatment of people with mental disorders in their community settings, which are more accessible and responsive rather than aggregated and isolated central/psychiatric hospitals. Analysed are services in halfway homes; partial hospitalisation; Primary care, Community mental health, and Day-centres; Self-help groups. The aim is to increase accessibility to services and lessen exclusion and stigmatisation.

MCP734 Critical Psychology and Indigenous Psychologies
The module provides critiques of 'mainstream' Psychology, and the application of Psychology in more progressive ways of looking at social change through Fanonian and Foucauldian mediation as a means of preventing and treating psychopathology. Topics covered are Indigenous knowledge systems, focusing on African Psychology; Nascent concepts such as decoloniality, epistemic justice, and non-essentialising treatment of the 'African Worldview'.

MCP735 Community Safety and Crime Prevention
The module covers topics on crime prevention, control and reduction; community safety and security; the challenge of 'community governance' in the context of social control and social policy; analysis of traditional approaches on crime prevention and community safety; recommended contemporary approaches; and rehabilitation of prisoners.

MCP736 Community Interventions and Prevention
The module provides strategies, models, and methodologies used in the intervention and prevention of psychosocial problems such as violence, delinquency, adolescent pregnancy, substance abuse, HIV/AIDS, needs of the historically underserved and marginalised. The aim is to promote competence in communities. Emphasis is on the importance of problem definition so as to appropriately guide strategies.

MCP737 Advanced Research Methods and Statistics in Community Psychology
The module builds on concepts covered in the Psychology undergraduate module, and now focuses on applied research in communities. It equips students with advanced knowledge and skills in triangulated research approaches; technologically-triangulated data gathering; statistical data processing.

MCP738 Legal and Ethical Issues in Community Psychology
This module covers standards of professional conduct as it applies to practice in the programme of study. It includes codes of conduct, ethical and legal decisions such as the scope of the profession, legal and ethical rights of clients, licensing laws, regulations and customs, and professional liability. Also covered are case examples, current regulations, and standards for utilizing assessment data.

MCP739 Diversity in Community Contexts
The module explores psychosocial factors behind group and individual differences, how these differences are inherited, learned and/or both, and how positive ones can be taken advantage of. Also covered are: Implications of the differences in community settings, focusing on the effects of culture, ethnicity, gender and religion on well-being. Also covered are the strengths and weaknesses of people with special needs and the requisite facilities and assistive devices

MCP740 Community Empowerment and Systems Change
The module is on psychological empowerment. Topics covered include: How perceptions of empowerment create self-identity of a community, strengthen its decision-making and collectivism, increase access to and foster a sense of community and community participation; social ecology; facilitation of first and second-order change; Theories and ideologies of empowerment; Social justice, self-help groups, and people with disabilities.

MCP831 Community Practice 1
(*Before starting their practice, students must register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities*).

The module provides an opportunity for students to integrate theoretical knowledge with professional practice. Students identify a community psychosocial problem, write a proposal on how to intervene, and in so doing build up and maintain a community practice file. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. At the end of the semester, students submit their files for examination.

MCP832 Community Project Planning and Evaluation
Community Psychologists engage in projects to enhance the well-being of people. The module provides knowledge on the

community project cycle, from the point of inception through to issues of sustainability and evaluation. Topics also covered include: Community needs assessments, outcomes and cost-effectiveness evaluation, impact analysis, and related ethical and legal issues; Investigation of current methods of evaluation of projects and services.

MCP833 Advanced Psychometrics
The module builds on and covers concepts taught in the Psychology Honours Degree Programme. However, the focus is now on the context of the specialised programme of study, with more comprehensive content being covered on psychometric tests: construction, comprehension, application, enhancement of effectiveness, and upholding principles in using the tests; Administration; Validity, reliability, standardisation, Pearson r and Spearman r.

MCP834 Psychotherapy
The module equips students with skills to address psychopathological disorders. Topics covered include psychotherapeutic interventions and other alternatives, such as biological therapies; case studies, role plays, and class exercises are used to illustrate the requisite principles. Focus is on the evaluation of psychoanalytic, individual, person-centred, existential, Gestalt behaviour, rational emotive behaviour and Cognitive Therapies.

MCP835 Crisis, Coping and Social Support
The module covers models used to help communities which are going through difficult times of disease, war, political instability, floods, and poverty, among other psychosocial problems. It builds a knowledge base of physical and psychological responsiveness to the various problems, and of how to develop support and referral networks, inclusive of enhancing resilience and coping strategies.

MCP836 Community Practice 2
(Before starting their practice, students must register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The module integrates theory with professional practice. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. Students: Implement intervention programme(s) in light of the project proposal submitted in Community Practice 1; document client cases; attend practicum classes once every fortnight; build up a file/report on the intervention for submission to the Department for examination at the end of the semester.

MCP837 Health Psychology and Wellness
The module explores how biology, behaviour and social context influence health and well-being. The focus is on preventing illness, effects of disease/pain, improving adherence to medical regimens and ways of reducing risky health behaviours, such as alcohol and drug abuse, smoking and risky sexual behaviours through health action approaches, behaviour therapy and applied behaviour analysis.

MCP838 Dissertation
The module provides guidelines for students on the whole research process, inclusive of how to conduct and document research. Working under the supervision of a lecturer in the Department, students plan, design, and conduct research on a topic of their interest. The topic must address current issues and the research must be in line with contemporary trends in the programme of study.

NB: This is a prospective/new programme. At the time its regulations were due for submission to ZIMCHE for accreditation, there was a call for programme regulations to be MBK-aligned. As such, these regulations have gone through the alignment process

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN CLINICAL PSYCHOLOGY (MCLIP)

Duration:	2 years
Actual Credit Load:	390
Minimum Credit Load:	360
Maximum Credit Load:	430
Total MBKS Credit Load:	288
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

- To impart to students knowledge, skills and competencies relevant to the diagnosis, analysis and clinical therapy of various behavioural pathologies and psychological disorders.
- To prepare students for Clinical Placement and employment in mental health institutions and for further studies in

Clinical Psychology.

- To provide opportunities for students to demonstrate a sound knowledge of a comprehensive range of psychopathologies and of the requisite psychotherapies.
- To produce graduates who are ethically and socially responsible.

2.0 ENTRY REQUIREMENTS

Normal Entry: Minimum of an upper second class (2.1) BSc Honours Degree in Psychology.

3.0 PROGRAMME CHARACTERISTICS

- Areas of Study in Clinical Psychology:
  - Psychopathology, Clinical Neuropsychology, Psychotherapeutic assessments and interventions, and Clinical Health Psychology.
  - Legal and ethical issues in Clinical Psychology.
  - Research Methods and Statistics in Clinical Psychology.
- Specialist Focus in Clinical Psychology :
  - Individual and group clinical empowerment.
  - Diagnosis, prevention, therapy and management of psychological disorders.
- Orientation: Scientific-Practitioner Paradigm.
- Distinctive Features: The programme builds on psychotherapeutic interventions and neurobiological practice.
- Other: Practical in approach, i. e. not too theoretical and must be relevant on the ground.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers:

- Practice in government/public and non-governmental/private mental health settings
- Clinical advocacy
- Crises management
- Correctional services
- Non-governmental organizations
- Academia
- Research institutions
- Human and social services

Further Studies: Doctoral studies in Clinical Psychology and Health Psychology.

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods**: Lectures/Tutorials, Seminars/Presentations, Group work, Role plays, Field visits, Clinical placement, Dissertation, Individual/ Independent study.
- **Assessment and Evaluation Methods**: Continuous assessment comprised individual and/or seminar/group presentations, in-class tests, field visits and placement reports, and dissertation.

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates will be able to:

- Demonstrate ability to reduce psychological distress, and to enhance and promote psychological wellbeing.
- Undertake clinical assessments using various methods, including psychological tests, interviews, direct observations and technological equipment.
- Conduct academic and service-based research to identify the causes and effects of Psychological problems as a starting point to psychotherapy.
- Develop clinical practitioner skills through appropriate and supervised clinical placements.
- Use appropriate therapeutic techniques and strategies to alleviate mental health problems.
- Instil in clients coping strategies in dealing with psychological issues such as stress, depression, anxiety, phobias and relational mental health problems.
- Observe legal and ethical issues in clinical practice.
- Apply psychological theories and research-based evidence in developing short-term and long-term mental health intervention strategies.

7.0 GENERAL PROVISIONS
Refer to Section 4 of the Faculty Regulations.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment work:

It contributes 40% to the final mark and comprises: Written assignments, workshop reports, clinical placement reports, seminar and group presentations, field visits reports, in-class tests, and any other relevant assessments.

Written Examinations:

End-of-semester examinations constitute 60% of the final mark.

Other:

a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).

b) Clinical Placement 1 and 2 Proposal, and File respectively: These are respectively assessed based on the identification of a clinical problem, coming up with a proposal to address the problem, and implementing the proposal.

9.0 PROVISION FOR PROGRESSION
Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS
Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION
Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING
Level 1: 50%
Level 2: 50%

MCLIP836	Marital and Family Therapy	18	MCLIP837	Dissertation 90

14.0 MODULE SYNOPSES

MCLIP 731 Child, Adolescent and Adult Psychopathology
The module provides knowledge on the: Application of psychological theories, research and case studies to childhood psychopathologies; Analysis of behavioural, emotional, developmental and learning disorders in childhood and adolescence, including assessment, diagnosis and treatment; evaluation of main theoretical approaches to adulthood psychological distress; implications of the importance of evidence-based practice.

MCLIP 732 Assessment in Clinical Psychology
The module provides training in clinical assessment professional skills. It covers the nature and purpose of clinical assessment, informal assessment and therapeutic relationships, interviews, general and clinical psychological testing, interpreting, synthesising and communicating assessment findings. It also develops in students the ability to practise clinical management and referral expertise.

MCLIP 733 Clinical Neuropsychology
The module reviews the theory and practice of Clinical Neuropsychology. It builds on students' existing knowledge of neuro-anatomy and neuropsychology to review the wide range of neuropsychological deficits seen after brain injury. It also covers the principles and practicalities of neuropsychological assessment and the nature of neuropathology.

MCLIP 734 Clinical Health Psychology
The module provides knowledge on how biology, behaviour and social contexts influence health and well-being. Topics covered include ways of preventing illness; effects of mental and other illnesses; managing pain; improving adherence to medical advice; ways of reducing risky health behaviours, such as alcohol and drug abuse, smoking and risky sexual behaviours through health action approaches; behaviour therapy; and applied behaviour analysis.

MCLIP 735 Gerontology

The module focuses on issues surrounding psychopathology in old age. Disorders such as dementia, Alzheimer’s disease and other old age-specific disorders form the main thrust of the module. Emphasis is on developmental challenges faced by the elderly and respective peculiar needs, in general, and in old age homes, and theories that explain the ageing process.

MCLIP 736 Child, Adolescent and Adult Psychotherapy
Students are exposed to clinical descriptions, research, and treatment of child and adolescent psychopathologies. The focus is on the treatment of internalizing problems such as anxiety, depression, suicide, and somatic disorders; Externalizing problems such as conduct disorder and substance abuse; and autism. Other topics covered are play therapy and narrative therapy; empirically-designed and theory-based treatment systems of psychopathologies in old age.

MCLIP 737 Legal and Ethical Issues in Clinical Psychology
This module covers standards of professional conduct as it applies to practice in the programme of study. It includes codes of conduct, ethical and legal decisions such as the scope of the profession, legal and ethical rights of clients, licensing laws, regulations and customs, and professional liability. Also covered are case examples, current regulations and standards for utilizing assessment data.

MCLIP 738 Advanced Research Methods and Statistics in Clinical Psychology
The module builds on concepts covered in the Psychology undergraduate module, and now focuses on applied research in Clinical Psychology. Its emphasis is on statistical techniques used in the discipline. It equips students with advanced knowledge and skills in triangulated research approaches, technologically triangulated data gathering, and statistical data processing.

MCLIP 739 Clinical Forensic Psychopathology
The module covers perspectives on offending behaviours, and approaches to assessment and treatment, giving particular attention to specific offender types. It provides an inner-connectedness of Psychology and Law, which includes crime prevention and rehabilitation of offenders, persuasive communication, group dynamics and jury decision-making.

MCLIP 740 Clinical Psychopharmacology

The module provides knowledge on Pharmacology and Neurology as a prerequisite to covering topics related to pre-clinical Psychopharmacology. Emphasis is on substances that have abuse and addiction potential, and on drugs used in the treatment of related, and other mental and neurological disorders.

MCLIP 831 Clinical Placement 1

(Before students begin their Clinical Placement 1, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The module provides an opportunity for students to integrate theory with professional practice. Students work with Clinical Psychologists and make observations of client cases handled. They document the cases, and in so doing build up and maintain a file for submission at the end of the semester for examination. They also attend practicum classes once every fortnight. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department.

MCLIP 832 Crisis and Trauma Intervention
The module covers models and approaches used to help clients who are in crisis and/or trauma. It builds a knowledge base of physical and psychological reactions to various forms of crises and trauma and enables students to develop support and referral networks. Students are also exposed to the professional care and therapy approaches that clients require, while upholding appropriate practice.

MCP 833 Advanced Psychometrics
The module builds on and covers concepts taught in the Psychology Honours Degree Programme. However, the focus is now on the context of the specialised programme of study, with more comprehensive content being covered on psychometric tests: construction, comprehension, application, enhancement of effectiveness, and upholding principles in using the tests; administration; validity, reliability, standardisation, Pearson r and Spearman r.

MCLIP 834 Clinical Project Planning and Management
Clinical Psychologists engage in a variety of projects/programs to enhance the well-being of people. In this regard, this module covers concepts on how to manage such projects/programs as from the time of planning, inception, implementation, monitoring, and evaluation, through to sustainability and/or termination. The module prepares students for starting their own private practice.

MCLIP 835 Clinical Placement 2
(Before students begin their Clinical Placement 2, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The module integrates theory with practice and builds on knowledge acquired in Clinical Placement 1. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. While working under the supervision of Clinical Psychologists, students handle cases and are expected to: Document all cases and build up a file for submission for examination at the end of the semester and attend practicum classes once every fortnight.

MCLIP 836 Marital and Family Therapy
The module views mental illness as partly emanating from, and as being contributed to by systems of interaction among family members. It focuses on family relationships as an important factor in psychological health. Emphasis is on the fact that, regardless of whether clients consider mental illness an individual or a family issue, involving families often benefits them.

MCLIP 837 Dissertation
The module provides guidelines for students on the whole research process. Working under the supervision of a lecturer in the Department, students plan, design, and conduct research on a topic of their interest. The topic must address current issues and the research must be in line with current trends in the programme of study. Issued guidelines cover all the requisite aspects of how to conduct and document research.

REGULATIONS FOR THE MASTER OF SCIENCE DEGREE IN FORENSIC PSYCHOLOGY AND CRIMINOLOGY (MFPC)

Duration:	2 years
Actual Credit Load:	408
Minimum Credit Load:	360
Maximum Credit Load:	430
Maximum MBKs Credit Load:	288
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

- To equip students with critical thinking skills required to demonstrate a sound knowledge of psychological principles and tools for use at crime scenes and during court sessions
- To impart in students theories of crime and crime prevention
- To equip students with the requisite skills to develop and record accurate forensic mental health assessments of victims, witnesses and crime perpetrators or suspects
- To produce graduates who can assist the legal and justice system by studying the behavior of criminals and develop brief profiles based on common psychological traits and theories
- To provide opportunities for students to visit crime scenes, note details including time and date, scan adjacent areas for clues to determine the nature of offenders, and also ensure the safety of other investigators
- To prepare students for further studies in related fields of Psychology
- To produce graduates who are ethically and socially responsible

2.0 ENTRY REQUIREMENTS

Normal Entry: Minimum of an upper second class (2.1) in a BSc Honours Degree in Psychology, and BSc in Counselling Psychology

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Forensic Psychology; Criminology
- Specialist focus: Forensic Psychology; Psychology and Law; Perpetrators, suspects, victims and eye-witnesses; The legal justice system; Correctional, rehabilitation juvenile delinquency facilities; Role of Psychologists in court proceedings with a specific focus on cases involving child victims and the vulnerable.
- Orientation: Scientific-Practitioner Paradigm.
- Distinctive features: The programme builds on the philosophy of giving a psychological perspective on issues related to crime.
- Other: Practical in approach i.e. not too theoretical, and must be relevant on the ground.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers:

- Forensic Psychologists
- Research specialists
- Probation Officers
- Youth Justice workers
- Consultants on issues of crime
- Career Advisers
- Legal justice systems
- Crime analysts
- Crime interventions facilitators
- Non-Governmental Organizations
- Expert witnesses in courts of law
- Academia
- Probation and parole institutions
- Prison, Correctional and Rehabilitation officers

Further Studies: Doctoral studies in Forensic Psychology and Criminology

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods:** Lectures; Tutorials; Seminar/Presentations; Group work; Individual/Independent study; Prison, Correctional and/or Rehabilitation placement; dissertation

- **Assessment and Evaluation Methods:** Individual and group assignments; seminar/ group presentations/reports, In-class tests, field visits reports, internship placement reports, a dissertation, and examinations.

6.0 LEARNING OUTCOMES

On successful completion of this program, graduates should be able to:

- Design programs to improve the quality of life of prison inmates, inmates in rehabilitation/juvenile delinquency centres, and traumatised crime eye-witnesses and victims.
- Conduct research on crime and crime prevention, and apply findings to address crime-related issues.
- Utilise Forensic Psychology micro- and macro-perspectives in assessing and resolving crime-related issues.
- Efficiently operate in the criminal and justice legal system and in related organisational forensic settings.
- Critically evaluate approaches/interventions for working with diverse clients in forensic/criminal justice settings.
- Uphold Forensic Psychology ethics, professional codes of conduct and practice of standards.
- Employ effective written and verbal communication skills in handling criminal cases.
- Work effectively with personnel in fields related to handling crime, criminals, suspects and/or victims.
- Analyse and construct accurate reports on forensic case examples and on real-life cases.
- Demonstrate sensitivity, respect and non-discrimination/bias in relation to forensic clients/settings.
- Prepare for and provide testimony in court and evaluations of child custody in divorce
- Assess the competency of crime suspects to stand trial, risk of crime perpetrators re-offending, and eye-witness credibility.
- Assess offenders' psychological state of mind at the time of the offense.

7.0 GENERAL PROVISIONS

Refer to section 4 of the Faculty regulations.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment work:

It contributes 40% to the final mark and comprises of Written assignments; workshop reports; seminar and group presentations; in-class tests; Prison, Correctional and/or Rehabilitation internship placement reports; and any other relevant assessments.

Written Examinations:

End of semester examinations constitute 60% of the final mark

Other:

a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%)

b) Internship 1 and 2 Proposal and File: These are respectively assessed based on identification of a Forensic/Crime related problem, coming up with a proposal to address the problem and implementing the proposal

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

14.0 MODULE SYNOPSES

MFPC 731 Theories of Forensic Psychology and Criminology
The module equips students with knowledge of the theory and practical implications of psychological factors in Forensic Psychology and Criminology. Concepts covered include: Principles in Forensic Psychology and Criminology; Theories of Psychology of emotion, Psychology of choice and Psychology of belief.

MFPC 732 Psychology and Crime
The module identifies common traits of criminal behaviour tendencies such as hyperactivity, impulsivity, aggression, sensation-seeking or risk-taking, extroversion, external locus of control and inability to delay gratification. Required is an application of the knowledge to assist with predicting and identifying perpetrators. Other requisite factors include anti-personality disorders, mental illness, low/high intelligence levels, attention-deficit hyperactivity disorder and moral development as contributors to behaviour maladjustment and dysfunction

MFPC 733 Advanced Developmental Psychology
The module imparts knowledge required to deal with juveniles, the elderly, and the law. Focus is on: Policy-making rather than treatment of those with mental problems; How changes in human developmental milestones influence criminal behaviour tendencies; The role of nature/biology and nurture/environment in criminal behaviour tendencies; How human developmental theories explain behaviour changes that result in the perpetration of crime.

MFPC 734 Courts and Forensic Psychology
The module prepares students for attending various types of court sessions, inclusive of family, civil and criminal courts. The focus is on the use of acquired knowledge in assisting the legal and justice system to make decisions and reach conclusions about criminal suspects, perpetrators, victims and eyewitnesses

MCP 735 Community Safety and Crime Prevention
Crime prevention and reduction, community safety and security, alongside the challenge of community governance, are at the heart of the most significant and controversial questions about crime control, social control and social policy. Required is the analysis and application of theories of crime prevention and examination of perceived failures/limitations of traditional approaches, and recommend/contemporary means of crime reduction, community safety and rehabilitation of prisoners.

MFPC 735 Personality Disorders and Crime
The module uses illustrative case studies and recordings of clinical interviews with clients of diverse personalities to explain the risk of harming themselves, others and/or their properties. The module aims to show the relationship between personality disorders and offending behaviour, and hence the need for crime risk management for disordered personalities.

MFPC 736 Legal and Ethical Issues in Forensic Psychology and Criminology
This module covers standards for professional conduct as it applies to practice in the programme of study. It includes codes of conduct, ethical and legal decisions such as the scope of the profession, legal and ethical rights of clients, licensing laws, regulations and customs, and professional liability. Also covered are case examples, current regulations and standards for utilizing assessment data.

MFPC 737 Psychology of Criminal Behaviour
The module equips students with knowledge of theories of criminal behavior. The theories include Social Conflict, Social Process, Social Structure, Trait, Psychodynamic Trait, Rational Choice Theories, and Eysenck's Theory of Personality and Crime. The theories are analysed to give an appreciation of an eclectic approach to explaining criminal behavior tendencies.

MCP 737 Advanced Research Methods and Statistics
The module is a build-up of the undergraduate module. It equips students with advanced knowledge and skills in triangulated research approaches; technologically data gathering; and statistical data processing.

MFPC 738 Forensic Mental Health
The module prepares students to work with the legal justice system as it relates to laws regarding mental health issues. Students are availed with opportunities to attend situations and court sessions as and when their services are required and these are: Custody cases, divorce, negligence, malpractice, workplace violence and homicide. Case studies are also used to augment practical visits.

MFPC 831 Internship 1
(Before students begin their Internship 1, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The module provides an opportunity for students to integrate theoretical knowledge with professional practice. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. Students document all client contacts and cases dealt with and attend a practicum session once every fortnight across the semester. At the end of the semester, they submit a file on cases handled.

MFCP 832 Forensic Assessment
The module equips students with the knowledge and skills required in courts on psychological assessments of crime-related issues. Focus is not on the treatment of psychological issues that may arise; It is on issues that assist decision-making and prediction of criminal behaviour by the legal and criminal justice system in their consideration of whether or not a defendant is competent to stand trial or the risk of managing an inmate in certain ways.

MFPC 833 Criminal Investigative Psychology
The module imparts knowledge on interpreting cognitive interviewing procedures, eye-witness testimony and interrogative interviewing, including false confessions, lie detection and suggestibility; safeguarding the psychologically vulnerable such as crime victims and eye-witnesses. Students also attend Victim-Friendly Courts and guest lectures to gain skills in the role of Forensic Psychology in the legal justice system.

MCP 833 Advanced Psychometrics
The module builds on and covers concepts introduced and taught in the Honours Degree Programme. However, the focus is now on having more comprehensive content which is given in the context of the specialised programme of study.

MFPC 834 Legal and Criminal Justice System
The module provides knowledge on principles and theories of offending behaviours which are applicable to the legal and criminal justice system, inclusive of key themes underpinning Forensic Psychology and mental health. It aims to give an overview of the forensic environment, specialist forensic populations and settings.

MFPC 835 Internship 2
(Before students begin their Internship 2, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. The module integrates theoretical knowledge with professional practice. Students document all client contacts and cases dealt with at the placement. In addition, students will attend a practicum class once every fortnight across the semester. A file should be submitted to the Department at the end of the semester.

MFPC 836 Clinical Forensic Interventions
The module equips students with knowledge, critical reasoning ability and applied competence in clinical forensic diagnosis and treatments. Students acquire competencies to utilise quantitative and qualitative diagnostic approaches in studying forensic behaviour and conduct follow-up action plans. In researching, emphasis on the usual steps of any research process as covered in the Dissertation module action plans.

MFPC 837 Dissertation

The module provides guidelines for students on the whole research process. Working under the supervision of a lecturer in the Department, students plan, design, and conduct research on a topic of their interest. The topic must address current issues and the research must be in line with current trends in the programme of study. The guidelines cover all the requisite aspects of how to conduct and document research.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN ORGANISATIONAL AND INDUSTRIAL PSYCHOLOGY (MOIP)

Duration:	2 years
Actual Credit Load:	408
Minimum Credit Load:	360
Maximum Credit Load:	430
Maximum MBKs Credit Load:	288
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

- To produce versatile graduates who are innovative and can adjust to the ever-changing/dynamic workplace and its workforce.
- To impart knowledge and insights on understanding human behaviour in the workplace with the aim of improving the overall work environment, performance, communication, professional satisfaction and safety.
- To produce graduates who understand how workplace group dynamics operate and hence utilize them to boost work output.
- To instil in students, the ability for critical thinking required to apply psychological theories and methods in addressing workplace challenges.
- To capacitate students to apply psychological knowledge to a variety of workplace settings.
- To equip students with skills to design tools, machines, work systems, and workplaces that psychologically fit employees.
- To produce graduates who can apply appropriate principles to workplace processes and provide workplace solutions.
- To groom students who will improve recruitment strategies, conduct efficient personnel selection and facilitate good work environments, which see employees having work-life balance.

2.0 ENTRY REQUIREMENTS

Normal Entry: Minimum of an upper second class (2.1) in a BSc Honours Degree in Psychology/ BSc Organisational and Industrial Psychology Honours Degree

3.0 PROGRAMME CHARACTERISTICS

- Areas of study: Organisational and Industrial Psychology/Human Resources Management
- Specialist focus: Employee wellness, Human Resource Management, the entire spectrum of employee wellbeing aspects at workplaces, selection and recruitment
- Orientation: Scientific-Practitioner Paradigm
- Distinctive features: The programme builds on the principle of workplace dynamics
- Other: Practical in approach i.e. not too theoretical, and must be relevant on the ground

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Careers:

- Occupational Psychologists
- Human Resources specialists
- Probation Officers
- Management/business consultants
- Employee training Professionals,
- Job analysers and evaluators
- Employee selection and recruitment
- Academics: Teaching and conducting/publishing research
- Work performance development, appraisers, reviewers
- Employee motivators

- Workplace wellbeing, conflict, stress and work adjustment
- Consumer behavior and marketing
- Job analysis and enrichment
- Careers development, coaching and advisers
- Change management
- Training and development
- Attitude surveys and research on workplace issues

Further Studies: Doctoral studies in Organisational and Industrial Psychology, and Postgraduate studies in the area.

5.0 PROGRAMME DELIVERY

- **Teaching and Learning Methods:** Lectures, Tutorials, Seminar/Presentations, Group work, Individual/Independent Study, Work placement, and Dissertation.

- **Assessment and Evaluation Methods:** Continuous assessment comprised individual and or seminars/group presentations/assignments, in-class tests, field visits and internship reports, a dissertation, and examinations.

6.0 LEARNING OUTCOMES

On successful completion of this programme, graduates should be able to:

- Assist employers handle employee issues fairly, and make work more interesting, leading to increased productivity.
- Demonstrate extensive knowledge of psychological theories that can be applied in diverse workplace settings, inclusive of motivation, selection and assessment, well-being, learning and development, organisational change and leadership.
- Conduct research on and evaluate running workplace programs, and use findings to design programs that promote workplace efficiency.
- Utilise acquired skills to engage in innovative problem-solving that addresses workplace challenges.
- Apply interpersonal skills to diverse work settings for the betterment of self and others.

- Demonstrate an understanding of concepts and overarching theories in Organisational and Industrial Psychology.
- Explain, evaluate, predict and modify employee behaviour in the workplace.
- Work with employees, supervisors and supervisees in line with values and rules of professional conduct for Organisational and Industrial Psychologists.
- Work effectively as an individual, in teams and in multidisciplinary workplace environments.
- Uphold professional and codes of ethical standards required in Organisational and Industrial Psychology.

7.0 GENERAL PROVISIONS

Refer to section 4 of the Faculty regulations.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment work:

It contributes 40% to the final mark and is comprised : Written assignments, workshop reports, seminar and group presentations, in-class tests, work placement reports, and any other relevant assessments.

Written Examinations

End-of-semester examinations constitute 60% of the final mark

Other:

a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).

b) Internship 1 and 2 Proposal and File respectively: These are respectively assessed based on the identification of an Organisational/Industrial problem, coming up with a proposal to address the problem and implementing the proposal.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 7 of the Faculty Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

14.0 MODULE SYNOPSES

MOIP 731 Workplace Psychology

The module provides knowledge on workplace psychological problems and explanations, application of psychological solutions, management, and understanding of employees. Other topics covered include selection, recruitment, employee training and development, performance analysis, leadership principles, legal and ethical issues, and analysis of the workplace in the context of the physical environment.

MOIP 732 Advanced Ergonomics

The module provides knowledge on the theory and practical implications of human factors and ergonomics in workplace designs to improve employee productivity. Focus is on the application of human factors and ergonomics principles in planning and designing workstations, controls, displays and symbols; importance of workspace design and the impact of the environment on human error and performance; theories that explain the link between work design and well-being.

MOIP 733 Workplace Psychological Adjustment

The module provides knowledge on linking work and psychological well-being. Topics covered include psychological workplace (mal) adjustment; causes; assessment; types of work dysfunctions and other work placement-related adjustment problems; organisational strategies to manage and promote organisational and employee wellbeing; individual methods to promote psychological health in the workplace; the future of work and psychological health.

MOIP 734 Group Dynamics and Diversity

The module imparts knowledge on the theory and practical implications of workgroup dynamics and diversity in workplaces for purposes of improving workplace dynamics, employee productivity and organisational effectiveness; the need for managing diversity in the workplace; evaluation of paradigms used to promote positive group dynamics and diversity.

MOIP 735 Occupational Health and Wellness
The module builds on and covers concepts on employees' individual well-being, mental health, and personal responses to stress. It draws from various prominent models of human functioning and associated interventions that have been applied in workplace settings.

MOIP 736 Organisational Climate and Culture Management
The module provides knowledge on how organizational climate and culture influence employee motivation, job satisfaction and performance; the contribution of organizational culture to customer perceptions of service quality; enhancing organizational effectiveness, individual satisfaction and a sense of belonging to an organization.

MCP 737 Advanced Research Methods and Statistics
The module is a build-up of the undergraduate module. It equips students with advanced knowledge and skills in Triangulated research approaches; Technologically data gathering; and statistical data processing.

MOIP 737 Legal and Ethical Issues in Organisational and Industrial Psychology
The module covers standards for professional conduct as it applies to practice in the programme of study. It includes codes of conduct, ethical and legal decisions such as the scope of the profession, legal and ethical rights of clients, licensing laws, regulations and customs, and professional liability. Also covered are case examples, current regulations and standards for utilizing assessment data.

MOIP 738 Intercultural Communication in Organizations
The module prepares students for adaptation in the current dynamic and culturally diverse workplaces so as to avoid culture shock: With an increased globalization of workplace settings across most industries, today's organisations need a more precise understanding of intercultural communication in an effective management strategy. Topics covered include the benefits of intercultural communication such as increased teamwork and productivity by employees from different cultural/ethnic backgrounds.

MOIP 739 Talent Management in The Workplace
The module equips students with psychological theories for talent management in the workplace. The focus is on Reviewing current knowledge on themes, core processes, methods, and theories of personnel selection, training strategies and development, and career success; psychological causes of performance and career potential, interventions to motivate and retain employees, and socioeconomic implications of selecting, developing and retaining talent.

MOIP 831 Work Placement 1
(Before students begin their Work Placement 1, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The module provides an opportunity for students to integrate theoretical knowledge with professional practice. The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. Students document all client contacts and cases dealt with and attend a practicum session once every fortnight across the semester. At the end of the semester, they submit a file on cases handled.

MOIP 832 Consultation Psychology
The module prepares students to: Apply consultation models; Implement and manage change in the consultation process; Analyse consulting models such as the Doctor-Patient Model, the Process Consultation Model, and the Purchase of Expertise Model; Construct and present an appropriate consulting model in an organisation.

MCP 833 Advanced Psychometrics
The module builds on and covers concepts introduced and taught in the Honours Degree Programme. However, the focus is now in the context of the specialised programme of study, with more comprehensive content being covered.

MOIP 833 Consumer Behaviour and Psychology
This module prepares students to review current knowledge on themes, core processes, methods, and theories of Consumer Behaviour and Psychology. The focus is on psychological determinants of consumer implicit decision-making as well as examining the role of effect, and persuasion in academic and applied fields of consumer behaviour; examining practical implications of consumer behaviour, and how psychological theories/methods help predict and understand behavioural change.

MOIP 834 Organisational Leadership

The module aims to impart to students a knowledge base of the principles and theories of leader behaviour in organisational contexts for the purpose of evaluating and developing leader behaviour for improved organisational effectiveness.

MOIP 835 Work Placement 2
(Before students begin their Work Placement 2, it is a prerequisite that they register with the Allied Health Practitioners Council of Zimbabwe in their own individual capacities).

The placement is for 15 hours per week for 15 weeks at an appropriate site approved by the Department. The module integrates theoretical knowledge with professional practice. Students document all client contacts and cases dealt with at the placement. In addition, students will attend a practicum class once every fortnight across the semester. A file should be submitted to the Department at the end of the semester.

MOIP 836 Organisational Learning, Development and Change
The module imparts students' knowledge, critical reasoning ability and applied competence in organisational development (OD) and change. Topics covered include the selection, application and evaluation of knowledge on behavioural practices in an OD practice to address problems; ethical change management through establishing appropriate OD relationships; engaging in accurate organisational diagnosis, designing, implementing and evaluating OD interventions.

MOIP 837 Dissertation
The module provides guidelines for students on the whole research process. Working under the supervision of a lecturer in the Department, students plan, design, and conduct research on a topic of their interest. The topic must address current issues and the research must be in line with current trends in the programme of study. The guidelines cover all the requisite aspects of how to conduct and document research.

DEPARTMENT OF COMMUNITY STUDIES

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN SOCIOLOGY (HSOC)

Duration:	4 years
Actual Credit Load:	540
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	408
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

This programme is designed to provide students with a sound knowledge and understanding of sociological concepts and approaches to the study of contemporary society. It aims to equip students with the analytic concepts and methods to research the social world. The degree aims to produce skilled graduates who are innovative and have a sophisticated understanding of past and present societies and cultures. Students are given an opportunity to explore key aspects of society whilst learning the theoretical models and methodological frameworks used to analyse social institutions, structures interactions and processes.

2.0 ENTRY REQUIREMENTS

2.1 Normal Entry

At least five (5) 'O' levels including English Language and Mathematics with Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercials OR Relevant National Certificate.

2.2 Special Entry

A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

2.3 Mature Entry

Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3.0 PROGRAMME CHARACTERISTICS

3.1 Areas of Study

Sociology tries to address questions in three areas as follows:

- Development and Globalisation
- Sociology focuses on the development challenges emanating from the failure of development models and the challenges presented by globalization in the contemporary world such as inequalities, gender inequities, poverty and climate change.
- . Theoretical Constructs

o Sociology examines theoretical constructs and concepts that analyze societies from a historical and contemporary perspective and deepen understanding of individual and collective subjectivities.

o Research Methods

3.2 Specialist Focus: Sociology, Gender, Research and Development

3.3 Orientation: Research and innovation-oriented. Teaching and learning focus on equipping.
students with theoretical concepts and methodological approaches to assist students analyze their social world.

3.4 Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability: Opportunities exist in the private and public sectors in social welfare and humanitarian aid provision, the criminal justice system and policing institutions, marketing, tourism, social research, media, development work, policy development and analysis, Non and Inter-Governmental Organisations, youth work, health services management, monitoring and evaluation, housing management and human resource management.

4.2 Further Studies: Masters and doctoral studies in Sociology and Anthropology.

5.0 PROGRAMME DELIVERY

5.1 Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertation, lecture notes, assisted private studies and field trips, individual independent study.

5.2 Assessment Methods: Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment.

6.0 LEARNING OUTCOMES

On completion of the program, students must:

- Appreciate how society functions
- Understand development and its impacts
- Understand the salience of power in society
- Demonstrate knowledge and understanding of different and appropriate theories and their applicability in analyzing particular phenomena
- Have the ability to identify problems and develop appropriate, contextual social solutions.
- Have the ability to use appropriate research techniques to research different phenomena

- Have the ability to collect data in an ethical and appropriate manner
- Communicate effectively and present information using multi-media to both Sociologists and non-sociologists

7.0 GENERAL PROVISIONS
Refer to the University's General Regulations**.**

8.0 PROGRAMME ASSESSMENT
Continuous assessment: 40%
Written Examinations: 60%
Other: a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).
b) Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9.0 PROVISION FOR PROGRESSION
Refer to section 6 of the University's General Regulations.

10.0 FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.
Honorary degrees will be awarded to individuals who will have distinguished themselves in the field of Sociology and its subdisciplines. As such, the department may offer the following Honorary degrees:
1. Doctor of Sociology (DSOC)

11.0 GRADING AND DEGREE CLASSIFICATION
Refer to section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING
Refer to section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

SOC131 Introduction to Sociology

In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are expected to acquire critical, analytical and practical skills that will also serve them in other social science modules as well. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological theorising.

PSY132 Introduction to Psychology

The module introduces students to the fundamental principles of Psychology. It is designed to not only provide the tools necessary to study human behaviour and mental processes but to also present a sample of the major areas of Psychology as a discipline. The module explores the integrative domains of Psychology inclusive of biological, evolutionary, cognitive, developmental, social and clinical psychology. There will be a comprehensive coverage of core concepts, which are grounded in both classic studies, and in current and emerging research, including reference to the DSM-5 in discussions of psychological disorders. The emphasis of the module is two-fold: Firstly, to enable students to appreciate the diversity and

richness of the discipline of Psychology; Secondly, to acquaint students with important principles, theories, concepts and findings in Psychology.

SOC139 Introduction to Anthropology I
This module provides an introductory overview of Social Anthropology. A scientific analysis of forms of society, family, kinship, ethnicity and identity, economic and political relationships, consumption and exchange, rites of passage, meaning and cultural performances, social patterns and practices across societies and cultures, with a special interest in how people live in particular places and how they organize, govern and create meanings will be examined in this module. The module also examines the origins, development and cultural similarities and differences of the aforementioned practices and beliefs. This module challenges students to engage with other ways of knowing and being, and to rethink often taken-for-granted knowledge and beliefs.

PSY 133 Introduction to Social Psychology
This module builds students' knowledge of the scientific understanding of the nature and causes of individual and group behaviour and thought processes in social settings. It studies concepts that enable an understanding of the way people think about, feel, and behave, and how they influence and are influenced by others. Students are introduced to perspectives, research methods, and empirical findings of Social Psychology. Topics covered include impression formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping and prejudice. Throughout the module, emphasis will be placed on developing critical and integrative ways of thinking about theory and research in social psychology.

SOC110 Social Institutions
This module develops learners' sense of themselves as part of society. It uses a sociological approach, which encourages learners to ask questions about the social world in which we live and to use evidence to support explanations for human social behaviour. The module equips learners with knowledge and understanding of the sociological perspectives, theories and concepts used to investigate and explain aspects of the social world. The module offers opportunities for learners to actively investigate human society, and social institutions such as the family, education and religion.

PPM131 Introduction to Political Theory
The module explores the discipline of Political Science as a science in Social Studies with a focus on the study of processes, principles and structures of governments and political institutions.

PSY119 Contemporary and Applied Social Psychology
The module focuses on various challenges that Social Psychology can help to address. Topics covered include attitudes and attitude change, prejudice and discrimination, aggression, conflict and conflict resolution, group behaviour, social psychology in politics, law and health. Social psychological research has discovered basic human tendencies, such as the tendency to conform to social norms, and has also produced a vast range of applied studies that assist in addressing urgent topics from a socio-psychological perspective. This module helps students apply basic principles from Social Psychology to their field of interest, and to find, understand, interpret and use more specialized, applied research findings.

SOC111 Introduction to Anthropology II
This module places emphasis on politics, religion, ideologies, globalization and post-colonial anthropology. The linkage between politics and religion is examined in detail, tracing them from the pre-colonial era up to the post-colonial era. Different ideologies are analysed and how they affect people over time and across space. The module concludes by examining globalisation and its impact on socio-economic, political as well as cultural value systems in different societies.

SOC107 Social Problems
The module comparatively examines the linkages among social structures, culture and human experiences in the context of globalisation processes. Students examine a variety of topics which may include: the unequal distribution of power and wealth; issues of sex, sexuality, gender, race, ethnicity and social class; hunger; the role of multinational corporations; war and international conflict; oppression of various kinds; crime; poverty; the media; other social institutions; resource/environmental use and depletion and population.

SOC108 Sociology of the Family
The different kinds of families and marriages are analysed taking into account the influence of globalisation. The module tackles aspects of marriage and family such as bride -wealth, dowry, kinship, divorce, remarriage and family law. This module studies the family from a sociological perspective with a primary emphasis on continuity and change and variation across different historical eras. It examines the diversity of family life and how constellations of intimacy and care are shaped by gender, race, ethnicity, socioeconomic status, and sexuality.

CS131 Basic Communication Skills
Refer to regulations for the Department of Communication Skills.

HRM117 Principles of Human Resource Management
Refer to regulations for the Department of Human Resource Management.

HCS135 Introduction to Information Technology
Refer to regulations for the Department of Information Technology.

SOC201 Qualitative Research Methods
The module exposes students to the qualitative research paradigm. It discusses salient issues of practicality, ethics and politics in the research process. The course also delivers transferrable skills including critical reflections, the ability to interpret qualitative data and the ability to present ideas coherently. Included in this course is a wide range of qualitative research and data collection methodologies, which are currently used in development research and practice. Teaching methods will include group work, exercises as well as lectures and discussions.

SOC 204 Social Movements
This module addresses issues about collective protests, movements, dissidence etc. Students shall be equipped with sociological theories on the emergence and trajectories of social movements as well as understanding the similarities and differences between historical and modern social movements. Case studies of global, regional and national social movements by the working class, civil rights activism, nationalism, feminism, environmentalism, poor peoples' movements and urban riots shall be used.

SOC207 Contemporary Social Theory
The module creates an appreciation of the centrality of social theory in sociology and the analysis of social phenomena. Students develop an ability to apply sociological theories in the analysis of everyday phenomena. The module builds up on previous social theory modules and is meant to give students an in-depth understanding of contemporary theories and developments in the arena of social theory.

SOC206 Quantitative Research Methods
The module lays the basis for the development of competencies in quantitative research methods and statistics. Emphasis is placed on the theoretical framework of quantitative research methodology, and the acquisition of statistical concepts.

SOC208 Sociology of Organisations
The module acquaints students with sociological issues of organizations. It intends to encourage students to apply sociological theories and to critically analyse organizations in their different cultural environments.

GSSS201 Gender Studies for Social Sciences
This module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing GSSS 201 adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

SOC210 Classical Social Theory
The module appraises students on the significance of the main theoretical and epistemological underpinnings in the discipline. It reviews classical sociological theory. It also creates a practical application of social theory as students are set to acquire skills to enable them to have a critical approach to social phenomena in real life.

SOC211 Sociology of Human Sexuality
The module examines the different theoretical approaches to the study of human sexuality and their underlying assumptions. The module focuses on sexual identity and orientation, the impact of changing gender relations on sexuality and sociological influences that shape human sexual behavior. The module also examines historical and cross-cultural case studies on how different societies approach sexuality, construct its meaning and provide ‘sexual scripts’.

SOC212 Sociology of Violence
The module examines the nature and causes of violence in the context of contemporary society and how the structure of society itself, as well as various social factors, contribute to violence. This module further explores types of violent behaviour, including interpersonal, collective and organisational.

SOC213 Crime and Deviance
The module explores the contemporary debate surrounding society, crime, juvenile delinquency, deviance, conformity and social control. It also addresses the key issues and relationships between society, crime, deviance and the governmental and judicial responses to them.

SOC214 Sociology of Development
The module gives students an understanding of emerging sociological debates in Development. Students are exposed to a critical analysis of debates surrounding development in both Western and non-Western societies at both the macro and micro levels. The module also assesses macro and micro-scale development processes from a sociocultural perspective.

SOC215 Sociology of Medicine and Healthcare
This module provides an introduction to the ways in which the medical profession and medical technology are embedded in society and culture. It examines how medicine is connected to various socio-cultural factors such as gender, social class, race and administrative culture. It examines processes of medicalization and de-medicalization. The module also explores alternative medical practices and how they differ from conventional medical paradigms.

SOC216 Sociology of Sport
This module examines sport in modern societies with close attention paid to the distinctive features of sport in Zimbabwe. The aim of this module is to understand the socio-cultural patterns in the organisation, participation, and mediation of sport and sporting practices and to familiarise students with their respective implications. It examines the relationship between sport and the economic, political and educational institutions. Contemporary issues, including racial and gender inequality, violence, drugs/doping and sport media shall also be considered.

MSS 218 Principles of Public Relations
Refer to regulations for the Department of Media and Society Studies.

ENT205 Entrepreneurship 1
Refer to regulations for the Department of Entrepreneurial Studies.

SOC330 Work-Related Learning Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

SOC341 Work-Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

SOC342 Work-Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

SOC343 Work-Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

SOC401 Race, Class and Identities
The module provides a unique perspective to understanding how groups of people from different races, classes, ethnic groups or other cultures interact. It focuses on cultural diversity and various dimensions of discrimination and prejudice, including an analysis of inequality and its origins, conditions under which inequality occurs and persists, changing inequality, and ways to deal with minority group problems in social institutions including education, employment, housing, migration and policing and the impact of anti-discrimination legislation.

SOC406 Dissertation
This is a double module and students are expected to put into conduct research putting into practice methodological issues they were taught in various research modules. The idea is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

SOC408 Social Gerontology: Ageing and Society

The module focuses on ageing with emphasis on demographic trends, individual aspects of ageing such as family and social support networks, retirement and adaptation to ageing. Particular emphasis is given to issues surrounding ageing and society including the economy, politics, health and social services and public policy i.e. both nationally and at the local level. Specific African case studies shall be utilised.

SOC409 Drugs and Society
This module focuses on the social reality of drug use and drug users. It explores the historical significance and social construction of drug use, users, abuse and addiction. Special emphasis shall also be made on the relationships between individual and group behaviour and their relationship to society. In addition, this module analyses issues surrounding drug use and its relationship to crime and medicalisation in society.

SOC410 Project Planning, Management, Monitoring and Evaluation
The module introduces students to the concepts, procedures, tools and techniques of project planning, management, monitoring and evaluation. It familiarises students with key principles and practices in the management, monitoring and evaluation of humanitarian and development projects and equips students with financial and project management skills appropriate for entry-level employment in a development agency. It describes the management approaches of key players in the development process; the donors, implementing agencies and recipients.

SOC412 Gender and Power
This module builds on the foundations laid in GS201 Introduction to Gender. The module focuses specifically on sociological concepts and constructs that explore the gendered terms upon which power dynamics play out. The module looks at how gender categories are constructed and re-negotiated over time as well as shifting power dynamics in different institutions. The module also situates gender within race, class and power configurations in different contexts.

SOC413 Economy, Society and Governance
The module provides students with an understanding of how the three are linked to each other. The main aim is to look at how the economy affects society and how it is governed and vice-versa. Students are exposed to examples from African as well as non-African societies at both the macro and micro levels. The module explores how the three affect social life in different ways.

SOC414 Sociology of the Environment
This is a development module that mainly focuses on people and the environment. It aims to expose students to various aspects of development with a view to offer an in-depth understanding of sustainable development and livelihoods. Through this module, students develop an appreciation of the need to conserve the locally available natural resources through a variety of strategies. Students are expected to use theoretical frameworks in making informed arguments on the dialectal relationship between people and the environment.

SOC415 Social Policy and Administration
This module provides students with an understanding of the contemporary debates and issues in the field of social policy and administration, with special reference to the African context. It highlights theoretical as well as technical concerns in the process of public policy analysis and formulation. The module encourages students to understand policy within the broad arena of governance and emerging democratic practice in chosen African countries. The impact of globalisation on policy processes and outcomes are also analysed.

SOC416 Labour Studies
The module introduces basic themes and issues in the study of labour and technology. The module examines work and labour markets in a global context and the dynamics of contemporary technological change in the social and economic position of labour. The module allows students to explore the basic issues regarding technological innovation, industrial democracy, labour migration and the new social movements. Issues of gender, class and age are also examined in this broad analytical framework.

SOC417 Migration
The module examines various theories of migration and looks at the causes and socio-economic impacts of migration particularly on developing countries. The module looks at local, regional and global patterns of migration, whilst considering the different ways in which migration has been studied and theorised. Students are introduced to a number of key concepts and debates in contemporary migration research, as well as a range of empirical examples.

SOC418 Rural and Urban Development
This module provides students with in-depth knowledge of contemporary issues related to Rural and Urban Development. Furthermore, it aims at developing the students' critical thinking abilities through exposure to a variety of developmental theories.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN ANTHROPOLOGY (ANTH)

Duration	4 years
Actual Credit Load	480
Minimum Credit Load	480
Maximum Credit Load	540
MBKS Credit Load	384
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

This programme offers students an exciting opportunity to study how human beings give meaning to behaviour through diverse social norms, values, practices and means of organisation. The role of an Anthropologist is to explore and understand "other" cultures and societies through the use of ethnography. Anthropologists use various data collection tools to study human behaviour in its natural setting and this is critical when developing people-centred policy strategies. Anthropologists are committed to engaging in the resolution of current national social problems using evidence-based methods of inquiry which are valid and reliable. Anthropology as a discipline produces high-profile researchers who can engage with a wide array of development-related issues and contribute to finding solutions to issues which negatively impact social cohesion.

2.0 ENTRY REQUIREMENTS

Normal Entry

At least five (5) 'O' levels/ National Foundation Certificates including English Language and Mathematics with Grade C or better and at least two (2) Advanced level passes in Arts, Sociology, Humanities OR Relevant National Certificate.

Special Entry

A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualifications Framework (ZNQF).

Mature Entry

Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study

Anthropology seeks to address questions in three areas as follows:

1. ***Social Anthropology***

The programme aims to familiarise students with intellectual debates in anthropology and demonstrate how anthropology is sensitive to the contested nature of knowledge hence its ability to keep generating new theories and refocusing content to remain relevant to national and global priorities. Anthropology students will have a deeper understanding of diverse societies and cultural practices in areas such as marriage, religion and everyday life. Anthropologists have also moved away from predominantly studying traditional societies to analysing contemporary social contexts such as transnational migration and diaspora identities, post-colonial identities and globalisation.

2. ***Theoretical Constructs***

Anthropology is rooted in a sound theoretical tradition which will enable students to develop critical analytical skills.

3. ***Research Methods***

Through the use of anthropological methods of inquiry, this programme aims to foster the systematic and comparative study of human institutions and behaviour and achieve an understanding of the cultural diversity which humanity is increasingly confronted with.

Specialist Focus: Social anthropology, culture, production and economic systems, development, kinship.

Orientation: Through the use of ethnographic studies and other case material from Africa and Zimbabwe, this programme aims to foster the development of home-grown, innovative solutions to social problems being experienced in Zimbabwe. Students will be equipped with theoretical concepts and methodological approaches that they will use to carry out research that informs policymakers, government, cultural practitioners, environmentalists, Non-governmental organisations and other Non-State actors.

Distinctive Features: To equip students with the skills to challenge predominant Western-based knowledge systems and literature that exist within the discipline of anthropology.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Candidates graduating with a Bachelor of Science Honours Degree in Anthropology can work in a variety of social science environments that are development-related, in the private, public, and non-profit sectors. Anthropologists can be employed in teaching and/or research-oriented organisations, including schools, colleges, think tanks, and universities, in museums, heritage and cultural sites, and in corporate environments as researchers, among others. Anthropologists can also be employed in cultural and natural resource management, advocacy work, museum curation and as ethnologists. Graduates can also be employed in various government departments and in the NGO sector.

Further Studies: Masters and Doctoral studies in Sociology and Anthropology, Public Health, Ethnology, Archaeology

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertation, lecture notes, assisted private studies and field trips, individual independent study.

Assessment Methods: Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment.

6.0 LEARNING OUTCOMES

Upon completion of the degree, students should be able to:

- Demonstrate an understanding of the major concepts, questions and theoretical approaches in Anthropology.
- Apply Anthropological concepts in the analysis of social and cultural phenomena.
- Demonstrate knowledge of cultural variation and the diversity of perspectives, practices, and beliefs found within cultures and across cultures.
- Carry out Anthropological research using appropriate theories and methods.
- Communicate anthropological findings and arguments using appropriate concepts and idioms of the discipline.

7.0 GENERAL PROVISIONS

Refer to the University's General Regulations.

8.0 PROGRAMME ASSESSMENT

Coursework: 40%
Written Examinations: 60%
Other: a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).
b) Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work-Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by the Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

SOSP 101 Introduction to Sociology

In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are expected to acquire critical, analytical and practical skills that will also serve them in other social science modules as well. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological theorising.

ANTH 101 Introduction to Social Anthropology

The module explores conceptual and developmental issues in social anthropology. It starts by exploring the conceptual issues relating to the emergence of social anthropology. It addresses topics such as ideology, politics, production and economic systems, law and order, and leadership in traditional and modern states. The module probes the opportunities and challenges that culture poses for African and other developing economies. Particular attention is paid to comparative and holistic perspectives. Ethnocentrism and cultural relativism are looked at in the light of globalisation. The module remains

true to anthropology through numerous case studies and various methods of investigation employed in this discipline. Ultimately, the module appraises the role played by anthropology in augmenting sociology in order to holistically address the broader social, economic and political conundrums of contemporary society.

ANTH 102 Human Evolution

This module provides students with an overview of human biological and cultural evolution concepts and theories. Students will be introduced to the basic fundamentals of the study of ancient human beings and their environment. Debates in this area are premised on evidence provided by archaeology, biology and social anthropology. Some of the topics to be covered in this module include the science behind human evolution, primate origins, evolution of the brain, climate change and evolution.

CS131 Basic Communication Skills
Refer to regulations for the Department of Communication Skills.

HCS135 Introduction to Information Technology
Refer to regulations for the Department of Information Technology.

ANTH 103 Issues in Anthropology
Contemporary international migrations and communications are bringing societies into direct contact with peoples of many regions with different values and ways of life. They are, accordingly, faced with the challenge of tolerating and appreciating other cultural perspectives in order to avoid the dismal alternatives of increased ethnic nationalism, hostility, and violence. This module focuses on the basic concepts and findings of anthropology, the systematic and comparative study of human institutions and behaviour, and will achieve an understanding of the cultural diversity with which we are increasingly confronted and the common humanity that runs through it. This module covers the major specialisations within the field of anthropology with an emphasis on the comparative study of contemporary cultures.

ANTH 104 Anthropology of Religion

From its start, Anthropology has been preoccupied with religion, ritual and magic. Even now, as societies undergo development, new forms of religious consciousness appear in different spaces, with different intensities. In this module, students get to understand how and why religion continues to provide meaning in fast-changing societies, as well as to provide the basis of order in the face of inequalities that dogs develop.

ANTH 105 Anthropology of the Media

This module is about media and social representation. It also examines how the media reflects the economic structure of society. By the end of the module, students should be able to understand economic interests in society and how these accurately get reflected in film, news, music, novels, and television.

SOSP 104 Social Institutions
This module develops learners' sense of themselves as part of society. It uses a sociological approach, which encourages learners to ask questions about the social world in which we live and to use evidence to support explanations for human social behaviour. The module equips learners with knowledge and understanding of the sociological perspectives, theories and concepts used to investigate and explain aspects of the social world. The module offers opportunities for learners to actively investigate human society, and social institutions such as the family, education and religion.

GSSS201 Gender Studies for Social Sciences
This module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS 201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ANTH 201 Ethnographic Studies
This module explores ways in which anthropologists have adapted and innovated ethnographic approaches, methods and questions to the challenges of the modern world at the dawn of the third millennium. Focused on specific instances of ethnographic fieldwork, the course explores such topics as the dialectics of self and other, the multi-sited nature of fieldwork, changing conceptions of ethics, and the challenges of modernity, globalisation, and transnationalism in their many guises for anthropological field research. The course seeks to explore ways in which the practice of anthropological research has reshaped anthropological questions and the way in which we address them.

ANTH 202 Marriage, Family and Kinship
This module explores the social function of marriage, family and kinship relationship. The module examines the role played by different forms of relationships in social and community cohesion. Issues to be explored include the institution of the family from a cross-cultural perspective, descent and kinship, incest taboo, marriage, kinship and social relations, gender and kinship and new reproductive technologies. Some other related issues such as adoption, single parenthood, and fictive kinship will also be discussed.

ANTH 203 Social Anthropological Theory
This module explores fundamental theoretical frameworks in Social Anthropology. Over the years, there has been the development of different schools of thought in the discipline of anthropology. Some of these key theories include historical particularism, culture and personality school, French structuralism, cultural ecology and neo-evolutionism, post-modern school and feminist anthropology. This course helps students appreciate the critical issues explored in Social Anthropology across different historical, social, political, and economic contexts. It equips students with the requisite analytical skills they need to explain and describe different social phenomena.

SOSP 201 Qualitative Research Methods
The module exposes students to the qualitative research paradigm. It discusses salient issues of practicality, ethics and politics in the research process. The module also delivers transferrable skills including critical reflections, the ability to interpret qualitative data and the ability to present ideas coherently. Included in this module is a wide range of qualitative research and data collection methodologies, which are currently used in development research and practice. Teaching methods will include group work, exercises as well as lectures and discussions.

ANTH 204 Sex, Culture and Society
This module explores the social and cultural dimensions of sexuality. The biomedical approach dominated much of the social construction of sexual experience during the 20th century. However increasingly, detailed cross-cultural studies of sexual life are being undertaken. There is a growing recognition of the complex relationship between culture and power as well as increasing attention to the political and economic dimensions of sexuality. This module challenges students to confront the silences and invisibilities that seem to characterise this area of sexuality and culture.

SOSP 206 Quantitative Research Methods
The module lays the basis for the development of competencies in quantitative research methods and statistics. Emphasis is placed on the theoretical framework of quantitative research methodology, and the acquisition of statistical concepts.

SOSP 207 Contemporary Social Theory
The module creates an appreciation of the centrality of social theory in sociology and the analysis of social phenomena. Students develop an ability to apply sociological theories in the analysis of everyday phenomena. The module builds up on previous social theory module and is meant to give students an in-depth understanding of contemporary theories and developments in the arena of social theory.

ANTH 205 Transnational Migration and Diaspora Identities
This module explores the transnational migration phenomenon by exploring its various facets. It explores the practical experiences of migrants in the diaspora, examining their economic and political experiences. Further, it examines issues of inclusion and exclusion and the making of the 'Other' and how migrants have transcended these dynamics. The module also explores various debates on long-distance family connections and love relationships. The ideas of home-making for migrants and their social, economic and political networks of survival are examined. The module explores the significance of migrant remittances, and the challenges and fears of migrants such as arrests, detention, crime, death and deportation.

ANTH 206 Medical Anthropology
Medical anthropology considers the cultural and social aspects of the body, health, sickness, and healing from a cross-cultural perspective. This module introduces some of the innovative research being conducted in the rapidly growing field of medical anthropology. The module looks at an overview of diverse theoretical approaches to studying health and well-being, exploring the various ways in which "culture" has been used in discourses on health. After building this foundation, the remainder of the module examines topics such as medicalisation, alternative forms of medicine; authoritative knowledge, and beliefs; global inequities, local desires, and modern plagues; and the phenomenology of disability, death, and medical school. Through these examples, the module illustrates the diversity of theoretical perspectives in medical anthropology, including interpretive approaches, critical theory, and phenomenology.

ANTH 207 Anthropology of Industrialisation and Industrial Life
This module offers a comprehensive anthropological overview of industrialisation in both Western and non-Western societies. Based on contemporary and historical ethnographic material, the course will unpack the 'world of industry' in the context of the shop floor, the family, and the city, revealing the rich social and political texture underpinning economic development. It also provides a critical discussion of the assumptions that inform much of the social science literature on industrialisation and industrial 'modernity'. The module will explore the historical development of industrial capitalism;

shop floor organisation; the relationships between the workplace and the home; the teleology of industrial 'modernity' and working-class consciousness.

ANTH300 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

ANTH301 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

ANTH302 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

ANTH303 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

ANTH 401 Anthropology of Development and Humanitarianism
Development is a key feature of societies, particularly in the South. In this module, students get to understand how development is conceived and executed. They also get to understand how the state, donors, and humanitarians perceive the other, and how they also try to use development to control people.

ANTH 402 Post Colonial Identities
This module explores the ideas of the formation of postcolonial identities in African, Caribbean and South Asia literary texts. The module examines the postcolonial theory and the ways in which postcolonial identities are interpreted. The module also examines the processes of identity formation as presented in the literature and provides a social critique. The module explores how literary texts characterise the changing world and the role of selfhood in that dynamism. Further, the module explores how texts attempt to balance literary concerns within wider socio-political and economic realities, taking into consideration the question of race, ethnicity and diversity.

ANTH 403 Social Marginalisation
This module explores the meaning as well as the politics of marginalisation and exclusion by exploring how some groups are privileged at the expense of others. Key issues to be discussed include sociocultural, economic and political factors that influence marginalisation. Cultural meanings and how these animate the production of space, social differences and the way people experience them will also be explored.

ANTH 404 Rural and Urban Anthropology
This module examines the interlinkages between rural and urban communities. This course seeks to explore important differences and parallels that occur along a rural-urban continuum of geography, and culture as well as problems that both rural and urban communities face in development. The module explores the conceptual and practical contributions of rural anthropology, its historical roots and development through peasant communities' studies; diversity in rural communities along class, race and ethnicity, land tenure, reform, poverty and food security. In addition, this module introduces students to the significance and development of urban anthropology within socio-cultural anthropology and core themes and debates in the field of urban anthropology. It is structured to introduce students to important theoretical perspectives that inform anthropologists' studies of urban contexts and to investigate research themes through case studies.

ANTH 405 Environmental Anthropology
With the contemporary environmental crisis as its backdrop, this course examines some classic and contemporary anthropological approaches to the environment and environmentalism: cultural ecology, political ecology, environmental history, science studies, post-structuralism cultural studies, and environmental justice. In addition, students will also study world systems of agriculture across time and space, development ideas, impacts of globalization, and alternatives to a global capitalist world system. This module emphasises the interconnectedness of human-nature interactions to explain anthropological approaches to the environment. The module will also explore contemporary environmental issues including biodiversity conservation, deforestation, community-based and transboundary natural resource management, eco-tourism, and climate change.

ANTH 406 Dissertation

This is a double module and students are expected to research putting into practice methodological issues they were taught in various research modules. The idea is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

ANTH 407 Economic Anthropology
The central concern of economic anthropology is to understand better the complex nature of socio-economic systems. While students will familiarise themselves with some basic economic principles, this is not an economics course for social science students. In this course, students will critically examine: the variety of human socio-economic systems and factors which shape them; the major theoretical foundations and debates regarding human 'economic' behaviours, i.e. how and why people think about the world of 'goods' and how these 'goods' fit into our lives. With that understanding, we can then examine the practical and policy implications of globalisation and economic change on the material well-being of people in diverse contemporary societies.

ANTH 408 Anthropology of Tourism and Travel
This module explores tourism as both a social and a cultural construct that has been shaped by different historical formations. The module views tourism as a complex issue because of its economic and political implications. This module also examines the positioning of tourism as a means of global interaction which facilitates visibility and exposition of its internal aspects. The module further seeks to understand different dimensions of tourism by looking at issues of locality, identity and place-making as well as heritage and the political economy of place and space.

ANTH 409 Globalisation and Social Anthropology
The module examines the social and cultural dynamics of globalisation based on anthropological and sociological theory as well as ethnographic studies from across the world. This module explores the intricate and shifting flows of people, capital and material goods. Topics to be covered include the global systems of production and consumption, the internet and other media, cross-cultural consumption of goods and practices such as clothing, arts and food across the globe. The module enables students to examine cultural homogenisation and diversification, and social and economic inequality.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN INDUSTRIAL SOCIOLOGY (INDSO)

Duration	4 years
Actual Credit Load	540
Minimum Credit Load	480
Maximum Credit Load	540
MBKS Credit Load	384
ZNQF Level	8

1. PURPOSE OF THE PROGRAMME

Industrial Sociology is one of the most important areas of focus in Sociology. Industrial Sociology is a specialised area of study that seeks to provide students with a comprehensive understanding of the changing nature of work, industrial relations, management practices, trends in technological transformation, the gendered nature of paid and unpaid work, the organisation of labour and the maximisation of organisational efficacy. The degree aims to produce students who meet the needs of industry by being equipped with critical or analytical skills that enable them to formulate appropriate strategies and policies that improve organisational performance.

2. ENTRY REQUIREMENTS

Normal Entry
At least five (5) 'O' levels/, English Language and Mathematics and with Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercials OR Relevant National Certificate.

Special Entry
A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry
Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and Mathematics, have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3. PROGRAMME CHARACTERISTICS

Areas of Study
Industrial Sociology seeks to address questions in three areas as follows:

***Work and industrial relation*s**
Industrial Sociology is premised on understanding the world of work, and trends in industrial relations in Zimbabwe and Africa. This programme seeks to explore how patterns of work have changed since the Industrial Revolution and continue to change through the process of globalisation and technological advancements. It also seeks to address the question of how workers experience and cope with the pressure, insecurities and inequalities of a restructured workplace.

Theoretical Constructs
In line with Sociological tradition, Industrial Sociology examines theoretical perspectives on the Sociology of Work and Industrial relations.

Research Methods
Through utilisation of Sociological methods of inquiry, this programme seeks to equip students with the requisite skills to develop a collection of research that is focused on the social, technological, economic and cultural features of work and labour.

Specialist Focus: Sociology, work, industrial revolution, industrial relations, technological advancement, gender and the workplace.

Orientation: This programme aims to expose students to the rapid transformation taking place in work and economic life. Through the application of research methodologies and sociological principles to the workplace, this programme aims to build a body of knowledge on work studies in Zimbabwe. These studies will be used to proffer solutions to industrial challenges in Zimbabwe.

Distinctive Features: This programme is designed to produce students who are uniquely positioned to contribute to the national industrialisation programme. This is to be achieved through equipping students with problem-solving skills that enable students to contribute to the national industrialisation programme.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers and opportunities exist in private and public sectors, non-state organisations and non-governmental organisations in labour relations practice, arbitration, conflict management and resolution in the workplace and trade union organisations.

Further Studies: Masters and doctoral studies in Sociology and Anthropology,
Masters and Doctoral Studies in Industrial and Economic
Sociology.

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertation, lecture notes, assisted private studies and field trips, individual independent study.

Assessment Methods: Written and oral examinations, tests, work-related learning, seminar presentations, mini-research projects, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment.

6. LEARNING OUTCOMES

On completion of the program, students must:

- Have a sound understanding of the role of work in contemporary society within the context of sociological thinking and research.
- Be able to identify how the study of work- and work-related institutions fit into the wider sociological discipline.
- Demonstrate knowledge and understanding of relevant sociology of work theories and how they can be applied in analysing particular phenomena.

- Show an in-depth understanding of industrial relations, work design and organisational change.
- Have the ability to use appropriate research techniques to research different phenomena.
- Have the ability to collect data in an ethical and appropriate manner.
- Communicate effectively and present information using multimedia to both Sociologists and non-sociologists.

7. GENERAL PROVISIONS

Refer to the University's General Regulations.

8. PROGRAMME ASSESSMENT

Coursework: 40%
Written Examinations: 60%
Other: a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).
b) Work-Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work-Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9. PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10. FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11. GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12. DEGREE WEIGHTING

MODULE SYNOPSES

SOSP 101 Introduction to Sociology

In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are expected to acquire critical, analytical and practical skills that will also serve them in other social science modules as well. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological theorising.

SOSP108 Introduction to Social Anthropology

The module explores conceptual and developmental issues in social anthropology. It starts by exploring the conceptual issues relating to the emergence of social anthropology. It addresses topics such as ideology, politics, production and economic systems, law and order, and leadership in traditional and modern states. The module probes the opportunities and challenges that culture poses for African and other developing economies. Particular attention is paid to comparative and holistic perspectives. Ethnocentrism and cultural relativism are looked at in the light of globalisation.

PSY132 Introduction to Psychology

The module introduces students to the fundamental principles of Psychology. It is designed to not only provide the tools necessary to study human behaviour and mental processes but to also present a sample of the major areas of Psychology as

a discipline. The module explores the integrative domains of Psychology inclusive of biological, evolutionary, cognitive, developmental, social and clinical psychology. There will be a comprehensive coverage of core concepts, which are grounded in both classic studies, and in current and emerging research, including reference to the DSM-5 in discussions of psychological disorders.

CS131 Basic Communication Skills
Refer to regulations for the Department of Communication Skills.

HCS135 Introduction to Information Technology
Refer to regulations for the Department of Information Technology.

INDSO 101 Introduction to Industrial Sociology

This module introduces students to a detailed history of the workplace focusing on the industrial revolution and theoretical perspectives of the workplace. Workplace theories explored in this module include the works of Adam Smith, Frederick Taylor, Karl Marx, Harry Braverman and others.

SOSP 104 Social Institutions
This module develops learners' sense of themselves as part of society. It uses a sociological approach, which encourages learners to ask questions about the social world in which we live and to use evidence to support explanations for human social behaviour. The module equips learners with knowledge and understanding of the sociological perspectives, theories and concepts used to investigate and explain aspects of the social world. The module offers opportunities for learners to actively investigate human society, and social institutions such as the family, education and religion.

SOSP 416 Labour Studies
The module introduces basic themes and issues in the study of labour and technology. The module examines work and labour markets in a global context and the dynamics of contemporary technological change in the social and economic position of labour. The module allows students to explore the basic issues regarding technological innovation, industrial democracy, labour migration and the new social movements. Issues of gender, class and age are also examined in this broad analytical framework.

PSY133 Introduction to Social Psychology
This module builds students' knowledge of the scientific understanding of the nature and causes of individual and group behaviour and thought processes in social settings. It studies concepts that enable an understanding of the way people think about, feel, and behave, and how they influence and are influenced by others. Students are introduced to perspectives, research methods, and empirical findings of Social Psychology. Topics covered include impression formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping and prejudice. Throughout the module, emphasis is placed on developing critical and integrative ways of thinking about theory and research in Social Psychology.

SOSP 201 Qualitative Research Methods
The course exposes students to the qualitative research paradigm. It discusses salient issues of practicality, ethics and politics in the research process. The course also delivers transferrable skills including critical reflections, the ability to interpret qualitative data and the ability to present ideas coherently. Included in this course is a wide range of qualitative research and data collection methodologies, which are currently used in development research and practice. Teaching methods will include group work, exercises as well as lectures and discussions.

SOSP 210 Classical Social Theory
The module appraises students on the significance of the main theoretical and epistemological underpinnings in the discipline. It reviews classical sociological theory. It also creates a practical application of social theory as students are set to acquire skills to enable them to have a critical approach to social phenomena in real life.

HRM 139 Industrial Relations
The module is intended to enable students to; understand and appreciate the employment relationship; understand and appreciate the origins of industrial relations and the 'worker problem'; and understand the theoretical issues underpinning the collective bargaining role of trade unions.

ENT 205 Entrepreneurship 1
Refer to regulations for the Department of Entrepreneurial Studies.

GSSS 231 Gender Studies for Social Sciences
This module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS 201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

SOC213 Crime and Deviance
The module explores the contemporary debate surrounding society, crime, juvenile delinquency, deviance, conformity and social control. It also addresses the key issues and relationships between society, crime, deviance and the governmental and judicial responses to them.

HRM 233 Elements of Labour Law
The module is intended to enable students to; highlight the basis and significance of the contract in the employment relationship. It enables students to analyse the contract of employment in terms of the legal regulations of economic activity within the labour market.

SOSP 206 Quantitative Research Methods
The module lays the basis for the development of competencies in quantitative research methods and statistics. Emphasis is placed on the theoretical framework of quantitative research methodology, and the acquisition of statistical concepts.

SOSP 207 Contemporary Social Theory
The module creates an appreciation of the centrality of social theory in sociology and the analysis of social phenomena. Students develop an ability to apply sociological theories in the analysis of everyday phenomena. The module builds up on previous social theory module and is meant to give students an in-depth understanding of contemporary theories and developments in the arena of social theory.

INDSO 201 Organisational Change and Development

This module is designed to equip students with theories and methods associated with organisational change and development in contemporary workplaces. Students will be exposed to a number of organisational issues that include the need for change, why organisations change or fail to change, legal and regulatory issues associated with change, how change assists organisations in becoming more competitive and profitable and management techniques to change effectively. This module also looks at the role of leadership in organisational change, why people resist change and planned change.

SOSP 208 Sociology of Organisations
The module acquaints students with sociological issues of organizations. It intends to encourage students to apply sociological theories and to critically analyse organizations in their different cultural environments.

SOSP 203 Different Ability Studies (Critical Perspectives)
The interdisciplinary course in Different Ability Studies previously conceptualized as “Disability Studies” seeks to sensitize students and raise awareness of the challenges faced by Differently Abled persons in Society. The course provides an overview of the purposeful, unequal treatment experienced by people with disabilities in Zimbabwe. The course will investigate issues to do with social justice, different cultural perspectives on disability, and differences in the conception of embodiment.

SOSP246 Sociology of Sport

This module examines sport in modern societies with close attention paid to the distinctive features of sport in Zimbabwe. The aim of this module is to understand the socio-cultural patterns in the organisation, participation, and mediation of sport and sporting practices and to familiarise students with their respective implications. It examines the relationship between sport and the economic, political and educational institutions. Contemporary issues, including racial and gender inequality, violence, drugs/doping and sport media shall also be considered.

INDSO330 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

INDSO331 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

INDSO332 Work-Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

INDSO333 Work Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

INDSO 401 Gender and Work

This module is designed to develop students' understanding of the gendered nature of paid and unpaid work. The module considers the origins and explanations of gender-based systematic differences between women and men in the workplace and home. The module addresses gender issues at work which are often subtle and intricately interwoven with organisational, legal, societal and cultural aspects. In addition, the module explores women's and men's changing roles in the economy, and the changing patterns of family life. Topics to be covered include barriers to women's effective participation in the workplace, flexible work, work-life balance, gender occupational segregation, gender pay gap, sexual harassment gender, power and leadership.

HRM 134 Labour Economics

The module is intended to enable students to; examine how labour markets operate in practice, introducing the concepts of unemployment and wage rigidity; and analyse labour market theories in relation to human resource management with a focus on the 'flexibility' notion.

INDSO 403 Management of Workforce Diversity

Workforce diversity is common in many contemporary workplaces and diversity has become the norm rather than the exception. Managing the challenges of an increasingly diverse workforce is critical in the workplace. This module prepares students for issues that they will encounter in their future roles as employees and managers in business, government, and non-governmental organisations. Some of the topics to be covered include individual and group perspectives on diversity, diversity and the change process and inclusion strategies.

INDSO 404 Workers, Change and The New International Division of Labour

This module addresses contemporary issues in the workplace focusing on how global production chains have been changing to meet the needs of capital. The module explores the global shift of manufacturing industries from capitalist economies to developing countries. The module will enable students to analyse the origins of the global labour market, its uneven patterns, the role of transnational companies in developing countries, the global accumulation of capital; and Africa and the New International Division of Labour.

SOSP408 Social Gerontology: Ageing and Society

The module focuses on ageing with emphasis on demographic trends, individual aspects of ageing such as family and social support networks, retirement and adaptation to ageing. Particular emphasis is given to issues surrounding ageing and society including the economy, politics, health and social services and public policy i.e. both nationally and at the local level. Specific African case studies shall be utilised.

SOSP401 Race, Class and Identities

The module provides a unique perspective to understanding how groups of people from different races, classes, ethnic groups or other cultures interact. It focuses on cultural diversity and various dimensions of discrimination and prejudice, including an analysis of inequality and its origins, conditions under which inequality occurs and persists, changing inequality, and ways to deal with minority group problems in social institutions including education, employment, housing, migration and policing and the impact of anti-discrimination legislation.

INDSO 405 Conflict Management in The Workplace

Conflict is ubiquitous in all societies and workplace conflict may appear in various forms from personality conflict between employees to conflict with supervisors. This module is designed to equip students with conflict resolution skills in the workplace. Topics to be covered include identifying causes of conflict, how to manage conflict in the workplace, labour dispute management mechanisms in Zimbabwe, collective bargaining, conciliation and mediation, company policies and procedures to manage conflict and tripartism.

INDSO 406 Dissertation

This is a double module and students are expected to put into conduct research putting into practice methodological issues they were taught in various research modules. The idea is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

INDSO 407 Management and Organisational Behaviour
This module is designed to equip students with a grounding in the history and development of organisational behaviour, theories and concepts. This area of study focuses on how attributes and behaviours of individuals and groups influence the culture design, ethics, learning and structure of an organisation. The module will assist students in applying contemporary approaches to communication in organisations, decision-making, leadership, motivation, negotiation, power and politics within a team environment.

INDSO 408 Society, Technology and Work
This module introduces students to sociological perspectives that analyse the complexities and interactions between technology, organisations and work practices. Technological transformation is a key feature of capitalist economies. The inception of new technology in the workplace transforms the production process. This module is designed to enable students to critically analyse the role of technology in contemporary workplaces, and how technology can be used as a form of control and surveillance by management. Topics to be covered include technology and society, the Fourth Industrial Revolution, technology and work- deskilling or upskilling, technology labour saving or intensifying, and technology and globalisation.

SOSP413 Economy, Society and Governance
The module provides students with an understanding of how the three are linked to each other. The main aim is to look at how the economy affects society and how it is governed and vice-versa. Students are exposed to examples from African as well as non-African societies at both the macro and micro levels. The module explores how the three affect social life in different ways.

SOC417 Migration
The module examines various theories of migration and looks at the causes and socio-economic impacts of migration particularly on developing countries. The module looks at local, regional and global patterns of migration, whilst considering the different ways in which migration has been studied and theorised. Students are introduced to a number of key concepts and debates in contemporary migration research, as well as a range of empirical examples.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN MIGRATION AND POPULATION MOVEMENT (HMPM)

Duration:	4 years
Actual Credit Load:	480
Minimum Credit Load:	480
Maximum Credit Load:	540
Maximum MBKS Credit Load:	384
ZNQF Level:	8

1.0. PURPOSE OF THE PROGRAMME

The programme is designed to give students an interdisciplinary, international perspective on issues related to international affairs, particularly in topics related to the political economy of migration from a historical perspective, major trends in migration theories, and different forms of and approaches to the study of migration and displacement. The interdisciplinary program aims to equip students with knowledge and skills in topics such as refugee and asylum law, global migration and policies, racism and nationalism, research methodology and more. It provides a multidisciplinary approach to the understanding of population dynamics focusing on the study of people's demographic behaviour, such as birth, health, death and issues relating to race, ethnicity and migration. Students take classes to understand the history and current trends of migration, as well as how it shapes the economy, culture, politics, and more.

2.0. ENTRY REQUIREMENTS

Normal Entry

At least five (5) Ordinary Level/ National Foundation Certificates including English Language and Mathematics with Grade C or better and at least two (2) Advanced Level passes OR Relevant National Certificate.

Special Entry

A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry

Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought and are aged 25 years and above.

3.0. PROGRAMME CHARACTERISTICS

Areas of Study

1. ***Migration***
   The programme equips students with in-depth knowledge and analytical skills in migration analysis from global, regional and Zimbabwean perspectives.

2. ***Population and Development***
   The overall objective of human activities is to achieve high levels of development. The main objective of this module is thus to link demography to development processes.

3. ***Population Acts and Policies in Zimbabwe and the SADC region.***
   The programme equips students with population acts and related policies in Zimbabwe, and countries in the SADC region, focusing on their strengths and weaknesses.

4. ***Research***
   Research is key in the development, implementation, monitoring and evaluation of policies and programs. The programme aims to impart knowledge on research concepts.

Specialist Focus: Migration, Population, Development, Acts, Policies and Research

Orientation: Research and innovation oriented. Teaching and learning focus on equipping students with theoretical concepts and methodological approaches to assist students in analysing their social world.

Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0. CAREER OPPORTUNITIES

The programme is designed for development practitioners, academics, researchers and policymakers in government, non-government organisations and institutions of higher learning, research institutes; the diplomatic community, international non-governmental, inter-governmental organisations and UN agencies.

FURTHER EDUCATION

Masters and Doctoral studies Migration, Citizenship and Refugee Protection; Demography and Population Studies; Migration Studies. Further studies in Migration, Citizenship and Refugee Protection provide students with a broad theoretical understanding of human mobility and the role of both internal and international migration in economic and political processes, social change and globalisation as well as an overview of the major debates and literature on migration, citizenship and refugee protection from different disciplinary perspectives. Further studies in Demography and Population Studies cover extensive areas that include demographic techniques, population and development, mortality and epidemiology, demography and globalization among other areas.

5.0. PROGRAMME DELIVERY

Teaching and Learning Methods:

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, dissertation, lecture notes, assisted private studies and field trips, and individual independent study.

Assessment Methods:

Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment. Virtual quizzes, tests, presentations, work-related learning supervision and reports.

6.0. LEARNING OUTCOMES

Upon completion of this programme the graduate should be able to;

1. Gain familiarity with the evolution of migration patterns over time.
2. Gain a strong understanding of the ways in which contemporary international migration shape and is shaped by politics and policies around the world.
3. Familiarise self with the theories and derive testable predictions on issues of migration and population movements at the macro, meso and micro levels of explanation and analysis.
4. Understand and comprehend key concepts, definitions and principles related to the research field of migration and population movements.

7.0. GENERAL PROVISIONS

These are provided under section 2.3 of the University's General Regulations, which states that:

7.1 All Honours Programmes shall normally contain the following elements:

7.2 One or more 'major modules' shall be studied over at least six or ten semesters. Honours degrees shall normally include a period of work-related learning during the third level. Modules in the Honours degrees shall be studied intensively and progressively (i.e. studies in the fifth to eighth semester assume prior knowledge of the modules studied from the first to the fourth semester). They shall be taught and examined at the level requiring a greater depth and breadth of knowledge and understanding than expected of modules in 'general' degree programmes. 7.3. A candidate for the Honours degree shall normally be required to complete a project or dissertation within his/ her programme of study and this work may be based on the tasks and research performed during work-related learning.

7.4 The combination of modules within the Honours Programme shall be prescribed so as to focus on specific topics and to disallow a wide choice of disparate options. 2.3.1.4 one or more subsidiary modules may be studied at the 'General' level within the Honours Programme but assessment in these modules will not contribute to the final classification of the degree awarded or will be assigned a light weighting in the overall calculations of the final marks. Normally 60% of the modules taken in the Honours degree will be in the major subject(s)

8.0. PROGRAMME ASSESSMENT

Module work: 40%
Written Examinations: 60%

Other: a) Dissertation is assessed based on a research project (75%) and oral presentation (25%).

b) Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9.0. PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10.0. FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.

11.0. GRADING AND DEGREE CLASSIFICATION
Refer to section 10 of the Faculty Regulations.

12.0. DEGREE WEIGHTING
Refer to section 11 of the Faculty Regulations.

13.0. PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits
MPM101	Introduction to Migration Studies	12
MPM102	Demography & Population Studies	12
MPM103	Global Migration & Personal Identity	12
CS131	Basic Communication Skills	12
HCS135	Introduction to Information Technology	12

MPM406	Dissertation	24
MPM407	International Humanitarian Law and Refugee Law	12
MPM408	Migration Management and Protection	12

14.0. MODULE SYNOPSES

MPM 101 Introduction to Migration Studies

The module investigates various aspects of population migration with the view to understanding the causal push and pull factors of internal and external migration and how this phenomenon has impacted population patterns. The module covers important key terms/concepts; theories of migration; causes of internal and external migration: functionalist and structuralist perspectives; impacts of migration; the continuation of migration: networks, migration systems and cumulative causation, and migration as an intrinsic part of development and change. The module finishes with country case studies from both migrant-sending countries and migrant-receiving countries.

MPM 102 Demography & Population Studies

The module introduces the students to various demographic and population processes in both developed and developing countries. The following concepts will be covered in this module: overpopulation, underpopulation, world population growth and distribution, theories of population growth, ageing population, population pyramids, population projection, mortality, fertility and migration analysis.

MPM 103 Global Migration & Personal Identity

The module examines how migration directly relates to modern concepts of identity and how one's identity changes and evolves. Individual and national identities are formed and evolve based on how these questions are addressed. This module links the individual human experience of migration to current political and cultural systems; how migrants view and define themselves and how concepts of identity are affected by the process of migration. The module examines migration as a dynamic part of culture and society while discovering how it reflects and shapes our lives. It employs a multidisciplinary approach to look into the concepts of identity and its transformation and to understand migration and how it shapes identity across cultures and contexts.

CS131 Basic Communication Skills

Refer to regulations for the Department of Communication Skills.

HCS 135 Introduction to Information Technology

Refer to regulations for the Department of Information Technology.

MPM 104 MIGRATION, POPULATION & DEVELOPMENT

It should be noted that migration and demography feed into most of the disciplines whose end beneficiaries are people. The overall objective of human activities is to achieve high levels of development. The main objective of this module is thus to link migration and demography to

development processes. Thus, the module contextualizes migration and demography in the development arena; the population and development debate which articulates the relationship between population and development at different epochs of development. Subsequently, the module links the three components of population growth: fertility; mortality and migration to development. The concept of carrying capacity and population pressure on resources will also be covered. Population and Urbanization and labour force will also be covered. Note that the sustainability of development is the core value in the development processes.

MPM 105 Global Inequality, Globalisation & Migration
The rise of globalization has been accompanied by the debate of whether it comes at the cost of growing inequality and migration. This module will focus on the contemporary theoretical and methodological debates in the field of global inequality, globalization and migration. The module will highlight an overview of globalization, visions of globalization, and debate on globalization, poverty, inequality and migration. The focus will also be on major theoretical approaches to globalization, including explanatory theories, which range from the Marxist systems approach to the sociological approach that modernity implies globalization, transformational theories and critical theories. Discussions will be on the North-South Divide, the measurement of global inequality, and a selection of substantive topics, including income inequality, migration and immigration, and work and labour markets.

MPM 106 Population Related Acts and Policies in Zimbabwe and the SADC Region
Zimbabwe is excellent at crafting acts and policies in line with international protocols; however, the biggest weakness is the poor dissemination of such acts. This module aims at making student know all the population-related policies in Zimbabwe, their strengths and weaknesses. Such an understanding will empower critically evaluate the Zimbabwean policy scenario and suggest a way forward. Thus, the module will cover the following acts/laws: Legal Age of Majority Act; Marriage Laws/Acts; National Population Policy; The National AIDS Policy; Reproductive Health Policy; National Youth Policy; National Gender Policy, Gender Based Violence Strategy; ZNFPC Service delivery Policy; Universal Declaration of Human Rights; The Patients Charter; The Labour Act; The Administration of Estates Act; Zimbabwe Human Rights C omission, The Criminal Law, The Interpretation Act, The Domestic Violence Act, Sexual Offences Act; Policy to promote Equal Access to Pension Benefits. Laws and policies from other countries in the SADC region will also be considered for comparative purposes.

MPM 107 Migration & Families In Transition
In as much as migration represents a means for an improved standard of living with significant development potential for migrants and their families, in the form of economic benefits, migration also poses other serious challenges to families and their members. This module examines the challenges that migration has on families such as separation of members for long periods, difficulties of integration in countries of destination and changes in intra-family gender roles. These challenges are being exacerbated in the worldwide context of increasing labour mobility and restrictive migration policies. Children are increasingly affected by the migration of families, by either being separated from their parents and remaining behind, migrating with their families or migrating alone. The youth are a category particularly impacted by migration in all the multiple roles inherent in the migration process: as members of families staying behind, as migrating alone and as migrating with their families.

MPM 108 Migration, Drugs and Human Trafficking
The module investigates the drugs and human trafficking nexus in relation to migration. Drug and human trafficking are serious crimes and a grave violation of human rights, and almost every country in the world is affected by trafficking, whether as a country of origin, transit or destination for victims

SOSP 105 Social Problems
The module comparatively examines the linkages among social structures, culture and human experiences in the context of globalisation processes. Students examine a variety of topics which may include: the unequal distribution of power and wealth; issues of sex, sexuality, gender, race, ethnicity and social class; hunger; the role of multinational corporations; war and international conflict; oppression of various kinds; crime; poverty; the media; other social institutions; resource/environmental use and depletion and population.

MPM 201 Migration and Remittances Effects

This module examines how labour migration issues raise complex economic and social concerns, focusing specifically on remittances, which represent important injections to the home economies of overseas workers, providing a significant source of income for recipient families, thus making an important contribution to economic development in receiving countries. Some of the issues that are covered in this module are: Is migration good or bad for the migrant-receiving country? What effects does it have on the sending country? What about the money migrants send back to their home countries? Does this have only positive effects? How can we evaluate migration and development? We will look at the effects on both ends of migration and on different levels. Special attention is paid to labour market issues in the receiving country and development issues in the sending country.

SOSP 201 Qualitative Research Methods
The module exposes students to the qualitative research paradigm. It discusses salient issues of practicality, ethics, and politics in the research process. The module also delivers transferrable skills including critical reflections, the ability to interpret qualitative data and the ability to present ideas coherently. Included in this module is a wide range of qualitative research and data collection methodologies, which are currently used in development research and practice. Teaching methods will include group work, exercises as well as lectures and discussions.

ENT205 Entrepreneurship 1
Refer to regulations for the Department of Entrepreneurial Studies.

GSSS 201 Gender Studies for Social Sciences

This module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS 201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

MPM 202 Prejudice & Intergroup Relations
The module introduces prejudice, intergroup relations and social discrimination together with explanations of their causes. It looks at the concept of prejudice at the level of the individual, as well as prejudice and social discrimination as intergroup phenomena. Classic and contemporary intergroup explanations of intergroup conflict such as realistic conflict theory and social identity theories are examined, as well as basic psychological processes such as social categorization, identification with a social group, group evaluation and group-based emotions, and consider the intergroup motivations regulating intergroup behaviour.

SOSP 213 Crime and Deviance
The module explores the contemporary debate surrounding society, crime, juvenile delinquency, deviance, conformity, social control and its relationship to migration and population movements. It also addresses the key issues and relationships between society, crime, deviance and the governmental and judicial responses to them.

ANTH 205 Transnational Migration and Diaspora Identities
This module explores the transnational migration phenomenon by exploring its various facets. It explores the practical experiences of migrants in the diaspora, examining their economic and political experiences. Further, it examines issues of inclusion and exclusion and the making of the 'Other' and how migrants have transcended these dynamics. The module also explores various debates on long-distance family connections and love relationships. The ideas of home-making for migrants and their social, economic and political networks of survival are examined. The module explores the significance of migrant remittances, and the challenges and fears of migrants such as arrests, detention, crime, death and deportation.

MPM203 Forced Migration and Human Rights

The module examines how millions of people in Africa have been forced from their homes by interlinked factors including persecution, armed conflict, natural disasters, development projects and socio-economic deprivation. Resolving large-scale displacement represents a critical challenge for contemporary peacebuilding and development processes. This module provides students with a deeper understanding of the nexus between forced migration and human rights with special attention on Africa.

SOSP206 Quantitative Research Methods
The module lays the basis for the development of competencies in quantitative research methods and statistics. Emphasis is placed on the theoretical framework of quantitative research methodology, and the acquisition of statistical concepts.

MPM204 Migration and Sustainable Development
This module looks at the positive correlation between migration and sustainable development, exploring arguments that migration provides fewer job opportunities for nationals in host countries, leads to cultural conflict, and affects urban planning. The module will allow students to engage in debates and analyses of the impact of globalization and how migration provides a driving force for sustainable development which has often been underestimated or misunderstood. The module looks at the notion of sustainable development from a holistic perspective which requires looking at the environmental, economic and social aspects of development rather than limiting migration to the movement of people, goods, capital or services which may not capture very accurate measurements of the impact of migration both on host societies and on countries of origin.

MPM 205 Population &Gender
Gender is a variable with the most pervasive impact on all demographic and development processes. The module is intended to enable students to understand such impacts with the view of mainstreaming gender in the development and demographic processes. Thus, the module will cover the following: Definitions; Theories of gender; Women and Development Debate; the mediating effects of gender on fertility, mortality and migration; Gender and reproductive health; Gender and social and economic development; Gender relations and household dynamics; Gender and the environment; Population policies and gender.

MPM 206 Population & Environment
The module introduces basic concepts and analysis of ecosystems and key inter-relationships between population and environment within the context of development issues and policies. It deals with resource depletion and management, land use and agricultural systems related to population pressure, population mobility, population policies, urbanisation and the environment, and integrated approaches to population-environment planning.

SOSP 212 Sociology of Violence
The module examines the nature and causes of violence in the context of contemporary society and how the structure of society itself, as well as various social factors, contribute to violence and how it leads to migration and population movements. This module further explores types of violent behaviour, including interpersonal, collective and organisational and its impact on migration and population movements.

MPM330 Work-Related Learning Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

MPM331 Work-Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

MPM332 Work-Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

MPM333 Work-Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

SOSP 415 Policy Analysis

This module introduces students to the traditions, principles and methods of social policy analysis. Taking as its starting point the concept of Welfare States, it addresses both the concepts and contexts of policymaking as a contested process of moral, pragmatic and/or evidence-based decision-making. The module orients students to problem-solving methods that assess the efficacy of welfare and new and old societies in societies paying particular attention to the context of Zimbabwe. The module assesses the role of different policy actors, policy orientations, policy designs and implementation in the provision of welfare.

MPM 401 Migration Control, Borders and Citizenship

The module focuses on how migration control has changed contemporary penal systems. Aspiring migrants face a variety of obstacles to international mobility. Actual migrants are subjected to border control but also a range of other policies upon entry, sifted into legal-bureaucratic categories that determine the lawfulness of their stay and deportability. Migrants who find themselves unwelcome by the authorities are not without agency, however, and may seek to resist policing and circumvent the legal obligation to return as non-members of society. This module explores how Zimbabwe and other destination states construct the influx of migrants and respond to it, and how migrants experience and resist being governed. It looks at the legal, ethical and practical limits of state power to control migration, and the myriad state, supra-state and non-state actors that shape the outcomes of migration control. Key concepts that will be discussed in this module include: migration management/control, policing, detention, assisted return and deportation, border control and citizenship.

MPM 402 Comparative Migration Policy

This module explores migration entry policies for different types of migrants across different receiving countries, as well as sending policies of origin countries. The goal of this module is to enlarge knowledge of and insights into the content of the EU regarding the external dimension of asylum and migration, regarding the most important dialogues and the instruments for development with third countries and regions. A special comparative focus is made between Europe the United States and other major migrant-receiving regions regarding integration policy as well as ethnic relations.

MPM 403 International Migration & Citizenship in Africa

The module examines international migration and the concept of citizenship in African context and investigates why citizenship laws vary cross-nationally and why some immigrants acquire citizenship while others do not. It further considers how citizenship influences rights, identities, and participation and the mechanisms by which citizenship influences lives.

MPM 404 Nation States and Statelessness in Africa

This module provides students with an understanding of the contemporary debates and issues on nationality, and statelessness with special reference to the African context. It highlights theoretical debates on the causes and effects of statelessness as well as how these issues are being addressed.

MPM 405 Citizenship, Xenophobia & Identity

The module examines the nature, causes and effects of xenophobia in the context of contemporary society in relationship to citizenship and identity.

SOSP 410 Project Planning, Management, Monitoring and Evaluation

The module introduces students to the concepts, procedures, tools and techniques of project planning, management, monitoring and evaluation. It familiarises students with key principles and practices in the management, monitoring and evaluation of humanitarian and development projects and equips students with financial and project management skills appropriate for entry-level employment in a development agency. It describes the management approaches of key players in the development process; the donors, implementing agencies and recipients.

MPM 406 Dissertation
This is a double module and students are expected to put into conduct research putting into practice methodological issues they were taught in various research modules. The idea is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

MPM 407 International Humanitarian Law and Refugee Law
International Humanitarian Law seeks to limit the severity of suffering in hostilities. The module will begin with an introduction to the basic principles of international humanitarian law and the historical development of rules developed by civilized nations to protect the victims of armed conflict, people who are not and are no longer directly participating in hostilities and limit the destructive impact of warfare. Special attention will be given to the various case studies from contemporary armed conflicts, such as the situations in Libya, Syria, Iraq and Afghanistan. The challenges confronting contemporary international humanitarian law will also be addressed. The general principles of refugee law shall be addressed, looking at the key international instruments and international law principles that provide for the protection of refugees.

MPM 408 Migration Management and Protection
The goal of this module is to familiarize students with general definitions, concepts and statistics of migration while giving them an understanding of the basic international conventions (etc.) on the management and protection of migrants as well as the specific cases of Zimbabwe and Africa at large.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN SOCIOLOGY AND SOCIAL POLICY

Duration:	4 years
Actual Credit Load:	540
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	384
ZNQF Level:	8

1.0. PURPOSE OF THE PROGRAMME
This program is designed to provide students with knowledge and understanding of Sociological and Social Policy concepts to the study of contemporary society. It aims to equip students with the analytic concepts and methods to research the social world. The degree aims to produce skilled graduates who are innovative and have a sophisticated understanding of past and present societies and cultures. The program is designed to provide an understanding of how social policies are formulated in Zimbabwe, in the Global South, and in the rest of the world. Students are given an opportunity to explore key aspects of society whilst learning the theoretical models and methodological frameworks used to analyse social institutions, structures interactions and processes. Students are inculcated with problem-solving skills that are in line with improving societies' well-being and the industrialisation agenda.

2.0. ENTRY REQUIREMENTS
Normal Entry
At least five (5) 'O' levels/ National Foundation Certificates including English Language and Mathematics with Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercials OR Relevant National Certificate.

Special Entry
A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry
Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought and are aged 25 years and above.

3.0. PROGRAMME CHARACTERISTICS

Areas of Study
Sociology and Social Policy tries to address questions in four areas as follows:

1. ***Development and Globalisation***

Sociology and Social Policy focuses on the development challenges emanating from the failure of development models and the challenges presented by globalization in the contemporary world such as inequalities, gender inequities, poverty and climate change.

2. Policy Formulation

Sociology and Social Policy aim to solve social problems that affect societies. Social problems are tackled through the provision of welfare within societies. The aim of social policy is to interrogate the provision and efficacy of social services that are meant to benefit societies.

3. Theoretical Constructs

Sociology examines theoretical constructs and concepts that analyse societies from a historical and contemporary perspective and deepen understanding of individual and collective subjectivities. Social Policy examines the theoretical underpinnings of welfare and state provision of social services and how they shape societies.

4. Research Methods

Sociology and Social Policy aims to orient students with research skills that can be compatible with various fields of specialization. The methods include quantitative methods, qualitative methods, and mixed research methods. Research skills acquired from Sociology and Social Policy respond to the needs of society, particularly development and industrialization.

Specialist Focus: Sociology, Social Policy, Welfare, Gender, Research and Development

Orientation: Research and innovation oriented. Teaching and learning focus on equipping students with theoretical concepts and methodological approaches to assist students in analysing and solving problems in their social world.

Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in: Opportunities exist in the private and public sectors in government, social welfare and humanitarian aid provision, policy development and analysis, the criminal justice system and policing institutions, marketing, tourism, social research, media, development work, Non and Inter-Governmental Organisations, youth work, health services management, monitoring and evaluation, housing management and human resource management.

Further Studies: Masters' and doctoral studies in Sociology and Anthropology, Social and Public Policy, Public Health, Development Studies, Migration and Population Studies.

5.0. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practical activities, guest lecturers, dissertation, lecture notes, assisted private studies and field trips, individual independent study.

Assessment Methods: Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment.

6.0. LEARNING OUTCOMES

On completion of the program students must:

- Appreciate how society functions
- Understand policy development and analysis
- Understand development and its impacts
- Understand the salience of power in society
- Demonstrate knowledge and understanding of different and appropriate theories and their applicability in analysing particular social phenomena.
- Have the ability to identify problems and develop appropriate, contextual social solutions.
- Have the ability to use appropriate research techniques to research different phenomena
- Have the ability to collect data in an ethical and appropriate manner

- Communicate effectively and present information using multimedia to sociologists, non-sociologists, policymakers, and policy analysts.

7.0. GENERAL PROVISIONS
Refer to the University's General Regulations.

8.0. PROGRAMME ASSESSMENT
Coursework: 40%
Written Examinations: 60%
Other: a) Dissertation is assessed on the basis of a research project (75%) and oral presentation (25%).
b) Work Related Learning is assessed based on the student's Work Related Learning Placement Report (40%), Work Related Learning Report (30 %), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9.0. PROVISION FOR PROGRESSION
Refer to section 6 of the University's General Regulations.

10.0. FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.

11.0. GRADING AND DEGREE CLASSIFICATION
Refer to section 10 of the Faculty Regulations.

12.0. DEGREE WEIGHTING
Refer to section 11 of the Faculty Regulations.

14.0. MODULE SYNOPSES

SOC 101 Introduction to Sociology

In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are expected to acquire critical, analytical and practical skills that will also serve them in other social science modules as well. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological theorising.

SOSP 108 Introduction to Social Anthropology

The module explores conceptual and developmental issues in social anthropology. It starts by exploring the conceptual issues relating to the emergence of social anthropology. It addresses topics such as ideology, politics, production and economic systems, law and order, and leadership in traditional and modern states. The module probes the opportunities and challenges that culture poses for African and other developing economies. Particular attention is paid to comparative and holistic perspectives. Ethnocentrism and cultural relativism are looked at in the light of globalisation. The module remains true to anthropology through numerous case studies and various methods of investigation employed in this discipline. Ultimately, the module appraises the role played by anthropology in augmenting sociology in order to holistically address the broader social, economic and political conundrums of contemporary society.

SOSP140 Social Institutions

This module develops learners' sense of themselves as part of society. It uses a sociological approach, which encourages learners to ask questions about the social world in which we live and to use evidence to support explanations for human social behaviour. The module equips learners with knowledge and understanding of the sociological perspectives, theories

and concepts used to investigate and explain aspects of the social world. The module offers opportunities for learners to actively investigate human society, and social institutions such as the family, education and religion.

SOSP 102 Introduction to Social Policy and Administration
The module introduces students to the fundamental concepts of Social Policy and Administration. This module provides students with an understanding of the contemporary debates and issues in the field of social policy and administration, with special reference to the African context. It highlights theoretical as well as technical concerns in the process of public policy analysis and formulation. The module encourages students to understand policy within the broad arena of governance and emerging democratic practice in chosen African countries. The impact of globalization on policy processes and outcomes are also analysed.

PPM131 Introduction to Political Theory
The module explores the discipline of Political Science as a science in Social Studies with a focus on the study of processes, principles and structures of governments and political institutions. The module introduces students to fundamental ideas of political thought and the study of politics. Students will be acquainted with key classical and contemporary political texts. Emphasis will be given to key political thinkers such as Plato, Socrates, Aristotle, Saint Thomas Aquinas, Confucius, John Locke, Rousseau, Karl Marx, Charles Mills, Franz Fanon, Niccolo Machiavelli, Thomas Hobbes and John Stuart Mill among others. The module aims to familiarise students with the organisation and structure of political entities. The key objective of the module is to develop critical reading and analytical skills. By the end of the module, students will be able to develop concise arguments coupled with enhanced analytical skills.

SOSP 106 Social Policy-Making Processes
The module provides students with an understanding of the policy-making process and the stakeholders involved and their immediate influence. It introduces some models and frameworks that shape the social policy-making process. The module enables the understanding of factors that are relevant to understanding policy success and failure. Again, the module encourages the understanding of the notion of policy transfer and enables to assessment of the extent to which transfer has taken place in specific cases. The module helps to comprehend the issues involved in researching and studying the policy process.

SOSP105 Social Problems
The module comparatively examines the linkages among social structures, culture and human experiences in the context of globalisation processes. Students examine a variety of topics which may include: the unequal distribution of power and wealth; issues of sex, sexuality, gender, race, ethnicity and social class; hunger; the role of multinational corporations; war and international conflict; oppression of various kinds; crime; poverty; the media; other social institutions; resource/environmental use and depletion and population.

CS131 Basic Communication Skills
The module focuses on academic and business communication skills. Firstly, this module imparts, writing, reading, speaking, and listening skills that make learning more effective and enjoyable. Secondly, students are taught skills that they can use even beyond the academic context which are report writing and curriculum vitae (CV) writing. In this module, students are taught and encouraged to incorporate source materials (academic referencing) into their writing, according to the standard academic conventions recommended in their departments. Thus, the skills imparted in the module are not only for academic purposes although that is the primary focus but for life after University as well. In addition, the module enables students to argue and clearly express written and oral assignments, to carry out appropriate research and to be able to interpret research.

HCS135 Introduction to Information Technology
This module aims to introduce the fundamentals of Information Technology to students, covering basic computer concepts in hardware and software. Students will also learn about the basics of computer networks, the internet, and the World Wide Web, as well as an introduction to computer security. Furthermore, students will learn how to work with MS Word, MS Access, MS Excel, and PowerPoint presentations. They will also be exposed to the fundamentals of information literacy skills, covering the organisation of information, information access tools, reference sources and electronic journals and databases.

SOSP 201 Qualitative Research Methods
The course exposes students to the qualitative research paradigm. It discusses salient issues of practicality, ethics and politics in the research process. The course also delivers transferrable skills including critical reflections, the ability to interpret qualitative data and the ability to present ideas coherently. Included in this course is a wide range of qualitative research and data collection methodologies, which are currently used in development research and practice. Teaching methods will include group work, exercises as well as lectures and discussions.

SOSP 202 Social Welfare Policy and Practices
This module introduces students to the concept of Social Welfare Policy and related practices. The aim of the module is to equip students with an understanding of key issues in welfare such as healthcare, empowerment, housing, education, and social protection. Specifically, the module enables students to understand how social welfare policies are used as instruments for promoting and safeguarding (social) well-being. The students are introduced to bridging the gap between theory and practice in the field of Social Welfare Policy.

SOSP 203 Different Ability Studies (Critical Perspectives)
The interdisciplinary course in Different Ability Studies previously conceptualized as "Disability Studies" seeks to sensitize students and raise awareness of the challenges faced by Differently Abled persons in Society. The course provides an overview of the purposeful, unequal treatment experienced by people with disabilities in Zimbabwe. The course will investigate issues to do with social justice, different cultural perspectives on disability, and differences in the conception of embodiment. The course explores the concept of disability in health, educational, economic, and legal systems, as well as the perspectives of people with disabilities themselves. The course critically examines factors that support systemic oppression and methods and strategies for moving toward a more inclusive society. Sustainable Development Goals and policies that seek to improve the welfare of people with different abilities will be discussed in the course.

SOSP 207 Contemporary Social Theory
The module creates an appreciation of the centrality of social theory in sociology and the analysis of social phenomena. Students develop an ability to apply sociological theories in the analysis of everyday phenomena. The module builds up from the previous social theory module and is meant to give students an in-depth understanding of contemporary theories and developments in the arena of social theory.

SOSP 206 Quantitative Research Methods
The module lays the basis for the development of competencies in quantitative research methods and statistics. Students will be oriented with epistemological and ontological philosophies of quantitative research. Emphasis is placed on the theoretical framework of quantitative research methodology, and the acquisition of statistical concepts. The students are introduced to the application of descriptive statistics and inferential statistics in social research. Emphasis will also be given to quantitative research methods and how they are applied. Students will be acquainted with the practical research processes from research design to data analysis.

SOSP 208 Sociology of Organisations
The module acquaints students with sociological issues of organizations. It intends to encourage students to apply sociological theories and to critically analyse organizations in their different cultural environments. Students are introduced to the major works on different views of organisations particularly classical and contemporary organisational theory and understanding organisational structure and design. The module will cover the substantive areas such as: objectives and functions of organisations; organisational dynamics, organisational culture; change and organisations; power, politics and organisations; and leadership and organisations. The module will critically analyse the impacts of globalisation on organisations.

GSSS231 Gender Studies for Social Sciences
This module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing GSSS 201 adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

SOSP213 Crime and Deviance
The module explores contemporary sociological debates on crime, juvenile delinquency, deviance, conformity and social control. It also addresses the key issues and relationships between society, crime, deviance and the governmental and judicial responses to them.

SOSP216 Social Movements
This module addresses issues about collective protests, movements, dissidents etc. Students shall be equipped with sociological theories on the emergence and trajectories of social movements as well as understanding the similarities and differences between historical and modern social movements. Case studies of global, regional and national social

movements by the working class, civil rights activism, nationalism, feminism, environmentalism, poor peoples' movements and urban riots shall be used.

SOSP210 Classical Social Theory

The module appraises students on the significance of the main theoretical and epistemological underpinnings in the discipline. It reviews classical sociological theory. It also creates a practical application of social theory as students are set to acquire skills to enable them to have a critical approach to social phenomena in real life. This module traces the development of sociological thought from the Enlightenment era. It introduces students to the theoretical and epistemological thought of the founding figures of sociology. The module acquaints students with the application of sociological theory to contemporary issues.

SOSP 214 Sociology of Development

The module gives students an understanding of emerging sociological debates in Development. Students are exposed to a critical analysis of debates surrounding development in both Western and non-Western societies at both the macro and micro levels. The module also assesses macro and micro-scale development processes from a sociocultural perspective. It introduces students to the main debates, theories, and processes of development. The module considers dynamics associated with development practice. The major areas of the module include conceptualising development; theories of development; globalisation and modernity; politics of development; gender and development; and environment and development. The module emphasises the practical application of development models.

SOSP215 Sociology of Medicine and Healthcare

This module provides an introduction to the ways in which the medical profession and medical technology are embedded in society and culture. It examines how medicine is connected to various socio-cultural factors such as gender, social class, race and administrative culture. It examines processes of medicalization and de-medicalization. The module also explores alternative medical practices and how they differ from conventional medical paradigms.

SOSP246 Sociology of Sport

This module examines sport in modern societies with close attention paid to the distinctive features of sport in Zimbabwe. The aim of this module is to understand the socio-cultural patterns in the organisation, participation, and mediation of sport and sporting practices and to familiarise students with their respective implications. It examines the relationship between sport and the economic, political and educational institutions. Contemporary issues, including racial and gender inequality, violence, drugs/doping and sport media shall also be considered.

ENT205 Entrepreneurship 1

The module seeks to introduce the concept of entrepreneurship and the related processes. The module will explore different types of entrepreneurial endeavours in different contexts. Students will examine different challenges and opportunities that characterise entrepreneurship. This module will look at business development, barriers encountered and issues related to marketing, human resources management, pricing, government policies, and taxation of businesses. Case studies, visits to business premises and presentations by entrepreneurs will be used to understand the running of businesses. The preparation of business plans will also be covered.

SOSP330 Work-Related Learning Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

SOSP331 Work-Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

SOSP332 Work-Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

SOSP333 Work-Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

SOSP 401 Race, Class and Identities
The module provides a unique perspective to understanding how groups of people from different races, classes, ethnic groups or other cultures interact. It focuses on cultural diversity and various dimensions of discrimination and prejudice, including an analysis of inequality and its origins, conditions under which inequality occurs and persists, changing inequality, and ways to deal with minority group problems in social institutions including education, employment, housing, migration and policing and the impact of anti-discrimination legislation.

SOSP 406 Dissertation
This is a double module and students are expected to carry out research putting into practice methodological issues that they were taught in the various research modules. The idea is to enable students to understand and provide practical solutions to social problems bedevilling society at any given time.

SOSP 408 Social Gerontology: Ageing and Society
The module focuses on ageing with emphasis on demographic trends, individual aspects of ageing such as family and social support networks, retirement and adaptation to ageing. Particular emphasis is given to issues surrounding ageing and society including the economy, politics, health and social services and public policy i.e. both nationally and at the local level. Specific African case studies shall be utilised.

SOSP410 Project Planning, Management, Monitoring and Evaluation
The module introduces students to the concepts, procedures, tools and techniques of project planning, management, monitoring and evaluation. It familiarises students with key principles and practices in the management, monitoring and evaluation of humanitarian and development projects and equips students with financial and project management skills appropriate for entry-level employment in a development agency. It describes the management approaches of key players in the development process; the donors, implementing agencies and recipients.

INDSO413 Economy, Society and Governance
The module provides students with an understanding of how the three are linked to each other. The main aim is to look at how the economy affects society and how it is governed and vice-versa. Students are exposed to examples from African as well as non-African societies at both the macro and micro levels. The module explores how the three affect social life in different ways.

SOSP 414 Sociology of the Environment
This is a development module that mainly focuses on people and the environment. It aims to expose students to various aspects of development with a view to offer an in-depth understanding of sustainable development and livelihoods. Through this module, students develop an appreciation of the need to conserve locally available natural resources through a variety of strategies. Students are expected to use theoretical frameworks in making informed arguments on the dialectal relationship between people and the environment.

SOSP 415 Policy Analysis
This module introduces students to the traditions, principles and methods of social policy analysis. Taking as its starting point the concept of Welfare States, it addresses both the concepts and contexts of policymaking as a contested process of moral, pragmatic and/or evidence-based decision-making. The module orients students to problem-solving methods that assess the efficacy of welfare and new and old societies in societies paying particular attention to the context of Zimbabwe. The module accesses the role of different policy actors, policy orientations, policy designs and implementation in the provision of welfare.

SOSP 418 Rural and Urban Development
This module provides students with an in-depth knowledge of contemporary issues related to Rural and Urban Development. Students will be introduced to key conceptual concepts in rural and urban development. Specifically, students will be introduced to theories and development issues such as climate change, livelihoods, housing, education, health, and social security. Furthermore, it aims at developing the students' critical thinking abilities through exposure to a variety of developmental issues.

SOSP 407 Global Social Policy
The module aims to introduce social policy at a global level and how it impacts local policy. Specifically, the module critically examines the role of global organisations such as the United Nations (UN), World Trade Organisation (WTO), and regional organisations like the African Union (AU) in social policy. The module seeks to understand how global social

problems are resolved simultaneously at global and local levels. These social problems include pandemics, poverty and inequalities, migration crisis, climate change, and conflict. The module will also acquaint students with the impacts of international treaties and agreements like the African Continental Free Trade Area (AfCTA) and New Partnership for Africa's Development (NEPAD) on social policy. Again, the module aims to explore how various actors at a global level effectively respond to social problems through various strategies.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN DEMOGRAPHY AND POPULATION STUDIES (MDPS)

Duration:	18 Months
Actual Credit Load	270
Minimum Credit Load:	270
Maximum Credit Load:	340
Maximum MBKS Credit Load	234
ZNQF Level:	9

1.0. PURPOSE OF THE PROGRAMME

This programme grapples with a multiplicity of ways in which human populations change and explores the causes and consequences of that change. The program covers extensive areas that include demographic techniques, population and development, mortality and epidemiology, demography and globalization among other areas. This multi-disciplinary programme cooperates theoretical and substantive case material which is important in understanding and comprehending the broader range of social and demographic dynamics. Essential to this programme is the study of the demographic behaviour of people in terms of life events such as birth, marriage, divorce, health, migration and death. This programme focuses on these demographic events in detail showing how these are influenced by the hysterical, economic, societal, cultural and medical factors.

2.0 ENTRY REQUIREMENTS

Normal Entry
An honours degree with at least 2.2 undergraduate degree class in Social Sciences, or BSc Honours in Geography and a pass in Mathematics at O Level with a C or better.
A strong background in Demographic Techniques will be an added advantage.

3.0 PROGRAMME CHARACTERISTICS
Areas of Study

1. Demography& Demographic Techniques
Many of our societies continue to face a diverse set of demographic challenges and opportunities, including rapid population ageing, extremely low as well as very high fertility, and sizable population migration. These and other demographic trends have important repercussions in all possible domains of life; from voting behavior to living arrangements, labour markets and economic growth, tax revenues and pension systems, carbon emissions, and the demand for education, health and social services. Demography, in other words, may well be the single most defining factor of the world that we live in.

2. Health
The programme equips students with the theories and skills to understand and quantify macro-level population dynamics and their downstream implications for health and health policies. Students are further trained in the analysis of micro-level processes that govern population change, including fertility and reproductive behaviour, exposure to health risks, and population mobility.

3. Research
Analysis tools and techniques are applied to high-income settings where high-quality data are usually abundant to resource-constrained settings that are covered by partial or deficient information systems

Special Focus: Demography, Demographic Techniques, Health and Research

Orientation: Research and innovation oriented. Teaching and learning focus on equipping students with knowledge of population dynamics and its impact on resource use, governance and population

growth. It equips students with information on natural and man-made disasters and ways to avert or reduce theirimpacts.

Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES

Demography and population studies prepare graduates for excellent careers in a variety of areas such as civil society, government ministries, NGOs, research organizations, local and international organizations, academia and many other areas. Job markets: IOM, UNDP, CSO, Population Services, ZIMSTAT.

FURTHER EDUCATION

Doctor of Philosophy Studies in Demography and Population Studies and other related fields.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Virtual or face-to-face lectures, tutorials, seminars, group work, presentations, public lectures, practicals, dissertation, lecture notes, field trips and individual independent study.

Assessment Methods: Written and oral examinations, tests, seminar presentations, continuous assessment, dissertation.

Delivery Mode: Conventional; Block 3 x 2week blocks per semester; weekend school

6.0 LEARNING OUTCOMES

On completion of the programme, candidates should be able to:

1. Articulate components of population growth and the subsequent nexus between population growth and development.
2. Be core members of policy formulation entities where they would provide basic demographic data.
3. Implement, monitor and evaluate policies which assist in teaching, research, innovation and industrialisation.
4. Undertake innovative research which influences the positive transformation of society.

7.0 GENERAL PROVISIONS

Refer to the University's General Regulations.

8.0 PROGRAMME ASSESSMENT

Coursework: Encompass assignments, in-class tests, class presentations, group assignments and seminars which will constitute 30% of the final mark.

Written Examinations: A three-hour examination will be written for each module and will constitute 70% of the final mark.

Dissertation: Assessed on the basis of a research project (75%) and oral presentation (25%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

Code	Module Description	Credits

14. MODULE SYNOPSES

DPS 701 Demographic Techniques I

Knowledge about demographic measures is key in the teaching of Demography. The module is designed to introduce students from various disciplines to the principles of demographic analysis using computer applications. Focus is on direct methods of analysing population data with specific reference to data collection, computation and interpretation of demographic measures and application of selected techniques. Basic demographic measures and concepts will be taught. Demographic measures of fertility, mortality, migration and population projections will be covered.

DPS 702 Demographic Theories

The aim of this module is to introduce the students to the general theories of population, including theories of fertility, fecundity, marriage, mortality, and migration. Theories of population growth and replacement, economic and social distribution as well as population classification of population will also be discussed. This module covers the development of population studies into a proper historical science. General theories of population help to explain the reason for population growth and replacement and the effect that these changes have on both economic and social distribution.

DPS 703 Migration

Migration is a key population variable that influences population growth. The module endeavours to equip students with in-depth knowledge and analytical skills in migration analysis from global, regional and Zimbabwean perspectives. The following concepts will be covered in the Migration module: definition of migration and measures; levels, trends and patterns of migration; theories of migration as they assume the determinants of migration; the effects of migration on development; the nexus between migration and gender; and migration policies and programmes.

MSR703 Advanced Qualitative Research

This module builds on students' knowledge of qualitative research methods by introducing them to advanced methods and techniques commonly used by qualitative researchers. The module seeks to foster an advanced level of understanding of, and expertise in the use of, the key methods of qualitative data generation. Using a theoretical and practical learning approach, students will be further equipped with the knowledge and skills needed to critically engage with complex concepts relevant to the advanced aspects of qualitative research such as critical appraisal of research output. Topics covered will include action research, ethnographic and observational research, and conversation analysis, documentary and archival analysis, participatory research, grounded theory, narrative interviewing, visual and other technology-based methods of data collection as well as fundamentals of qualitative data analysis.

DPS704 Demographic Techniques II

The module is designed for students who would have successfully completed Demographic Techniques 1. Given the errors associated with the direct methods of collecting population data, the module aims to impart knowledge on how to identify and clean for such errors. Indirect estimation of fertility, mortality and migration measures using specific models and computer applications will be covered. Attention will be given to the assumptions of the identified models and their relevance in estimating population measures in developing countries and Zimbabwe in particular.

DPS705 Mortality
There has been a shift in disease prevalence in developed nations from infectious to man-made and degenerative diseases. However, developing countries, Zimbabwe included are faced with a double burden of diseases. Thus, the Mortality module would enable students to grasp concepts, current issues and debates in morbidity, mortality and health. The module will also cover the following issues: global patterns of mortality; mortality differentials; theories of mortality; infant and child mortality; maternal mortality; HIV and AIDS and mortality; and mortality health intervention programmes and strategies.

DPS706 Reproductive Health
Reproductive Health is emerging as a pertinent issue in the contemporary world, the module intends to cover reproductive health issues using a life cycle approach. The module is intended to impart students with knowledge about adolescent reproductive health issues, youths' reproductive health issues, male reproductive health issues, female reproductive health issues, HIV and AIDS, sexually transmitted infections, family planning, mortality and morbidity, reproductive health rights, gender and reproductive health and policies on reproductive health.

DPS801 Dissertation
Research is a key component in designing models, implementing, monitoring and evaluating policies and programmes both at global, regional and national levels. The purpose of the Dissertation is for the students show showcase their ability in conducting innovative research. Each student is expected to come up with a research topic, write the research proposal, clearly articulate either the qualitative research methods or the quantitative research methods or both, the research design(s), research tools, data management and analysis, presentation and discussion of research findings. The dissertation module gives the students an opportunity to provide valuable recommendations for policies and programmes that would result in the positive transformation\ of the socioeconomic, religious and environment of the population. Such recommendations from the dissertation module would subsequently enhance societal innovation and industrialisation.

DPS 708 Demography and Environmental Issues
This module examines the human-environment nexus in the contemporary world. The module seeks to foster an advanced level of understanding of the impact of humans on the environment. The module will cover the following issues: consumption of resources such as land, food, water, air, fossil fuels and minerals and waste products as a result of consumption such as air and water pollutants, toxic materials and greenhouse gases.

DPS 709 Population and Development
The module contextualizes the population and development debate which articulates the relationship between population and development at different epochs of development. Subsequently, the module links the three components of population growth: fertility; mortality and migration to development. The concepts of urbanization, labour force, carrying capacity and population pressure on resources are covered.

MCRP 701 Theories, Concepts and Principles of Migration and Demography
This module explores theories, concepts and principles of migration and demography in a Pan-African context. Empirical studies from different disciplinary traditions are explored to explain the demographic configurations of sender and receptor regions. Migration cycles are explained using temporal and spatial scales such as first, second-generation immigrants and micro and macro levels analyses. The emphasis of the module is on comparative empirical research examples, strategies and findings. In addition, the module explores current controversies in the field of migration studies and implications for immigration policies and debates.

DPS 711 Demographic Change, Ageing and Globalization
This module provides a foundation of knowledge on demographic change and population ageing in a cross-cultural, global perspective. The module focuses on transitional and developing societies and on linkages between regions of the world. The implications of contemporary demographic changes on the welfare of individuals, families and societies are also explored. The module also provides an awareness of how globalization, demographic, social and economic change in one part of the world impacts upon trends in another. An intergenerational life-course approach is adopted, stressing the close interaction between older and younger people in the production of risk and welfare in later life

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN MIGRATION, CITIZENSHIP AND REFUGEE PROTECTION (MCRP)

Duration:	18 Months
Actual Credit Load	270
Minimum Credit Load:	270
Maximum Credit Load:	340
Maximum MBKS Credit Load	234
ZNQF Level:	9

1.0. PURPOSE OF THE PROGRAMME

This programme is designed to provide a broad theoretical understanding of human mobility and the role of both internal and international migration in economic and political processes, social change and globalisation as well as an overview of the major debates and literature on migration, citizenship and refugee protection from different disciplinary perspectives. The programme offers students an understanding of the complex and varied nature of migration and refugee populations, of their centrality to global, regional and national processes of political, social and economic change, and of the needs and aspirations of displaced people. The programme also helps students develop a broad understanding of academic research related to the integrated areas of migration, citizenship and refugee protection, as well as critical thinking and sound evaluative tools relevant to policy debates at all levels including potential linkages between diaspora engagement and economic development in Africa

2.0 ENTRY REQUIREMENTS

The applicant must have completed a social science Bachelor's Degree with (2.1 or better) in a relevant area to the programme.

3.0 PROGRAMME CHARACTERISTICS

Areas of Study

1. ***Migration***
   Migration is a key population variable that influences population growth. The programme equips students with in-depth knowledge and analytical skills in migration analysis from global, regional and Zimbabwean perspectives.

2. ***Forced Migration***
   The programme examines how millions of people in Africa have been forced from their homes by interlinked factors including persecution, armed conflict, natural disasters, development projects and socio-economic deprivation. This program provides students with a deeper understanding of the nexus between forced migration and internal displacement with special attention on Africa.

3. ***Humanitarian Law and Refugee Law***
   This programme focuses on how international humanitarian law and refugee law are intertwined in our understanding of the movement of people in Africa and the global society.
4. ***Research Methods***
   Research is key in the development, implementation, monitoring and evaluation of policies and programs. The programme aims to impart knowledge on research concepts.

Specialist Focus:
Migration, Forced Migration, Humanitarian Law, Refugee Law and Research

Orientation: Research and Innovation oriented. Teaching and learning focus on equipping students with an in-depth understanding of the complex and varied nature of migration and refugee populations, of their centrality to global, regional and national processes of political, social and economic change, and of the needs and aspirations of displaced people.

Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES

The MSc degree in Migration, Citizenship and Refugee Protection is designed for development practitioners, academics, researchers and policymakers in government, non-government organisations and institutions of higher learning, research institutes; diplomatic community, international non-governmental, inter-governmental organisations and UN agencies. The increasing complexity of public and social issues in Africa requires visionary leaders and creative researchers with a broad knowledge of policy and governance issues, processes and specific analytical and management competencies in the proposed areas of study. Anchored in the scholarly pan-African milieu of Social Sciences, the MSc in MCRP intends to enhance academic and professional skills among graduates with broad-based backgrounds in the fields of sociology,

psychology, political and social sciences, humanities, theology, development, law, economics, anthropology, health sciences, child and family studies, leadership, peace and governance, demography, statistics, public policy, and social policy.

FURTHER EDUCATION
Doctor of Philosophy Studies in Migration Studies, Refugee Studies, Displacement Studies and other related fields.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Virtual or face-to-face lectures, tutorials, seminars, group work, presentations, public lectures, practicals, dissertation, lecture notes, field trips and individual independent study.

Delivery Mode: Conventional; Block 3 x 2 week blocks per semester; weekend school.

Assessment Methods: Written and oral examinations, tests, seminar presentations, continuous assessment, dissertation.

6.0 LEARNING OUTCOMES

Upon completion of this programme the graduate should be able to;

1. Understand and comprehend key concepts, definitions and principles related to the research fields of migration, citizenship and refugee protection.
2. Gain familiarity with the evolution of migration patterns over time.
3. Gain a strong understanding of the ways in which contemporary international migration shape and is shaped by politics and policies around the world.
4. Gain familiarity with the theories and derive testable predictions on issues of migration, citizenship and refugee protection at the macro, meso and micro levels of explanation and analysis.
5. Familiarise themselves with academic and policy debates on migration, citizenship and refugee protection issues

7. GENERAL PROVISIONS

Refer to the University's General Regulations.

8. PROGRAMME ASSESSMENT

Coursework: Encompass assignments, in-class tests, class presentations, group assignments and seminars which will constitute 30% of the final mark.

Written Examinations: A three-hour examination will be written for each module and will constitute 70% of the final mark.

Dissertation: Assessed on the basis of a research project (75%) and oral presentation (25%).

9. PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10. FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11. GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12. DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

Level 1 Semester 1

14. MODULE SYNOPSES

MCRP701 Theories, Concepts and Principles of Migration and Demography
This module explores theories, concepts and principles of migration and demography in a Pan-African context. Empirical studies from different disciplinary traditions will be explored to explain the demographic configurations of sender and receptor regions. Migration cycles are explained using temporal and spatial scales such as first, second-generation immigrants and micro and macro levels analyses. The emphasis of the module is on comparative empirical research examples, strategies and findings. In addition, the module explores current controversies in the field of migration studies and implications for immigration policies and debates.

MCRP702 International Humanitarian Law and Refugee Law in African
This module looks at how international humanitarian law and refugee law are intertwined in our understanding of the movement of people in Africa and the global society. The module explores how international humanitarian law and refugee law together with regional and national law, constitute the broad framework for the protection of refugee and displaced persons. The module looks at the legal frameworks that protect refugees with a focus on the 1951 Convention Relating to the Status of Refugees and its 1967 Protocol, and regional refugee instruments and actors. Students will explore how most of our current international law relating to armed conflict was codified in the aftermath of the Second World War, with the signing of the UN Charter in 1945 and the revision of the Geneva Conventions in 1949.

MCRP703 The Political Economy of Migration, Citizenship And Refugee Protection
The module provides a broad, theoretical understanding of human mobility and the role of both internal and international migration in economic and political processes, social change and globalisation, as well as an overview of the major debates and literature on contemporary migration from different disciplinary perspectives in the social sciences. Taking a political economy perspective, the module emphasises relational processes: the historically evolving process of production of institutional fields and defining who a refugee is, and the contextual and dynamic processes and practices of its social reproduction. It sets "lack of protection" in relation to the political and economic forces which produce the refugee institution, and which are reproduced by it. As such the module critically examines the interplay between migration and political, economic and social systems and contestations on issues regarding citizenship, human rights and the protection of refugees. Informed by the theories of political economy the module further examines the consequences of migration for the fiscal and political stability of states.

MSR703 Advanced Qualitative Research
This module builds on students' knowledge of qualitative research methods by introducing them to advanced methods and techniques commonly used by qualitative researchers. The module seeks to foster an advanced level of understanding of, and expertise in the use of, the key methods of qualitative data generation. Using a theoretical and practical learning approach, students will be further equipped with the knowledge and skills needed to critically engage with complex concepts relevant to the advanced aspects of qualitative research such as critical appraisal of research output. Topics covered will include action research, ethnographic and observational research, conversation analysis, documentary and archival analysis, participatory research, grounded theory, narrative interviewing, visual and other technology-based methods of data collection as well as fundamentals of qualitative data analysis.

MCRP704 Migration: Refugee Policy and Human Rights in Global Context

This module is in three integrated parts, which together provide theoretical, empirical, and policy perspectives on the source and consequences of migration in a global context. Part 1 deals with migration, internally displaced persons (IDPS) and refugee policies in a global context of human mobility focusing on how migration shapes policies at local and global levels. Refugee policy is understood as a formal statement of a problem relating to protection, solutions or assistance for refugees or other populations of concern to the global migration and refugee regime. Part 2 deals with global refugee policies including the 2002 Agenda for Protection and UNHCR's policies on older refugees (2000), refugee children (1993) and refugee women (1990) and their impact on human rights and civil liberties. In this way, global refugee policy is viewed as a discernible area of activity for the global refugee regime. Part 3 deals with how global refugee policy involves the engagement of different actors, primarily states and UNCHR including other multilateral organizations, NGOs, research and advocacy communities.

MCRP705 Forced Migration and Internal Displacement in Africa
The module gives a historical overview of forced migration and internal displacement in Africa. Using a human rights-based approach and a responsibility-based approach to migration as a development and human rights issue the module asks the question on why internal displacement takes place and who should be responsible for ensuring the protection of internally displaced persons and its bearing on the achievement of Sustainable Development Goals in Africa. Particular attention is given to forced migration especially conflict-induced internal displacement in Africa. Case studies of forced migration and internally displaced persons (IDPs) across Africa will the critically analysed with a view to exploring development initiatives to alleviate internal displacement caused by conflict, violence and natural disasters. As such, this module allows students to interrogate policy decisions informed by the Kampala Convention as a human rights instrument and the challenges associated with the governance of IDPs in Africa.

MCRP706 Natural Disasters, Environmental Change and Forced Migration
This module examines the processes of ecological transformation such as climate change, pollution, flooding and other natural and human disasters with a focus on the scale and complexity of human vulnerability, insecurity and displacement. The module explores the scientific aspects of climate/environmental change, justice and efforts by the international community, and humanitarian agencies including the Office of the United Nations High Commissioner for Refugees (UNHCR) with the aim of understanding the processes at play, the humanitarian problems and challenges and mitigating the impact of human activity. Students are also expected to document the various forms of resilience that communities have developed to cope and adapt to manage ecological stresses and shocks.

MSR704 Advanced Quantitative Research
This module focuses on the concepts, methods and skills central to the successful design and implementation of quantitative research projects in the social sciences, including data collection approaches and concept operationalization. It builds on issues around probability sampling, sampling error and statistical inference. Furthermore, this module aims to produce careful and considerate researchers who understand and appreciate the key issues in the craft of applied work and are able to critically appraise quantitative social research in their respective fields. Topics covered include data collection approaches, surveys, case-control and cohort studies, data types and distribution, access and ethics, hypothesis testing, samples and populations, approaches to analyses including comparisons, regression and correlation; analysis of categorical and continuous data and combining results of independent studies.

MCRP801 Dissertation
Every student will be required to produce a dissertation of not less than 18,000 and not more than 30,000- 40,000 words in length. A proposal based on a researchable topic in the integrated areas of human rights, peace and development must be submitted at the end of the second semester. Each student will be assigned a supervisor who will guide him or her during the writing of the dissertation. The format of the dissertation shall be in accordance with the University general regulations for graduate degree programmes.

MCRP 707 Critical Perspectives on Migration, Globalization and Development
This module offers students the opportunity to combine study and analysis of critical perspectives on development and the increasingly important and related field of migration studies. The module will address the political economy of migration from a historical perspective, major trends in migration theories, and different forms of and approaches to the study of migration and displacement. Moving beyond a narrow preoccupation with the direct and causal linkages between migration and development, the module interrogates the academic and policy discourses underpinning each and explores some of the ways in which historical, socio-political and globalizing forces construct migration contexts and environments, and how these are navigated and challenged by migrants themselves. Specific topics include sedentarism and the study of migration; history and colonialism; nations, states and territories; seasonal and labour migration, irregular migration, and circular migration; diverse forms of forced migration, including trafficking; models of immigration and emigration and their consequences; Diasporas and transnationalism; policy understandings of and responses to migration, and transformations in the north and south.

MCRP 708 Migration and Politics of Belonging
This module aims to develop a critical understanding of one of the most timely and pressing issues of recent times, namely, migration, and its relationship to the politics of identities, belonging and citizenship in global societies. It aims to introduce students to key themes and issues related to the social experience of migration in a diversity of contexts. Through critical debates, there is an exploration of the ways in which migrants, refugees and diaspora communities shape their societies of settlement and origin and how they have become key actors in a process of 'globalisation from below' at different social and spatial scales. Key concepts and theories are critically discussed and deployed to analyse contemporary processes of migration, transnationalism and diaspora and assess their relevance across a wide range of migration case studies. Examples of the central questions this module will address are: what are the main drivers of contemporary migration? To what extent can migrants become transnational citizens? What is the link between migration and homeland development in third-world countries? How are gender, class and race relations affected by migration?

DPS 711 Demographic Change, Ageing and Globalization
This module provides a foundation of knowledge on demographic change and population ageing in a cross-cultural, global perspective. The module focuses on transitional and developing societies and on linkages between regions of the world. The implications of contemporary demographic changes on the welfare of individuals, families and societies are also explored. The module also provides an awareness of how globalization, demographic, social and economic change in one part of the world impacts upon trends in another. An intergenerational life-course approach is adopted, stressing the close interaction between older and younger people in the production of risk and welfare in later life.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN SOCIOLOGY AND SOCIAL ANTHROPOLOGY (MSO)

Duration:	18 Months
Actual Credits	270
Minimum Credit Load:	270
Maximum Credit Load:	360
Maximum MBKS Credit Load	234
ZNQF Level:	9

1.0. PURPOSE OF THE PROGRAMME
This joint degree programme offers a grounding in Sociology and Social Anthropology. The two subjects provide a deep understanding of people's culture, identity, social change and the institutions that make up everyday life. The Masters programme equips students with knowledge of empirical studies in social research helping them to address contemporary issues such as the problem of poverty, structural inequalities, effects of climate change on people's livelihoods and even the implementation of Sustainable Development Goals within specific societies. The programme also equips students to play an important role in disease outbreaks and pandemic response due to their ability to assess social, economic and political factors in local contexts. Students taking this programme will be required to do desk-based and individual research studies which are aimed at addressing institutional voids within their local communities, workplaces, government and Non-Governmental operations. Apart from the ability to design unique, locally based development trajectories for both rural and urban setups, this programme will prepare students for a wide range of career options within Government institutions, Community-based development initiatives, Non-Governmental operations, Social research careers, Human Resources as well as careers in distinguished Academic fields. Students are supposed to be in a position to analyse an industrialising society including identifying innovative social dimensions for effective industrialisation

2.0. Entry Requirements:
Normal Entry
At least a 2.2 degree or equivalent in Sociology or Anthropology from a recognised university.

3.0. PROGRAMME CHARACTERISTICS
Area of Study

1) ***Issues in Sociology and Social Anthropology***

Sociology and Social Anthropology's major focus is on finding solutions to complex societal problems through research, data analysis and high-level critical thinking. The two disciplines foster creativity, innovation, critical thinking, analytic problem-solving, communication skills, and intercultural and interpersonal relations. Students will be exposed to different theoretical and practical underpinnings to help them develop new models suitable especially for local communities.

2) Research Methods

Research is key in understanding issues to do with societal challenges and coming up with effective solutions to the problems. Students will be exposed to In-depth Qualitative and Quantitative Research Methods as well as methodological

concepts in Sociology and Anthropology which will give them a better understanding and approach to social science research.

3) Rural and Urban Development

Another focus of the programme is to provide a conceptual and empirical basis from which to understand rural and urban 'problems' and critically evaluate the prescribed 'solutions.' Students will develop an understanding of how rural and urban development theories have changed over time, and how these theories combine and conflict in their application to real-world situations. Students will be encouraged to appreciate a wide range of policy intentions and outcomes in the context of gender, ethnicity, social justice and democracy.

***Specialist Focus*:**
Sociology and Anthropology, Social Research, Rural and Urban Development

Orientation: Research and Innovation oriented. Teaching and learning focus on equipping students with an in-depth understanding of complex societal challenges as well as coming up with solutions to address these problems. These challenges range from inequalities in access to resources and access opportunities, Gender-Based Violence, and Rural and Urban poverty to issues relating to and not limited to climate change and disease outbreaks.

Distinctive Features: The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0. CAREER OPPORTUNITIES

The MSc degree in Sociology and Social Anthropology is designed for academics, researchers, policymakers, government and non-governmental organisations as well as rural and urban development experts. The disciplines of Sociology and Social Anthropology offer opportunities in a wide range of career paths. This entails that the graduates will enter the job market with a considerable advantage due to their possession of an array of practical skills that are valuable to many industries and careers. Students may expect to work as social researchers, data analysts, enumerators, educators, field officers, monitoring and evaluation officers, customer experience officers and human resources among other vocations. Both disciplines have been used in multiple ways by governments, and public and private organisations. Their utility has been in national issues relating to governance from winning elections to selling consumer goods, human and wildlife conflict, health communication, and understanding mass movements among other societal issues.

FURTHER EDUCATION

Graduates of the programme can enrol for Doctor of Philosophy Studies in Sociology, Anthropology, Childhood Studies, Gender Studies, Rural and Urban Development and other related fields.

5.0. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practical activities, guest lecturers, dissertation, lecture notes, assisted private studies and individual independent study.

Assessment Methods: Written and oral examinations, tests, seminar presentations, continuous assessment, dissertation.

6.0. LEARNING OUTCOMES

1. Students will be able to deploy a sociological/anthropological lens in questioning issues, in delineating and deciphering both texts and actual policies/interventions.
2. Students will be proficient in using quantitative and qualitative research methodologies in any research works.
3. Problem-solving: Students will be able to apply abstract thinking to real problem areas through citing real case studies and real scenarios.
4. Students will develop an ability to come up with a plan of action from general questioning

7.0. GENERAL PROVISIONS

Refer to the University's General Regulations

8.0. GENERAL PROVISIONS

Refer to the University's General Regulations.

9.0. PROGRAMME ASSESSMENT

Coursework: Encompass assignments, in-class tests, class presentations, and group assignments and seminars which will constitute 30% of the final mark.

Written
Examinations: A three-hour examination will be written for each module and will constitute 70% of the final mark.

Dissertation: Assessed on the basis of a research project (75%) and oral presentation (25%).

10.0. PROVISION FOR PROGRESSION
Refer to section 6 of the University's General Regulations.

11.0. FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.

12.0. GRADING AND DEGREE CLASSIFICATION
Refer to section 10 of the Faculty Regulations.

DEGREE WEIGHTING
Refer to section 11 of the Faculty Regulations.

13.0. PROGRAMME STRUCTURE

MSO801	Dissertation	90

14. MODULE SYNOPSES

MSO 701 Issues in Anthropological and Sociological Theory
This is an advanced course in sociological and anthropological theory which discusses classical works in depth with an emphasis on the application of theory. Key themes by classical theorists are considered and interrogated in terms of relevance and applicability in today's society. The module provides an in-depth examination of the development of sociological and anthropological theoretical approaches with an emphasis on the application of theory. Through a critical analysis of the classical works of theorists such as Weber, Marx, Durkheim, Parsons, Malinowski, Boas, Mauss, Strauss among others, students will be afforded the opportunity to engage at a more advanced level in issues relating to acquisition, production, and uses of sociological and anthropological knowledge. The module brings to the fore debates concerning sociological and anthropological description; philosophical underpinnings as well as historical and political antecedents. Some key themes to be examined in sociology include stability, conflict, change, plurality, subjectivity, identity and cultural repertoires. Key themes to be examined in anthropology include: affect and materiality, subjectivity, rationality, integration, and agency.

MSO 702 Advanced Qualitative Research Methodology
This module builds on students' knowledge of qualitative research methods by introducing them to advanced methods and techniques commonly used by qualitative researchers. The module seeks to foster an advanced level of understanding of,

and expertise in the use of, the key methods of qualitative data generation. Using a theoretical and practical learning approach, students will be further equipped with the knowledge and skills needed to critically engage with complex concepts relevant to the advanced aspects of qualitative research such as critical appraisal of research output. Topics covered will include phenomenological/interpretivist and subjectivist philosophical foundations of qualitative epistemology and ontology, action research, ethnographic and observational research, discourse and conversation analysis, documentary and archival analysis, participatory research, grounded theory, narrative interviewing, visual and other technology-based methods of data collection as well as fundamentals of qualitative data analysis.

MSO 703 Advanced Social Theory
The main thrust of this course is to impart analytical skills, attitudes and knowledge to students, who will in turn deploy these skills in engaging in an analysis of theoretical debates on the chosen topics, in an informed and rigorous manner. Thus, this course invites students to 'theorize' on key themes, using key theoretical propositions of social theorists in the field of sociology and related fields. The module is grounded on contemporary sociological and anthropological theory. The module will focus on the scholarship of Theodor Adorno, Michel Foucault, Pierre Bourdieu, Jurgen Habermas, Judith Butler, Slavoj Zizek, Zygmunt Bauman, Julia Kristeva, Anthony Giddens among other contemporary social thinkers. The main themes to be interrogated include power, freedom, media, individual agency, feminism, network society, communicative action, relativism, post-modernism, and critical theory. The overall goal is to teach students to propose their own theories or to theorise rather than to think of it as an enterprise of the mighty and the extraordinary, involving abstract thinking. Departing from tradition as with most Theory courses, rather than have classical theories and theorists determining the subject, the course has defined the subject that key theorists can be enlisted as analytical tools for intellectual understanding and explication of issues. Selected topics or themes encapsulate what can be viewed as core or trending social issues in society today as well as in the discipline of sociology today.

MSO704 Social Policy and Administration
This course focuses on examining the different perspectives on social policy and their implications for understanding and addressing major social problems in society. The main issues to be considered include a focus on the history of social policy, poverty, urban development, education, health, social welfare, housing, social security and international development, social justice and social change. Special emphasis will be on adopting a comparative approach in order to understand the formulation and practice of social policy in both developing and developed countries, the evolution of the welfare state, and the rationale and values that support different approaches. By the end of this course, students should be able to examine how different social, economic and political contexts affect social policy.

MSO 705 The Sociology and Anthropology of Childhood
This module critically examines children and childhood in a globalized world through sociological and anthropological lenses. Children have been left out of several evaluations and discourses on Child rights and policies concerning them. This module is designed in such a way that students understand how children shape and are shaped by the social worlds in which they live. Emerging discourses such as the New Sociology of Childhood will be studied and discussed in greater depth. Topics to be discussed may include child exploitation, sexual exploitation, migration, challenges of vulnerable children and issues pertaining to child fosterage.

MSO 706 Urbanisation and Development
The course aims to provide a conceptual and empirical basis from which to understand urban 'problems' and critically evaluate the prescribed 'solutions.' Students will develop an understanding of how urban and development theories have changed over time, and how these theories combine and conflict in their application to real-world situations. Students will be encouraged to appreciate a wide range of policy intentions and outcomes in the context of gender, ethnicity, social justice and democracy.

MSO 707 The Sociology of Rural Development
The course offers an in-depth understanding of the rural sociology theoretical evolution, and changing trends influencing the nature of rural development both in the developed world and the developing world. The student gets to understand the philosophies and ideologies behind rural development, how social change has evolved and how the quality of life has also changed. This gives the analytical frameworks for understanding the discourse of rural sociology regarding issues of rural poverty, livelihood development, policy development and quality of life for rural populations.

MSO 708 Industrial Sociology
This module critically examines trends in the workplace or organisations. The module equips students with the ability to bring about positive change within workplace settings. In addition to that, students are acquainted with issues to do with Human Resources, Management Models and Organisational Compliance to regulations Paying particular attention to industrial dynamics and developments from the First Industrial Revolution up to the 4th Industrial Revolution including the impact of technology. The module also expounds on workers' rights, associations and safety in the workplace which have become volatile issues in the past decade.

MSO 709 Social Development Issues
The module focuses on social development for enhanced understanding and planning for socially sensitive development. Global attention to social development, such as the World Bank's plan and the World Summit on Social Development will be explored. Thus, this course acquaints students with the concept of social development and then examines key concepts (including social change, human social development, transformative social policy, human capabilities, social inequalities, modernity and globalisation) and sectors in social development. These include the role of non-government organisations, government and the private sector in relation to education, health, food security and trade. This course also introduces students to the history of the concept of poverty, the culture of poverty, the causes of poverty and its effects. Intersections between poverty and health, human rights and education will be explored in a variety of international contexts

MSO 710 Gender and Development
Gender studies and development studies are both interdisciplinary in orientation, and they overlap on issues as diverse as work and family life, health and population, labour and international economic change. This course will open room for debates, and discussions on issues affecting both men and women in as much as development is concerned. This course will interrogate Gender and Development in light of Sustainable Development Goals, equal treatment before law as well as fair access to resources and opportunities mainly in the Zimbabwean context, regional and international community.

MSO 711 Advanced Quantitative Research Methodology
This module focuses on the concepts, positivist and realist philosophical foundations underpinning quantitative epistemology and ontology, methods and skills central to the successful design and implementation of quantitative research projects in the social sciences, including data collection approaches and concept operationalization. It builds on issues around probability sampling, sampling error and statistical inference. Furthermore, this module aims to produce careful and considerate researchers who understand and appreciate the key issues in the craft of applied work and are able to critically appraise quantitative social research in their respective fields. Topics covered include data collection approaches, surveys, case-control and cohort studies, data types and distribution, access and ethics, hypothesis testing, samples and populations, approaches to analyses including comparisons, regression and correlation; analysis of categorical and continuous data and combining results of independent studies.

MSO 712 Anthropology of Health and Medicine
The module aims to acquaint students with how health and medicine are contextualised across various cultural domains. It combines theoretical themes and ethnographic studies. The theoretical themes are grounded in sociological theory particularly structural functionalism, Marxism, symbolic interactionism, feminism, neoliberalism, and post-modernism. The module considers issues of knowledge and power that underpin discourses and practices around health and wellbeing. The module also emphasizes the local in relation to the global (global-local dynamics). Topics to be covered within the module include an in-depth study of the social construction of biomedical knowledge, issues of global health, gender, indigenous knowledge systems, faith and healing, alternative medicine, symbolic paradigms, trans-cultural psychiatry, disability studies, and public policy. By the end of the module, students will be able to critically understand the cultural construction of health and medicine within various social contexts.

MSO 713 Applied Sociology and Anthropology
The module aims to acquaint students with the use of sociology and anthropology as tools for intervention and enhancement of social life. The module equips students on how to formulate solutions to social problems that are theoretically grounded. The module adopts a practise-oriented approach by offering students a range of activities that involve the area of sociology and anthropology for example policy and research, analysis, programme evaluation, and organisational assessment. Some of the themes to be covered include evaluating social action, modelling social phenomena, and advancing the adaptability of alternative social forms. The module will enable students to identify social problems and proceed to analyse those problems using sociological and anthropological approaches.

MSO 714 Mixed Methods Approach
This module bridges the gap between quantitative and qualitative research methods by focusing on how the two can be simultaneously and/or sequentially integrated in social inquiry. The focus is on how the two methods including their philosophical underpinnings can be combined to give a comprehensive appreciation of social research and analysis. Topics include pragmatist epistemological and ontological philosophy, mixed research methods and techniques, design, presentation and dissemination. Issues surrounding mixed methods' reliability and validity are also critically discussed.

MSO 801 Dissertation
Research is a key component in designing models, implementing, monitoring and evaluating policies and programmes both at global, regional and national levels. The purpose of the Dissertation is to enable the students to showcase their ability to conduct innovative research. Each student is expected to come up with a research problem from which they derive a research topic, write the research proposal, clearly articulate either the qualitative research methods or the quantitative research methods or both, the research design(s), research tools, data management and analysis, presentation and discussion of research findings. The dissertation gives the students an opportunity to provide valuable recommendations for policies and programmes that would result in the positive transformation of the socioeconomic, religious and environment of the

population. Such recommendations from the dissertation course would subsequently enhance societal innovation and industrialisation.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN SOCIAL RESEARCH, POLICY AND INNOVATION (MSR)

Duration:	18 months
Actual Credit Load:	270
Minimum Credit Load:	270
Maximum Credit Load:	360
MBKS Credit Load:	234
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME

The world over, there is increasing emphasis on social innovation and evidence-based policymaking. This program is an advanced programme in social science research methods which combines a strong focus on research with a theoretical and practical understanding of social problems, social policy and intervention. The programme is designed to provide students with innovative methodologies and equip them with analytical concepts and methods to research the social world and make a difference in the area of social innovation and social policy. The programme has an extensive focus on the use of advanced quantitative and qualitative research skills in a multi-disciplinary social science environment. The degree ultimately aims to produce skilled graduates who are innovative have a sophisticated understanding of research and are able to independently design and carry out high-quality social science research that informs policies which speak to the needs of an evolving society. Through this program, students are prepared for writing a PhD thesis, a career in academia or a research-oriented career in a non-academic environment. The MSc Social Research, Policy and Innovation programme also zones into issues to do with population, health and gender.

2. ENTRY REQUIREMENTS

Normal Entry

A grade of C or better in O Level Mathematics. At least a 2.1 degree in Sociology or any relevant social science discipline from a recognised university or a post-graduate diploma in a relevant social science discipline. Relevant professional experience is also considered.

3. PROGRAMME CHARACTERISTICS

Areas of Study

The Masters in Social Research (and Innovation) seeks to address questions arising from social transformations ensuing in the contemporary local and global social world with a special emphasis on how to research and understand these dynamics in a scientific and innovative manner. As such, particular attention is paid to:

1. ***Philosophical constructs informing social research***
   Students familiarise themselves with fundamental philosophical backgrounds informing Social Science research.
2. ***Fundamental and advanced research methods and techniques***
   The program introduces students to basic and advanced quantitative and qualitative research methods and techniques in the Social Sciences.
3. ***Application of social research in addressing social problems and challenges through innovative solutions***

   Focus is paid towards using social research findings in informing solutions to social problems and policy in areas including gender, population, health and development.

Specialist Focus: Research, Policy and Innovation

Orientation: Research, industrialisation and innovation oriented. Teaching and learning focus on equipping students with analytical concepts and pragmatic methodological approaches to enable students to analyse and provide solutions ensuing from their (industrializing) social world.

Distinctive Features: The programme builds the research-industrialisation-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: This program prepares graduates for careers in public research organisations, academic institutions and non-academic research institutions in the public and private sectors such as in social welfare and humanitarian aid provision, the criminal justice system and policing institutions, marketing, tourism, media, development work, policy development and analysis, Non and Inter-Governmental Organisations, youth work and health services management.

Further Studies: Doctoral studies within the social science discipline.

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertation, lecture notes, assisted private studies and individual independent study.

Assessment Methods: Written and oral examinations, tests, seminar presentations, continuous assessment, dissertation.

6. LEARNING OUTCOMES

On completion of the program, students must:

- Have the ability to *identify* opportunities, problems and challenges particularly those ensuing from an industrialising society.
- Have the ability to use appropriate quantitative and qualitative research techniques to *innovatively solve* identified social problems.
- Have the ability to collect data in an ethical and appropriate manner.
- Communicate effectively and present information using multi-media within a Social Science Approach.

7. GENERAL PROVISIONS

Refer to the University's General Regulations.

8. PROGRAMME ASSESSMENT

Coursework: 40%
Written Examinations: 60%
Other: Dissertation which is assessed on the basis of a research project (75%) and oral presentation (25%).

9. PROVISION FOR PROGRESSION

Refer to section 6 of the University's General Regulations.

10. FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11. GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12. DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

Level 1 Semester 1

14. MODULE SYNOPSES

MSR701 Philosophy of Social Research

This module explores the fundamental philosophical debates around knowledge production in the social sciences. It aims to provide students with a general introduction to studying and carrying out research within the social sciences. In particular, the module focuses on the various assumptions that underpin researchers' decisions around the questions, designs and methods they select. In this module, complexities around philosophical positions in the social sciences are explored, with different worldviews are presented as sitting on a continuum from naturalist to pragmatist methods of social scientific investigation

MSR702 Research Design, Practice and Ethics

This module introduces students to research design and ethical issues in the practice of research within the social science discipline. It provides an introduction to a range of methods and methodologies in the design of research projects within the social science discipline. The module will focus on research design within a range of paradigms, zoning on identifying research areas and generating research questions, issues around methodological choices, as well as ethical issues in social research, thus helping students transform a research question into a viable research project. Ultimately, students who complete this module must understand not only principles of research design and how they relate to various philosophical assumptions but must also be able to judge methods and techniques which are appropriate for tackling specific research problems, and have developed abilities to appraise published research findings in their own substantive areas of study.

MSR703 Advanced Qualitative Research

This module builds on students' knowledge of qualitative research methods by introducing them to advanced methods and techniques commonly used by qualitative researchers. The module seeks to foster an advanced level of understanding of, and expertise in the use of, the key methods of qualitative data generation. Using a theoretical and practical learning approach, students will be further equipped with the knowledge and skills needed to critically engage with complex concepts relevant to the advanced aspects of qualitative research such as critical appraisal of research output. Topics covered will include action research, ethnographic and observational research, discourse and conversation analysis, documentary and archival analysis, participatory research, grounded theory, narrative interviewing, visual and other technology-based methods of data collection as well as fundamentals of qualitative data analysis.

MSR704 Advanced Quantitative Research

This module focuses on the concepts, methods and skills central to the successful design and implementation of quantitative research projects in the social sciences, including data collection approaches and concept operationalization. It builds on issues around probability sampling, sampling error and statistical inference. Furthermore, this module aims to produce careful and considerate researchers who understand and appreciate the key issues in the craft of applied work and are able to critically appraise quantitative social research in their respective fields. Topics covered include data collection approaches, surveys, case-control and cohort studies, data types and distribution, access and ethics, hypothesis testing, samples and populations, approaches to analyses including comparisons, regression and correlation; analysis of categorical and continuous data and combining results of independent studies.

MSR705 Researching Gender

The module aims to demonstrate how to conduct research on gender issues, paying attention to different contexts in which gender dynamics occur. The module examines both theoretical and practical aspects of researching gender issues as well as focusing on possible innovative ways and solutions to address challenges and problems arising from gender inequalities. The module also aims towards coming up with innovative solutions to gender disparities, including the ability to come up with, and review effective gender policies.

MSR706 Researching Childhood and Youth

The module aims to demonstrate how to conduct research with young people, paying attention to their social and spatial contexts. The module examines both theoretical and practical aspects of researching with young people in their socio-spatial contexts including crafting innovative ways of informing effective youth policies.

MSR707 Mixed Method Approach
This module bridges the gap between quantitative and qualitative research methods by focusing on how the two can be simultaneously and/or sequentially integrated in social inquiry. The focus is on how the two methods including their philosophical underpinnings can be combined to give a comprehensive appreciation of social research and analysis. Topics include mixed research methods and techniques, design, presentation and dissemination. Issues surrounding mixed methods' reliability and validity are also critically discussed.

MSR708 Social Research and Policy
This module highlights the relationship between social research and policy. It seeks to equip students with critical skills that will help them to have a positive impact in the area of policymaking. Through the use of illustrative examples from different policy contexts, students gain a critical appreciation of the opportunities, benefits and challenges of using research evidence to inform and influence social policy development and implementation. Students who complete this module will not only have critical insight into the policy process but will also understand how and why change may occur in the policy environment and be able to apply these insights to a case study that demonstrates an understanding of how and why specific policies were developed, including the influence of social research at different stages.

MSR709 Social Research and Innovation
This module highlights the relationship between research and how it can be harnessed alongside individuals' creativity to propose innovative solutions or interventions to social problems and make a difference in societies at a local, national or global level, a process which we refer to as social innovation. The module conscientises students of their capacity to make a difference within society through research and equips them to do so. It facilitates the personalisation of learning for students by allowing them to contextualise their learning to a topic meaningful to them.

MSR710 Advanced Quantitative and Qualitative Data Analysis
This module provides students with hands-on experience in working with different approaches to analysing and interpreting qualitative and quantitative data. This is an advanced course intended for students who have already had some training in qualitative and quantitative methods for data analysis at the undergraduate level. By the end of the module, students will understand the basic principles of the advanced methods covered, appreciate the context in which the methods are best applied, and have had practical experience applying these methods to real-world data, using relevant analysis packages.

MSR711 Policy Evaluation
The module examines policy evaluation in the real world by presenting policy evaluation within the context of policymaking, and by 'hands-on' evaluation of policy through social research. Students are introduced to public policy and principles of policy evaluation and are equipped with the skills necessary to develop evaluations and make use of various evaluation designs in real-world scenarios. Evaluation designs which are explored include descriptive; before-after; comparative- experimentalist policy transfer and systematic review.

MSR712 Researching Health
The module aims to demonstrate to students how to conduct research on health issues, paying attention to social contexts in which health issues occur. The module examines both theoretical and practical aspects of researching social health issues as well as focusing on possible innovative ways and solutions to address challenges and problems arising from health inequalities, with an ultimate need to inform effective health policies.

MSR801 Dissertation
The aim of this module is for students to design, conduct, analyse and report an original empirical study related to social policy or social innovation using the specialist methods taught in this programme.

MPHIL PROGRAMMES

- MPhil in Sociology (MPhil SOC)
- MPhil in Anthropology (MPhil ANTHRO)
- MPhil in Industrial Sociology (MPhil INSO)
- MPhil in Sociology and Social Policy (MPhil SOSP)

DPHIL PROGRAMMES

- DPhil in Demography and Population Studies (DPhil DPS)
- DPhil in Migration Citizenship and Refugee Protection (DPhil MCRP)
- DPhil in Sociology and Social Anthropology (DPhil SO)

- DPhil in Social Research Policy and Innovation (DPhil SRPI)

DEPARTMENT OF GEOGRAPHY, ENVIRONMENTAL SUSTAINABILITY AND RESILIENCE BUILDING

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN GEOGRAPHY AND ENVIRONMENTAL SUSTAINABILITY (GSE)

Duration:	4 years
Actual Credit load:	492
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	384
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme aims to develop knowledge, skills and competencies in the broad areas of geography and environmental sustainability relevant to various employment capabilities and careers in the world of work and societal development. These will be achieved through:

1.1.1 The provision of opportunities to study both aspects of human and physical geography and related environmental phenomena.

1.1.2 A balanced curriculum that enables the acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of geography and environmental sustainability issues.

1.1.3 The provision of related and relevant communication and presentation capabilities that enhance the students' effectiveness in a wide range of career opportunities.

2.0 ENTRY REQUIREMENTS

2.1 For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language, Mathematics and a Science subject at grade C or better.

2.1.1 **Normal Entry:** A pass in Advanced Level Geography and any other Advanced Level subject and 5 Ordinary Level passes OR National Foundation Certificates including Mathematics and English Language.

2.1.2 **Special Entry:** National Diploma and Higher National Diploma in Environmental Science.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Physical Geography; Human Geography; Environmental Sustainability; Geo-Information Sciences.

3.2 **Specialist Focus:** Geography and environmental sustainability with special emphasis on the application of geo-statistics and geo-information science, sustainability principles, auditing and reporting techniques and standards.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers in industry, environmental management, environmental auditing and reporting; research institutions; positions in academia; environmental consultancy; application of geo-information science; safety and health; environmental management; non-profit organizations; and public agencies.

4.2 **Further Studies:** Master and Doctoral studies in Geography and Environmental Sustainability.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures, tutorials, laboratory activities, seminars, group work, field-based activities, work-related learning, dissertation, and individual independent study.

5.2 **Assessment Methods:** Written and oral examinations, tests, written and practical assignments, laboratory reports, field reports, seminar presentations, industrial attachment/work-related learning reports, dissertation, continuous assessment.

6.0 LEARNING OUTCOMES

6.1 By the end of the programme a graduate will be able to:

6.1.1 Use critical skills that are transferable to a wide range of careers, written and oral communication, critical thinking, information analysis, interpretation and application and ability to solve geographical and environmental sustainability-related problems in the world of work and societal development.
6.1.2 Carry out research and field-based geographical and environmental sustainability activities ethically and following best practices of integrity.
6.1.3 Apply a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of geography and environmental sustainability issues.
6.1.4 Participate in geography and environmental sustainability discourses and exchange of ideas in a collaborative manner.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Science Geography and Environmental Sustainability Honours Degree is a four year programme.
7.2 Students go for work related learning during the third level of study.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment: 40%: Test (15%), Practicals (20%), Assignments (5%)
8.2 Written Examinations: 60%
8.3 Other:
8.3.1 Research Project is assessed on the basis of a research project (75%), Oral presentation (15%) and student conduct in the laboratory (10 %).
8.3.2 Industrial Attachment/Work Related Learning is assessed based on Industrial Attachment/Work Related Learning report (30%), assessment by Work Supervisor (50%), and assessment by Academic Supervisor (20%).

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

GSE 444 Environmental Sustainability Auditing and Reporting	12
GSE 445 Environmental Justice and Social Change	12

14.0 MODULE SYNOPSES

GSE 131 Geographical Field and Laboratory Skills I

The module covers qualitative and quantitative techniques in geography, elements of cartography, map interpretation, techniques in fieldwork and basic laboratory investigation techniques.

GSE 132 Fundamentals of Physical Geography

The module covers a broad spectrum of physical geography. Students are introduced to the principles of climatology; biogeography; pedology, hydrology and geomorphology.

GSE 133 Fundamentals of Human Geography

The module covers a broad spectrum of human geography. Students are introduced to the elements of urban and rural settlements; and aspects of socio-cultural, economic and population geography.

GSE 134 Principles of Geographical and Environmental Sustainability

Concepts of environment, resources and sustainability; the roles of physical and human geography in understanding the interaction of humans and the environment; introduction to the management of environment-resource systems, conventions and appropriate environmental sustainability tools, strategies and procedures.

CS 131 Basic Communication Skills

Refer to the Department of Communication Skills.

GSE 135 Meteorology and Climatology

The module introduces students to the climatic phenomena; earth's atmospheric processes, radiation and heat balance, global circulation and air mass movement; weather patterns and forecasts; global climatic processes, ocean circulating systems, climatic change and environmental processes.

GSE 136 Biodiversity and Ecosystem Conservation

The module covers the concepts of biodiversity and ecosystems, ecosystem disturbance and resilience. Sampling methods for vegetation analysis, diversity measurement in the context of climate change and sustainability, ecosystem services,

social-ecological systems; current and future state of biodiversity and ecosystems, biodiversity and ecosystem sustainable conservation approaches and strategies.

GSE 137 Hydrology
The module introduces students to the interaction of hydrological processes of attenuation, evaporation, infiltration and other losses. Skills such as hydrologic data acquisition, manipulation and analyses are also developed in students.

GSE 138 Sustainable Natural Resources Management
The module seeks to introduce students to natural resource types, values and consumption patterns. It also develops students' knowledge and skills in sustainable natural resources utilization, management and conservation. The objective is for the student to gain a broad perspective and think critically about the use of natural resources.

GES 139 Principles of Geomorphology
The module intends to introduce students to the principles, processes and theories of geomorphology. It will further examine the spatial and temporal dimensions of the geomorphic system with more emphasis on tropical regions. Additionally, the interlinkages of geomorphology and other sub-disciplines of physical geography.

HCS 135 Introduction To Information and Communication Technology
Refer to the Department of Information Systems.

GSE 231 Social and Environmental Impact Assessment
The module covers social and environmental assessment and management techniques; environmental policies and practices, impact assessment, audits and environmental reporting.

GSE 232 Geography and Information Systems and Remote Sensing I
Geographic Information Systems and Remote Sensing: GIS components, GIS and CAD, data capture, spatial data models and structures; raster–vector debate, spatial databases, spatial analysis and modelling functions; Remote Sensing Systems, image processing, image interpretation, geo-referencing, GIS and Remote Sensing Integration, demonstration of use and functionality of software packages.

GSE 233 Environmental Policy and Legislation
Students are introduced to concepts of formulation, implementation and review of policies and laws that aim to promote sustainable management of the environment and natural resources at various scales.

GSE 234 Research Methods
The module introduces students to the essential elements of the scientific research process, research designs, quantitative and qualitative approaches, data collection, analysis and interpretation, results dissemination and ethical issues in research.

GSSS 231 Gender Studies for Social Sciences
Refer to the Faculty Regulations.

GSE 236 Geographic Information Systems and Remote Sensing II
The module explores the applied dimensions of Geographic Information Systems and Remote Sensing, GIS application development cycle, application in environmental management, natural resources management, utility management, hazard management, land use planning, business and commerce.

GSE 237 Environmental Safety, Health and Quality Management in Industry
Principles of environmental health, safety and quality management are covered in this module. Development of occupational health and safety, hazards, exposure limits, job stress, emergency response, principles of toxicology and epidemiology, risks and their control, material handling and storage, crane and hoist safety. Quality standards, inspections, customer relations, audits and management are explored.

GSE 238 Geographical Field and Laboratory Skills II
The module intends to inculcate knowledge and practical field and laboratory skills associated with geographical and environmental data collection, analysis and presentation. Field procedures and practices in the collection and handling of data on soils, biodiversity, water resources etc and subsequent laboratory processes constitute the main focus of the module.

GSE 239 Project Planning and Sustainability

The module focuses on project planning models and approaches. It also explores the application of planning principles, relevance and utilization of environmental data and planning tools such as logical framework, problem tree analysis and cost-benefit analysis. The module also looks at project identification, planning, implementation, management, evaluation and sustainability.

ENT 235 Entrepreneurship 1
Refer to the Department of Entrepreneurship.

GSE330 Work-Related Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

GSE331 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

GSE332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

GSE333 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

GSE 431 Geographic Information Systems and Remote Sensing III
Institutional and technical issues; accuracy, data standards, technical specification, GIS and the decision-making process, organizational placement, implementation strategies, technology change management, GIS project design, project management, report preparation and presentation developments in GIS and Remote Sensing are the key aspects covered in this module.

GSE 432 Climatic Change, Environmental Impacts and Management
Issues related to climatic change such as causes/theories, trends (projections and modelling), impacts, and adaptation and mitigation strategies at various scales.

GSE 433 Natural Hazards and Human Response
The module examines types of natural hazards such as geological, biological and climatic at spatial and temporal scales. It further critically analyses various human response strategies and proffers possible policy, legislative, institutional and technological solutions.

GSE 434 Urban Climatology
Effects of urban structures and industrial operations on local climates as well as analysing special climate data requirements for urban and industrial activities. Strategies to deal with possible current and future climatic problems emanating from rapid urbanization in developing countries, including Zimbabwe.

GSE 435 Population Dynamics and Environmental Sustainability
Spatial and temporal dimensions of population dynamics in relation to resource consumption and conservation are covered. The relationships between people and environmental sustainability, key themes include the impact of population growth on the environment, and the conflicts between population growth/land use/conservation programmes. It also focuses on components of population change such as fertility, mortality and migration at national, regional and global scales.

GSE 436 Research Project
Students are to prepare and present a research project based on the concepts learnt theoretically and in the field. The guidelines for the dissertation are based on the basic skills of research and report writing which include the development of a research problem, formulation of research objectives, research methodology, data analysis, results and discussion, conclusion and recommendations.

GSE 437 Food Security and Environmental Sustainability

The module explores in detail the interface between the food security concept and contemporary environmental issues at various spatial and temporal scales. It critically examines aspects such as food availability, access and utilization as well as assessing food security risks with the aim of ensuring sustainable food security in different geographical and environmental contexts.

GSE 438 Urban Development, Planning and Management
Evolution of urban landscapes, urban morphology and functional zonation in relation to city master plans; urban policy and planning; inner city problems; urban services and facilities provision, urban management and governance, the cultural ecology of the city, water and waste management and urban environmental management and conservation are the concepts covered in this module.

GSE 439 Water Resources Planning and Management
This module aims to provide the skills to undertake an analysis of the water resources of a region/catchment. It covers three broad areas; the concepts of rights, ownership types and planning mechanisms with respect to water allocation and development. The module further explores international, regional and national water management principles, practices and policies.

GSE 440 Environment Pollution and Control
The module aims to broaden and deepen the students' understanding of environmental pollution measurement, monitoring and mitigation. It analyses pollution impacts on the environment (water, air, soil), abatement practices and strategies, the legislative framework and the application of appropriate tools and technologies in pollution control and management.

GSE 441 Network Analysis and Transport Geography
The module focuses on networks and the nature of transport and communication; development of transport networks – design and route location; transport models; transport and sustainable development.

GSE 442 Applied Geomorphology
The module aims to enhance analytical and applied skills to undertake analyses of geomorphic processes such as aggradation and degradation; human-landscape interactions; linkage between geomorphology and other physical phenomena.

GSE 443 Sustainable Tourism and Recreation Geography
The module focuses on the scope of tourism geography; theories of tourism development; aspects of the tourism and recreation industry; global trends in the nature of tourism; characterization of source and destination areas, cycle of destination centres; socio-economic and environmental impacts of tourism on sending and receiving regions and sustainable tourism development.

GSE 444 Environmental Sustainability Auditing and Reporting
The module is intended to provide a broad understanding of environmental auditing and reporting. It focuses on an introduction to auditing, its purpose, environmental, corporate and product auditing, and the application of assessment tools such as lifecycle assessment and ecological and carbon footprinting. EMS standards, corporate social responsibility (CSR) and environmental and social reporting by organisations in developed and developing countries.

GSE 445 Environmental Justice and Social Change
The module exposes students to social justice which aims to give individuals and groups' fair treatment and an impartial share of social, environmental and economic benefits. 'Environmental justice' would include aspects of social justice even where social and environmental goals may be in conflict.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN ENVIRONMENTAL DISASTER RISK MANAGEMENT AND RESILIENCE BUILDING (GDR)

Duration:	4 years
Actual Credit load:	480
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	384

ZNQF Level: 8

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme is tailor-made to meet the disaster risk management and resilience-building needs of Zimbabwe and the world at large. It intends to equip students with both theoretical and practical skills that are relevant to disaster risk management and resilience building in various industries, institutions, organizations and communities. This will be achieved through:

1.1.1 Imparting knowledge that links geography, disaster risk management and resilience-building theories and practice.

1.1.2 Development of knowledge and skills to manage existing and new projects through the participation of target stakeholders and institutions.

1.1.3 Development of skills that enable students to realize and apply new technologies to the changing demands coming from the increasing threats of disasters threatening expanding productive and consumption sectors of the globalised world economies.

1.1.4 The formulation and conducting of research that promotes safe, environmentally friendly and people-centred development at community, institutional, national, regional and international levels.

1.1.5 The provision of opportunities to study aspects of geography, disaster risk management and resilience building in various sectors of society.

2.0 ENTRY REQUIREMENTS

2.1 For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language, Mathematics and a Science subject at grade C or better.

2.1.1 **Normal Entry:** A pass in Advanced Level Geography and any other Advanced Level subject AND 5 Ordinary Level passes/ National Foundation Certificates including Mathematics and English Language OR National Certificate.

2.1.2 **Special Entry:** National Diploma and Higher National Diploma in Environmental Science.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Geography, Environmental Science; Disaster Risk Management; Resilience Building; Geo-Information Sciences.

3.2 **Specialist Focus:** Disaster risk management and resilience building

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers in disaster risk management and resilience building, environmental management; research institutions; positions in academia; application of geo-information science; environmental planning, and NGOs.

4.2 **Further Studies:** Master and Doctoral studies in Geography and Environmental Sciences.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures, tutorials, laboratory activities, seminars, group work, field-based activities, industrial attachment/work-related learning, research project, individual independent study.

5.2 **Assessment Methods:** Written and oral examinations, tests, written and practical assignments, laboratory reports, field reports, seminar presentations, work-related learning reports, research projects, and continuous assessments.

6.0 LEARNING OUTCOMES

6.1 By the end of the programme a graduate will be able to:

6.1.1 Demonstrate knowledge and understanding of the link between geography, disaster risk management and resilience building.

6.1.2 Formulate workplace or community policies, plans and programmes to address disaster risk management, resilience-building challenges.

6.1.3 Investigate disaster risk management, resilience building and environmental risks and hazards and proffer possible solutions to achieve sustainable development.

6.1.4 Understand disaster risk management, resilience building and environmental interlinkages and the need for an integrated approach to address them.

6.1.5 Analyse environmental systems and technological applications in natural resources management for sustainable development.

6.1.6 Use appropriate research methods to create new insights into disaster risk management, resilience building and environmental phenomena and technology applications.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Science in Geography, Disaster Risk Management and Resilience Building Honours Degree is a four-year programme.

7.2 Students go for industrial attachment/work-related learning during the third level of study.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment: 40%: Test (15%), Practicals (20%), Assignments (5%)

8.2 Written Examinations: 60%

8.3 Other:

8.3.1 Research Project is assessed on the basis of a research project (75%), Oral presentation (15%) and student conduct in the laboratory (10 %).

8.3.2 Industrial Attachment/Work Related Learning is assessed based on Industrial Attachment/Work Related Learning report (30%), assessment by Work Supervisor (50%), and assessment by Academic Supervisor (20%).

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1	**Credits**
GDR 131 Natural and Anthropogenic Hazards	
GDR 132 Disaster Risk Management and Resilience Building	12
GDR 133 Policy and Legislation in Disaster Management	12
CS 131 Basic Communication Skills	12
HCS 135 Introduction to Information Technology	12
Level 1 Semester 2	
GDR 134 Physical Geography of Southern Africa	12
GDR 135 Fundamentals of Emergency and Crisis Planning and Management	12
GDR 136 Critical Infrastructure Resilience	12
GDR 137 Disaster Risk Reduction and Climate Change Adaptation	12
GDR 138 Resilience and Pest Infestation	12
Level 2 Semester 1	
GDR 231 Human Geography of Southern Africa	12
GDR 232 Geographic Information Systems and Remote Sensing I	
GDR 233 Resilience and Humanitarian Action	12
GSSS 231 Gender Studies for Social Sciences	12
ENT 235 Entrepreneurship	12
Level 2 Semester 2	
GDR 234 Risk Assessment Techniques	12
GDR 235 Disaster-based Land Use Planning	12
GDR 236 Resilience and Indigenous Knowledge Systems	12
GDR 237 Research Methods	12
GDR 238 Geographic Information Systems and Remote Sensing II	12
Level 3 Semester 1	
GDR 330 Work Related Learning Placement Report	40
Level 3 Semester 2	

GDR 331 Industrial Attachment/ Work Related Learning Report	30
GDR 332 Academic Supervisor Report	20
GDR 333 Work Supervisor Report	30

Level 4 Semester 1

GDR 431 Capacity Development and Community Resilience Training	12
GDR 432 Risk Perception, Communication and Human Behaviour	12
GDR 433 Geographic Information Systems and Remote Sensing III	12
GDR 434 Rural and Urban Livelihoods and Disaster Risk Reduction	12
GDR 435 Project Development and Management	12

Level 4 Semester 2

NB: Students should take Research Project and any two electives from the modules listed below:

GDR 436 Research Project	
GDR 437 Population, Development and Disasters	12
GDR 438 Food Security and Environmental Sustainability	12
GDR 439 Water resources Planning and management	12
GDR 440 Environmental Pollution and Control	12
GDR 441 Environmental Justice and Social Change	12

14.0 MODULE SYNOPSES

GDR 131 Natural and Anthropogenic Hazards

The module explains the relationship between natural hazards, extreme events and disasters. A description of factors that make some places more vulnerable to specific types of natural and human hazards is explored. The module also discusses the connections between natural hazards and global environmental changes which communities would need to adapt to.

GDR 132 Disaster Risk Management and Resilience Building

An introductory module which familiarizes students with contemporary concepts and practices in disaster risk management and resilience building. The module facilitates a paradigm shift from reactive to proactive approaches in disaster management. It also explores the occurrences of disasters and how they can be sustainably contained through resilience building.

GDR133 Policy and Legislation In Disaster Management

The module exposes the student to the general objectives of the Disaster Management Policy which are to: avoid loss of human life and destruction of property by natural disasters or by humans; incorporate disaster prevention into the overall national development process, and; promote domestic and international cooperation in disaster preparedness and management.

CS131 Basic Communication Skills

Refer to the Department of Communication Skills.

HCS 135 Introduction To Information Technology

Refer to the Department of Information Systems.

GDR 134 Physical Geography of Southern Africa

The module introduces the broad spectrum of the physical geography of Southern Africa. Emphasis is put on elements such as geomorphology, geology, hydrology, climatology, biogeography and pedology in relation to disaster occurrence.

GDR 135 Fundamentals of Emergency and Crisis Planning and Management

The module introduces the student to definitions, *principles*, scenarios, structure of a *plan* as well as standards in *emergency planning*, efficiency of civil protection and sustainability of *emergency preparedness;* industrial *emergency planning* (including hazardous materials transportation).

GDR 136 Critical Infrastructure Resilience

The module introduces the students to critical infrastructure resilience. A disruption to critical infrastructure could have serious implications for business, governments and the community. Critical infrastructure provides services that are essential for everyday life such as energy, food, water, transport, communications, health and banking and finance. Secure and resilient infrastructure supports productivity and helps to drive the business activity that underpins economic growth.

GDR 137 Disaster Risk Reduction and Climate Change
The module allows students to understand the interlinkages between climate change adaptation and disasters. It also explores strategies that can be employed in building resilience to disasters associated with climate change in vulnerable environments.

GDR 138 Resilience and Pest Infestation
The module examines types of natural insects and pests at spatial and temporal scales. It critically analyses various human response strategies and proffers possible natural and technological solutions. Principles as well as the theory of pest control are explored in the context of resilience building by communities.

GDR 231 Human Geography of Southern Africa
The module covers a broad spectrum of human geography in Southern Africa. Students are introduced to urban and rural settlements, and economic and social activities. The module covers aspects of economic development initiatives such as agriculture, mining, tourism, commerce and how they are affected by disasters. Strategies for resilience building are also explored.

GDR 232 Geographic Information Systems and Remote Sensing I
Geographic Information Systems and Remote Sensing: GIS components, GIS and CAD, data capture, spatial data models and structures; raster–vector debate, spatial databases, spatial analysis and modelling functions; Remote Sensing Systems, image processing, image interpretation, geo-referencing, GIS and Remote Sensing Integration, demonstration of use and functionality of software packages.

GDR 233 Resilience and Humanitarian Action
The module explores resilience, covering all stages of a disaster, from prevention to adaptation, and includes a positive transformation that strengthens the ability of current and future generations to meet their needs and withstand crises. The principles of humanity, neutrality, impartiality and independence are highlighted as fundamental to humanitarian action. The objectives of humanitarian action namely: to save lives, alleviate suffering and maintain human dignity during and in the aftermath of man-made crises and natural disasters are also explored.

GSSS 231 Gender Studies for Social Sciences
Refer to Faculty Regulations.

ENT 235 Entrepreneurship
Refer to the Department of Entrepreneurship.

GDR 234 Risk Assessment Techniques
The module equips students with disaster risk assessment techniques which help them to determine the nature and extent of such risk, by analysing hazards and evaluating existing conditions of vulnerability that together could potentially harm exposed people, property, services, livelihoods and the environment on which they depend.

GDR 235 Disaster-Based Land Use Planning
The world is threatened by various natural and anthropogenic-induced hazards. This module exposes students to strategic land resource utilisation. Students are expected to develop the art of land use planning that is sustainable in the face of global disasters.

GDR 236 Community Resilience and Indigenous Knowledge Systems
This module seeks to expose students to indigenous, traditional and local knowledge that is vital in resilience building and adaptation. The module also looks at the inclusion of indigenous knowledge in disaster preparedness through forecasting and combining it with scientific knowledge systems to enhance community resilience.

GDR 237 Research Methods
The module introduces students to the essential elements of the scientific research process, research designs, quantitative and qualitative approaches, data collection, analysis and interpretation, results dissemination and ethical issues in research.

GDR 238 Geographic Information Systems and Remote Sensing II
The module explores the applied dimensions of Geographic Information Systems and Remote Sensing, GIS application development cycle, application in environmental management, natural resources management, utility management, hazard management, land use planning, business and commerce.

GDE330 Work- Related Learning Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

GDE331 Work- Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department. It will be marked and awarded a mark that will be ratified by the departmental examinations board.

GDE332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor.This will be presented to the departmental examinations board for processing of final marks.

GSE333 Work- Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

GDR 431 Capacity Development and Community Resilience Training
The module introduces the student to a project of work on community capacity building, fostering economic and social resilience, methodology, objectives and outputs to enhance local and national governments' capacity to design and implement strategies to build, rebuild and sustain community capacity.

GDR 432 Risk Perception, Communication and Human Behaviour
Students deliberate on what influences risk perception, how communication about risks is usually done and what this means to an individual as well as at societal level. Examples of questions that are discussed during the course are: How do we prioritise what risks to manage from a societal perspective? What risks can we expect to be protected from and why? What underlying reasons are there to explain why one risk is perceived differently by different groups?

GDR 433 Geographic Information Systems and Remote Sensing III
Institutional and technical issues; accuracy, data standards, technical specification, GIS and the decision-making process, organisational placement, implementation strategies, technology change management, GIS project design, project management, report preparation and presentation developments in GIS and Remote Sensing are the key aspects covered in this module.

GDR 434 Rural and Urban Livelihoods and Disaster Risk Reduction
The nature of livelihoods has evolved due to factors such as urbanisation, globalisation, industrialisation and technological innovations, among others. The module analyses how rural and urban communities can sustainably utilise resources within their environments without compromising their safety in the face of local and global disasters. The nexus between livelihoods and disasters is discussed in this module.

GDR 435 Project Development and Management
The module introduces students to the process of project development from proposal writing to monitoring and evaluation. Students are expected to be able to develop environmentally sustainable projects and manage projects professionally and ethically.

GDR 436 Research Project
Students are to prepare and present a dissertation based on the concepts learnt theoretically and in the field. The guidelines for the dissertation are based on the basic skills of research and report writing which include the development of a research problem, formulation of research objectives, research methodology, data analysis, results and discussion, conclusion and recommendations.

GDR 437 Population, Development and Disasters
Spatial and temporal dimensions of population dynamics concerning development and disasters are covered. The relationships between people, development and disaster include key themes such as the impact of population growth on development, the conflicts between population growth/ structure and migration.

GDR 438 Food Security and Environmental Sustainability
The module explores in detail the interface between the food security concept and contemporary environmental issues at various spatial and temporal scales. It critically examines aspects such as food availability, access and utilisation as well as assessing food security risks to ensure sustainable food security in different geographical and environmental contexts.

GDR 439 Water Resources Planning and Management

This module aims to provide the skills to undertake an analysis of the water resources of a region/catchment. It covers three broad areas; the concepts of rights, ownership types and planning mechanisms concerning water allocation and development. The module further explores international, regional and national water management principles, practices and policies.

GDR 440 Environmental Pollution and Control
The module aims to broaden and deepen the students' understanding of environmental pollution measurement, monitoring and mitigation. It analyses pollution impacts on the environment (water, air, soil), abatement practices and strategies, the legislative framework and the application of appropriate tools and technologies in pollution control and management.

GDR 441 Environmental Justice and Social Change
The module exposes students to social justice which aims to give individuals and groups fair treatment and an impartial share of social, environmental and economic benefits. 'Environmental justice' would include aspects of social justice even where social and environmental goals may conflict.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN ENVIRONMENTAL SAFETY HEALTH AND QUALITY MANAGEMENT (ESH)

Duration:	4 years
Actual Credit Load:	480
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	384
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme is tailor-made to meet the environmental safety, health, and quality management needs of Zimbabwe and the world at large. It intends to equip students with both theoretical and practical skills that are relevant to safety, health and the environment in various industries, institutions and organisations. This will be achieved through:

1.1.1 Imparting knowledge that links safety, health, quality and environmental theories and practice.

1.1.2 Development of knowledge and skills to manage existing and new projects through the participation of target stakeholders and institutions.

1.1.3 Development of skills that enable students to realize and apply new technologies to the changing demands coming from the rapidly expanding productive and consumption sectors of the globalised world economies.

1.1.4 The formulation and conducting of research that promotes safe, environmentally friendly and people-centred development at community, institutional, national, regional and international levels.

1.1.5 The provision of opportunities to study aspects of safety, health, quality and environmental management in various sectors of employment.

2.0 ENTRY REQUIREMENTS

2.1 For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language, Mathematics and a Science subject at grade C or better.

2.1.1 **Normal Entry:** A pass in Advanced Level Geography and any other Advanced Level subject AND 5 Ordinary Level passes/ National Foundation Certificates including Mathematics and English Language OR National Certificate.

2.1.2 **Special Entry:** National Diploma and Higher National Diploma in Environmental Science.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Environmental Sciences; Occupational Safety and Health; Quality Management; Geo-Information Sciences.

3.2 **Specialist Focus:** Environmental safety, health and quality management systems.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme builds the research-technology-innovation-management continuum and focuses on heritage-based knowledge development using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers in: environmental management; research institutions; positions in academia; safety, health and environmental consultancy; application of geo-information science; occupational safety and health; environmental planning; public agencies; start-ups.
4.2 **Further Studies:** Master and Doctoral studies in Environmental Safety, Health and Quality Management.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures, tutorials, laboratory activities, seminars, group work, field-based activities, work-related learning, dissertation, individual independent study.
5.2 **Assessment Methods:** Written and oral examinations, tests, written and practical assignments, laboratory reports, field reports, seminar presentations, work-related learning reports, research projects, and continuous assessment.

6.0 LEARNING OUTCOMES

6.1 By the end of the programme a graduate will be able to:
- 6.1.1 Demonstrate knowledge and understanding of safety, health and environmental management.
- 6.1.2 Formulate workplace policies, plans and programmes to address safety and health challenges.
- 6.1.3 Investigate safety, health and environmental risks and hazards and proffer possible innovative solutions to achieve the ILO decent work concept.
- 6.1.4 Understand safety, health and environmental inter-linkages and the need for an integrated approach to address them.
- 6.1.5 Analyse environmental systems and technological applications in natural resources management for sustainable development.
- 6.1.6 Use appropriate research methods to create new insights into safety, health and environmental phenomena and technology applications.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Science Environmental Safety, Health and Quality Management Honours Degree is a four-year programme.
7.2 Students go for industrial attachment/work-related learning during the third level of study.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment: 40%: Test (15%), Practicals (20%), Assignments (5%)
8.2 Written Examinations: 60%
8.3 Other:
- 8.3.1 Research Project is assessed based on a research project (75%), oral presentation (15%) and student conduct in the laboratory (10 %).
- 8.3.2 Industrial Attachment/Work Related Learning is assessed based on Industrial Attachment/Work Related Learning report (30%), assessment by work supervisor (50%), and assessment by academic supervisor (20%).

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Module	Credits
Level 1 Semester 1	
ESH 131 Introduction to Environmental Safety and Health	12
ESH 132 Fundamentals of Quality Management	12
ESH 133 Basic Science for Occupational Health Practice	12
CS 131 Basic Communication Skills	12
HCS 135 Introduction to Information Technology	12
Level 1 Semester 2	
ESH 134 Occupational Hazards and Accident Prevention	12

ESH 135 Environmental Safety and Health Management Systems	12
ESH 136 Quality Management Systems	12
ESH 137 Hazard Identification Risk Assessment and Management	12
ESH 138 Environmental Safety and Health Legislation	12

Level 2 Semester 1

ESH 231 Occupational Hygiene	12
ESH 232 Quality Management Implementation in Industry	12
ESH 233 Environmental Safety and Health Inspections	12
GSSS 231 Gender Studies for Social Sciences	12
ENT 131 Entrepreneurship	12

Level 2 Semester 2

ESH 432 Climate Change and Occupational Hazards	12
ESH 433 Ergonomics	12
ESH 434 Confined Workplace Environmental Safety and Health	12
ESH 435 Behaviour Based Safety	12

Level 4 Semester 2

Students should take the Research Project and any two electives from the modules listed below:

ESH 436 Research Project	36
ESH 437 Geographic Information Systems and Remote Sensing II	12
ESH 438 Food Safety and Quality Management	12
ESH 439 Environmental Pollution and Control	12
ESH 440 Fire Safety	12
ESH 441 Radiation Management	12
ESH 442 Electric Safety	12

14.0 MODULE SYNOPSES

ESH 131 Introduction to Environmental Safety and Health

The module covers the broad spectrum of occupational safety and health. Students are introduced to principles of environmental safety and health and hazardous work environmental factors.

ESH 132 Fundamentals of Quality Management

The module covers the broad spectrum of occupational quality management. Students are introduced to aspectsof quality management such as quality planning; quality assurance; quality control and quality management.

ESH 133 Basic Science for Occupational Health Practice

The module prepares students for basic inevitable science issues they will deal with in successive modules. Key focus areas include definitions of occupational health-related terms, human anatomy and physiology (respiratory, cardiovascular, endocrine, digestive systems), states of matter, physical and chemical properties of workplace contaminants, exposure pathways and metabolism of elements.

CS 131Basic Communication Skills

Refer to the Department of Communication Skills.

HCS 135 Introduction to Information Technology
Refer to the Department of Information Systems.

ESH 134 Occupational Hazards and Accident Prevention
The module examines the nature and types of environmental safety and health hazards. Examination of how accidents occur; the domino sequence of management and the benefits of accident prevention are key concepts that are also covered.

ESH 135 Environmental Safety and Health Management Systems
The module focuses on the types and purpose of environmental safety and health management systems; procedures of implementing specific environmental safety and health management systems and the benefits of environmental safety and health management systems in organisations.

ESH 136 Quality Management Systems
The module examines formalised systems that document processes; procedures and responsibilities for achieving quality policies and objectives. Focus on environmental safety and health management systems is made on the benefits of a quality management system such as the ISO 9001standard.
ESH 137 Hazard Identification, **Risk Assessment and Management** Students are exposed to the whole process of identifying and analysing potential events that may negatively impact people, assets and or the environment. Focus is also on risk analysis, risk evaluation and the risk control hierarchy.
ESH 138 Environmental Safety and Health Legislation
The module outlines the legislation governing environmental health and safety at local, national and international levels in various sectors of the economy. The focus is on international and national legislation whose primary objective is the protection of the environment and the safety and health of workers.

ESH 231 Occupational Hygiene
Anticipating, recognising, evaluating and controlling environmental factors or stressors arising in or from the workplace are key aspects that are discussed. The module also focuses on chronic as well as acute conditions emanating from hazards posed by physical chemical and biological agents as well as stress.

ESH 232Quality Management and Implementation in Industry
The module focuses on the improvement of quality and performance in all functions; departments and processes across the organization to provide quality services which exceed customer expectations. The steps to creating a total quality management system for specific industries are explored.

ESH 233 Environmental Safety and Health Inspections
Focuses on the purpose of environmental safety and health inspections, types of inspections, benefits of inspections and inspection reports in different environments. The module examines the systematic procedure for identifying actual as well as potential health and safety hazards at various workplaces before accidents occur that could involve people, equipment, materials and the environment.

GSSS 231 Gender Studies for Social Sciences
Refer to the Faculty Regulations.

ENT 235 Entrepreneurship
Refer to the Department of Entrepreneurship.

ESH 234 Research Methods
The module introduces students to the essential elements of the scientific research process, research designs, quantitative and qualitative approaches, data collection, analysis and interpretation, results dissemination and ethical issues in research.

ESH 235 Geographic Information Systems and Remote Sensing I
Geographic Information Systems and Remote Sensing: GIS components, GIS and CAD, data capture, spatial data models and structures; raster–vector debate, spatial databases, spatial analysis and modelling functions; Remote Sensing Systems, image processing, image interpretation, geo-referencing, GIS and Remote Sensing Integration, demonstration of use and functionality of software packages.

ESH 236 Environmental Safety, Health and Quality Auditing

The module examines the structured process relating to the efficiency effectiveness and reliability of an organisation's environmental safety health and quality management system. The focus is also on the design of safety plans and corrective actions to be undertaken.

ESH 237 Emergency and Disaster Preparedness
The module examines the potentially hazardous situations that may occur in the organisation. These relate to natural disasters, industrial accidents, chemical spills, radiation exposure and public health emergencies such as pandemics. Disaster preparedness procedures are also explored.

ESH 238 Waste Management
The module explores the approaches used in the management of hazardous and non-hazardous solid and liquid waste and measures for improving the efficiency of waste management strategies. It also covers the framework for waste management, sound practices, comparative solid waste management and waste management and GIS.

ESH330 Work-Related- Learning Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

ESH331 Work- Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

ESH332 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

ESH333 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

ESH 431 Customer Satisfaction and Complaints Handling
The module explores the customer focus principle as the hub of quality. Focus areas include methods of obtaining customer requirements and planning to meet them. The second part deals with methods of monitoring customer satisfaction during and post-product or service delivery. It equips the student with complaints-handling skills and corrective actions to prevent recurrence including feedback to the customer. The application of ISO 1002 in handling complaints is also examined.

ESH 432 Climate Change and Occupational Hazards
The module focuses on the impact of industrial pollution on climate change. It quantifies industrial pollution and examines the effectiveness of current legislation in ameliorating the impact.The module examines how climate change may increase the occurrence and severity of some existing occupational hazards and how this could lead to new unanticipated risks.

ESH 433 Ergonomics
The relationship between people's work and the physical environment is explored. The focus is on the scientific aspects of ergonomics such as anthropometry and biometrics; technological design; workspace design; environmental design and work situation design.

ESH 434 Confined Workplace Environmental Safety and Health
Confined workspace hazards; confined workspace safety precautions; key elements of safe confined spaces; how to reduce risks associated with confined spaces and management. The module establishes safety requirements for all work conducted within confined spaces.

ESH 435 Behaviour-Based Safety
The modulefocuses on the identification and prevention of environmental and safety hazards emanating from human behaviour; the ABC model of behaviour change; the hierarchy of safety controls; barriers to behaviour-based safety management and benefits of behaviour-based safety management.

ESH 436 Research Project
Students are to prepare and present a dissertation based on the concepts learnt theoretically and in the field. The guidelines for the dissertation are based on the basic skills of research and report writing which include the development of a research

problem, formulation of research objectives, research methodology, data analysis, results and discussion, conclusion and recommendations.

ESH 437 Geographic Information Systems and Remote Sensing II
The module explores the applied dimensions of Geographic Information Systems and Remote Sensing, GIS application development cycle, application in environmental management, natural resources management, utility management, hazard management, land use planning, business and commerce.

ESH 438 Food Safety and Quality Management
The module examines the conditions and measures to ensure the safety and quality of food from production to consumption. The focus is on food safety management systems, food handling, labelling and packaging, specifications as well as hazard analysis critical control points study.

ESH 439 Environmental Pollution and Control
The module aims to broaden and deepen the students' understanding of environmental pollution measurement, monitoring and mitigation. It analyses pollution impacts on the environment (water, air, soil), abatement practices and strategies, the legislative framework and the application of appropriate tools and technologies in pollution control and management.

ESH 440 Fire Safety
The module focuses on common fire hazards; fire safety rules and the prevention of fire-related injuries in workplaces. The focus is on how to develop a fire safety management plan that outlines arrangements for implementing, controlling, monitoring and reviewing fire safety standards as well as ensuring statistics are well maintained.

ESH 441 Radiation Management
The module focuses on safe precautionary measures put in place to promote safety in radiation-prone environments. This includes the development of a radiation plan to provide information and establish general procedures on the proper use and handling of radioactive materials.

ESH 442 Electric Safety
The module examines the electric hazards emanating from the work environment and the organisational measures and technical means to prevent harmful and dangerous effects on workers. The focus is on the development of an effective electric management system that reduces the risk of harm from electricity by ensuring all the key elements that provide safety assurance are identified and addressed.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN SAFETY HEALTH AND ENVIRONMENTAL MANAGEMENT(DGES)

Duration:	18 months
Actual Credit Load:	288
Minimum Credit Load:	270
Maximum Credit Load:	340
Maximum MBK Credit Load:	216
ZNQF Level:	9

1. PURPOSE OF THE PROGRAMME
The programme is tailor-made to meet the safety, health and environmental needs of Zimbabwe and the world at large. It intends to equip students with both theoretical and practical skills that are relevant to safety, health and the environment in various industries, institutions and organizations. This will be achieved through:

- Imparting knowledge that links safety, health and environmental theories and practice.
- Development of knowledge and skills to manage existing and new projects through the participation of target stakeholders and institutions.
- Development of skills that enable students to realise and apply new technologies to the changing demands coming from the rapidly expanding productive and consumption sectors of the globalised world economies.
- The formulation and conducting of research that promotes safe, environmentally friendly and people-centred development at community, institutional, national, regional and international levels.
- The provision of opportunities to study aspects of safety, health and environmental management in various sectors of employment.

ENTRY REQUIREMENTS

Normal Entry: 5 'O' Level passes English Language and Mathematics at grade C or better and a good first degree in any discipline, preferably with at least a 2.2 classification. Preference will be given to applicants with work experience.

PROGRAMME CHARACTERISTICS

Areas of Study: Occupational Safety, Health, Environmental Management, Geo-information Sciences.

Specialist Focus: Occupational Safety, Health and Environmental Risk and Hazard Identification, Assessment and Management.

Orientation: Occupational and other risk and hazard prevention, mitigation and management. Policy and legislation formulation, implementation and enforcement. Teaching and learning are professionally oriented and focused on practical aspects.

Distinctive Features: The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in environmental management; research institutions; positions in academia; safety, health and environmental consultancy; application of geo-information science; occupational safety and health; environmental planning.

Further Studies: Master and Doctoral studies in Occupational Safety, Health and Environmental Management.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, laboratory activities, seminars, group work, field-based activities, industrial visits, research projects and individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, laboratory reports, field reports and seminar presentations.

LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Demonstrate knowledge and understanding of safety, health and environmental management
- Formulate workplace policies, plans and programmes to address safety and health challenges
- Investigate safety, health and environmental risks and hazards and proffer possible solutions to achieve the ILO decent work concept
- Understand safety, health and environmental interlinkages and the need for an integrated approach to address them.
- Analyse environmental systems and technological applications in natural resources management for sustainable development
- Use appropriate research methods to create new insights into safety, health and environmental phenomena and technology applications.

GENERAL PROVISIONS

The Postgraduate Diploma in Safety, Health and Environmental Management Degree is an 18-month programme.

PROGRAMME ASSESSMENT

Coursework:	40%: Test (15%), Practicals (20%), Assignments (5%)
Written Examinations:	60%
Other:	Research Project is assessed based on a research project (75%) and Oral presentation (25%).

PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Postgraduate Degrees.

GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

PROGRAMME STRUCTURE

Level 1 Semester 1

DGES 531 Introduction to Environmental Safety and Health	18
DGES 532 Environmental Safety and Health Legislation	18
DGES 533 Occupational Health and Safety	18
DGES 534 Population, Health and the Environment	18
DGES 535 Geographic Information Systems and Remote Sensing	18
DGES 536 Research Methods for Safety, Health and Environmental Management	18

Level 1 Semester 2

DGES 537 Environmental Management in Industry	18
DGES 538 Water Supply and Sanitation	18
DGES 539 Environmental Impact Assessment	18
DGES 540 Waste Management	18
DGES 541 Environmental Economics	18

Level 2 Semester 1

DGES 542 Environmental Politics	18
DGES 543 Climate Change, Agriculture and the Environment	18
DGES 631 Research Project	54

MODULE SYNOPSES

DDGES 531 Environmental Safety and Health

The module provides basic instruction on the principles of environmental safety and health. Students will be introduced to key concepts of environment, safety and health such as Environmental Management Systems, Hazard Analysis and Critical Control Points (HACCP), Quality Management Systems and Energy Management.

DGES 532 Environmental Safety and Health Legislation

The module outlines the legislation governing environmental health and safety at local, national and international levels in various sectors of the economy.

DGES 533 Occupational Health and Safety

The module provides an outline on accident prevention, loss causation and incident evaluating risk, risk control, emergency planning and accident reporting and recording. It will also examine procedures in safety inspection, criminal and civil law and measuring health and safety performance at the workplace and work equipment. It will also provide an overview of occupational health and safety in Zimbabwe.

DGES 534 Population, Health and the Environment

The module examines the relationship between the environment and human and animal disease patterns. Environmental determinants of health problems and experiences including physical, biological, chemical and human-related aspects will be explored in urban and rural settlements. Key issues and concerns in the population environment nexus will be addressed.

DGES 535 Geographical Information Systems and Remote Sensing

The module explores spatial analysis of data which can be used in different environmental safety and health situations. Concepts of geographic primitives, geographical data management, geographical data analysis, satellite images and image processing are examined.

DGES 536 Research Methods for Safety, Health and Environmental Management

The module equips students with the skills needed to identify suitable research topics, establish plausible theoretical answers and carry out high-quality research using a variety of methodological and research techniques. Topics will cover issues such as research problem formulation, research design, sampling, research ethics, measurement techniques and analysis of quantitative and qualitative data, presentation of results and dissemination.

DGES 537 Environmental Management in Industry

The module covers issues on environmental management standards in the industry, initial environmental review, environmental policies, environmental planning, procedures and responsibilities, training, internal and external communication, environmental auditing and management review and cleaner production practices.

DGES 538 Water Supply and Sanitation

The module covers issues on sustainable supply of affordable water, participatory water planning processes and local credit arrangements for basic service of affordable water, safe management of human excreta, including “hardware” (latrines,

sewers etc) and the "software" (regulation, hygiene promotion). Environmental sanitation deals with the control of all factors in the physical environment that may have deleterious impacts on human health.

DGES 539 Environmental Impact Assessment
The module outlines the historic development of the concept, objectives, terminology and methods used and policies for the implementation of environmental impact assessment (EIA). The module also critically reviews the steps and procedures of EIA in Zimbabwe, review and implementation methods for impact identification, analysis and assessment as well as multi-criteria evaluation and other decision support tools.

DGES 540 Waste Management
The module explores the approaches used in the management of hazardous and non-hazardous solid and liquid waste and measures for improving the efficiency of waste management strategies. It also covers the framework for waste management, sound practices, comparative solid waste management and waste management and GIS.

DGES 541 Environmental Economics
The module examines the general micro and macro-economic and environmental economic principles and their practical applications. It also covers issues which range from welfare economics, environmental policy instruments viz-a-vis market, valuation of environmental resources, techniques for the economic appraisal of environmental projects, environmental input-output modelling and environmental accounting at the firm level.

DGES 542 Environmental Politics
The module explains the main themes of environmental politics and policy at local, national, regional and global levels. Substantive problems and political processes of environmental policymaking, contemporary radical environmental thought and movements will be discussed.

DGES 543 Climate Change, Agriculture and the Environment
The module addresses issues such as the causes of climate change and, impact of climate change on agriculture and the environment. Concepts of agroecology and sustainable agriculture and development will be looked at together with important ongoing processes and their impact on the environment, methods to assess processes and their effects and policy and technical measures to control processes and their effects.

DGES 631 Research Project
Students to present a research project based on concepts learnt theoretically and in the field. The guidelines for the project will be based on the basic skills of research and report writing, including the development of a research problem, formulation of research objectives, research methodology, data analysis, conclusions and recommendations.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN SAFETY HEALTH AND ENVIRONMENT (MSHE)

Duration:	18 months
Actual Credit Load:	270
Minimum Credit Load:	270
Maximum Credit Load:	330
Minimum MBKs Credits:	234
ZNQF Level;	9

PURPOSE OF THE PROGRAMME

The programme aims to enhance knowledge, skills and competencies in the broad areas of safety, health and environmental management relevant to various employment capabilities and careers in the world of work. These will be achieved through:

- Provision of comprehensive and systematic knowledge in safety, health and environmental management.
- Instilling awareness in students of the need for management of change to anticipate and adopt a policy in light of new technology.
- Enhancing the students' ability to identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories and methodologies of safety, health and environmental management.
- Developing an understanding of advanced safety, health and environmental management practice and to reflect their professional practice.
- Developing powers of critical appraisal and analytical thinking to develop appropriate strategies to meet developmental efforts, especially to Zimbabwe, the SADC and the world at large.

ENTRY REQUIREMENTS

Normal Entry: Bachelor of Science Honours in Safety, Health and Environmental Science or Geography and Environmental Studies/Science with 2.2 pass or better.

PROGRAMME CHARACTERISTICS

Areas of Study: Hazard Management; Occupational Safety and Health Management; Occupational Hygiene; Environmental Management; Safety, Health and Environmental Policy and Legislation.

Specialist Focus: Safety, health and environmental management studies in different sectors of the economy.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on practical aspects.

Distinctive Features: The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in occupational safety and health; environmental management; research institutions; positions in academia; safety, health and environmental consultancy; disaster management.

Further Studies: Doctoral studies in Safety, Health and Environmental Management.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, laboratory activities, seminars, group work, field-based activities, research projects, and individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports and seminar presentations.

LEARNING OUTCOMES

1. Have broad knowledge, skills and competencies in the areas of safety, health and environmental management relevant to various employment capabilities and careers in the world of work.
2. Have the versatility required for change management to anticipate and adopt relevant policies in light of new technology.
3. Ability to identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories and methodologies of safety, health and environmental management.
4. Demonstrate an understanding of advanced safety, health and environmental management practice and reflect on their professional practice.
5. Critical appraisal and analytical thinking to develop appropriate strategies to meet developmental efforts, especially to Zimbabwe, the SADC and the world at large
6. Apply ethical knowledge and skills when carrying out practical safety, health and environmental activities.

GENERAL PROVISIONS

The Master of Science in Safety, Health and Environmental Management Degree is an 18 months programme.

PROGRAMME ASSESSMENT

Coursework:	Theoretical Modules	40%
	Practical Modules	50%
Written Examinations:	Theoretical Modules	60%
	Practical Modules	50%
Other:	Research Project is assessed based on a research project (75%) and Oral presentation (25%).	

PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Postgraduate Degrees.

GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

PROGRAMME STRUCTURE

Level 1 Semester 1	**Credits**
MSHE 731 Risk Assessment and Management	18
MSHE 732 Safety, Health and Environmental Law and Regulations	18
MSHE 733 Techniques for Safety, Health and Environmental Management	18
MSHE 734 Food Safety Management	18

Core modules	
MSHE 736 Occupational Hygiene and Safety	18
MSHE 737Environmental Epidemiology	18
MSHE 738 Climate Change, Safety and Health Impacts Management	18
Electives (*It is mandatory to choose two modules from those listed below*)	
MSHE 739 Sustainable Waste Management	18
MSHE 740 Environmental Planning and Implementation	18
MSHE 741 Agro-Ecological Resources Management	18
MSHE 742 Indigenous Knowledge Systems and the Environment	18
Level 2 Semester 1	
MSHE 831 Research Project	90

SYNOPSES

MSHE 731 Risk Assessment and Management

The module provides an overview of the basic concepts of risk assessment. Topics include the four core parts of a risk assessment, namely, hazard assessment, close-response assessment, exposure assessment, and risk characterization. Methods of measurement and modelling are discussed, along with key questions concerning uncertainty.

MSHE 732 Safety, Health and Environmental Law and Regulations

The module covers the principles and rules of international law and regulations which have as their primary objective the protection of the environment as well as addressing safety and health issues. The general themes and principles of international environmental law, international investment law, the international law of treaties, law development and the international community and marine law among other laws and regulations are covered.

MSHE 733 Techniques for Safety, Health and Environmental Management

The module highlights and discusses tools, techniques and approaches that are now seen as central to delivering safety, health and environmental management and sustainability. These tools include geographical information systems, remote sensing, substance flow analysis, material flow analysis, carbon footprinting, health impact assessment, social impact assessment, ecological footprinting, life cycle assessment and corporate social responsibility.

MSHE 734 Food Safety Management

The module aims to equip students with knowledge of food safety management at various levels. This involves the characteristics of the food industry, food safety hazards, good manufacturing practices, standards in food safety management, conducting audits within food industry as well as conducting a hazard analysis critical control points study. The module also examines policies and legislation governing food safety management at various scales.

MSHE 735 Research Methods and Statistics

The module examines the research methods appropriate for both qualitative and quantitative methods including the philosophical underpinnings of research methodology, proposal design, searching and literature review, ethical issues in research, research instruments design, experimental and quasi-experimental designs, qualitative analysis and statistical analysis of data.

MSHE 736 Occupational Hygiene and Safety

The module introduces students to principles of occupational hygiene such as the fundamentals of toxicology, industrial diseases, and hygiene standards. Toxicological principles relevant to developing an understanding of workplace health hazards will also be reviewed. The module further encourages critical evaluation of concepts in occupational hygiene and exploration of practical approaches to minimizing ill health in the workplace.

MSHE 737 Environmental Epidemiology

Human activities play an important part in virtually all natural systems and are forces of change in the environment at local, regional, and even global scales. Environmental factors play a significant role in the health of communities. The module explores causal and non-casual relationships between environmental health issues through an examination of the nature of the relationships between population, health and environmental management.

MSHE 738 Climate Change, Safety and Health Impacts Management

The module provides a multi-disciplinary understanding of climate change processes and their direct and indirect interactions with human safety and health. It further enables students to develop strategies to manage climate change-related safety and health issues in different contexts, including organizations.

MSHE 739 Sustainable Waste Management

The module looks at how all forms of waste are managed. It presents the concept of Integrated Sustainable Waste Management in the context of assessing the sustainability of waste management alliances. It considers stakeholder participation in waste management issues and seeks to encourage the analysis of interactions between and among urban systems as well as promoting integration of different habitat scales e.g. city/town or household.

MSHE 740 Environmental Planning and Implementation

The module examines the tools and instruments used in environmental planning and assesses their information requirements. Environmental planning approaches are outlined with reference to policies, programmes and projects. It also involves the use of geo-information in environmental planning and implementation, the participatory aspects of stakeholder analysis as well as the information needs for environmental planning and implementation.

MSHE 741 Agro-Ecological Resources Management

The module takes a holistic study of agro-ecosystems, including all environmental and human elements. It focuses on the form, dynamics and functions of their inter-relationships and the processes in which they are involved. Any area used for agricultural production is viewed as a complex system in which ecological processes found under natural conditions also occur. This module also examines the principles of agro-ecological systems.

MSHE 742 Indigenous Knowledge Systems and the Environment
The module aims to promote, develop and protect through research and by making indigenous knowledge systems (IKS) a value development model in natural resource utilisation and management, safety and health.

MSHE 831 Research Project
The module helps students to plan, design and carry out their dissertation, provides guidelines on how to choose a suitable topic, undertake literature review, apply appropriate research methods, collect and analyse data and manage the write up process. It also provides individual feedback to students on their proposals which they can incorporate in their final dissertation.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN ENVIRONMENTAL SUSTAINABILITY (MES)

Duration:	18 months
Actual Credit Load:	270
Minimum Credit Load:	270
Maximum Credit Load:	330
Minimum MBKs Credits:	234
ZNQF Level;	9

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme aims to enhance knowledge, skills and competencies in the broad area of environmental sustainability relevant to various employment capabilities and careers in the world of work. These will be achieved through:

1.1.1 Provision of comprehensive and systematic theoretical and practical knowledge in environmental sustainability.

1.1.2 Instilling awareness in students of the need for management of change to anticipate and adopt policy in light of new technology.

1.1.3 Enhancing the students' ability to identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories, practices and methodologies of environmental sustainability.

1.1.4 Developing an understanding of advanced environmental sustainability practices and to reflect their professional practice.

1.1.5 Developing powers of critical appraisal and analytical thinking to develop appropriate strategies to meet developmental efforts, especially with respect to Zimbabwe, the SADC and the world at large.

1.1.6 Provide knowledge and skills that help to create a sustainable world that provides a safe, secure and healthy life for all people.

2.0 ENTRY REQUIREMENTS

2.1 **Normal Entry**: Bachelor of Science Honours in Geography and Environmental Studies/Science or Environmental Science or Natural and Agricultural Sciences, with a 2.2 pass or better.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Environmental Management and Quality; Hazard Management; Environmental Policy and Legislation; Rural and Urban Sustainability Planning; Geospatial and Digital Methods.

3.2 **Specialist Focus:** Sustainable development, livelihoods, transforming environmental science and policy into actionable solutions that promote sustainability practices, natural resources use and conservation, and green development activities in different sectors of the economy.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers in environmental management; NGOs, project management, research institutions; natural resources conservation, sustainable development, positions in academia; environmental consultancy; businesses, disaster management; and start-ups.

4.2 **Further Studies:** Doctoral studies in Environmental Science/Sustainability or Ecological Resources Management, Development Studies and in any related field.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures, laboratory activities, seminars, group work, field-based activities, research projects, individual independent study, guest seminars and talks from practitioners where possible.

5.2 **Assessment Methods:** Written and oral examinations, tests, written and practical assignments, field reports and seminar presentations.

6.0 LEARNING OUTCOMES

6.1 By the end of the programme a graduate should be able to:

6.1.1 Have broad knowledge, skills and competencies in the areas of environmental sustainability relevant to various employment capabilities and careers in the world of work.

6.1.2 Have the versatility required for change management to anticipate and adopt relevant policies in light of new technology.

6.1.3 Ability to identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories and methodologies of environmental sustainability.

6.1.4 Demonstrate an understanding of advanced environmental sustainability practices and reflect on their professional practice.

6.1.5 Critical appraisal and analytical thinking to develop appropriate strategies to meet developmental efforts, especially with respect to Zimbabwe, the SADC and the world at large

6.1.6 Apply ethical knowledge and skills when carrying out practical environmental sustainability activities.

6.1.7 Ability to develop policies and actionable solutions that promote sustainability practices in the public, private and non-profit sectors.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Environmental Sustainability Degree is an 18-month programme.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment:

8.1.1 Theoretical Modules 40%

8.1.2 Practical Modules 50%

8.2 Written Examinations:

8.2.1 Theoretical Modules 60%

8.2.2 Practical Modules 50%

8.3 Other: The Research Project is assessed based on a research project (75%) and Oral presentation (25%).

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Postgraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

MES 831 Dissertation	90

14.0MODULE SYNOPSES

MES 731 Principles of Environmental Sustainability

The module explores the principles that form the core of sustainable development, and to investigate the extent of the threats of the environmental issues currently faced by society. It also examines the underlying driving forces for environmental change, in terms of population growth, technological change, market economics and consumption patterns. Case studies to be used illustrate how the principles of environmental sustainability have been put into practice.

MES 732 Environmental Quality and Toxicology

The module inculcates knowledge and skills in environmental protection including air, water, and waste management and toxicology. It develops management and critical thinking skills necessary to remediate environmental threats, e.g., posed by energy production and consumption, hazardous waste and climate change before they can make a negative environmental impact.

MES 733 Project Management for Environmental Sustainability

The module focuses on the concept of sustainable project management and its importance in real-life project management. It evaluates the social, economic, legislative and environmental drivers and benefits for the integration of sustainability in project management throughout a project lifecycle.

MES 734 Applications of Geographic Information Systems and Remote Sensing

The module provides knowledge and skills on the theory and practice of GIS and remote sensing in enhancing environmental sustainability. Particular attention is paid to data collection, analysis, management and interpretation of spatial and temporal data using Geographic Information Systems to help solve a wide range of "real world" environmental sustainability and associated social problems. Practicals are expected to cover map manipulations, vector and raster data, and the classification and processing of spectral reflectance data acquired using both passive and active remote sensing.

MES 735 Research Methods and Statistics

The module examines the research methods appropriate for both qualitative and quantitative methods including the philosophical underpinnings of research methodology, proposal design, searching and literature review, ethical issues in research, research instruments design, experimental and quasi-experimental designs, qualitative analysis and statistical analysis of data.

MES 736 Environmental Valuation

The module focuses on the economic valuation of environmental resources and policies. It covers both key elements of economic theory that are needed to understand the methodologies covered and an introduction to the analysis of data. The methods covered include travel cost, contigent valuation, ecosystem services, cost-benefits analysis etc. and non-monetary valuation that are of direct relevance to policy formulation and application to enhance environmental sustainability.

MES 737 Governance and Policy for Environmental Sustainability

Focuses on how state and non-state actors interact and put into practice governance and policy actions for addressing environmental sustainability challenges such as biodiversity loss, climate change, energy, water and food provision and access across multiple levels from community self-governance of natural resources to business-led endeavours such as certification schemes. Tools for analysing environmental governance and policy such as institutional analysis, discourse analysis and power analysis are examined.

MES 738 Environmental Change and Corporate Strategy

This module analyses the current practices and opportunities for business and will evaluate whether current activities are effective and sustainable. Underneath the surface, what are businesses doing, and what is the potential for reducing and mitigating environmental impact and perhaps even becoming environmentally positive in impact? All scales of business are explored, from sole traders to multinationals. Compliance and market advantage will be considered. Environmental change is viewed as a trigger of market transition, where controls on greenhouse gas emissions affect virtually all sectors of the economy to varying degrees.

MES 739 Environmental and Social Impact Assessment
The module provides a working knowledge of current environmental, social and economic impacts and methods relating to Environmental Impact Assessment (EIA) and considers in detail how these impacts can be quantified and analysed. It further provides an overview of the legislative framework of EIA and explains the EIA process, providing examples of techniques used in impact assessment relating to soils, ecology, landscape and socio-economic aspects, as well as monitoring, auditing and reporting.

MES 740 Environmental Justice and Social Change
The module examines how and why inequalities arise and are maintained in society including mechanisms that give rise to class, gender, racial, and other types of disparities. It further investigates the causes and consequences of inequitable distributions of environmental benefits and the emergence of environmental justice movements. Environmental conflict resolution and advocacy campaigns are studied.

MES 741 Sustainable Cities
This module focuses on current discussions of sustainable cities highlighting the challenges and opportunities of rapid urbanization taking place all across the world. It explores the understanding of the complex systems of people, resources and environment within urban areas, focusing on several themes on water, housing, energy, infrastructure, food, waste, transport, economic, municipal and social planning systems. Learning and critically evaluating contemporary debates about sustainable urban spaces, with a specific focus on the human and physical processes shaping urban ecologies and environments in order to have 'smart cities.'

MES 742 Rural Planning and Management
This module explores the practice of planning and development in rural areas and examines some of the major issues and concerns that have a bearing on planning and environmental management processes, such as community land and natural resources ownership, poverty, energy challenges etc. It critiques and discusses the potential future rural management practices that may be required in response to climate change, energy shortages, food security demands etc.

MES 743 Sustainability of Food Systems
Explores and highlights potential solutions to the challenges that are being faced with regard to food production such as water and soil resource management and the need to mitigate greenhouse gas emissions from agriculture. It examines the conflicts and trade-offs among the objectives that are required of food systems and conflicts associated with attempts to maximize food production and environmental health. The water-food-energy nexus, biotechnology, sustainable intensification and climate change impacts, mitigation, and adaptation are examined.

MES 744 Energy and Sustainability
This module provides an insight into critical awareness of environmental, technical, economic and political factors influencing policies and mechanisms for the sustainable management of energy and environmental resources. The focus is to develop and enhance the ability to formulate strategies for reconciling conflicts between development and environmental protection in the context of energy and resources management. Topics from air pollution to energy and wider resource problems are explored.

MES 745 Sustainable Waste Management
This module integrates waste principles, concepts, and technologies and demonstrates how they can be implemented in practice enabling students to be able to evaluate the economics of waste reduction, recycling and recovery. Legislative and socio-economic drivers of sustainable waste management are also highlighted.

MES 746 Sustainable Water Resources Management
The module emphasises the science behind water quality and availability necessary for the development of solutions for sustainable water management. It further focuses on ecosystem aspects of water, such as sustainable management of watersheds and wetlands, as well as developing skills in water quality and water resource management, Integrated Water Resources Management, socio-economic aspects of water management, water governance, applications of pollution prevention, and storm and wastewater management.

MES 831 Dissertation

The module is meant to enable learners to plan, design and carry out their dissertation. It provides guidelines on how to choose a suitable topic, undertake a literature review, apply appropriate research methods, collect and analyse data and manage the write-up process. It also provides individual feedback to students on their proposals which they can incorporate in their final dissertation.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN GEOGRAPHY(MGEO)

Duration:	18 months
Actual Credit Load:	288
Minimum Credit Load:	270
Maximum Credit Load:	330
Minimum MBKs Credits:	234
ZNQF Level;	9

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme aims to enhance knowledge, skills and competencies in the broad areas of Physical, Human and Economic Geography and associated practical activities relevant to various employment capabilities and careers in the world of work. These will be achieved through:

1.1.1 Provision of comprehensive and systematic knowledge in physical geography, human and economic geography and their related tools of environmental and spatial analysis.

1.1.2 Instilling awareness in students of the need for management of geographical change to anticipate and adopt policy in light of related new technology.

1.1.3 Enhancing the students' ability to identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories and methodologies of Physical, Human and Economic Geography and related sciences.

1.1.4 Developing an understanding of advanced Physical, Human and Economic Geography in students and to reflect their professional competence.

1.1.5 Developing powers of critical appraisal and analytical thinking to develop appropriate strategies to meet developmental efforts, especially for Zimbabwe, the SADC and the world at large.

2.0 ENTRY REQUIREMENTS

2.1 **Normal Entry**: Bachelor of Science Honours in Geography or Geography and Environmental Studies/Science with 2.2 pass or better.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Physical Geography, Human and Economic Geography, Advanced Field Techniques in Physical, Human and Economic Geography, Geographic Information Science and Remote Sensing.

3.2 **Specialist Focus:** Its 2-tier: (a) **Physical Geography**: Geomorphic Systems and Land Degradation, Applied Climatology, Surface and Groundwater Water Modelling, Spatial Ecology, Climate Change and Development, Water Quality Assessment and Monitoring. (b) **Human and Economic Geography**: Population and Development, Settlement Geography, Agricultural Geography and Sustainable Development, Industrial Geography, Regional Development and Planning, Tourism and Development, Health Geography.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers in Environmental Management, Hydrological Scientists, Climatological Experts, Ecologists, Water Resources Managers, Development Project Managers, Sustainable Development Experts, Tourism Managers, Researchers at Research Institutions, Academia, Geographical Research Scientists, Environmental Consultancy; Disaster Risk Reduction Managers.

4.2 **Further Studies:** Doctoral studies in Geography and Environmental Science.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures, laboratory activities, seminars, group work, field-based activities, research projects, and individual independent study.

5.2 **Assessment Methods:** Written and oral examinations, tests, written and practical assignments, field reports and seminar presentations.

6.0 LEARNING OUTCOMES

6.1 By the end of the programme a graduate should be able to:

6.1.1 Demonstrate knowledge and understanding of geographical management principles.

6.1.2 Use principles of geography to address real-world or complex issues and problems for sustainable environmental and socio-economic development.

6.1.3 Analyse environmental systems and technological applications in geography for sustainable development.

6.1.4 Identify Geographical problems and develop appropriate solutions.

6.1.5 Use appropriate research methods to create new insights into Geographical phenomena and technology applications.

6.1.6 Create new business ventures through Geographic and Environmental consultancy.

6.1.7 Communicate effectively and present information using multimedia discernible to both experts and non-experts in Geography.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Geography Degree is an 18-month programme.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment:

8.1.1 Theoretical Modules 40%

8.1.2 Practical Modules 50%

8.2 Written Examinations:

8.2.1 Theoretical Modules 60%

8.2.2 Practical Modules 50%

8.3 Other:The Research Project is assessed based on a research project (75%) and Oral presentation (25%).

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Postgraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

LEVEL 1 SEMESTER 1	**CREDITS**
MGEO 701: Recent Trends in Geography	18
MGEO 702: Applied Geographical Information Systems	18
MGEO 703: Advanced Remote Sensing	18
MGEO 704: Research Methods and Statistics in Geography	18
MGEO 705: Programming in Geography	18

Electives (Choose either MGES 706 or MGES 707 and MGEO 708 is optional)

MGEO 706: Advanced Techniques in Physical Geography	18
MGEO 707: Advanced Techniques in Human Geography	18
MGEO 708: Project Planning and Development in Geography	18

❖ *At level 1.2, the students will branch into 2 pathways of geographical specialisation, that is, either Physical Geography or Human Geography.*

LEVEL 1 SEMESTER 2: PHYSICAL GEOGRAPHY

MGEO 709: Geomorphic Systems and Land Degradation	18
MGEO 710: Applied Meteorology and Climatology	18
MGEO 711: Surface and Groundwater Water Modelling	18

MGEO 712: Spatial Ecology	18

Electives (Choose at least one elective)

MGEO 713: Water Quality Assessment and Monitoring	18
MGEO 714: Climate Change and Development	18

LEVEL 1 SEMESTER 2: HUMAN GEOGRAPHY

MGEO 715: Population and Development	18
MGEO 716: Settlement Geography	18
MGEO 717: Agriculture and Sustainable Development	18
MGEO 718: Industrial Geography	18

Electives (Choose at least one elective)

MGEO 719: Social and Cultural Geography	18
MGEO 720: Regional Development and Planning	18
MGEO 721: Dynamics of Urban Geography	18
MGEO 722: Dynamics of Rural Geography	18
MGEO 723: Global Health Geographies	18
MGEO 724: Disaster Risk Management	18
MGEO 725: Geography of Gender	18

LEVEL 2 SEMESTER 1

MGEO 801: Research Project	90

14.0 MODULE SYNOPSES

MGEO 701 Recent Trends in Geography

The module examines the fundamental approaches to Geography; Geographic methodology and explanation. Holistic and reductionist approaches to geographic study are examined together with the idiographic and nomothetic approaches to the discipline. Paradigms in Geography such as the strategic shift from Structuralism to Post-Structuralism; Positivism and Anti-Positivism; Behavioural Geography; Geography of Gender; and Social and Environmental Justice will be discussed.

MGEO 702 Applied Geographical Information Systems

Geographic Information Systems (GIS) is a computer-based tool that uses spatial (geographic) data to analyze and solve real-world problems. This module is designed to equip learners with the skills in the application of GIS techniques in both physical and human geography. The module covers selected, advanced GIS analysis methods applicable to geography. Learners will also be exposed to the modelling of geographical phenomena using collected geographic data.

MGEO 703 Advanced Remote Sensing

Learners will be equipped with advanced remote sensing techniques that can be applied in physical and human geography. It highlights remote sensing as an important tool for solving geographical problems. The module examines the theory and methodology of applied optical remote sensing technologies. Learners are also equipped with modelling skills. Applications of thermal and active microwave remote sensing and image interpretation will be discussed.

MGEO 704 Research Methods and Statistics in Geography

Research methods appropriate for both qualitative and quantitative methods including the philosophical underpinnings of research methodology, proposal design, searching and literature review, data collection methods, ethical issues in research and qualitative analysis will be examined. Descriptive and inferential statistics as well as their application in the discipline of geography will be discussed. Students will be exposed to statistical software such as SPSS and R.

MGEO 705 Programming in Geography

Learners are equipped with basic programming skills which are relevant in Geography. Basic programming concepts such as variables, conditionals (if statements), loops and functions will be covered in the module. Object-oriented programming and concepts such as data types, data structures will be covered in the module. Programming languages such as Python and Matlab are introduced and applied in relevant areas.

MGEO 706 Advanced Techniques in Physical Geography

The purpose of this module is to expand and deepen the learners' knowledge of field-based quantitative and qualitative research methods in physical geography. The learners are exposed to the various methods used for conducting research projects in physical geography, and to enable them to have hands-on experience with field and/or laboratory-based research. As part of the module, the students will collect various data sets in the field and subsequently analyse the samples in the laboratory.

MGEO 707 Advanced Techniques in Human Geography
The purpose of this module is to expand and deepen the learners' knowledge of quantitative and qualitative research methods in human geography. The module equips the students with advanced field methods in human geography. Emphasis will be given to the practical use of quantitative and qualitative techniques in human geography.

MGEO 708 Project Planning and Development in Geography
Learners will be equipped with advanced knowledge and skills in the planning of development projects and programmes that are likely to be used in the development context. It is meant to deepen critical understanding of the strategies, processes, techniques and issues involved in turning development ideas into practical realities and identifiable outcomes and benefits. It also covers the entire project cycle from project identification, appraisal, implementation, management and evaluation.

MGEO 709 Geomorphic Systems and Land Degradation
Learners will be trained in applied geomorphological skills directly relevant to work in the earth sciences domain. Particular attention is devoted to investigating the reaction of geomorphologic systems to environmental and global changes by analysing paleo-climatic and paleo-environmental events. The module further exposes students to different forms and patterns of land degradation and the strategies used to manage soil erosion caused by different land uses.

MGEO 710 Applied Meteorology and Climatology
The module focuses on theoretical meteorology and the application of weather and climate information on society and the environment. The module aims to equip students with knowledge and skills in the analysis of meteorology and climatic data for operational purposes. This will be achieved by studying the climate system, world climates and the sensitivity of environments to climate change to reduce climate-sensitive risks. This serves as a useful toolkit to solve societal and environmental challenges of an atmospheric origin.

MGEO 711 Surface and Groundwater Water Modelling
Learners should have an understanding of the processes and mathematical tools for surface water and groundwater modelling. The learners should be able to apply different types of models in hydrology, use hydrological models for water resources assessment, flood monitoring and forecasting; assess the impact of climate change and land use change on hydrology, as well as evaluate hydrological models to their applications on gauged and ungauged basins.

MGEO 712 Spatial Ecology
This module prepares learners to work with the management of ecosystems, ecological communities and populations, based on a thorough knowledge of ecological concepts and theories. The module has a strong focus on the practical application of ecological knowledge in society for development. Other topics to be covered include population ecology, community ecology and ecology systems theories, including their relationship to current environmental problems.

MGEO 713 Water Quality Assessment and Monitoring
Learners should understand water quality indicators, methods or tools for assessing water quality from different sources, for example, static and flowing (rivers, lakes, reservoirs and groundwater). The learners should also be able to characterise water bodies; describe and explain anthropogenic impacts on water quality; pollutant sources and pathways; strategies for water quality assessment and selection of water quality variables.

MGEO 714 Climate Change and Development
The module provides a multi-disciplinary understanding of climate change processes and their direct and indirect interactions with development. It describes the main climate change processes, scenarios and vulnerabilities and international and national policy responses. Different sectors' contributions and sensitivities to climate change and mitigation and adaptation responses are identified and their implications for policies and outcomes for different economies and peoples' livelihoods are examined.

MGEO 715 Population and Development
This module examines population issues, concepts, theories and methods by encompassing the entire field of demography, including principles and practice. It also examines the relations between population and development and their potential consequences from a geographical perspective. Other topics include global variation in population size and growth, various demographic perspectives and their modern implications, environmental impacts and population policy.

MGEO 716 Settlement Geography
Learners acquire a fundamental and systematic knowledge of human settlement systems with all their relevant characteristics (natural-geographic, socio-geographical and regional). The module encompasses relevant geographic characteristics of the rural and urban settings, the geographical basis of deployment positioning of settlements as well as associated contemporary socio-economic processes in the world. It also critically examines the sustainability of contemporary and future settlements.

MGEO 717 Agriculture and Sustainable Development
The main goals of sustainable agriculture and a range of sustainable farming practices and case studies will be examined. As such, the module develops an understanding of how sustainable farming can both enhance food production and ensure that natural resources are managed in the best way possible for long-term sustainability.

MGEO 718 Industrial Geography
The spatial distribution of industry and its impacts on the natural and human environment will be discussed. The module also trains learners to use the knowledge in the field of industrial geography, and perceive all the aspects and consequences of the distribution of certain industries. Learners are expected to acquire knowledge on the development of industrial sectors which are not in conflict with the efforts for environmental protection.

MGEO 719 Social and Cultural Geography
The module examines the theories of social formation and transformation. It also examines the following aspects in depth: the social system (structure and processes); the concept of cultural landscape; the role of technology in the evolution of culture; cultural diffusion; cultural innovation and regeneration; cultural hearth and cultural realms. The module also analyses folk culture within the context of cultural globalisation and segregation, that is, space and power.

MGEO 720 Regional Development and Planning
The regional concept in Geography, merits and limitations for application to regional planning and development as well as the changing concept of the region from an interdisciplinary viewpoint will examined. The module also focuses on the concept of space, area and locational attributes; approaches to delineation of different types of regions and their utility in the planning process - sectoral, temporal and spatial dimensions. Regional development in Zimbabwe - problems and prospects are discussed.

MGEO 721 Dynamics of Urban Geography
Approaches to urban geography which include environmentalism, positivism, structuralism, post-colonialism and postmodernism will be analysed. It also includes an examination of urban evolution and growth theories/concepts such as Social Area Analysis and Factorial Ecology; Urban Land Economy, Urban Economy: Formal and Informal; Urban Environment and Problems; Sustainable Urban Development and the future of the Cities.

MGEO 721 Dynamics of Rural Geography
Rural settlement morphologies, and socio-economic and environmental characteristics will be studied. Theories of rural geographical transformation and their applicability will be examined concerning both developed and developing countries. The module further examines the drivers of rural geography dynamics in developing and developed countries, contemporary structures, economic context and future trajectories of rural settlement change.

MGEO 721 Global Health Geographies
Global health is explored through a geographic perspective. The module is structured around topics that reflect key issues, including both the implicit *(place-based)* and explicit *(space-based)* geographies of global health. The links between the social determinants of health and the spatial distribution of the global disease burden for selected disease categories will be explored. The broader contexts of globalization, governance and geopolitics are also explored to illustrate how global health issues are prioritized, and the impact of these macro-processes on the local health of populations.

MGEO 722 Disaster Risk Management
Key concepts in disaster management theory, research, policy and practice, including vulnerability, governance, disaster risk reduction, and enhancing resilience to disasters through prevention, preparedness, response and recovery efforts will be analysed. Key issues and debates related to the theory and practices of disaster risk reduction will be discussed. Students will show familiarity with different theoretical approaches, and practical problems and an appreciation of the diversity of polices at various scales.

MGEO 723 Geography of Gender
The module explores how geography can open up an understanding of gender, sexuality, and other modes of social difference. While feminist and queer geographies are diverse and contested fields, the course takes its cues in particular from so-called third-wave and post-structuralist engagements with gender. The module further critically engages three key concepts - intersectionality, performativity, and reparability - in leading intellectual debates about gender, difference and space.

MGEO 801 Research Project

The module is meant to enable learners to plan, design and carry out their dissertation. It provides guidelines on how to choose a suitable topic, undertake a literature review, apply appropriate research methods, collect and analyse data and manage the write-up process. It also provides individual feedback to students on their proposals which they can incorporate in their final dissertation of 15 000 to 18 000 words in length.

MPHIL PROGRAMMES

- MPhil in Geography and Environmental Sustainability (MPhil GSE)
- MPhil in Environmental Safety, Health and Quality Management (MPhil ESHQM)
- MPhil in Disaster Risk Management and Resilience Building (MPhil DRMRB)

DPHIL PROGRAMMES

- DPhil in Geography and Environmental Sustainability (DPhil GSE)
- DPhil in Environmental Safety, Health and Quality Management (DPhil ESHQM)
- DPhil in Disaster Risk Management and Resilience Building (DPhil DRMRB)

DEPARTMENT OF GOVERNANCE AND PUBLIC MANAGEMENT

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN LOCAL GOVERNANCE AND MANAGEMENT (LGM)

Duration	4 years
Actual Credit Load	528
Maximum Credit Load	540
Maximum MBKS Credit Load	480
Total MBKS Credit Load	420
ZNQF Level	8

1. PURPOSE OF THE PROGRAMME

The public sector is facing a raft of changes and challenges, including growing demand for services, top-down reforms, and austerity. It is therefore essential that our public managers and leaders are equipped with the knowledge and skills to navigate through this environment to exercise good governance for the customers they serve. This curriculum responds to the Vision 2030 Agenda, the National Development Strategy 1 and the 5.0 education system. The programme provides a challenging real-world based education opportunity, in the process developing students' knowledge, skills and competencies in the field of Local Governance and Management. Students are further equipped with analytical, diagnostic, research and intervention skills needed for efficient and effective service delivery to local communities.

2.0 ENTRY REQUIREMENTS

Normal Entry: 5 'O' level passes including English language, at least an E in Mathematics and any two relevant 'A' level passes

Special Entry: Candidates who have attained Levels 5 and 6 of the Zimbabwe National Qualifications Framework (ZNQF), awarded by a recognised university, college or institute

Mature Entry: 5 'O' level passes including English Language, at least an E in Mathematics and at least 5 years' experience in Local Governance area. Candidates must be at least 25 years old

3.0 PROGRAMME CHARACTERISTICS

Area of study: Local Government Administration and Management, Decentralisation and Devolved Governance, Financial Planning and Management, Human Capital Management, Local Government Law, Socio-Economic Rights, E-Governance, Leadership, Monitoring and Evaluation, Innovation and Change Management, Political Science and Governance, Development Studies, Sustainable Rural Livelihoods, Smart and Sustainable Cities, Project Management, Disaster and Risk Management, Qualitative and Quantitative Research Methods and Service Delivery.

Specialist Focus: Research guided, inclusive and sustainable local governance system which underpins local and national economic development.

Orientation: Research, creativity and innovation and development-oriented, professional and ethical leadership

Distinctive features: The programme seeks to produce innovative, creative development oriented inclined professionals and proactive, competent problem solvers and decision-makers who are able to operate in a dynamic and constantly changing environment.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Career opportunities lie in the Civil Service, local authorities, Provincial and Metropolitan Councils; Public and private sector; colleges, non-governmental organisations, and in consultancy. Graduates from the programme further their studies in Master in Local Governance Studies and Public Administration and Management.

5.0 PROGRAMME DELIVERY

Lectures and tutorials (face to face as well as online), seminars, group work, work-related learning, research projects, individual independent study, field trips

6.0LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

- Demonstrate knowledge in Local Government Administration, Public Administration, Local Government Finance, Local Government law, Management, Strategic Management, Project Planning, Local Economic Development, Service Delivery, Research and Development
- Demonstrate knowledge of the Local government system, its constitutional provisions and service delivery rights in Zimbabwe.
- Apply skills in Disaster and Risk Management, Monitoring and Evaluation, Strategic Management, Economics, public sector accounting, Local Government Research
- Use appropriate research methods, skills, and tools, to conduct research which leads to innovation and problem-solving in different contexts.
- Design codes of ethics, strategic plans, local economic development plans and project plans.
- Explain the role of local governance in promoting the realisation of socio-economic rights
- Understand policy issues, public relations, land management
- Explain politics and governance, human resources management and participatory planning.

7.0 GENERAL PROVISIONS

Refer to Faculty General Regulations sections 4.1 to 4.4

8.0 PROGRAMME ASSESSMENT

8.1Continuous Assessment

Assignments, workshop reports, placement reports, seminar and group presentations, field visit reports, practical work, in-class tests, and any other relevant assessments constitute 40% of the total examination mark

8.2Written Examinations

Students shall attempt a minimum of three questions in an examination, which constitute 60% of the examination's total mark

8.3Other

(i) Dissertation/Research Project is assessed based on a research project (75%) and
Oral presentation (25%).
(ii) Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of General Regulations

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 5 of General Regulations

12.0 DEGREE WEIGHTING

Refer to section 11 of Faculty Regulations

13.0 PROGRAMME STRUCTURE **CREDITS**

14.0 MODULES SYNOPSES

LGM 101 Introduction to Public Administration

The module seeks to introduce students to the practice and study of public administration and policy. It introduces students to the historical, normative and institutional context of public administration in both developed and developing countries.

LGM 102 Legal Aspects of Local Governance

The module focuses on the enabling legislation for Local Government. It examines the principal and subsidiary statutes detailing local authority operations; powers and responsibilities. The mandate conferred by the constitution and other laws to local government necessitates the knowledge, appreciation, application, implementation, enforcement and interpretation of constitutional provisions, various legal regulatory frameworks, legislation, statutory instruments, bye-laws, customary law, case law and other sources or forms of the law.

LGM 103 Introduction to Political Science
The module explores the discipline of Political Science as a "science" in Social Studies with a focus on the study of processes, principles and structures of governments and political institutions. The module includes a discussion and comparison of political ideas, processes, theories, systems and policies. It also focuses on the analysis of political problems on a national and global level, as well as a definition of central concepts.

LGM 104 Decentralisation and Devolved Governance
The module explores the concept of decentralisation as a governance reform strategy. The various forms of decentralisation; deconcentration, delegation, devolution, privatisation and issues of fiscal decentralisation within the context of intergovernmental transfers, financial autonomy at sub-national level and constitutional provisions underpinning devolved sub-national governments in Zimbabwe are discussed. The roles of sub-national devolved government in the implementation of national development strategies and the attainment of Vision 2030 are also discussed.

LGM 105 Local Government Accounting and Financial Reporting
The focus of this module is on how Local government institutions manage public funds and how they sustain themselves financially. It explores the fundamental accounting and financial reporting concepts, standards, systems and procedures with special emphasis on International Public Sector Accounting Standards and the enabling national legislation.

LGM 106 Rural Development and Sustainable Livelihoods
The module introduces key themes in Rural Development, the defining characteristics, approaches, strategies, and how to keep abreast with green thinking practices in rural communities. The module will also focus on the Zimbabwean policies for sustainable rural development before and after independence. The module will focus on the dimensions of economic and social change in creating sustainable rural development. It seeks to develop an understanding of the key issues and dilemmas of rural development.

LGM 107 Local Governance Systems and Practices
It looks at Local Governance as a part of the broad system of governance. It establishes connections and linkages to other levels of governance namely provincial, national, central, regional and global governance. The modules deal with practices required in the local government sector and cover topics such as policies and procedures (by-laws, code of ethics, roles and responsibilities, handbooks, records management, stores management); meetings (agenda setting, conduct of meetings, minute taking); communication (newsletters, speeches and press release, service charter and customer care).

LGM 108 Local Government Human Capital Management
The module explores the human Capital practices in the Local Government sector. The module covers issues inclusive of, the evolution of human Capital discipline from Traditional Personnel Management, the HR legal framework in the Local Government sector, employee resourcing, human capital planning, reward management and motivation, performance management, and human capital development among others issues.

LGM 109 Traditional Leadership Systems and Local Governance
The module examines the Traditional leadership system, focusing on its role, succession issues and its place in Local Governance. The relevance of traditional leaders in the promotion of development and their influence on democracy will be reviewed with the objective of positioning traditional leaders in the development discourse. A comparative analysis of traditional leadership systems in the region and beyond will cap this study in the process of drawing lessons for improvement.

LGM 110 Civil Society and Local Governance
This module identifies Civil Society Organisations (CSOs) and examines their roles in local governance. It focuses on the history of local government and CSOs' relationship. It delves into opportunities and constraints on civic society.

CS131 Basic Communication Skills
Refer to the Department of Communications Skills

HCS135 Introduction to Information Systems
Refer to the Department of Information Systems

LGM 201 Disaster and Risk Management
The major thrust of this module is on local governance apparatus in light of various forms of disaster and risk. The focus is on the preparedness, mitigation measures, prevention and management of disaster and risk. The module will focus on green thinking to coordinate the relationship between human beings and nature. One of the thrusts will be on the sustainable management of the environment to reduce the effects of disasters. This goes in line with the Sustainable Development Goals.

LGM 202 Decentralised Planning and Project Management
The module focuses on planning elements for local governance. It looks at the planning process in local authorities, the types of plans and the relevant legislation that governs the planning process. Project identification, implementation, monitoring and evaluation aspects are looked at in detail. Project Management and monitoring discusses evaluation frameworks such as the Log frame matrix.

LGM 203 Qualitative Research Methods
The module offers an introduction to qualitative research methods, conceptualization, design, data collection and analysis with a special focus on Local Government sector organizations. Areas such as theoretical paradigms and perspectives, scientific explanations and theory building, research strategies and data collection methods, methods of analysing qualitative data, quality criteria and synthesis are covered. The module also trains students on the use of computer packages for qualitative data analysis.

LGM 204 Urban Development and Sustainable Cities
The module introduces the concept and theories of urbanisation which are inclusive of modernisation, dependency, Migration model, urban bias theory, Social Darwinism, Historical materialism, and Serote framework among others. The concept, theories, dimensions, criteria and frameworks of urban sustainability also are examined together with the causes of urban sustainable development challenges. The module will incorporate eco-friendly practices and supporting technology into the urban environment in the quest to build sustainable cities to reverse global climate change. The module will focus on SDG 11 which focuses on Sustainable cities and Development and how urban areas can adopt green practices.

LGM 205 Quantitative Research Methods
The module trains students on the quantitative dimension of social science research. It covers the philosophical underpinnings of quantitative research, quantitative research questions, designs, data collection methods, probability sampling techniques, statistical analysis of data and hypothesis testing. The module also trains students on the use of computer packages for quantitative data analysis.

LGM 206 Local Government Finance
This module focuses on how Local Authorities finance their activities, the significance of various revenue sources and sources of funding of Local Authorities, main expenditure drivers and laws governing public sector finances. The budgeting processes at the local level are explored including the concept of participatory budgeting and the role of different actors in the generation of local government revenue. The module thrust will also look at innovative ways to strengthen sustainable revenue generation strategies.

LGM 207 Public Policy
This module exposes students to key models and frameworks for public policy-making, and the inter-relationships between policy formulation, policy execution, and policy evaluation. Emphasis is placed on citizen participation in the policy problem identification and definition phase, through to the policy agenda-setting phase, and how these enhance stakeholder buy-in into the policy maintenance process.

LGM 208 E-Governance Management Information Systems
The focus of E-Governance Management Information Systems is on the application of Information Communication Technologies (ICTs) to delivering local government services, exchange of information, communication transactions, integration of various stand-alone systems and services between government-to-citizen (G2C), government-to-business (G2B), government-to-government (G2G), government-to-employees (G2E) as well as back office processes and interactions within the entire local government framework

LGM 209 Local Government Management and Leadership
This module provides students with an understanding of Management and Leadership and the challenges today's Local Government sector Leaders and Managers face. The module is broken into three major areas which are Management and Leadership theory (the most important theories regarding Leadership and Management) and Management and Leadership practice (what Leaders and Managers actually have to do to lead and manage the Local Government sector) and finally how Managers and Leaders can be effective in the Local Government sector.

LGM 210 Principles of Monitoring and Evaluation
This module introduces students to the concepts and principles, applied knowledge and practices of monitoring and evaluation (M&E) systems as they are utilised in Local Governance. It introduces module participants to the notion of M&E

which includes the distinct and complementary nature of the two, the concepts and practices of data collection, data documentation/management, data processing, analysis for M&E and reporting, and the adjustment of programme/project targets and directions.

ENT 235 Entrepreneurship 1
Refer to the Department of Entrepreneurship

GSSS201 Gender Studies for Social Sciences
This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself

LGM300 Work-Related Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

LGM 301WorkRelated Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

LGM 302 Work -Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

LGM 303 Work-Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

LGM 401 Local Economic Development
The module lays emphasis on local opportunities and the use of local resources for the development of its own economic potentials of how to create jobs, and income, develop local infrastructure and enhance revenue sources for the local authority and its people. The module further focuses on the emerging role of Provincial and Metropolitan Councils in economic development and how they can create economically viable localities. In addition, the module explores how LED fits into the general planning processes in a local authority and discusses tools, approaches and strategies that local authorities can use for the development of their localities

LGM 402 Strategic Planning and Management
The thrust of this module is on organisational management. It examines the vision and mission statement, aims and objectives, plan of action, implementation and continuous monitoring and evaluation periodically for organizations to meet intended goals.

LGM403 Ethics in Local Governance
The module explores issues on ethics, theories of ethics, ethical dilemmas and their resolutions, corporate governance, corruption and the anti-corruption architecture that are examined in the context of local governance. Students are further introduced to the best International ethics architecture models with the purpose of benchmarking ethical structures, values and practices of the Zimbabwean local government sector against that of the global best practices.

LGM 404 Housing Theory and Practice
This module focuses on human settlement in both rural and urban environments and approaches to rural and urban settlement provisions. Issues to do with resettlement before and after independence are explored. In the context of urban housing, policies and models of housing provision exploring opportunities and constraints in developing nations will be highlighted.

LGM 405 Democracy and Inclusive Governance

The module is a response to section 264 2(a) of the Constitution of Zimbabwe Amendment (NO.20) of 2013 on devolution of governmental powers and responsibilities. The module explores the concept of democracy as it relates to Inclusive Governance. What makes Governance Inclusive is examined by drawing on theoretical, practical and institutional aspects. Mechanisms currently used for creating Inclusive Local Governance are analysed together with factors that constrain or enable Inclusive Local Governance.

LGM 406 Human Rights in Local Governance
The modules focus on the role local governments play in the realisation of human rights. The different forms and functions as determined by the constitutional and legal systems of the State are explored. The provision of public services that address local needs and priorities related to the realisation of human rights at the local level is discussed. The module discusses concepts that include human rights education, awareness-raising and training for public officials at both the national and local government levels and the obligations of citizens are discussed.

LGS 407 Innovation and Change Management
The module provides students with the conceptual and theoretical frameworks and an understanding of the best practices related to developing, implementing and managing large and small-scale innovations and changes initiatives in the Local Government sector. Students need skills and knowledge to be able to manage change and innovation in an ever-changing local government environment. Therefore, the module thrust will make students come up with innovative strategies for the dynamic environment.

LGM 408 Sub National Service Delivery Models and Strategies
The module focuses on the social and economic aspects that should be included when considering issues of service delivery in various sectors. A number of theoretical and practical questions will be raised in the context of relevant policies. The module also explores the challenges faced in service provision and strategies that sub-national governments can adopt to address the challenges. New approaches such as public-private partnerships among others are discussed

LGM 409 Dissertation
This is a double-semester module where a student undertakes research in any local governance and Management related area under the guidance of an academic supervisor.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN PUBLIC MANAGEMENT AND GOVERNANCE (HPMG)

Duration:	4 years
Actual Credit Load:	492
Minimum Credit Load:	408
Maximum Credit Load:	540
Total MBKS	408
ZNQF Level:	8

1 PURPOSE OF THE PROGRAMME

The programme aims to develop knowledge, skills and competencies in the broad areas of public management relevant to various employment capabilities and careers in the world of work and societal development. Furthermore, the programme can enhance the governance and management skills capabilities of human capital serving in the public sector. These will be achieved through:

- The provision of opportunities to study both aspects of public management and related international and governmental phenomena.
- A balanced curriculum that enables the acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of public management and governance issues.
- The provision of related and relevant communication and presentation capabilities that enhance the students' effectiveness in a wide range of career opportunities.

2. ENTRY REQUIREMENTS

For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language with a grade C or better.

Normal Entry: 5 'O' level passes including English language and any two relevant 'A' level passes.
Special Entry: Candidates who have attained Levels 5 and 6 of the Zimbabwe National Qualifications Framework (ZNQF), awarded by a recognised university, college or institute.

Mature Entry: 5 'O' level passes including English language and at least three years' experience in Public Management area or related disciplines. Candidates must be at least 25 years old.

3. PROGRAMME CHARACTERISTICS

Areas of Study: Public Management, Public Administration, Public Sector Human Resource Management, Public Policy and Public Sector Corporate Governance.

Specialist Focus: Public Management with special emphasis on the application of public management theories, processes and systems geared towards national and global governance and development.

Orientation: Research, creativity and innovation oriented. Teaching and learning are professionally oriented and focused on empirical aspects.

Distinctive Features: The programme seeks to produce creative, innovative, proactive, highly competent development-oriented professionals, problem solvers and decision-makers who are able to operate in complex and dynamic modern environments. The programme also focuses on building the research-innovation-management gamut that is hinged on knowledge production and development using a student-centred approach.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers: Graduates have career opportunities in the public sector, private sector, international agencies and non-governmental organisations. The graduates will serve as political analysts, career diplomats, political officers, public managers and administrators, policy analysts, technocrats, project administrators and researchers.

Further Studies: Masters and Doctoral studies in Public Management, Public Administration, Public Policy and Governance, Public Management and Leadership and Public Sector Management.

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, work- related learning, dissertation, and individual independent study.

Assessment Methods: Written and oral examinations, in-class tests, written assignments, seminar presentations, work- related learning reports, dissertations, and continuous assessment.

6 LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Use critical skills that are transferable to a wide range of careers, written and oral communication, critical thinking, information analysis, interpretation and application and ability to solve public management-related problems in the dynamic and complex world of work and societal development.
- Apply a range of practical, computational, research, innovation, industrialisation and problem-solving skills as well as the development of factual and conceptual knowledge of public management issues.
- Carry out research and field-based political and public administrative activities ethically and following best practices of integrity.
- Work with peers, subordinates and superiors in line with values and rules of professional conduct for political scientists and public managers.
- Participate and work effectively individually and collaboratively in public management discourses as well as in multidisciplinary environments.

7. GENERAL PROVISIONS

Refer to the University's General Regulations.

8. PROGRAMME ASSESSMENT

- **Continuous Assessment work:** Constitutes 40% of the final mark and it consists of written assignments, write-ups, group and individual presentations, in-class tests and any other relevant assessments.
- **Written Examinations:** End-of-semester examinations constitute 60% of the final mark.
- **Other:** -Dissertation is assessed based on a research project (75%) and an oral presentation (25%).
  - Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9. PROVISION FOR PROGRESSION
Refer to section 6 of the Faculty Regulations.

10. FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.

11. GRADING AND DEGREE CLASSIFICATION
Refer to section 10 of the Faculty Regulations.

12. DEGREE WEIGHTING
Refer to section 11 of the Faculty Regulations.
Honorary degrees will be awarded to individuals who have distinguished themselves in Public Affairs. The following degree may be awarded:

- Doctor of Public Management

MODULE SYNOPSES

HPMG 101 Introduction to Public Management
Basic theories and concepts of public management will be examined including issues of public and private goods and their implication on the general populace. The applicability of theories of management will also be explored, for example, the scientific theory, and Maslow's hierarchy of needs. The module will also explore the old and new paradigms in public management. More emphasis will be on the new public management approach and its practical application.

HPMG 102 Introduction to Political Science
The module explores the discipline of Political Science as a "science" in Social Studies with a focus on the study of processes, principles and structures of governments and political institutions. The module includes a discussion and comparison of political ideas, processes, theories, systems and policies. It also focuses on the analysis of political problems on a national and global level, as well as a definition of central concepts.

HPMG 103 Introduction to Political Theory
The module examines the main theoretical perspectives and ancient political thoughts that inform political processes and how countries have reacted to the internal social, economic and political realities of the times as well as to the external variables such as imperialism and globalisation. Political theory also focuses on empirical research into the way political institutions function in practice.

CS 131 Basic Communication Skills

Refer to the Department of Communications Skills.

HCS 135 Introduction to Information Systems

Refer to the Department of Information Systems.

HPMG 104 Organisational and Management Theories
The module addresses the organisational and management theories and how they have informed the conduct of public management and governance in contemporary public sector institutions. Interest will be placed on the applicability of these theories in shaping the present-day public institutions as well as the governance systems and processes in the public sector.

HPMG 105 Local Government Management
The module will examine the local authorities, processes and systems in the management of public affairs. The module will explore the relations between the central government and local authorities with emphasis being placed on government and cabinet structure, roles and coordination and government support services within the context of the civil service. Whereas at the local government management level, emphasis will be on decentralisation and implementation of government functions.

HPMG 106 Public Enterprise Management
Globally, public enterprises constitute a significant fraction of the public sector with the potential to make significant contributions to the national economies. The module will equip the students with the skills and knowledge on how these public enterprises are managed so that they can meaningfully foster national development. Emphasis will be placed on what they are, their functions, the principles informing they are managed, and how they are managed.

HPMG 107 Public Sector Accounting
The module will explore the public sector mechanisms for controlling public expenditures and public resources to ensure greater efficiency and effectiveness in government activities. The module, explores the public sector accounting standards, the public sector accounting environment and how it differs from the private markets and the duties, powers and responsibilities of the Accountant General as well as the Public Finance Management Act in safeguarding the national purse.

HPMG 108 Performance Management
The module seeks to examine how governmental organisations acknowledge how people constitute the real competitive advantage. Performance management is essential to help employees perform at their best and align their contributions with the goals, values and initiatives of the organisation.

HPMG 201 Public Policy Formulation and Analysis
The module seeks to critically analyse the public policy-making processes, interrelationships between policy formulation, execution, evaluation and revision, models of policy choices, citizen participation in policy-making, and administrative responsibility in policy development.

HPMG 202 Employment Relations
The module examines the role and objectives of the main actors in employment relations – employers, employees and trade unions, and the government – and their interactions in collective bargaining, employee involvement/participation, conflict resolution and expression, and the termination of the employment relationship.

HPMG203 Public Health Administration
The module concerns itself with the administration, leadership, and management of healthcare systems, such as hospitals, networks, and public health systems. The module of public health services administration combines policy, business and science in managing the human and fiscal resources needed to deliver effective public health services. Public healthcare administration will also cover specialized areas such as health education, informatics, operations, and health policy.

ENT 235 Entrepreneurship

Refer to the Department of Entrepreneurship.

GSSS 201 Gender Studies for Social Sciences

This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself

HPMG 204 Administrative Law
Administrative Law is the body of law that governs the activities of government. The module seeks to examine how government activities are governed. The module explores sources and limits of agency authority and procedures which must be used in investigation, rulemaking and adjudication. It includes aspects such as the separation of powers, constitutional law and the functions of the Ombudsman.

HPMG 205 Public Sector Human Resources Management
The module will explore HR practices in the public sector. Issues to be covered include the legal framework of HR practice in the public sector, the role of government policy, HR policies, employment practices, i.e. employee resourcing, reward management, labour relations management, developing human resources, equality of opportunities, discipline and grievance procedures, managing change and development.

HPMG 206 Public Sector Leadership and Governance
The module will discuss the concept of leadership and governance. Discussions will centre on the origins of leadership; social sources of leadership, the power of leadership; formal and informal leadership; political leadership, transformational and transactional leadership; reform leadership, leadership and collective purpose, leadership and governance in the public sector. The module examines the nexus between leadership and governance practices and systems in the public sector.

HPMG 207 Elections Management
The module is hinged at exploring how the electoral processes at both the national and local authority levels are managed. The management strategies are aimed at enhancing confidence in the electoral processes and systems. In addition, the management of elections will enhance the transparency, accountability and credibility of the electoral processes. Lastly, comparative assessments of how these electoral processes are managed will be done across the globe.

HPMG 208 Research Methods
The module is designed to assist students in developing a deep understanding of methodological approaches which are relevant when conducting social science research. The module will examine these tools with an emphasis on their practical

and potential contribution to the development of social science research projects. Emphasis will be on establishing clear, high standards for qualitative and quantitative research.

HPMG300 Work-Related Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HPMG301Work- Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HPMG302 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HPMG303 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HPMG 401 Organisational Change and Development
The module explores the theoretical and academic bases of organisational development and change management. Focus is premised on economic crises, structural adjustments, competition, technical innovation, institutional reforms and many other drivers that require organisations in developing economies and transitional economies to change and develop on an ongoing basis. The management of the change is also crucial so that organisations remain operational and effective.

HPMG 402 Project Management
The module looks at approaches to project planning, implementation, monitoring and evaluation as they relate to public projects and programmes. The module will examine the different project tools that are used in pursuing the success of projects. The module explains some of the skills required to meet difficult and complex challenges in running huge projects that involve the coordination of many different people, the completion of many tasks in a precise sequence and the expenditure of a great deal of time and money.

HPMG 403 Public Information Systems and E-Government
The module explores how information systems and internet technologies are affecting how people interact with government, and how governments, in turn, are using and managing these technologies to better provide information and services to the public. The module also examines key policy issues relevant to the management of information systems as well as the implementation of e-government programmes, as well as to the broader use of information technology in democratic societies.

HPMG 404 Public Sector Procurement
World over, governments are in business with private players who provide designated goods and services on contract. As such, the module examines the procurement processes done in public sector organisations, systems in place, rules and procedures to ensure transparency and accountability in state tendering and procurement and how systems in Zimbabwe compare with other countries' experiences.

HPMG 405 Public Sector Auditing
The module seeks to explore public sector mechanisms for control over public expenditures and the overall management of public finances and resources. In addition, the module explores issues of auditing public institutions. The usage of legislative documents like the Audit Office Act Public Finance Management Act, and the Constitution in auditing systems will be examined together with the key office of the Auditor General to examine their powers, responsibilities and duties in upholding public resources.

HPMG 406 Public Sector Innovation and Sustainability

The module infused the 21st century and Fourth Industrial Revolution era concepts and practices of public sector innovation, green economy, sustainability and transformation in the public sector. In this module, the focus centres on the need for students to appreciate and grasp ideas of public sector creativity, green policies and politics as the cogs needed for a 21st-century public entity. Such issues are pertinent, especially given the emphasis on the environment, innovation and sustainability in the era of the Fourth Industrial Revolution where technology and innovation lead policy and practice.

HPMG 407 Public Sector Finance

The primary objective of this module is to provide students with the tools, and the skills to use these tools, to understand the underlying concepts and practical trade-offs entailed in public finance policy alternatives. The module will explore financial management, budgeting, revenue raising, auditing and how funds are used in governmental and quasi-governmental organisations.

HPMG 408 Public Sector Decision Making

Decision-making is a crucial element in ensuring the success of public sector organisations. The module therefore examines the decision-making processes in the public sector. The decision-making processes, systems, practices and models in the public sector will be explored. A comparative analysis will be made of decision-making in public institutions and private institutions as well as developed and developing countries will be made.

HPMG 409 Public Sector Corporate Governance

The module addresses ethical and unethical behaviour in the running of governmental and quasi-governmental organisations. Emphasis will be on cultivating good corporate governance culture, practices and systems in governmental organisations. Concepts like corruption, accountability, responsibility, integrity and transparency will be examined. Also, quantitative and qualitative corporate governance issues will be examined.

HPMG 410 Dissertation

This module provides an opportunity for students to identify political science and public management problems and conduct research to address them. It provides students with an opportunity to apply research methodology concepts and statistical skills previously taught in other modules. Students will research a topic of their choice concerning pertinent issues in politics and public management.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN POLITICAL SCIENCE AND GOVERNANCE (HPSG)

Duration:	4 years
Minimum Credit Load:	384
Maximum Credit Load:	540
Total MBKS Credit Load	384
ZNQF Level:	8

1. PURPOSE OF THE PROGRAMME

The programme aims to develop knowledge, skills and competencies in the broad areas of politics and government studies relevant to various employment capabilities and careers in the world of work and societal development. These will be achieved through:

- The provision of opportunities to study both aspects of politics and government studies and related international and governmental phenomena.
- A balanced curriculum that enables the acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of politics and governmental issues.
- The provision of related and relevant communication and presentation capabilities that enhance the students' effectiveness in a wide range of career opportunities.

2. ENTRY REQUIREMENTS

For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language with a grade C or better.

Normal Entry: 5 'O' level passes including English language and any two relevant 'A' level passes.

Special Entry: Candidates who have attained Levels 5 and 6 of the Zimbabwe National Qualifications Framework (ZNQF), awarded by a recognised university, college or institute.
Mature Entry: 5 'O' level passes including English language and at least three years' experience in Non–Governmental Organisations, International organisations and Government or related disciplines.

3. PROGRAMME CHARACTERISTICS

Areas of Study: Political Science, Diplomacy, International Relations, International Law, Electoral Processes, and Governmental Studies

Specialist Focus: Politics and Government Studies with special emphasis on the application of political theories, processes and systems geared towards national governance and development.

Orientation: Research, creativity and innovation oriented. Teaching and learning are professionally oriented and focused on empirical aspects.

Distinctive Features: The programme seeks to produce creative, innovative, proactive, highly competent development-oriented professionals, problem solvers and decision-makers who are able to operate in complex and dynamic modern environments. The programme also focuses on building the research-innovation-management gamut that is hinged on knowledge production and development using a student-centred approach.

4. CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers: Graduates have career opportunities in the public sector, private sector, international agencies and Non-Governmental Organisations. The graduates will serve as political consultants, political analysts, career diplomats, political officers and researchers.

Further Studies: Masters and Doctoral studies in International Relations, Politics, Political Science, global studies, International Law, Strategic and Security Studies.

5. PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, seminars, group work, work- related learning, dissertation, individual independent study.

Online teaching: The department employs the Google Classroom strategy where lecturers administer Zoom-like video lectures or record video and audio lectures and send them to students.

Assessment Methods: Written and oral examinations, in-class tests, written assignments, seminar presentations, work- related learning reports, dissertations, and continuous assessment.

6. LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Use critical skills that are transferable to a wide range of careers, written and oral communication, critical thinking, information analysis, interpretation and application and ability to solve politics-related problems in the dynamic and complex world of work and societal development.
- Apply a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of politics and governmental issues.
- Carry out research and field-based political and governmental activities ethically and following best practices of integrity.
- Work with peers, subordinates and superiors in line with values and rules of professional conduct for political scientists.
- Participate and work effectively individually and collaboratively in political discourses as well as in multidisciplinary environments.

7. GENERAL PROVISIONS

Refer to the University's General Regulations.

8. PROGRAMME ASSESSMENT

- **Continuous Assessment work:** Constitutes 40% of the final mark and it consists of written assignments, write-ups, group and individual presentations, in-class tests and any other relevant assessments.
- **Written Examinations:** End-of-semester examinations constitute 60% of the final mark.
- **Other:** -Dissertation is assessed based on a research project (75%) and an oral presentation (25%).
  - Work Related Learning level 3.1 is assessed based on Work Related Learning Placement Report (40%). Work Related Learning is assessed based on the student's Work-Related Learning report (30%), assessment by Work Supervisor (30%), and assessment by Academic Supervisor (20%).

9. PROVISION FOR PROGRESSION
Refer to section 6 of the Faculty Regulations.

10. FAILURE TO SATISFY EXAMINERS
Refer to section 9 of the University's General Regulations.

MODULE SYNOPSES

HPSG101 Introduction to Political Science
The module explores the discipline of Political Science as a "science" in Social Studies with a focus on the study of processes, principles and structures of governments and political institutions. The module includes a discussion and comparison of political ideas, processes, theories, systems and policies. It also focuses on the analysis of political problems on a national and global level, as well as a definition of central concepts.

HPSG102 Introduction to Public Management
Basic theories and concepts of public management will be examined including issues of public and private goods and their implication on the general populace. The applicability of theories of management will also be explored, for example, the scientific theory, and Maslow's hierarchy of needs. The module will also explore the old and new paradigms in public management. More emphasis will be on the new public management approach and its practical application.

HPSG 103 Introduction to Political Theory
The module examines the main theoretical perspectives and ancient political thoughts that inform political processes and how countries have reacted to the internal social, economic and political realities of the times as well as to the external variables such as imperialism and globalisation. Political theory also focuses on empirical research into the way political institutions function in practice.

HPSG 104 Theories of International Relations
The module addresses the theories of international relations and how they have informed the conduct of international relations between and among nation-states. It will also address how relations across the globe are addressed in areas of political, economic and cultural cooperation with emphasis on North-South and South-South relations.

HPSG 105 Political Economy of Zimbabwe
The module will explore the colonial history of the country and its correlation with the economic, social and political circumstances currently facing the country. Issues to do with politics of imperialism, corruption, political instability, inclusive development, debt trap, agrarian reforms and economic empowerment, structural and political reforms, globalisation and regional integration will be analysed to foster ways of overcoming the country's economic challenges.

HPSG106 Constitutional Law
The objective of the module is to enable students to acquire a thorough knowledge of constitutional law and constitution-making processes and how constitutional law regulates relations between government and citizens. Emphasis will be placed on the Supreme law of the land and how it informs peace, tranquillity and development between the government and the general populace.

HPSG107 Electoral Politics and Processes
The module is hinged on examining the politics that surround the electoral processes. The thrust of the module is to equip students with the skills and knowledge of the political processes that surround elections. Comparisons of the different electoral systems and processes across the globe will be made.

HPSG 108 Comparative Politics
The module involves the comparison of domestic politics. Different political systems, actors, processes and models will be examined. Students are introduced to concepts, approaches and themes of enquiry and these are related to empirical evidence.

HPSG201 International Relations
The module addresses the theories of international relations and how they have informed the conduct of international relations between and among nation-states. It will also address how relations across the globe are addressed in areas of political, economic and cultural cooperation with emphasis on North-South and South-South relations.

HPSG 202 African Political Ideas
Political Thought is an essential ingredient of all politics. This module explores African political ideas and philosophies with the thrust to equip students with the skills and knowledge to analyse political systems and processes. In this module,

the principal themes of African Political ideas are studied and analysed in the light of their social, economic and political contexts as well as their intellectual origin.

HPSG 203 Politics and Governance in Zimbabwe
The module seeks to examine how public decisions are made and implemented. Special emphasis will be on issues such as elections, governance and political systems in Zimbabwe from independence to the present.

HPSG204 Principles of International Law
The module seeks to expose students to the dynamics of international law, Principles of international law, as well as their application in specific cases. International law determines the rights and obligations of states. In addition, issues of state succession, state sovereignty, diplomatic law, and the role of international tribunals will be examined.

HPSG205 Foreign Policy
The module unpacks the strategies used by different governments in dealing with other nations. The module examines a variety of alternative theoretical models of how states formulate, implement and evaluate their foreign policies.

HPSG 206 International Organisations
The module examines the role and activities of leading international organisations (political and economic) in the development of nations of the world for example the United Nations, and World Bank, among others. The module further investigates the implications of economic and political regional blocs on relations between developed nations of the North and poor countries of the South for example South-South cooperation among others.

HPSG207 Democracy and Human Rights
The module explores the concepts of democracy and human rights which are distinct but interrelated. The values of freedom, respect for human rights and the principle of holding periodic and credible, democratic elections which express the will of the people will be analysed in the context of general elections held in developed and developing countries. Human rights laws and how they promote development will also be explored.

HPSG208 Research Methods
The module is designed to assist students in developing a deep understanding of methodological approaches which are relevant when conducting social science research. The module will examine these tools with an emphasis on their practical and potential contribution to the development of social science research projects. Emphasis will be on establishing clear, high standards for qualitative and quantitative research.

HPSG300 Work-Related Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HPSGG301 Work-Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HPSG302 Work-Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HPSG303 Work-Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HPSG401 Modern Political Theory
The objective of the module is to familiarise students with the emergence of political thought since the medieval ages and the views of the different political theorists: Western, African and Islamic and to link the teachings with the political systems prevalent today. The module will analyse the contemporary political ideas of the African, European, Asian and American political theorists.

HPSG402 International Politics
The module will explore theories of international politics, how state and non-state actors cooperate and compete on political issues for example human rights, trade, peace and security, and environmental protection. It will also explore transnational issues and global problems. A comparative perspective of how countries approach the issues above within the context of their political systems will be examined.

HPSG403 Intelligence Strategy
The module explores the dynamics surrounding the collection of information of military or political value. Students will be equipped with the knowledge and skills on the collection, processing, analysis, and dissemination of intelligence that is required for forming policy and military plans at the national and international levels.

HPSG404 Diplomacy
The module explores bilateral, regional and multilateral diplomacy and its practical application in the international system. Aspects covered include the legal framework of diplomacy, methods of conducting diplomacy, diplomatic privileges and immunities, diplomatic negotiation and mediation, trade diplomacy, environmental diplomacy, diplomatic communication and international agreements.

HPSG405 Regional Integration
The module studies regional integration initiatives in Africa, Europe and elsewhere and their practical implications on nation-states. The module will examine the effects of national policies and international collaboration of regional players in promoting sustainable development in those regional blocs.

HPSG406 Peace and Security Studies
The module seeks to broaden the student's understanding of the conceptual underpinnings of 'peace' and 'security' as well as to deal with the security to peace and security at nation-state, regional and international levels. It also seeks to analyse the extent to which states, as major actors in the international system have attempted to promote and safeguard international peace and security.

HPSG407 Fundamentals of Geopolitics
The module provides a comprehensive overview of the major issues, ideas, institutions and interests that make up global politics. The module specifically dwells on explaining and predicting the international political behaviour of actors in international politics primarily in terms of geographical variables.

HPSG408 Political Consultancy
The module offers theoretical and practical insight into consultancy work, activities and strategies on political and government studies-related issues and processes. The module will also examine political risk analysis, public decision-making, political communication, political and public media strategy and political campaigning, public policy development, legislative and regulatory changes, and the interpretation and analysis of public phenomena.

HPSG409 Dissertation
This module provides an opportunity for students to identify political science and public management problems and conduct research to address them. It provides students with an opportunity to apply research methodology concepts and statistical skills previously taught in other modules. Students will research a topic of their choice concerning pertinent issues in politics and public management. The length of the dissertation should be 20 000 words.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN PROJECT PLANNING AND MANAGEMENT (DPPM)

Actual Load:	180
Minimum Credit Load:	180
Maximum Credit Load:	240
Total MBKs credit Load:	150
ZNQF Level:	9

1.0 INTRODUCTION

This programme introduces students to the fundamental concepts of planning and project management. The structure of the programme is designed to help students understand project planning processes such as scoping projects, scheduling projects,

sequencing project activities, and utilising project resources; and to appreciate project management processes such as project quality management, project financing and risk management, project monitoring and control, as well as data generation, analysis and management. In light of the Education 5.0 philosophy, this programme demonstrates how imperative to produce innovative and industry-oriented project managers who can design and execute projects in line with national development imperatives such as the Zimbabwe National Development Strategy 1 (NDS 1) and Vision 2030. This programme is also designed for both those currently working in a project-oriented role and those aspiring to launch a career in formal project management. For those who are already practising as project managers, this programme will refine and/or upgrade their ability to identify challenges and improve processes to effectively manage and lead projects in their organisation(s). The content of the programme is also well suited to new project management professionals who wish to upskill their project management abilities. Graduates in this programme will be able to successfully plan and manage projects as well as to lead and manage project teams in complex and competitive environments within the public, private and third sectors.

2.0 PURPOSE OF THE PROGRAMME

The purpose of the programme is to enable the student to:

- Understand the contemporary theoretical foundations and analytical issues in project planning and management.
- Acquire a range of practical, computational, statistical, research and problem-solving skills and conceptual knowledge of project planning and management issues.
- Understand how to develop a realistic project financial plan that will guide the allocation of the correct amount of the project budget to each corresponding project need.
- Awareness of how to assess, prioritize and manage project risks.
- Develop skills for writing a convincing project research paper.

3.0 ENTRY REQUIREMENTS

At least a 2.1 pass in any relevant degree programme.

4.0 PROGRAMME CHARACTERISTICS

The Post-Graduate Diploma in Project Planning and Management (DPPM) is an 18 18-month part-time programme structured to meet project planning and management needs in Zimbabwe, the region and beyond. The programme teaching approach will enable students to develop and align their project management competencies to the key fundamentals of Education 5.0 philosophy such as innovation and industrialisation.

5.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates have career opportunities in a wide array of disciplines which include the following:

- Non-Governmental Organisations and the Civil Society.
- Research Institutions.
- Teaching and Lecturing.

Graduates can further their education through enrolling for a Masters in Project Management, Monitoring and Evaluation, Public Management and Leadership and Development Studies.

6.0 PROGRAMME DELIVERY

The programme content will be delivered through lectures, seminars, group presentations, guest lecturers and lecture notes.

7.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

- Develop and apply innovative and industry-oriented skills to the management of projects.
- Apply knowledge and experience of techniques of project planning and management that are required to achieve project objectives effectively.
- Use an integrated approach to the planning and management of any project that considers how the scope of work, the time and resources available, economic constraints and quality of work can be planned and controlled to meet the project objectives.
- Execute projects and use the earned value approach for monitoring and controlling their progress.
- Develop and apply strategic risk response systems to minimise risks when managing projects.
- Use applicable Management Information Systems to facilitate specific project management processes and activities.

8.0 GENERAL PROVISIONS

8.1 The Postgraduate Diploma in Project Planning and Management is an 18-month programme.

9.0 PROGRAMME ASSESSMENT

Formal examinations will normally be held at the end of each semester.

9.1 Continuous assessment shall account for 40% of the overall assessment while the final examination will account for 60% of the overall assessment.
9.2 Marking Scheme and Diploma Classification done about section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters.

10.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

11.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

12.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

13.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 PROGRAMME STRUCTURE

Level 1 Semester 1

DPPM 601	Fundamentals of Planning and Project Management	15
DPPM 602	Project Quality Management	15
DPPM 603	Project Monitoring and Control	15
DPPM 604	Project Financing and Risk Management	15

Level 1 Semester 2

DPPM 605	Stakeholder and Conflict Management	15
DPPM 606	Project Evaluation and Sustainability	15
DPPM 607	Research Methods for Project Management	15
DPPM 608	Data Generation, Analysis and Management	15

Level 2 Semester 1

DPPM 609	Project Management Leadership and Communication	15
DPPM 610	Project Management Information Systems	15
DPPM 611	Research Project	30

15.0 MODULE SYNOPSES

DPPM 601 Fundamentals of Planning and Project Management

This module introduces you to the fundamental aspects of project planning and management to give students some insights into the requirements for handling multi-disciplinary projects in a rapidly changing business environment. In this regard, the module covers planning components such as understanding the scope of the project, scheduling the project and an exposition of how project efficiency and productivity can be achieved. The module also enables students to identify how project constraints must be balanced to support project success. The module looks at approaches to project planning, implementation, monitoring and evaluation as they relate to public projects and programmes. The module will examine the different project tools that are used in pursuing the success of projects. The module explains some of the skills required to meet difficult and complex challenges in running huge projects that involve the coordination of many different people, the completion of many tasks in a precise sequence and the expenditure of a great deal of time and money. The rationale is to develop and stimulate debates that are around the management of development projects with an applied orientation towards initiatives in both developed and developing countries.

DPPM 602 Project Quality Management

This module orients you to the processes and activities that are essential in ensuring that a project delivers the standard quality expected by the stakeholders. The module emphasises the three fundamental requirements of quality management which are: quality planning, quality assurance and quality control. The comprehensive discussion of these three fundamental requirements will enable students to understand why project managers need to coordinate planned project activities and processes in a manner that ensures that the quality requirements of the projects are fulfilled. The module also explores the strategies that are used to ensure that the project processes are compliant with agreed project standards and eliminate unsatisfactory outputs. In this regard, the Total Quality Management (TQM) framework will be analysed to understand its utility in Project Management. The overall purpose of the module is to enable students to discover the safeguards that can be put in place to guarantee that all project quality expectations will be met within the stipulated budget and timeframes.

DPPM 603 – Project Monitoring and Control

This module is aimed at developing the capacity of the participants with the concepts, applied knowledge and practices of the concepts of monitoring and control as they are applied in project planning and management contexts. It introduces module participants to the notion of monitoring and underscores its importance in the entire project management cycle to ensure the realisation of the desired project outcomes. The concepts and practices of data collection, data documentation/ management, data processing, analysis and reporting, and the adjustment of programme/project targets and directions are also taken into account for the efficiency and effectiveness of the management of public resources.

DPPM 604 – Project Financing and Risk Management

This module has a dual focus. Firstly, the module introduces students to the central components of project financing, to equip them with essential knowledge for setting the financial projections for the project revenue and income. The module is designed to enable the learner to understand the theoretical and empirical aspects for planning, controlling and reviewing utilised project funds. Second, the module will help students to develop working-level competencies for understanding and managing risks that may negatively or positively affect a project. Such knowledge will enable students to develop skills in identifying risks, qualifying and quantifying risks, risk response planning and risk response control. Upon completion of the module, students are expected not only to know how to analyse project risks in different contexts or to assess project risks according to their likelihood and their magnitude but also to make informed project risk management decisions and actions.

DPPM 605 – Conflict and Stakeholder Management

The purpose of this module is to examine the dynamics of project conflicts and how project managers can resolve them rationally and effectively. The module will discuss the inevitability of conflict from the background that project stakeholders and actors can have different perspectives and attitudes, yet it remains essential to ensure that the rate of conflicts is minimised and that if conflicts arise, they are dealt with quickly and professionally. The module enables students to understand how conflicts between and amongst stakeholders for a given project can emanate and explode if not properly managed. Students will also be able to appreciate the need to regularly and effectively communicate with project stakeholders as a measure to minimise conflicts. The module explores the utility of conflict management approaches such as collaborating, competing, avoiding, accommodating and compromising. The overall objective of the module is to help students avoid conflict and apply these approaches in managing emerging conflicts before they adversely affect project success.

DPPM 606 – Project Evaluation and Sustainability

This module introduces students to various approaches to project evaluation that can be applied in a range of public and development management contexts to promote project sustainability. Current debates around evaluation theory and practice are introduced and some are explored in detail – all with a specific interest in debates around project evaluation and sustainability questions in sub-Saharan Africa. In this regard, the module underscores the concept of green economy, which emphasises that project implementation processes deliver project outputs that are consumed in an ecologically friendly and sustainable manner. There is further emphasis on impact evaluation and how proper project management, monitoring and control ensure project sustainability which is at the core of project management in the contemporary world. The module further capacitates programme and policy professionals who will be commissioning, managing, designing, and/or implementing evaluations and provides them with a solid academic foundation on which to build further practical and experiential skills and expertise.

DPPM 607 – Research Methods for Project Management

Research provides critical information for facilitating different project management processes. Given this, the module introduces students to the qualitative and quantitative research methods that are crucial in project management. It is designed to engage students in both the qualitative and the statistical investigation process, that is, from developing a research question and data collection methods to analysing, interpreting and communicating data for continuous project improvement and decision-making. This module further introduces students to qualitative methods as well as descriptive and inferential statistics through the use of traditional and simulation approaches which include confidence intervals and hypothesis testing. Students will also be exposed to real-world applications of qualitative and quantitative techniques purely designed to enhance their conceptual understanding of the research approaches relevant to the development and management of projects.

DPPM 608 – Data Generation, Analysis and Management

This module covers project quantitative and qualitative information collection, collating, analysis, and reporting as well as knowledge management. It challenges students to engage with data in a post- and de-colonial context, and not simply accept data as fact, nor data collection as an act without power relations at stake. This is NOT a skills transfer course. There are no right answers. The aim is to jointly think through where power lies when data are collected when data are analysed and reported (by whom, to whom, for whose benefit?) when indicators are devised, when programmes or projects are designed, and so on. Various databases are also explored to capacitate the module participants with the requisite knowledge to smoothly navigate the project data management process.

DPPM 609 – Project Management Leadership and Communication

The module focuses on leadership competencies and the communication aptitudes that enable project managers to coordinate their teams effectively and deliver projects successfully. Successful project managers are managers who practice both strong management skills and effective leadership and communication skills. Participants will learn about practicing leadership skills in managing projects, including inter and intra-personal communication skills, negotiation skills, team building, and the exercise of rational-legal authority as well as the most basic leadership competencies in motivating and inspiring project teams. The primary focus of the module is on building leadership and communication competencies to transform successful project managers into effective leaders.

DPPM 610 – Project Management Information Systems

The prime focus of the module is to enable students to understand how Information Systems can be used to facilitate decision-making and coordination of project activities at the various stages of the project lifecycle. The Fourth Industrial Revolution (4IR) has increased the adoption and use of Management Information Systems (MISs) in project management. Thus, this module orients students to some of the common MISs such as the Project Planning and Scheduling System (PPSS), the Procurement Planning and Monitoring System (PPMS) as well as the Project Performance Indicator Tracking System (PPITS). The module explores the supporting functions of project management, analysing and managing the performance of a project, and communicating with stakeholders, inside and outside of the project. Amongst key issues to be covered include the Systems Approach, Information Systems in strategic management and Information Systems in organisation functions. Upon completing this module, students are expected to understand software applications and methodological processes for managing information-related project processes and activities using MISs.

DPPM 611 – Research Project

This module provides an opportunity for students to identify a novel project planning and management problem and conduct empirical research to develop and propose innovative solutions to address them. It provides students with an opportunity to apply research methodology concepts and statistical skills previously taught in other modules to design sustainable solutions

to societal challenges. Students will carry out research on a unique topic of their choice concerning pertinent issues in project planning and management. The student is expected to conduct empirical research and develop a report that reflects innovative and critical thinking to address a properly conceptualised project issue.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN PUBLIC MANAGEMENT AND LEADERSHIP (DPML)

Duration:	18 months
Actual Load:	210
Minimum Credit Load:	180
Maximum Credit Load:	240
Total MBKs Credit Load:	165
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The purpose of the programme is to provide the student with:

1.1 An understanding of the contemporary theoretical foundations and analytical issues in public management and leadership.

1.2 The ability to conduct research informed by clearly articulated Public Management and Leadership theories that promote effective public sector management.

1.3 The acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of public management and governance issues.

2. 0 ENTRY REQUIREMENTS

At least a 2.1 pass in any relevant degree programme.

3.0 PROGRAMME CHARACTERISTICS

3.1 The Post-Graduate Diploma in Public Management and Leadership (DPML) is a two-semester part-time programme structured to meet public management and leadership needs in Zimbabwe, the region and beyond.

4. 0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Graduates have career opportunities in a wide array of disciplines which include the following:

- Public Sector Management (Government Ministries, Local Authorities, State Owned Enterprises)
- Human Resource Management (Private and Public Sector)
- Teaching and Lecturing
- Non-Governmental Organisation

Further education: Master's studies in Public Management in Leadership, Public Policy Management and Public Sector Finance Management.

5.0 PROGRAMME DELIVERY

5.1Lectures, tutorials, seminars, group work, presentations, public lectures, guest lecturer, lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme, the graduate will be able to:

- Gain the ability to critically analyse, create or improve, and implement effective public policy in public sector programs and services and leadership practices.
- Acquire the foundation knowledge needed to understand the distinctive character and responsibilities of public sector administration and leadership in a democratic society.
- Contribute to the development of operational plans for public management and leadership.
- Analyse the political, social, economic, and legal environments of public sector organisations.
- Acquire skills in written communication, planning, budgeting, decision-making, and collaboration.
- Display knowledge of ethical issues in public management and leadership.
- Develop new Public Management and Leadership models and initiatives, policies and practices that enhance organisational effectiveness.
- Communicate effectively and present information using multimedia to both experts and non-experts in the public sector domain.

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Public Management and Governance Honours Degree is a four-year programme.

8.0 PROGRAMME ASSESSMENT

Formal examinations will normally be held at the end of each semester.

8.1 Continuous assessment shall account for 40% of the overall assessment while the final examination will account for 60% of the overall assessment.

8.2 Marking Scheme and Diploma Classification. Refer to section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

DPML 601	Principles of Public Management	15
DPML 602	Management and Leadership Theories	15
DPML 603	Research Methods	15
DPML 604	Public Sector Human Resources Management	15

Level 1 Semester 2

DPML 606	Public Sector Finance Management	15
DPML 607	Administrative Law	15
DPML 608	Strategic Leadership and Management	15
DPML 610	Reforming the Public Sector	15

Level 2 Semester 1

DPML 612	Digital Public Management	15
DPML 613	Research Project	30

14.0 MODULE SYNOPSES

DPML 601 Principles of Public Management

This module provides students with some of the foundations of public management as an analytical field of research. The aim is to introduce students to some of the major theoretical developments in the field of Public Management since its inception as a self-conscious scholarly discipline.

DPML 602 Management And Leadership Theories

The module explores the management and leadership theories. Students will be exposed to key theories governing public organisations as well as the major leadership theories and their applicability to contemporary public institutions.

DPML 603 Research Methods

The module examines the research methods appropriate for both qualitative and quantitative methods. The module is intended to enable students to understand the techniques widely used in gathering, interpretation, analysis and presentation of data in social research

DPML 604 Public Sector Human Resources Management

The module seeks to equip students with skills for the role of a public sector human resource manager. It also aims to instil skills and knowledge in graduates to become organisational change agents while managing and retaining staff.

DPML 605 Public Policy Studies

The module examines the public policy formulation and analysis- that is policy design, implementation and evaluation in depth. It equips students with skills and knowledge to contribute effectively to policy preparation and implementation processes, especially in developing and transitional countries.

DPML 606 Public Sector Finance Management
The module provides a comprehensive overview of the major issues, ideas, and institutions, and undergirding the management of public finance and expenditure in the public sector. The module equips students with public sector financing, budgeting, revenue collection strategies, sources of revenue and financial management systems.

DPML 607 Administrative Law
The module examines the legal processes, systems and frameworks governing the way administrative authorities exercise their delegated functions, power and authority. This also ensures that the administrative authorities do not exceed their legitimate power and facilitate good administration.

DPML 608 Strategic Leadership and Management
The module aims to ground students in the central theoretical and practical aspects of strategic leadership and management practices. Additionally, the module recognizes governments' need for strategic managers and leaders who can effectively run programmes that cost less, deliver better service and add value in the modern day.

DPML 609 Leadership and DecisionMaking
The module provides a broad understanding of the fundamental principles, and sound practices in public management leadership and decision-making in the public sector.

DPML 610 Reforming The Public Sector
The module explores concrete solutions to ensure increased efficiency in the work of public administrations at all levels of government, as well as to improve administrative organisations and increase the quality of the services provided by public administrations.

DPML 611 Public Sector Innovation and Sustainability
This module is anchored on the 21st-century pertinent issues of innovation and sustainability in the context of public sector management. The focus of this module is on the need for creativity in the design and delivery of public goods and services. Furthermore, the module addresses the need for green policies and sustainability in the making and implementation of policies as well as the delivery of public goods and services.

DPML 612 Digital Public Management
In the Fourth Industrial Revolution era where digitalisation Information and Communication Technologies have amplified how public goods and services are designed and delivered, this module focuses on digital public management. The module further focuses on the adoption and application of digital solutions that improve the bottom-up model of public service design and implementation, public policy making and community development.

DPML 613 Research Project
The project involves research in the area of the students' interest. The student is expected to do practical fieldwork over a period of 3 months. The project is expected to be between 25-35 pages.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN LOCAL GOVERNMENT MANAGEMENT (PGDLGM)

Duration	18 months
Actual Credit Load	324
Maximum Credit Load	340
Minimum Credit Load	270
Total MBK Credit Load	270
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME
This curriculum responds to the Vision 2030 Agenda, the National Development Strategy 1 and the 5.0 education system. The programme provides a challenging real-world education opportunity, in the process developing students' knowledge,

skills and competencies in the field of Local Government Management. Students are further equipped with analytical, diagnostic, research and intervention skills needed for efficient and effective service delivery to local communities.

2.0 ENTRY REQUIREMENTS

Normal Entry:

A recognised undergraduate degree from an accredited institution. Five O' levels including English and at least an E in Mathematics.

3.0 PROGRAMME CHARACTERISTICS

Area of study: Planning and Project Management, Disaster Management, Public Policy, Research Methods, Local Government Systems, Local Government Human Capital Management and Local Government Ethics.

Specialist Focus: Research guided inclusive and sustainable local governance system which underpins local and national economic development.

Orientation: Research, creativity and innovation. Development-oriented professional leadership and management in the field of Local Government Management.

Distinctive features: Programme seeks to produce innovative, creative development-oriented inclined professionals and proactive, competent problem solvers and decision-makers who can operate in a dynamic and constantly changing field of Local Government management.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Career opportunities lie in the Local Authorities, Public and Private Sector and Non-Governmental Organisations. Students can further their studies with Master in Local Governance Studies.

5.0 PROGRAMME DELIVERY

Lectures and tutorials (face to face as well as online), seminars, group work, research projects, and individual independent study.

6.0 Objectives

By the end of the course students should be able to:

- Explain the importance of efficient and effective administration of the local government sector.
- Present practical solutions to the complex challenges besetting the local government sector in service delivery.
- Demonstrate knowledge of resource mobilisation for improved service delivery
- Demonstrate skills in improved management of finances and budgets within the Local Government sector.
- Apply the theoretical perspectives learnt in local governance.
- Explain the nature of local governance about the different types of local authorities and service delivery offered.
- Explain the importance of e-government in service delivery.
- Develop effective project planning, implementation and evaluation skills in local governance.

7.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

- Demonstrate knowledge in Local Government Administration, Local Government Finance, Local Government Management, Project Planning, Local Economic Development, Service Delivery and Research
- Demonstrate knowledge of the Local government system, its constitutional provisions and service delivery rights in Zimbabwe.
- Apply skills in disaster management, Monitoring and Evaluation, strategic management, economics, public sector accounting, Local Government Research
- Use appropriate research methods, skills, and tools, to conduct research which leads to innovation and problem-solving in different contexts.
- Design codes of ethics, strategic plans, local economic development plans and project plans.

8.0 GENERAL PROVISIONS

Refer to Faculty General Regulation's sections 4.1 to 4.4

9.0 PROGRAMME ASSESSMENT

10.0 Continuous Assessment

Assignments, workshop reports, seminar and group presentations, practical work, in-class tests, and any other relevant assessments constitute 40% of the total examination mark

11.0 Written Examinations

Students shall attempt a minimum of three questions in an examination, which constitute 60% of the examination's total mark

12.0 Other

(i) Dissertation/Research Project is assessed based on a research project (75%) and

Oral presentation (25%).

13.0 PROVISION FOR PROGRESSION

Refer to section 6 of Faculty Regulations

14.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of General Regulations

15.0 GRADING AND DIPLOMA CLASSIFICATION

Refer to section 5 of General Regulations

16.0 DIPLOMA WEIGHTING

Refer to section 11 of Faculty Regulations

17.0 Programme Structure

18.0 Module Synopsis

PGDLGM 501: Local Government Service Delivery Models and Strategies

Equitable and efficient service delivery is at the heart of local government's mandate. This module focuses on the management and delivery of key strategic, corporate and technical services, ranging from those for which local government has direct responsibility, to shared service provision, and services for which local government is a partner**.**

PGDLGM 502: Local Government Management and Leadership

This module provides students with an understanding of Management and Leadership and the challenges today's Local Government Sector Leaders and Managers face. The module is divided into three major areas which are Management and Leadership theory Management and Leadership practice and finally how Managers and Leaders can be effective in the Local Government sector.

PGDLGM 503: Local Government Finance

This module reviews the types of taxes, fees and revenues used by local governments and considers the major attributes and consequences of each source in line with the various pieces of legislation which guide local government finance management. The module acquaints students with a variety of important financial management tools and topics which include: revenue raising, capital planning, debt issuance and management, intergovernmental and inter-organisational fiscal administration, service cost analysis and management, accounting, performance and accountability. In addition, the procurement systems will also be taught focusing on the functionalities to allow a complete management of the purchases. Aligning procurement strategies within public sector organisations' policy manual, ethics and purchasing structure. Human resources in procurement settings. The public sector procurement process; differences from the private sector; procedures; directives and constraints in public procurement.

PGDLGM504: Local Government Ethics and Professionalism

The module grounds students on how to perform their duties in compliance with local government regulations and laws to eliminate the occurrences of corruption which is rife in most public sector organisations. The module covers topics inclusive of ethics, theories of ethics, professionalism, ethical dilemmas and their resolution among others.

PGHLGM 505: Local Government Policy Process

This module exposes students to key models and frameworks for public policy-making, and the inter-relationships between policy formulation, policy execution, and policy evaluation. Emphasis is placed on citizen participation in the policy problem identification and definition phase, through to the policy agenda-setting phase, and how these enhance stakeholder buy-in into the policy maintenance process.

PGHLGM 506: **Decentralisation and Devolved Governance**

The module explores the concept of decentralisation as a governance reform strategy. The various forms of decentralisation; deconcentration, delegation, devolution, privatisation and issues of fiscal decentralisation within the context of intergovernmental transfers, financial autonomy at sub-national level and constitutional provisions underpinning devolved sub-national governments in Zimbabwe are discussed. The roles of sub-national devolved government in the implementation of national development strategies and the attainment of Vision 2030 are also discussed.

PGDLGM 507 Green Local Government Management

The module focuses on the role of local government in the sustainable management of the environment. The module looks into the issue of waste management, environmental stewardship and the use of green management practices among local government agencies to cut the annual budget and protect the environment. The online services are the main element for green management practices by local government in this module. The module will aim to analyse the role of local government policies in the provision of urban green spaces.

PGHLGM 508: Disaster and Risk Management

The major thrust of this module is on local governance apparatus in light of various forms of disaster and risk. The focus is on the preparedness, mitigation measures, prevention and management of disaster and risk

PGDLGM 509: Research Methods

The module covers qualitative and quantitative techniques used in gathering, interpreting, analysing and presenting data. Equips students with the requisite skills to carry out their research-based projects in their final semester.

PGDLGM 510: Local Government Systems and Practices

It looks at Local Governance as a part of the broad system of governance. It establishes connections and linkages to other levels of governance namely provincial, national, central, regional and global governance. The modules deal with practice required in the local government sector and cover topics such as policies and procedures (by-laws, code of ethics, roles and responsibilities, handbooks, records management, stores management); meetings (agenda setting, conduct of meetings, minute taking); communication (newsletters, speeches and press release, service charter, customer care).

PGDMLG 5I1: Local Government Human Capital Management

This module exposes students to labour relations relating to the rural and urban councils' acts, aspects on recruitment and selection, reward management, skills upgrading and various human capital issues as outlined in the Labour Act. The main purpose of this module is to teach students the main aspects of public sector human resource management so that they can appreciate how human resources can be maximised for improved service delivery.

PGDLGM 512 Local Government Innovation and Sustainability

The module focuses on equipping students with skills and knowledge to be able to innovate in an ever-changing local government environment for sustainable service provision. Therefore, the module's thrust will be to make students come up with innovative strategies to manage the dynamic environment.

PHDLGM 601: Local Economic Development

Economic development is key for the sustainable economic growth and development of any area. This module therefore exposes students to the skills and strategies to enable economic benefits and improve the quality of life for the inhabitants.

Teaches students how to mobilise the natural, human and financial resources to improve the livelihoods of the inhabitants of their respective locality.

PHDLMG 602: Planning and Project Management

This module exposes students to a broad overview of planning within the public sector including the purpose of strategic plans, integrated development plans and master plans. The regional, town and country planning act will be used to guide planning operations within the public sector. The module further skills develop students on Project planning, implementation, monitoring and evaluation.

PGDLGM 603 Digital Local Governance Practices

Digital Local Governance Practices focus on equipping students with digital tools and solutions which can enable local governments to improve service design and delivery. The intention is to meet the needs of stakeholders and improve productivity while reducing costs within local government. It is also the application of Information Communication Technologies (ICTs) to delivering local government services, exchange of information, communication transactions, integration of various stand-alone systems and services between government-to-citizen (G2C), government-to-business (G2B), government-to-government (G2G), government-to-employees (G2E) as well as back-office processes and interactions within the entire local government framework.

PGDLGM 604: Dissertation

The project which is undertaken in the final semester enables the students to apply the skills and the knowledge acquired during the period of study. The students will be required to work on a topic based on any of the modules learnt and develop a project which demonstrates how they will address a problem that has arisen within the local government sector

REGULATIONS FOR POSTGRADUATE DIPLOMA IN INTERNATIONAL RELATIONS (DIR)

Actual Load:	252
Minimum Credit Load:	150
Maximum Credit Load:	316
Total MBKs credit Load:	216
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The purpose of the programme is to provide the student with:

1.1 An understanding of the contemporary theoretical foundations and analytical issues in international relations.

1.2 The acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of international relations issues.

1.3 Development of the graduates' knowledge, competencies and analytical skills for them to be able to comprehend and resolve contentious contemporary international relations issues in the modern global contexts

2. 0 ENTRY REQUIREMENTS

At least a 2.1 pass in any relevant degree programme.

3.0 PROGRAMME CHARACTERISTICS

The Post-Graduate Diploma in International Relations (DIR) is a three-semester part-time programme structured to meet international relations needs in Zimbabwe and the world.

4. 0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Graduates have career opportunities in a wide array of disciplines which include the following:

- Public Sector Management (Government Ministries, Embassies)
- Foreign Relations
- Teaching and Lecturing
- Non-Governmental Organisations and the Civil Society

Further education: Master's studies in International Relations, Strategic and Security Studies, Global and Regional Studies and Diplomatic Studies.

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

- Gain the ability to critically analyse, create or improve, and implement effective international relations practices.
- Use principles and theories of International Relations to gain a critical understanding of current problems and challenges in our country and beyond.
- Use appropriate research methods, skills, and tools, to conduct research which leads to innovative and problem-solving ideas in the modern global contexts.
- Apply the necessary tools and skills for international affairs management processes.
- Understand the development of alternative paradigms for international relations.
- Develop new International Relations models and initiatives, policies and practices that enhance organisational effectiveness.
- Communicate effectively and present information using multimedia to both experts and non-experts in the public sector domain.

7.0 GENERAL PROVISIONS

7.1 The Post-Graduate Diploma in International Relations (DIR) is a three semester part-time programme.

8.0 PROGRAMME ASSESSMENT

8.1 Formal examinations will normally be held at the end of each semester.

8.2 Continuous assessment shall account for 40% of the overall assessment while the final examination will account for 60% of the overall assessment.

8.3 Marking Scheme and Diploma Classification. Refer to section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Level 1 Semester 1

DIR501 International Relations Theories	18
DIR503 International Political Economy	18
DIR504 Foreign Policy	18
DIR505 International Governance and Development	18

Level 1 Semester 2

DIR507 Public International Law	18
DIR508 Geopolitics	18
DIR509 Diplomacy	18
DIR510 Research Methods	18

Level 2 Semester 1

DIR601 Comparative International Relations Systems	18
DIR602 Dissertation	54

14. MODULE SYNOPSES

DIR 501 International Relations Theory

The module explores the several international relations theory undergirding the discipline of International Relations. This course provides students with some of the foundations of international relations as an analytical field of research.

DIR 502 AND 506 Mandarin 1 and 11

These modules are intended to enable students to write and fluently speak Mandarin language given the Government of Zimbabwe look East Policy thrust.

DIR 503 International Political Economy

The module focuses on the various paradigms for analysing relations among states, economies and societies. Special attention is placed on the international monetary system through the concept of the gold standard, the fixed exchange rate, the floating exchange rate and regional currencies.

DIR 503

DIR 504 Foreign Policy

The module examines a variety of alternative theoretical models of how states formulate, implement and evaluate their foreign policies. Students will be exposed to foreign policy formulation, goals, bureaucratic politics and other factors involved.

DIR 505 International Governance and Development

The module examines aspects of the structures and processes of global governance, especially within the United Nations system, and also governance in regional groupings. Issues of international development in the 21st century will also be examined.

DIR 507 Public International Law

The module explores key issues in international law. It examines competing approaches and considers the nature and sources of international law.

DIR 508 Geopolitics

The module provides a comprehensive overview of the major issues, ideas, institutions, and interests that make up global politics. Particular emphasis is given to the relationship between the global environment and the global economy.

DIR 509 Diplomacy

The module will cover in some detail the work of diplomatic agencies in the execution of foreign policy and their organisation to accomplish that work. It will also cover issues to do with bilateral and multilateral diplomacy and diplomatic law.

DIR 510 Research Methods

The module provides a general overview of qualitative and quantitative research methods in social science research. The module is intended to enable students to understand the techniques widely used in gathering, interpretation, analysis and presentation of data in social research

DIR 601 Comparative International Relations

The module explores the different case studies in international relations. The module equips the students with the ability to make comparisons among different nations. The comparisons will be made among different systems, processes and mechanisms in the international arena.

DIR 602 Dissertation

The dissertation involves research in the area of the students' interest. The student is expected to do practical fieldwork over 3 months. The project is expected to be between 50 to 60 pages.

REGULATIONS FOR THE MASTER OF SCIENCE DEGREE IN PUBLIC MANAGEMENT AND LEADERSHIP (MPML)

Duration	18 months
Actual Credit Load	342
Maximum Credit Load	360
Total MBK Credit Load	288

ZNQF Level 9

1.0 PURPOSE OF THE PROGRAMME

The programme seeks to develop graduates' knowledge, competencies and analytical skills for them to be able to comprehend and resolve contentious contemporary public policy and public management and leadership issues in the modern global contexts. Furthermore, the programme seeks to develop ethical and professional leadership competencies for various public management contexts cutting across both policy and governance spectrums. These will be achieved through:

- A balanced curriculum that enables the acquisition of a range of practical, computational, research and problem-solving skills as well as the development of factual and conceptual knowledge of public management and leadership issues.
- The provision of related and relevant communication and presentation capabilities that enhance the students' effectiveness in a wide range of career opportunities.

2.0 ENTRY REQUIREMENTS

Normal Entry: A 2.1 pass, or better in Public Management and Administration, Public Policy and Governance, Public Sector Management, Economics, Politics and Public Management and Political Science or any relevant related degree.

Special Entry: A general degree and any other qualification in line with the Zimbabwe National Qualifications Framework (ZNQF).

3.0 PROGRAMME CHARACTERISTICS

Areas of study: Fundamentals of Public Management, Organisational and Leadership Theories, Leadership Development, Public Sector Corporate Governance, Advanced Research Methodology, Public Policy Analysis and Management, Welfare State and Social Policy, Strategic Leadership and Management, Public Sector Human Resources Management, Public Sector Management Information Systems, Advanced Public Finance Management, Public Sector Reforms and Management, and Administrative Law.

Specialist focus: Rigorous research guided inclusive public management and leadership systems and policy analysis and management which foster sustainable nation-state and global development.

Orientation: Applied critical action research premised on creativity, innovation and empirical student-centred learning.

Distinctive: The programme seeks to produce creative, innovative, proactive, highly competent graduates who are versatile and adaptive to the highly dynamic and competitive modern global environments.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in: Government ministries, Local authorities, State Owned Enterprises, International Governmental Organisations, Academia and Research Institutions.

Further Studies: Doctoral studies in Public Management and Governance; Governance and Leadership; Public Finance and Public Sector Corporate Governance.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, seminars, group work, field-based activities, research projects, and individual independent study.

Assessment Methods: Written and oral examinations, in-class tests, written assignments, and seminar presentations.

6.0 LEARNING OUTCOMES

6.1 On successful completion of this programme the graduate will be able to:

6.1.1 Gain the ability to critically analyse, create or improve, and implement effective public policy in public sector programs and services and leadership practices.

6.1.2 Acquire the foundation knowledge needed to understand the distinctive character and responsibilities of public sector administration and leadership in a democratic society.

6.1.3 Use appropriate research methods, skills, and tools, to conduct research which leads to innovative and problem-solving ideas in the modern public sector contexts.

6.1.4 Acquire the breadth and depth of knowledge about the challenges and model practices of contemporary public sector management and leadership needed to be effective in that context as well as engender an understanding of the special challenges and opportunities of public sector management and leadership in diverse contexts.

6.1.5 Develop the skills and theoretical knowledge needed to redesign public sector organizations, staff and delivery systems, as well as develop an understanding of the importance of leadership, cooperation and collaboration across unit lines and with external and community partners.

6.1.7 Develop an appreciation of the need for ethics and professionalism as the pillars onto which public leadership and governance is premised on.

6.1.8 Develop advanced leadership and communication skills needed for leadership in the public sector: strong oral communication skills in small groups and in larger public contexts. Strong written communication and skills appropriate for writing reports, explaining issues and policies, persuasively presenting initiatives, corresponding with colleagues and clients, and media communications.

6.1.9 Use principles and theories of Public Management and Leadership to gain a critical understanding of current problems and challenges in our country and beyond.

6.1.10 Demonstrate knowledge and understanding of the international public management and leadership approaches, dynamics, systems and practices in resolving complex and dynamic global contemporary public sector challenges.

6.1.11 Master concepts such as public policy, policy management, policy analysis, governance and democracy, institutional reform, capacity building, accountability and power.

7.0 GENERAL PROVISIONS

Refer to General Regulations

8.0 PROGRAMME ASSESSMENT

8.1 Course work

Written assignments, seminar and group presentations, in-class tests, and any other relevant assessments contribute 40% to the final mark.

8.2 Written Examinations

End-of-semester examinations constitute 60% of the final mark

8.3 Other

Dissertation/Research Project is assessed based on a research project (75%) and oral presentation (25%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the University's General Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

MPML 701 Fundamentals of Public Management
This module provides students with some of the foundations of public management as an analytical field of research. The aim is to introduce students to some of the major theoretical developments in the field of Public Management since its inception as a self-conscious scholarly discipline.

MPML 702 Leadership Development
The module helps to deliver effective and efficient leadership skills needed for developing organisations, teams and individuals through the shaping of leadership mind sets and practices. The module provides relevant skills and knowledge needed for organisational transformation and effective leadership in the public sector as it explores the genesis, leadership styles, practices, skills, processes and mechanisms in public institutions.

MPML 703 Public Policy Analysis and Management
The module examines the public policy formulation and analysis- that is policy design, implementation and evaluation in depth. It equips students with skills and knowledge to contribute effectively to policy preparation and implementation processes, especially in developing and transitional countries. Additionally, it also equips students with the skills to analyse the anatomy and content of public policies in the public sphere.

MPML 704 Public Sector Human Resources Management
The module seeks to equip students with skills for the role of a public sector human resource manager. It also aims to instil skills and knowledge in graduates to become organisational change agents while managing and retaining staff.

MPML 705 Organisational and Leadership Theories
Students will be exposed to key theories governing public organisations as well as the major leadership theories and their applicability to contemporary public institutions. The module will explore the theoretical aspects of organisational and leadership models and how they relate and feed into each other for the betterment of public sector institutions.

MPML 706 Administrative Law
The module examines the legal processes, systems and frameworks governing the way administrative authorities exercise their delegated functions, power and authority. This also ensures that the administrative authorities do not exceed their legitimate power and facilitate good administration. Students are equipped with the knowledge of how delegated authority is used in public organisations.

MPML 707 Advanced Research Methodology
This module provides students with an understanding of the background, issues and controversies surrounding some of the methodologies and statistics used to accomplish research objectives. It should be considered as a follow-up of the undergraduate Research Methods module. The module provides a general overview of qualitative and quantitative research methods in social science research and a more intensive focus on survey research methods (data collection, analysis, interpretation, and presentation).

MPML 708 Advanced Financial Management
The module provides a comprehensive overview of the major issues, ideas, institutions, and undergirding the management of public finance and expenditure in the public sector. The module also focuses on the national budgetary processes and frameworks, financial management techniques, systems and processes and practical applications.

MPML 709 Public Sector Ethics and Corporate Governance
The module explores the major issues concerning ethics, theories of ethics, theories of corporate governance, ethical dilemmas and their resolutions, corporate governance, corruption, its forms, causes, effects and the anticorruption

architecture will be examined in the context of the public sector. Issues of ownership and control as well as the processes, systems, and practices governing the running of public organisations in an ethical, transparent, accountable, effective and efficient manner will be emphasised. Emphasis will also be placed on good ethical and corporate governance processes, culture, practices and systems in public sector institutions.

MPML 710 Strategic Leadership and Management
The module aims to ground students in the central theoretical and practical aspects of strategic leadership and management practices. Additionally, the module recognizes governments' need for strategic managers and leaders who can effectively run programmes that cost less, deliver better service and add value in the modern day. Students will thus be equipped with the knowledge and insights in areas of strategic advantage and influence in public management.

MPML 711 Public Information Management Systems and E-Government
The module examines the ways in which information systems, internet technologies and e-government are affecting the interactions of people and the government as well as how service provision and information by the public sector entities is being affected by these technologies. Intended for those interested in public policy and service delivery, this module also provides a broad overview of emerging opportunities, challenges and risks created by information technology in the public sector.

MPML 712 Public Sector Reforms and Management
The module explores concrete solutions to ensure increased efficiency in the work of public administrations at all levels of government, as well as to improve administrative organisations and increase the quality of the services provided by public administrations. The module will explore the structural changes that are adopted in enhance the effectiveness and efficiency of public institutions such as merging or splitting public sector organizations while process change may include redesigning systems, setting quality standards, and focusing on capacity-building.

MPML 800 Comparative Public Policy
The module explores the interdisciplinary uses of public policy as its major unit of analysis for comparison across different systems and institutions, usually countries or governments. It typically asks questions about how, why, and to what effect different governments pursue different or similar policies. It faces problems of contested identities of method versus field and the lack of a coherent and comprehensive theoretical framework. Students will be equipped with the skills and knowledge on how these comparative public policy problems are addressed by its emerging research, which also contributes to the creation of integrated and impactful knowledge in the public policy discourse.

MPML 801 Welfare State and Social Policy
The module examines the systems whereby the state undertakes to protect the health and well-being of its citizens, especially those in financial or social need, through grants, pensions, and other benefits as well as social policy and services. The module enables students to understand how social policies are used as instruments for promoting and safeguarding human well-being. It covers the following areas: conceptualisation of social policy, objectives of social policy, determinants of social policy, social policy process, including the main actors in the policy process, models of social policy and social services.

MPML 802 Dissertation
Students will carry out an empirical research of interest in the field of Public Management and Leadership and come up with a research dissertation of at least 40000 words. Students shall work with the assistance and guidance of their supervisor to design, conduct and write their dissertation in line with the current trends in the field of Public Management and Governance, including the Education 5.0 Thrust. The guidelines for the dissertation will be premised on the concepts learnt such as the basic skills of research methods and report writing.

14.0 MODULE SYNOPSES

MSIR 731 Theories of International Relations
This module provides students with some of the foundations of international relations as an analytical field of research. The aim is to introduce students to some of the major theoretical developments in the field of international relations since its inception as a self-conscious scholarly discipline.

MSIR 732 International Justice Systems
The module exposes students to the key institutions of justice like the International Court of Justice and, the International Criminal Court among others. A focus on the structure, authority and operations are considered in some detail. The role of the United Nations in promoting justice is also highlighted.

MSIR 733 International Governance and Development
The module examines aspects of the structures and processes of global governance, especially within the UN system, and also governance in regional groupings. This module also takes a comprehensive and critical look at international development examining what it has accomplished in the twentieth century and what form it should take in the twenty-first century.

MSIR 734 International Institutions

The module serves to analyse the political theory of international institutions and to increase understanding of the contemporary policy issues surrounding the work of international institutions. The module examines all kinds of mergers that operate at international level, which do not have commercial purpose, concern more than one state, but do not have any state characteristics in all the continents.

MSIR 735 International Political Economy
The module is concerned principally with understanding the interaction between political actors and economic forces in the international system. The module explores the issues to do with production, trade and their relations with law, custom and government as well as the distribution of national income and wealth. The module revolves around issues of international businesses, and trade, international finance, international development and development economic.

MSIR 736 Foreign Policy
The module examines a variety of alternative theoretical models of how states formulate, implement and evaluate their foreign policies. The module examines the self-interested strategies chosen by states to safeguard its national interests as well as the strategic approaches used by state actors in their interaction with other states.

MSIR 737 Advanced Research Methodology
This module provides students with an understanding of the background, issues and controversies surrounding some of the methodologies and statistics used to accomplish research objectives. Since it is a follow-up, the undergraduate Research Methods module provides a general overview of qualitative and quantitative research methods in social science research and a more intensive focus on survey research methods (data collection, analysis, interpretation, and presentation).

MSIR 738 Geopolitical Studies
The module provides a comprehensive overview of the major issues, ideas, institutions, and interests that make up global politics. Particular emphasis is given to the relationship between the global environment and the global economy, as well as to the issue of global environmental governance. Specifically, the module dwells on explaining and predicting international political behaviour of actors in international politics primarily in terms of geographical variables.

MSIR 739 Africa's International Relations
The module explores the major issues on the relations between state and non-state actors with each other and with international organizations and certain subnational entities and non-actors such as bureaucracies, political parties, and interest groups) on the African continent. The module examines issues like conflicts, cooperation, trade and diplomacy, human rights, global poverty, the environment, economics, globalization, security, global ethics, and the political environment among others affecting the African continent.

MSIR 740 Global Peace and Security
The module aims to ground students in the central theoretical and practical aspects of global peace and security. This is taught in the context of an understanding of the main approaches to International peace and security. The modules explore the key institutions, actors, processes, mechanisms and systems undergirding global peace and security.

MSIR 741 International Law and Diplomacy
The module explores key issues in international law and diplomacy. It examines competing approaches and considers the nature and sources of international law, sources of international law, diplomatic immunity, dispute settlement, municipal versus international law, the law of the seas, environmental protection and human rights, outer space and air law and use of force. The module examines the nexus between international law and the work of diplomatic agencies in the execution of foreign policy as well as diplomatic law, multilateral and multilateral diplomacy.

MSIR 800 Dissertation
Students carry out empirical research of interest in the field of International Relations and come up with a research dissertation of at least 20000 to 40000 words. Students work with the assistance and guidance of their supervisor to design, conduct and write their dissertation in line with the current trends in the field of International Relations.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN LOCAL GOVERNANCE STUDIES (MLGS)

Duration	18 months
Actual Credit Load	288
Minimum Credit Load	270
Maximum Credit Load	360
Total MBKS Credit Load	216
ZNQF Level	9

1. PURPOSE OF THE PROGRAMME

To develop graduates' analytical skills for them to be able to resolve contemporary local governance service delivery challenges, address issues of social inequality, and effectively contribute to the social change dialogue, and local and national development discourse.

2 ENTRY REQUIREMENTS

Normal Entry: A 2.1 pass in BSc Honours Local Governance Studies
Special Entry: A general degree and any other qualification line with the Zimbabwe National Qualifications Framework (ZNQF)

3 PROGRAMME CHARACTERISTICS

Areas of study: local government administration and management, local government financing, local government financing, local government human capital management, environment policy and management, research methods, inclusive service provision, policy-making and governance gender and development and leadership and governance

Specialist focus: Research guided inclusive and sustainable local governance system which underpins local and national economic development.

Orientation: Applied action research based on creativity and innovation, development-oriented professional leadership and management

Distinctive: The programme seeks to produce development-inclined, proactive and competent problem -solvers and decision- makers who are able to operate in dynamic and constantly changing environments.

4 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Career opportunities lie in the Civil Service, local authorities, Provincial and Metropolitan
Councils; Public and private sector; colleges, non-governmental organisations, and consultancy. Graduates from the programme further their studies in Doctoral Studies in Local Governance Studies and in Public Administration and Management.

5.0 PROGRAMME DELIVERY

Lectures and tutorials (face to face as well as online), seminars, group work, work-related learning, research project, individual independent study, field trips

5 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

- Demonstrate knowledge in local government administration, public administration, project planning and development
- Apply skills in disaster management, strategic management, economics and public sector accounting
- Use appropriate research methods, skills, and tools, to conduct research which leads to innovative and problem-solving ideas in different contexts.
- Understand environmental health, policy issues, public relations and land management
- Explain politics and governance, human resources management and participatory planning
- Understand and seek ways to resolve contemporary challenges in local government administration and management
- Tackle challenges of service delivery and social inequality as well as effectively contribute to the social change dialogue
- Apply relevant theories in analysing local governance problems and developing responses relevant to national development
- Demonstrate a culture of transparency, accountability, efficiency, effectiveness, and competence in public service delivery

6 GENERAL PROVISIONS

Refer to Faculty General Regulations, sections 4.1 to 4.2.

7 PROGRAMME ASSESSMENT

7.1 Continuous Assessment

Written assignments, workshop reports, clinical placement reports, seminar and group presentations, field visit reports, laboratory work, in-class tests, and any other relevant assessments contribute 40% to the final mark.

7.2 **Written Examinations**

End-of-semester examinations constitute 60% of the final mark

7.3 Other

Dissertation/Research Project is assessed based on a research project (75%) and oral presentation (25%)

8 PROVISION FOR PROGRESSION

Refer to section 6 of the Faculty regulations

MLGS 832	Dissertation	90

14.0 MODULE SYNOPSES

MLGS 731 Local Government Administration and Management

The module examines the metamorphosing roles, structures, functions and legal framework of local authorities. Theories and models of public administration and management will be discussed.

MLGS 732 Local Government Financing

The module analyses the drawbacks of overreliance by local authorities on tax revenues to finance service delivery and examines the potential for improved service delivery through non-tax approaches such as public-private partnerships, community share ownership schemes and community development initiatives. The module also looks at the impact on service delivery of financial planning, resource development analysis and financial performance monitoring with emphasis on inclusive budgeting.

MLGS 733 Local Government Human Capital Management

The module examines the critical role of the human resource in local economic development. Topics to be covered include the legal framework guiding human resource practice in the local Government sector, talent management in local authorities, employee resourcing, reward management, labour relations management, human resource development, staff motivation and retention, equality of opportunities, conflict management, as well as discipline and grievance handling procedures.

MLGS 734 Inclusive Service Delivery
The module is designed to inculcate in students an advanced understanding of participatory service delivery approaches and to provide them with effective tools and frameworks for performance improvement. The module examines opportunities that exist for local authorities to engage stakeholders in the delivery of public goods and services, where to look for opportunities, how to leverage assets and resources already in place, and identify what skills and abilities are required of them to be effective service delivery agents, and not to work as adversaries.

MLGS 736Environmental Policy and Management in Local Authorities

The module examines a range of policy tools used in sustainable environmental management including regulatory tools, market-based instruments, decentralised environmental management, and co-management. Challenges of human adaptation to climate change, pollution, land use patterns and the pressing need for sustainable future energy sources are highlighted.

MLGS 738 Housing Policy and Estates Management

The module examines best practices in housing provision and management in order to develop a framework for sustainable housing provision in local authorities. Housing delivery models which include central government provision and facilitation, public-private partnerships, cooperatives, and issues of real estate management, financing and development, sustainable housing development programming, sustainable housing design and management, and rural industrialisation will also be analysed from viability and sustainability perspectives.

MLGS 739 Research Methods and Statistics
The module helps students to develop an advanced conceptualisation of development problems and to assist them generate qualitative and quantitative solutions based on empirical evidence. The module equips students with practical research skills and advanced methodological expertise needed to come up with scientific answers to developmental problems and to feed these answers into the policy process so that they make a practical contribution to the development of social science research in general and local economic development in particular. The students will be able to apply relevant statistics in addressing development problems.

MLGS 740 Leadership, Governance and Accountability
The module examines leadership theories and models and reflects on how they impact on organisational development. The module assists students in developing a leadership toolkit for managers in local authorities and to determine how this toolkit impacts on organisational performance and accountability. The salient differences between leadership and management, and how these differences impact organisational performance, is highlighted.

MLGS 741 Policy Making and Governance
The module exposes students to key models and frameworks for public policy-making, and the interrelationships between policy formulation, policy execution, policy evaluation and revision and good governance. Emphasis will be placed on citizen participation in the policy problem identification and definition phase, through to the policy agenda-setting phase, and how these enhance stakeholder buy-in into the policy maintenance process.

MLGS 742 Intergovernmental Relations
The module exposes students to the legal framework that assigns roles and responsibilities to the respective tiers of government. It examines how central government, provincial and metropolitan councils and local authorities exercise cooperative governance in their effort to harmonise their policies and programmes, in further efforts to enhance democracy and maintain national unity, as each level exercises its constitutionally assigned service delivery mandate.

MLGS 831Gender and Development in Local Governance
The module examines the concepts of Women in Development and Women and Development to locate women at the centre of human development discourse. The module further seeks to develop within students the capabilities of using gender analysis in the formulation and design of gender-sensitive policies and programmes; and to equip them with the skills, knowledge and attitude necessary for mainstreaming gender in all local government programmes.

MLGS 832 Dissertation
During the third semester of the programme, each student will carry out a research project that addresses contemporary problems in the local government field. Students will work under supervision, to design, conduct and write their research dissertation.

MPHIL PROGRAMMES

- MPhil in Local Governance and Management

DEPARTMENT OF HUMAN RESOURCE MANAGEMENT

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN HUMAN RESOURCE MANAGEMENT (HHRM)

Duration:	4 Years Normal entry
	3 Years Special/ Mature Entry
Actual Credit Load:	540
Minimum Credit Load:	480
Maximum Credit Load:	540
Total MBKs Credit Load:	384
ZNQF Level:	8

1.0 PURPOSE OF THE PROGRAMME

The overall purpose of HRM therefore is to;

1.1 Develop a student who can create strategies, policies and procedures that enhance the achievement of the business strategy
1.2 To equip students with the necessary skills that enable them to enhance industrial harmony and productivity through employee commitment and loyalty.
1.3 To examine the emerging challenges in the corporate world in respect to HR issues
1.4 To develop students who are conversant with the labour market trends and dynamics.
1.5 To develop students with entrepreneurial skills given the current economic trends

2.0 ENTRY REQUIREMENTS

Normal entry: At least two A Level passes in accounting, economics, sociology, management of business and any other relevant subject.
Special entry: any relevant national diploma in line with ZNQF and at least five 'O' level passes.
Mature entry: five 'O' level passes including English and Mathematics, a diploma in Human Resource Management from a recognized institution or any other relevant tertiary qualification. The applicant should also have at least 5 years working experience in the relevant field.

3.0 PROGRAMME CHARACTERISTICS

The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Human Resource Manager, Human Resource Development Manager, Arbitrator, Human Resource Consultancy, Academia, Labour Officer, Occupational Health and Safety Officer, Industrial Relations Manager/ Officer, Training Officer, Payroll Administrator, Human Resources Administrator

Further Education: Masters studies in HRM, in Labour Relations and Human Resource Development

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertations, lecture notes, and field trips.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

1. Demonstrate knowledge and understanding of employee relations.
2. Identify and define different policies, systems and practices to ensure effective attainment of organisational goals.
3. Use technology applications in the human resource management function.
4. Apply acquired competencies in the establishment and functioning of Human Resource Management consultancy ventures
5. Communicate effectively and present information using multi-media to both experts and non-experts in the Human Resource Management industry

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Science Human Resource Management Honours Degree is a four-year programme.
7.2 Students go for work-related learning during the third level of study

8.0 PROGRAMME ASSESSMENT

8.1 Methods of assessment shall include continuous assessment, examinations, work-related learning supervision and dissertation.
8.2 The weighting will be computed as follows:
Continuous Assessment 40%
Examination 60%
Work-related learning is assessed based on the students' industrial placement report (30%), assessment by workplace supervisor (30%), assessment by academic supervisor (20%) and work-integrated placement report (40%)
8.3 Dissertation
8.3.1. After a dissertation has been submitted and marked, a student may be required to defend it before the Departmental Board of Examiners.
8.3.2. The highest mark that may be awarded to a dissertation submitted after the due date is 50%.
8.3.3. A dissertation that attains a failure mark within the supplementable range may be resubmitted within three months after the publication of results and the highest mark attainable shall be 50%.

9. 0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.
Honorary degrees will be awarded to individuals who have distinguished themselves in the field of Human Resource Management and community service. The Human Resource Management Department may offer the following degrees:

- Doctor of Human Resource Management

- Doctor of Human Capital Development

MODULE SYNOPSES

HRM 131 Management and Labour
The module serves as the basis for introducing students to key theories and concepts of the evolution of management and labour issues. At the end of the module, students are expected to understand the hostilities that exist between management and labour and be able to think critically, analyse the innate conflict between the two groups and come up with solutions for managing the conflict. Students will appreciate the origins of various approaches and models that shape the discipline of people management.

HRM 132 Principles of Economics
The module is intended to enable students to: Understand and appreciate basic economic principles. For example, students will be exposed to the principle of supply and demand and shown how this affects the management of the human resource.

HRM 139 Industrial Relations
The module is intended to enable students to; understand and appreciate the employment relationship; understand and appreciate the origins of industrial relations and the 'worker problem'; and understand the theoretical issues underpinning the collective bargaining role of trade unions.

HRM 141 Labour Economics
The module is intended to enable students to; examine how labour markets operate in practice, introducing the concepts of unemployment and wage rigidity; and analyse labour market theories to human resource management with a focus on the 'flexibility' notion.

PSY 132 Introduction to Psychology
Refer to the Department of Psychology.

HCS 115 Introduction to Information Systems
Refer to the Department of Information Systems

CS 101 Basic Communication Skills
Refer to the Department of Communication Skills

HRM 142 Organisational Communication
The module is intended to enable students to; understand the meaning and role of communication in an organisation with specific reference to the management of human resources; understand the different strategies which managers can use to enhance the effectiveness of communication in an organisation, understand the barriers to effective communication in an organisation and how to overcome them.

HRM 143 Training
The module is intended to enable the students to; understand and appreciate the training of employees, evaluate training and understand and assess the skills required in the organisations.

SOC 101 Introduction to Sociology
Refer to the Department of Psychology

HRM 144 Human Resource Management
The module is intended to enable students to understand and appreciate the origins and current role of human resource management and the academic debates around the future direction of the occupation. Students will appreciate the distinction between the Industrial Relations model and the HRM model concerning the relationship between workers and their unions on one hand and the management and owner of businesses on the other hand. The module exposes students to some of the key theories and approaches to HRM. It also explores the philosophy of Human Resource Management vis-a-vis Traditional Personnel Management.

HRM 149 Principles of Accounting

The module is intended to enable students to; have an appreciation of basic accounting principles, understand how accounting statements are prepared and be able to interpret them for decision making in the management of the Human Resource.

GSSS 201 Introduction to Gender Studies
Refer to the Department of Gender Studies

ENT 205 Entrepreneurship
Refer to the Department of Entrepreneurship

HRM 232 Organisational Behaviour
The module is intended to enable students to; understand and appreciate the behavioural and management science revolution, appreciate the various systems in organisations, analyse individual behaviour, motivation and leadership; and understand the meaning of organisational culture and how it influences the way workers behave in the organisation.

HRM 233 Human Resource Policy and Practice
The module is intended to enable one to understand the meaning and differences between human resource policies and procedures. Students will appreciate the nature and content of human resource strategies and how to develop them, e.g. employee resourcing, employee reward, etc. Students will familiarise with key human resource policy areas and the respective procedures.

HRM 234 Business Law
The module gives a thorough understanding of general principles of law and how companies should be run and directed. Human resource students will also be equipped with the skills necessary for good corporate governance practice. An understanding of case law and statute laws will also enable students to appreciate the use of judicial precedents in making correct judgements.

HRM 235 Qualitative Research Methods
The module is intended to enable students to; understand the techniques widely used in gathering, interpretation, analysis and presentation of data in social science research. It exposes students to qualitative techniques of research.

HRM 241 Labour Law
The module is intended to enable students to; highlight the basis and significance of the contract in the employment relationship. It enables students to analyse the contract of employment in terms of the legal regulations of economic activity within the labour market.

HRM 242 Quantitative Research Methods
This module introduces students to quantitative research methods. The module is aimed at providing a firm understanding of the fundamental principles of quantitative analysis, and a good foundation of knowledge of quantitative methods and their application to data.

HRM 243 Workplace Industrial Relations
The module is intended to enable students to; analyse real-life workplace industrial relations problems and cases and come up with practical and workable solutions. Students gain a broader understanding of the situation they are going to encounter during their work-related learning.

HRM 244 Occupational Health and Safety
The module is intended to enable students to appreciate the need for effective management of health and safety programmes in the workplace, conceptualize issues of environmental health and safety and occupational health, and examine various theoretical strands to issues of environmental and occupational health, identify and discuss different forms of health and subsequent occupational intervention strategies, outline various organizational stressors among employees in Zimbabwe and strategies for managing such, familiarise with various statutory requirements governing occupational health and safety and identify causes of occupational hazards and accidents and methods of dealing or preventing such.

PSY 432 Psychometrics
Refer to Department of Psychology.

HRM 245 Public Sector HRM

The module explores HR practices in governmental and quasi-governmental organisations like local authorities and parastatals. The role of government policy influencing such practices is articulated since the government provides the legal framework for such HR practices. The themes to be covered include the legal framework of HR practice in governmental and non-governmental organisations, recruitment and selection practices, staff retention practices, talent management practices, HRP, performance management, reward management, disciplinary procedure and organisational ethics.

HRM 246 Payroll and Benefits Administration

The module introduces students to the fundamental functions of the payroll, payroll-related legislation affecting organisations in Zimbabwe, the payroll cycle and the accounting treatment of payroll information. This module will improve the students' skills in payroll management and developing the payroll function of an organisation. As such this requires a diverse set of skills along with specific knowledge in accounting, payroll and legislative applications to ensure all aspects of the payroll cycle and compliance elements are met. This module will provide a solid knowledge of the payroll functions within the organisation and the skills to perform the payroll and accounting tasks for manual and computerised systems. The module will also look at industry trends and best practices related to the compensation, benefits and payroll functions within the organisation.

HRM330 Work- Related Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HRM341 Work- Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HRM342 Work- Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HRM343 Work- Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

.

HRM 431 Management of Change

The module is intended to enable students to; understand what change is and why it is important to manage it; understand the various models and types of change; understand the significance of change and how they can facilitate change in organisations and understand resistance to change and how to overcome it.

HRM 432 Strategic Human Resource Management

The module is intended to enable students to; understand what policies and strategies are and how they usually develop, describe the basic types of strategies and policies, show how strategies may be implemented in practice and suggest guidelines to help make strategies and policies in practice.

HRM 433 Leadership and Ethics

The module exposes students to various theories and approaches to leadership. It also enables students to appreciate the various ethical dilemmas leaders face in the work situation.

HRM 434 Labour Productivity

The expansion of trade, the globalisation of economies, and the emergence of new markets have made productivity a critical success factor for any country in the world. Productivity remains a tropical issue in academic circles and industry at large. The major concern of business in Zimbabwe today is to ensure that employees produce to acceptable levels and to enhance the shareholder value and wealth which in turn affect organisational effectiveness, individual well-being and societal well-being. Within the fluctuating labour market trends in Zimbabwe where the labour market is affected by nothing other than the laws of demand and supply, productivity issues remain topical. Unemployment levels are high, and wages are not linked to productivity. The module therefore seeks to equip students with the necessary knowledge of productivity, avail factors that determine productivity and understand how to calculate and measure productivity.

HRM 435 Human Resource and Organisation Development

The module examines human resource development and organizational development issues. It introduces students to the fundamental and current trends in Human resource and organisational development. The module offers a two-pronged approach by giving equal attention to both Human Resources and Organizational Development. It gives an overview of Human Resources Development issues like investment in HRD, management development, career planning, Human

Resource Development and continuous improvement. Issues on the organisational Development Process, Organisational Development process, Organisational Development intervention strategies, employee involvement and empowerment interventions, team development interventions, intergroup development interventions and quality and product interventions are also articulated. Finally, the module captures Human Resource and Organisational Development challenges.

HRM 441 Comparative Industrial Relations
The module is intended to enable students to; investigate the extent to which globalisation has brought about similarities in industrial Relations systems between countries and in particular countries in the SADC and EU and examine the difficulties in framing, interpretation and enforcement of social legislation.

HRM 442 Dissertation
Students carry out research on a topic of their choice concerning pertinent issues in Human Resource Management under the guidance of a supervisor. The dissertation should be under the Department Dissertation guidelines.

HRM 443 Gender and the World of Work
This module enables students to appreciate the impact of gender on how employees relate in the workplace. It analyses issues such as discrimination, equal opportunities, sexual harassment, gender and leadership, workers with family responsibilities, work-life balance etc. It also gives students an appreciation of the international legal framework concerning gender issues globally.

HRM 444 Electronic Human Resource Information Systems
The quality of decisions made about people and the quality of services provided by the HR department is largely dependent on the quality of information and records available. In this regard this module seeks to; expose students to the potential benefits of Information Technology (IT) as applied in a computerized human resource information system. The module will alert students to some of the problems affecting the use of IT in the management of human resources.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN HUMAN RESOURCE MANAGEMENT (DHRM)

Duration:	12 months 3 Years Special/ Mature Entry
Actual Credit Load:	180
Minimum Credit Load:	180
Maximum Credit Load:	240
Total MBKs Credit Load:	150
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The purpose of the programme is to provide the student with:

1.1 An understanding of contemporary theoretical foundations and analytical issues in the employment relationship.

1.2 An understanding of the strategic role of human resource management through the vertical and horizontal integration of HR activities.

1.3 The ability to conduct research informed by clearly articulated HRM theories or general management theories that promote effective human resource management.

2. 0 ENTRY REQUIREMENTS

At least a 2.1 pass in any relevant social science degree programme

3.0 PROGRAMME CHARACTERISTICS

The Post-Graduate Diploma in Human Resource Management (DHRM) is a two-semester part-time programme structured to meet human resource management needs in Zimbabwe, the region and beyond.

4. 0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates have career opportunities in a wide array of disciplines which include the following;

- Human Resource Management (Private and Public Sector)
- Management Labour Movement
- Research and Consultancy
- Teaching and Lecturing
- . Non -Governmental Organisations etc

Further education: Masters studies in HRM, in Labour Relations and Human Resource Development

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

1. Demonstrate skills in managing individual and collective relationships to ensure democracy in the workplace.
2. Analyse Human Resource Management systems and technological applications in business and industry.
3. Identify and define different policies and systems to attract and retain employees.
4. Identify problems in Human Resource Management and develop appropriate solutions.
5. Use appropriate research methods to create new insights into Human Resource Management.
6. Develop new Human Resource Development models and initiatives, policies and practices that enhance organisational effectiveness.
7. Communicate effectively and present information using multi-media to both experts and non-experts in the Human Resource Management industry

7.0 GENERAL PROVISIONS

7.1 The Bachelor of Science Human Resource Management Honours Degree is a four-year programme

8.0 PROGRAMME ASSESSMENT

Formal examinations will normally be held at the end of each semester.

8.1 Continuous assessment shall account for 40% of the overall assessment while the final examination will account for 60% of the overall assessment.

8.2 Marking Scheme and Diploma Classification. Refer to section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

DHRM 639	Sociology of Organisations	15
DHRM 640	Human Resource Management Consultancy	15
DHRM 641	Industrial Psychology	15

8. MODULE SYNOPSES

DHRM 631 Workplace Relations
The module considers an overview of the workplace relations in Zimbabwe and other countries. As a comparative study, the module enables the student to appreciate the origins of workplace I.R and how it shapes the current workplace relations. The module will also analyse all the parties in the employment relations, strikes, collective bargaining and the legal framework governing the employment relations.

DHRM 632 Accounting for Business
The module is designed to give students an understanding of the basic principles of accounting and their application to sole traders, partnerships, companies and non-profit making organisations and an introduction to the analysis and interpretation of financial records and statements.

DHRM 633 Strategic People Management
The modules aim to cover the very basic concepts in human resource management. It enables students to understand what policies and strategies are and how they usually develop. These strategies and policies will include reward management, health and safety, training etc. and how all these are linked to the attainment of organisational objectives.

DHRM 634 Training and Development
The module is aimed at making students appreciate the importance of investing in people/workforce. The module will also focus on the strategic development of the workforce and the learning organisation. In addition, the importance of training and approaches to training (training techniques) will be explored.

DHRM 635 Introduction to Economics
The module intends to enable students to understand and appreciate the importance of making decisions to create a product, decisions to create demand and supply and also decisions to create capacity.

DHRM 636 Research Methods
The module is intended to enable students to understand the techniques widely used in gathering, interpretation, analysis and presentation of data in social research.

DHRM 637 Organisational Dynamics
The module examines the individual and groups in organisations. It also covers motivation, learning theories, personality, stress, organisational effectiveness, decision -making and organisational classification.

DHRM 638 Research Project
The project involves research in the area of the students' interest. The student is expected to do practical fieldwork over a period of 3 months. The project is expected to be between 25-35 pages.

DHRM 639 Sociology of Organisations
The module examines industrial conflict, discipline and power in organisations, corporate cultures, organisational structures and how they impact employee performance.

DHRM 640 Human Resource Management Consultancy
The module explores trends and principles of ethical and profitable Consultancy in Human Management. The module will cover consultancy under the 3 main themes in HRM which are labour, training and general Human Resource Management. Approaches to consultancy and practical ways of consultancy will be highlighted.

DHRM 641 Industrial Psychology
The module enables students to understand how workers behave and try to cope with stressful situations. It also enables students to understand and appreciate the psychological variables affecting workers.

REGULATIONS FOR MASTER OF SCIENCE DEGREE HUMAN RESOURCE MANAGEMENT DEGREE (MHRM)

Duration:	18 months
Actual Credit Load:	288
Minimum Credit Load:	270
Maximum Credit Load:	360
Total MBKS Credit Load:	216
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

Given that employees are a key resource in the search for improved organisational performance, the programme provides an understanding of contemporary theoretical foundations and analytical issues in the management of human resources. The programme prepares students to develop a critical appreciation of how to manage, evaluate and advise on human resource and employment issues. The programme is designed in an integrated way and encourages critical awareness which is a pre-requisite for creative thinking.

2.0 ENTRY REQUIREMENTS

Normal Entry: An Honours degree in human resource management, Human Resource Development or Employment Relations, any relevant social science degree or qualification with a pass of an upper second class (2.1) or better.

Applicants possessing lower degree class may be considered on condition that they submit verifiable evidence of a minimum of two years of working experience.

3.0 PROGRAMME CHARACTERISTICS

The programme is 18 months long and intends to equip students with both academic and practical skills that enable them to work in the Human Resource Management (HRM) field through research and academic studies.

4.0 CAREER OPPORTUNITIES AND FURTHER STUDY

Human Resource Manager, Human Resource Development Manager, Arbitrator, Human Resource Consultancy, Academia, Labour Officer, Occupational Health and Safety Officer, Industrial Relations Manager/ Officer, Training Officer, Payroll Administrator, Human Resources Administrator

Further Education: DPhil studies in HRM, Labour Relations and Human Resource Development

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

1. Ability to demonstrate knowledge and understanding of employee relations that will enable organisations to achieve both operational and strategic goals.
2. Ability to apply resourcing strategies which encompass talent attraction and retention.
3. To use appropriate employee relations strategies such as mediation, and negotiation that address conflict and disputes in the organisation.
4. To create human capital development programmes that improve and sustain organisational performance through.
5. Ability to apply cost management tools and techniques to allocate financial resources and ensure effective managerial decision-making
6. Apply Human Resource Management core competencies for ethical governance of people in organisations.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Human Resource Management Honours Degree is an 18 months programme

8.0 PROGRAMME ASSESSMENT

Continuous Assessment: Written assignments, workshop reports, seminar and group presentations, in-class tests, and any other relevant assessments contribute 40% to the final mark.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations

9.2 A student must pass MHRM 740 to do MHRM 832 which is the dissertation.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

12. MODULE SYNOPSES

MHRM 731 Strategic Human Resource Management
The module considers the overall significance of HRM in moulding profitable organisations. It will cover the basic concepts underpinning HRM such as commitment, teamwork, and the evolution of HRM, the HRM Practices, the philosophy of HRM and the local and international context of HRM. It will also explore some topical contemporary issues in HR such as performance management, knowledge management and high-performance work systems.

MHRM 732 Employment Relations
The module considers an overview of employment relations in Zimbabwe. It looks at the definition of employee relations, the challenges facing employee relations in Zimbabwe, employee relations in a transitional environment, the Labour Act, Institutions for managing employee relations in Zimbabwe, the role of employee relations in Organisational effectiveness, the integrations of Human Resource Management with other HR functions, regional employee relations (SADC) and International employee relations.

MHRM733 Organisational Theory
The module examines industrial conflict, discipline and power in organisations, new forms of surveillance, corporate cultures, organisational structures and how they impact on employee performance and relations in organisations. This module lays a foundation for Organisational analysis and HR strategy taught in level 1.2 by introducing students to the fundamental theoretical perspectives of organisations.

MHRM 734 Marketing Management
The module exposes the students to the main concepts and theories of marketing management. Topics will include the marketing concept, the marketing environment, market segmentation, marketing planning, consumer and industrial strategies, product life cycle, advertising, sales promotion, personal sales management and the role of an HR Practitioner in marketing management.

MHRM 735 Ethics and Corporate Governance

The module explores the concept of ethics in management. It will analyse the question of ethics in all HR activities, the link between ethics in HR and employee relations, and the link between ethics in corporate governance and organisational performance.

MHRM 736 Sociology of Work and Employment
The module examines industrial conflict, discipline and power in organisations, new forms of surveillance, corporate cultures, organisational structures and how they impact employee performance and relations in organisations.

MHRM 737 Managerial Economics
The module explores the theory of Economics, Microeconomics, Labour Economics, the link between Economics and HR Strategy, International economics, and International political economy and their impact on international Human Resource Management. It also analyses the role of Government economic policy in Human Resource Management.

MHRM 738 Reward Management
The module analyses the concept of Reward, the Total Reward model, the link between Performance and reward, the Reward Strategy, Reward management in a hyper-inflationary environment, and International issues in reward management.

MHRM 739 Organisational Analysis and HR Strategy
The module analyses issues to do with Strategic Human Resource Management. It will analyse the concept of Strategic HR, its significance and its influence on Overall Organisational strategy. It also analyses the contribution of HR to overall organisational performance and some generic HR Strategies.

MHRM 740 Research Methodology and Statistics
The module serves as a thorough grounding for practical research in Social Sciences. It will encompass computers in the analysis of research findings. Students will gain a deeper appreciation of qualitative ethnographic research methods and quantitative statistical analysis. Students will be exposed to various types of research such as evaluation research, action research, case studies, ethnography etc. Students will also gain insight on how to publish research findings.

MHRM 741 Business Finance
The module seeks to provide a good grounding on the key principles and approaches in financial management necessary for financial decision-making. It will also look at the role and significance of the HR function in financial management in an organisation and vice-versa.

MHRM 742 Leadership
The module analyses the concept of leadership, the role of and significance of leadership in an organization, the various leadership styles, international and contemporary issues in
Leadership.

MHRM 743 Human Resource Consultancy
The module explores trends and principles of ethical and profitable Consultancy in Human Resource Management.

MHRM 744 Managing Change
To expose participants to the nature of Organisational Change and the role that HRM plays in the Management of Change and complexity in organisations. The module is divided into two parts, Organisational Change and the role of HR in the Management of Change. Organisational Change is largely concerned with the various models that will guide the student in the understanding of change, the process of managing change and the associated barriers/obstacles. The other part of the module is concerned with the role of HR in facilitating change in organisations. Finally, the student will be expected to demonstrate using Organisational Cases an understanding of the practice of Managing Change in Organisations.

MHRM 745 Human Resource Management Information Systems
The module explores the impact of information technology in modern Human Resource Management. It further looks at the shift to paperless HR Information Systems and analyses in-depth current commercial HR Information Systems and Packages.

MHRM 831 Strategic Human Resource Development
The module starts by reviewing elementary Human Resource Development concepts such as learning theories, Career Management, and Succession Management. It then focuses on the strategic role of HRD in the form of HRD Strategy, organisational development, managing learning and contemporary and international issues in Human Resource Development.

MHRM 832 Dissertation
Students carry out research on a topic of their choice concerning pertinent issues in Human Resource Management under the guidance of a Supervisor. Research issues should focus on contemporary issues that add value to industry at large, with industrial harmony, increased productivity, worker engagement, performance and other areas.

REGULATIONS FOR MASTER OF SCIENCE IN HUMAN CAPITAL MANAGEMENT DEGREE (MHCD)

Duration:	18 months
Actual Load:	288
Minimum Credit Load:	270
Maximum Credit Load:	360
Maximum MBKs credit Load:	216
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME
To provide both learners and practising human capital professionals with advanced knowledge and in-demand skills that enhance their capabilities to solve complex business challenges through the development and retention of human capital.

2.0 ENTRY REQUIREMENTS
Normal Entry: An Honours degree in human resource management, Human Resource Development or Employment Relations, any relevant social science degree or qualification with a pass of an upper second class (2.1) or better.

Applicants possessing lower degree class may be considered on condition that they submit verifiable evidence of a minimum of two years of working experience.

3.0 PROGRAMME CHARACTERISTICS
The programme is 18 months long and intends to equip students with both academic and practical skills that enable them to work in the Human Capital Development (HCD) field through research and academic studies.

4.0 CAREER OPPORTUNITIES AND FURTHER STUDY
Human Resource Manager, Human Resource Development Manager, Human Resource Development Consultancy, Academia, Training Officer,

Further Education: DPhil studies in HRM, and Human Resource Development

5.0 PROGRAMME DELIVERY
Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES
On successful completion of this programme the graduate will be able to:

- 6.1 Trace the various philosophical and practical origins of the Human capital Development field as both a science and practice.
    - Design various instructional plans and tools appropriate for diverse business settings.
    - Analyse the contribution of the links between strategic human resource management and human capital development on competency development and retention.
    - Measure and evaluate the effectiveness of several human Capital development technologies and metrics.
    - Plan and execute corporate strategy leveraging on specific human capital potential and talent development. Design various human capital development plans and systems that maximize human potential and productivity.
    - Solve complex performance-related challenges through innovative productive development and business research.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Human Resource Capital Development Degree is 18 months programme

8.0 PROGRAMME ASSESSMENT

Continuous Assessment: Written assignments, workshop reports, seminar and group presentations, in-class tests, and any other relevant assessments contribute 40% to the final mark.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13. PROGRAMME STRUCTURE

Level 1 Semester 1

14. MODULE SYNOPSES

MHCD 750Foundations in Human Capital Development

While the module generally extends learners' appreciation of the principles in human resource management, it specifically introduces them to the philosophical and theoretical foundations underpinning human capital development and how their relevance to the real industry world.

MHCD 751Human Capital Development Policies and Practices

In this module students will be equipped with the skills and knowledge necessary to effectively develop human capital development plans, practices, policies and programmes in the context of global market and Zimbabwe in particular. Students will also review practical situations and get the chance to practise a range of human capital development practices.

MHCD 752Talent Management and Career Planning

The module extends learners' understanding of the importance of talent and career management in achieving organisational success. It equips learners with knowledge of the current international talent and career management trends and practices as drivers for effective human capital development.

MHCD 753Leadership and Management Development

The module focused on how leaders and managers in organisations can play a vital role in developing and shaping the careers of their staff. The course focus on how leadership theory, style and practices shape the development of human capital. The focus will also be on leadership complexities and how they impact human capital development in organisations.

MHCD 740Research Methodology and Statistics
The module serves as a thorough grounding for practical research in Social Sciences. It will encompass computers in the analysis of research findings. Students will gain a deeper appreciation of qualitative ethnographic research methods and quantitative statistical analysis. Students will be exposed to various types of research such as evaluation research, action research, case studies, ethnography etc. Students will also gain insight on how to publish research findings.

MHCD 755 Human Capital and Organisation Development
The focus of this module is to facilitate student's appreciation of the symbiotic interaction between human resource development and organisation development and it influences organisational effectiveness. Students will be allowed to analyse various human capital development policies and strategies related to various OD interventions for the enhancement of organisational effectiveness.

MHCD 756Technology and Human Capital Metrics
The module extends learners' understanding of human resource metrics and analytics. In particular this module helps participants to apply various technologies in implementing, measuring and evaluating specific human capital development interventions in supporting strategic business decisions.

MHCD 757Organisational Learning and Knowledge Management
In this module, students develop an understanding of how organisational learning and knowledge management impact human capital development and organisational sustainability.

MHCD 758Instructional Design
This module advances learners' knowledge and skills in developing learning strategies and designing instructional and educational tools for specific workplace learning individuals and groups. The module specifically helps learners to design, implement and evaluate effective instructional materials for diverse work settings.

MHCD 735 Ethics and Corporate Governance
The module explores the concept of ethics in management. It will analyse the question of ethics in all HR activities, the link between ethics in HR and employee relations, the link between ethics in corporate governance and organizational performance

MHCD 831Strategic Human Capital Development
This module introduces students to Strategic Human Capital Development. The course focuses on aligning human capital development with the strategic direction of the organisation. In the module, learners will be given opportunities to come up with strategies on how to solve human capital development problems affecting industry today. By doing so, learners will develop the skills necessary to support the organisational strategy and its effectiveness.

MHCD 852Dissertation
This module primarily consolidates learners' knowledge of research methodology and protocols through engaging in independent data collection, presentation and analysis and production of a publishable dissertation report.

MPHIL PROGRAMMES

- MPhil in Human Resource Management
- MPhil in Human Capital Development

DPHIL PROGRAMMES

- DPhil in Human Resource Management
- DPhil in Human Capital Development

DEPARTMENT OF MUSIC BUSINESS, MUSICOLOGY AND TECHNOLOGY

REGULATIONS FOR BACHELOR OF SCIENCE IN MUSIC BUSINESS, MUSICOLOGY AND TECHNOLOGY HONOURS DEGREE (MBMT)

Duration	4 years
Minimum Credit Load	480
Maximum Credit Load	530
Maximum MBK Credit Load	384
ZNQF Level	8

1.0 PURPOSE OF PROGRAMME

The programme intends to:

1.1 expose students to current business and technical skills required in the music industry globally.

1.2 enable students to explore through practical hands-on experience in setting up, manipulating of audio and video recording, and live sound reinforcement equipment.

1.3 expose students to music entrepreneurship, marketing, entertainment, performance, and management skills relevant in the music industry globally.

1.4 enhance academic research skills through theory and practice in music business musicology and technology.

2.0 ENTRY REQUIREMENTS

2.1 *Normal Entry*

5 'O' Levels including English language and 2 relevant 'A' levels subjects Candidates with 'O' Level music have an added advantage.

2.2 *Special Entry*

A relevant certificate/ Diploma in line with ZNQF

2.3 *Mature Entry*

5 'O' level, At least 25 years or more for males and 23 for females with relevant experience

3.0 PROGRAMME CHARACTERISTICS

Areas of Study: Music Business; Musicology; and Music Technology.

Specialist Focus: Music business, musicology and technology studies with special emphasis on the application of composition, performance and ethnomusicological concepts.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on practical aspects.

Distinctive Features: The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Bachelor of Science in Music Business, Musicology and Technology graduates may become acousticians, audio/video engineers, applied ethnomusicologists, ethnomusicologists, audiologists, composers, concert organizers, curators, copyright administrators, disc/video jockeys, live sound or studio mastering/mixing engineers, instrument designer/manufacturers, instrument repairers, lyricists, music agent/critics, music director/marketers, editors, music journalists, music librarian/archivists, music distributor/marketers, music educator/instructors, music license administrators, music performers, music programmers, music promoters, music publishers, music salespersons, musicologists, music stores managers, radio/television broadcast technicians, researchers, stage managers, talent managers, technical writers,

Further Studies: Master of Musicology, Master of Music Composition, Master of Music Performance, Master of Music Technology, Master of Ethnomusicology, Master of Music Business.

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, laboratory activities, seminars, group work, field-based activities, work-related learning, dissertation, individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, laboratory reports, field reports, seminar presentations, work-related learning reports, dissertations, continuous assessment.

6.0 LEARNING OUTCOMES

On successful completion of the programme, graduates should be able to:

- High-end abilities in creating, performing, sight reading, interpreting, critiquing, research
- Appreciation of worldwide musical practices
- Heightened musical proficiency
- Requisite musicianship qualities for a range of musical traditions
- Ability to record and produce music
- Ability to manage musical events
- Ability to innovate in the area of music technology
- Appreciation of current business practices in the music industry
- Ability to engage heritage-based indigenous knowledge systems and skills in tackling issues to advance commercialization and national development
- Ability to innovate, design and manufacture indigenous African and Western musical instruments to create employment.

7.0 General Provisions

Refer to the University's General Regulations.

Honorary degrees will be awarded to individuals who have distinguished themselves in the area of music. The department may offer the following honorary degrees:

- Doctor of Music
- Master of Music

8.0 PROGRAMME ASSESSMENT

Continuous Assessment

Written assignments, workshop reports, clinical placement reports, seminar and group presentations, field visit reports, studio work, in-class tests, and any other relevant assessments contribute 40% to the final mark.

Written Examinations:

End-of-semester examinations constitute 60% of the final mark

Other:

c) Dissertation/Research Project is assessed on the basis of a research project (75%) and Oral presentation (25%). Alternatively, it can be a Performance Recital accompanied by a comprehensive write-up.

d) Work Related Learning is assessed based on the student's Placement Report (40 credits) Industrial Attachment report (30 credits), assessment by Work supervisor (30%) and assessment by Academic supervisor (20%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of the general regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the General Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

MBMT132 Theory of Western Music

The module is intended to develop the students' fundamental knowledge and skills to practically interpret and write notations to music in terms of its rhythm, pitch, scales and keys up to seven sharps and seven flats up to ABRSM Grade 3. The module explores concepts related to musical space, including intervals, triads, chords, cadences, modulation and transposition. It further stretches the study of the theory of Western art music through the study of major, minor and chromatic scales in as much as they relate to music performance.

MBMT133 History of Western Music

The module equips students with the knowledge of Western music history and form.

MBMT134 Musicology

The module introduces students to the discipline of musicology by focusing on its nature, scope, method and significance. It examines the criticism of the discipline for its exclusiveness drawing from the scientific approach applied to it, which provides the discourse grounded on empirical observation. The module also explores the social power upon which traditional musicology was premised in conjunction with its contestation in postmodern thought to account for the value of the discipline in the present and the future.

MBMT135 Performance Practice: Idiophones and Membranophones

The module equips students with foundational knowledge about and basic performative skills in demonstrating a general understanding of self-sounding musical instruments as well as those that use membranes as sound-producing devices. The students shall be expected to display elementary proficiency and musicianship qualities that resound with the conventions of various musical practices when manipulating the studied instruments in solo and ensemble performances.

MBMT136 Theory of Western Music 2

The module explores concepts related to musical space, including intervals, triads, chords, cadences, modulation and transposition. It further stretches the theory of music through the study of minor, and chromatic scales in as much as they relate to music performance up to ABRSM Grade 6.

MBMT 137 Ethnomusicology

The module studies the origins and definitions of ethnomusicology. It also explores different approaches to the study of the discipline that has been grounded in theories drawn from various disciplines including anthropology, psychology, sociology, philosophy and biology as propounded by different scholars. This module further focuses on theories for ethnomusicology that account for its dual nature as a method (Applied Ethnomusicology) and a field of study (Theory for Ethnomusicology). It also exposes students to discussions that focus on the application of selected theories to the study of particular music genres for them to understand what the ethnomusicological theoretical framework entails.

MBMT 138 Music Law and Ethics

The module explores music law and ethical issues embracing musical values ranging from the imagined as enshrined in intellectual property rights which relegate indigenous music to the public domain to the music that is communally composed and performed as articulated in indigenous musical practices. It challenges students to think of and propose interventions to the ravaging piracy within the music industry locally, regionally and internationally.

MBMT 139 Acoustics and Live Sound Reinforcement

The module explores the scientific and practical experience of students to listen, define and analyse the quality of musical sound, and explore audio frequency identities through critical listening to a wide variety of musical genres from different musical cultures of the world. The students are exposed to the production, propagation, perception and characteristics of sound in enclosed environments of various shapes and sizes, and how to apply scientific knowledge of acoustics to solve and treat problems of sound in enclosed spaces.

MBMT 140 Music Tourism and Culture

The study examines the connection between music tourism and culture, the benefits of music tourism to the economy, and the value of music in the tourism sector, it exposes students to forms of music tourism and how to exploit them. It enables students to explore tourism organisations, start-ups of music tourism centres and national monuments.

MBMT141 Music and Community Development

The module encourages students to discuss issues around community development programmes, coordination of music conferences, festivals, shows and how these enhance the music industry. It intends to equip students with skills to organize community-based programmes tailor-made to revive and sustain music in the community. It also exposes students to various ways of preserving the dying musical legacies and promoting talent in the community.

MBMT142 Performance Practice: Voice and Aerophones

The module equips students with foundational knowledge about and basic performative skills in demonstrating a general understanding of the human voice and other musical instruments which use air as sound-producing devices. The students shall be expected to display elementary proficiency and musicianship qualities that resound with the conventions of various musical practices when manipulating the studied instruments in solo and ensemble performances.

MBMT 231 Performance Practice: Chordophones

The module equips students with foundational knowledge about and basic performative skills in demonstrating a general understanding of musical instruments that use strings as sound-producing devices as well as electric instruments. The students shall be expected to display elementary proficiency and musicianship qualities that resound with the conventions of various musical practices when manipulating the studied instruments in solo and ensemble performances.

MBMT 232 Music Technology

The module provides students with a solid foundation and basics of audio technology through the use of computers and dedicated software packages, audio interface, microphones, Music Instruments Digital Interface (MIDI) protocol, and direct recording. Candidates will be required to engage in signal processing and plug-in applications in mixing, mastering, and post-production.

MBMT 233 Zimbabwean Indigenous Music Styles and Genres

The module lays the foundation for the students' academic study of Zimbabwe's indigenous music and dance genres that exist in oral tradition. It explores the historical background, performance practice, role, function and the different geographical locations and different ethnic groups of Zimbabwe in which they are performed. It equips students with theoretical knowledge and performance techniques in singing, dancing, drumming, and clapping with different songs and instruments accompanying the dances. The thrust of this module is to develop students' skills in presenting Zimbabwean dances by following their specific dance patterns and structure.

MBMT 234 Music Management and Marketing

The module relates to the management and marketing of business in the entertainment and music industry. It equips students with the requisite knowledge and skills for managing musical events, artists, and musical products. It enlightens students on aspects of designing musical contracts and business plans.

MBMT 235 Performance Practice Electrophones

The module introduces students to elementary keyboard techniques and musicianship, aiming at laying a formidable foundation for a professional career in keyboard performance. Students are exposed to key theoretical aspects necessary to guide them in developing a repertoire of songs and pieces in various forms and styles. The students shall be expected to display elementary proficiency and musicianship qualities that resound with the conventions of various musical practices when manipulating the studied instruments in solo and ensemble performances

MBMT 236 Performance Practice: Instrument(s) of Minor Specialisation

The module develops students' interpretive knowledge about and intermediary performative skills in demonstrating a deeper understanding of musical instrument(s) of their choice from those they were exposed to in the preceding semesters. The students shall be expected to display average proficiency and professional musicianship qualities that

resound with the conventions of various musical practices when manipulating the studied instrument(s) in solo and ensemble performances.

MBMT 237 Music Innovation, Creativity and Entrepreneurship

The module approaches entrepreneurship as primarily a creative discipline. It nurtures learners to develop a positive mindset, knowledge, and insights required to pursue an entrepreneurial career, whether as the steward of their career or as the founder of a new business in any creative music field. Throughout the module, parallels will 35 be drawn between musical creation and organization with the entrepreneurial process as a way of embracing popular ideas on how to start, establish, and run a music business. This module affords learners the opportunities to connect with the best practice and most up-to-date musicians in the music industry as they interact, share, feel, and learn through hands-on activities.

MBMT 238 Research Methods

The module develops students' knowledge of research designs on which social science research, which is targeted at providing a deeper understanding of areas of concern on musical arts as human behaviour, is premised. It explores the systematic interaction between theory and data elicited through literature review and the use of particular research techniques. The module equips students with a range of methods in order to interpret a vast breadth of social phenomena embedded in musical arts. It also challenges the students to construct research proposals on selected fields of musical study.

MBMT 239 Music Methods

The study seeks to expose students to various modes of teaching music and apply these to the Zimbabwean situation in primary, high schools and tertiary institutions. The module covers the foundations of music (philosophical, psychological and sociological issues), various traditional and modern methods of teaching music, scheming, planning, curriculum issues and practical instruction.

MBMT 240 Music Production

The module exposes candidates to theory and practical music production processes taking care of various recording models. It is coupled with applications of mixing and mastering principles of the 21st century about different music styles, and genres. The study engages in the practical use of hardware and software to produce music to commercial standards. Students will have to pursue individual research projects under supervision and gain experience in audio production in a professional work environment.

MBMT 330 Work-Related Learning Placement Report

As part of their examination, students will be expected to submit a comprehensive report of how they would have settled at the institution.

MBMT 341 Work-Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

MBMT 342 Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

MBMT 343 Employer's Assessment Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

MBMT 431 Performance Practice: Instrument of Major Specialisation

The module challenges students to broaden research on musical instruments to exhibit innovative thinking about and highly technical skills in either instrument of Minor Specialisation or the construction of their own musical instrument. The students shall be expected to display advanced proficiency and high-end musicianship qualities that resound with the conventions of various musical practices when manipulating either instrument of Minor Specialisation or their own constructed instrument in solo and ensemble performances.

MBMT 432 Popular Music

The module engages students in the study of the modern and the postmodern popular music of the contemporary era. It exposes students to a broader view of contemporary music by gleaning it from a non-Western perspective informed by its pluralist nature. The module discusses the characteristics of contemporary music of various nations around the world in conjunction with its cultural inclinations as well as its creators, the performing artists.

MBMT 433 Compositional Techniques

The module focuses on the practical application of compositional theories. The students will engage in advanced practical projects using compositional techniques in a variety of musical styles/genres. Students are required to present and demonstrate their mastery of such skills in a mini-portfolio. The module also equips students with skills in arranging 36 musical scores either in staff or tonic solfa notation for choral performances and/or other musical instruments.

MBMT 434 Theory of African Music

The module focuses on the normative grammar of creativity rationalized and prescribed by various African musical cultures. Students are exposed to culturally authoritative analysis and interpretation of oral musical cultures informed by the intrinsic theory embodying meaning, form and social organization, philosophy of life and world view. Both pre-colonial and post-colonial theories related to the study of African musical arts will be extrapolated. The module will merge the theoretical discussion of the music of Africa with the performative and experiential perspective to assist students in developing the sense and meaning of the musical heritage.

MBMT 435 Performance Practice: Concert Recital

The module challenges students to engage with prominent artists as a means of organising and managing their own solo and ensemble recitals highlighting the hard work of coordinating and rehearsing their works of art during the semester. The concert recital programme and the advert for publicizing it will constitute the coursework assessment whilst the solo and ensemble performances by each student will comprise the examination mark.

MBMT 436 World Music Cultures

The module explores the histories of non-Western musical traditions, which have been defined by the Europeans as African and exotic or Oriental musical practices, spanning from the pre-colonial through the colonial to the postcolonial periods. The module focuses on the African and Asian theoretical models of music connected to, but not limited to the historical, social, and cultural backgrounds, traditions, and the interrelations between music, language and dance among different culture owners.

MBMT 437 Interpretation of Musical Practices

The module intends to equip students with knowledge and skills on how to analyse and interpret musical practices of different communities around the world. It explores the expressive motivation behind musical structures and ways in which listeners and performers interpret musical works and practice. It incorporates theories of interpretation and aesthetics. It covers issues of musical meaning, textual analysis, coding system, expression, musical motion and the role of practice in the acquisition of skills.

MBMT 438 Dissertation/Project Portfolio/ Performance Recital

The student is expected to submit a dissertation based on concepts learnt theoretically in the Research Methods module. The length of the dissertation shall be 20 000 to 25 000 words. The dissertation carries double the credits of a module. For practical projects which include composition, studio work and performance including the submission of a portfolio or recital which must be accompanied by a write-up of 10 000 to 15 000 words. Composition must include three creative works, recording studio project should include a complete album with at least five tracks and a performance recital shall last for an hour which must be accompanied by a detailed report.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN MUSIC (MMB)

Duration:	18 months
Actual Credit Load:	270
Minimum Credit Load:	270
Maximum Credit Load:	330
Minimum MBKsCcredits:	234
ZNQF Level;	9

1.0 PURPOSE OF THE PROGRAMME

1.1 The programme aims to equip students with comprehensive, theoretical and practical knowledge, analytical skills and competencies in the following specialisation areas of music; Applied Ethnomusicology, Music Composition, Music Business, Music Performance, and Music Technology. Students will graduate with an MSc in Applied Ethnomusicology, an MSc in Music Business, an MSc in Music Composition, an MSc in Music Performance and an MSc in Music Technology.

1.2 Enhancing the students' ability to identify, analyse and propose solutions to complex issues and problems drawing systematically and creatively on the principles, theories, practices and methodologies of Applied Ethnomusicology, Music Composition, Music Business, Music Performance, Music Technology and Musicology.

1.3 Developing an understanding of advanced industrial sustainability practices and to reflect their professional practice.

1.4 Developing powers of critical appraisal and analytical thinking to come up with appropriate strategies to meet developmental efforts, especially concerning Zimbabwe, the SADC and the world at large.

1.5 Providing knowledge and skills to effectively and proficiently operate in the music industry as academics, entrepreneurs and researchers.

2.0 ENTRY REQUIREMENTS

2.1 **Normal Entry**: Any relevant first degree from a reputable institution with at least a 2.2 class or its equivalent.

3.0 PROGRAMME CHARACTERISTICS

3.1 **Areas of Study:** Music.

3.2 **Specialist Focus:** Applied Ethnomusicology, Music Business, Music Composition, Music Performance and Music Technology.

3.3 **Orientation:** Research and innovation-oriented. Teaching and learning are professionally oriented and focused on practical aspects.

3.4 **Distinctive Features:** The programme is unique in that it gives room for students to specialise in the areas of Applied Ethnomusicology, Music Business, Music Composition, Music Performance and Music Technology which help in the development of the music industry.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 **Employability:** Careers are in the areas of recording studios, music management, music marketing, music instruction, performance, music promotion, music copyright, music journalism, music critique, music video production, instrument design and construction, music adjudication, choral work, music composition and radio and television broadcast personnel.

4.2 **Further Studies:** Doctoral studies in Music.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods:** Lectures both face-to-face and online, music performance activities, seminars, group work, research projects, individual independent study, guest seminars and talks from visiting music practitioners.

5.2 **Assessment Methods:** Continuous assessment in the form of written and practical assignments, field reports and seminar presentations. Examinations constitute practical and written work.

6.0 LEARNING OUTCOMES

6.1 By the end of the program a graduate should be able to:

- have broad knowledge, skills and competencies in the area of music relevant to various employment capabilities and careers in the world of work.
- have the versatility required for community engagement to anticipate and adopt relevant policies in light of new theories, technology and paradigms.
- identify, analyse and propose responses to complex issues and problems drawing systematically and creatively on the principles, theories and methodologies of music.
- exhibit critical appraisal and analytical thinking in developing appropriate strategies to engage in the music industry.
- apply modern technologies to specific areas of specialisation in music.
- develop policies and proper solutions to extant challenges in the music industry.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Music Degree is an 18-month program.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous Assessment:
- 8.1.1 Theoretical Modules 40%
- 8.1.2 Practical Modules 50%

8.2 Written Examinations:
- 8.2.1 Theoretical Modules 60%
- 8.2.2 Practical Modules 50%

8.3 Research Project; Written Report 75%, Oral presentation 25%.

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations.

10.0 FAILURE TO SATISFY EXAMINERS

10.1 Refer to Section 9 of the General Regulations for Postgraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

11.1 Refer to Section 10 of the Faculty Regulations.

12.0 DEGREE WEIGHTING

12.1 Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

Except for level 2.1, students will take TWO core modules and THREE modules from any one of the areas of specialization shown below:

13.1 Applied Ethnomusicology
13.2 Music Business
13.3 Music Composition
13.4 Music Performance
13.5 Music Technology

LEVEL 1 SEMESTER 1

	Credits
Core modules	
MAM 701 Research Methods in Music	18
MAM 702 Applied Music Theory	18
Specialisation in Applied Ethnomusicology

14.0 MODULE SYNOPSES

MAM 701 Research Methods in Music
The module examines the research methods appropriate for both qualitative and quantitative methods including the philosophical underpinnings of research methodology, proposal design, searching and literature review, ethical issues in research, research instruments design, experimental and quasi-experimental designs, qualitative analysis and statistical analysis of data.

MAM 702 Applied Music Theory
The module presents the principles of practical-oriented music theory which serve as ingredients of the art of music so that structure, design, and language are made clear and accessible to the music scholar. The module examines tonal configurations in music, providing the theoretical roadmap for applied ethnomusicologists, and serving as a pivot for performers and music producers to perform and compose. Choreo-musicology necessitates choreo-musical analysis which focuses on the relationship between dance and music, and relies on applied music theory to enable the transcription and notation of dance movements. Students engage in hands-on tasks to experience the application of music theory in the field of music, therapy and film music.

MAE 703 Theories of African Music
The module engages in scholarly discourses that embrace different paradigms and theories in and of African Music, emphasising on the field's interdisciplinary nature. Students are expected to relate their discussions to the Zimbabwean, African, and World situation. Students are to contribute significantly to the creation and development of indigenous knowledge systems concerning music in and as culture.

MAE 704 Ethnographic and Video Documentation
The focus of this module is to assist students in describing the true nature of reality through the objective recording of facts and images. More importantly, the module equips students with camera and editing skills to enable them to film rituals or any other music-related performances in preserving indigenous music or other forms of music and generate audio-visual data for musical transcription and analysis.

MAE 705 Public Sector Ethnomusicology
The module covers knowledge of policy formulation issues and debates relating to indigenous music, and practical experiences of and assistance to arts organisations. It covers the civic role of arts and culture in culture policy debates, community project design, development and implementation of international and national copyright protection of indigenous music and folklore, protection and liabilities of contractual arrangements related to depositing, licensing and distribution of musical sound and audio-visual recordings.

MAE 706 Financial Literacy in the Music Industry
The module focuses on the financial literacy of the cultural industries. The module inducts students in financial issues of the creative cultural industries. It handles issues of financial planning, budgeting, accounting, investment, contract negotiation, management of funds and trustee/ staff relations in the context of the arts to help students develop critical skills to survive in the cultural industries. Emphasis is on how musicians can financially benefit from their intellectual property in the contemporary era.

MAM 707 Innovation and Entrepreneurship in Cultural and Creative Industries
The module will create students with a self-employment thrust. Manufacturing is one great employment booster hence it is the thrust of this module. The module takes cognisance of the new norm caused by these calamities of recent times. The module prepares students to tackle enterprises such as being music bloggers, YouTubers and Tik-Talkers where they make money in their homes because of the new norm. Emphasis is on how musicians can survive in various permutations in the post-modern era and how they can manage to be creative and innovative.

MAE 708 Paradigms in Ethnomusicology
The module explores the paradigm shift in Ethnomusicology through changes in approach, and use of recording technology in music archiving, preservation, and dissemination. The module also focuses on how Ethnomusicology has been remodelled over the years. Students will present papers at seminars and workshops. Students will undertake practical projects and create a music documentary accompanied by an academic progress report.

MAE 709 Musical Instrument Museology
This module involves students studying the museology of musical instruments, their organology and principles of construction in a scientific analysis. Students are required to apply their knowledge through a practical and real-life Music Museum/Archiving mini-project.

MAE 710 Contemporary Issues in Applied Ethnomusicology
The module focuses on issues of Applied Ethnomusicology in the contemporary period. Emphasis is on how ethnomusicology is surviving in various permutations in the post-modern era and how it has managed to be in harmony with cosmopolitanism. The module will also interrogate the new foci and methods that have emerged recently in Applied Ethnomusicology.

MAE 711 Transcription and Analysis
The course covers issues of transcription and analysis of music from different cultures. The modes of transcription will range from Western to African. Students will be challenged to innovate and conjure up their own homegrown methods of transcribing music from their own cultural traditions as well. The module aims at equipping students with skills that spell out musical aspects like form, melody contours, harmony, singing pattern and instrumentation.

MMB 703 Music Business Entrepreneurship
This module equips students with a generic understanding of music business entrepreneurship and its place in the creative economy. Further, it gives candidates a critical evaluation of entrepreneurial business innovations in the creative industry structures critical to the development and promotion of the music industry. This fosters an understanding of the music industry's potential contribution to the national economy. The candidates will be exposed to the purposes and function of corporate and social responsibilities for business entities within and beyond the Zimbabwean context. Students will undertake practical projects and create a portfolio accompanied by an academic process report.

MMB 704 Creative Economy Financial Management
This module equips students with financial management skills specific to the music business and the creative economy at large. The students will be able to understand the financial dynamics involved in running legal music business ventures. The module emphasises the financial modalities related to financial planning, taxation, budgeting, record keeping, balancing and expenditure key to running successful music businesses. Students will undertake practical projects and create a portfolio accompanied by an academic process report.

MMB 705Music Business Planning
The module equips students with skills to design diverse music business plans for income generation in all three music industry sub-sectors. Students learn how to write, implement, assess and evaluate music business proposals following trends in the local, regional and global music industries. Students will be taught how to form and register a company, patent, remit taxes, maintenance of accounting books for the music business and also run the day-to-day business requirements. Students will undertake practical projects and create a portfolio accompanied by an academic process report.

MMB 706Information Technologies in Music Business
The module entails the use of information technology in conducting music business. This involves using relevant technologies in writing, composing, record keeping, storage, dissemination of musical and other data, and presentation of seminars, papers and workshops. Students will undertake practical projects and create a portfolio accompanied by an academic process report. Students will create websites as repositories of information for marketing upcoming events, music products and services.

MMB 707Zimbabwe Music Industry
This module involves students studying the Zimbabwean Music industry in both pre and post-independence Zimbabwe. Students are required to have an informed understanding and appreciation of the current trends in the industry within the general scope of the creative arts sector.

MMB 708Music Marketing
This module critically evaluates current music marketing practices, theories and concepts. It assesses the technological impact on marketing musical products and services from mainstream media to social media in the local, regional and global

contexts. It critiques case studies of industry guest speakers and real-life situations exploring various marketing strategies and challenges involved in music promotion in all music industry sectors.

MMB 709 Arts Management
This module equips students with relevant skills for managing the arts. It covers the management of music business ventures and arts organisations ranging from organising and hosting musical events through social gatherings and fund-raising activities. Students will be expected to identify and apply theories that inform the running of arts organisations and management of sub-sector-specific music ventures.

MMB 710Intellectual Property Rights Management
This module entails a critical awareness of the various issues around Intellectual Property (IP) and copyright management in the three main music industry sub-sectors. It enables students to critically construct and evaluate contractual agreements that bind the industry's operations and are central to the creative economy. The module covers IP in the context of diverse works such as songs, master recordings, videos, photos, writings, knowledge, the expression of ideas, prototypes and more in all three music industry sub-sectors.

MMP 703 Solo Performance
The module prepares candidates to master the instrument or dance and develop proficiency and knowledge of it (the chosen instrument) with emphasis on solo/individual performances. Candidates show mastery in performance techniques, management of performance on stage and the dynamics of performing with accompaniment or within a group/ensemble. Candidates should demonstrate mastery of their instruments in their final solo performance which should last for 45 minutes.

MMP 704 Ensemble Performance
The module trains candidates in the psychology of performance, improvisation and musical arrangements geared towards a public ensemble performance with full accompaniment. Candidates show mastery in performance techniques, management of performance on stage and the dynamics of performing with accompaniment or within a group/ensemble. Every performance is accompanied by a performance script. Candidates should demonstrate mastery of their instruments in their ensemble performance which should last for 1 hour 20 minutes.

MMP 702Models of Music Performance
This module explores the global, regional and national issues around music performance. I interrogate the various standpoints that inform the performance of music in different cultures and draw meaning and implications to the current practices in the contexts of the candidates' experiences. Students will engage in discourses based on specific examples from Africa, the West and the Eastern musical experiences and prototypes.

MAM 706 Financial Literacy in the Music Industry
The module focuses on the financial literacy of the cultural industries. The module inducts students in financial issues of the creative cultural industries. It handles issues of financial planning, budgeting, accounting, investment, contract negotiation, management of funds and trustee/ staff relations in the context of the arts to help students develop critical skills to survive in the cultural industries. Emphasis is on how musicians can financially benefit from their intellectual property in the contemporary era.

MAM 707 Music Innovation and Entrepreneurship
The module will create students with a self-employment thrust. Manufacturing is one great employment booster hence it is the thrust of this module. The module takes cognisance of the new norm caused by these calamities of recent times. The module prepares students to tackle enterprises such as being music bloggers, YouTubers and Tik-Tokers where they make money in their homes because of the new norm. Emphasis is on how musicians can survive in various permutations in the post-modern era and how they can manage to be creative and innovative.

MMC 702 Jazz Improvisation Techniques

The module focuses on those students who wish to specialise in Jazz composition. Fundamental principles of jazz theory ranging from chord formation and their use in different jazz styles are interrogated. Seventh chords and extended tertian chords are studied with special emphasis on the perception of modes and their colouristic tendencies being informed by various jazz musicians and epochs. Jazz improvisation techniques such as harmonic grounds, rhythmic grounds, melodic interaction/dialogue, and walking bass need to be studied and understood in context.

MMC 703 Models of Western Music Composition
The module focuses on compositional models and theories that inform Western procedures to music composition; melodic structure, harmonic tendency rules, harmonic function, chord type, melodic embellishment/figuration, voice leading and part writing in the context of style, genre, school of thought, individual composers' idiom and epoch. The influence of linear

sequences on harmony should be understood. Extended tonality in diatonic and chromatic harmonies emphasising on how chords are used and resolved including cadences.

MMC 704 Compositional Theory and Analysis
Students must be equipped with vast knowledge of post-tonal compositional theory and analytical procedures. Atonality, serialism, the twelve-tone system and other post-tonal compositional procedures must be understood.

MMC 705 Indigenous Composition Portfolio
This is a practical and demonstrative module which seeks to equip students with innovative skills in music composition through applying concepts. Students are expected to compose and compile original compositions informed by indigenous paradigms in music composition. Students must understand the potential of indigenous music-cultural tonal, rhythmic, textural and instrumental resources to serve as pre-compositional elements in composition from an African perspective and assuming the Zimbabwean standpoint. As such, they have to demonstrate how this concept of indigenous-oriented approach to composition can foster the realisation of unique musical styles in Zimbabwe. Therefore, substantial work of indigenous-oriented works with indigenous accompaniment, from the idiophones, aerophones, membranophones, lamellaphones and chordophones classes must be composed.

MMC 706 Paradigms of African Music Composition
The module focuses on paradigms that may be applied to engage with indigenous music-cultural knowledge systems. It traces the development of African scholarship and contributions whose perspectives are to inculcate the philosophy of ubuntu/unhu in the domain of music composition. As such theories/models/frameworks/rubrics that inform indigenous composers are interrogated, hence fostering identity, authenticity and African consciousness and cultural hegemony.

MMC 707 Principles of Orchestration
The module equips with knowledge of orchestration from Western art music perspective, in various musical periods and schools of thought. The sections of the orchestra (strings, brass, woodwind and percussion) and knowledge of instruments are critical. Students are expected to orchestrate several works to meet the standards commensurate with Masters' level. The application of indigenous idiophones, aerophones, chordophones and membranophones in orchestration is also covered.

MMC 708 Contemporary Songwriting Techniques
The module focuses on contemporary composition styles ranging from chord formation, timbral combinations and song structure. Substantial work of indigenous-oriented works with indigenous accompaniment, from the idiophones, aerophones, membranophones, lamellaphones and chordophones classes must be composed. Students must demonstrate a high level of proficiency in understanding the application of indigenous music-cultural tonal hierarchies, and rhythmic, textural and instrumental resources to serve as pre-compositional elements in popular music songwriting from an African perspective from a Zimbabwean standpoint. They have to demonstrate how this concept of an indigenous-oriented approach to popular music songwriting can foster the realisation of unique musical styles in Zimbabwe.

MMC 709 Composing for Film And Theatre
The module equips students to specialise in composing music for motion images. Being informed by film music theories and communicative tendencies of music in films, students will compose and lay soundtracks and/or produce a film score. Students will be exposed to different approaches to motion image music scoring such as minimalism, modular approach, and Hollywood scoring practices. Also, students must be conscious of indigenous cultural aesthetics in African films.

MMC 710 Cross-Cultural Composition Portfolio
This is a practical module that equips students with innovative skills in music composition by blending Western approaches and indigenous concepts to satisfy the global appeal of music and diversity. This enables students to commodify and commercialise their music hence exposing indigenous resources globally for posterity. Students should understand the linkages of indigenous music-cultural tonal, rhythmic, textural and instrumental resources with other music cultures of the world.

MMC 801 Final Composition Portfolio
The composition portfolio can be in the form of a compilation of Musical scores (using relevant and standard systems of notation like staff notation, number notation, pulse notation, tablature notation), wave format, or performance recitals of composed works (supported by lead/sheet scores). The portfolio of compositions may be in classical, contemporary, jazz,

popular or indigenous composition styles. The portfolio of compositions must have a minimum performance duration of 30 minutes.

MMC 802 Mini-Dissertation
Depending on the nature of the research topic, both the dissertation and the portfolio of compositions can be directed/supervised by one study leader or the two components can be supervised by two separate study leaders. It is not a requirement that the dissertation topic be linked to the portfolio of compositions. However, the dissertation should be linked to the specific field of interest within the music composition domain.

MMP 705 Music Performance Technologies
This study entails the use of technologies in music performance. Candidates will explore the shift from analogue to digital platforms as it relates to music performance. The study critically examines the implications of technologies to the future of music performance given the theories that inform the use, staging of live performances, participation of performers, time management of sound, preservation/archiving, programming and management of performances.

MMP 706Final Solo Performance
The module grounds the candidates to Western /African Music performance techniques with an in-depth study of the dance or instrument of their choice. Students study the nature of the dance or instrument, history, performance technique, sound production, tuning system, functionality and issues of continuity and change. The knowledge obtained will be a pre-requisite for the advanced techniques of the dance/ instrument. For dance, students will study the history, origin, dance pattern, and issues of continuity and change. The knowledge and skills will culminate in a minor solo performance of 45 minutes. Performance in African dance or instruments (voice to be regarded as an instrument) and all performances should depict a particular context. Performances are to be accompanied by a programme of events, a detailed write-up of the candidate's biography, a description of the item(s) to be recited and other participants involved.

MMP 707 Final Ensemble Performance
The major ensemble exposes candidates to advanced performance skills within an ensemble with one student playing the leading role. Students are required to demonstrate the ability to train and lead a group comprising of a variety of accompanying dances African and Western instruments with voices. The performance will last 1hr 20minutes in which at least six (6) songs are performed. For African music, the performance should be contextual, with a high level of creativity and originality, a detailed programme, the candidate's biography, details of participants and their roles, instruments, song text and meaning, and a brief description of the ritual/context of the enacted performance.

MMT 703Acoustics
The study examines the principles of sound propagation, management in enclosed spaces, transmission and transmission loss and ideal acoustic treatments. Candidates will undertake practical explorations into enclosed recording and performance spaces to live sound production onstage and in the studio.

MMT 704 Critical Listening
Students will do critical listening to develop frequency identification skills with pink noise and music, cutting/boosting 20Hz to 20kHz. The students work with commercial recordings to identify dynamics, spatial placing of inputs, amplitude, spectral and temporal aspects in frequency identities and signal processing of sound to produce a project portfolio which will be submitted for examination.

MMT 705 Digital Audio
This study grounds the students into the essentials of signal processing through mixing and mastering skills in multi-track recording through the use of appropriate analogue and digital gear, the application of dynamic and signal processing techniques is fundamental to recording projects undertaken in the study.

MMT 706 Computer Music Programming
The content in this study entails the use of information technology in writing, composing, storage, and dissemination of musical productions. Candidates will manipulate hardware and software equipment in sound synthesis for a variety of musical applications in the digital age.

MMT 708 Paradigms for Music Technology
This module exposes students to global trends in the music industry with a focus on the existing paradigms in music technology. Students will interrogate different models, theoretical orientations and applications informing practices in the local music industry in the recording and entertainment area.

MMT 709 Audio Recording Technology

Students will study the principles underlying recording in using both analogue and digital-based equipment. Each candidate will preside over a 40-minute recording project to commercial standards. A project with a detailed report on the recording process is a cardinal requirement for students to exhibit their experience and understanding of key concepts.

MMT 710 Live Music Performance Technology
The study involves the use of technology in live performances, traditional aesthetic definitions of musical experience, and individual and machine technologies are core to the study. It also looks at the evolution of traditional aesthetic definitions of live musical experiences, engineer/performer-audience relations to the sound, aura, and other musicians making music together.

MMT 711Sound Design for Motion Pictures
Candidates will create/sound design for motion pictures, apply Foley and other effects, score soundtracks, synchronise sound with motion pictures, and apply ideal formats for different purposes. Students will submit a 10-minute examination project to demonstrate a grasp of skills through detailed process reports.

MAM 801Dissertation
Students are expected to carry out a study on topics of their choice. Topics will be approved by the Departmental Board based on the academic regulations. Under the academic guidance of research supervisor(s), the candidates will present scholarly written work. The candidates' work should articulate music-related issues. The length should be a minimum of 20 000 words.

MMP 801 Final Performance Portfolio
The module grounds students in African and Western musical instrument performance techniques as well as dance. Students study the nature of the dance or instrument, history, performance technique, sound production, tuning system, functionality and issues of change and continuity. The candidate at this stage will present a final portfolio that is cumulative. This module enables candidates to knit together a meaningful performance. The knowledge obtained will be a pre-requisite for the advanced techniques of the dance/ instrument. The knowledge and skills will culminate in a one-hour performance. Performance should depict a particular context. Performances are accompanied by a programme of events, a detailed write-up of the candidate's biography, a description of the item(s) to be recited and other participants involved.

MMP 802Mini-Dissertation
Students are expected to carry out a study on topics in music performance of their choice. Topics will be approved by the Departmental Board based on the academic regulations. Under the academic guidance of research supervisor(s), the candidates will present scholarly written in dissertations with at least 20 000 words. The candidates' work should articulate music-related issues.

MPHIL PROGRAMMES

- MPhil in Music Business
- MPhil in Music Technology
- MPhil in Applied Ethnomusicology
- MPhil in Musicology

DEPARTMENT OF PEACE AND SECURITY STUDIES

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN PEACE AND SECURITY STUDIES (HPSS)

Duration	4 years
Actual Credit Load	516
Minimum Credit Load	480
Maximum Credit Load	540
Total MBKs Credit Load	408
ZNQF Level	8

1.0 PURPOSE OF THE PROGRAMME

The programme is designed to develop students with a sound comprehension and appreciation of peace, security and development areas of study. The programme aims at developing sound conceptual, analytical and critical skills that are required in peace, security and development contexts. Students are also expected to identify and analyse the causes of

conflicts and come up with scenarios and solutions that foster a more desirable human condition. The programme also aims to guide students through cutting-edge research methods in peace and security studies and ethical procedures guiding the discipline.

2.0 ENTRY REQUIREMENTS

Normal Entry
At least five (5) 'O' levels/ National Foundation Certificates including English Language with a Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercials OR Relevant National Certificate.

Special Entry
A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry
Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3.0 PROGRAMME CHARACTERISTICS

Area of Study **The** Peace and Security Honours degree focuses on three areas:

1. **Peace and Development**
The programme focuses on the nexus between development security and peace in contemporary societies. It explores world conflicts that generally originate from power dynamics, gender inequalities and climate change.

2. **Theoretical Constructs**
Peace, Security and Development studies focus on the development of peace, security and development aspects from the historical to contemporary times and equip students with analytical skills that help in comprehending the current conflict dynamics.

3. **Research Methods**
The programme focuses on different methodological philosophies and approaches that uncover the conflict dynamics within the social, political and economic context and structures within which people are situated

Specialist Focus **Peace, Gender, Development and Security**

Orientation Research and innovation-oriented. Teaching and learning focus on equipping students with theoretical concepts and methodological approaches to assist students analyse their social world.

Distinctive Features The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER OPPORTUNITIES

Employability Graduates have career opportunities in both the public and private sectors where they can work as Public Administrators in Central Government Ministries and Local Authorities (Rural and Urban), International and Regional Peace Officers, Community Development Officers and Project Managers in Civil Society Organisations and Non-Governmental Organisations and Lectureship

Further Studies Masters and Doctoral studies in Peace, Security and Development, Global Peace

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertations, lecture notes, assisted private studies and field trips.

Assessment Methods

Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment

6.0 INTENDED LEARNING OUTCOMES

On successful completion of the programme, students must:

- Critically evaluate advanced theoretical concepts in peace, security and development studies
- Appreciate development and its impact on societies
- Critically reflect on advanced theoretical concepts relevant to the field of peace, security and development studies.
- Evaluate policy practices relevant to the field of peace and security
- Be able to deal with and solve complex issues
- Be innovative in applying and dealing with complex issues of peace, security and development
- Be able to use the necessary tools and skills for conflict resolution, peacebuilding, peacekeeping and human security processes.
- Be able to communicate effectively and present information using multimedia to both experts and non-experts in the field of peace studies.

8.0 GENERAL PROVISIONS

- As read in the General University Regulations
- The programme shall be completed in 8 semesters
- Work-related placements shall be approved by the Department. It must be a minimum of 8 months.

9.0 GENERAL PROVISIONS

Refer to the University's General Regulations

10.0 PROGRAMME ASSESSMENT

Continuous Assessment: 40%: Test (15%), Practical (20%), Assignments (5%)
Written Examinations: 60%
Other: Research Project is assessed based on a research project (75%) and Oral presentation (25%).

11.0 PROVISION FOR PROGRESSION

Refer to section 6 of the university's General Regulations

12.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of the university General Regulations.

13.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Faculty Regulations.

14.0 DEGREE WEIGHTING

Refer to section 11 of the Faculty Regulations.

Honorary degrees will be awarded to individuals who have distinguished themselves in the field of Peace and Security issues. The department may offer the following Honorary Degrees:

- Doctor of Peace and Security (DPS)
- Doctor of Science (DSC)

15.0 PROGRAMME STRUCTURE

Module name	**Credits**
Level 1 Semester 1

16.0 MODULE SYNOPSIS

HPSS 111 Introduction to Peace and Security

The module focuses on important theories that inform conflict and peacebuilding processes and their relationship to development. It also introduces students to key issues and debates in peace and conflict studies. The module traces the history of peace and conflict studies as a new sub-discipline and highlights global developments that continue to make it dynamic and relevant.

HPSS 112 Human Security and Development

The module focuses on concepts that broaden the scope of security analysis and policy from territorial security to the security of individuals. It deals with the protection of an individual's safety and freedom from direct and indirect threats that are physical or psychological. The module examines threats to human security that include environmental destruction, overpopulation, the spread of infectious diseases, poverty, and human rights abuses among others

HPSS 113 Peace, Leadership and Governance
The module introduces students to both the traditional and modern models of leadership. It also focuses on leadership ethics and different forms of governance that either promote or disrupt peace.

HPSS 114 Peace, Economics and Democracy
The module introduces students to the state's institutional and structural arrangements, decision-making processes, and policy formation and implementation. It acknowledges the link between an inclusive democratic government to a peaceful and economically stable society.

HCS 115 Introduction to Information Systems
Refer to the Department of Information Systems

CS101 Basic Communication Skills
Refer to the Department of Communication skills

Level 1 Semester 2

HPSS 115 Youth, Conflict and Development
The module focuses on the role that the youth play in conflict and peace processes. Their involvement in violent conflict, and peace-building processes as well as their potential contribution to the socio-economic and political development of Africa is examined.

HPSS 116 Conflict Transformation Processes
This module examines the key theories, issues, debates and challenges in conflict transformation. The module with the use of various and diverse case studies also from different societies examines multiple practical aspects of conflict transformation.

HPSS 117 Conflict Resolution Processes

This module introduces students to contemporary Conflict Resolution theory and practice. The focus, however, is on practical application, while sufficient attention will be given to theory. The module is consciously focused on the African context though references to conflicts in other parts of the world may also be drawn. An exploration of conflict resolution models and theories will be made, though the major focus will be on their applicability. The module explores conflict resolution as a field of inquiry and research; perspectives, theories, and assumptions underlying conflict analysis and conflict resolution; and contending approaches to conflict resolution training and practice.

HPSS 118 Disaster Management
This module explores issues of disaster, conflict governance and global policy perspectives for disaster risk reduction. It focuses on the adaptation and transformation of societies that are affected by man-made and natural disasters. The theory also critically analyses participatory disaster governance, the role of decentralisation of disaster resources and responsibilities, and best practice principles in preparedness, mitigation, response and recovery.

HPSS 119 Peace and Reconciliation
The module examines the concepts of peace and peace processes that are aimed at repairing and restoring human dignity, especially after war conflicts.

LEVEL 2 Semester 1

HPSS 212 Peace, Conflict and Security in Africa
The module focuses on the causes, challenges and opportunities of peace and security in Africa. It also examines the diversity and complexity of conflicts and cases of successful conflict management and resolution.

HPSS 213 Peace Education and Development

The module examines crucial interrelationships that can be fostered through peace education. It focuses on methods that can be implemented by society through equipping citizens with peace-building. Peace education is considered important to institutions such as education, media and military institutions.

HPSS 214 Human Rights Law and Transitional Justice
The module enables students to achieve knowledge of human rights law and to develop their insights in a unique branch of law dealing with contemporary humanitarian problems. Through the module, students are equipped with a critical explanation and evaluation of the nature of, and theories behind, human rights law. Mechanisms of enforcement of human rights law are also covered, as well as transitional justice theory and practice for sustainable peace.

HPSS 215 Research Methods
The module introduces students to qualitative and quantitative research methods. It focuses on developing the students' understanding of research designs on which the area of social science is premised. The module equips students with skills that assist them to gather, analyse, and interpret data, problem-solving and decision-making.

GSSS 201 Gender Studies for Social Sciences
This Gender Studies for Social Sciences 201 (GSSS201) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS201** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ENT 205 Entrepreneurship 1
Refer to the Department of Entrepreneurship

Level 2.2

HPSS 216 Religion, Peace and Conflict
The module examines the role played by religion in integrating and disintegrating societies. It emphasizes the central role that religion plays in comprehending peace and conflict. The module examines the impact of religion on peace and conflict across the world.

HPSS 217 Civil Society and Peacebuilding
This module explores and analyses the emergence of civil society organisations that focus on social service delivery, development, advocacy and democratisation processes of peace. The focus on human security through civil society organisations in communities is emphasised.

HPSS 218 Globalisation, Conflict and Development
This module provides students with theoretical perspectives to critically analyse (a) the continuing relevance of the state and (b) the positive and negative consequences of globalisation processes for various dimensions of security, such as military, political, economic, cultural and psychological.

HPSS 219 Gender, Peace and Security
This module examines the theoretical approaches to gender peace and security, development theory, and feminist critiques. It examines gendered expectations and power relations in conflict and peace processes. The varied roles played by men and women in peacebuilding processes are also explored.

HPSS 220 Project Management
The module is primarily about the rationale, context, and methods of planning, appraising and evaluating development projects and programmes. The module primarily focuses on appraising the financial and economic efficiency of peace-related projects. The module covers planning and management techniques for the project cycle; including project identification and logical framework analysis. Conflict-sensitive approaches to programming are key for this module.

HPSS 221 Conflicts and Human Displacement
Human displacement, dislocation and dispossession are some of the major consequences of violent conflict. This module considers the causes, dynamics and consequences of human displacement. It highlights the tensions that arise between host populations and immigrants. It also considers policies and strategies for rehabilitating both externally and internally displaced persons.

HPSS330 Work- Related Placement Report
The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HPSS341 Work- Related Learning Report
As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HPSS342 Work- Related Academic Supervisor's Report
As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HPSS343 Work- Related Learning Supervisor's Report
The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

Level 4 Semester 1
HPSS 411 Electoral Processes in Africa
The module focuses on the design, mechanisms and effects of different electoral systems at local, national, regional and supranational levels. The module explores the different electoral processes and their contribution to different governance systems.

HPSS 412 International Law
The module provides students with an understanding of the nature, sources and institutions of international law. The area of international law is largely concerned with the rights and obligations of states. The question of the sovereign government system vis-a-vis collective governance systems of peace will be explored.

HPSS 413 International Institutions and Conflict Resolution
This module identifies the contributions of international institutions to peacebuilding processes. The module aims to equip students with knowledge about international actors and how the law is applied and implemented in international politics, with a focus on international peace and security.

HPSS 414 Media and Conflict
The module focuses on the role media plays in conflict situations. It explains the positive and negative roles that can be potentially played by the media through representation techniques. This module also considers the many, and often conflicting roles of the media in conflict and peacebuilding processes. It raises questions of 'who' controls the media institutions and with 'what' effect when it comes to issues of peace and conflict.

HPSS 415 Economics of Peace and Security
This module explores the interface between the economy, peace and governance systems. It provides a contextual, theoretical and practical understanding of the economic and financial aspects of the security-development nexus. Some economic models, their evolution and their place in governance and the cost conflicts particularly war are also examined.

HPSS 416 Civil-Military Relations
The module interrogates various areas that concern civil-military relationships such as how political leaders, societies and military organisations interact. It also explores the attitudes and values of military and civilian populations within a society.

HPSS 417 Diplomacy
The module introduces the student to diplomatic skills that are used in ending conflict. It introduces them to both Western and African indigenous ways of diplomacy. Emphasis will be placed on the modern pioneering influence of diplomacy through the Treaty of Westphalia, Congress of Vienna and Paris Peace Conference to contemporary diplomatic practice.

HPSS 418 Terrorism and Security
The module explores the development of terrorism and political violence in various historical, political and geographical contexts, and through a variety of theoretical lenses. This module provides an introduction to the study of terrorism, political violence and their threat to global security. It aims to deepen students' existing knowledge of the threat of terrorism to world

peace. The module focuses in greater detail on various forms of terrorism and political violence: dissident/non-state terrorism; counter-terrorism and counter-insurgency; state terrorism; 'new terrorism'; and torture.

HPSS 419 Dissertation
Students shall research a topic of their choice concerning pertinent issues in peace, conflict, reconciliation and related issues. The maximum length of the dissertation should be 20 000 words.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN HUMAN RIGHTS AND SOCIAL JUSTICE (HPHS)

Duration	4 years
Actual Credit Load	334
Minimum Credit Load	492
Maximum Credit Load	504
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME

The programme is designed to develop students' knowledge and skills in issues of peace, human rights and social justice. Peace is a component envisioned and a longing for everyone. Human rights violations are committed by others as they claim to be in pursuit of peace. The violation of human rights will result in social injustice and a lack of peace. All these point to the need to equip the student with conceptual, analytical and critical skills that are pertinent to the maintenance of peace, human rights and social justice. Practical peacebuilding examples will be studied to award students a real-life situation of working towards peace, human rights and justice. The programme also aims at guiding students through action-oriented research methods, which is very much in line with peace, human rights and social justice. This programme is demand-driven, especially from a peace, security and development studies perspective. In addition, given the socio-economic challenges that societies face, the importance of peace, human rights and social justice becomes a valuable component of the education system. The fact that we live in societies where people have different values, religions and principles makes it crucial that students perfect their skills of relating with others peacefully in observations of human rights and maintenance of social justice. The students of Peace, Human Rights and Social Justice will use skills gained during the programme to influence decision-making at the personal, family, community, national, regional and global levels.

2.0 ENTRY REQUIREMENTS

Normal Entry
At least five (5) 'O' levels/ National Foundation Certificates including the English Language with a Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercials OR Relevant National Certificate.

Special Entry
A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry
Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3.0 PROGRAMME CHARACTERISTICS

Area of Study
Peace, Human Security and Social Justice Honours Degree focuses on three areas:

Peace, Human Rights and Social Justice
The programme focuses on the linkages of peace, human rights and social justice. It explores how human rights violations can hinder peace and result in social injustices. It focuses on the transformation of deep-rooted conflicts, which usually when not done results in human rights violations and injustices.

Theoretical Constructs
Peace, human rights and social justice focus on the need for peace, human rights observance and establishment of social justice through looking at case studies of real-life situations where gross human rights violations have been linked to social injustices thereby becoming major hindrances of peace. Students will be equipped with conflict transformation skills aimed at preventing violence and social injustices.

Research Methods
The programme focuses on different research methodologies, philosophies and approaches that uncover the conflict dynamics within the social, political and economic context and the structural systems underpinning them. It is observed that by and large issues of gross human rights violations and injustices are largely linked to social, economic and political injustices.

Specialist Focus

Peace, human rights and social justice
Orientation
Research and innovation-oriented. Teaching, learning and research focus on equipping students with theoretical and practical concepts.
Distinctive Features
The programme instils problem identification skills and explores ways of resolving them.

4.0 CAREER OPPORTUNITIES AND FURTHER OPPORTUNITIES

Employability
Graduates have career opportunities in both the public and private sectors where they can work as Public Administrators in Central Government Ministries and Local Authorities (Rural and Urban), International and Regional Peace Officers, Community Development Officers and Project Managers in Civil Society Organisations and Non-Governmental Organisations and Lectureship
Further Studies
Master's and Doctoral studies in Peace, Human Rights and Social Justice studies

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods
Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, dissertations, lecture notes, assisted private studies and field trips.

Assessment Methods
Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment

6.0 INTENDED LEARNING OUTCOMES

The programme will:

i) Train graduates who acquire comprehensive knowledge of peacebuilding, observance of human rights and seeking social justice.
ii) Produce graduates with the spirit of voluntarism and self-development, which contribute to the adoption of more modern ideas, morals and values.
iii) Produce graduates who have a strong appreciation of the interface between politics and development in communities.
iv) Produce graduates with skills of conflict transformation engaging in research using relevant methodology, research design and data gathering.
v) Produce innovative graduates, with much-desired skills in handling current social, economic and political problems
vi) Produce graduates with the ability to apply ICT in data collection, analysis and presentation of research findings.
vii) Equip graduates with a rich appreciation of ethical issues in peacebuilding, conflict transformation and peace studies
viii) Be able use the necessary tools and skills for conflict management conflict transformation, peacebuilding, peacekeeping and human security processes

7.0 GENERAL PROVISIONS

- As read in the General MSU Regulations
- The programme shall be completed in 8 semesters
- Work-related placements shall be approved by the Department. It must be a minimum of 8 months

8.0 PROGRAMME ASSESSMENT

Coursework: 40%
Written Examinations: 60%
Other: Research Project is assessed based on a research project (75%) and Oral presentation (25%).

9.0 PROVISION FOR PROGRESSION

Refer to section 6 of the MSU General Regulations

10.0 FAILURE TO SATISFY EXAMINERS

Refer to section 9 of MSU General Regulations.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to section 10 of the Social Science Faculty Regulations.

12.0 DEGREE WEIGHTING

Refer to section 11 of the Social Sciences faculty Regulations.

Honorary degrees will be awarded to individuals who have distinguished themselves in the field of Human Rights and Social Justice. The department may offer the following Honorary Degrees:

- Doctor of Human Rights and Social Justice
- Doctor of Science (DSC)

14.0 MODULE SYNOPSES

HPHS-101 Introduction to Peace, Human-Rights and Social Justice
Peace, human rights and social justice are major aspects envisioned by every society. This course introduces students to key components of peacebuilding, which bears a huge influence on the observance of human rights and the maintenance of social justice. Focus is given to understanding the nature of conflicts, which when handled well can bring about the desired change and when not handled well conflicts escalate to violence which results in human rights violations and injustices. This study will focus on nonviolent ways of conflict transformation as strategies for building peace.

HPHS 102 Human Rights and Sustainable Development
The course examines the concept of human rights and development. Underdevelopment has been a major contributor to human rights violations. This course seeks to explore developmental strategies, which will foster peace and observance of human rights. The course will also consider the role of human rights-based strategies in the pursuit of sustainable development and maintenance of social justice.

HPHS 103 Peace, Leadership and Governance
The module introduces students to both the traditional and modern models of leadership. It also focuses on leadership ethics and different forms of governance that either promote or disrupt peace, human rights and social justice internationally and regionally.

HPHS 104 Human Rights Education
Human right educations aim to empower learners with the rights of human beings according to the Universal Declaration of Human Rights. The main focus of the course is to help students realise the actions or inactions of both individuals and the government that abuse human beings.

HCS 115 Introduction to Information Systems
Refer to the Department of Information Systems

CS101 Basic Communication Skills
Refer to the Department of Communication skills

HPHS 105 Social Justice and Development
This course focuses on the impact of underdevelopment on social justice and the establishment of sustainable peace. Underdevelopment usually results in scramble for available limited resources, which often results in human rights abuse. The course will explore development strategies which can promote sustainable peace.

HPHS 106 Conflict Transformation
This course focuses on empowering students with conflict transformation skills needed to address the root causes of conflicts. The transformation of the root causes of conflicts is a key factor in the establishment of positive peace. Thus, students need conflict transformation skills, which enable them to bring about the desired change towards the establishment of sustainable peace.

HPHS 107 Conflict and Human Displacement
Human displacement, dislocation and dispossession are some of the major consequences of violent conflict. This module considers the causes, dynamics and consequences of human displacement. It highlights the tensions that arise between host populations and immigrants. It also considers policies and strategies for rehabilitating both externally and internally displaced persons.

HPHS 108 Diversity and Social Justice
This course is designed to increase students' awareness, knowledge, and understanding of issues related to diversity and social justice, including race, ethnicity, class, gender, religion, sexual orientation, age, ability status, and the intersections between these social identity groups. Additionally, students will gain an understanding of dialogue as a method for peacefully resolving conflict that may emerge due to cultural misunderstandings or oppressive dynamics, as well as skills for effectively engaging in dialogue. The topics of this course include social identity development; difference and dominance and the nature of social oppression; our personal and interpersonal connections to power, privilege, and oppression; understanding and resolving conflicts or resistance; the process of dialogue and coalition building across differences; and its applications in multicultural social work settings.

HPHS 109 International Human Rights Law
The module provides students with an understanding of the nature, sources and institutions of international law. The area of international law is largely concerned with the human rights and obligations of states. The question of the sovereign government system vis-a-vis collective governance systems of peace and human rights will be explored.

HPHS 201 Public Policy and Human Rights
This module focuses on the study of public policy and Human rights. This module gives students a critical appreciation of the concepts, theories, principles, processes and practical issues in public policy-making and Human rights. Public Policy experiences within local, regional and global environments are used throughout the module as illustrative cases. Its substantive goal is to enable students to relate conceptual and theoretical constructs to global public policy practices and Human rights dimensions in relation to national development.

HPHS 202 Poverty and Social Justice
This course seeks to explore the causes, extents and effects of poverty in various societies. Poverty is one of the leading problems in the developing world. It is worth noting that there are strong linkages between poverty, human rights violations and social injustice. This course aims at empowering learners with strategies of poverty eradication and ways of supporting people living in societies experiencing poverty.

HPHS 203 Pandemics and Human Rights
This course seeks to explore the causes, extent and effects of a pandemic. Pandemics are a major threat to economic and health security globally and in turn, human rights standards can be lowered due to overwhelming spending on health security. An examination of major contemporary challenges of pandemics on human rights will be conducted, focusing on multilevel studies on the pandemic in Zimbabwe, Africa and the entire globe. A wide range of exploring and analysing the converging health crises of the current situations will be explored. The focus will be given to investigating contemporary strategies that can be adopted to mitigate the effects of pandemics on human rights.

HPHS 205 Research Methods
The module focuses on developing students' advanced conceptualisation of problems and assisting them generate qualitative and quantitative solutions based on empirical evidence. The module equips students with practical research skills and advanced methodological expertise necessary to make a practical contribution to the development of peace studies and social science research in general.

GSSS 231 Gender Studies for Social Sciences
This Gender Studies for Social Sciences 231 (GSSS231) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS231** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ENT 205 Entrepreneurship 1

Refer to the Department of Entrepreneurship

HPHS 206 Gender, Human Rights and Social Justice

The module balances theory and practical skills relating to gender and human rights. It explores national, regional and international human rights. The module privileges especially the frameworks of minority sectors of society such as women, underprivileged races and ethnic minorities. The module also provides an adequate opportunity to evaluate human rights and challenge obstacles.

HPHS 207 Civil Society and Social Justice

This module explores and analyses the emergence of civil society organisations that focus on social service delivery, development, advocacy and democratisation processes of peace. The focus on human security through civil society organisations in communities is emphasised.

HPHS 208 Religion and Principles of Non-violence

The module assesses the linkages of religion and nonviolence. Various approaches to non-violence will be surveyed. Of essence is also the need to understand how non-violence was shaped and has been shaped by religion. This module is designed to provide an in-depth and multi-disciplinary perspective on civilian-based movements and campaigns that defend and obtain basic rights and justice worldwide. Students will become familiar with the theory and practice of active nonviolence as a method of social change and a way of life. Students will learn how to apply the tactics and tools of nonviolence to promote peace and justice, safety and equality – personally, locally, in communities and globally. Since nonviolence is about organised activity, this module offers many exercises that require students to embody nonviolence. Thinking and talking about non-violent protests is one thing, but engaging in nonviolent action, especially when faced with highly emotional and tense situations, requires practice. Thus the course will focus of religious actors of nonviolence such as Mahatma Gandhi, Abdul Khan, and Martin Luther Junior among others

HPHS 209 Security Alternatives and Demilitarisation

The military is a common way of maintaining national security, thus it has been maintained as a common way of dealing with disputes. However, it is not the only way and its track record indicates that it is not a very effective way of meeting human security needs. A major emphasis of this course is that there are always alternatives and conflict resolution procedures may be more effective and less costly in dealing with disputes within (often linked to human insecurity) or between countries. As the use of these methods gains strength in a society, the need for force is reduced and demilitarisation can be deemed necessary. Demilitarisation is part of peacebuilding, that is building a social, political and economic environment in which peace can grow. Demilitarisation can also be considered as a conflict prevention measure: if countries do not have large militaries, they will have to use non-military ways of dealing with disputes. It is hoped this course will enable students to explore non-military ways of resolving disputes and be able to implement them at personal, communal, national and international levels.

HPHS 210 Peace and Reconciliation

The module explores understanding peace and reconciliation to human rights. Students should be acquainted that reconciliation requires individuals and groups to address past and present inequality, injustice, and violence to construct better futures based on stronger social bonds and respect for human rights. It also peruses reconciliation and how advanced post-conflict mechanisms such as truth commissions promote social justice and peace.

HPHS330 Work- Related Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HPHS331 Work- Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HPHS332 Work- Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HPHS333 Work -Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HPHS 401 International Institutions and Peacebuilding
This module identifies the contributions of international institutions to peacebuilding processes. The module aims to equip students with knowledge about international actors and how law is applied and implemented in international politics, with a focus on international peace and security.

HPHS 402 Monitoring and Evaluation
This course is intended to provide training in monitoring and evaluation. The course will help students with skills and knowledge in assessing, collecting and analysing data that is used in designing development programs/projects. Monitoring and Evaluation is increasingly recognised as the cornerstone for effective program management and is critical for organisational sustainability. A continuously increasing need for suitably skilled monitoring and evaluation project managers has been identified as a priority area by various stakeholders active in different sectors and industries e. g globally - globally-funded sponsorships often require evidence of effective monitoring and evaluation systems before awarding funds. This course is structured in such a way that it guides learners to apply monitoring and evaluation principles within the context of their unique work environment.

HPHS403 Civil-Military Relations
The module interrogates various areas that concern civil-military relationships such as how political leaders, societies and military organizations interact. It also explores the attitudes and values of military and civilian populations within a society.

HPHS 404 Terrorism and De-radicalization
The module intends to enhance the conceptualization of ideological, strategic, and tactical idiosyncrasy that is posed by global terrorism, radicalisation and counter-terrorism measures being implored in the 21st century in both spheres of the globe to ensure the prevalence of peace.

HPHS 405 Disaster Management
The module intends to conceptualise disasters as the consequences of events triggered by natural or man-made hazards that create challenges and problems mainly of a humanitarian nature. It also provides enforcement of human rights principles through disaster risk management, including pre-disaster mitigation and preparedness measures, emergency relief and rehabilitation, and reconstruction efforts. Those at risk need to be protected against violence and abuse in these contexts. Lack of social justice is the result of inappropriate policies, neglect or oversight. However, violations could be avoided if both national and international actors took the relevant human rights guarantees into account from the beginning.

HPHS 406 Media and Human Rights
Media and Human Rights is a module that the traditional human rights concerns regarding the media and current debates regarding the role played by the media within the field of human rights. The module also explores issues that include but are not limited to issues such as free speech, hate speech, privacy, the protection of journalists in conflict, human rights reportage, fact-finding and witnessing, the internet, social media and human rights.

HPHS 407 Applied Ethics of Peace
The module assesses themes and aspects of ethics in peacebuilding these include enforcement of Justice and Human Rights. Various ethics approaches will be surveyed. Of essence is also the need to understand how ethics have shaped perceptions of societies in peace processes, Justice delivery and sustenance of Human Rights.

HPHS 408 Diplomacy
The module introduces the student to diplomatic skills that are used in ending conflict. It introduces those to both Western and African indigenous ways of diplomacy. Emphasis will be placed on the modern pioneering influence of diplomacy through the Treaty of Westphalia, Congress of Vienna and Paris Peace Conference to contemporary diplomatic practice.

HPHS 409 Dissertation
Students shall research a topic of their choice concerning pertinent issues in peace, conflict, reconciliation and related issues. The maximum length of the dissertation should be 20 000 words.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN PEACE LEADERSHIP AND GOVERNANCE (HPLG)

Duration	4 years
Actual Credit Load	504
Minimum Credit Load	480
Maximum Credit Load	540
ZNQF Level	9

1.0 PURPOSE OF THE PROGRAMME

The programme is designed to develop students with a sound comprehension and appreciation of peace, leadership and governance areas of study. The programme aims at developing sound conceptual, analytical and critical skills that are required in peace, leadership and governance contexts. Students are also expected to identify and analyse the causes of conflicts and come up with scenarios and solutions that foster a more desirable human condition. The programme also aims to guide students through cutting-edge research methods in peace, leadership and governance dynamics and ethical procedures guiding the discipline.

2.0 ENTRY REQUIREMENTS

Normal Entry

At least five (5) 'O' levels/ National Foundation Certificates including English Language with Grade C or better and at least two (2) Advanced level passes in Arts, Humanities or Commercial subjects OR Relevant National Certificate.

Special Entry

A candidate who does not meet normal entry requirements may be admitted into a programme provided the candidate has a qualification in line with the Zimbabwe National Qualification Framework (ZNQF).

Mature Entry

Mature entry shall be obtained by applicants who have five (5) 'O' levels including English Language and have demonstrable work experience during the last five years before the academic year in which admission is sought, and are aged 25 years and above.

3.0 PROGRAMME CHARACTERISTICS

Area of Study

Peace, Leadership, Governance, gender and peace, security studies, conflict studies, theoretical constructs of peace and qualitative and quantitative peace issues.

Specialist Focus

Peace, Leadership and Governance

Orientation

Research and innovation-oriented. Teaching and learning focus on equipping students with theoretical concepts and methodological approaches to assist students analyse their social world.

Distinctive Features

The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER OPPORTUNITIES

Employability

Graduates have career opportunities in both the public and private sectors where they can work as Political lobbyists, Public Administrators in Central Government Ministries and Local Authorities (Rural and Urban), International and Regional Peace Officers, Community Development Officers and Project Managers in Civil Society Organisations and Non-Governmental Organisations and Lectureship

Further Studies

Masters and Doctoral studies in Peace, leadership and Governance, Politics, Peace and Governance, Public Administration, Public Policy and Governance

5.0 PROGRAMME DELIVERY

Teaching and Learning Methods

Lectures, tutorials, seminars, group work, presentations, public lectures, guest lecturer, dissertation, lecture notes, assisted private studies and field trips.

Assessment Methods

Written and oral examinations, tests, work-related learning, seminar presentations, mini-research dissertations, final year dissertations, continuous assessment, work-related learning reports, work-related learning supervision and assessment

Assessment Weighting

Continuous assessment shall contribute 40% to the final mark while the examination contributes 60%. Refer to Section 6.1 of the General Regulations and Section 5.1 of the Faculty Regulations.

6.0 PROGRAMME COMPETENCIES

Generic

- **Multidisciplinary**: Ability to draw appropriately from multiple academic disciplines to define and solve problems based on an understanding of complex phenomena
- **Quantitative and innovative reasoning**: Capability to draw on big data and use analytics for informed decision-making and strive to seek new ways of doing things
- **Communication skills**: Ability to communicate effectively and to present information orally and in writing and using ICTs to both expert and non-expert audiences
- **Analysis and synthesis**: Capacity for analysis and synthesis using logical arguments and proven facts
- **Ethical commitment**: Professional integrity and awareness of ethical considerations involved in studying individuals and groups
- **Entrepreneurial skills**: Capability to identify and create new business ventures based on knowledge and new thinking paradigms.

Discipline Specific

- **Problem Solving Skills**- Ability to synthesise complex information gathered from a range of sources
- **Be innovative-** Apply originality, innovation and creative problem-solving in dealing with complex issues
- **Deep knowledge-** Critical application of reasoning to the existing evidence base and scholarship

7.0 INTENDED PROGRAMME OUTCOMES

On successful completion of the programme students should be able to:

- critically evaluate advanced theoretical concepts in peace, leadership and governance
- appreciate leadership, governance and its impact on societies
- critically reflect on advanced theoretical concepts relevant to the field of peace, leadership and governance.
- evaluate policy practices relevant to the field of leadership and governance.
- deal with and solve complex issues
- innovatively apply theory in dealing with complex issues of peace, leadership and governance.
- use the necessary tools and skills for conflict resolution, peacebuilding, peacekeeping and human security processes.
- communicate effectively and present information using multimedia to both experts and non-experts in the field of peace, leadership and governance.

8.0 GENERAL PROVISIONS

- Bachelor of Science in Peace, Leadership and Governance Honours Degree programme shall be completed in 8 semesters.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

- To progress to the next semester, a student is required to have passed at least all core modules.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0 GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

HPLG 101 Introduction to Peace, Leadership and Governance

This module seeks to explore the relationship, dynamics and debate between Peace, Leadership and Governance in the contemporary world. It explores both the traditional and modern models of leadership. It also focuses on leadership ethics and different forms of governance that either promote or disrupt peace.

HPLG 102 Peace, Conflict and Security in Africa

The module exposes students to various causes, challenges and opportunities of peace and security in Africa. The module seeks to examine the diversity and complexity of conflicts and cases of successful conflict management and resolution.

HPLG 103 Politics and Governance in Zimbabwe

The module seeks to examine how public decisions are made and implemented. This module will mainly focus on leadership, governance, electioneering and constitutional-making processes, and political systems in Zimbabwe from independence to date.

HPSG 104 Leadership, Theory and Practice

The module analyses the concepts, theories or approaches to leadership, the role and significance of leadership in an organisation, the various leadership styles, and international and contemporary issues in Leadership. It also enables students to comprehend different ethical dilemmas leaders face in the work situation.

HCS 115 Introduction to Information Systems

Refer to the Department of Information Systems

CS101 Basic Communication Skills

Refer to the Department of Communication skills

HPLG 105 Peacekeeping and Peacebuilding in Africa

Attempts have been made to bring an end to conflicts that have embroiled the African continent. Peacekeeping, coupled with principles of good governance have been approaches that have been used in Africa to try to address the challenges of conflict occurrence and to ensure sustainable peace. The module therefore seeks to examine the theory and practice of peacekeeping and peacebuilding in Africa. Illuminating on the key challenges and how they can be addressed.

HPLG 106 Comparative Leadership and Public Policy

The module seeks to critically analyse the influence, effect or impact of leadership on public policy-making processes, interrelationships between policy formulation, execution, evaluation and revision, models of policy choices, citizen participation in policy-making, and administrative responsibility in policy development.

HPLG 107 Political Theory

The module familiarizes students with the emergence and theoretical perspectives of ancient and modern political thoughts that inform political, leadership and governance processes. The module explores different political theorists Western, African and Islamic and links the teachings with the politics, leadership and governance systems prevalent today.

HPLG 108 Civil Societies and Governance in Africa

This module critically analyses the emergence of civil society and its contribution to governance focusing on democracy, human rights, social justice, social service delivery, development etc. The module examines aspects of the structures and processes of regional governance, especially within the African continent to CSOs The module broadly explores major debates on civil societies, governance and development paying particular attention to the dialectics of their relationships.

HPLG 109 Religion, Peace and Conflict

The module examines the role played by religion in integrating and disintegrating societies. It emphasises the central role that religion plays in understanding peace and conflict. The module examines the impact of religion on peace and conflict across the world.

HPLG 201 Public Sector Cooperate Governance

The module takes students through the models of corporate governance principles. The module addresses ethical and unethical behaviour in the running of governmental and quasi-governmental organisations. Issues covered include Transparency, accountability, openness, responsibility, corruption, organizational structures and processes, Risk management and business continuity. Furthermore, quantitative and qualitative corporate governance issues will be examined.

HPLG 202 International Political Economy

The module seeks to make students appreciate the interaction between political actors and economic forces in the international Arena. Issues in production, trade and their relations with law, customs and government as well as the distribution of national income and wealth will be explored. This module pays more attention to international businesses, trade, international finance and international development.

HPLG 203 Youth, Conflict and Development

The module focuses on the participation and contribution of youths to contemporary conflict and development issues, and their involvement in peace processes. Their participation in democratic, electoral processes, violence, and peacebuilding processes and their contribution to political and socio-economic development are explored.

GSSS 231 Gender Studies for Social Sciences

This Gender Studies for Social Sciences 231 (GSSS231) module is an introductory module focused on giving students a broad understanding of the discipline of Gender Studies, its subject matter, key issues and concepts. It is designed to help students develop a critical understanding of basic gender issues as well as prepare them to be agents of change, particularly in Southern Africa and Zimbabwe. In so doing **GSSS231** adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter all aspects of the human experience in a gendered world, viewing gender as a field of study, analytical tool and a social phenomenon structuring the social world itself.

ENT 205 Entrepreneurship 1

Refer to the Department of Entrepreneurship

HPLG 204 Public Sector Leadership and Governance

The module will discuss the concept of leadership and governance. Discussions will centre on the origins of leadership; social sources of leadership, the power of leadership; formal and informal leadership; political leadership, transformational

and transactional leadership; reform leadership, leadership and collective purpose, leadership and governance in the public sector. The module examines the nexus between leadership and governance practices and systems in the public sector.

HPLG 205 Human Rights Law and Transitional Justice

The module seeks to make students appreciate the dynamics of human rights law and to develop their insights in a unique branch of law dealing with contemporary humanitarian problems. Students are equipped with a critical explanation and evaluation of the nature of, and theories behind, human rights law. Mechanisms of enforcement of human rights law are also covered, as well as transitional justice theory and practice for sustainable peace.

HPLG 206 Global Governance and Development

This module examines aspects of the structures and processes of global governance, especially within the UN system, and also governance in regional groupings. This module also takes a comprehensive and critical look at international development examining what it has accomplished in the twentieth century and what form it should take in the twenty-first century.

HPLG 207 Gender, Peace and Development

This module examines the theoretical approaches to gender peace and security, development theory, and feminist critiques. It examines gendered expectations and power relations in conflict and peace processes. The varied roles played by men and women in peace-building processes are also explored.

HPLG 208 Project Planning, Monitoring and Evaluation

The module is primarily about the rationale, context, and methods of planning, appraising, monitoring and evaluating development projects and programmes. The module primarily focuses on appraising the financial and economic efficiency of peace-related projects. The module covers planning and management techniques for the project cycle; including project identification and logical framework analysis. Conflict-sensitive approaches to programming are key for this module.

HPLG 209 Research Methods

The module introduces students to qualitative and quantitative research methods.

HPLG330 Work- Related Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

HPLG331Work- Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

HPLG332 Work- Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

HPLG333 Work- Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

HPLG 401 Conflict Analysis and Transformation

This module introduces students to the principle approaches of conflict analysis and transformation. The module will discuss the extensiveness of conflict in human existence, leadership, and governance and engage students in conflict transformation approaches. The module will rely on case studies and simulations to help students engage directly and better grasp the different theoretical approaches. The students will emerge from the module with knowledge of the central paradigms and concepts of conflict analysis and transformation.

HPLG 402 International Law

The module provides students with an understanding of the nature, sources and institutions of international law. The area of international law is largely concerned with the rights and obligations of states. The question of the sovereign government system vis-a-vis collective governance systems of peace will be explored.

HPLG 403 Institutions, Leadership and Governance Relations

The module equips students with knowledge about how local and international institutions affect the leadership and governance of any given state.

HPLG 404 Terrorism and Security

The module explores the development of terrorism and political violence in various historical, political and geographical contexts, and through a variety of theoretical lenses. This module provides an introduction to the study of terrorism, political violence and their threat to global security. It aims to deepen students' existing knowledge of the threat of terrorism to world peace. The module focuses in greater detail on various forms of terrorism and political violence: dissident/non-state terrorism; counter-terrorism and counter-insurgency; state terrorism; 'new terrorism'; and torture.

HPLG 405 Environmental Governance and Management

The module seeks to analyse the relationship between environmental governance and management. The modules explore the whole range of rules, practices, and institutions related to governance and management of the environment in different forms such as conservation, protection, exploitation of natural resources etc.

HPLG 406 Media and Governance

This module examines the impact of media on the governance of any nation. It seeks to explore the different roles media plays in conflict situations. It explains the positive and negative roles that can be potentially played by the media through representation techniques. This module also considers the many, and often conflicting roles of the media in conflict and peace-building processes. It raises questions of 'who' controls the media institutions and with 'what' effect when it comes to issues of peace and conflict.

HPLG 407 Transnational Organised Crimes

This module seeks to analyse the dynamics, international legal framework and best practice guidelines to prevent and suppress TOC such as smuggling, human, arms and drug trafficking etc. The module also seeks to analyse national, regional and international strategies to investigate such crimes and prosecute offenders.

HPLG 408 Diplomacy

This module seeks to help students obtain knowledge on bilateral, regional and multilateral diplomacy and its applicability in the Global system. The module covers areas such as diplomacy legal framework, traditional and modern diplomacy, methods of conducting diplomacy, diplomatic functions, diplomatic privileges and immunities, and international agreements.

HPLG 409 Dissertation

Students shall research a topic of their choice concerning pertinent issues in peace, leadership, governance and related issues. The maximum length of the dissertation should be 20 000 words.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN HUMANITARIAN EMERGENCY AND DISASTER RISK MANAGEMENT (DHEDM)

Duration	1 year
Actual Credit Load	324
Minimum Credit Load	270
Maximum Credit Load	340
ZNQF	9

1.0 PURPOSE OF THE PROGRAMME

The course is designed to provide students with the requisite baseline knowledge of the discipline that ultimately will translate into informed effective decision-making in a situation of humanitarian response and disaster management settings. Threats to human security come in forms such as natural disasters (environmental, hydro-meteorological, geological, biological) and man-made disasters (technological, war, biological weapons, terrorist attacks, genocide, and political violence, among others). This programme examines the nexus between humanitarian response and disaster management while imparting students with skills on how to appropriately respond to disaster situations. The programme aims to capacitate students to conduct informed research that promotes effective management of humanitarian emergency and disaster management.

2.0 ENTRY REQUIREMENTS

At least a 2.1 pass in any relevant social science degree programme

3.0 COURSE CHARACTERISTICS

Area of Study

Humanitarian Emergency and Disaster Risk Management

The programme intends to provide a general concept in the dimensions of natural and man-made disasters. The programme examines tools and theories with regard to human security before, during and post-disaster. It focuses on the interconnection between humanitarian emergencies and disaster management.

a) Theoretical Constructs

Modules in the programme focus on typologies of disaster, impact, information and documentation system, management cycle and framework of management, vulnerable population, human security intervention techniques, and research methodologies.

b) Practical Methods

The programme focuses on different research methodologies, philosophies and approaches that unpack the phenomena of disaster and management, which encourages students to think critically and coherently about human security.

Specialist Focus

Humanitarian Emergency and Disaster Management

Orientation

Research and innovation-oriented. Teaching, learning and research focus are instrumental in empowering students. The programme also equips students with theoretical and practical concepts in the area of humanitarian emergency and disaster management.

Distinctive features

The programme focuses on knowledge, development and application of a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER OPPORTUNITIES

Employability

The Diploma enhances career opportunities in both the public and private sectors such as;

- Research and consultancy,
- Teaching and lecturing,
- Non- Non-Governmental Organisations.
- Government institutions

Further studies

Master's in Humanitarian Emergency and Disaster Management and/PhD in Disaster and Human Security/Peace Studies

5.0 PROGRAMME DELIVERY

Teaching and learning methods

Lectures, tutorials, seminars, group work, group discussions, field visits presentations, public lectures, practicals, guest lecturers, lecture notes.

Assessment Methods

Continuous supervision and assessment, tests and written examination.

6.0 INTENDED LEARNING OUTCOMES

On successful completion of the course, students must be able to:

- Conceptualise and describe disaster management and humanitarian emergency, and related terms and theories under this programme.
- Promote permanent defence and safety against natural and or human-induced disasters
- Assess the impacts of disaster on people's whole spectrum of life
- develop disaster risk reduction and emergency response training programmes in conjunction with relevant partners for human security thrust.
- Use appropriate research methods to create new insights into humanitarian emergency and disaster management.
- Develop new disaster and human security management models and initiatives, policies and practices that enhance organisational effectiveness.
- Demonstrate knowledge of the key issue areas of humanitarian emergency and disaster management;
- Evaluate local and international efforts to protect human security;
- Appreciate the methodological, logistical and conceptual challenges for research on human security issues.

7.0 GENERAL PROVISIONS

- The Post-Graduate Diploma is a 12-month programme building from an undergraduate degree.

GENERAL PROVISIONS

- Refer to the University's General Regulations.

8.0 PROGRAMME ASSESSMENT

- Coursework:40%: Test (15%), Practical (20%), Assignments (5%)
- Written Examinations 60%

9.0 PROVISION FOR PROGRESSION

- Refer to section 6 of the university's General Regulations

10.0 FAILURE TO SATISFY EXAMINERS

- Refer to section 9 of the university's General Regulations

11.0 GRADING AND CERTIFICATE CLASSIFICATION

- Refer to section 10 of the Faculty Regulations.

12.0 DIPLOMA WEIGHTING

- Refer to section 11 of the Faculty Regulations.

DHEDM 609 Counselling in Disaster Situations	18

14.0 MODULE SYNOPSES

LEVEL: SEMESTER 1

DHEDM 501 Introduction to Humanitarian Emergency and Disaster Risk Management

The module introduces students to the underpinning concepts of disasters and humanitarian emergencies in local communities and beyond. The module specifically focuses on introducing and developing knowledge concerning the causes and impacts of disasters and the mitigation of global issues around the events. Through this module, students are expected to appreciate disaster simulations and identify the different responsibilities of individuals and agencies during an emergency.

DHEDM 502 Dimensions of Disasters in a Changing World

The module identifies the topologies of hazards and their differences in occurrence and impact on human security. They are grouped as natural disasters (environmental, biological, hydro-meteorological and geological) as well as human-made disasters (technological: biological/chemical disasters as well as war).

DHEDM 503 Responses, Recovery and Rehabilitation

The module focuses on the preparedness and implementation of building back better the affected communities through relevant intervention strategies or programmes according to the typology of the hazard. The module equips the students to perceive preparedness as a great opportunity to ensure corrective actions towards human security.

DHEDM 504 Research Methods

The module introduces students to advanced qualitative and quantitative research methods in sync with disaster management and human security thrust.

DHEDM 505 Information and Documentation System in Disasters
The module explores the significance of emergency information management, disaster survival skills and lifeguarding information and communication, dissemination procedures, documentation process and documentation centres. It further considers victim recognition, rescue and first aid skills, legal, ethical and policy issues in disaster information and communication.

Electives (Choose Two)
DHEDM 506 Poverty, War, and Human Security
This module focuses on the causes and consequences of poverty and war from the viewpoint of human security. Furthermore, it acquaints students with the institutions and organisations, economic, social, political and military conditions that affect the opportunity and risk in the lives of everyone on this planet. It also identifies approaches to improve local and global institutions and organisations that assist in managing threats to human life across the globe.

DHEDM 507 Disaster Displacement and Vulnerable Populations in Africa
The module explores displacements and vulnerable groups of disasters. The module also unpacks disasters' impact on environmental, socio-economic, physical, psychological and political dimensions.

DHEDM 508 State, Civil Society and Disaster Management
The module examines the interaction between state and civil society organizations in responding to disaster events. Changes in geo-political and economic order are discussed given intervention into a disaster-affected context, resultant reconstruction and mitigation strategies and their implications as far as international policy is concerned.

LEVEL: Semester 2
DHEDM 601 Disaster Preparedness and Vulnerability Reduction
The module focuses on basic principles of preparedness; getting informed, emergency planning and checklists, simulation and maintaining disaster preparedness plans according to the nature of the disasters. It focuses on disaster preparedness in selected regional communities as well as challenges in disaster preparedness and vulnerability Reduction.

DHEDM 602 Media and Disaster Management
The module focuses on the potential of the media in escalating and de-escalating crises in crisis epochs. The module also takes students through the best practices of media reporting by focusing on the tools and techniques that can be employed to further their emergency response missions.

DHEDM 603 Drought, Famine and Food Security
The module focuses on famine issues and their impact on human security. It assesses various types of drought, factors causing drought and the impacts. It also explores factors that lead to famine as well as societies' mitigatory and coping strategies.

DHEDM 604 Gender Issues in Disaster Management
The module focuses on how women and men are affected differently by disasters. It specifically focuses on the differentiated outcomes of disaster impacts. It also focuses on how gender inequality influences the way women and men react, are impacted and recover from disasters.

DHEDM 605 Disaster Prevention and Preparedness
The module explores emergencies, risks and disasters in a community and focuses on the mitigation and implementation of methods to reduce natural and man-made crises. It pays attention to the local conditions that cause and complicate human security. The focus is also on human rights, national security, human security or economic development. It explores disaster response and effective ways to tackle crises.

DHEDM 606 Research Project
Students shall carry out research on a topic of their own choice with the scope of disaster management and human security-related issues. The maximum length of the dissertation should be 10 000-15 000 words.

Electives (Choose Two)

DHEDM 607 Disaster and Health Dynamics

This module considers what is involved in an emergency health area. It identifies risk factors for communicable diseases and the need for preservation of life and health. This involves medical professionals and relevant local and international supporting stakeholders. It also explores related diseases, control and handling, nature of challenges and constraints faced by disaster management personnel during and after a disaster.

DHEDM 608 Disaster Management Monitoring and Evaluation
The module provides the students with skills to identify the causality between intervention, public policy and its results.

DHEDM 609 Counselling in Disaster Situations

The module focuses on equipping students in disaster response and crisis counselling. It traces the immediate aftermath of a tragedy needs through imparting knowledge on safety and stabilisation. It also discusses psychological intervention strategies and the counsellors' roles and responsibilities as members of an emergency management response team during a local, regional, or national disaster as a human security measure.

REGULATIONS FOR POSTGRADUATE DIPLOMA IN PEACEKEEPING AND CONFLICT RESOLUTION (DPCR)

Duration:	1 year
Actual Credit Load:	306
Minimum Credit Load:	270
Maximum Credit Load:	340
Maximum MBKs credit Load:	210
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

The purposes of the programme are:

1.1 To equip students to identify and analyse mechanisms of peacekeeping and conflict resolution, to understand those processes which lead to a more desirable human condition.

1.2 To guide students through contemporary research methods in peacekeeping and conflict resolution, and ethical procedures guiding the discipline.

1.3 To impart critical analytic thinking to students, teaching them that it is not possible to study a conflict based on one single phenomenon. By using an interdisciplinary approach to studying peace, security and development, students learn different aspects of societal development work together.

2. 0 ENTRY REQUIREMENTS

At least a 2.2 pass in any relevant social science degree programme or 2 years of relevant experience.

3.0 PROGRAMME CHARACTERISTICS

The Post-Graduate Diploma in Peacekeeping and Conflict Resolution is a two-semester part-time programme structured to meet Peacekeeping and Conflict Resolution needs in Zimbabwe, the region and beyond.

4. 0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

Graduates have career opportunities in a wide array of disciplines which include the following;

- Public Administrators in Central Government Ministries and Local Authorities (Rural and Urban),
- Community Development Officers
- Project Managers in Civil Society Organisations and Non-Governmental Organisations
- Lectureship
- Further education: Masters studies in Peace Studies

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

1. Ability to demonstrate knowledge and understanding in Peacekeeping and Conflict Resolution.
2. Ability to use principles of peacekeeping, conflict and reconciliation issues to gain a critical understanding of current problems and challenges in peacekeeping, peacebuilding, reconciliation, security and post-conflict development.
3. To be able to use the necessary skills for peacekeeping and conflict resolution processes.

4. Use appropriate research methods to create new insights into peacekeeping and conflict resolution.
5. Communicate effectively and present information using multimedia to both experts and non-experts in the field of peace studies.

7.0 GENERAL PROVISIONS

7.1 The Postgraduate Diploma in Peacekeeping and Conflict Resolution is a one-year programme

7.2 To progress to the next semester, a student is required to have passed at least all the core modules.

7.3 To complete the programme a student must at least pass all the core modules.

7.4 The number of modules taken by any student from outside the department may be restricted and optional modules are offered subject to availability of staff in the department.

8.0 PROGRAMME ASSESSMENT

Formal examinations will normally be held at the end of each semester.

8.1 Continuous assessment shall account for 40% of the overall assessment while the final examination will account for 60% of the overall assessment.

8.2 Marking Scheme and Diploma Classification. Refer to section 12 of the General Academic Regulations for Postgraduate Diplomas and Taught Masters.

9.0 PROVISION FOR PROGRESSION

Refer to Section 6 of the Faculty Regulations

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13.0 PROGRAMME STRUCTURE

14.0 MODULE SYNOPSES

DPCR 631 Introduction to Peacekeeping and Reconciliation

The module dwells on important theories that inform peacekeeping and reconciliation processes and their relationship to development. It also introduces students to key issues and debates in peacekeeping and conflict studies.

DPCR 632 Religion Peacekeeping and Reconciliation

The module examines the role played by religion in maintaining peace and creating space for reconciliation in societies. It emphasises the central role that religion plays in comprehending peace and reconciliation processes.

DPCR 633 Human Rights, Law and Transitional Justice
The module enables students to attain knowledge of human rights law and to develop their understanding of a unique branch of law dealing with current humanitarian problems. In this module, students are equipped with knowledge of the nature of, and theories behind, human rights law. Mechanisms of enforcement of human rights law, transitional justice theory and practice for sustainable peacekeeping are also covered in this module.

DPCR 634 Research Methods and Statistics
The module is intended to enable students to understand the techniques widely used in gathering, interpretation, analysis and presentation of data in social research. Students will be equipped with statistical training that will help them in tabulating quantitative data.

DPCR 635 Project Management
The module is primarily about the rationale, context, and methods of planning, appraising and evaluating development projects and programmes. The module primarily focuses on appraising the financial and economic efficiency of peacekeeping-related projects. The module covers planning and management techniques for the project cycle; including project identification and logical framework analysis.

DPCR 637 Communication and Human Factors in Peacekeeping
The module dwells on communication and human factors as they address conflicts, maintain peace, and resolve conflict. The course integrates challenges to effective communication caused by interpersonal, intrapersonal, intergroup, or intra-group conflict and the role of communication in resolving such conflicts; thus focusing on the various psychological, social, cultural and emotional aspects of conflict and efficient communication strategies.

DPCR 636 Psychology of Peacekeeping and Conflict Resolution
The module explores basic psychology such as its meaning and origins. The module discusses the various psychological approaches and concepts in peacekeeping and conflict resolution. These concepts prepare students to be in a position to observe and predict human behaviour in peace and conflict issues.

DPCR 638 Gender and Conflict
The module is designed to help students develop a critical understanding of basic gender issues in regard to peacekeeping and conflict resolution. The module adopts an interdisciplinary and multidisciplinary approach that takes as its subject matter on aspects of peacekeeping and conflict resolution. The varied roles played by men and women in peacekeeping and reconciliation are also explored.

DPCR 639 Mediation and Conflict Analysis
The module explores the cause and effects of different forms of conflict around the world. The module tries to understand conflicts between states and conflicts within states, explaining their effects and describing their dynamics to prepare actors, be they state governments, international organisations and individuals, to better manage conflict peacefully, or to prevent it in the first place.

DPCR 640 Peacebuilding and Conflict Transformation in Africa
The module focuses on the causes, challenges and opportunities of peacekeeping and Reconciliation in Africa. It also examines the diversity and complexity of conflicts and cases of successful conflict, peacekeeping and reconciliation in Africa.

DPCR 641 International Institutions and Peacekeeping
This module identifies the contributions of international institutions to peacekeeping and reconciliation processes. The module aims to equip students with knowledge about international actors and how the law is applied and implemented in international politics, with a focus on international peace and security.

DPCR 642 Migration, Displacement and Peacebuilding
The module focuses on forced migration as a result of conflict. Physical and psychological experiences faced by migrants in transit as well as in the host countries will also be explored. The module will look at possible ways to foster peace and reduce incidents such as xenophobia against these migrants.

DPCR 643 Dissertation
Students shall research on a topic of their choice concerning pertinent issues in peace, conflict, reconciliation and related issues. Students are to prepare and present a dissertation based on the concepts learnt in Research Methods and Statistics module. The guidelines for the dissertation are based on the basic skills of research and report writing which include the development of a research problem, formulation of research objectives, research methodology, data analysis, results and discussion, conclusion and recommendations.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN GLOBAL PEACE AND SECURITY STUDIES (MGPSS)

Duration:	18 months
Actual Credit Load:	306
Minimum Credit Load:	270
Maximum Credit Load:	360
Maximum MBKs Credit Load:	216
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME

- This programme is designed to equip students with both theoretical and practical skills in global peace and security studies
- The MSc in Global Peace and Security Studies offers a unique opportunity designed to enhance the understanding of conflicts in all their dimensions and to explore innovative approaches to their management, resolution and transformation.
- The Master's Degree is suitable for professionals, graduate students, young researchers and other academics interested in enhancing their understanding of peace and conflict studies and acquiring skills to better address them.

2.0 ENTRY REQUIREMENTS

Normal Entry: A 2.1 pass in BSc Honours Peace and Security Studies or related fields

Special Entry: A general degree and any other qualification line with the Zimbabwe National Qualifications Framework (ZNQF)

3.0 PROGRAMME CHARACTERISTICS

- Part-time one and half year Master's programme with flexible course formats
- Innovative and interactive teaching, delivered by an outstanding faculty of scholars, practitioners and trainers
- The course offers a bridge between the disciplines and perspectives of global peace and security studies
- Its approach provides a strong link between theory and actual practice
- Intensive skills training and policy workshops
- The module content links students to real-life issues and challenges of policy-makers and practitioners

Areas of study: global governance, international order, diplomacy, transnational policy international law, Gender and international relations and international crisis monitoring systems
Specialist Focus: global governance, international order, diplomacy
Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on practical aspects.

Distinctive Features: The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach

4.0 CAREER OPPORTUNITIES

Career Prospects: Diplomatic service officers, Government officers, Intelligence officers and analysts, Policy officers, and Civil service officers.

Further Studies: Doctoral in Global peace and Security Studies

5.0 Programme Delivery

Teaching and Learning Methods: Lectures, Group research and discussions and individual study

Assessment Methods: Oral presentations, written assignments, and Tests.

6.0 Intended Learning Outcomes

On the successful completion of the MSc in GPSS, students will,

Be introduced to the various nature and forms of conflict, approaches to conflict management and conflict resolution and also an understanding of some of the new approaches like comprehensive security and human security.

Have broader knowledge of the contemporary global, regional and strategic settings of the security environment in the world.

Be able to understand the strategic nexus between national and international interests and their roles in peace safeguarding.

Develop core competencies in global security affairs by building capacity on essentials of Security through theory and practice.

Acquaint themselves with the concepts of modern strategic thinking and an understanding of various dimensions of warfare in the conventional and nuclear context.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Global Peace and Security Studies Degree is an 18 months programme

8.0 PROGRAMME ASSESSMENT

Continuous Assessment: Written assignments, workshop reports, seminar and group presentations, in-class tests, and any other relevant assessments contribute 40% to the final mark.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

13.0 Programme Structure

14.0 Module synopses

MGPSS 701 Global, Peace and Security
The module focuses on key theories and debates on the fundamental origins of conflicts and the evolving nature of warfare in human history and major conflict resolution approaches to peacebuilding. The module also assesses violent conflicts globally and possible solutions for lasting peace as part of global governance.

MGPSS 702 Gender Peace and Conflict
The module offers various lenses through which students can assess the complex concept of gender and the inequalities that exist in their societies. The module stresses rethinking conflict from a gender perspective through critical analysis of the different roles women and men play in the conflict.

MGPSS 703 Research Methods
The module focuses on developing students' advanced conceptualisation of problems and assisting them in generating qualitative and quantitative solutions based on empirical evidence. The module equips students with practical research skills and the advanced methodological expertise necessary to make a practical contribution to the development of peace studies and social science research in general.

MGPSS 704 Theory of Intelligence Strategy
In an increasingly interconnected, contested and complex world, international actors face a range of security challenges. This module intends to examine and enhance students with competing theoretical approaches to global security. Also, it embraces the policy and strategic contexts that influence the decisions, institutions and processes of national security, policy-making and security sector governance.

MGPSS 705 International Institutions and Peacekeeping in Africa
This course introduces and explores the history, institutions, core policies and impact of the United Nations, African Union and the Regional Community peacekeeping missions in the context of contemporary global peace and conflicts. It addresses humanitarian responses and contemporary human rights challenges in conflict zones, including forced displacement, ethnic cleansing and debates regarding the responsibility to protect.

MGPSS 706 Media Conflict and Communication
This module examines the rudimentary role of communication in escalating, managing and conflict prevention. The module will make use of pertinent case studies to illustrate the potential of media in the escalation of management conflicts.

MGPSS 707 Conflict Transformation Process
This module offers various models of conflict transformation practice and engages in scholarly reflections in dealing with conflicts, models' weaknesses and strengths. The process identifies key driving factors of destructive conflict with actions to transform institutions and discourses that justify and reproduce direct, cultural and structural violence at the global, national and local levels to achieve peace. Identification of case studies is of paramount importance.

MGPSS 708 International Law
The module focuses on the theoretical role and function of international law in regulating relations between states and resolving international disputes. It introduces students to several theoretical frameworks which assist them in evaluating international law historically and in context. It will provide students with knowledge and understanding of the origins and development of international law and its key concepts, principles and rules. The module will enable students to consider the relevance, or otherwise, of international law to contemporary international problems and to critically assess its limitations and effects.

MGPSS 709 Terrorism, Counterterrorism and (De)Radicalisation.
The module intends to enhance the conceptualization of ideological, strategic, and tactical idiosyncrasy that is posed by global terrorism, radicalisation and counter-terrorism measures being implored in the 21st century in both spheres of the Globe to ensure the prevalence of peace.

MGPSS 710 Crisis Monitoring and Conflict Early Warning System
The module focuses on the concepts and practices of early warning mechanisms identification as a fundamental way of preventing violent conflicts in human society. Attention is also given towards the complexity of conflicts, the anticipation of conflict, the role of governmental and non-governmental organisations in intelligence gathering, early warning analysis and how to ensure an early response.

MGPSS 711 Transnational Organised Crime
The module focuses on the causes and occurrence of various forms of transnational organised crime, and the countermeasures that have been established by various states and regional Integration Blocs. The applicability of both State law and International Law in the combating of various criminal acts and analysing the socio-economic drivers of transitional organised crime.

MGPSS 712 Diplomacy and Global Governance
The module focuses on the importance of diplomacy, how diplomatic etiquettes have been used in Global governance in the attainment of peace, impending security threats and the International relations arena.

MGPSS 713 Dissertation
Students are expected to carry out research on a topic of their choice concerning pertinent issues in Global Peace and security under the guidance of a supervisor. The dissertation should have a maximum of 90 pages.

SYNOPOSES

Level 1 Semester 1

MPG 701 Theories and Concepts of Gender

This module focuses on key debates in gender studies. It also explores historical feminist theories and contributions of notable to contemporary feminist thought. The module aims to provide students with skills to be able to transfer these concepts/ideas to contemporary issues thereby highlighting the interconnectedness of feminist philosophy and practice.

MPG 702 Gender, and Security Sector

The module seeks to provide students with an understanding of how the relationships and roles of men and women are affected by conflict. It also assesses how gender impacts conflict dynamics in peacekeeping, peace-making and peacebuilding. The module also seeks to provide military, police and civilian personnel with the knowledge and skills of operational-level planning, coordination and conduct in the promotion of gender mainstreaming in Peace Operations.

MPG 703 Gender, Peace and Security

The module will focus on the interconnectedness of security, peace and gender issues exploring the events that are unfolding in the international relations arena. The United Nations Security Council resolution 1325 recognises the nexus between gender peace and security matters hence the module will highlight women in the war between victimhood and empowerment, gender and peacekeeping, feminist approaches to Transitional Justice and Women in media and post-conflict reconstruction.

MPG 704 Research Methods in Gender, Peace and Security

This module focuses on a mixture of qualitative and quantitative research methodology that reflects an interdisciplinary approach to gender peace and security studies. It focuses on research gaps relating to gender peace and security and possible solutions that foster sustainable development in societies.

MGP 705 Religion, Gender and Ethics in Africa

The module explores the correlation of themes on gender, religion and conflict in Africa. The module analyses the discourses of African women being victims of war and conflict and how indigenous religions have been ostracised. The module will focus on the relationship between gender studies, religious studies and ethics on how African women have used the context to wage war or ensure peace.

Electives

MPG 706 Human Security and Displacement

The module highlights the issue of governance of forced migration with a major impetus on refugees and their experiences. The module will identify various dynamic factors responsible for forced displacement. The module will also look at the associations of refugees, international society and the international order with a major emphasis on refugee agencies' human rights and refugee law. The significance of gender identities, roles and relations will be undertaken and the protracted nature of refugees to current frameworks and approaches.

Level 1 Semester 2

MPG 707 Migration, Citizenship and Conflict.

The module focuses on issues of transnationalism, migration and development. It specifically examines the dynamics of refugees, citizenship, integration and cultural diversity through the exploration of migration processes and their consequences in contemporary societies. Students will also explore governance and rights that are related to migrants.

MPG 708 Gender, Conflict and Media

The module analyses the media's function and context of the media fraternity in conflict regions. It will elaborate on issues and debates on the media and crisis communication and also underscore the difference between conventional reporting. The module focuses on how the media's role can influence conflict escalation, prevention and peacebuilding globally and how to harness the Issue of Gender.

MPG 709 Gender Rights and International Law

This module focuses on Students on post-conflict legal mechanisms governing peacekeeping, peacebuilding, peace agreements, transitional justice and women, peace and security from a gender perspective. The module also focuses on feminist protest, law reform and legal reform and the involvement of women in post-conflict from war to peace.

MPG 710

Electives

MPG 711 Peace, Leadership and Governance
The module Peace Leadership and Governance aim at equipping students with conceptual and practical skills about peace and conflict. It specifically handles the intrinsic, dynamic relationship between peace, politics, governance, and democracy. The module explores the history of leadership styles from traditional to contemporary styles of governance and analyses their advantages and disadvantages in conflict prevention. The students are equipped to diagnose various modes of leadership and governance. The module also aims to assess the various leadership etiquettes of governance and whether they are transparent and foster democracy to ensure stability within states. In a way, the analysis would also make the students decide on the best leadership practices to preserve and maintain peace. The module also examines different modes of leadership in the context of progress and peace. It underscores issues and dilemmas prompted by democracy in Africa with specific reference to good governance, poverty alleviation and development concerning matters of evaluation and monitoring of governance of human rights.

MPG 815 Dissertation
Students are expected to research a topic of their choice concerning pertinent issues in Gender and Peace studies under the guidance of a supervisor.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN PEACE, SECURITY AND DEVELOPMENT (MPSD)

Duration:	18 months
Actual Credit Load:	270
Minimum Credit Load:	270
Maximum Credit Load:	316
Maximum MBKs Credit Load:	316
ZNQF Level:	9

1. Purpose of the programme
The programme prepares students to develop a critical appreciation of how to manage Peace, Security and Development issues.

This unique M.Sc programme provides students and professionals with comprehensive knowledge and skills on issues of sustainable development and peace

The programme is designed in an integrated way and encourages critical awareness which is a pre-requisite for creative thinking.

2. Entry Requirements
Normal Entry: An Honours degree in Peace and Security Studies, International Relations, Politics, Development Studies, or any relevant Social Science Degree or qualification with a pass of an upper second class (2.1) or better.
Applicants possessing lower degree class may be considered on condition that they submit verifiable evidence of a minimum of two years of working experience.

3 PROGRAMME CHARACTERISTICS
The programme is 18 months long and intends to equip students with both academic and practical skills that enable them to work in the Peace, Security and Development fields through research and academic studies.

Areas of study Theories for peace security and development, Gender peace and development, Research methods and Statistics, Disaster management, Governance and Development in Africa, Peace Economics and Development, Conflict analysis and transformation, Migration and Human Security, Human Rights and Social Justice for Development, Security Intelligence, Diplomacy, Youth Conflict and Development, Transnational Organised Crimes, Dissertation and Crisis Monitoring and Early Warning Systems.

Specialist focus Peace, Security and Development with an emphasis on theory and community engagement.

Orientation Research and innovation-oriented. Teaching and learning are professionally oriented and focused on theory and practice in peace, security and development.

Distinctive features The programme builds the research-technology-innovation continuum and focuses on knowledge development and application using a student-centred approach.

4 CAREER OPPORTUNITIES AND FURTHER STUDY

Diplomat; Field Officer; Non-profit Director; Development, Communication Specialist; Press Officer; Policy Officer; Legal Advocate; Conflict Resolution Expert; Consultant; Human Resources and Trauma Specialist; or Researcher.

5.0 PROGRAMME DELIVERY

Lectures, tutorials, seminars, group work, presentations, public lectures, practicals, guest lecturers, and lecture notes.

6.0 LEARNING OUTCOMES

On successful completion of this programme the graduate will be able to:

1. Ability to demonstrate knowledge and understanding of peace, security and development that will enable organisations to achieve both operational and strategic goals.
2. Ability to apply resourcing strategies which encompass peace and development.
3. To use appropriate conflict resolution strategies such as mediation, and negotiation that address conflict and disputes in the organisation.
4. To create human capital development programmes that improve and sustain organisational performance through.
5. Ability to innovate and apply cost management tools and techniques to increase development in the communities.

7.0 GENERAL PROVISIONS

7.1 The Master of Science in Peace Security and Development Degree is an 18-month programme.

8.0 PROGRAMME ASSESSMENT

Continuous Assessment: Written assignments, workshop reports, seminar and group presentations, in-class tests, and any other relevant assessments contribute 40% to the final mark.

Written Examinations: End-of-semester examinations constitute 60% of the final mark.

9.0 PROVISION FOR PROGRESSION

9.1 Refer to Section 6 of the Faculty Regulations

9.2 A student must pass MPSD 703 which is Research Methods and Statistics to do a dissertation.

10.0 FAILURE SATISFY EXAMINERS

Refer to Section 9 of the General Regulations for Undergraduate Degrees.

11.0. GRADING AND DEGREE CLASSIFICATION

Refer to Section 10 of the Faculty Regulations

12.0 DEGREE WEIGHTING

Refer to Section 11 of the Faculty Regulations.

14.0 MODULE SYNOPSES

MPSD 701Theories for Security and Development
The module explores the theoretical approaches and strategies for peace, security, development and practice. It also introduces students to key theoretical and practical issues and debates in peace, security and development. The module traces the history of key components as new sub-disciplines and highlights global developments that continue to make it dynamic and relevant.

MPSD 702Gender, Peace and Development
This module examines the theoretical approaches to gender peace and development, development theory, and feminist critiques. It examines gendered expectations and power relations in conflict and peace processes. The varied roles played by men and women in peacebuilding processes are also explored.

MPSD 703Research Methods and Statistics
The module helps students to develop advanced research methods in peace and development problems to assist them in generating qualitative and quantitative solutions based on practical evidence. The module equips students with practical research skills and advanced methodological expertise needed to come up with scientific answers to peace and developmental problems and to feed these answers into the policy process. The students will be able to apply relevant statistical methods in addressing peace and development problems.

MPSD 704Disaster Management
This module explores issues of disaster, conflict governance and global policy perspectives for disaster risk reduction. It focuses on the adaptation and transformation of societies that are affected by human-made and natural disasters. The module also critically analyses participatory disaster governance, the role of decentralization of disaster resources and responsibilities and best practice principles in preparedness, mitigation, response and recovery.

MPSD 705Governance and Development in Africa
The module examines aspects of the structures and processes of regional governance, especially within the African continent. This module also takes a comprehensive and critical look at international development examining what it has accomplished in the twentieth century and what form it should take in the twenty-first century. The module broadly explores major debates and theories of peace, governance and development paying particular attention to the dialectics of their relationships.

MPSD 706Peace Economics and Development
The module introduces students to the state's institutional and structural arrangements, decision-making processes, and policy formation and implementation. The module will explore the importance of peace in any country and its usefulness in the economic development of any society. It acknowledges the link between an inclusive democratic government to a peaceful and economically stable society. The module examines the linkage between peace, economy and development.

MPSD 710 Conflict Analysis and Transformation

The module introduces students to the principle approaches of conflict analysis and transformation. The module will discuss the extensiveness of conflict in human existence and engage students in conflict transformation approaches. The module will rely on case studies and simulations to help students engage directly and better grasp the different theoretical approaches. The students will emerge from the module with knowledge of the central paradigms and concepts of conflict analysis and transformation.

MPSD 711 Migration and Human Security
The module will explore the impact of experience faced by migrants and communities involved in migration, both in sending, receiving and transit states. In this module, all seven essential areas will be discussed on how they are affected or how they are affected by migration. The module will be framed by concepts of human security, and theoretical and conceptual methodologies to the general welfare of forced migrants.

MPSD 712 Human Rights and Social Justice For Development
The module explores the concepts of social justice and human rights which interrelate. The module focuses on various problems that arise in particular socio-economic, cultural or religious contexts and it also unravels the effects or impact of human rights abuse and social injustice in different societies. Students shall also gain knowledge and understanding of various social perspectives on human rights and develop anti-discriminatory practices to promote humans in communities.

MPSD 713Security Intelligence
The module looks at global politics and diplomacy in the 21st century which are increasingly underpinned by questions of security, both as a threat and as policy. The module allows for the development of specialist knowledge and application. Furthermore, the module helps to prepare graduates for careers in foreign and other ministries, international organisations, international journalism and global civil society organisations or for further research.

MPSD 714 Diplomacy
The module introduces the student to diplomatic skills that are used in ending conflict. It introduces students to both Western and African indigenous ways of diplomacy. Emphasis will be placed on the modern pioneering influence of diplomacy through the Treaty of Westphalia, Congress of Vienna and Paris Peace Conference to contemporary diplomatic practice.

MPSD 715Youth Conflict and Development
The module focuses on the role that the youth play in conflict and peace processes. Their involvement in violent conflict, and peace-building processes as well as their potential contribution to the socio-economic and political development of Africa is examined.

MPSD 716Transnational Organised Crimes
This module analyses the changing aspects, international legal documentation and best practices to avert Transnational Organised Crimes such as smuggling, human, arms and drug trafficking etc. The course also seeks to analyse national, regional and international strategies to investigate such crime and prosecute offenders. The module gives students a broad understanding of current forms and features of transnational organised crime and related international conventions.

MPSD 801Dissertation
Students carry out research on a topic of their choice concerning pertinent issues in Peace Security and Development under the guidance of a Supervisor. Students shall research a topic of their choice concerning pertinent issues in peace, security, development-related issues. The minimum length of the dissertation should be 20 000 – 40 000 words.

MPSD 802 Crisis Monitoring and Early Warning Systems
This module provides an introduction to the multiple facets of crisis monitoring and the fundamentals of early warning system designs, development and implementation. The module explores issues of using monitoring and early warning systems in enterprise conflict management with a focus on Peace and Development. It emphasises the need to monitor crisis indicators to enable a conflict-free, progressive community.

SCHOOL OF SOCIAL WORK

REGULATIONS FOR CERTIFICATE IN SOCIAL WORK (CSW)

Duration:	12 months
Credit Load:	156
Minimum Credit Load:	156
Maximum Credit Load:	156
Maximum MBK Credit Load:	156
ZNQF Level:	7

PURPOSE OF THE PROGRAMME

The programme also aims at producing para-social workers with the competencies to work in statutory and non-statutory settings as social work support workforce and/or are working in social work-related settings but want to attain or upgrade skills for career advancement.

ENTRY REQUIREMENTS

For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language at grade C or better.

Normal Entry: Five Ordinary Level subjects/ National Foundation Certificates including English Language at grade C or better.

PROGRAMME CHARACTERISTICS

Areas of Study: Social Work.
Orientation: Introductory Social Work.
Distinctive Features: The programme introduced students to social work methods, concepts, principles, values and ethics.

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Certificate in Social work graduates can work in a variety of settings as a social work support workforce.

Further Studies: **Diploma in Social Work and** Bachelor of Science Honours Degree in Social **Work** (Mature Entry).

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, role plays, seminars, group work, field-based activities, work-related learning, dissertation, and individual independent study.
Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports, seminar presentations, work-related learning reports, dissertations and continuous assessment.

LEARNING OUTCOMES

On successful completion of this programme, the graduate will be able to:

- Know how to intervene at the individual, family, group and community levels to restore social functioning.
- Explore his/her values, identities and ideological perspectives and have a clearer appreciation of the influence of the same on social work practice.
- Have a good appreciation of social work methods and their utility to social work practice.
- Apply the knowledge learnt to practical situations to enhance the resilience of vulnerable populations.
- Acquire and develop practical skills and/or competencies to work with a variety of vulnerable groups through mentored fieldwork/industrial attachment placements.
- Have the pre-requisite knowledge base and skills to support and complement social workers at all levels within diverse practice settings.

GENERAL PROVISIONS

Refer to the University's General Regulations.

PROGRAMME ASSESSMENT

Coursework: 40%: In- class Test (50%), Assignments (50%)
Written Examinations: 60%
Other: a) Dissertation is assessed based on a research project (75%) and Oral presentation (25%).
b) Industrial Attachment/Work Related Learning is assessed based on the Industrial Attachment/Work Related Learning report (30%), assessment by Work Supervisor (40%), and assessment by Academic Supervisor (30%).

PROVISION FOR PROGRESSION
Refer to the University's General Regulations.

FAILURE TO SATISFY EXAMINERS
Refer to the University's General Regulations.

GRADING AND DEGREE CLASSIFICATION
Refer to the University's General Regulations.

WEIGHTING
Refer to the University's General Regulations.

MODULE SYNOPSES

CSW031 Introduction to Social Work
The module is intended to provide students with a foundational critical overview of the history, methods, purpose, values, principles and ethics of the social work discipline. The module will also allow the students to interrogate the role and efficacy of remedial social work practice in developing countries.

CSW 032 Communication Skills
The module will raise awareness among students on the importance of effective oral and written communication in social work training and practice. The module will also introduce students to the concept of how the acquisition of communication skills enhances assessment, decision-making processes and intervention in social work practice. The module will capacitate students to demonstrate effective and appropriate skills in communicating information and professional opinions to colleagues, clients (service users) and caregivers.

CSW 033 Introduction to Social Work with Individuals
The module is intended to prepare students for generalist social work practice with individuals. The module aims to equip students with an appreciation of social work concepts that underpin social work practice with individuals. The module will also introduce students to the principles, values and ethics of casework.

CSW 034 Introduction to Social Work with Groups
The module will examine the concepts and functions of social group work as a method of social work. The module will explore group dynamics in group work and the phases of group development. The module will also assess the role and functions of the social group worker and the relevance of group work practice in Zimbabwe.

CSW 035 Introduction to Social Work with Communities
The module will introduce students to strategies for agency and community engagement as well as community organising. It develops students' capacities to critically engage in reflection to address community problems of oppression, social exclusion and marginalisation.

CSW 036 Introduction to Social Work Research
The module introduces students to basic social work research, emphasizing the importance of evidence-based social work interventions using quantitative and qualitative research methods. Students will also be introduced to the basics of Monitoring and Evaluation of interventions as well as the basic analysis of data.

CSW 037 Introduction to Social Policy and Administration
The module will introduce students to social welfare policies, the policy formulation process and the challenges of policy implementation. The effects of social policy administration on marginalized and vulnerable populations will also be analysed.

CSW 038 Introduction to Social Services and Development
The module will introduce students to the domain of social welfare and social services provision. An attempt to define the concept of poverty will be made with an emphasis on the various comparative categories of poverty. The module will also interrogate the constraints to achieving the goals of social welfare services provision.

CSW 039 Introduction to Social Work with Children and Families
The module will introduce students to child development, parenting practices, family systems and common settings for social workers specializing in practice with children and families. Students will also be introduced to Zimbabwe's public/statutory child welfare and protection system and the relevant international, regional and national policy and legislative frameworks. The National Case Management System will be reviewed to give students an in-depth appreciation of the integrated and collaborative approach to the provision of child welfare and protection services to children.

CSW 040 Introduction to Community Health
The module will introduce students to the practice of integrated health primary care. Students will become knowledgeable of the social work roles of awareness raising and advocacy in the prevention of communicable and non-communicable diseases. The course will equip students with basic information on communicable and non-communicable diseases to enable them to recognise and understand health problems among their clients and refer them appropriately for treatment. Students will develop skills in engagement, assessment, intervention and supporting clients across a range of health conditions including HIV, substance abuse and mental illness.

CSW 041 Management of Welfare Organisations
The module will introduce students to management and accountability principles as they relate to social welfare organisations. Students will also learn about the basic management functions of planning, leading, controlling and organising and the application of these concepts in social welfare organisations. The module will also focus on the basics of administrative roles such as program development, resource mobilisation budgeting, data management, staff supervision, advocacy and program evaluation.

CSW 042 Social Work and Crisis Intervention
This module introduces students to basic crisis intervention skills to provide immediate and short-term responses to various client groups. The crisis intervention model will be explored as a possible technique. The scope of the module will encompass both man-made and natural disasters such as induced mass movement of people due to conflict, industrial accidents, famine, floods and earthquakes respectively.

CSW043 Work-Related Learning
The 12-week-long supervised practical fieldwork emphasizes the development of professional identity and conduct, professional values and ethics, and the skills of client engagement. The practical fieldwork placement will afford students an opportunity to blend learned social work methods with practice. The main objective of the practical fieldwork is to produce fully groomed results-oriented cadres who can competently practice using the knowledge imparted to them. Practical fieldwork placements must be preceded by a fieldwork orientation course to prepare students for field placement.

To ensure critical reflection of theoretical and practical issues among students the fieldwork placement will be held in between the blocks for the taught courses.

REGULATIONS FOR UNDERGRADUATE DIPLOMA IN SOCIAL WORK (UDSWK)

Duration:	3 years
Minimum Credit Load:	120
Maximum Credit Load:	180
Actual Load:	152
Total MBKs Credit	96

1.0 PURPOSE OF THE PROGRAMME

The Undergraduate Diploma in Social Work programme offers an introductory social work education that prepares students to practice at the entry point of social work qualification in a variety of social work settings. The programme also aims at producing social workers with the competencies to practice, not only in Zimbabwe but regionally and internationally as well. The programme introduces students to the genesis of socio-economic problems and their impact on human well-being.

2.0 ENTRY REQUIREMENTS

For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language at grade C or better.

2.1 Normal Entry

Five Ordinary Level passes/ National Foundation Certificates including English Language.

2.2 Special Entry

Candidates who have attained a Certificate in Social Work), awarded by a recognised university, college or institute.

3.0 PROGRAMME CHARACTERISTICS

3.1 Areas of Study

Social Work.

3.2 Specialist Focus

Social Work.

3.3 Orientation

Developmental Social Work.

3.4 Distinctive Features

The programme introduces students to the profession of social work using a student-centred approach.

4.0 CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1 Employability

Diploma in Social work graduates can work in a variety of settings and roles within civil society, the private and public sectors.

- Within the civil society development arena, social workers can assume roles such as project officer, programme officer, monitoring and evaluation coordinator, officer of welfare organisations, training and development facilitators, community development workers/officers, advocacy officers, disaster management officers and managers among other roles.
- In the public sector, social workers are employed in a range of roles which include among others, social welfare officers, school social workers, probation officers, counsellors, therapists, and social policy development roles.
- In the private sector, social work graduates are sought after to assume roles in occupational social work, human resources, training and development, change management consultants, customer service consultants and corporate social responsibility initiatives.

4.2 Further Studies

Bachelors, Masters and Doctoral studies in Social Work.

5.0 PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods**

Blended learning methods: Online and physical lectures; Online and physical tutorials, online and physical role plays, online and physical seminars, group work, field-based activities, work-related learning, dissertation, and individual independent study.

5.2 **Assessment Methods**

Written and oral examinations, tests, written and practical assignments, field reports, seminar presentations, work-related learning reports, research projects and continuous assessment.

6.0 LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Assess client systems and their social functioning.
- Plan and implement appropriate social work intervention strategies and techniques when working with individuals, groups and communities
- Plan, and execute social work research and utilisation of findings to inform social work intervention.
- Understanding how social welfare policies and legislation are developed and influenced.
- Understand roles, functions, knowledge and skills for effective social work supervision.
- Identify the purpose, functions and principles of social work within the developmental social work paradigm
- Formulate project plans for funding social services.
- Work effectively in an inter-sectoral and multi- and/or inter-disciplinary setting to deliver social services.
- Understanding of roles, functions, principles and characteristics of management and administration within social service delivery.

7.0 GENERAL PROVISIONS

The Diploma in Social Work is a three-year programme. Students go for work-related learning during the second level of semester two of study.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous assessment: 40%
In-class Tests (50%), Assignments (50%)

8.2 Written Examinations: 60%

8.3 Other:

a) Work Related Learning is assessed based on Industrial Attachment/Work Related Learning report (30%), assessment by Work Supervisor (40%), and assessment by Academic Supervisor (30%).

9.0 PROVISION FOR PROGRESSION

9.1 Students shall earn at least 64 credits per level to be allowed to progress to the next level.

9.2 To be allowed to take advanced modules students must pass introductory methods modules.

10.0 FAILURE TO SATISFY EXAMINERS

A candidate who fails to satisfy the Examiners in terms of these General Academic Regulations and Faculty Regulations may be required by the Senate to:-

a. write supplementary examinations
b. retake
c. proceed to the next level of the programme carrying one or more modules from a processing level
d. repeat
e. discontinue
f. withdraw and reapply after two years

11.0 GRADING AND CLASSIFICATION

Diplomas shall be awarded the following categories; distinction, merit, credit and pass. The following marking scheme shall be used:

80% and above	: Distinction
70-79%	: Merit
60-69%	: Credit
50-59%	: Pass
Below50%	: Fail

12.0 DIPLOMA WEIGHTING

12.1 All academic levels shall be considered for purposes of degree weighting.

14.0 MODULE SYNOPSES

UDSWK101: Introduction to Social Work and Social Welfare

The module introduces students to the social work profession of social work. It introduces issues inclusive of the definition of social work, functions and mission of social work, values and ethics, the historical development of social work, the methods of social work and social welfare models and theory.

UDSWK102: Introduction to Ethics and Values in Social Work

This module introduces students to social work ethical principles and standards related to clients, colleagues, employers, the profession of social work and society. Students also acquire the knowledge base required to identify ethical issues, equip them with the necessary skills needed to resolve ethical dilemmas and the capacity to make ethical decisions when confronted with
conflicting duties and choices that arise within practice settings.

UDSWK 103: Community Health
The module provides a foundational understanding of health issues and the role of social workers in the primary, secondary and tertiary health sectors. The module covers the definition of health, communicable diseases, non-communicable diseases, health policy and legislation.

SOC131: Introduction to Sociology
In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological imagination and theorising.

PSY132: Introduction to Psychology
The module offers a broad introduction to basic psychology knowledge by introducing students to the science of behaviour and cognitive processes. The module provides students with major psychological theoretical perspectives that explain behaviour and cognitive processes: Biological, psychodynamic, behaviourism, humanism and cognitive. Students will also be presented with major areas of psychology as a discipline such as biological, evolutionary, cognitive, developmental, social and clinical psychology.

CS 131: Basic Communication Skills
The module raises awareness among students on the importance of effective professional oral and written communication in social work. The module also introduces students to the concept of communication skills acquisition, assessment, decision making and intervention in social work. The module capacitates students to demonstrate effective and appropriate skills in communicating information and professional opinion to colleagues, clients (service users) and caregivers.

HCS 135: Introduction to Information Technology
The module gives students a basic understanding of computers and their processes. Basic information literacy; the use of computer systems and literacy training programmes in the MSU Library are introduced to students. Students will cover basic Computer concepts, Data processing psycho, Number systems, Computer arithmetic, Types of computers, Computer peripherals, System software and application software, ata communications and Introduction to application packages.

PSY133: Introduction to Social Psychology

Building on the knowledge acquired in the Introduction to Psychology module, the module helps students understand and explain how thoughts, feelings and behaviours of individuals are influenced by the actual, imaginary and implied presence of others. Students are introduced to perspectives, research methods, and empirical findings of Social Psychology. Topics to be covered include social influence, group processes, prosocial behaviour and aggression.

SOC 139: Introduction to Social Anthropology
The module explores conceptual and developmental issues in social anthropology. It starts by exploring the conceptual issues relating to the emergence of social anthropology. It addresses topics such as ideology, politics, production and economic systems, law and order, and leadership in traditional and modern states. The module probes the opportunities and challenges that culture poses for African and other developing economies. Particular attention is paid to comparative and holistic perspectives. Ethnocentrism and cultural relativism are looked at in the light of globalisation. The module remains true to anthropology through numerous case studies and various methods of investigation employed in this discipline. Ultimately, the module appraises the role played by anthropology in augmenting sociology.

UDSWK 104: Introduction to Case Work
This module introduces students to micro practice as a major method of social work that is used when working with individuals and families. The module defines casework, covers the history of casework, Principles and values of casework, the four Ps of casework, the casework process, casework skills and a critique of casework. The module is a building block to the module on advanced micro practice.

UDSWK 105: Introduction to Group Work

This module introduces students to group work as a meso method of social work practice. The module covers the history of meso social work, types of groups, social work ethics in group work and group formation. The module is a building block to the module on advanced meso practice.

UDSWK 106: Introduction to Community Work
This module introduces students to macro social work as a method of social work practice this module enables students to define community work, explore the historical roots of community work and examine the approaches to community work: locality development; social action and social planning. The module is a building block to the module on advanced macro practice.
.

UDSWK 107: Introduction to Occupational Social Work
Students are introduced to occupational social work roles, settings and interventions at micro, meso and macro levels. The module covers issues inclusive of internal and external employees' problems, employee-assisted programmes EAPs, corporate responsibility programmes and legal framework and the roles of social workers.

UDSWK 108: Human Behaviour and the Social Environment
The module introduces students to the theoretical perspectives regarding the person-in-environment focus. The module introduces students to the systems theory, ecological perspective and the ecosystems perspective. The module borrows theories from sociology, psychology and other disciplines. These theories form the foundational theoretical and knowledge base of social work interventions and methods.

UDSWK 201: Introduction to Socio-Economic Development
The module provides an introduction to development as a concept as well as the theories informing development policies, and development skills, articulating development issues that affect the communities and solutions. The module covers issues inclusive of, poverty, development theories, foreign aid, migration, housing and evolving national and global development blueprints such as NDS 2 and Sustainable Development Goals.

UDSWK 202: Advanced Case Work
This module is designed to deepen students' competencies to work with individuals and families. The module exposes students to various theoretical approaches that can be used to work with individuals in social work. The Perlman's casework process is unpacked.

UDSWK 203: Advanced Group Work
This module is designed to deepen students' competencies to work with individuals in groups. The module familiarises students with the principles of selected group work theories and techniques for effective advanced practice. As such, students shall be able to evaluate and apply theories of group dynamics and group structural variables used in social group work practice. The approaches covered include Cognitive behaviourism; Feminism; Psychoanalysis; Humanism and Empowerment/self-directed approaches. Using the approaches above, this module enables students to; plan, formulate, and implement effective group interventions with diverse populations.

UDSWK 204: Advanced Community Work
Building on the Introduction to Community Work module, the module deepens students' understanding and use of community work approaches of locality development, social action and social planning. The module covers community mobilisation, gender mainstreaming and gatekeeping among other community work issues

UDSWK 205: Introduction to Social Research Methods and Statistics
This module introduces students to social research methods. The module covers the following: research paradigms (positivism and anti-positivism), the conceptualization of qualitative and quantitative research methods, characteristics/qualities of qualitative and quantitative research methods, research problems, research questions, aim and objectives of a study; ethical considerations in research and analyzing and interpreting research data.

UDSWK 206: Social Policy and Administration
The module introduces students to social welfare policies, the policy formulation process and the challenges of policy implementation. The effects of social policy administration on marginalized and vulnerable populations will also be analysed.

UDSWK 207 The Criminal Justice System in Zimbabwe
This module examines the contribution of social work to the criminal justice system within the Zimbabwean context. The module on the criminal justice system in Zimbabwe is designed to give social work students a foundational understanding of the criminal justice system and their role in it. The module helps students appreciate the various statutory roles social workers have. Students shall be exposed to the different perspectives and approaches in dealing with those involved and affected by crime and develop competence in applying different models of service delivery to different client systems in an integrated and multidisciplinary team approach.

Diversion programmes and restorative justice processes are explored as alternative forms of sentencing, rehabilitation and delivery of justice.

UDSWK 208 Introduction to Human Rights and the Law in Social Work
This module provides students with an appreciation of the various legislations that govern social work practice. In addition, students gain knowledge and understanding of the various psycho-social perspectives on human rights. Furthermore, the module develops students' understanding of challenges in the realisation of socio-economic rights and the role that social workers play in the realisation of the human rights of people and communities with whom they work.

UDSWK 209 Integrated Social Work Methods
The module integrates social work methods of casework, group work, community work, social work research and social administration. The module uses different scenarios inclusive of refugees, older persons, and orphans among other vulnerable populations to help students explore the use of social work methods, knowledge and skills base, and existing legal framework responding to presenting problems.

UDSWK 210: Research Project
The module provides students with an opportunity to carry out research on a topic of their choice subject to approval by the Department. The module thus provides and imparts practical skills and knowledge in research.

UDSWK 211: Work-Related Learning/ Fieldwork
In the third year of study, students go for work-related learning for 2 semesters. During the placement period, students placed in settings that provide them with the opportunity to undertake a range of social work roles which expose them particularly to the three primary methods of social work intervention which are casework, group work and community work.

REGULATIONS FOR BACHELOR OF SCIENCE HONOURS DEGREE IN SOCIAL WORK (SWK)

Duration:	4 years
Credit Load:	540
Minimum Credit Load:	480
Maximum Credit Load:	540
MBKS Credit Load:	372
ZNQF Level:	8

PURPOSE OF THE PROGRAMME

The Bachelor of Social Work Honours Degree programme offers a generic social work education that prepares students to practice as qualified social workers in a variety of social work settings.
The programme also aims at producing social workers with the competencies to practice, not only in Zimbabwe but regionally and internationally as well. The programme helps students to understand the genesis of socio-economic problems and their impact on human well-being. Students are expected to use this as the basis for designing appropriate intervention strategies to restore or enhance human well-being.

ENTRY REQUIREMENTS

For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language at grade C or better and at least two (2) Advanced level passes.

Normal Entry: Any two relevant Advanced Level passes AND 5 Ordinary Level passes/ National Foundation Certificates including the English Language.

Special Entry: Candidates who have attained a Diploma in Social Work or an equivalent Level 5 and 6 of the Zimbabwe National Qualifications Framework (ZNQF), awarded by a recognised university, college or institute

PROGRAMME CHARACTERISTICS

Areas of Study: Social Work.
Specialist Focus: Social Work.
Orientation: Developmental Social Work.

Distinctive Features: The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Social work graduates can work in a variety of settings and roles within civil society, the private and public sectors.

- Within the civil society development arena, social workers can assume roles such as project manager, programme director, monitoring and evaluation coordinator, manager of welfare organisations, training and development facilitators, community development workers/officers, advocacy officers, disaster management officers and managers among other roles.
- In the public sector social workers are employed in a range of roles which include among others, social welfare officers, school social workers, probation officers, counsellors, therapists, and social policy development roles.
- In the private sector social work graduates are sought after to assume roles in occupational social work, human resources, training and development, change management consultants, customer service consultants and managing corporate social responsibility initiatives

Further Studies: Specialised Masters and Doctoral studies in Social Work.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, role plays, seminars, group work, field-based activities, work-related learning, dissertation, individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports, seminar presentations, work-related learning reports, dissertations and continuous assessment.

LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Assess client systems and their social functioning.
- Plan and implement appropriate social work intervention strategies and techniques when working with individuals, groups and communities
- Plan, and execute social work research and utilisation of findings to inform social work intervention.
- Understanding how social welfare policies and legislation are developed and influenced.
- Understand roles, functions, knowledge and skills for effective social work supervision.
- Identify the purpose, functions and principles of social work within the developmental social work paradigm
- Formulate project plans for funding social services.
- Work effectively in an inter-sectoral and multi- and/or inter-disciplinary setting to deliver social services.
- Understanding of roles, functions, principles and characteristics of management and administration within social service delivery.

GENERAL PROVISIONS

Refer to the University's General Regulations.

PROGRAMME ASSESSMENT

Coursework: 40%: In -class Tests (50%), Assignments (50%)

Written Examinations: 60%

Other: a) Dissertation is assessed based on a research project (75%) and Oral presentation (25%).

b) Industrial Attachment/Work-Related Learning is an examinable module at level 3:1 and level .31. At level 3.1 students would be required to write a placement report and submit it for assessment at the end of the level (level 3 semester 1).

Level 3.2 is assessed based on Industrial Attachment/Work Related learning report (30%), assessment by Work Supervisor (40%), and assessment by Academic Supervisor (30%).

PROVISION FOR PROGRESSION

Refer to the University's General Regulations.

FAILURE TO SATISFY EXAMINERS

Refer to the University's General Regulations.

GRADING AND DEGREE CLASSIFICATION

Refer to the University's General Regulations.

DEGREE WEIGHTING
Refer to the University's General Regulations.

MODULE SYNOPSES

SWK131 Introductions to Social Work and Social Welfare

This module introduces students to the social work profession by looking at the basic functions and mission of social work. It examines the historical development of the profession of social work. The module explores the International, African and Zimbabwean historical narratives on the history and growth of social work as a profession. Students shall also be introduced to the major intervention methods of social work practice as well as the social service delivery structures as mirrored in the social welfare system. The historical commitment of the social work profession to social justice and the elimination of poverty shall be a major theme of this module. As such, the module provides a comprehensive grounding for social work students and gives them a fuller appreciation of what the profession entails.

SOC 131 Introduction to Sociology

In this module, students gain a theoretical foundation for understanding social issues. The module begins with a discussion of the theoretical origins of Sociology, its key concepts, similarities and differences with other social science subjects. Students are expected to acquire critical, analytical and practical skills that will also serve them in other social science modules as well. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological theorising.

PSY 133 Introductions to Psychology

The module introduces students to the fundamental principles of Psychology. It is designed to not only provide the tools necessary to study human behaviour and mental processes but to also present a sample of the major areas of Psychology as a discipline. The module explores the integrative domains of Psychology inclusive of biological, evolutionary, cognitive, developmental, social and clinical psychology. There will be a comprehensive coverage of core concepts, which are grounded in both classic studies, and in current and emerging research, including reference to the DSM-5 in discussions of psychological disorders. The emphasis of the module is two-fold: Firstly, to enable students to appreciate the diversity and richness of the discipline of Psychology; Secondly, to acquaint students with important principles, theories, concepts and findings in Psychology.

CS 131 Basic Communication Skills

Refer to the Department of Communication Skills.

HCS 135 Introduction to Information Technology

Refer to the Department of Information Systems.

PSY 133 Social Psychology

This module builds students' knowledge of the scientific understanding of the nature and causes of individual and group behaviour and thought processes in social settings. It studies concepts that enable an understanding of the way people think about, feel, and behave, and how they influence and are influenced by others. Students are introduced to perspectives, research methods, and empirical findings of Social Psychology. Topics covered include impression formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping and prejudice. Throughout the module, emphasis will be placed on developing critical and integrative ways of thinking about theory and research in Social Psychology

ENT 235 Entrepreneurship 1

Refer to the Department of Entrepreneurship

GSS 231 Gender Studies for Social Sciences

Refer to Faculty Regulations

SOC 139 Introduction to Social Anthropology 1
The module will explore the human resources practices in the Local Government sector. The module will cover issues inclusive of, the HR legal framework in the Local Government sector, employee resourcing, human resource planning, reward management and motivation, performance management, and human resource development among other issues.

SWK 133 Human Behaviour and the Social Environment
The module on human behaviour and social environment builds on the one on Introduction to Social Work and introduces students to the theoretical perspectives regarding the person-in-environment focus which is a key premise upon which social work bases its practice. The module introduces students to the systems theory, ecological perspective and the ecosystems perspective. These theoretical perspectives shall help students to understand individuals as members of social systems such as families, groups, organisations and communities. The strengths perspective, empowerment, and resiliency constructs shall also be examined.

PSY137: Psychology of Counselling
This module is designed to provide learners, who embark on professional studies, with a comprehensive overview of the Counselling profession with an emphasis on the need, role, qualities, relationship building and ethical practice in Counselling. Learners will be introduced to both counselling and therapeutic theories to understand their tenets and applicability to the various contexts of counselling practice such as child, adolescent, couple, career, drug abuse counselling and counselling of special populations. Learners are therefore given an opportunity to explore different counselling practical skills, techniques and process models that guide the practice of Counselling. This will be achieved through interaction and experiential learning approaches such as role-plays, which will also be analysed to prepare students on how to handle clients' psychosocial problems.

SOC214 Sociology of Development
Refer to the regulations of the Department of Sociology.

SOC418 Rural and Urban Development
Refer to the regulations of the Department of Sociology

SWK136 Human Rights and the Law in Social Work
This module introduces social work students to the subject of human rights and the law. Students shall have a fuller appreciation of the various legislations that govern social work practice. In addition, students shall also gain knowledge and understanding of the various psycho-social perspectives on human rights and develop an understanding of challenges in the realisation of socio-economic rights. Using the law, students shall be able to engage in anti-discriminatory practice with a clear understanding of the role that social workers play in the realisation of the human rights of people and communities with whom they work.

SWK134 The Criminal Justice System in Zimbabwe
The module on the criminal justice system in Zimbabwe is designed to give social work students a foundational understanding of the criminal justice system and their role in it. This module examines the contribution of social work in the criminal justice system within the Zimbabwean context. Global best practices are also explored. The module shall equip students with a detailed understanding of the roles and skills that social workers should have and apply when implementing micro, meso and/or macro interventions in this specialised field of service. Students shall be exposed to the different perspectives and approaches in dealing with those involved and affected by crime and develop competence in applying different models of service delivery to different client systems in an integrated and multidisciplinary team approach. Diversion programmes and restorative justice processes are explored as alternative forms of sentencing, rehabilitation and delivery of justice.

SWK135 Advanced and Contemporary Theoretical Perspectives in Social Work
The module on Advanced and contemporary theoretical perspectives in social work introduces students to major theories in contemporary social work. The module is designed to engender critical thinking in students as well as foster the ability to examine and understand phenomena and issues using different theoretical lenses. Among other emerging issues and paradigms, students shall be introduced to critical and radical social work perspectives, feminist perspectives, anti-oppressive practice, conflict theory, structuralism and postmodernism. The works of theorists such as Michel Foucault, Saul

Alinsky, Paulo Freire and Frantz Fanon shall be interrogated. Students shall also be introduced to the decolonisation praxis within social work as well as examining debates about indigenous social work practice.

HRM Human Resources and Management
Refer to the regulations of the Department of Human Resource Management.

PSY235 Human Resources Psychology
Refer to the regulations of the Department of Psychology.

SWK 231 Introduction to Social Work with Individuals and Families
This module introduces students to micro practice as a major method of social work that is used when working with individuals and families. The module equips students with the skills and competencies that are necessary for them to intervene and help clients using the casework method and prepares them for generalist social work practice with individuals and families. The modules emphasise the values, knowledge, processes and skills necessary for effective assessment and intervention on the micro level

SWK 232 Introduction to Social Work with Groups
Group work practice primarily involves working with small groups within which individual and shared goals of social work clients are met. The purpose of the module on social work with groups is to equip students with theoretical and practice knowledge skills necessary to utilise the group work method as a modality in enhancing the well-being of individuals within the group work context. Students shall learn about the group work process, the role of the worker and the various techniques that are necessary for effective facilitation of group work.

SWK 233 Introduction to Social Work with Communities
Social workers who practice community work endeavour to address systemic and structural issues that create social problems. As such, they work to achieve social justice through structural change. This module shall enable students to define community work, explore the historical roots of community work, examine the various components of community work, learn about the community work process and learn about one model of community development as a building block to the module on advanced macro practice.

SWK 234 Socio-Economic Development
The module provides students with an introduction to development as a concept as well as the theories informing development policies, development skills, articulating development issues that affect the communities and solutions to improve the socio-economic development of Third World countries. Moreso, it integrates topical issues that affect and are affected by development policies adapted in developing countries with a deliberate bias on Zimbabwe as well as the dynamics of urban and rural development. The module helps students to think systematically and analytically about the socio-economic problems and issues of Third World countries with particular reference to Zimbabwe. The module also focuses on imparting knowledge to students on the selected issues on socio-economic development like housing, education, and unemployment to mention a few. It also provides the students with skills on problem-solving and management of development in Third world countries. Furthermore, it equips students with analytical skills on policy-making and reformulation where necessary. This is crucial in assisting students to apply the principles of economic development to the world of social work focusing on objectives such as helping students develop a better understanding of the socio-economic challenges of the Third World in general and Zimbabwe in particular, assisting students to explore selected social policy areas, such as education, housing and unemployment and consider key issues and policy options and to assist students to apply socio-economic development ideologies to the social work profession.

SWK 239 Research Methods and Statistics
This module introduces students to social research methods. The module covers the following: research paradigms (positivism and anti-positivism), conceptualisation of qualitative and quantitative research methods, characteristics/qualities of qualitative and quantitative research methods, research problems, research questions, aim and objectives of a study and ethical considerations in research. It allows students to demonstrate an understanding of statistics, which includes the use of statistical tables and formulae in analysing and interpreting research data.

SWK 236 Advanced Social Work Practice with Individuals and Families
Building on the knowledge and generic skills acquired in the introductory module on micro practice, this module is designed to deepen students' competencies to work with individuals and families. Students shall be exposed to various theoretical approaches that can be used to work with clients. Many different practice models influence the way social workers choose to help people meet their goals.

SWK 238 Advanced Social Work Practice with Communities

The module on advanced social work with communities builds on the knowledge that students would have acquired in the Introduction to Community Work module. It is designed to enable students to gain a detailed understanding of how communities function, and have an appreciation of the limits and possibilities of creating and sustaining change in communities. The module aims to develop students' knowledge of the theories and skills they need to effectively engage in community work practice. Using case studies from a range of fields of practice, students shall be able to gain a fuller appreciation of the politics and complexity of community work. Vital and innovative skills in the practice of community work shall be developed.

SWK 237 Advanced Social Work Practice with Groups

This module builds on the group work knowledge and skills that are taught in the introduction to meso practice. The module aims to deepen students' understanding of group dynamics and applicable theories when using this method of intervention. The module familiarises students to the principles of selected group work theories and techniques for effective advanced practice. As such, students shall be able to evaluate and apply theories of group dynamics and group structural variables used in social group work practice. The approaches covered include Cognitive behaviourism; Feminism; Psychoanalysis; Humanism and Empowerment/self-directed approaches. Using the approaches above, this module enables students to; plan, formulate, and implement effective group interventions with diverse populations.

SWK240 Occupational Social Work

Occupational social work (previously known as industrial social work) is an area of specialisation in social work which focuses on interventions at the workplace. It seeks to meet the welfare needs of employees whilst also contributing to the realisation of organisational goals. The module covers the following: definition of occupational social work, history of occupational social work, theories underpinning occupational social work, social problems and social issues undermining the social functioning of workers and their families (conflict, HIV and AIDS, substance abuse, sexual orientation etc.), employee assistance programmes. The module also considers corporate social responsibility initiatives. Emphasis shall be on how social workers intervene to address the myriad of problems or issues at the workplace and shall encompass interventions at micro, meso and macro levels.

SOC208 Sociology of Organisations

Refer to the regulations of the Department of Sociology.

PSY209 Human Resources Psychology

Refer to the regulations of the Department of Psychology.

SWK330 Work-Related Placement Report

The students will submit a comprehensive work placement report which shows their understanding of the organisation placed.

SWK341 Work-Related Learning Report

As part of the examination, the students will be required to submit a comprehensive academic report of their work-related learning experience to the department and it will be marked and awarded a mark that will be ratified by the departmental examinations board.

SWK342 Work-Related Academic Supervisor's Report

As part of the examination, the students will be assessed and awarded a mark by the academic supervisor and this will be presented to the departmental examinations board for processing of final marks.

SWK343 Work-Related Learning Supervisor's Report

The employer will assess the student and award a mark which will be presented to the departmental examinations board for processing of final marks.

SWK 431 Social Policy

Social policy is increasingly being considered as a method of social work practice. This module introduces students to the study of social policy and social services. Specifically, the module enables students to understand how social policies are used as instruments for promoting and safeguarding human well-being. It covers the following: Conceptualisation of social policy, objectives of social policy, determinants of social policy, social policy process, including the main actors in the policy process, models of social policy and social services in Zimbabwe. This module shall also equip students with the knowledge and skills needed to undertake meaningful social policy analysis. The module will also expose students to social policy analysis: a systematic and scientific evaluation of the extent to which a social policy can achieve its intended goals

or objectives. Social policy analysis is carried out either before the policy is implemented or after the policy has been implemented. Thus, social policy analysis focuses on either the potential of the policy or its actual impact. This module shall therefore equip students with the knowledge and skills needed in undertaking meaningful social policy analysis. Students shall be exposed to the different approaches to social policy analysis. Students shall also be allowed to undertake a policy analysis of a policy of their choice.

SWK 434 Management and Administration of Social Welfare Organisations

Through career progression in various fields of practice, most social work graduates become administrators within welfare organisations and other related settings. In some cases, entry-level social workers are required to provide direct supervision and leadership to junior staff, especially paraprofessionals. It is therefore essential that social work graduates should be fully capacitated to handle management, administration and supervision functions as they enter the world of practice. To this end, this module is designed to equip students with skills in management, administration and supervision. Students will be introduced to various theories and models that are used in management and administration.

SWK 435 Integrated Fields of Social Work Practice

This module exposes students to integrated practice in social work focusing on varied fields. Using the major methods of social work intervention students shall be introduced to specialised social work intervention focusing on persons with disabilities, community health; social work with refugees and migrant communities and gerontology among other thematic areas that will be selected in response to the prevailing socio-economic and political landscape. Each of the thematic areas shall be explored in detail and students will be taught how to integrate their theoretical and practice skills when working with these diverse population groups.

SWK 436 Disaster Management

Disaster management is an important area of practice in social work. Disaster management seeks to mitigate the negative impact of emergencies (such as natural disasters, and human-made disasters) on human well-being. The module covers the following topics: rationale for humanitarian practice, emergency assistance, disaster preparedness and recovery strategies, prevention, early warning systems, vulnerability assessments and resource mobilisation.

SWK 433 Child Protection

This module focuses on laws, policies, services and regulations that protect children from abuse, violence, neglect and exploitation. A holistic approach to the needs of children shall be adopted. Special attention shall be given to risk factors that children and their families are exposed to. Relevant topics covered include child labour, harmful cultural practices, children in need of alternative care, birth registration, child abuse (sexual, physical, psychological and neglect), child justice, child trafficking and child protection in emergencies and case management. Relevant human rights instruments shall be looked at to understand how these can be harnessed for effective child protection.

SWK432 Advanced Research Methods in Social Work

This module builds on the Introduction to Social Research Methods and seeks to enhance students' understanding of the research process. Students are thus equipped with the knowledge and skills to undertake empirical research. The module covers the following topics: research design, research instrumentation, data collection in qualitative and quantitative research, data analysis in qualitative and quantitative research, and theoretical frameworks in research. Students shall be required to develop a research proposal.

SWK 437 Dissertation

Students shall be required to undertake research on a topic of their choice subject to approval by the Department. The dissertation provides students with an opportunity to apply their research knowledge and skills. To this end, students shall carry out an empirical study under the guidance of a supervisor appointed by the Department. Students choose a topic relevant to social work which must be approved by the supervisor appointed by the Department. Students shall be involved in the entire research process from the conceptualisation of the study to the write-up of the dissertation. The required length of the dissertation must be between 10 000- 15000 words.

SWK438 Programme Design and Management

Programme design and management have become an integral part of the day-to-day activities in many human service organisations within the public sector, the private sector and more so in the Non-profit sector context. Given that social policies are realised via social projects and programmes, skills in project and programme design and management have become widely sought after. This module in programme design and management provides a solid educational foundation for students to be able to plan and manage successful development projects and programmes. The module combines knowledge, tools, techniques and methods that are commonly utilised in managing successful programmes and projects in any field whilst providing insight into the complex challenge of managing people-oriented development projects.

SWK439 Social Entrepreneurship
Social entrepreneurship is a field and practice that is increasingly gaining prominence as an effective approach to social change. It is a practice that has seen business and non-profit leaders designing, growing, and leading mission-driven enterprises in a way that has led to the blurring of boundaries between the for-profit and the non-profit sector. As the traditional lines blur between non-profit enterprises, government, and the private sector, social work students must understand both the opportunities and challenges in this new landscape. As such, the module on social entrepreneurship introduces students to this relatively new area of inquiry. Students shall largely engage in case-based learning and examine the history, development, major debates and growth of social entrepreneurship as a field of inquiry.

SWK440 Humanitarian Practice in Emergencies
Humanitarian practice in emergencies is an important area of practice in social work. Humanitarian practice seeks to mitigate the impacts of emergencies (such as natural disasters and armed conflicts) on human well-being. The module covers the following topics: rationale for humanitarian practice, emergency assistance, disaster preparedness and recovery strategies, prevention, early warning systems, vulnerability assessments and resource mobilisation.

SWK441 Social Planning and Social Development
This module focuses on how social planning can be used to achieve the goals of social development. The strategies for achieving social development shall be examined. These strategies include investments in human and social capital, employment creation and decent work, asset building, promoting microenterprises and social protection. The focus shall also be on the nature of social planning and the theories underpinning social planning. The module also covers social planning techniques. The African Union Social Policy Framework shall be used to contextualise the drive towards social development.

PSY433: Organisational Psychology
The module gives an overview role of personnel management in organisations studying areas such as the nature and role of leadership, organizational structure and the application of psychological theories in addressing personnel problems. The module also examines the behaviour of people in various work settings within the context ofcognitive, learning, social, emotional and personality factors. It also provides knowledge on industrial psychology and its related concepts equipping students with the theoretical base of psychology from an industrial perspective

REGULATIONS FOR THE POSTGRADUATE DIPLOMA IN DISABILITY STUDIES (PDDS)

Duration:	2 years
Credit Load:	430
Minimum Credit Load:	360
Maximum Credit Load:	430
Maximum MBK Credit Load:	285
ZNQF Level:	9

1.0 PURPOSE OF THE PROGRAMME
The Postgraduate Diploma in Disability Studies programme offers a generic disability education that prepares students to understand disability policy and practice. The programme targets professionals working in diverse settings. The programme also aims at producing professionals with competencies and skills to practice, not only in Zimbabwe but regionally and internationally. The programme helps students understand disability issues and their impact on the well-being of persons with disabilities.

2.0 ENTRY REQUIREMENTS
For all entry pathways, candidates must have at least five Ordinary Level subjects/National Foundation Certificates including English Language at grade C or better.

2.1 **Normal Entry**
A good pass in any social science honours degree from any recognized University.

3.0PROGRAMME CHARACTERISTICS

3.1 **Areas of Study**
Disability
3.2 **Specialist Focus**
Disability
3.3 **Orientation**

Human Rights

3.4 **Distinctive Features**

The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

4.0CAREER OPPORTUNITIES AND FURTHER EDUCATION

4.1**Employability**

Disability Studies diploma holders can work in a variety of settings and roles within civil society, the private and public sectors.

- Within the civil society development arena, holders of Disability Studies diploma may ensure demonstrated capability in working with persons with disabilities facilitating the reintegration, and acceptability of people with disabilities within the society.
- In the public sector holders of Disability Studies are employable in a range of institutions that include schools, health facilities, and social services among other fields.

4.2Further Studies

Masters and Doctoral studies in Disability Studies.

5.0PROGRAMME DELIVERY

5.1 **Teaching and Learning Methods**

Blended learning methods: Online and physical lectures; online and physical tutorials, online and physical role plays, online and physical seminars, group work, field-based activities, work-related learning, dissertation, and individual independent study.

5.2**Assessment Methods**

Written and oral examinations, tests, written and practical assignments, field reports, seminar presentations, work-related learning reports, research projects and continuous assessment.

6.0LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Identify the classification and causes of disabilities.
- Appreciate the national, regional, and international disability policy and legislative instruments guiding the field of disability.
- Apply the knowledge and skills acquired to facilitate the reintegration and rehabilitation of people with disabilities.
- Understand the impact of society on disability.
- Appreciate the role played by people with disabilities in development.
- Plan, and execute research on disability issues.
- Compile a practicum and a research project based on a disability of their choice.
- Come up with advocacy strategies that are aimed at creating awareness about the needs of people with disabilities.
- Formulate project plans for funding disability services.
- Work effectively in an inter-sectoral and multi- and/or inter-disciplinary setting to deliver disability services.

7.0GENERAL PROVISIONS

The PostGraduate Diploma in Disability Studies is a two-year programme. Students go for Work-Related Learning during the second Semester of Level Two of the study.

8.0 PROGRAMME ASSESSMENT

8.1 Continuous assessment: 40%

In-class Tests (50%), Assignments (50%)

8.2 Written Examinations: 60%

8.3 Other:

a) Work-Related Learning is assessed based on Industrial Attachment/Work-Related Learning report (30%), assessment by Work Supervisor (40%), and assessment by Academic Supervisor (30%).

9.0PROVISION FOR PROGRESSION

9.1 Students shall earn at least 135 credits per level to be allowed to progress to the next level.

9.2 To be allowed to take advanced modules students must pass introductory methods modules.

10.0FAILURE TO SATISFY EXAMINERS

A candidate who fails to satisfy the examiners in terms of these General Academic Regulations and Faculty Regulations may be required by the Senate to:

a. write supplementary examinations
b. retake;
c. proceed to the next level of the programme carrying one or more modules from a processing level;
d. repeat;
e. discontinue; or
f. withdraw and reapply after two years.

11.0 GRADING AND CLASSIFICATION

Diplomas shall be awarded the following categories; distinction, merit, credit and pass. The following marking scheme shall be used:

80% and above:	Distinction
70-79%	Merit
60-69%	Credit
50-59%	Pass
Below 50%	Fail

12.0DIPLOMA WEIGHTING

12.1 All academic levels shall be considered for purposes of degree/diploma weighting.

14.0 MODULE SYNOPSES

PDDS101 Introduction to Disability and Disability Issues
The module introduces students to disability affairs. It introduces issues that are inclusive of the definition of disability and disability classification.

PDDS102 Ethics and Values in Disability Affairs
This module introduces students to ethical principles and standards related to persons with disabilities, colleagues, employers, and society. Students also acquire a knowledge base required to identify ethical issues, equip them with the necessary skills needed to resolve ethical dilemmas and the capacity to make ethical decisions when confronted with conflicting duties and choices that arise within practice settings.

PDDS103 Sociology of Disability
In this module, students gain a theoretical foundation for understanding disability and social issues. Students are introduced to some critical evaluation of discourse on the nature, antecedents and trends in sociological imagination and theorising disability.

PDDS104 Disability Law and Policy
The module introduces students to local, regional and international disability policy and law. Students are also introduced to disability policy formulation process and the challenges of disability policy implementation. The module helps students appreciate the various statutory roles within the local, regional and international disability policy and law framework.

PDDS105 Theoretical Perspectives in Disability Studies
The module introduces students to selected disability theoretical perspectives and models. The module exposes students to the medical, social and human rights models of disabilities among other theoretical explanations of disability. The module borrows theories from Sociology, Psychology and other disciplines.

PDDS106 Introduction to Braille
The module introduces students to Braille as a form of writing for people with visual impairment in Zimbabwe. The module capacitates students with practical, and effective skills in brailing.

PDDS107 Introduction to Sign Language
The module introduces students to one of the officially recognised languages in Zimbabwe: Sign Language. The module capacitates students to demonstrate practical, effective, and appropriate skills in signing with persons with hearing impairment, colleagues, service users, and caregivers.

PDDS108 Gender and Disability
In this module, students gain a theoretical foundation for understanding gender and disability issues. Students are introduced to some critical evaluation of discourse on gender and theorizing gender in disability issues.

PDDS109 Rehabilitation and Reintegration of Persons with Disabilities
The module introduces students to rehabilitation and reintegration of persons with disabilities in society. Students are introduced to a variety of rehabilitation and reintegration models. Students are also introduced to available rehabilitation and reintegration services and institutions.

PDDS110 Social Planning and Social Development
In this module, students gain an understanding of how social planning can be used to achieve the goals of social development. The strategies for achieving social development shall be examined. These strategies include investments in human and social capital, employment creation and decent work, asset building, promoting micro-enterprises and social protection. The focus shall also be on the nature of social planning and the theories underpinning social planning. The module also covers social planning techniques. The African Union Social Policy Framework shall be used to contextualise the drive towards social development.

PDDS111 Social Entrepreneurship

The module enhances students' appreciation of social entrepreneurship as a field and practice that is increasingly gaining prominence as an effective approach to social change. The module orients students to designing, growing, and leading mission-driven enterprises in a way that has led to the blurring of boundaries between the for-profit and the non-profit sector. As such, the module introduces students to this relatively new area of inquiry. Students shall largely engage in case-based learning and examine the history, development, major debates and growth of social entrepreneurship as a field of inquiry

PDDS112 Indigenous Knowledge Systems
This module orients students to use and appreciate Indigenous Knowledge Systems (IKS) in disability affairs. Concepts and practices such as IKS in child protection are interrogated with the view of understanding the reach of IKS that is beneficial to society and persons with disabilities. The module also integrates negative IKS as far as they are inimical to the attainment of the rights of persons with disabilities.

PDDS113 Counselling Persons with Disabilities
The module introduces students to the art and science of counselling persons with disabilities and their significant other(s). The module also helps students appreciate different counselling techniques for different age groups and disabilities. Students will also be helped to appreciate and acquire different counselling skills: listening, recording, interviewing and others. Different counselling approaches are introduced.

PDDS201 Disability and Development
The module provides an introduction to development as a concept in disability affairs. The module also introduces theories informing development policies, development skills, articulating development issues that affect the communities and solutions. Focusing on disability issues, the module covers issues inclusive of, poverty, development theories, water and sanitation, migration, climate change, housing and evolving national and global development blueprints such as NDS1 and Sustainable Development Goals.

PDDS202 Social Services
The module provides an introduction to available social services for persons with disabilities. Students also cover the planning of social services for persons with disabilities (processes, activism and challenges).

PDDS203 Management and Administration of Disability Organisations
The module inducts students to the science, art and profession of management of human service organisations with a bias on disability organisations. Students are introduced to selected classical and modern management theories, for example, Taylor, Fayol and Weber. Students are also introduced to various management concepts that include planning, organising, leading, and controlling disability organisations.

PDDS204 Research Methods
This module introduces students to social research methods. The module covers the following: research paradigms (positivism and anti-positivism), the conceptualisation of qualitative and quantitative research methods, characteristics/qualities of qualitative and quantitative research methods, research problems, research questions, aim and objectives of a study; ethical considerations in research and analysing and interpreting research data.

PDDS205 Child Protection
In this module, students are introduced to the field of child protection with a special focus on children with disabilities in a bid to foster disability-sensitive case management. This module is designed to deepen students' competencies to work with children with disabilities. The module familiarises students to selected local, regional and international conventions that protect children with disabilities.

PDDS206 Disaster Management
The module prepares students for disability-sensitive disaster management. Students will have an appreciation of the complex interplay and intersecting vulnerabilities in disaster situations. The module familiarises students with the disaster management four pillars of disaster management: mitigation, preparedness, response and recovery. The module will also expose students to disaster conventions such as the Sendai Framework and the Sphere standards in disaster management.

PDDS207 Research Project
The module provides students with an opportunity to carry out research on a topic of their choice subject to approval by the Department. The module thus provides and imparts practical skills and knowledge on research.

PDDS208 Work-Related Learning
Students go for work-related learning for a period ranging from 12 to 15 weeks. During the placement period, students are placed in settings that provide them with the opportunity to undertake a range of social work roles which expose them

particularly to the methods of social work intervention which are casework, group work, community work, social work administration and social research.

REGULATIONS FOR THE POSTGRADUATE DIPLOMA IN SOCIAL WORK (DSWK)

Duration:	2 years
Credit Load:	430
Minimum Credit Load:	360
Maximum Credit Load:	430
Maximum MBK Credit Load:	285
ZNQF Level:	9

PURPOSE OF THE PROGRAMME

The Postgraduate Diploma in Social Work programme offers a generic social work education that prepares students to practice as qualified social workers in a variety of social work settings.
The programme also aims at producing social workers with the competencies to practice, not only in Zimbabwe but regionally and internationally as well. The programme helps students to understand the genesis of socio-economic problems and their impact on human well-being. Students are expected to use this as the basis for designing appropriate intervention strategies to restore or enhance human well-being.

ENTRY REQUIREMENTS
For all entry pathways candidates must have at least five Ordinary Level subjects/ National Foundation Certificates including English Language at grade C or better.

Normal Entry: A good pass in any sociology and psychology degree from any recognized

University. Students enrolled on this programme should have passed the following courses;

I. Introduction to Psychology
II. Introduction to Sociology
III. Introduction to Social Anthropology
IV. Introduction to Social Psychology
V. Communication Skills

Special Entry: Any other relevant qualification in line with the Zimbabwe National Qualifications Framework (ZNQF), awarded by a recognised university, college or institute.

PROGRAMME CHARACTERISTICS

Areas of Study:	Social Work.
Specialist Focus:	Social Work.
Orientation:	Developmental Social Work.
Distinctive Features:	The programme builds the research-technology-innovation-management continuum and focuses on knowledge development using a student-centred approach.

CAREER OPPORTUNITIES AND FURTHER EDUCATION
Employability: Social work graduates can work in a variety of settings and roles within civil society, the private and public sectors.

- Within the civil society development arena, social workers can assume roles such as project manager, programme director, monitoring and evaluation coordinator, manager of welfare organisations, training and development facilitators, community development workers/officers, advocacy officers, disaster management officers and managers among other roles.
- In the public sector social workers are employed in a range of roles which include among others, social welfare officers, school social workers, probation officers, counsellors, therapists, and social policy development roles.
- In the private sector social work graduates are sought after to assume roles in occupational social work, human resources, training and development, change management consultants, customer service consultants and managing corporate social responsibility initiatives

Further Studies: Specialised Masters and Doctoral studies in Social Work.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, tutorials, role plays, seminars, group work, field-based activities, work-related learning, dissertation, individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports, seminar presentations, work-related learning reports, dissertations and continuous assessment.

LEARNING OUTCOMES

By the end of the programme a graduate will be able to:

- Assess client systems and their social functioning.
- Plan and implement appropriate social work intervention strategies and techniques when working with individuals, groups and communities
- Plan, and execute social work research and utilisation of findings to inform social work intervention.
- Understanding how social welfare policies and legislation are developed and influenced.
- Understand roles, functions, knowledge and skills for effective social work supervision.
- Identify the purpose, functions and principles of social work within the developmental social work paradigm
- Formulate project plans for funding social services.
- Work effectively in an inter-sectoral and multi- and/or inter-disciplinary setting to deliver social services.
- Understanding of roles, functions, principles and characteristics of management and administration within social service delivery.

GENERAL PROVISIONS

Refer to the University's General Regulations.

PROGRAMME ASSESSMENT

Coursework: 40%: In -class Tests (50%), Assignments (50%)

Written Examinations: 60%

Other: a) Dissertation is assessed based on a research project (75%) and Oral presentation (25%).

b) Industrial Attachment/Work Related Learning is assessed based on the Industrial Attachment/Work Related Learning report (30%), assessment by Work Supervisor (40%), and assessment by Academic Supervisor (30%).

PROVISION FOR PROGRESSION

Refer to the University's General Regulations.

FAILURE TO SATISFY EXAMINERS

Refer to the University's General Regulations.

GRADING AND DEGREE CLASSIFICATION

Refer to the University's General Regulations.

WEIGHTING

Refer to the University's General Regulations.

MODULE SYNOPSES

SWK531 Introductions to Social Work and Social Welfare

This module introduces students to the social work profession by looking at the basic functions and mission of social work. It examines the historical development of the profession of social work. The module explores the International, African and Zimbabwean historical narratives on the history and growth of social work as a profession. Students shall also be introduced to the major intervention methods of social work practice as well as the social service delivery structures as mirrored in the social welfare system. The historical commitment of the social work profession to social justice and the elimination of poverty shall be a major theme of this module. As such, the module provides a comprehensive grounding for social work students and gives them a fuller appreciation of what the profession entails.

This module builds students' knowledge of the scientific understanding of the nature and causes of individual and group behaviour and thought processes in social settings. It studies concepts that enable an understanding of the way people think about, feel, and behave, and how they influence and are influenced by others. Students are introduced to perspectives, research methods, and empirical findings of Social Psychology. Topics covered include impression formation, conformity, prosocial behaviour, interpersonal attraction, persuasion, stereotyping and prejudice. Throughout the module, emphasis will be placed on developing critical and integrative ways of thinking about theory and research in Social Psychology.

DSWK541 Human Rights and the Law in Social Work

This module introduces social work students to the subject of human rights and the law. Students shall have a fuller appreciation of the various legislations that govern social work practice. In addition, students shall also gain knowledge and understanding of the various psycho-social perspectives on human rights and develop an understanding of challenges in the realisation of socio-economic rights. Using the law, students shall be able to engage in anti-discriminatory practice with a clear understanding of the role that social workers play in the realisation of the human rights of people and communities with whom they work.

DSWK542 The Criminal Justice System in Zimbabwe
The module on the criminal justice system in Zimbabwe is designed to give social work students a foundational understanding of the criminal justice system and their role in it. This module examines the contribution of social work in the criminal justice system within the Zimbabwean context. Global best practices are also explored. The module shall equip students with a detailed understanding of the roles and skills that social workers should have and apply when implementing micro, meso and/or macro interventions in this specialised field of service. Students shall be exposed to the different perspectives and approaches in dealing with those involved and affected by crime and develop competence in applying different models of service delivery to different client systems in an integrated and multidisciplinary team approach. Diversion programmes and restorative justice processes are explored as alternative forms of sentencing, rehabilitation and delivery of justice.

DSWK543 Advanced and Contemporary Theoretical Perspectives in Social Work
The module on Advanced and contemporary theoretical perspectives in social work introduces students to major theories in contemporary social work. The module is designed to engender critical thinking in students as well as foster the ability to examine and understand phenomena and issues using different theoretical lenses. Among other emerging issues and paradigms, students shall be introduced to critical and radical social work perspectives, feminist perspectives, anti-oppressive practice, conflict theory, structuralism and postmodernism. The works of theorists such as Michel Foucault, Saul Alinsky, Paulo Freire and Frantz Fanon shall be interrogated. Students shall also be introduced to the decolonization praxis within social work as well as examining debates about indigenous social work practice.

DSWK533 Introduction to Social Work with Individuals and Families
This module introduces students to micro practice as a major method of social work that is used when working with individuals and families. The module equips students with the skills and competencies that are necessary for them to intervene and help clients using the casework method and prepares them for generalist social work practice with individuals and families. The modules emphasise the values, knowledge, processes and skills necessary for effective assessment and intervention on the micro level.

DSWK534 Introduction to Social Work with Groups
Group work practice primarily involves working with small groups within which individual and shared goals of social work clients are met. The purpose of the module on social work with groups is to equip students with theoretical and practice knowledge skills necessary to utilise the group work method as a modality in enhancing the well-being of individuals within the group work context. Students shall learn about the group work process, the role of the worker and the various techniques that are necessary for effective facilitation of group work.

DSWK535 Introduction to Social Work with Communities
Social workers who practice community work endeavour to address systemic and structural issues that create social problems. As such, they work to achieve social justice through structural change. This module shall enable students to define community work, explore the historical roots of community work, examine the various components of community work, learn about the community work process and learn about one model of community development as a building block to the module on advanced macro practice.

DSWK631 Socio-Economic Development
The module provides students with an introduction to development as a concept as well as the theories informing development policies, development skills, articulating development issues that affect the communities and solutions to improve the socio-economic development of Third World countries. Moreso, it integrates topical issues that affect and are affected by development policies adapted in developing countries with a deliberate bias on Zimbabwe as well as the dynamics of urban and rural development. The module helps students to think systematically and analytically about the socio-economic problems and issues of Third World countries with particular reference to Zimbabwe. The module also focuses on imparting knowledge to students on the selected issues of socio-economic development like housing, education, and unemployment to mention a few. It also provides the students with skills on problem-solving and management of development in Third World countries. Furthermore, it equips students with analytical skills on policy-making and reformulation where necessary. This is crucial in assisting students to apply the principles of economic development to the world of social work focusing on objectives such as helping students develop a better understanding of socio-economic challenges of the Third World in general and Zimbabwe in particular, to assist students to explore selected social policy areas, such as education, housing and unemployment and consider key issues and policy options and to assist students to apply socio-economic development ideologies to the social work profession.

DSWK634 Research Methods and Statistics

This module introduces students to social research methods. The module covers the following: research paradigms (positivism and anti-positivism), conceptualisation of qualitative and quantitative research methods, characteristics/qualities of qualitative and quantitative research methods, research problems, research questions, aim and objectives of a study and ethical considerations in research. It allows students to demonstrate an understanding of statistics, which includes the use of statistical tables and formulae in analysing and interpreting research data.

DSWK537 Advanced Social Work Practice with Individuals and Families

Building on the knowledge and generic skills acquired in the introductory module on micro practice, this module is designed to deepen students' competencies to work with individuals and families. Students shall be exposed to various theoretical approaches that can be used to work with clients. Many different practice models influence the way social workers choose to help people meet their goals. Building on

DSWK538 Advanced Social Work Practice with Communities

The module on advanced social work with communities builds on the knowledge that students would have acquired in the Introduction to Community Work module. It is designed to enable students to gain a detailed understanding of how communities function, and have an appreciation of the limits and possibilities of creating and sustaining change in communities. The module aims to develop students' knowledge of the theories and skills they need to effectively engage in community work practice. Using case studies from a range of fields of practice, students shall be able to gain a fuller appreciation of the politics and complexity of community work. Vital and innovative skills in the practice of community work shall be developed.

DSWK539 Advanced Social Work Practice with Groups

This module builds on the group work knowledge and skills that are taught in the introduction to meso practice. The module aims to deepen students' understanding of group dynamics and applicable theories when using this method of intervention. The module familiarises students with the principles of selected group work theories and techniques for effective advanced practice. As such, students shall be able to evaluate and apply theories of group dynamics and group structural variables used in social group work practice. The approaches covered include Cognitive behaviourism, Feminism, Psychoanalysis, Humanism and Empowerment/self-directed approaches. Using the approaches above, this module enables students to; plan, formulate, and implement effective group interventions with diverse populations.

DSWK546 Occupational Social Work

Occupational social work (previously known as industrial social work) is an area of specialisation in social work which focuses on interventions at the workplace. It seeks to meet the welfare needs of employees whilst also contributing to the realisation of organisational goals. The module covers the following: definition of occupational social work, history of occupational social work, theories underpinning occupational social work, social problems and social issues undermining the social functioning of workers and their families (conflict, HIV and AIDS, substance abuse, sexual orientation etc.), employee assistance programmes. The module also considers corporate social responsibility initiatives. Emphasis shall be on how social workers intervene to address the myriad of problems or issues at the workplace and shall encompass interventions at micro, meso and macro levels.

DSWK 639 Work Integrated Learning

In the third year of study, students shall go for work-related learning for a period ranging from 8 to 12 months. During the placement period, students are expected to be in settings that provide them with the opportunity to undertake a range of social work roles which expose them particularly to the three primary methods of social work intervention which are micro, meso and macro practice. It is also expected that students shall be exposed to administration and research among other learning experiences. In work-related learning, students shall have the opportunity to integrate the theory taught in class into practice. During the placement period, students are expected to be in settings that provide them with the opportunity to undertake a range of social work roles which expose them particularly to the three primary methods of social work intervention which are micro, meso and macro practice. It is also expected that students shall be exposed to administration among other learning experiences. At least two visits and two telephonic supervision sessions shall be done by the academic supervisor from the University to ensure that students are monitored and supported in their learning. It is also expected that students shall be placed in agencies where there are social workers who will play the role of agency supervisor. In cases where this is not possible, the university shall appoint a social worker from other nearby organisations to regularly monitor and supervise the student in conjunction with the agency contact person under whom the student shall be placed.

DSWK632 Social Policy

Social policy is increasingly being considered as a method of social work practice. This module introduces students to the study of social policy and social services. Specifically, the module enables students to understand how social policies are used as instruments for promoting and safeguarding human well-being. It covers the following: Conceptualisation of social policy, objectives of social policy, determinants of social policy, social policy process, including the main actors in the

policy process, models of social policy and social services in Zimbabwe. This module shall also equip students with the knowledge and skills needed to undertake meaningful social policy analysis. The module will also expose students to social policy analysis: a systematic and scientific evaluation of the extent to which a social policy can achieve its intended goals or objectives. Social policy analysis is carried out either before the policy is implemented or after the policy has been implemented. Thus, social policy analysis focuses on either the potential of the policy or its actual impact. This module shall therefore equip students with the knowledge and skills needed in undertaking meaningful social policy analysis. Students shall be exposed to the different approaches to social policy analysis. Students shall also be allowed to undertake a policy analysis of a policy of their choice.

DSWK633 Management and Administration of Social Welfare Organisations

Through career progression in various fields of practice, most social work graduates become administrators within welfare organisations and other related settings. In some cases, entry-level social workers are required to provide direct supervision and leadership to junior staff, especially paraprofessionals. It is therefore essential that social work graduates should be fully capacitated to handle management, administration and supervision functions as they enter the world of practice. To this end, this module is designed to equip students with skills in management, administration and supervision. Students will be introduced to various theories and models that are used in management and administration.

DSWK540 Integrated Fields of Social Work Practice

This module exposes students to integrated practice in social work focusing on varied fields. Using the major methods of social work intervention students shall be introduced to specialised social work intervention focusing on persons with disabilities, community health; social work with refugees and migrant communities and gerontology among other thematic areas that will be selected in response to the prevailing socio-economic and political landscape. Each of the thematic areas shall be explored in detail and students will be taught how to integrate their theoretical and practice skills when working with these diverse population groups.

DSWK545 Disaster Management

Disaster management is an important area of practice in social work. Disaster management seeks to mitigate the negative impact of emergencies (such as natural disasters, and human-made disasters) on human well-being. The module covers the following topics: rationale for humanitarian practice, emergency assistance, disaster preparedness and recovery strategies, prevention, early warning systems, vulnerability assessments and resource mobilisation.

DSWK636 Child Protection

This module focuses on laws, policies, services and regulations that protect children from abuse, violence, neglect and exploitation. A holistic approach to the needs of children shall be adopted. Special attention shall be given to risk factors that children and their families are exposed to. Relevant topics covered include child labour, harmful cultural practices, children in need of alternative care, birth registration, child abuse (sexual, physical, psychological and neglect), child justice, child trafficking and child protection in emergencies and case management. Relevant human rights instruments shall be looked at to understand how these can be harnessed for effective child protection.

DSWK638 Research Project

Students shall be required to undertake research on a topic of their choice subject to approval by the Department. The dissertation provides students with an opportunity to apply their research knowledge and skills. To this end, students shall carry out an empirical study under the guidance of a supervisor appointed by the Department. Students choose a topic relevant to social work which must be approved by the supervisor appointed by the Department. Students shall be involved in the entire research process from the conceptualisation of the study to the write-up of the dissertation. The required length of the dissertation must be between 10 000- 15000 words.

DSWK547 Programme Design and Management

Programme design and management have become an integral part of the day-to-day activities in many human service organizations within the public sector, the private sector and more so in the Non-profit sector context. Given that social policies are realised via social projects and programmes, skills in project and programme design and management have become widely sought after. This module in programme design and management provides a solid educational foundation for students to be able to plan and manage successful development projects and programmes. The module combines knowledge, tools, techniques and methods that are commonly utilised in managing successful programmes and projects in any field whilst providing insight into the complex challenge of managing people-oriented development projects.

DSWK635 Social Entrepreneurship
Social entrepreneurship is a field and practice that is increasingly gaining prominence as an effective approach to social change. It is a practice that has seen business and non-profit leaders designing, growing, and leading mission-driven enterprises in a way that has led to the blurring of boundaries between the for-profit and the non-profit sector. As the traditional lines blur between non-profit enterprises, government, and the private sector, social work students must understand both the opportunities and challenges in this new landscape. As such, the module on social entrepreneurship introduces students to this relatively new area of inquiry. Students shall largely engage in case-based learning and examine the history, development, major debates and growth of social entrepreneurship as a field of inquiry.

DSWK548 Humanitarian Practice in Emergencies
Humanitarian practice in emergencies is an important area of practice in social work. Humanitarian practice seeks to mitigate the impacts of emergencies (such as natural disasters ad armed conflicts) on human well-being. The module covers the following topics: rationale for humanitarian practice, emergency assistance, disaster preparedness and recovery strategies, prevention, early warning systems, vulnerability assessments and resource mobilisation.

DSWK544 Social Planning and Social Development
This module focuses on how social planning can be used to achieve the goals of social development. The strategies for achieving social development shall be examined. These strategies include investments in human and social capital, employment creation and decent work, asset building, promoting microenterprises and social protection. The focus shall also be on the nature of social planning and the theories underpinning social planning. The module also covers social planning techniques. The African Union Social Policy Framework shall be used to contextualise the drive towards social development.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN SOCIAL WORK (CLINICAL) (MSW)

Duration:	18 months
Credit Load:	270
Minimum Credit Load:	216
Maximum Credit Load:	360
Minimum MBKs Credits:	234
ZNQF Level;	9

PURPOSE OF THE PROGRAMME

The programme aims to enhance knowledge, skills and competencies in clinical social work as a specialised field. These will be achieved through:

- Producing graduates who can provide leadership in clinical social work settings.
- Equipping students with the knowledge and skills to enable them to engage in social planning of clinical social work services.
- Producing graduates with the capacity to advise governments and Non-governmental organisations on the design and implementation of social policies and programmes meant to enhance human well-being.
- Equipping students with higher level skills needed for effective clinical social work interventions.
- Producing graduates who can apply relevant statistics in addressing social problems.
- Producing graduates who can function in Multisectoral clinical settings.
- Producing graduateswho can contextualise, apply and implement the various advanced social work theories in specific settings to inform therapeutic, administrative and professional practice
- Producing graduates who produce policy plans, briefs, procedure manuals and the ability to demonstrate social work administration competencies.

- Equipping students with multiple clinical social work theoretical perspectives, techniques, skills and models.
- Producing graduates who can adapt and remain relevant in changing clinical settings through innovation, thoughtfulness, and flexibility to changing clinical settings.

ENTRY REQUIREMENTS

Normal Entry: Bachelor of Science Honours in Social Work with 2.2 pass or better; or Postgraduate Diploma in Social Work. In addition, students must be registered with the Council of Social Workers in terms of the Social Workers Act.

PROGRAMME CHARACTERISTICS

Areas of Study: Forensic Social Work, Clinical Practice with groups, Clinical Practice with individuals and Families, Management of organisations, advanced social work theories and approaches, social policy theory and practice.

Specialist Focus: Clinical Practice.

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on clinical aspects.

Distinctive Features: The programme builds on social work knowledge and skills base acquired at the undergraduate level with a focus on specialisation in clinical practice.

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in clinical settings, research institutions; positions in academia and disaster management.

Further Studies: Doctoral studies in Social Work.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, seminars, group work, field-based activities, research projects and individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports and seminar presentations.

LEARNING OUTCOMES

On successful completion of the **Master of Social Work (Clinical)** programme the graduate will be able to:

- Ability to provide direct clinical social work services to individuals, groups and families in need of emotional or mental support.
- Demonstrate the ability to see and interpret clinical and social problems and opportunities through various theoretical lenses.
- Ability to help individuals, groups and families locate resources and services to cope with life challenges and change their behaviours.
- Demonstrate ability to evaluate and treat individuals who struggle with emotional, mental, or substance abuse issues using both individual and group therapy.
- Ability to mobilise resources and engage in multiple stakeholder forums.
- Demonstrate ability to plan, and execute social work research and utilisation of findings to inform clinical social work interventions.
- Demonstrate understanding of the roles, principles and functions of supervision, management and administration within social welfare agencies.
- Ability to formulate and undertake project management in the delivery of social welfare services.
- Ability to coordinate and work within an organisational structure offering integrated and diverse clinical social services.

GENERAL PROVISIONS
Refer to the University's General Regulations.

PROGRAMME ASSESSMENT

Coursework:	Assignments	50%
	In class Tests	50%
Written Examinations:	Theoretical Modules	60%
Other:	Research Project is assessed based on a research project (75%) and Oral presentation (25%).	

PROVISION FOR PROGRESSION
Refer to the University's General Regulations.

FAILURE TO SATISFY EXAMINERS
Refer to the University's General Regulations.

GRADING AND DEGREE CLASSIFICATION
Refer to the University's General Regulations.

DEGREE WEIGHTING
Refer to the University's General Regulations.

SYNOPSES
MSW731 Research Methods and Statistics

The purpose of this module is to enable students to apply qualitative and quantitative research methods, skills and techniques to real-life situations in social work practice settings. The module is specifically designed to suit the theoretical and practice demands of the social work profession. The module therefore seeks to equip students with advanced skills in such areas as research designs, theoretical foundations, observations, tools, research data analysis and compiling findings. The students will be able to apply relevant statistics in addressing social problems.

MSW732 Management of Social Services

The purpose of this module is to assist students in gaining a deeper appreciation and understanding of social welfare organisations and their functions. It will assist students in having an advanced knowledge of the theories and principles that guide the practice of managing social welfare organisations and be able to consider the relevance of management theories in the management of social organisations in Zimbabwe and beyond. Focused attention shall be given to management roles and functions, inter alia, management theories, strategic management, authority delegation and decentralisation, human resource management, change management, innovation and control and stress and time management.

MSW733 Advanced Social Work Theories and Approaches

The module looks at the theoretical and philosophical foundations of social work at an advanced and in-depth level. It explores the various social theoretical approaches and subsequent paradigms that form the knowledge base of social work, identifying that the complexity of human beings, their contexts and social problems necessitates the generation of knowledge from diverse professional fields. The module looks at the theories, methods and philosophy of social work as well as the impact of globalisation on social work theory and practice. It also looks into the exploration, assessment and planning of social work interventions in various contexts. Change-oriented intervention theories, the person-in-environment perspectives, Theories for community social work inter and intra-personal theories in social work and the integration of theory and practise in social work are central issues in this module. At the end of this module, students must be able to contextualise, apply and implement the various advanced social work theories in specific settings to inform therapeutic, administrative and professional practice

MSW734 Social Policy Theory and Practice

The module seeks to expose students to an advanced theoretical and practical base to social policy-making processes and analysis within local, regional and global contexts. This is achieved through exposing students to the various theoretical and applied policy formulation theories and models. The module grounds students in such issues as the philosophical fundamentals of policy, conceptualising social policy, the history of social policy, and theoretical foundations of social policy conservatism, liberalism, neoliberalism, marxism, post-structuralism, and the political economy among others. It also looks into the policy-making process, agenda setting, advocacy coalition framework, policy coordination, the policy community or network and the multiple streams framework,he punctuated equilibrium, explaining stability and change in policy, policy implementation, theory and practice, and comparative social policy. Rational choice theory and policy evaluation are central to the module. The module produces a cadre who can produce policy papers, position papers, programme evaluation reports, fiscal analysis papers, and manuals among others. The module produces a student who is able to produce policy plans, briefs, and procedure manuals and the ability to demonstrate social work administration competencies.

MSW735 Forensic Social Work

This module introduces students to the practice of forensic social work and the various fields and roles in which forensic social work is applied within the criminal justice system. Forensic social work is a critical practice in prisons, courts and juvenile centres. As such students shall be equipped with knowledge and skills in forensic social work with adult and juvenile offenders, appearing in court as expert witnesses, writing forensic background reports for courts and working on rehabilitation of drug and alcohol addiction in the criminal and juvenile justice system. Students shall also learn about forensic interviewing and evaluation techniques, forensic science techniques in social work and dealing with aggressive prosecutors when providing expert testimony on behalf of accused persons.

MSW736 Advanced Clinical Practice with Groups

The purpose of this module is to equip students with advanced knowledge and skills utilised when using group work as a modality in the treatment or helping of individuals within the group work context. In this module, students shall be introduced to several group work theories and practice techniques for advanced practice. Students shall also learn about theories of group leadership, data gathering and assessment techniques. Topical issues in group work such as group stages, group dynamics, member roles, group processes, and individual and group goal setting shall be covered. Students shall also learn about the various types of groups and the facilitation skills required for the competent handling of group work processes.

MSW737 Advanced Clinical Practice with Individuals and Families

The module is designed to equip students with the ability to use appropriate clinical knowledge and skills in assessment and intervention processes when helping people suffering from a diverse range of ills. Building from knowledge gained at the undergraduate level, students deepen their understanding and practical application of various therapeutic models. Students shall learn the various counselling models used in advanced clinical practice. These include but shall not be limited to; Psychodynamic approaches, Experiential and relation-oriented therapies, and Cognitive behavioural approaches. Several theoretical models of crisis intervention and trauma counselling shall also be covered. Students shall also learn how to competently integrate various models and theories in the helping process. Among other core areas, the themes that will be covered in this module are; assessment, intervention, evaluation and discharge planning in psychotherapy, psychiatric assessment, Diagnostic and Statistical Manual of Mental Disorders; Loss, grief and mourning, case management within the child welfare system, child and adolescent psychiatry, palliative care, clinical intervention in school social work, supervision in clinical social work, ethics and research in clinical social work.

MSW738 Family Systems and Relationships Therapy

This module exposes clinical social work students to advanced therapeutic skills, techniques and theoretical models of family systems and relationships therapy. The module adopts an integrative approach that is designed to hone students' ability to offer therapeutic intervention to families, couples and individuals. The module shall cover various topics which include but are not limited to; the family and family systems, premarital counselling, structural family therapy, strategic family therapy, solution-focused family therapy and narrative therapy. The module is designed to help clinical social work students develop their approach to family and relationships therapy while at the same time being able to use an integrative approach to family and relationships therapy that borrows from multiple theoretical perspectives. Self-knowledge is critical in family and relationship therapy, as such students are expected to reflect deeply on their own families, relationship experiences and cultural beliefs and explore how these factors may shape their own identity and practice as therapists.

MSW739 Advanced Drugs and Substance Addiction Treatment

Drugs and substance addiction is a complex phenomenon that is caused by multiple factors which include among others, social, cultural, biological and economic factors. The module on introduction to substance and addiction rehabilitation is designed to equip clinical social work students with knowledge on how to work with recovering addicts in individual practice or as part of multi-disciplinary teams. The module shall cover various topics which include but are not limited to, types of addictions, theories of addiction, assessment and diagnostic formulation, treatment planning and facilitation of individual and group therapeutic sessions. Effective drug and substance addiction treatment involves a comprehensive approach that involves legal services, family services, educational services, medical and mental health services. To this end, the module buttresses the need for an ecosystem approach to drug and substance addiction treatment that requires the services of multi-disciplinary teams.

MSW 831 Work-Related Learning

As part of the requirements for obtaining a Master of Social Work Degree in all areas, students are expected to embark on work-integrated learning. The duration of the placement shall be 3 months. The fieldwork component shall take place during the third and final semester. All placements of students should be done under the direct supervision of a qualified social worker in Clinical Social Work. Students are expected to undertake advanced tasks that are reflective of senior social work roles in Clinical Social Work.

MSW832 Dissertation

Research is a key component in designing models, implementing, monitoring and evaluating policies and programmes both at global, regional and national levels. The purpose of the Dissertation is for the students to showcase their ability to conduct innovative research. Each student is expected to come up with a research topic, write the research proposal, clearly articulate either the qualitative research methods or the quantitative research methods or both, the research design(s), research tools, data management and analysis, presentation and discussion of research findings. The dissertation course allows the students to provide valuable recommendations for policies and programmes that would result in the positive transformation of the socio-economic, religious and environment of the population. Such recommendations from the dissertation course would subsequently enhance societal innovation and industrialisation. Students are required to undertake research on a topic of their choice subject to approval by the Department. The selected topic shall be relevant to Clinical Social Work. The study should be undertaken under the guidance of a supervisor appointed by the Department. The minimum length of the dissertation shall be 16 000 words.

ELECTIVES

MSW 712 Scenario Planning
The science of scenario planning is one of the ways by which we can manipulatively adjust to and prepare for a future that we deem most desirable. This module introduces students to the science and practice of scenario planning. The module on scenario planning equips students with the ability to map future scenarios and how best organisations and countries not only shape but also prepare for any future eventualities. Students shall learn about the history, models and approaches to the practice of scenario planning. Using a hands-on methodology, students shall be taught to practical identify a key issue, analyse driving forces, map out scenario frameworks, communicate scenario stories and pursue strategies that lead to particular scenario outcomes.

MSW 713 Change Management Theory and Practice
This module introduces students to the science and practice of change management in organisations. Adaptation is critical if organisations are to remain relevant. Innovation, thoughtfulness and flexibility are critical elements of any change process. This module introduces students to change management, its history, its tenets, the various theories and models of change management and the psychology of change management. Within the organisational context, change management shall be approached as a multi-level practice requiring change and alignment at the individual, team and organisational level for change interventions to succeed.

MSW745 Advanced Project Management for Development Interventions
This module is designed to equip students with high-level competence in the design and implementation of development interventions in communities. The introductory part of the module covers, tools, techniques and methods that are commonly utilised in designing development interventions. The most critical aspects of the module focus on examining why development interventions often fail. Using case-based learning, students shall learn about the common pitfalls in project planning and implementation. Students shall learn about the efficacy of indigenous knowledge systems and approaches in programme planning and implementation. Development interventions shall be looked at as a science that needs to be grounded in the local context and implemented in a manner that leads to both material and mind liberation of beneficiary populations.

REGULATIONS FOR MASTER OF SCIENCE DEGREE IN SOCIAL WORK (MSW) (DEVELOPMENTAL)

Duration:	18 months
Credit Load:	270
Minimum Credit Load:	216
Maximum Credit Load:	360
Minimum MBKs Credits:	234
ZNQF Level	9

PURPOSE OF THE PROGRAMME
The programme aims to enhance knowledge, skills and competencies in developmental social work as a specialised field. These will be achieved through:

- Producing graduates who can provide leadership in the social sector.
- Equipping students with the knowledge and skills to enable them to engage in social planning.
- Producing graduates with the capacity to advise governments and Non-governmental organisations on the design and implementation of social policies and programmes meant to enhance human well-being.
- Producing graduates who can apply relevant statistics in addressing social problems.
- Equipping students with various social theoretical approaches and subsequent paradigms that form the knowledge base of social work, identifying that the complexity of human beings, their contexts and social problems necessitates the generation of knowledge from diverse professional fields.
- Producing graduateswho are grounded in the philosophical fundamentals of policy, conceptualising social policy and the history of social policy with high-level analytical skills.
- Equippingstudents with the understanding of what constitutes a social protection package and what determines the choice of a particular social policy package, locating and challenging the root causes of inequality and poverty amongst the marginalised and disenfranchised peoples.
- Producing graduates who can adapt and remain relevant in changing practice settings through innovation, thoughtfulness, and flexibility to changing clinical settings.

ENTRY REQUIREMENTS
Normal Entry: Bachelor of Science Honours in Social Work with 2.2 pass or better, or Postgraduate Diploma in Social Work. In addition, students must be registered with the Council of Social Workers in terms of the Social Workers Act.

PROGRAMME CHARACTERISTICS

Areas of Study: Community development and practice, Comparative Social Policy, Social Planning, Social Protection, Critical Social work; Management of organisations, advanced social work theories and approaches, social policy theory and practice.

Specialist Focus: Developmental Social Work

Orientation: Research and innovation oriented. Teaching and learning are professionally oriented and focused on social development aspects.

Distinctive Features: The programme builds on social work knowledge and skills base acquired at the undergraduate level with a focus on specialising in developmental social work.

CAREER OPPORTUNITIES AND FURTHER EDUCATION

Employability: Careers in social development, non-governmental organisations, social policy and planning, research institutions; positions in academia and disaster management.

Further Studies: Doctoral studies in Social Work.

PROGRAMME DELIVERY

Teaching and Learning Methods: Lectures, seminars, group work, field-based activities, research projects and individual independent study.

Assessment Methods: Written and oral examinations, tests, written and practical assignments, field reports and seminar presentations.

LEARNING OUTCOMES

On successful completion of the **Master of Social Work (Developmental)** programme the graduate will be able to:

- Identify the influence of the relationship between socio-political and economic factors on social services.
- Demonstrate capacity to provide leadership in the social sector.
- Ability to engage in social planning.
- Demonstrate capacity to identify, select and implement various techniques, methods and means of raising awareness, developing critical consciousness about the structural forces of oppression, exclusion and disempowerment, and use such awareness to engage people as change agents.
- Demonstrate ability to plan, and execute social work research and utilisation of findings to inform social work intervention.
- Ability to undertake project monitoring tasks and do project evaluations.
- Demonstrate understanding of the roles, principles and functions of supervision, management and administration within social welfare agencies.
- Demonstrate ability to see and interpret social problems and opportunities through various theoretical lenses.
- Formulate project plans for the funding of social services.

GENERAL PROVISIONS

Refer to the University's General Regulations.

PROGRAMME ASSESSMENT

Coursework:	Assignments	50%
	In class Tests	50%

SYNOPSES

MSW731 Research Methods and Statistics

The purpose of this module is to enable students to apply qualitative and quantitative research methods, skills and techniques to real-life situations in social work practice settings. The module is specifically designed to suit the theoretical and practice demands of the social work profession. The module therefore seeks to equip students with advanced skills in such areas as research designs, theoretical foundations, observations, tools, research data analysis and compiling findings. The students will be able to apply relevant statistics in addressing social problems.

MSW732 Management of Social Services

The purpose of this module is to assist students in gaining a deeper appreciation and understanding of social welfare organisations and their functions. It will assist students in having an advanced knowledge of the theories and principles that guide the practice of managing social welfare organisations and be able to consider the relevance of management theories in the management of social organisations in Zimbabwe and beyond. Focused attention shall be given to management roles and functions, inter alia, management theories, strategic management, authority delegation and decentralisation, human resource management, change management, innovation and control and stress and time management.

MSW733 Advanced Social Work Theories and Approaches

The module looks at the theoretical and philosophical foundations of social work at an advanced and in-depth level. It explores the various social theoretical approaches and subsequent paradigms that form the knowledge base of social work, identifying that the complexity of human beings, their contexts and social problems necessitates the generation of knowledge from diverse professional fields. The module looks at the theories, methods and philosophy of social work as well as the impact of globalisation on social work theory and practice. It also looks into the exploration, assessment and planning of social work interventions in various contexts. Change-oriented intervention theories, the person-in-environment perspectives, Theories for community social work inter and intra-personal theories in social work and the integration of theory and practice in social work are central issues in this module. At the end of this module, students must be able to contextualise, apply and implement the various advanced social work theories in specific settings to inform therapeutic, administrative and professional practice

MSW734 Social Policy Theory and Practice

The module seeks to expose students to an advanced theoretical and practical base to social policy-making processes and analysis within local, regional and global contexts. This is achieved through exposing students to the various theoretical and applied policy formulation theories and models. The module grounds students in such issues as the philosophical fundamentals of policy, conceptualising social policy, the history of social policy: Theoretical foundations of social policy conservatism, liberalism, neoliberalism, Marxism, post-structuralism, and the political economy among others. It also looks into the policy-making process: agenda setting, advocacy coalition framework, Policy coordination, the policy community or network and the multiple streams framework. The punctuated equilibrium: explaining stability and change in policy, policy implementation, theory and practice, comparative social policy, rational choice theory and Policy evaluation are central to the module. The module produces a cadre who can produce policy papers, position papers, programme evaluation reports, fiscal analysis papers, and manuals among others. The module produces a student who can produce policy plans, briefs, and procedure manuals and the ability to demonstrate social work administration competencies.

MSW740 Advanced Community Development Theory and Practice
The module is designed to equip students with high-level analytical skills for macro practice. Using advanced critical analysis methods, students learn about the history and rationale for community work, community development theories and models. The nexus between community development and social policy shall also be interrogated. On the other hand, students also learn about indigenous knowledge systems for community development and how such a knowledge base should be valued and taken into account when crafting community development interventions. Students shall be required to do case studies of community development interventions and provide a critical appraisal using the knowledge base acquired in class.

MSW 741 Comparative Social Policy
This module examines social policy-making in different countries and focuses on specific areas such as health, education and personal social services. The main focus of the module is on unravelling the drivers in social policy-making in different countries, particularly within the context of the North-South divide. The module thus provides students with an opportunity to interrogate some of these drivers in policy-making. Students shall draw from the African Union Social Policy Framework to understand the focus of social policy in Africa. The module also enables students to reflect on what would constitute an appropriate social policy regime for Zimbabwe.

MSW742 Social Planning
This module explores global trends in social planning with particular reference to the different approaches to social planning, including the theoretical and philosophical perspectives in social planning. The module also examines the impact of globalisation on social planning. Issues and challenges in social planning shall be examined. Focus shall also be put on case studies that show different approaches to planning. In the end, students should be able to suggest an appropriate approach to social planning that can be adopted in Zimbabwe and other African countries.

MSW743 Social Protection
This module explores the different approaches to social protection and how these speak to international and regional human rights instruments. In particular, approaches to social protection adopted by the Asian Development Bank, International Labour Organisation, United Nations Children's Fund (UNICEF) and the World Bank shall be examined. The module enables students to understand what constitutes a social protection package and what determines the choice of a particular social policy package. Students shall have an opportunity to make a critical analysis of Zimbabwe's National Social Protection Policy to identify its strengths and weaknesses and possible pathways for extending social protection to everyone in society.

MSW 744 Critical Social Work
Critical social work seeks to locate and challenge the root causes of inequality and poverty amongst the marginalised and disenfranchised peoples. It is a type of social work that strives to attain structural rather than cosmetic changes in the economic, social and political arena. This module introduces students to critical /radical social work, its history and its tenets. Apart from using social work writers on critical or radical social work, the works of critical writers such as Dambudzo Marechera, Saul Alinsky, Paulo Freire, Steve Biko and Frantz Fanon among others shall be interrogated as they provide a frame of reference for, critical, reflective and radical social work practice.

MSW 831 Work-Related Learning
As part of the requirements for obtaining a Master of Social Work Degree in all areas, students are expected to embark on work-integrated learning. The duration of the placement shall be 3 months. The fieldwork component shall take place during the third and final semester. All placements of students should be done under the direct supervision of a qualified social worker in Clinical Social Work. Students are expected to undertake advanced tasks that are reflective of senior social work roles in Clinical Social Work.

MSW832 Dissertation

Research is a key component in designing of models, implementing, monitoring and evaluating policies and programmes both at global, regional and national levels. The purpose of the Dissertation is for the students to showcase their ability to conduct innovative research. Each student is expected to come up with a research topic, write the research proposal, clearly articulate either the qualitative research methods or the quantitative research methods or both, the research design(s), research tools, data management and analysis, presentation and discussion of research findings. The dissertation course allows the students to provide valuable recommendations for policies and programmes that would result in the positive

transformation of the socio-economic, religious and environment of the population. Such recommendations from the dissertation course would subsequently enhance societal innovation and industrialisation. Students are required to undertake research on a topic of their choice subject to approval by the Department. The selected topic shall be relevant to Clinical Social Work. The study should be undertaken under the guidance of a supervisor appointed by the Department. The minimum length of the dissertation shall be 16 000 words.

ELECTIVES

MSW 712 Scenario Planning
The science of scenario planning is one of the ways by which we can manipulatively adjust to and prepare for a future that we deem most desirable. This module introduces students to the science and practice of scenario planning. The module on scenario planning equips students with the ability to map future scenarios and how best organisations and countries not only shape but also prepare for any future eventualities. Students shall learn about the history, models and approaches to the practice of scenario planning. Using a hands-on methodology, students shall be taught to identify a key issue, analyse driving forces, map out scenario frameworks, communicate scenario stories and to pursue strategies that lead to particular scenario outcomes.

MSW 713 Change Management Theory and Practice
This module introduces students to the science and practice of change management in organisations. Adaptation is critical if organisations are to remain relevant. Innovation, thoughtfulness and flexibility are critical elements of any change process. This module introduces students to change management, its history, its tenets, the various theories and models of change management and the psychology of change management. Within the organisational context, change management shall be approached as a multi-level practice requiring change and alignment at the individual, team and organisational level for change interventions to succeed.

MSW745 Advanced Project Management for Development Interventions
This module is designed to equip students with high-level competence in the design and implementation of development interventions in communities. The introductory part of the module covers, tools, techniques and methods that are commonly utilised in designing development interventions. The most critical aspects of the module focus on examining why development interventions often fail. Using case-based learning, students shall learn about the common pitfalls in project planning and implementation. Students shall learn about the efficacy of indigenous knowledge systems and approaches in programme planning and implementation. Development interventions shall be looked at as a science that needs to be grounded in the local context and implemented in a manner that leads to both material and mind liberation of beneficiary populations.

LIBRARY DEPARTMENT

INTRODUCTION

The Midlands State University (MSU) Library comprises multiple individual libraries, including the main and nine branch libraries. These libraries provide critical academic support to the university's mission in various areas, such as teaching and learning, research, innovation, community engagement, and industrialisation, in line with national development strategies. The MSU Library is crucial in enabling the Education 5.0 design, which aims to leverage natural resources and intellectual capital to promote and achieve sustainable, inclusive socio-economic development. The Library provides top-quality, innovative, and user-focused services, spaces, and collections in a welcoming study environment that encourages teaching and learning, research, and innovation.

1. SERVICES

The Library offers a variety of information access services to its clients to assist them in their research needs and these include:

a) Book Borrowing
b) Inter-Library Loan
c) Reprographic Services
d) Research Support
e) E-resources access
f) Reading and Study Spaces

2. LIBRARY SPACES

The MSU Library has established spaces to provide comprehensive support for the university's teaching and learning, research, and innovation. The aim of creating these spaces is to enable users to explore their minds while enjoying the atmosphere of these areas.

2.1 Reading and Study

These Sections of the libraries are designed to provide readers with a peaceful and studious environment. Users can fully immerse themselves in their research and independent reading with comfortable reading desks and carrels. The spaces also offer wifi access, enabling users to access online resources and conduct research efficiently.

2.2 Learning Commons

A great feature in MSU libraries is the learning commons, which provide access to networked desktop computers with high-speed internet. These spaces also serve as venues for undergraduates, allowing individuals to enhance their research skills and knowledge.

2.3 Research Commons

This space is primarily designed for postgraduate students who wish to research independently.

2.4 24-Hour Study Centres

These are dedicated spaces opened 24 hours a day and designed to facilitate a focused, quiet, and comfortable study experience. The 24-Hour Study Centres are fitted with plug-top desktops for plugging in laptops and have WIFI hotspots.

2.5 Branch Libraries

The MSU Libraries are available on all campuses and learning centres due to the university's multicampus structure. The libraries are conveniently located and easily accessible for all students and staff. All 10 libraries have plug-top desks and wireless hotspots for internet connectivity, which support the University’s Bring Your Device (BYOD) policy. This allows students to have the best experience while using the facilities.

3. MSU LIBRARY COLLECTIONS

3.1 Print Book Collection

Over the years, the MSU Library has established a robust hardcopy book collection of books that are well-selected recent and relevant titles of books necessary for programs on offer.

3.2 E-Books

The Midlands State University Library has extensive eBooks covering all university programmes. These eBooks

are accessible to students and staff both on and off campus.

3.3 E-Journals

The library also has a significant collection of full-text electronic journal collections (e-journals) that can be accessed on and off campus. Like the e-books, the e-journal collections support all programmes the University offers.

3.4 E-Reserves

The Library provides eReserves in the form of prescribed e-books that support all programmes and are accessible to staff and students through the Library's subject-based electronic guides.

3.5 Special Collections

The Special Collections of the MSU Library include various items such as print journals, past examination papers, novels, the African Writers Series, materials from International Organisations, Government publications, maps, multimedia collections, and the MSU History book.

3.6 Reference Collection

The Library offers access to in-house standard references such as encyclopedias, handbooks, and dictionaries to assist researchers with quick reference inquiries. You can approach the Client Services librarian at the Information Desk for assistance.

3.7 Core Collection

The Library Core Collection is an essential set of hard-copy textbooks critical to the University's academic programs. The faculty librarians work closely with academic staff to ensure the collection is curated precisely and in relevance.

3.8 Institutional Repository

The Midlands State University Institutional Repository is an open-access digital archive that collects, maintains, disseminates, and distributes the research output of Midlands State University (MSU) community members. The electronic archive promotes MSU's intellectual output in line with the Education 5.0 design to advance research and innovation. This open-access platform contains research papers, dissertations and theses, books and book chapters, and conference papers presented by MSU researchers.

4. LIBRARY MEMBERSHIP

The following categories of clients are entitled to use the MSU Libraries:

a) Registered students of the Midlands State University.
b) Teaching and Non-teaching Staff.
c) Approved Readers, e.g. students from other Universities and professionals.
d) MSU Alumni

5. PROCEDURES FOR ACCESSING LIBRARY SPACES AND SERVICES

a) Registered students and staff shall have access to all campus libraries upon presenting their valid university identification cards (IDs).
b) Books are issued to clients upon presenting their valid university ID cards.
c) The ID card holder is liable for all transactions for which his or her card is used.
d) Approved Readers (who include Alumni Association members; Students and staff from the Zimbabwe University Libraries Consortium; students and staff from colleges; government officials and general researchers from recognised institutions are required to pay a prescribed fee to have access to Library spaces for studying and research. Approved readers cannot borrow books from the Library but can only use them in-house.

6. MSU LIBRARIES GENERAL RULES AND REGULATIONS

The primary purpose of these rules is to safeguard the common interest of all

library users and to enable the Library to function as efficiently as possible. Here is a brief outline of some MSU Library Rules and Regulations.

- The right to use library facilities is exclusively reserved for bonafide students and staff of MSU.
- Users must present a valid MSU ID Card to the security personnel upon entering the Library.
- A borrower will be held responsible for all material that is taken out under their name and may not lend such material to other people. Borrower privileges are not transferable.
- Lost staff or student cards must be reported immediately to the Libraries.
- Any acts of theft or attempted theft of library items are not tolerated in the library.
- Personal belongings like bags should be deposited in the Baggage area against a token/disc. Loss of the token will attract a fine.
- Smoking and eating in the Library is strictly prohibited.
- Drinking of water is only allowed at designated water dispenser points.
- Cellphones and laptops should be put on silent mode or otherwise attract a fine.
- Mutilation of Library materials by marking, underlining, or removing pages or portions of pages is strictly prohibited.
- The Library does not issue torn or defaced books; should readers lose, damage, or deface library resources they will be requested to replace them.
- All items taken in and out of the Library are subject to security checks at the Library exit point.
- Loss of Library material should be reported immediately.
- Library materials are not to be re-shelved by users as this leads to misplacement of a book. A misplaced book is like a lost book.
- Journals, dissertations, and past exam papers are reference sources for in-house use only.
- Users should not remove/ unplug computer cables/connections, network cables, and other accessories in the library.
- All payments are to be done at the cash office (Bursar) or bank, receipts are to be brought to the Library for verification.
- Clients with overdue fines, lost library books, or both will be denied clearance and access to results until the balances are settled.
- Library staff on duty shall not be held responsible for the loss of any personal belongings of users in the Library.
- Changing the settings and display of the computers in the Library is not permitted.

NB: Anyone who violates the rules and regulations of the library would be liable to lose the privilege of library membership and may be barred from using the library facilities. The Librarian reserves the right to suspend the membership of any client/ user found misbehaving in the Library.
